The Psychology of Homosexuality (Part 1)

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious 'trance' levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

DOES COSMIC AWARENESS DISLIKE HOMOSEXUALS?

(DOES THE HOMOSEXUAL REALLY HAVE NO CHOICE ?)

QUESTION:

We received a letter from Eugene H., of Los Angeles. I don't know what particular thing he's referring to here, and I don't know how to answer his letter, so I thought I'd read it to Awareness. It's addressed to "Cosmic Awareness, C/O Box 115, Olympia.

"Dear Sirs. I recently began my "experience" with you, and I find the work provocative. Thank you for providing a space for me. I'm confused already. Somehow, I'm getting vibrations that Awareness does not approve of me because I am a homosexual, a lifestyle for which I had NO choice, no choice down through the pathway of life. I had hopes of getting many others involved with Cosmic Awareness, but now have some reservations about that. Sincerely, Eugene H."

I'd like to ask Awareness if *It* would answer that letter for us?

COSMIC AWARENESS:

This Awareness indicates that this Awareness does not wish to give any individual a feeling of being rejected for any reason whatsoever; that each entity does have his or her own experiences, his or her own path; that many entities are in expression of a lifestyle which is not of the norm. This Awareness indicates that it is repeated again and again by this Awareness that "Thou Shalt Not Judge." This Awareness indicates that *It* does not judge in the sense of pointing fingers, or accusing entities or rejecting entities for any reason whatsoever.

This Awareness indicates however, *It does* discern. *It does* suggest that entities discern. That there are certain actions which bring with them certain reactions, and these reactions may be greater or less in terms of the present environment, in terms of the present culture, in terms of the ramifications associated with that action, in a society or in relation to others.

This Awareness indicates that *It* has given much information previously in regard to homosexuality. That many entities in this lifestyle are in transitions between lives, wherein as male or female, they are switching, and although in a male body, or in a female body, may have either just arrived in that particular sex, or may be in preparation of changing to a different sex in the next life experience.

This Awareness indicates that the reality is that each individual is both male and female. The sexual expression is that which may be highly polarized into one sex or the other, or may be greatly balanced so that male and female expressions are both very similar or very close. An entity may be extremely feminine, or extremely masculine, or may be somewhere inbetween, exhibiting both masculine qualities and feminine qualities.

This Awareness indicates that these changes are those which are individual and which cannot be evaluated by any other than the individual experiencing such. It has often been said that you cannot know another entity unless you have walked a mile in the entity's shoes; this meaning that you cannot experience what another experiences without being inside the body, and inside the experiences of that individual.

This Awareness indicates that those who condemn, those who judge, are often expressing personal fear and insecurities in regard to what they fear from another. That many entities cannot understand the experience of one who is homosexual, and having some fear of that experience, may become paranoid or frightened, or concerned as to the influence that individual may have upon their lives; thus, this fear, paranoia of that which is different, which is unusual, which is out of the acceptable line of experience which this entity is used to, may lead to a rejection of that individual and a condemnation by that entity of the individual who is different.

That likewise, the entity who is homosexual may have similar fears and paranoidias of the entity who is otherwise, thus the entity who is homosexual may feel abused, may feel picked on, may feel himself or herself to be threatened, and in that insecurity may have a kind of hostility or paranoia of the non-homosexual. That whenever any individual makes himself different from the norm, allows himself to become unusual in any way, that individual risks some form of social rejection; that this is a part of life, and part of the ramifications of choosing an unusual lifestyle.

This Awareness indicates that while you indicate you have no choice, this Awareness indicates that you *always* have a choice. The choice, however, is often difficult and is often influenced by energies which an entity may or may not be conscious of, or may not wish to deal with. This Awareness indicates that unconscious entity, or the entity unconscious of certain areas, does not have a choice. That in many ways, most entities do not have a choice, in the sense that the environment and the experiences of the entity tend to move the entity into a lifestyle, or into circumstances which become the experience and lifestyle of the entity.

This Awareness indicates however, that when an entity does become aware of those influences, the entity does have the opportunity to stop and look and ask, and to change attitudes, and that change of attitudes is that which can bring about conscious choice. This Awareness indicates that the idea of having no choice in what occurs is in one sense true, in another sense is inaccurate, for though one has always the ability to choose, one may not use that ability due to environmental influences upon the entity.

This Awareness indicates that if the entity does not believe he or she has a choice, and if the entity believes that fate controls their lives, then indeed they will experience the choiceless path of fate. That in another sense, the entity who believes he or she has every choice, makes every choice, may simply be fooling himself, fooling herself, and the choices may be made from preconditioning from past experiences.

The choice of taking this or that path, while appearing to be a free choice, may be preordained by past experiences which the entity has endured. Even so, entities can study, can seek assistance, can experience new circumstances and can alter their lifestyles if they desire. That wherein entities do not wish to make the effort to alter their lifestyles, then indeed they may continue experiencing as they choose, and to experience the ramifications of that lifestyle.

This Awareness indicates that to hold hostility toward others for not approving of one's chosen lifestyle is futile, is a waste of energy, for entities will find that although they may choose a lifestyle which is unacceptable to the mass-consciousness; whether it be homosexual, whether it be metaphysical, whether it be vegetarian, whether it be the lifestyle of a hippie, or whatever: this may be a hermit, a recluse, an outlaw, or any other unpopular lifestyle; when choosing such a lifestyle, there will always be those ramifications whereby there will be some rejection from those who do not approve.

This Awareness indicates that the ramifications of such a lifestyle may include not only the rejection from others, but your own rejections of those who disapprove, and there may be those feelings of being persecuted for your lifestyle. These are part of the karma which accompanies the lifestyle.

