Helping People Become Aware

## IN SEARCH OF COSMIC CONSCIOUSNESS

Published by Cosmic Awareness Communications and the Universal Church of Awareness, P.O. Box 115, Olympia, Washington, 98507, U.S.A. Reproduction of this material is permitted and encouraged.

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious 'trance' levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

## THE SEARCH FOR "COSMIC CONSCIOUSNESS"

### ( THE USE AND MISUSE OF THE EXPERIENCE )

#### QUESTION:

A question from D.R., Gailsburg, Illinois: "In 1972 I began a search for something. In 1976 I read a book called *Cosmic Consciousness*, by Dr. Richard M. Bucke, MD.\* Ever since reading this book, I know what I was looking for, --the mystical experience, enlightenment, illumination, This Awareness; by whatever name it is called. I have desired this state of mind and searched for ways to achieve this. This need keeps me constantly trying to improve myself, to make myself a good vehicle for Awareness. I don't want to just *know* that Awareness is within me and all around me, I want to *feel* it! I desire direct contact with Awareness!

"Most of my free time, I devote to study and reading and improving myself. Only in Awareness do I believe I can find peace and happiness, and from *no other* source. Can Awareness comment on my desire, or can Awareness touch me, even if only for a minute?"

#### COSMIC AWARENESS:

This Awareness indicates that this has always been a confusion among entities on this plane, as to the mental realization of a concept and the experiential realization of the concept or the actuality. This Awareness indicates that wherein one understands

mentally the concept of Cosmic Consciousness, it would seem that one needs not any further have the experience in order to recognize its reality. That this likened unto being told that there are certain types of sea creatures. One should, it would seem, be content to accept as part of their reality that these sea creatures do in fact exist, for they have been witnessed by others.

This Awareness indicates however, that the entity who says: "I cannot accept this unless I see these sea creatures for myself, I want this experience as first-hand," then such an entity will need to enter into the ocean, the sea of experience and to meet that sea creature. That likewise, the entity who reads of Cosmic Consciousness and discusses the Cosmic Consciousness with others, and wherein this term comes up, the entity says: "Oh yes, I have read all about that...I have read this, I have read that, I have read several pamphlets and I have read and heard others speak of this,"--that this entity has the intellectual or thought-level understanding of Cosmic Consciousness, and has little desire to actually experience this condition.

This Awareness indicates still another entity may, in hearing this man speak, may say: "I want to experience that! How can I experience that?", and the entity may sit and explain intellectually how this novice may begin to exercise in order to experience the Cosmic Consciousness. This Awareness indicates that it would be impossible for the entity intellectualizing to force the other to experience that Cosmic Consciousness simply by explaining anything. It would only be possible for the entity to experience that through his or her own efforts, his or her own realizations.

This Awareness indicates that all of the words, or all of the efforts of any other than yourself will not bring about this experience. This Awareness indicates that there are circumstances which occur in one's life whereby under such circumstances a moment of enlightenment may occur, either in a small scale, in multiple scales whereby they occur frequently on a daily basis, in minor ways, or whereby under such conditions of a prolonged struggle of great stress and intensity something breaks and allows you to let go

of all of that heavy weight; suddenly it is replaced by a sea of enlightenment, a lightness, an understanding, a realization.

This Awareness indicates that this, depending on its degree and the scope of its concern and focus, may be termed Cosmic Consciousness, or it may be of some lesser degree, such as social enlightenment, or the 'Ah Ha! I have found it! The solution to my problem!' This Awareness indicates that there are many degrees of this state of "Ah Ha!" and there are many ways whereby this may be experienced, but basically, the experience comes about after long struggle, hard work of trying to understand or overcome some obstacle.

This Awareness suggests that it is not something which can simply be handed to another on a silver platter as though it were ordered in a restaurant. This Awareness indicates that one may however, if unable to have the full course dinner, one may at least have some crumbs, such as looking at the concept of Cosmic Consciousness as presented by the intellectual and asking oneself: "If I understand this intellectually, how can I experience it?"

This Awareness indicates rather than running down to your local pharmacy or psychic, you may wish to sit down in a quiet place and open your mind to looking at what the words *Cosmic Consciousness* actually means to you. And whereby you look at these words carefully, and focus on these words with great interest, and attempt to *feel* their meaning, rather than see their letters and shapes and hear the sounds of the words, wherein you attempt to *feel* the meaning behind the word, then you may begin to unlock the floodgates whereby the experience leaks through, drip by drip, giving you a taste of what lies beyond.

This Awareness indicates that with deeper and consistent effort and meditation, you may find yourself having more to drink of this experience.

This Awareness indicates that you must also look carefully at your motives as to *why* you wish to drink of this experience; if this is for your personal soul growth, to allow you to better understand your life, your purpose, your relationships with others, and with the universe, or if this is simply another something to add to your collection of experiences, whereby you can say: "Oh Yes! I know all about that! Cosmic Consciousness! Yes, I have experienced that myself!"

[ED's Note: Awareness expressed this in a sing-song voice, expressing supreme sarcasm seldom heard before.]

## USUALLY IT IS THE WANDERER WHO SEARCHES FOR THE EXPERIENCE

### (FOLLOW-UP QUESTION):

Awareness, isn't that a sort of syndrome common to many Wanderers, particularly young Wanderers, perhaps having on some level, a memory of recently being with the Source, and they come down here on a mission, and they tap into this memory again, and they become so preoccupied with the Cosmic Consciousness Experience that they forget what their mission is?

