ISSUE No. 281

What are the perceptors of God?

2.

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as "Channels" for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious 'trance' levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter. Paul Shockley, Interpreter

ARE WE HOLOGRAMS OF OUR SPIRITUAL SELVES?

(COSMIC CONSCIOUSNESS AND ITS RELATION TO THE MIND)

QUESTION:

A.P. has a question. It's actually four questions. I'll read the statement and then ask the questions separately, if Awareness requests this.

"Are the material, astral and etheric worlds really holograms of increasing clarity of the celestial worlds? Is the physical person a hologram of his spiritual self? And is God the Life Force Itself, a giant multidimensional moving hologram in which each life-form reflects to some degree that main life force?"

COSMIC AWARENESS:

This Awareness indicates this as essentially correct; that this new technology of the hologram is that which can be useful in helping entities to better understand the nature of the Universal Forces; that there is essentially more to it than simply the concept of a hologram, for this is more likened unto multidimensional hologram images. Also, these hologram images contain within them the network of molecular, atomic and subatomic parts which likewise may be considered as inter-dimensional holograms, which, in their interrelationship with other parts, make up what appears to be a living creature, with sensitivities and interactions of the various atoms and parts.

This Awareness indicates that the hologram as presently developed, is simply a one dimensional reflection of light in a three or four dimensional area of space and time; that the reality as being more of what might be considered a multidimensional projection into a fourth dimensional area of time and space.

(FOLLOW-UP QUESTION):

That means that the physical person is in effect a type of hologram of his spiritual self. Is that correct?

COSMIC AWARENESS:

This Awareness indicates this in the affirmative. That wherein a holographic image, as is presently reached by technology, is such that it creates a reflection and projects this reflection onto a screen that is not flat, but is three-dimensional, a screen of space; this reflection or image is in fact only an image, but does in some ways carry certain characteristics and qualities of that which it emanates from as a source. That were it possible to enhance the holographic qualities of this action so that other principles

and qualities and characteristics were also conveyed, such as the organs, texture, and the various inner parts of that image or that source, and the molecules and atoms of that source being likewise reflected and projected into that space of the holographic picture, then, rather than merely an image, the entire being would appear, and those organs and those molecules and those atoms, reassembled in that area would in fact be reflecting a solid being from the source, via the new type of holographic projector.

How Life is Created--the 12 Holographic Exposures

That in a similar manner, entities are made in the reflection of the Universal Being, or Deity, or in another sense they are a reflection of aspects of themselves, being moved through twelve different holographic exposures. This as that which relates to the multiple, or multidimensional creations which an entity is composed of. These multidimensional creations, reflecting through a type of cosmic holographic technology as that which creates the physical body, or the vortex which draws the energies, atoms and molecules into certain positions, to follow the blueprint or genetic pattern, which eventually grows into the shape and form of the creature, or the creation, whether it is a tree, a human, an animal or other form of life.

Why Mind Can't Bring Enlightenment

This Awareness indicates that obviously, all of these words cannot add any real understanding to the mystery of life, or make it easier to comprehend, for words are mere reflective devices, and the reality is not described by mirrors of reflection into flat dimensional mental concepts, but is only understood through the experience of *being* and living the experience. The mind is a pathetic creation which can never be satisfied with its state, and always seeks to move into greater levels of understanding, but in seeking to move into these levels by putting experience into little boxes called words and concepts, the mind seldom fully experiences the reality of the higher dimensions.

This Awareness indicates however, that the mind makes a great servant, a fine computer, even though it cannot replace the need for a living companion and experiential being of higher dimensional qualities. That the mind, used as tool to probe and to accept symbols of life, to put symbols of life into words, into pictures, into designs, so that

understanding can be enhanced, this then allowing the entity to have a greater ability to experience that which is not available to the sensual apparatus of the body,—the eyes, ears, nose and fingers and taste,—the mind being able to perceive beyond sensual data, to comprehend time and space, abstract concepts and relationships between various experiences or things, places or times,—the mind becomes an excellent tool of great value, but the mind itself is limited in its ability to actually live and bring one complete enlightenment.

Our Entire Body is Our Brain

The greater function of the mind is to reflect whatever enlightenment is made available to an entity through the expansion of the entity's consciousness and awareness. This Awareness indicates that the mind is not the consciousness, is not the awareness, is not the enlightenment, but rather is the container for the reflected message that comes into and through the consciousness, and is placed in words, concepts and recorded in the mind. This Awareness indicates that as *It* is using the word 'mind', it is similar to the use of the word 'recording', in connection with the recorder, which is the brain; the brain as the recorder, the recording being the mind.

This Awareness indicates that the consciousness as that which is the receiver of information or data, and the sender of signals; that consciousness sends and receives, and mind is the recording, the brain the recorder. That the use of the word 'brain' as also including the body and its nervous system, the network that flows throughout the physical organism which records sensations, whether in the head or in the big toe, or elsewhere, for the brain is located throughout the entire body, as a recorder of experience.

This Awareness indicates that the central brain as in the head, and the sub-central nervous brain, the nerve center, as located in the stomach area and moving into the extremities from there. That consciousness as being that energy which emanates through neutrinos in and outside of the physical body, within and without, through space and through matter, allowing the consciousness to perceive into material, through material things, and through that perception to bring back information or data, and record this as mind, or data, on the recorder known as the brain, or the nervous system.

What 'awareness' is

This Awareness indicates that the perception of consciousness as that which is limited only by the individual's ability or lack of ability to travel consciously through the neutrinos of space, and to trust that reading or perception without distorting it. That the term 'awareness' as that which implies a high consciousness that is aware of the perceptions as opposed to a kind of subconscious, or unconscious perceiving as is experienced when one sleeps and dreams and travels through these neutrino contacts, or networks, but does not perceive such travels to have any reality or significance other than being for entertainment as a dream.