This Awareness indicates that the actions wherein entities choose or are directed in choiceless paths, wherein entities feel themselves as victims of circumstances, or wherein entities feel themselves as masters of circumstances; these actions and these attitudes, and these beliefs which accompany such, and the ramifications which accompany these, are those energies which make up that which is called the karma, or dharma, the circumstances surrounding the path on which the entity has embarked.

This Awareness indicates that it does little good for entities to lament in regard to the ramifications of the path on which they have embarked. However, it does no harm for such lamenting to occur, and may also allow others to become aware that each entity, regardless of the path, does have feelings, does have pains, does have desires, does have insecurities, and is vulnerable. The common denominator of all entities is that they have feelings which can be hurt and which do desire acceptance.

Cosmic Awareness Blesses All Entities

This Awareness indicates that this Awareness blesses *all* entities, loves *all* entities, loves that entity who is afraid, who feels rejected, even as *It* loves the entity who is proud, who feels himself or herself to be special; even as *It* loves the entity who is downtrodden, afraid, alone, isolated, feeling rejected and outcast; even as *It* loves the entity who feels himself to be self-righteous, filled with the glory of God, capable of looking at others and condemning others for not being better; even as *It* loves the entity who is humble, sympathetic, concerned for the welfare of others; even as *It* loves the entity who is selfish, greedy, relying on others for his or her own welfare.

This Awareness indicates that all of these, and all of these entities in the various lifestyles; those who see themselves as saints, those who see themselves as sinners, those who see themselves as outlaws, those who see themselves as the pillars of society; all of these have their weaknesses and their strengths, their heavy crosses and burdens to carry, have their potential Divinity and the progress of their souls. All of these entities, whether climbing spiritually or backsliding into the depths of materialism and gross matter; all of these entities are on the path and in time, shall reach the Divine Light, and shall experience Oneness and shall learn tolerance for each other, and forgiveness of self, and of others, and in this new experience as a New Being, shall become One with this Awareness.

This Awareness indicates that *It* loves all of these entities, as part of *Itself*. This Awareness suggests that you not feel persecuted, not feel cast out for any reason. This Awareness indicates that you shall in time alter your lifestyle; you have in previous times had a different lifestyle. Others who may presently condemn you may have in past lifetimes experienced the same lifestyle you presently are experiencing, or may in future times become involved in similar experiences. It is not for any other to judge or condemn you or any other, nor for you to judge or condemn them.

This Awareness indicates that during times wherein there is little shock, little stress, there is little choice also. This Awareness indicates that all entities in time experience those moments of great stress, of great shock, and during such times entities have the opportunity and possibility of great choice and great growth.

OPENNESS IN THE AGE OF AQUARIUS...

BILL SHEPPARD'S HOMOSEXUAL EXPERIENCE IN CALIFORNIA

(HAVE THE 'END TIMES' COME FOR BILL?)

FOLLOW-UP QUESTION:

Awareness, while we're on this subject, I'd like to ask about Bill Sheppard; this entity, who for a long time would write that homosexuals were the scum of the earth, were agents of the Dark Force, and so forth...in the last year or so he went to San Francisco, and he writes that he himself has gotten involved in the homosexual experience. As a result of this, he had first a heart attack that almost killed him, and then he came down with cancer, which he may or may not still have.

We heard from him for the first time just a week or so ago, and he's still alive, and he said that even though he wanted to leave this plane, evidently he wasn't allowed to; but my question is, he sent in a whole lot of channelings relating to the homosexual lifestyle, and what he says is the 'cosmic implications' of all that, and he feels that his involvement with them at this time is transmuting the energies somehow, and it's some kind of a grand cosmic thing that he's doing, and he sent us a book called *The Divine Androgyne*, written by some homosexual entity in California whose name I can't think of, but he went and met with this author, and the book all about the homosexual experience, but relating it on cosmic terms-- 'cosmic erotic ecstasy and androgyne body consciousness' and so forth, making it almost a hallowed thing, according to Bill.

Anyway, my question is: Is the information Bill Sheppard has been sending accurate; or am I misunderstanding his frame of reference, or, can Awareness explain what it is Bill Sheppard is doing right now in this area?

COSMIC AWARENESS:

This Awareness indicates that this era in which the earth is now moving, this time zone known as the Aquarian Age, has with it many energies that have previously been absent from this plane. This Awareness indicates that in previous times, sex itself was a most solemn, most serious, most sacred and most secret thing in human experience. Entities did not speak of sexual things in public. This Awareness indicates that in the Aquarian Age, things are changing, whereby that which is bizarre is that which draws attention, which becomes the focus of discussion, and which can easily become looked upon as sacred.

It is however, important, and this is only important, that you discern clearly where you are on the path of spiritual development, whether your chosen path and lifestyle is enhancing your spiritual development, whether it is bringing you the happiness you desire, whether you are satisfied with yourself, whether you wish to continue in your present lifestyle, or to alter your present lifestyle to a different lifestyle, and when this will occur.

This Awareness indicates that for you it may not be for some time, or may be in a future lifetime; that it appears in your case that you are in transition from a female body, to that of a male body, and that in your next lifetime there will be a greater masculinity, and this will lead you away from this present lifestyle. That for others like you, many of these are moving from masculine bodies into feminine bodies, and in the future lifetimes these entities will become feminine in nature.

The Effect of Shock on the Genetic Code

This Awareness indicates that so far as entities being able to change their lifestyles, whether discussing sexual preferences or discussing other aspects of life; entities change very slowly, except under conditions of shock. The DNA coding, the genetic coding which entities follow, which affects the entities' lives, this coding of the genetic levels of an entity's cells, tends to have its particular influence on the life of the entity so that the entity acts and reacts according to the genes and their particular code, whereby the entity will suffer karma, suffer illness, suffer experiences caused by this code within the genes, and pass on to others the code of the genes, except that this code, the genetic code can be altered through experiences which bring about a shock to the system.