### COSMIC AWARENESS:

This Awareness indicates this in the affirmative. This Awareness indicates that also, many of these Wanderers who enter into this plane in order to fulfill some chosen obligations toward this plane, obligations which they have chosen to fulfill by coming here; many of these entities become preoccupied with their own self-importance, and forget the purpose of their being here, and instead begin to look more closely at these concepts such as "Cosmic Consciousness" and begin to seek some prestige factor in their life which will give them a sense of social meaning, rather than what they really need to recall, which is their spiritual meaning.

This Awareness indicates that the social prestige of being a spiritual leader often becomes the more important significance to an entity. That it should be the other way around: that being a spiritual entity allows you to be a social leader. This Awareness indicates that one should think of himself not as a spiritual leader, but as a social leader who is guided by spirit.

This Awareness indicates that the pursuit of the spiritual experience as that which has great value, but which is in itself so sacred that to speak of this experience often diminishes the value, and an entity who has such an experience has the opportunity to either learn from the experience an insight and a realization into the nature of the universe and his or her place in the universe, and apply this realization to his or her life and society and dealings with others, or the entity has the opportunity in having this experience to rave about: "The experience I just had up on the mountain! Wow! It was fantastic! This was probably the greatest experience anyone has had since Moses! This is the experience of the lifetime, and I must tell you all about it!"

[ED's Note: More heavy sarcasm]

This Awareness indicates that such a spiritual experience can be made into a carnival barking sideshow for entrapping the weary travelers and taking their monies, so that you build quite a following and have quite a number of disciples, whereby you can explain the terms "Cosmic Consciousness"

from your experience, and they in turn can walk away to their friends and relatives and mutter the same words which you gave them as to the Cosmic Consciousness Experience, so that they have this intellectual understanding of this new term which is going around the neighborhood lately.

This Awareness indicates that these entities then may solicit others to come and listen to your speeches, and may bring gifts of fine incense or gold or other types of prizes for your great experience which you share. This Awareness indicates that this as two different approaches to the experience, whereby one entity learns from the insight, the other commercializes on the insight.

This Awareness indicates that wherein the entity commercializing on the insight is concerned only with keeping the experience and relating the knowledge, that entity is misusing the spiritual experience. The entity who has learned from the experience understands through the experience conditions associated with others, and how they feel, the great suffering which they experience, the needs which they have, the confusion which is everpresent, the desire for clarity and understanding, the feelings of loneliness and separateness which entities endure, the need to be one with others, one with God.

When the entity, through the experience of Cosmic Consciousness recognizes the unity of all things, the suffering in all things, the need for all things to recognize and respect each other as part of the Grand Total; when the entity finally sees all this, and does not separate himself from this experience in order to run off to the hills and yell to his friends: "I have found it!", but wherein the entity remains in that condition of experiencing the Cosmic Consciousness levels, the realization of Oneness; this entity then, in sharing what he can with others to ease the suffering, to clear the confusion, to answer the questions, to find solutions, to assist others in finding their path, to assist others in clearing their own confusion, in finding their own solution, to assist others in learning how they themselves may acquire the understanding which he or she is trying to relate, to assist others whereby they have the opportunities, the potentials and the tools for surpassing anything that he has discovered...this entity is using the experience wisely.

(Closing Message)

This Awareness indicates that the soul is measured by its intention in each moment, and by its identification or attachment to that which is held most sacred during that moment, and the measurement of the soul at one moment, or over a long period of time, does not cast that soul into a mold from which the soul cannot move, for the soul, in moving moment to moment, becomes what it becomes in each moment.

### SHOULD ONE HAVE A SECOND CHILD?

#### QUESTION:

A question from D.F., Security, Colorado. "I have a brief question for Awareness. I have one son eight months old, and since he was born I felt pressured by both sides of my family and my husband to have another baby. They say an only child grows up lonely, spoiled and selfish. I love my child, but there are days I get so frustrated and feel so enraged inside that if I had two I feel I'd be off the deep end at times. Yet the joy I have at times almost makes me consider having one more. I'm just curious to hear Awareness' comment on the 'only child'."

#### COSMIC AWARENESS:

This Awareness indicates that an only child generally tends to grow up being somewhat more intelligent and mature even though often more greedy and self-centered. However, the child with a brother or sister may also find more time to spend in entertaining itself with its brother or sister rather than demanding parental attention so much. This Awareness indicates that it does not appear to be a matter of which is more trouble, for the only child can require more attention than the two children, depending upon their personalities. This Awareness indicates that often two children can play together so well that the parents do not need to give them great attention; that in other cases the two children can be competitive so much that the parents must continually give them attention to keep them apart, or to keep them from hurting each other. That wherein the parents do not cause or allow jealousies and hostilities to remain with the children, and wherein a parent does not transfer attention from the first child to the second, but simply adds additional attention to the second child while still being close to the first child, the likelihood of jealousy decreases considerably. That if the first child feels neglected because of the attention given to the second child, then threats to the first child will be felt and the first child will express hostility or jealousy and do outrageous things to get the attention of the parent.

This Awareness indicates that this also can drive a wall of disagreement and hostilities between the first and second child which will leave a strong mark for years to come on their relationship. Therefore, if an entity is considering having a second child the entity must prepare to give more attention at first to the second child while still giving the same attention to the first child, and may prepare to condition the first child into an enjoyable behavioral pattern toward the second child, this for example, the mother saying, "We are going to have a baby," telling the first child, "We are going to have a baby sister or brother and we are going to take care of it."