This Awareness indicates that the subconscious as that which is an unaware movement of consciousness into any area and into any time zone. The term 'consciousness' as that which is essentially associated with being aware of the movement of consciousness, or energies, through neutrino networks, to various places or various times, or into various experiences, and also into experiences which go beyond that which the senses perceive. One can, for example, be conscious of what is on the other side of the wall, or what is on the other side of an entity's expression. One can be conscious of what is on the other side of a behavior or a habit or an action, and this brings the hidden into the light.

What is 'Cosmic Consciousness'?

The action of bringing that which is hidden into the light is the action of making something conscious. The term 'Cosmic Consciousness', or 'Cosmic Awareness', is that which is associated with a consciousness that expands, or is capable of expanding enough to perceive events, situations, or circumstances or things which are anywhere within the cosmos, or anywhere within the concept of eternity. That the term 'Cosmic Awareness', or 'Cosmic Consciousness' includes the perception into time and space in an unlimited degree; the movement of consciousness through the neutrino network, to the far reaches of time, or the far reaches of space, to examine what is, or to move into things which are less remote and more in the present, more at hand.

The Limitations of Cosmic Awareness

This Awareness indicates that one can be cosmically aware in varying degrees, for one cannot be aware of all things at one time, but must be aware of one thing or one group of things or one system of things, or one relationship of things at a particular moment. That if one is aware of all things at one time, the entity could only be aware of the entire *system* of all things at one time, and would be unable to comment on the individual things during that time. Therefore, when one enters into states of Cosmic Consciousness, or Cosmic Awareness, that entity has certain limitations as to what area is being observed, for if one is observing Aunt Millie's back, one cannot also be aware of a planetoid in another galaxy that suddenly erupted as an explosion.

If one is being aware of that which occurred 20,000 years ago in a particular place, one may miss something which is occurring in the room at the present time. Therefore, it is important to understand the limitations of that which is called Cosmic Awareness, or Cosmic Consciousness, for like a computer, if the computer is programmed to solve a particular equation, it cannot at the same time be solving a totally different equation, unless through some other network which would be a different system.

This Awareness indicates that therefore, even that which entities might consider as Cosmic Awareness or as Cosmic Consciousness having its limitations, may be better understood if entities can recognize the need to allow for one thing at a time to be observed. There are forces of multitudinous nature

constantly in movement, some coming into existence, some fading from existence, at different durations, so frequently and in such mass as to make description, or observation of these impossible. That through any interpreter, or any individual experiencing Cosmic Consciousness, only that which is in focus for that interpreter or individual will be seen by that interpreter.

This Awareness indicates that far across the galaxy, another entity on another planet, in another system at this time is expressing and experiencing what may be termed Cosmic Consciousness, and that entity is expressing and experiencing this type of consciousness in a different tongue, a different language, different circumstances, circumstances totally unlike that which is experienced in this plane by this Interpreter, and the entity's experience of Cosmic Consciousness being totally different from that which is experienced by this Interpreter or others on this plane, does not deny the entity's experience as being valid, but only indicates that the consciousness of the cosmos has many facets, many faces, and can be expressed through multitudes, simultaneously or individually, and these expressions need not always be identical, either in language, in words, in pictures or in concepts. These expressions may even vary according to circumstances and times, and according to frames of reference. These expressions may even vary according to concepts which may appear to be in opposition.

These expressions, appearing to be in opposition may in fact be presenting certain information that IS in the cosmos, expressed in two opposing points of view. Even as these two opposing points of view may exist in the cosmos, they may be expressed in the cosmos through two different frames of reference, or two different individual interpreters. This does not deny that these interpreters are valid, but only assists in indicating that there are many facets of the Universal Consciousness. There are many faces of Awareness.

This Awareness indicates that it is for this reason that this Awareness asks entities not to assume that everything which comes through this Interpreter is infallible, not to assume that all messages are without challenge. This Awareness suggests that *It* is only presenting *indications*, whereby entities may search further and explore areas which are often unnoticed. This Awareness indicates that *It* has diversified from the question in order to clarify certain energies which the question opened.

WHAT ARE THE PERCEPTORS OF GOD ?

(DOES GOD REALLY KNOW WHEN THE SPARROW FALLS?)

(FOLLOW-UP QUESTION):

Is it true then, as the Bible suggests, that when a sparrow falls, the Creator is aware of this?

COSMIC AWARENESS:

This Awareness indicates that this may be asked in a question: "Is it true that when one of your neutrinos, or when one of the protons in your body dissolves, or ceases to be, and another comes into existence; is it true that you are aware of this?" This Awareness indicates that yes, indeed, it is true that you are aware of this, but your greater consciousness may not pay any particular attention, yet there is that portion within your being which felt this experience to some degree, though it might have been a small degree. The atom, or the proton, or the part which died, is that part which felt the experience most.

This Awareness indicates that the universe, being a living creature filled with souls, filled with cells, filled with solar systems, filled with stellar patches, starry skies, galaxies and nebulae, organs and arms and legs, heads and mouths, filled with creatures of all types, of all sizes, of all forms, filled with rocks, stones, gems, dust clouds and gases; the universe being filled with all of these various shades of matter, all of these various degrees of matter, filled with gravitational energies, with radiant energies, with moving bodies, with bodies that are inert; this universe, so alive and so moving, *may have* a sparrow falling, *may have* a comet falling, *may have* a star falling, *may have* a sparrow rising, *may have* a star rising. All of these experiences are experienced by the universe, the Deity of the Universe through *Its* many parts, *Its* many perceptors, those parts which perceive and see that which is happening.

This Awareness indicates that the question then may be asked: "What are those perceptors of God? What are those forces that the Divine Creator uses to perceive what is happening?" This Awareness indicates that these are magnetic forces; these are radiant forces; these are inert forces; these are living forces; these are the arms and legs of creatures within the universe; these are the eyes and ears of the many inhabitants on the many planets; these are the arms, legs, eyes and ears of the many creations on the various planes; interdimensional experiences and life forces; these are the sparrows that fall, the sparrows that rise.

This Awareness indicates that God sees the sparrow that falls because God *Is* the sparrow that falls.