This Awareness indicates that it behooves entities to stop and look when they are experiencing a situation in their lives whereby they have a traumatic circumstance that brings about a shock or stress factor, to look at this experience and ask themselves: "How is this changing me? What is this going to do to the genetic code in my system? Will this bring about growth or destruction to my character, to my body, to my soul?"

This Awareness indicates that during shock, during trauma, entities have the choice. It is during these times when the choice can be made, whereby the entity may choose to react negatively to the shock, or experiencing the pain and negativity, may make the decision to progress and grow and develop, and sail upward into higher levels of experience so that the shock leads to a more profound and beneficial expression which then is recorded on the genetic code, and allows the entity to then grow and develop in a positive direction.

This Awareness indicates that the entity who, under states of shock or stress, surrenders, gives up, accepts failure; this is recorded in the genetic code, and creates a more self-destructive system, whereby the entity is weakened considerably, and therefore becomes more inclined to surrender to similar future shocks or situations of stress. That it is during these times of stress, during these times of shock, wherein entities must recognize the power of choice, the power of having choice is of greater importance.

This Awareness indicates that it is the lower aspects or vibrations of the Aquarian Age that focuses attention on bizarre, things which normally would be kept hidden, such as sado-masochism, abhorrent behavior, grisly murders and so forth; these things which were kept hidden in previous years, now are spread across newspapers, pictures in magazines, movie screens filling with images and pictures of such as would have shocked any entity in previous years.

This Awareness indicates that the higher vibrations of the Aquarian Age deal with inventiveness and unusual ideas of a more constructive nature. That in reference to this openness of discussion, the willingness of consciousness to look at that which has been previously hidden, which has previously been kept in closets; the willingness of entities to look at that which has previously been considered bizarre and perverted, is an indication of the willingness of consciousness to become more tolerant, to be open to looking at reality rather than illusions, to be open to asking and seeing that which previously was considered untouchable, or dark and secret.

This willingness to be open is the characterization of the Age of Aquarius. The willingness to look at that which is unusual. This Awareness indicates that the openness is that which is of significance; that along with this openness there is also that tendency of these energies to proliferate the bizarre and unusual, thus, those things which once were never thought of, not only are thought of, spoken of publically, on television, in movies, in public life; but are also experimented with by a great number of individuals.

This Awareness indicates that the overall outcome of such openness is a breakdown of tradition, of traditional values which held certain concepts and values to be more sacred than life itself. Whereby in previous times, entities would have been put to death, now the values of tradition are being threatened by entities who are involving themselves in those actions which once were so taboo. That this change as that which was inevitable because of the polarization of the values to such a degree that life was not held sacred, and values and tradition and social codes were held so sacred that lives were taken if such codes were violated.

This Awareness indicates that in time, the pendulum will swing back somewhat, and the old values will be looked at again, and tradition may be reevaluated; that life and the value of life may be given a higher priority than the old traditional sexual roles, whereby rather than putting to death an entity who violates a social sexual code, the entity's life is prized more highly than the code; that this is to be the appropriate balance.

This Awareness indicates that it is the nature of the Aquarian Age and the influence of the Uranus factor which brings about the sexual revolution, along with the other revolutions of tradition, so that overturning these traditional values can bring forth a rediscovery and a resetting of priorities according to that which is truly most sacred.

The Tradition of Sexual Values

This Awareness indicates that *It* wishes to comment now on the nature and role of the sexual values of tradition. This Awareness indicates that in ancient times, when these traditions were first formed, much had to do with the social/practical needs of a community, whereby disease could easily be spread through the community if sexual license was allowed; therefore, strong moral or social codes which were incorporated into the religious codes, were enacted to protect the society from licentious sexual activity of its members.

This Awareness indicates that this had a practical purpose which was made part of the religious code. However, this is not the only reason for these traditional values regarding the sexual codes of these religious and cultural traditions. This Awareness indicates that entities whose lifestyles include shallow sexual relationships tend to have relationships that never fully develop, where the masculine energy and the feminine energies within each individual do not have an opportunity to grow and develop properly.

Why Heterosex is So Important

This Awareness indicates that when the male comes in close intimate rapport with the female, masculinity of the soul of the male is shared by the mingling of auras with the female, and she takes on some of the male energy, and her own masculinity is enhanced. Likewise, the female, coming in close proximity to the male; her aura, the magnetic energy of her feminine parts mingles with the male, and tends to assist the male's femininity to grow and develop, this leading the male to become more tender, more feeling, more sensitive, and more sympathetic and caring; qualities associated with feminine energy.

The female, having taken on male qualities, then tends to become more sensitive, more capable of initiating action on her own. In this manner, the male becomes more wholesome, in that his feminine parts, his feminine energies develop, and his masculine energies are more pacified. The female becomes more wholesome in that her masculine energies grow and develop, and her feminine energies are pacified.

This Awareness indicates male and female coming together tend to balance each other out so that the androgynous spirit can occur within these entities; that the polarization tends to diminish. It is because of this fulfillment that husband and wife, becoming fully familiar with each other's part, the magnetic energies of each other, experiencing these so much that the energies seem like their own; this balancing and reconciling of these energies, in time, generally tend to bring the husband and wife to a state of disinterest in sex, their energies having been balanced so many times that an imbalance is not present.

This Awareness indicates that often, through programming of the present society, entities think this to be a kind of curse, for they do not have that grand passion which once they had, and such entities feeling this as some kind of problem, may attribute it to the mate, and may wish to have some other experience with some other person who again calls up the passions. This Awareness indicates that often entities who have reached that balance believe that they are missing something, and thus go out and search for that new turn-on, that new entity who can make them feel young again; the entities equating sexual polarity with youth.