This Awareness suggests the mother can further have the first child assist in taking care of the baby so that this becomes a game with the second child working closely with the mother and father in the attending process. That this as a way whereby the older child begins to express early love for the younger child, that gradually the parents can turn their attention from a need to guide the two children from combative concerns for the two children become closely affiliated and work together as brothers or sisters should. This Awareness indicates that this type of relationship can assist both parents and children to have more harmonious family life.

#### SPACING YOUR CHILDREN -- ADVANTAGES AND DISADVANTAGES

##### FOLLOW-UP QUESTION:

Is there a particularly beneficial spacing between children that would tend to work best for this?

##### COSMIC AWARENESS:

This Awareness indicates that children near the same age have more in common with each other, that children whose years are farther apart often feel frustrated either by the duties imposed on them to watch out for little brother or little sister, or by the feeling of not being allowed to go with big brother or big sister, that this separation tends to throw a greater parental responsibility on the older children, whereby the younger child always feels more like a baby and left out from the adult or older children's activities. This tends to create greater psychological problems than when the children are the same age.

This Awareness indicates however, that psychological problems can be areas of activity which promote and demand greater growth and maturity and understanding; that those near the same age may have more harmony, but may not develop as solid a character as those who are of different degrees of age. This Awareness indicates however, that those whose ages are of greater distance may have problems which they cannot integrate without special assistance from others and these may scar their personalities. This Awareness indicates it is simply a matter of being aware of the individual in terms of his or her situation and how these individuals are responding

to these different environmental factors, whereas the parents can afford to have two or three children near the same age, this would be the most harmonious. That wherein however, children arrive at different ages, this may be considered as something which the individuals perhaps need for special character building qualities or situations whereby their character is built along the necessary lines of requirement due to that situation. That wherein problems arise because of these different ages, these may need special attention.

This Awareness indicates that in terms of attention given to the child wherein an older brother or sister is present, the child's attention can often be met by this older brother or sister, thus relieving the mother and father from some of the responsibility. However, this also can become a violation to the older child if used incorrectly and can also become a psychological problem to the younger child if the parents ignore the child and leave the guidance to the older child. This Awareness indicates each case must be considered on its own merits and its own factors.

#### ONE WAY TO OPEN THE CHAKRAS

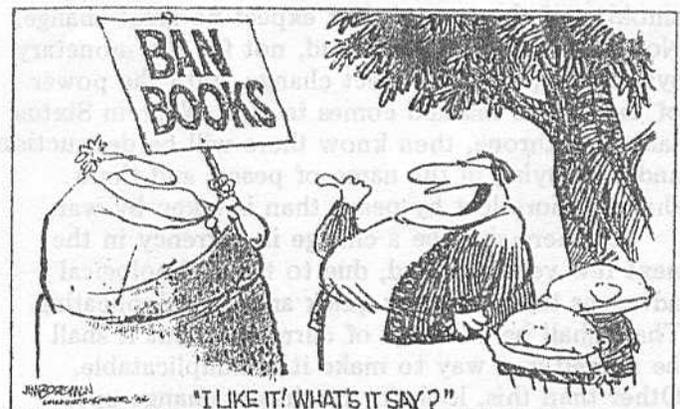

##### QUESTION:

A question from W.L., Sterling Heights, Michigan: "Many psychics have stated that the need is great for mankind to clean up or clean out their four lower chakras as a prerequisite for the Aquarian Age. If this is true would Awareness give instructions and guidance as to how to go about doing this?"

##### COSMIC AWARENESS:

This Awareness indicates It has given the Spiritual Development classes for opening the seven chakras. This Awareness suggests that this as being the most rapid method of development available. This Awareness indicates that these classes may soon be put on tape for groups to experience in their area, this through the Aquarian Church and its charters.

AN UPDATE ON THE CURRENCY CALL-IN

(November, 1986)

QUESTION:

Do you see the possibility of the 10 to 1 currency all-in and issue of new currency happening in 1986 or 1987, or has this been put on hold until after Reagan's present term, as some sources are predicting?

ANSWER:

It has been placed upon hold,—hold for a great length of time, due to the economic upheaval and upset that it would produce. Do not look for it to come to pass, for there is a change taking place as our country grows both more conservative financially, morally and ethically. They will not take such liberal advances wherein lie great risks; but for the next ten years expect there to be prosperity and great poverty amongst that prosperity. Expect there to be upheaval and discontent, yet expect the mainstream to remain stable. Expect the weather to continue its bizarre patterns. Expect rain when it should be dry, and dryness when it should be wet. Expect drought. Expect food and produce prices to rise.

What is not destroyed by the droughts and dryness shall be destroyed by the mildew and mold and the wet. Expect rumblings and tremblings within the earth and shakings upon the mountains, and smoking of the ground. Yet expect no great change. No great change near at hand, not for the monetary system. No, do not expect change, until the power of the one so marked comes to rule. Wherein Sixtus takes the throne, then know there will be destruction and destroying in the name of peace, and there shall be more lost by peace than is taken by war.

But there shall be a change in currency in the next few years at hand, due to the technological advances that allow for quick and easy duplicating. There shall be a change of currencies, but it shall be altered in a way to make it nonduplicatable. Other than this, look for no drastic change upon our monetary system, for it shall not be, until the Evil One comes.

WHAT IS BEHIND THE TYLENOL SCORE AND OTHER DRUG TAMPERINGS ?

QUESTION:

A question from S.C., Dallas, Texas. "If Awareness hasn't already commented on it, could we be given a better understanding of what's behind the "Tylenol scare" and related product tamperings?"

ANSWER:

The Tylenol tamperings and product tamperings are of several states. First, the original tamperings was not tampering, but was actually a mistake from within, for the company itself is responsible for many chemicals, yet, there is so much money involved that the truth could not come out, for the money would not allow it.