This Awareness indicates that the living universe exists in all things within its being. The life force moves on and on and on, from one creation to another, and from another, on and on and on. This Awareness indicates that God is alive, magic is afoot, and *It* is not stopped but forever moves from moment to moment, from experience to experience, from thing to thing, and none can contain or stop that force from being what *It* is, and *It* perceives from this viewpoint, then moves on and perceives from another viewpoint. The falling sparrow, written in the book some several thousand years ago, as that portion of the Divine Life Force of God experiencing the fall, also is the present day sparrow, which likewise continues the force of God, and again may fall, and may again move into further experiences in any form *It* chooses.

MEDITATION VS. THE MIND

(DOES THE GREAT VOID REALLY EXIST?)

QUESTION:

A question from S.H. in Japan. "Awareness, can you comment on this statement from the book, *The Magic Bag*: "The great secret the overlords held and knew, (the high archangels had as yet no inkling of it), was the great void; the overlords had known of the existence of this vast field of black nothingness for what you would term as 'endless eons of time.' What its true nature was or what it could be used for, they did not know. It had been discovered by the same method that advanced students of metaphysics and yoga philosophy use to discover the inner world of you,--meditation."

COSMIC AWARENESS:

This Awareness suggests that this statment be read once more. (*STATEMENT IS RE-READ*).

This Awareness indicates that within all things of the universe, there are those which appear as being opposition to one another when observed by mind; that wherein a mind assumes there is something, the mind automatically must consider the possibility of nothing existing nowhere. That when the mind considers there is obviously nothing existing somewhere if something exists anywhere, then the mind must also consider the possibility that there is, if there is *somewhere* for nothing to exist, there must be *nowhere* for something to exist.

This Awareness indicates that the mind continually thinking in terms of polarities as that is its nature, its very essence, must continually move in opposition to its stance when it makes a statement, it must raise a question in opposition to that statement in order to observe this from the opposite point of view. Therefore, wherein an entity in meditation seeks to find self, if pursuing far enough, the entity will discover the void, and in that void will discover the universe, and in discovering that universe will realize that all of this universe existing inside one's consciousness must be nothing but illusion, or else that which is outside the consciousness is illusion and that which is inside is reality.

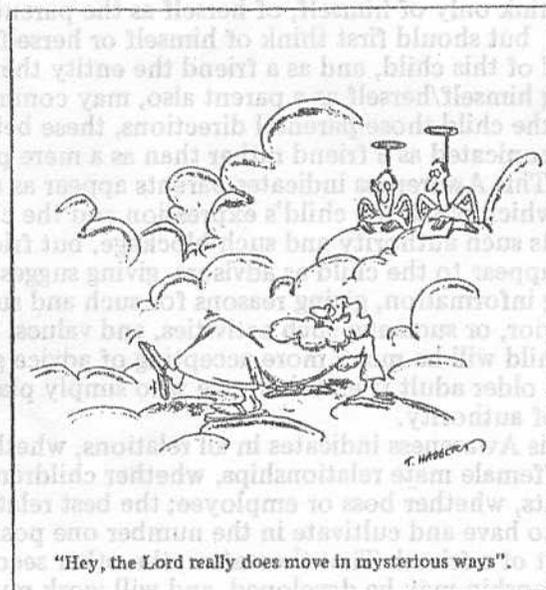

This Awareness indicates that this again is but an action of mind attempting to distinguish between illusion and reality, between that which is real, and that which is false. Obviously, a great huge universe cannot exist inside one's head, yet at the same time an entity can move into one's own head and from there expand outward infinitely in consciousness to encompass that which appears to be a universe. That such entities achieving universal consciousness, identifying with the univere, assuming or believing that they have expanded in their consciousness to contact the outer regions of the universe, yet never able to reach that void which is the actual edge of the universe,

for their consciousness continues to move ever outward, pushing back the edges of the universe as it moves. This Awareness indicates this of course is all within one's head and therefore, to an outside observer, a scientist examining the size of that universe, the entity would be termed as having an illusion, rather than being realistic. That likewise, the entity meditating, looking out from that head toward the outside world, would see how illusory the outer world appears to be in comparison to that universal consciousness experienced from within.

This Awareness indicates that such an entity might even say, this outer world is nothing, is all void, the great void, the great Maya, the nothing, this is all illusion. That essentially it is relative only to the frame of reference one wishes to use for their starting point to discuss these matters, it is relative only in terms of what level an entity wishes to discuss voidness or reality, illusions or actualities, for that which is an illusion in one frame of reference is a reality in another. That all is consciousness, even the so-called tangible matter is consciousness, as such may through certain truthful expressions or romantic expressions or scientific expressions, or poetic expressions, matter may be termed the dream stuff of God; likewise, the dreams of individuals may be termed material and may matter, may be meaningful or may be termed merely illusions.

This Awareness indicates that all is relative and must be considered from the frame of reference. That in this sense, the questioner is the black void, which no-one knows, or the world itself is the void which only the questioner can answer, or the inner being may be called the void which can only be experienced when entities enter themselves, or an entity might even say, 'there is no such thing as a void.' This Awareness indicates all of these statements can be true from some frame of reference, and from other frames of reference will be false.

ED's Note: Okay.

THE IMPORTANCE
OF BEING
A FRIEND
WITH
YOUR CHILD

QUESTION:

A question from A.W. in Ohio. "Children five or six years of age still look and appear open and friendly. By the age of ten and eleven, this is changing for many of them. They're becoming hostile to the adult world, more apt to prey on their "weaker" peers. Could you comment on why this is, and what in fact could be done to help them maintain their ideals of earlier childhood?"

COSMIC AWARENESS:

This Awareness indicates that approximately at the age of eight and on, up to the late teens, these children begin to relate more to their peer groups, and their peer groups begin having a greater influence on them. They begin seeking approval from their own group level, which becomes more important to them than that of their parents; particularly wherein the parents do not keep a very close rapport, a very close friendship with the child.