This Awareness indicates that in actuality, the purpose of sex is to balance an entity so that the entity does not need further sex, and can put the energies into other, more constructive activities; that this in reference to sex other than that of childbearing. *

Homosexual Energies are Not Balanced Energies

This Awareness indicates that in terms of homosexuals, whether male or female relationships, that these energies tend not to balance the male and female aspects of an entity, but rather tend to enhance those energies, thus the male homosexuals may find themselves becoming more polarized in their masculinity, or if playing the role of a female, may become more polarized in the feminine role, whereas the homosexual females find themselves likewise becoming more polarized in the role which they play, either becoming overly masculine, or overly feminine; thus, homosexual relationships tend to create an imbalance in the psyche of the individuals involved.

This Awareness indicates that this is not necessarily harmful in the sense of soul growth, or in the sense of physical development, for the entity who becomes overly masculine may need to experience that greater masculinity, and the entity who becomes overly feminine, whether male or female, may need to experience that excessive femininity; yet, in time, these entities will need to move back into the experience whereby they are balanced.

The entities involved in such extreme polarities, in this life or in the next, will need to have relationships with their opposite poles, so that those strong polarities which were created in this life can be neutralized and balanced in the next. This Awareness indicates that entities who have shallow sexual

"I've been reincarnated,
but as what?"

relationships with many entities, having much quantity and little quality of relationship, having much sexual activity but little emotional or spiritual rapport, these entities will generally find their lives and lifestyles expressing an attitude toward life in which little matters.

These entities often becoming quite shallow in their value systems, whereby they hold values with a shallow approach, whereby loyalties mean little, whereby duties, responsibilities, persistency, stability; these qualities have little meaning to them, and whereby they simply seek momentary gratification from moment to moment, seeking pleasure here and there, without any sense of stability or purpose in their lives.

This Awareness indicates however, that fortunately, many entities having such a lifestyle, eventually tire of the quantity of relationships and become bored, dissatisfied, disgusted, and go into a state of isolation, separation, withdrawal from such relationships, and then, in time, discover the need for real companionship based not upon sex, but upon communication and concern for the welfare of another. Such entities may then become quite capable of deep and meaningful relationships.

This Awareness indicates that likewise, entities who have from the beginning deep and meaningful relationships with one entity, or few entities, over long periods of time of great loyalty, wherein something occurs that shatters that loyalty; such entities may commonly experience a kind of shake-up in their value system, whereby they then seek many experiences with others, attempting to find something of great value through quantity, as opposed to the quality of relationship.

This Awareness indicates that each individual has his or her own life experiences, and these vary as greatly as there are individuals to experience. It is not for any one entity to judge or condemn another. It is only for each entity to look at himself, at herself, and to discern clearly what is occurring in his or her own life, and in the effects that life is having on others, and on themselves.

Broken Loyalties Create Physical Reactions

This Awareness indicates that it appears that the entity Bill Sheppard, having moved into areas which he held to be taboo, seeking to discover that which he abhorred in order to understand more deeply those energies and to pacify and reconcile his own hostilities; it appears that this entity having moved into those levels, and having broken faith with himself and his loyalties toward certain concepts, certain experiences

and values, is also attempting to punish himself with the disease, the cancer.

This Awareness indicates that this relates to that previous message given by this Awareness that all disease is associated with broken loyalties, or with feelings that accompany those broken loyalties; that wherein entities break loyalty to others or to their own belief systems, they will almost invariably have a physical reaction. The extremity and degree of such reaction, depending on how badly they feel about the broken loyalty.

This Awareness indicates that this is not limited to broken loyalties; it also occurs when there is a loss of a loved one. That more precisely, this principle is related to broken identifications, wherein entities are identified with certain concepts, beliefs, values, or other individuals and things. These broken identifications bring about physical reactions which can have detrimental effects on the individual whose identifications have been severed.

This Awareness indicates that in this case, the entity as having been strongly identified with value systems which rejected the homosexual experience, then severing that identification with that value, the entity becoming involved in these experiences himself, the resulting reaction as that which enhanced the tendency toward cancer through the breakdown of the immunity system, whereby the entity feeling guilt, feeling stress, secreted hormones into his system which led to the cancerous condition being more able to inflict itself upon the entity.

The Harmonics of Light

This Awareness indicates that wherein the entity can have deeper understanding of the nature of these values, and the severing of identifications, and whereby the entity can look at the experience and see that this is not the end of his soul growth and movement, the entity can move on from this into other experiences, and the cancerous condition can also be altered.

This Awareness indicates that all things are harmonics of Light. Light is consciousness. The Resonating Electromagnetic Energy is the great Light which heals all, and the harmonic vibrations which result from the reduction of frequencies from octave to octave, bringing these frequencies down to the level of the vibrating atoms and their parts, create the matter which stores the illness, and the attitudes, and the values, and the broken values and broken loyalties, and all of these things, --material, mental or emotional,--are nothing more than frequencies and harmonics of Light.

Thus, any entity is capable of healing himself by tuning into the Light. The Light Itself permeates all levels, all harmonics, from the most subtle to the most gross. This Awareness indicates that It wishes at this time to send healing energy... the Resonating Electromagnetic Energy to this entity Bill Sheppard, that he may experience this healing light, and that he may move on from his present stage to that which is more productive and beneficial to himself and others.