Yet the public saw what happened, and they were scared, and they set up a very deep and strong emotional vibratory force, a trend. Now you know if you plough a row, then you go back and you slip the plough in the row again, it will tend to follow the row that has already been ploughed; so, when you set a vibrational force in action, again, actions taken shall tend to follow that vibrational force or trend. What has happened has been that there has been not inner plant tampering so much as inner plant accidents, inner plant misapplication, inner plant mismanagement, mis-storage.

Now understand that this trend is set. The people not knowing what happened, but believing there has been tampering, and having great emotional fear, set a trend; then this trend is followed by related products, especially those opened to the lower astral levels who would be misguided individuals that would also seek to repeat by following this vibratory force and would tamper with other products then. You see this vibrational trend theory in action many times over. Airline crash, airline crash, airline crash night after night on the news! Then no more. Fires, fires, there's a fire everywhere! Then there's floods. There's a flood in the middle of the United States, a flood in Africa, a flood in Brazil,—everywhere there's floods, then fires, fires again, everywhere, but there's no floods, fires!

Earthquakes. There's an earthquake in Chile, there's an earthquake in Ecuador, there's an earthquake in Peru, all over the place, all at once, because the first set a trend of consciousness and other people allowed it to be followed, by living their fears; live their fears instead of proclaiming their power within to overcome. For as you believe, so it is.

## HOW TO DEAL WITH TERRORISM

### QUESTION:

A question from R.B., Phoenix, Arizona. "Could Awareness please specify appropriate and necessary means of aware-dealing with terrorists, the best immediate handling of the 'symptoms' and then a longer term curing of the 'dis-ease'? Or is this just an inevitable part of the changes that must be weathered until enough individuals have become aware? (Personally, I don't believe that). Might tourists and overseas travellers in general surround themselves and all in their surroundings with White Light as an initial step,--that seems to me to be an obvious starting point. But what else physically, emotionally, spiritually needs be done? In the event an aware individual becomes directly or potentially victimized (for whatever lessons need be learned) by terrorists, what can be done by those entities to best help reconcile the energies? Could Awareness please comment?"

### ANSWER:

This could be best effected by meditations from within, by group meditations. If it were that one consciousness could be gained by all in flight, in bus route, on trains, that all might come together of one mind and one spirit, within the deep meditational recesses, that they might release the energies positive, the influencing vibrational trends which would make it almost impossible for the negative vibratory forces from the lower astral planes to project, to receive the terrorist actions.

Peace from within is more important than peace without. And yes, one individual may travel and surround himself, herself or others with the protection of the Divine Self, and yet that protection is not as great as would be manifested if the whole group together could come together in one accord and one mind for meditational relaxation, for the one can protect himself, several, maybe all if he is so attuned. But few are so attuned; but in a group situation, many are so attuned that it might be so, for they come together in one consciousness and one mind, and though they not be highly attuned, they are able to magnify that which is within to that which is without, and thus protect the whole group.

On a short-term basis, for the government especially, terrorism might best be dealt with directly, much as spanking a child is the way that one directly deals with the child when he commits an evil or a wrong; but then you explain to that child what it has done and how it can best avoid it, so again, terrorists might be dealt with in the same way, harshly reprimanded, but then explained as to why, and that it will not be tolerated again.

If we correct our small child simply because we love it, then why will we not correct terrorists in the same way simply because we love them. It is true that the spirits of Krishna, Vishnu, Christ, are all within and if all be within, what we do is of God, and if we do it for good cause, then it is of good. There are times when forceful action must be taken. When it is necessary, when it is of motivation from the Higher Self, then there is no reason to fear. Even so, such philosophies as Kung Fu have realized that the inner development may be used in this way, therefore they physically defend themselves without ever leaving the true consciousness of spirit. Inner peace is the road. Inner peace for one is protection for one. Collective inner peace is protection for all.

## WHY THE STRADIVARIUS VIOLINS WERE SO UNIQUE AND UNEQUALLED

### QUESTION:

A question from A.M., Northridge, California. "Why were the Stradivarius violins so unique and why is no one able to build violins today that equal them? Was there something special about the Stradivarius family?"

### ANSWER:

There was something very special about the family, about the violins. There are several factors which must be taken into account; one, is the wood density and the resonance of the wood itself, something which cannot be attained by other woods. The select spot where they gathered the wood, which no longer is, and therefore cannot be gathered again; also, that the woods change in density over periods of time, therefore if you were to cut the same tree today as was cut then, it would not work for the same resonational faculty. It would not produce the same quality nor the same vibrational frequency, but this is not the whole.

Understand that the family of Stradivarius had a highly attuned and acute hearing ability, and therefore they were able, by pecking upon the woods to hear the resonance from deep within, for they listened not only with the outer ear, but with the inner ear. They listened and saw with the spirit and could see the harmonious vibrations roundabout the woods, but even moreso, and think this not strange; even moreso their instruments produced such beauty of sound that people *expected* it, and this expectation built a belief, and this belief endowed their violins with gifts that they would never have been able to create themselves. The belief in them.

### RAMTHA'S SCARY PREDICTION REGARDING THE WEST COAST

( November, 1986 )

#### QUESTION:

In a letter from J.W., Panorama City, California, he writes: "The Ramtha intensive was held in Denver in May and called "Change: The Days to Come." He said that if we lived in the cities, near the ocean, or on the West side of the San Andreas Fault that we were committing suicide and should move into a house with land around it, plant our own gardens, get solar converters to make electricity, and drill our own well,--in short, become sovereign. He said the bread basket would be depleted by the end of 1987 from the drought. Hurricanes were also predicted. Anyway, it was pretty grim and dismal in its outlook for the immediate future. It is supposed to be caused by sun spots and solar flares. Has Awareness indicated the next year and a half is going to be particularly heavy? How valid is this prediction of Ramtha?"