This Awareness indicates that it is of greatest importance...this Awareness repeats: *It is of greatest importance* ...this Awareness repeats again: *It is of greatest importance that entities in raising children, put friendship with the child as the most important factor, parenting following, and that providing for the child to have communication and direction, and opportunities to develop will follow appropriately from this relationship. That a parent should not think only of himself, of herself as the parent of the child, but should first think of himself or herself as the friend of this child, and as a friend the entity then recognizing himself/herself as a parent also, may communicate with the child those parental directions, these being communicated as a friend rather than as a mere parent.*

This Awareness indicates parents appear as authorities which block the child's expression and the child resents such authority and such blockage, but friends may appear to the child as advisors, giving suggestions, giving information, giving reasons for such and such behavior, or such and such activities, and values, and the child will be much more accepting of advice given by an older adult friend than one who simply plays the role of authority.

This Awareness indicates in all relations, whether male/female mate relationships, whether children or parents, whether boss or employee; the best relationship to have and cultivate in the number one position, is that of a friend. That thereafter, the other secondary relationship may be developed, and will work much more efficiently and harmoniously.

This Awareness indicates that brother and sister, or brother and brother mean much more if they are first friends, and thereafter brothers or sisters; that sweethearts are much more likely to remain together if they are first friends, and sweethearts secondarily. That the *most important relationship that can be developed* by entities is to *become friends*; that other relationships being secondary to this, will then function much better.

This Awareness indicates that if in relationship with a child, a parent does not have a friendship established, nothing will work properly, and even though the child may be totally obedient, the relationship will not be healthy and happy, nor long standing and productive. The child eventually will depart in one way or another from the guidance and influence of the parent. But wherein the relationship is established first and foremost as a friendship, then whether or not one is a good parent, whether or not the child agrees with the values expressed by the parent, the relationship will still remain based on the friendship, and the influence which the friend has as a friend will assist in helping the child to accept the values expressed as a parent.

A WIFE WHO FEELS ANOTHER ENTITY
TAKES POSSESSION OF HER HUSBAND

QUESTION:

We have a letter from Mrs. C., which has a question for Awareness. It's a personal question, but I think it would be of general interest. She writes: "Dear Cosmic Awareness. I have never written because I so often feel that my personal questions are so trivial in lieu of our world situation. However, I'm going through a period in my life in which I feel I need your guidance. My husband and I have been together for three years. There have been times that I have felt very strongly that another entity enters him, and takes control without him really being aware of it. It's like dealing with two different people. May I ask Awareness to comment on this? I recently found out I was pregnant, and couldn't be happier, but my husband feels the opposite, asking me to choose between himself and the baby, which I could not possibly do, due to reasons Awareness knows. I would like to know the best way to handle this situation, and for both to understand this extreme fear he can't explain. Thank you so much."

COSMIC AWARENESS:

This Awareness indicates that the two of you would benefit greatly from contacting a good marriage counselor and discussing your feelings with an entity who is traiped in this area. Also, it appears there is a kind of schizophrenia which this entity experiences; this in part due to what appears to be a general weakness of the entity's ego or individuality wherein the entity feels himself to be somewhat inadequate in terms of coping with the stresses of life; that this also appears to be associated with the use of alcohol or drugs of some nature. If not the use of alcohol or drugs, then it is associated with difficulties in relation to the pancreas and adrenaline,--perhaps in reference to sugar intake and the need for Chromium and Zinc; also Calcium, Magnesium and Vitamin D; that there also appears to be a need for amino acids and enzymes as a supplement to this entity's diet.

This Awareness indicates that it appears this is in part associated with past experiences in this lifetime, as well as certain influences carried over from a previous lifetime, associated with a sense of guilt. That in this present lifetime, it appears to reach into childhood experiences, wherein the entity had certain personality conflicts in connection with his parents and relationships with others; that this also is associated with energies from the previous lifetime, carried over into the present, and that these energies are associated with certain guilt feelings which were unjustifiably placed upon the entity during a previous lifetime.

This Awareness indicates that the entity, because of these confusions in his consciousness from the present childhood and past-life experience, does appear to have a somewhat weakend self-image, and it is because of this that during certain states wherein the energies are somewhat low, or wherein the blood-sugar has been altered, the entity becomes somewhat imbalanced, and what appears to be a second personality takes over. However, this is rather an *aspect* of this entity which emerges in part due to the chemical reaction in his body,--this relating also to the chakras or that which may be termed the endocrine system; that this can develop into a hypoglycemic situation unless it is dealt with and in effect, is at present already a type of borderline hypoglycemia.

This Awareness indicates that in reference to the entity's disdain or dislike for having a child, this as in relation to his sense of inadequacy, or inability to cope with more stress. The entity as not being completely confident in his ability to handle another responsibility, nor is the entity quite mature enough to share you with a child.

This Awareness suggests that were the entity to receive proper assistance and be counseled in such a way as to allow him to express his feelings and to in fact get in touch with his own feelings through a mirroring action of a counselor, the entity could work through many of these blocks within his psyche, and mature quite rapidly, and could also be capable of reaching a reconciliation with you. This Awareness indicates that the entity does need to feel loved and does need to believe that you care for him.

However, the entity needs to probe into his own blocks even more than he needs your love; that to continue nursing this entity along in his present condition is to allow the entity to remain a semi-dependent and to encourage the entity not to develop and grow. This Awareness suggests that if you must grow and develop alone, with your own responsibility to your own soul and that of your child, then you must make that decision and choice. This Awareness indicates however, that you give this entity the opportunity to probe into his own blocks and encourage the entity to grow with you.

This Awareness suggests that wherein possible, you encourage this entity to receive a physical check-up to determine the condition of the entity's adrenaline and pancreas, in connection with hypoglycemia; that in the event this is not possible, that you encourage the entity to avoid the use of stimulants such as drugs, and also sugar. (By drugs, this Awareness *includes* alcohol and excessive use of caffeine).