(Pause for healing)

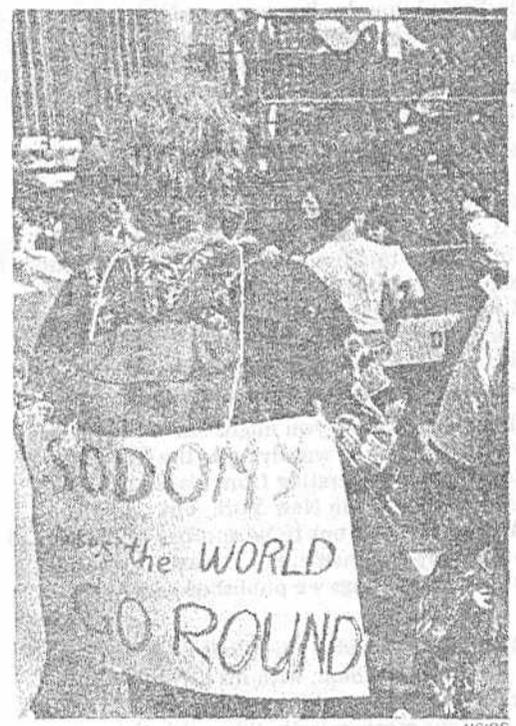

This Awareness indicates that this energy has been sent. That this entity is now in receipt of this energy, and may use this energy for his recovery, and as he chooses.

A SCIENCE OF VALUES IS NEEDED

(Closing Message)

This Awareness indicates that it would be of great service for entities upon this plane to have a science, much as you have sciences for psychology, philosophy, astronomy, geology, politics, history and so forth...to have a science which objectively studies values, human values. The study of values and meanings in life as a science as that which could bring forth new and deeper and more meaningful experiences and recommendations for social and personal experiences.

This Awareness indicates that such values being placed not simply from tradition, or from belief structures based on some traditional system, but such values being studied objectively, based upon the needs of the masses, the needs of individuals, the needs of the families, and the needs of those who relate to individuals, families and the masses. These needs being biological, social, physical, emotional, mental, environmental, and spiritual in nature.

Sodom and Gomorrah: A New York "gay parade."

(From 'New Solidarity' Newspaper)

ED'S Note:

* "The purpose of sex is to end sex" may be the ultimate and cosmic goal, but it does not jell with the info Awareness gave previously regarding the astral energies (mostly sexual in nature) being unleashed upon this plane, and how aware entities were to move into these energies in any manner possible and in so doing, help to transmute them.

**

The name of the book Bill Sheppard sent to me and which I mentioned in the original question to Awareness, is "The Divine Androgyne" According to Purusha (Adventures in Cosmic Erotic Ecstasy and Androgyne Body Consciousness), published by Sanctuary Publications, Box 7459, San Diego, California 92107. The book attempts to promote and justify homosexuality by equating it to Zen and Yoga and other spiritual disciplines operating through the chakras, and ultimately through various pleasure-pain techniques achieve orgasms which reputedly are cosmic in nature. This book is full of richly illustrated very strange and 'kinky' images; it is not for the squeamish. According to Bill Sheppard, this is a book "that could be of great value to a number of your members-- those anguishing over the problem of homosexuality in themselves or in loved ones. In this dawn of the New Age, the issue of Androgyne, sexuality, etc., need to be opened up and reconciled as speedily as possible."

Bill also included a large number of his channelings on this subject, with the request that we publish these. He writes:

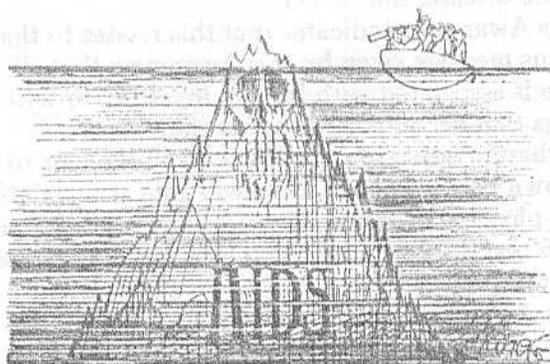

"In this last batch of channelings I sent you, there are excerpts that could be of value in reconciling these energies and dissipating guilt surrounding sexual issues. Those paragraphs espousing lines such as "...moms and dads, you are not to blame," "...You're OK," "...Being who in fact you really are,"and the genetic/reincarnational factors that determine sexual orientation. These excerpts from those letters could be of great value, even though you understandably indicated you don't want to publish those letters, at least in their entirety. There's so much needless suffering and anguish out there over mankind's biggest mystery, -sex- and it's high time the light of Truth begin to be shone on the Big Mystery."

Bill spent some time with the author of the book and he writes that he is also convinced the author is a channel and in writing this book, channeled from the 8th plane, as Bill calls it. Anyway, if enough of the membership express an interest in this frame of reference on the subject of homosexuality, androgyne etc., we might possibly publish Bill's channelings on the subject sometime in the future, or perhaps printing it up and offering it on a limited basis to those who are involved in, or wish a clearer understanding of the homosexual phenomenon.

Where is Bill Sheppard now, you might ask? The last we heard from him was that he was living in the Redwood forests in California, recuperating from his cancer. We heard a rumor that he was in New York, but this was never confirmed; it turned out to be another Bill Sheppard or someone going by that name, but it was not our Bill Sheppard whose channelings we published some years back.

I have a feeling that Bill is still alive; that he is still out there in the desert somewhere, with his little globe of the world and his candles and his endless meditations designed to heal our mother earth. When it is time, we shall hear from him again, I am almost certain.

For more information on this subject, please refer to the following 'Revelation of Awareness' Newsletters: 79-5, 78-43, 82-14, 84-16, 84-20, plus others listed in the Back Issues catalogs.

Bathhouse effort renewed

SAN FRANCISCO — City officials will renew efforts to close gay bathhouses in an attempt to stop the spread of the fatal disease AIDS, Mayor Dianne Feinstein says.

The mayor said she'll meet with other city officials this week to see if a way can be found to close the facilities, which number at least 12, and put the issue before the San Francisco Board of Supervisors.

"I am absolutely convinced that the public health — not just of the people here but all over the world — would be better served by closure of the bathhouses," she said. "They are a major point of contagion, and the arguments against closure are spurious, ill-conceived and just plain wrong."