#### ANSWER:

The prediction contains both short-term and long-term together. They are not one and are not the same. Yes, in the next few years it shall be dry. There shall be need for wells and water, and food shall become more scarce, but it shall not be earthshakingly so at this time. There is no spot of safety, except peace that is within be found. For the wars and the desolations that shall come when the time is at hand shall be so random, shall be so destructive, shall so pock-mark the face of the earth, that to say to dwell here or to dwell there would be foolish; but to say 'Dwell within the inner peace', now that *would* be significant!

There shall be war, and there shall be famine and pestilence and death, but these are not yet, but are for him when you see him come. Name: Sixtus Six, Ictus Sixtus Six. (ED's Note: phonetic spelling). When he takes his throne, not a time

at hand this moment, but a time at hand all too soon, there will be war and more war, and the earth itself shall roll upon its axis, and there shall be flooding and destruction, and mountains shall melt away. Mountains shall crumble and fall away and become flat, and there shall be mountains raised up where never was mountain before, and buildings shall collapse and crumble and forests shall be destroyed. Dry land shall come forth from the sea, and the sea shall swallow up dry land, and yet there shall be many survivors! Those who believe, those who have the state of consciousness aligned to that force which is protective shall come through unscathed.

\*\*\*\*

ED's Note: Although we do not generally publish predictions of psychics, we do feel good about the basic rap Ramtha is giving to entities: that the God is within and we all have the ability to create our own heaven or our own hell; therefore, for the many readers who have asked us if we feel Ramtha's predictions are valid, all we can say is to refer you to what Cosmic Awareness has always said about predictions: The future is not fixed. It is consciousness, the combined world consciousness of people on earth that create destructive earth changes and wars and famines etc., and it is the combined consciousness of those same entities that can reverse it. Personally, this editor feels that at the time Ramtha gave these predictions, that was indeed probably the energies he saw in motion. However, I personally believe that the World Instant of Cooperation slated for December 31 of this year will create such a change in consciousness that this prediction (also made by Edgar Cayce) about San Francisco and West Coast areas simply will not come to pass. It is up to all of us to energize the White Light of transmutation of these energies and not to be fearful, not to panic, not to spread warnings of coming destruction, but to energize a healing of those energies that could make such calamities a reality. The San Andreas faultline, by the way, extends up in to Washington state, cuts around Mt. St. Helen and through Olympia. The CAC staff has no intention of leaving this area because of such predictions. As a matter of fact, I believe that Ramtha's channel, C.Z. Knight, is also within this same fault area. She lives in Yelm, about 12 miles Northeast of Olympia, and the way she is building up her acreage there, huge expensive new buildings for the entire Ramtha operation, a 12 foot high stone fence around it, a virtual fortress with guards, it is evident that she is not worried about that particular prediction of Ramtha, so why should we? TOWER OF BABEL

## HAS MANKIND CHANGED FOR THE WORSE? CAN PROPHECY BE CHANGED IN TIME?

### QUESTION:

A question from K.W. in Ohio. "It's super hot here, and much is happening with the people. Their attitudes as of this summer are so different. Do you feel this is the summer of total change in mankind? We have gone as far as possible on this cycle of self-serving and sex being the controller of all the actions instead of the other bodies of the beings. The TV video is just totally feeding the people violence and hurting others physically by telling people "this is the way to live". And this shows the youth that to kill and hurt and rape is just the right way to live. I feel that this was the way things were back in the days of the Romans and Greeks when for sport they threw people to the lions. Now we have sports on TV with millions watching and cheering the violence. Animals are kinder it seems. Please ask just what we can do about all this?"

### ANSWER:

It has not gotten as bad as it can be, nor as bad as it shall be if there is not a shift of consciousness. However, a flood of conservatism is flooding through our nation as a whole and hopefully it shall filter out and flood through the world and earth. But no, no, don't deceive yourself to think it has reached the limit of evil, for it is but the beginning, the very beginning, for it would reach the point where human life is of no value, and each individual would only care of themselves for ought; and therefore all others are objects of use for them for whatever would please them, be it sex, rape, violence, murder; so it was in the days of Sodom and Gomorrah, and so it shall be.

But the prophets of the Most Divine and the most holy and those who have found the inner peace shall be separate from this, for the peace within shall not allow them to become entangled, for temporarily the evils have been wayset, temporarily they have been halted and maybe even reversed, and as Nineveh was spared, so can we be if consciousness can be altered to the state that people will see and understand, and turn and change. Can it be? Can it be that we might alter that which is to be?

Understand that no prophecy is set and sealed without the possibility of alteration, but all prophecy is conditional upon the present trend being followed. However, a plough may be kept in the row it is ploughing, or it may be picked up and moved to another row; so may consciousness be altered and we might be spared. Pray for it, and pray that many more pray for it, for even now, enough have seen that it is being temporarily checked.

Would it not be wonderfully divine if our reality was changed altogether?