LOCKED-UP SEXUAL ENERGIES: SOME GOOD AND SOME BAD ASPECTS

QUESTION:

A question from J.D. of Brooklyn, New York. It's a long question so I'll have to read the entire statement in order to get at it:

"Awareness has mentioned the three great taboos that have messed people up, are religion, money and sex. This question refers to how the church and the social structures in general have twisted the meaning and nature of sex and have inhibited the understanding, perhaps deliberately. Now, this seems to be one area in particular which Awareness has avoided touching upon to those outside the inner circle of the staff, anyway, but it is quickly coming time for this to be looked at deeply and dealt with. I understand how it would perhaps bring on public anger, but it must be dealt with.

"The elements of the Beast would use, would have used, a number of elements of sex as forbidden,--in terms of thought, in terms of feelings (including feelings for one's own 'sex') --as techniques (powerful) of mind control, creating great polarities, oppositions, separations,--'heterosexual', bisexual, homosexual' etc. etc. There would be those completely conformed (in image at least and in conflict with themselves), those who completely disagreed, those who agreed in some ways but not in other, those who disagreed but showed they agreed etc.

"I have found that a person, in general, me specifically, can control, order himself by going with, and not against his nature, by not running away from himself, from his feelings, but by honestly looking and experiencing the nature of their feelings, urges etc. in a positive, constructive, creative manner, to carry it out to it's fullest extent,

to bring it to the surface that it may be observed with great awareness and sensitivity, that its origin, meaning, purpose, direction and its true essence of its nature can be discovered in terms of the action of creative energies.

"It seems like the forbidden atmosphere was originated as an indirect (at least) psychic control, to bind men's minds to certain patterns and rigid formalized systems, to create polarized conditions, separate-set against, to divide and conquer.

"It begins at the 'Earth Chakra'--the first psychic center where the Life Force manifests. That's perhaps the secret: Because of the forbidden, restricted, inhibited atmosphere, fear of rejection, persecution etc., the person suppresses his feelings and erects a protective image. This inhibits the free flow of energy through that base chakra, unbalancing the positive-negative force, intensifying these things suppressed, creating also, extremities and instability in personality, character. expression. Certain energies are blocked and not allowed to move upward to the other six chakras. These energies have to be given an outlet so they express in reverse, negatively, evasively, deceptively. And then the masses can be easily manipulated, the saintly churches and so forth then can just as well be in league with the prostituted exploiters of sex, pushing the opposition polarities, increasing the manipulative mind-control potentials. In terms of the chakra, when the person is not allowed to get the expression of his energies fully out in the open as he would discover the essence,--the wholeness of his being, the root of such energies, feelings,--the oneness of things, energies, attractions, fully out in the open in the way of being natural, spontaneous and without tenseness so that

it doesn't become a **THING** to be hung-up on; the energies do not move up to the other chakras in a balanced way and the individual is prevented, inhibited as the Beast planned,—from becoming enlightened and discovering the truth from within, because the circuit is incomplete!

"This is why, in preparation for the New Age, there is this "sexual revolution," sexual freedom,—greater sexual freedom to untangle the energies so they flow freely and move on to higher levels of relationship, as well through increased awareness, understanding, sensitivity, etc. Please ask Awareness this!"

COSMIC AWARENESS:

This Awareness indicates that the observations as basically correct and valid in terms of the effects on the physical body. This Awareness indicates the motives involved in the suppression of these energies as that which, on a mass scale, tended to create a more masculine or yang-type of consciousness, for the entity would be unable to be satisfied, and the intense restlessness caused by the sexual inhibitions would lead to greater dominating energies, driving forces, for that which may be termed power and control.

This Awareness indicates these forces, not being released through the normal, natural sexual channels, would be restricted by the entity, raised to the other chakras, and exhibited from those various chakras, according to the level of expression which the entity was capable of reaching. In some situations, this would erupt in the adrenalin area of violence. In others, this would erupt in the heart chakra, whereby accomplishments of a prideful nature or artistic nature might be experienced. In other areas, this might erupt from the thyroid or throat chakra, whereby the entity expresses beautifully in terms of words the feelings and frustrations locked within himself or herself. In some cases this might express itself through the pineal level whereby the mind-control, the energies being emanated through the pineal, related to that which is termed personal will or personal psychic power over others or over one's environment. In other cases, this might reach the pituitary level, whereby the entity could grasp an understanding of things beyond the personal levels, and would in fact begin to let go of the controls which were caused by such sexual inhibitions.

This Awareness indicates that over the years, these inhibitions, these sexual restrictions have led to energies being expressed in the construction of civilizations and also in the construction of great works of art, but these energies have also been instrumental in leading to higher philosophies or rationalizations and sciences. This Awareness indicates that these energies have expressed themselves in great numbers of methods, whereby the creative forces have invented new systems, new commodities, new concepts, new forms of communication and new methods of travel, personal gratification and comfort, and the various benefits of civilized life.

This Awareness indicates these forces, having been inhibited in the sexual areas for several thousands of years, have also contributed to the rising of the sexual energy through the various chakras in a manner which in many cases erupted in violence, destruction, chaos, and social upheaval, social unrest, religious wars, and much personal tragedy for many entities. This Awareness indicates that essentially, the purpose of inhibiting the sexual energies has been served. That there are still those on this plane who need and require continued inhibition of these energies for their further develop-

ment, but that the more advanced cultures on this plane are moving beyond that level wherein such inhibitions, the sexual inhibitions and restrictions, may be less important as social and personal responsibility becomes more of the concern, so that it will allow greater freedom in this respect.

Sex and the Laws of Moses

This Awareness indicates that also entities must recognize that the ancient laws of religion, the various religions of ancient cultures, were essentially the rules of the culture, and these rules were designed not for every living creature of the universe under all circumstances for all times, but were designed essentially for that group under its present situation. That wherein the laws of Moses were given, these tablets and rules were given as a social code. This Awareness reminds entities that the first set of rules given to Moses were unacceptable by the followers, and Moses was forced to break those tablets and return for a new set of rules which would be acceptable.