Deputy City Attorney Phillip Ward said about a third of the city's bathhouses, adult bookstores and "sex clubs" are violating a court injunction against "high-risk" sex.

Researchers have said that AIDS, which destroys the body's ability to fight off disease can be transmitted through blood, or the exchange of body fluids during sexual intercourse. Male homosexuals have been identified as a high-risk group.

A year ago, the city Health Department ordered the bathhouses closed as a threat to public safety, but Superior Court Judge Roy Wonder decided the places could be reopened under new guidelines concerning modes of sexual encounters.

From Olympian wire reports

ARE VIOLATORS OF OTHERS KEPT IN ASTRAL BONDAGE AFTER DEATH?

QUESTION:

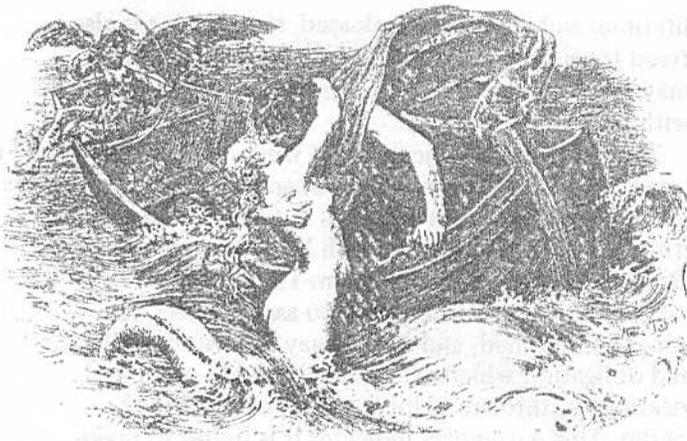

R.E.E. has a question (expressed in that singular syntax he uses): "A psychic author reports that during spiritual communication he learned that those held on the lower astral levels in reformatories or dark states, because of perpetrating homicide and probably other grave crimes in this life, cannot be freed from the lower levels of bondage till their victims forgive them, which may take up to 100 or 200 years in rare cases. Since such victims often may dwell in Celestria, this would seem to be conflictive with such a consciousness and abode, that they could hold feelings of resentment or vengeance and unmercifulness and non-forgiveness. Would Awareness please comment?"

COSMIC AWARENESS:

This Awareness indicates that this information as basically appropriate and accurate, except in terms of the semantics, or terminology used in the word *forgiveness*; that it is not a question of forgiveness, but rather a question of the victim overcoming the effect of the violation. This Awareness indicates that when an entity is violated and departs from this plane, the entity may reincarnate again, coming back, or may go to some other plane, never recalling who it was, or what led to the violation that harmed the entity. Yet the memory of the violation is etched in the soul-stuff of the victim, until the victim can, in some way, free herself from these energies.

This Awareness indicates that wherein the victim, --through meditation, or through psychiatric treatment, or through experiences of a reflective nature, through reenactment in a future lifetime of a similar situation, whereby the entity reenacts the experience and manages to release those charges caused by the original experience while releasing the charges of the secondary or reflective experience, --when this occurs, and the charges are released from these energies caused by the violator, then the victim (no longer being victimized, being free from those energies) is free to move on without any karmic tie to the violator, and the violator no longer has any karmic obligation to the victim.

This Awareness indicates that the concept of being bound in lower astral areas is that which is metaphoric in terms of being bound in lower astral energy fields of obligation, indebtedness to those who have been victimized by one's behavior. This Awareness indicates the entity may be walking around in a new body on earth, still being obligated to some victim whom he or she does not recall from a past life; that this energy from the obligation will remain until that entity who has been so violated by this violator reaches a stage of development whereby the victim releases any charge

DO MERMAIDS REALLY EXIST ?

QUESTION:

D.A. of Minneapolis asks: "Dr. Roy Wagner of the University of Virginia, in Charlottesville, has mounted an expedition to New Guinea to search for half-human and half-fish creatures. The natives on the islands claim to see the "mermaids" on a regular basis and call them by the name of "Ri". The primitive tribe describes the Ri people as having the arms, torso, head and sexual organs of humans, but the lower trunk is fish, complete with flippers. Could Awareness comment on these Ri people and their origin? Are these the "mermaids" spoken of in legends?"

COSMIC AWARENESS:

This Awareness indicates that this is in the affirmative; that these are essentially sea creatures which have the appearance of the human torso. This Awareness indicates that in certain conditions under certain light and while entities are in states of imagination or hallucination they may project even greater human qualities upon these creatures. This Awareness indicates that it is not unfair to refer to these entities as human-like fish. It is not necessarily accurate to consider them human, but it is not inaccurate, if one wishes also to consider porpoises as being the people of the sea.

This Awareness indicates there are many highly evolved beings in the sea, some who are more highly evolved than humans in many aspects or in certain ways; that these entities may be considered as people of the sea, or mermaids or mermen.

This Awareness indicates that they are not the common image portrayed by the legends and myths relating to mermaids in that in the pictures and images projected in regard to mermaids, they are seen as persons with a fish body, and the persons are well defined as individual human types. This Awareness indicates the features of these entities are much less defined, more associated with sea creatures; that these beings evolved much like the porpoises during the pre-Atlantean period, being associated with the Lemurian period, the early Lemurian period.

and is freed from the energies which had caused difficulties to the victim. When the victim is free, then also, the violator is free from any obligations.