## WHAT WOULD HAPPEN IF AMERICA UNILATERALLY DISARMED ITSELF?

A question from J.H., Blanding, Utah. "Some Biblical and other writings, particularly the teachings of Jesus, suggest that total trust in God's protection (both rationally and personally) is far superior to an arms race, and that a nuclear arms race is pure stupidity. So:--Suppose North America (Canada, USA, Mexico) jointly and meaningfully declared their trust in God and started unilateral dis-armorment. (First nuclear, then chemical, then 'conventional'), would this cause a chain reaction reversing the present chain reaction? (I notice that most of us do *not* carry defensive weapons individually, even when taking a trip to the big cities). Would Awareness comment on this?"

### ANSWER:

It is the lack of belief that causes the problem of warring. Ancient Israel proceeded forth from Egypt, an almighty force fighting their every battle and yet, because of their unbelief, they had to take up arms, when they would have never have had to battle. Not once would they have had to lift up weapons, but because of their unbelief, they battled.

The powers that be have so much to use in the consciousness: there is weather, there is the earth, there is the storms, there is the realities that can be changed and altered. All things can be manipulated to the good of those who will believe. But through unbelief, we lose it all. We lose all protection through unbelief. Where there is no belief, there is no protection, and where there is doubt, there is no belief, for belief and doubt cannot abide together.

If we were to disarm in the United States, do away with everything we had with no stipulation to another country, do away totally, we would never see violence again, if we could accept it, because in order to do such a thing we would have to believe. We don't do it because we don't believe. If we could alter our collective consciousness, our consensus reality, then we would believe and there would be peace.

Yes child, you are right, in ideals you are right, but in implementing of theory, man is so weak. So weak.

### A MOTHER LAMENTS FOR HER 'LOST' DAUGHTER

#### QUESTION:

A question from A.B. in New Jersey.

"I am writing this letter with a heavy heart because I feel that I'm losing my only daughter. She is so infatuated with the man she has been living with that she has become an emotional basket case. I can't even talk to her. She is so defensive and doesn't confide in me anymore either. This man is a drug addict (and I fear she is on her way also) and is constantly in trouble with the law. I know this is fascinating to her because it is new. She is only 24 years old. However, she has a young four year old child. This breaks my heart. It's hard to sit back and watch someone destroy their life and maybe that of a young child. What should I do, and what do you see?"

#### ANSWER:

Remember this child, and remember this well. Each one comes into this life with a debt, each one comes into this life with a balance and a counterbalance, except those who come to teach, except those who come to heal. There are those who come for learning, and all that is done is a learning experience. It is chosen before ever the birth arrives what road one shall walk.

Though you raise a child in all ways rightly, though you raise a child in all ways, you must take into account the balancing and the counterbalancing, but be not disheartened. But find yourself this: that not through persuasion and not through argument can you save a soul, but through gentleness and understanding you can alter all that is, was or will be.

Your daughter is in a state of rebellion. It is a natural state for man to rebel. It is the most natural state of being for one who has not reached inner peace. When one does not find inner peace, then they seek elsewhere. They seek without to find if the thrills of life can fulfill them. They seek to bust open their chakras with drugs. They seek to find a way of life that is satisfying, never

quite realizing that the way of life which they need so desperately lies within their own being.

We would suggest to you, that you not try to change or alter her, but if you can and will, that you might get her involved in a meditational setting with others of like mind, seeking for the innermost peace. By so doing, you will have helped her, but she will resolve her own conflicts, for one cannot find inner peace without it radiating without into their whole life.

Now, as to the child, and the child small: from the hardest of life, from the strictest of test, shall come the child to be gifted. For he will be a leader and a fighter, a backbone to his family, to his loved ones, to his people.

### HOW CULTIST GURUS USE MIND CONTROL

( THE MEANING OF SABBATH, DAYS OF THE WEEK )

#### QUESTION:

A question from S.W., of Manchester, Great Britain. "The observance of the Sabbath, feast days, passover, Pentecost etc. have been considered to be everlasting. What guidance can be given today about these covenants?"

#### COSMIC AWARENESS:

This Awareness indicates the original purpose of setting aside one day for Sabbath as having two purposes: the one being to create a special day whereby entities had an excuse to rest and avoid over-stress in their daily affairs, to recuperate from these as well; the second purpose being a reminder of the Lord or Creator or Deity of their tribe.

This Awareness suggests that the use of the seven days as a week was symbolic of the seven rays of color in a prism; these seven rays having their effect in various applications in the creation of material particles, as has been indicated in previous messages. That this as a means of hiding information in cultural activities regarding a science which is held in relation to the physics used by those who are involved in creating material particles and substances in the world of what is termed creation.

This Awareness indicates that more information on the use of holidays and those sacred rules and obligations of religious cultures imposed upon them by their deities will be given at a later time.

This Awareness indicates that briefly at this point, however, this Awareness wishes to explain the principle behind setting rules for religious orders that can be used as means of effecting and controlling the minds and expressions of those within the religious cult.

This Awareness suggests that you visualize a group of entities within a room who have no understanding of why they were placed into this room. This Awareness suggests this may be thought of as an experiment by a master psychologist to see how he can formulate and direct the consciousness of such entities. This Awareness suggests that this master psychologist then enters the room and states: "I suppose you wonder why you are gathered here." This Awareness suggests the master psychologist then begins to tell the entities that they are gathered here for the purpose of some very unique and significant contributions to the realm of science. That the entity may explain that these persons are gathered to help serve science and humanity through their particular experiment.

This Awareness suggests the psychologist then goes away and the entities begin to wonder exactly what it is that they shall be involved in. This Awareness suggests these entities do not yet have enough information to evaluate anything, therefore they have, to some degree, become reliant on the psychologist. This Awareness suggests that the psychologist then enters again within two days and informs the entities that from now they are not to speak to each other during the hours of 10 and 12 o'clock. The entity then leaves, and the persons involved cease to speak to each other between the hours of 10 and 12 o'clock.