This Awareness indicates that the second set of rules, the Ten Commandments, were a social code which would allow the people following Moses to be bound together through a code of law that would govern them, so that a society could be maintained under this law. This Awareness indicates that each religion has had its sets of laws or rules, and these vary from time to time, according to the needs of the society, according to the conditions over which the laws rule. This Awareness indicates that in these earlier times, wherein there were no modern medicines, disease from licentious sexual relationships could become a great problem, and the best solution was to have rules about sexual behavior, for there was no cure once a disease was contracted.

This Awareness indicates that in another sense, rules about adultery helped to keep the members of the society from fighting with each other over the love of a common lover or common mate. Rules relating to adultery also helped preserve the society,—the mother in particular,—from having to attend to the offspring of a father who was not present or interested, or even aware of the child. This Awareness indicates that the strict rules were important to a strong society. This Awareness indicates that even more important than this, the strict rules allowed individuals to have closer personal relationships with one another for their own, personal soul growth; for entities having close personal relationships tend to share certain energies with their mate, and over a long period of time, these energies begin to merge one with the other, to bring about individual balance of the male-female parts within the individual. This Awareness indicates that wherein an entity switches from one partner to another, these deeper energies may never integrate within the individual.

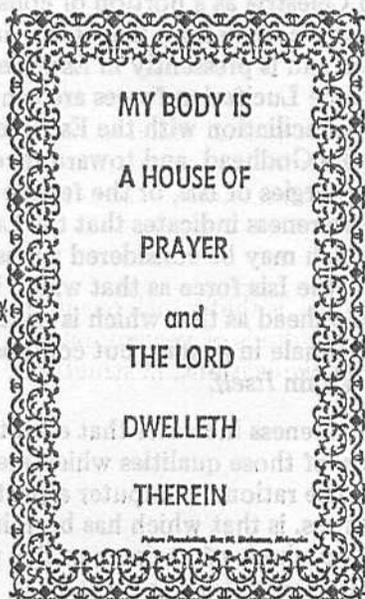

"Why do they call it self-abuse? I happen to love it."

This Awareness indicates that still on another level, the ancient Hebrew religion,--that of the Old Testament, --was the beginning of the backlash against the earlier feminine religions, and was the beginning of the male trinity of God the Father, the Son and the Holy Ghost. This Awareness indicates that this as a masculine religion. And the Hebrews integrated these concepts of sexual restrictions, in part, as a rejection of the earlier feminine religions, which had deteriorated to that of temples whereby priestesses gave themselves and their love freely to those who entered. (This Awareness indicates that more information in regards to the balance of the feminine and masculine religions and their movement into present time can be given at a later time. This appears to be in reference to writings which the Interpreter shall become involved in through conscious mediumship).

This Awareness indicates that still in another sense, the inhibitions and the restrictions served as a form of polarization of the Western civilization, which led to technology development and the expression of that which may be termed the 'Rhyee force,' as opposed to the Isis force, which would have generally yielded to the feelings of love in their natural flows. This Awareness indicates that the Isis force may be equated in this particular instance to the natural flow of energies within the body, that which relates to the subconscious urges; whereas the Rhyee force as that which relates to the conscious urges; and the restrictions of sexual energies by the ancient teachers was designed to cause a shorting-out of natural forces, which resulted in the overdevelopment of the mind in an action designed to speed up the development of conscious thought, reasoning, rationality, and the general development of conscious intelligence. This as opposed to the unconscious flow of energies and intuitive development of the mind forces which would have flown through the body through the Isis forces.

This Awareness indicates that the present action is that wherein the intuitive and the rational begin to merge; whereby the natural energies of the body, the Isis force, and the restrictive, Rhyee forces, based on rational knowledge, begin to merge together to form the New Being, so that intuitive and the rational may form a holistic type of consciousness. This Awareness indicates that this message as but touching on the subject matter: that more will come later.

SEXUAL INHIBITIONS: A LONG-RANGE PLAN BY THE BEAST TO CONTROL ENTITIES?

(FOLLOW-UP QUESTION):

Awareness, in reference to the inhibitions of the energy flow, this seems to relate very directly to a basic observation that I've had for years, that when one is happy and content, one is very likely not to do much, but if you're having a fight or are very miserable you can produce a whole lot more. One hesitation about future happiness does come to mind, however: Is there going to be any incentive for doing anything?

COSMIC AWARENESS:

This Awareness indicates that once civilizations have been built, once homes are available, once the activities and creative energies are channeled toward constructive purposes, what more is necessary in terms of having to develop great, driving energies? This Awareness indicates that while there will always be activities necessary to sustain entities in their lifestyle, it would be fruitless to attempt to force entities to have pent-up energies from intense sexual inhibitions and denials in a society whereby the problems and challenges had already been met, and there was no need to struggle or fight with great energy reserves for anything further.

This Awareness indicates that such energy would only yield destructive forces and destructive activities upon the society. Therefore, the gradual changes at this time whereby, in the civilizations which have essentially built homes, cities and places of habitat, their comfort zones, these societies no longer need to have great warriors or strong men or frustrated entities to drive them to new heights; or if these entities do exist, they need an outlet for these energies, so that the energies are not destructive in nature.

This Awareness indicates that some secret societies on this plane intentionally create the inhibitions, the sexual restraints, in order to frustrate their members, so that the members eventually, through frustrated energies, will themselves into positions of power over others and throw their power around in domination over others. That these forces are still present upon this plane. That in some civilizations, the locked-up sexual energies of the masses is so great that these energies become released only in fists and shouts of anger, hostility and frustration, directed toward a common cause.

Sex Repression in the Moslem Nations

This Awareness indicates that essentially that which is occurring in the nation of Iran is that which is being set up with this same kind of philosophy, so that these blocked sexual energies will be channeled and used to create great frustrations which can be rallied into hostility directed toward their 'enemies.' Essentially, the rallying of the Iranian people for war is being manipulated by efforts of Khomeini to force the sexual blocked energies, --to force these energies into greater blocks and fewer outlets of expression, except through the higher chakras in a negative and distorted manner. This Awareness indicates that this appears to be effective only to some degree in the Iranian culture. That there are many who accept this out of fear of government reprisal if they do not adhere to the strict sexual codes, but that there are many who would appreciate seeing the codes removed.