This Awareness indicates that in this sense, very often the victim and violator come together again in following lifetimes to discharge karmic obligations, whereby one owes the other, or both owe each other some form of obligated expression. Thus, each may assist in freeing the other, or one may free the other of the energies which had been placed upon the other in some previous lifetime violation. This also applies in present lifetime situations. That wherein individuals are incapable of, or do not have the opportunity to assist directly those who have been victimized, there are also circumstances whereby the victim is helped by others other than the violator, and the victim's circumstances being relieved by some other, such as a new mate, a social worker, a minister or a friend, may release these charges which had been brought on from the experience in this or another

lifetime; and if these are released, the violator is also freed from further karma, even though the violator may not have had the opportunity to deal directly with that entity.

This Awareness indicates that while the violator is freed from further karma in connection with that particular entity, the violator is not necessarily freed from karma in connection with his or her *own* obligation in regard to that situation. Therefore, the violator will find it beneficial to assist others who have been harmed, and in this way relieve the guilt and obligation which is felt deeply inside one's soul vicariously, through helping others other than the victim. This Awareness indicates it is better to make direct contact and to assist those who have been victimized by one's action, to reconcile the energies directly; but wherein this is impossible or impractical, then the entity may give service to other needy persons to vicariously release any karmic obligations owed to another.

THE IMPORTANCE OF BURNING CANDLES IN YOUR HOME & ELSEWHERE

(ANOTHER REASON TO STOP SMOKING)

QUESTION:

A question from R.H. of Las Vegas. "I have several questions to ask Awareness regarding candles. I'm sure that some questions have been asked regarding this subject, but I have never really seen the subject thoroughly discussed in the readings. Awareness, I have just finished reading the book, *The Magic Candle*, by Sharmane Day, published by Bell, Book & Candle, of Las Vegas, and it is, to my knowledge, the most comprehensive analysis of the subject of candles that has been published to date. My questions are: does the act of candle burning cause an altered state of awareness, producing changes in consciousness? If in the affirmative, is the change in consciousness primarily effected at the suggestive thought and suggestibility levels? Can the degree and distinction of forces involved be explained by understanding the movement and effects of vibration, as explained in the 'gong' model of the nature of the universe?"

COSMIC AWARENESS:

This Awareness indicates that fire,--whether from a candle or from other sources,--fire is that energy which permeates through the various dimensions; that this moreso than other physical materials. This Awareness indicates that when a fire is struck, immediately entities and energies from more subtle planes are alerted and aware, and these energies of the fire draw forth negativities from various directions, from various planes.

This Awareness indicates that wherein these negative energies, (this in reference to negative or separative types of energies), wherein these negative types of energies are brought into focus through the flame, these energies then are transformed into a more pure nature; that in a physical image, entities can see this same action taking place with moths and bugs, insects and creatures of the night which are drawn to light. In the etheric levels, in astral forms, the negative forces are drawn toward the light, are purified or burnt up, and their etheric bodies or energies are then made higher in vibration.

This Awareness indicates that in terms of thought-forms, entities of a dark mood or a serious nature, generate forces from the conscious mind which emanate as thought-form energies,--these in astral visions, being a kind of magnetic form that emanates out from the entity, these being magnetic in such a manner that they may cling to the entity, and that clinging action creates a feeling of being stifled or static.

This Awareness indicates that entities may sit in a room, or live in a room for some time, and discover that as soon as they step in the door, a certain mood takes over as though they were stepping into a tomb, or into a room that is depressing. Often entities do not like their homes; it feels heavy, it feels dark, even with lights on, or windows open; that this is directly caused by thought-forms which have emanated from

dark, negative thoughts or extra-serious thoughts, difficult study, such as cramming for exams, or other forms of thinking which have left traces of energy in the room. This Awareness indicates that worry as a form of action which creates heavy thought-forms and energies, and these energies, when repeated over and over in a room, begin to create an atmosphere in that room. Entities may also recognize certain vibrations in hotel rooms, or motel rooms, or in the rooms and houses of friends; that these vibrations are the result of thought-forms, or energies which emanate from thoughts which entities have. That as an entity thinks certain thoughts, the energies which are behind those thoughts, whether joyful or heavy, will spill out into your room, into the area, and will cling to one's aura.

This Awareness indicates that wherein an entity wishes to rid himself of these thought-forms, the entity may use several approaches: taking a shower washes away thought-forms, going for a walk allows thought-forms to drop off from one's aura, becoming in contact with nature such as trees or plants, for thought-forms are magnetically drawn to trees and plants. This is why entities may feel so refreshed when getting out with nature; the thought-forms being taken off from the aura of the entity.

This Awareness also wishes to point out that thought-forms emanated and clinging to one's aura tend to recycle through the thoughts again, continually recycling and repeating themselves and again spilling out into the aura. This Awareness suggests therefore, that entities aware of this action, may wish to think thoughts, then cleanse the aura, and cease thinking those thoughts.

This Awareness indicates that the action of fire or burning, such as a fireplace or burning trash outside, or a bonfire, or lighting candles; this action is that which draws these thought-forms into the fire, purging the thought-forms and creating a clarity in the area. This Awareness indicates that fire draws thought-forms as a light draws moths, and this transmutes these thought-form energies, the magnetisms, into higher radiant energy,—this as a way of lightening the vibrations. Thus, when entities have heavy studies to do, wherein entities must focus their minds, such as cramming for exams, or doing income tax, or writing, or doing some other form of intense mental work, it can be helpful for entities to have a candle burning. (This Awareness suggests that this be done very carefully, so as not to allow possibility of a fire). This Awareness indicates that a candle burning, or a fireplace burning, as that which collects the heavy thought-form energies, keeping the atmosphere light so that the mind can continue to think clear thoughts without being bogged down by thoughts which were previously expressed.