This Awareness suggests that after a few days, one of the persons, whose name may be called Evelyn, decides to speak to another person whose name we shall call Adam, and the psychologist enters and states that he has discovered that two of the entities have spoken to each other between the hours of 10 and 12 o'clock and therefore these entities shall all be taken out into a different room where the temperature shall be colder and the pleasures shall be fewer and the hardships shall be greater. This Awareness indicates that this occurring, the psychologist removes the entities into this other room and the entities now are experiencing more difficulties.

This Awareness suggests that the entities as being carefully conditioned to believe and to follow the teachings of that psychologist. This Awareness suggests that after a certain time, the psychologist begins to give them greater and greater rules of behavior, more and more rules, and give them deeper and deeper forms of punishment and threats of punishment for disobedience to those rules. That the rules may be of any nature; some appearing ridiculous, some appearing sensible, but the majority of the rules being given with authority and having little explanation as to why they were given.

This Awareness suggests that after a period of time, this little community of entities in this room with changing temperatures and hardships, may have so many rules and laws that it is a seething mass of conflict based around the use, application, obedience or disobedience of these laws. This Awareness suggests that this master psychologist then has the ability to enter and change the rules, establish the rules, or to allow the culture to con-

tinue for decades or centuries following those rules; but that the culture itself is unlikely to vary and to discover the truth of the psychologist and the nature of its own mind, the nature of its own consciousness, so long as it is continuing to follow the absurd rules placed upon it by this master psychologist.

This Awareness suggests that not all of the teachings which claim to be for the good of humanity are, in fact, for the good of humanity. Many of these teachings are designed to keep humanity from progressing, from equaling the development of those who have controlled, or are controlling, the masses.

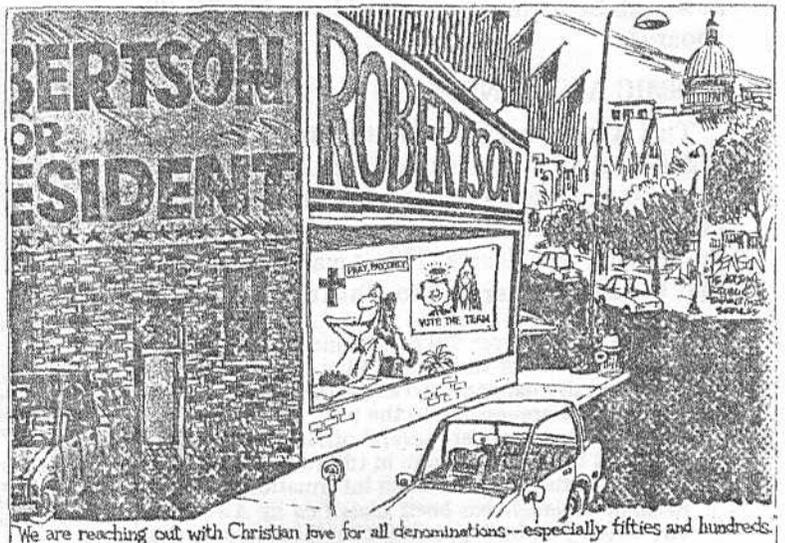

This Awareness suggests that keeping the masses in ignorance is a very simple means of keeping the masses under control. And by creating rules and laws based upon certain religious principles and practices that do not have any clear, logical explanation, but which are imposed by threats of punishment; these rules and laws can be very effective for herding the masses, the followers of a particular cult or religion toward the expressions which the priestcraft rulers or the master psychologists wish those entities to follow.

This Awareness indicates that once they are under this kind of control, these entities then can be moved into various types of expression for the purposes of the master psychologist, even as a dog trainer can train the dog after he has trained the dog toward certain obedience factors in his relationship with the dog.

This Awareness indicates that the training procedures then may become more and more complex until the masses can be made into conditioned robots, serving the whim of the being who has been directing and programming their expression.

This Awareness indicates this as but something to observe and is not intended as a condemnation of any religion or any religious expression, but rather as something to observe about the nature of consciousness. (More information will be given regarding this at a later time).

If you love this planet, if you want Peace on Earth and if you believe in the force of Love, JOIN THE LOVE CHAIN each Sunday at noon!

**The only way to bring about Peace is through Love...**

\* First, by becoming a channel for this universal Force we can overcome despair and apathy, we can create a momentum of enthusiasm and thus set in motion the huge potential of human capabilities necessary to save the world.

\* Secondly, in doing so, we transform ourselves because Love opens our heart and brings us happiness and serenity.

\* Thirdly, we become able to change our priorities and our actions so they can be harmonized with this ideal of Love and therefore we transform the world in the most concrete way.

## Love Chain

To join the Love Chain all you have to do is to...

\* Take 15 minutes of your time each Sunday at noon, close your eyes and relax as much as you can.

\* Open your heart to the universal Force of Love and let it freely flow through all your being.

\* Unite your soul to the millions of souls already attuned and thus create a world-wide Love Chain.

In doing so, we will give life to a powerful Being of Love synthesizing all humanity's Love and guiding us towards a New Age of Peace, Brotherhood and Light.

## IS THERE ANOTHER BERMUDA TRIANGLE IN THE PACIFIC ?

(WHY DID 4 CRAB BOATS DISAPPEAR?)