This Awareness indicates it appears that this last-ditch effort of Khomeini in holding to these strict codes is doomed to failure, and that once the entity has departed from this plane, a complete turnover,--a backlash, from his rule will occur to bring the Iranian culture, and many others of the Moslem community, up to a realization of modern concepts in regard to sex, so that they are not as fanatical as presently demanded by the entity, Khomeini. This Awareness indicates that this does not mean that they will become less moral, but rather that they will not be quite as fanatical in the sexual attitudes of their religion.

This Awareness indicates that the changes which occur in consciousness, occur slowly; and this Awareness is not advocating open sexual relationships without restraint. This Awareness indicates that there needs to be that which is balanced, whereby energies can be controlled when control is necessary, and energies can be released when release is appropriate. This Awareness indicates that this is true, not only in relation to sexual energies, but also to emotional energies and even mental energies.

Sex and the New Being

This Awareness indicates the New Being as that creation which balances these energies in its expression. The New Being as that creation which balances rights with responsibilities that accompany those rights. The New Being as that creation which communicates in various ways in order to bring about reconciliation of energies which are out of balance. The New Being as that creation which accepts itself as having a divine part in the total picture, and as being one part among many other parts, which are equally deserving of rights and responsibilities. This Awareness indicates the New Being as that which is the offspring of the ancient, feminine religions and the modern, masculine religions, as being the reconciliation of yes and no, of positive and negative, of male and female, of earth and sky, of Mother Nature and the Divine Spirit.

"If your lifestyle is going to be seriously affected, then of course disregard everything I've said."

IS LUCIFER REALLY BOUND FOR THE NEXT 1000 YEARS?

QUESTION:

A question from D.S., Miami, Fla. "Awareness often intimates or states that there are 'invisible forces' that greatly affect our destiny. In fact, Awareness Itself is quite invisible, yet Its revelations are completely fascinating and highly revealing. The reader cannot escape from the ring of truth and wisdom in these revelations. The master Aquarius who prepared a complete 4-year course of study for those who were determined enough to complete it, together with the master Kumara and other enlightened beings, eventually reveal themselves as archangelic beings, who, after the studies, cannot again be contacted except on the Inner Planes; but they also say: "We are the Luciferians", and then go on to explain that Lucifer means Light, and trace the organization through the centuries, and state that at the appointed time, they plan to take over our world and govern it. The outer temple is presently located in Ecuador, and is known as the Monestary of the 7 Rays. These beings have joined forces with an individual,--a black man in this incarnation whose name begins with Hecter Franscois, reputed to be the greatest magician in our galaxy. Since Awareness has stated that Lucifer has been bound for a thousand years, would It care to comment on the works of the Luciferians? The Luciferians state that in the fullness of time, even the White Brotherhood will be able only to point to them as the leaders of mankind."

COSMIC AWARENESS:

This Awareness did not state in essence, (unless in a kind of metaphorical term), that Lucifer had been bound for a thousand years; that this may have been stated in a certain context. This Awareness indicates essentially, that force which represents Lucifer is that force which represents the left side of the brain,--that of the rational mind, that which moved out from Celestria as a portion of consciousness to work toward completion; that it *did* in fact return to Essence and is presently in Essence, along with Isis. That the Luciferian forces are generally moving toward reconciliation with the Essences, or that which is the Godhead, and toward reconciliation with the energies of Isis, or the female principle.

This Awareness indicates that the Luciferian force as that which may be considered a masculine force, or energy; the Isis force as that which is feminine; and the Godhead as that which is neutral,--neither male nor female in gender, but composed of both of these within *Itself*.

This Awareness indicates that essentially, the integration of those qualities which are Luciferian in nature, the rational computer aspect of human consciousness, is that which has been in control for many hundreds of years upon this plane, reflecting itself in civilizations, in structures, in actions of

both church and government,--that at present time, this energy is that which is being brought into balance, whereby the Luciferian or rational consciousness, which controls specifics and specializations; this consciousness is being brought into a balance, whereby it can be made subjective to a more holistic attitude,--the Holy mind, or Holy Consciousness.

This Awareness indicates that in terms of this message given in the question, this Awareness suggests that this be taken more as a metaphorical message in this manner, rather than in interpreting it as a message of personalities, loyal to one particular leader, as opposed to another. That the Luciferian, or light of rational consciousness...these energies as that which will be around for quite some time to come. This Awareness suggests however, that it will have a secondary position to that of the greater Light, the Christ Light, which is holistic or Holy in nature.

(FOLLOW-UP QUESTION):

I think the primary gist of the question was for Awareness to comment on this organization in Ecuador called the 'Luciferians' which is headed by a black entity, and which claims that they will eventually control the world.

COSMIC AWARENESS:

This Awareness indicates that this as but another attempt by some organization to seek a position of significance from which to operate and play games; that this organization as more talk than substance. There are many who, if words came true to the extent of their speakers' intentions, would be rulers of the world. If these entities are given enough time, they may in fact become rulers of their own selves.

SUPER-SECRET AGENCIES -- WHO REALLY IS THE BOSS ?

QUESTION:

In a SPIRAL news network publication sent to me, there is this following information: "Since the death of the four Rockefeller brothers, the power and conspiratorial force of that empire has passed to the larger second tier of the vast hierarchical structure that they created. The primary organization to watch is the Chase-Manhattan International Advisory Committee, John J McCloy presiding. The CMIAC is far more important than either the Council on Foreign Relations, or the Trilateral Commission. The Trilateral Commission was created by David Rockefeller as a diversionary tactic to draw the attention and the fire of conspiracy researchers. Beware of organizations which harp continually on the dangers of the Trilateral Commission without ever probing any deeper."

Would Awareness please comment on this Chase-Manhattan International Advisory Committee?