The Real Reason Entities Smoke

This Awareness wishes to comment at this point, that the real attraction that entities have in terms of smoking lies in the subconscious realization of this effect of fire in terms of negative energies; that subconsciously, entities think of fire as a purification act, burning away those negative energies. This

Awareness indicates that the subconscious enjoyment of lighting a pipe or cigarette is actually most focused on the striking of the match; that which comes after is conditioned in the psyche through the habitual drug and from the habitual activity; that it is lighting the match which intrigues the subconscious and leads entities, or tempts entities into having an excuse for making a fire; therefore, entities are drawn toward the habit of smoking in order to satisfy that desire to have a fire nearby; that the cigarette gives an excuse for lighting a fire.

The Evil Nicotine Thought-Form

This Awareness wishes also to discuss briefly, that the effect of the nicotine as that which creates a totally different problem which, in fact, creates a thought-form of its own surrounding the entity's aura, so that it creates a different set of problems because of its particular nature. This Awareness indicates that the flame from the cigarette, while burning up certain thought-forms, is in fact creating a greater thought-form which is more parasitical in nature than the original thought-forms which might have been present without the cigarette. This Awareness suggests that entities would be more benefited by simply lighting a candle and meditating for five minutes, allowing the negative thought-forms to rush into the candle-flame. This Awareness indicates that the nicotine effect is that which dulls the sensitivities to allow them to tolerate certain thought-form energies without becoming nervous.

ED's Note:

For more information on this subject, please refer to 'Revelations of Awareness' No. 80-10(\$3.00 from CAC.

CAC has a few copies left of two books on this subject, (these not listed in our Book Catalog): "Spiritual Cleansing, a Handbook of Psychic Protection, By Draja Mickaharic, which gives numerous methods for cleansing the aura and giving psychic protection. (\$5.95 plus postage). Also, "Practical Candleburning Rituals," by Raymond Buckland (\$5.95 plus postage).

"Oedipus!"

CAN THE WEIGHT OF A SOUL BE DETECTED UPON DEATH?

QUESTION:

A question from D.A. "There is scientific evidence, according to one scientist, that the human soul not only exists, but also that the average soul weighs about one ounce. In 1907 a doctor did a series of experiments in which he placed dying patients onto a sensitively balanced beam scale, then kept close observations at the final hour of death. At the precise moment of death, the beam fell and the scale showed a 3/4 ounce weight loss. Over the next few years this experiment was repeated, and they all lost weight at the moment of death, between 3/8 and 1-1/2 ounces each. Just to be sure, the doctor ran the experiment on 15 dogs and found that not one of the dogs lost weight. The doctor died in 1920, and while much was made of it in the press, no one carried on the experiment after he died.

Could Awareness comment on the validity of his findings? Since the soul is the magnetic center of the physical body, it seems to me that the soul would just disperse in all directions at the moment of death and therefore not be subject to the law of gravity."

COSMIC AWARENESS:

This Awareness indicates that it does have certain magnetic qualities and thus pulls into it more subtle energies other than simply magnetic energy alone. This Awareness indicates that the soul as that which has a kind of shadow body, a body which contains the etheric or more subtle parts of the physical body. For example, the iron in one's body has an aura about it and when the soul departs, it takes the aura with it.

This Awareness indicates that these minerals within the human body, being infused with the energies of the magnetic center, the soul, have a vitality created by the interaction between the life force and inorganic matter of the body, the minerals, and this creates the shadow-substance or the aura around these minerals, which when the soul emerges from the body, is taken with the soul. It is from this type of reaction that the weight loss is caused. It appears the experiments have been duplicated by other scientists, by other researchers; that these have not been highly publicized.

(FOLLOW-UP QUESTION):

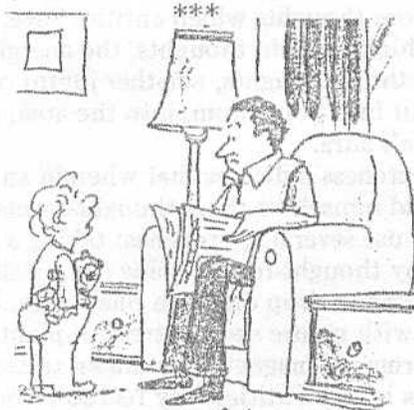

Why was it they could find no notice of weight loss with the animals?

COSMIC AWARENESS:

This Awareness indicates that these entities as not having the strong magnetic center which is common to the human; that the animals used as those which were more identified with spirit rather than soul; that there were indeed certain rudimentary energies of the electromagnetic

center which serve as the beginning of the soul, but this as being of a much weaker level.

This Awareness indicates that in reference to the entity's findings that there were no measurable loss for the animals, it appears that this was not as precisely measured; that with greater precision, greater precise measurements, there would have been seen a slight alteration in the weight of the animals. This Awareness indicates however, that this not so significant or dramatic as in the loss of weight for humans.

"I've seen too many movies. I catch myself praying to George Burns."

NATIONAL EDITOR

The Law of Projection

The Law of Projection states that the film that projects, depicts, and creates the events of one's life story, is stored within one's consciousness, and can only be changed from within.

The intimate conversations, attitudes, and the relationship one has within one's own consciousness, is reflected in experiences on the outer screen of life; one is both camera and projector of his life story.

Those who wish to see a world premier of new and joyous experiences instead of reruns, trash films, soap operas, tragedies, illness and hostilities, must *refuse* to bring or to allow such films, concepts or images to enter their theatres or be filed into their storage banks.

Those who seek out, allow, or enjoy filming such trash, do surely fill their cameras with the material that may eventually become part of their outward life.

Those who allow only the highest, clearest and the best thoughts, ideas, words, experiences and images to enter their studio, shall create and project films that show a life of joy and art.

Cosmic Awareness

REVELATIONS OF AWARENESS is a cosmic newsletter, published for the membership of Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507. Membership fees and donations are deductible from your Federal income taxes. Cosmic Awareness does not support the war machine. Neither do we. Why should you?

INDIVIDUAL & FAMILY MEMBERSHIP: \$30 per year.