COSMIC AWARENESS:

This Awareness indicates that this information as being correct; also, it is likewise important to realize that the national secret intelligence organizations, such as the FBI and the CIA, are not in themselves the total operations they appear to be to the public; that the National Security Agency as being of a much greater involvement in the affairs of clandestine operations and activities, in which many entities associated with the CIA receive the blame.

This Awareness indicates that the National Security Agency as that which is much greater in scope and in activity than that of the CIA and has greater secrecy and planning involved than is publicized in connection with the CIA; that these government agencies likewise must be recognized as having been created for certain purposes to function as government arms, or branches, but as having come under the influence in many areas of the multinational corporations. In fact, many of these activities within the realm of CIA operations or National Security operations, are directed by what may be classed as double-agents within these organizations who are in fact more loyal to the multinational corporations than to the government.

This Awareness indicates that similarly, many of the entities involved in the intelligence operations, upon leaving 'the service' will take jobs within multinational corporations and continue the same type of operations as civilians that they were involved in when working within these intelligence organizations. That it is through many of these various agencies within the super-agencies that secrets are transmitted and smuggled from government agencies to corporations, or from the government agency through corporations and into the hands of Russian or other agents from other countries.

This Awareness indicates that many of the secrets of national security are given to foreign agents through the multinational corporations and through individuals who are actually serving as double agents to these organizations and to the government intelligence organizations; that these having some direct connection with the Rockefeller powers in that the Rockefeller powers, or that which remains of the Rockefeller empire, has its influences and controls into the majority of multinational corporations. That this also links into the various governments in various parts of the world which are tied in with these multinational corporations and their activities and affairs in other countries.

DOES SUICIDE CAUSE AN ENTITY TO REINCARNATE AS AN ANIMAL?

QUESTION:

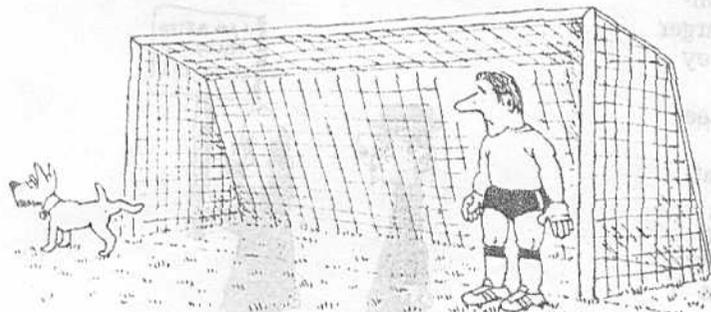

In previous readings, Awareness has delved into the subject of certain aspects of entities that needed to be 'burned off' after the passing over; these aspects going into animals and insects and so forth. In a somewhat related question from R.E., he asks: "Max Heindel, the great Rosicrucian initiate and clairvoyant, said: 'A great peril of suicides in their future physical life is that after death, in the incarnation succeeding the suicide, they often rush into possession of an animal's body, such as ranch cattle, from which it is impossible to extricate themselves, due to interlocking mechanics of the etheric or astral bodies, and subsequently must then sense everything through sight, hearing, touch, taste and smell of the animal, such as being slaughtered for food. They do this through the extreme fear of the afterlife, from previous suffering following a suicide, whereby they seek to avoid repetition by desperately and rashly possessing any form available, humans often not being accessible.'"

Would Awareness please comment if this is valid?

COSMIC AWARENESS:

This Awareness indicates that this as an option which occurs with entities, depending on the particular attitude an entity may have toward himself, toward the movement into physical flesh, and toward the vibrations in which he finds himself. This Awareness indicates that not all animals are incarnated spirits of suicides, nor are all suicides forced into bodies of animals in their next incarnation; that it is an action which *may* occur, but it is not action that is inevitable. It simply *can* happen.

ED's Note: For more information on suicide, please refer to 'Revelations of Awareness' No. 79-29 (\$4.00 from CAC). Also, 83-22 (Trees and Animals); \$3.00; also, please refer to the Life After Death series of newsletters.

Jusp/Nebelspalter/Zurich

LENTEN SERVICE -- ANY BENEFITS?

QUESTION:

Can Awareness inform us if there is any benefit to entities in participating in the Lenten service as practiced in the Christian religion prior to Easter? (This a question from A.M., Palm Beach, Fla.)

COSMIC AWARENESS:

This Awareness indicates this as in the affirmative. This as an action which prepares the body to receive certain blessings, particularly of a spiritual nature.

This Awareness indicates that wherein a vacuum is created, the vacuum may be filled with some form of energy. Wherein an entity is creating a vacuum and the entity is anticipating a particular experience to fill that vacuum, then the vacuum as that which has made room for the experience to occur more completely than had the vacuum not been created. The action of fasting as that which can benefit; the action of similar types of meditation or preparation as that which allows the entity to experience that which is expected. **

The Law of the Vacuum

The Law of the Vacuum states that all material forces of the universe abhor the vacuum and rush to fill each hole, opening, void, blank page, field of clarity, or empty movement with image, garbage, sound and fury, often signifying nothing so precious as the original voidness.

This Law states that space allows movement, and that when all space is filled the solidarity prevents further movement or growth.

By reducing bit by bit the inappropriate and the unnecessary aspects of one's lifestyle, one can create the time, space, atmosphere and opportunities to move, grow, replenish and to rebuild on a more solid foundation.

This Law creates the spaces in which to place only the highest and only the best with the least amount of energy expense.

Cosmic Awareness

REVELATIONS OF AWARENESS is a cosmic newsletter, published for the membership of Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507. Membership fees and donations are deductible from your Federal income taxes. Cosmic Awareness does not support the war machine. Neither do we. Why should you?

INDIVIDUAL & FAMILY MEMBERSHIP: \$30 per year.
CONTRIBUTING MEMBER: \$52.
SPONSORING MEMBER: \$144
PATRON MEMBER: \$1000
ENDOWING MEMBER: \$5000.

All donations to CAC are used to spread the Cosmic Awareness messages to others.