### QUESTION:

Last month, two new crab boats, on their maiden voyage out of Anacortes, here in Washington state, mysteriously sank with all their crew off Dutch Harbor, Alaska, in the Bering Straits while they were crab fishing in bad weather, really rough seas etc. This set the whole town into depression, it was a great tragedy for this little town which has lost so many fishing boats and crews before. But in the last two weeks, two more crab boats out of Seattle have mysteriously sunk in the same area, and there's stories going around that there is another Bermuda triangle right here in our own Northwest area. I'd like to ask Awareness: Is there another Bermuda type Triangle in that area, and if not, what was the reason why these four new crab boats just mysteriously sank with all aboard?

### COSMIC AWARENESS:

This Awareness indicates that this...this Awareness indicates that this question...suggests that this question be held for a later time. This Awareness suggests that the energies are not sufficient at this time to see clearly. This Awareness suggests that the Interpreter be brought from trance.

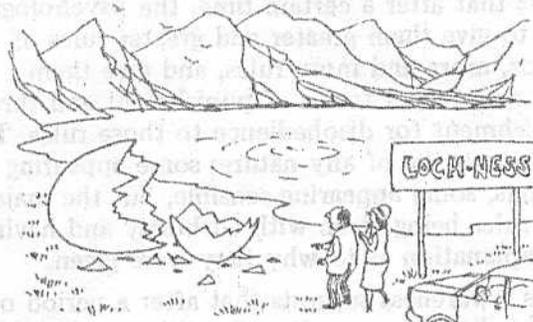

ED's Note: we never did get around to asking this question at a later time, and today the mystery of what actually happened to those boats is still a mystery. Awareness has in the past, however, indicated that there are several other Bermuda type Triangles in the world, one in the Pacific, but it gave no further details. Much information on the Bermuda Triangle has been classified by Awareness, but little by little CAC is bringing this out now that the threat of the Beast has lessened.

## THE LAW OF ETERNAL UNFULFILLMENT

*The Law of Eternal Unfulfillment* states that there can never be completion or fulfillment in any moment, for if there were, there would be no further moment; and as each moment contains within itself all that is essential for that moment, so also each moment contains within itself an emptiness, an unfulfillment that is essential and necessary to lead into the following moments.

*The Law of Eternal Unfulfillment* states that every moment has something missing and is incomplete, and every moment has something that is present, total and complete; and when one can accept this *Law of Eternal Unfulfillment*, the greed-creating obsession to be fulfilled will cease to be.

**IDEAL GIFT BOOKS  
FOR ANY OCCASION**

**LET THERE BE LIGHT  
THE 7 KEYS**

by Rocco A. Errico, D.D.

Here are the Keys to understanding the Bible in its own native, Near Eastern context. Although Bible truths are timeless, they are couched in Near Eastern settings and terms that often elude Western readers. For this reason Dr. Errico designed and developed the seven Keys to understanding the Bible on its own terms. The Keys are:

**The Aramaic Language**—Aramaic, the language of the Hebrew patriarchs, the prophets and Jesus, is a primary key and approach to the Bible which clarifies figures of speech and teachings of the men of God.

**Idiom**—With this second key puzzling passages and episodes are suddenly shorn of their mystery.

**Mysticism**—Approximately 40% of the Bible deals with mystical experiences. This third key explores the mystical mystique.

**Culture**—A fourth key opens the Near Eastern culture.

**Psychology**—Jesus and other biblical personages come into sharper focus as we turn this fifth key.

**Symbols**—The sixth key unlocks the Bible's elaborate symbology.

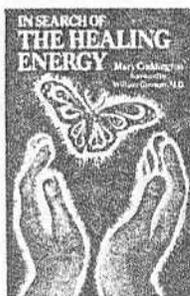

**Amplification**—The final key explains the Near Eastern manner of amplifying an idea, event, or teaching to make a deliberate impression on the reader or listener.

How to Love and Be Loved

For more than thirty years the Addingtons have worked closely together in the fields of writing and lecturing. They are directors of the Abundant Living Foundation (San Diego) whose monthly magazine, *Abundant Living*, brings its teachings to thousands of people throughout the world. The Addingtons' other books include *All about Prosperity*, *I Am the Way*, *The Joy of Meditation*, *The Perfect Power Within You*, *All About Goals*, and *Your Needs Met*—all published by DeVors & Company.

*Drawing the Larger Circle* is the latest addition to the Addingtons' stimulating books. In it they bring their experience to bear on the tough questions of *how to love*, *how to forgive*, especially those we find it hard—*really hard*—to love. Included are actual techniques—exercises in loving more—that have particular application to those hard-to-love cases.

PEACE. . . . Leads. . . .  
TOWARD A WORLD RELIGION

By Lola A. Davis

**TOWARD A WORLD RELIGION  
FOR THE NEW AGE**  
Lola A. Davis

The foundation for a lasting peace is being built through understanding the SIMILARITIES among belief systems of the world's major religions, the author states.

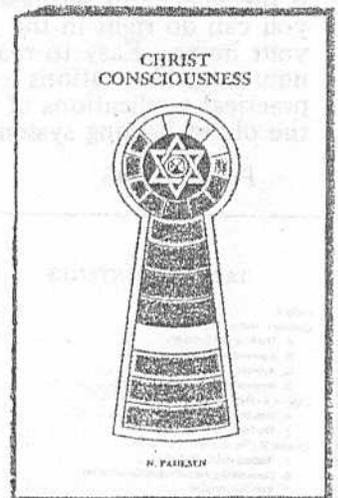

With unusual clarity, this book identifies and discusses teachings common to five major religions and the Ageless Wisdom. It offers a fresh perspective of the relationship of science, religion and the Ancient Wisdom by documenting research that tends to validate some common truths.

Non-authoritarian, it challenges the reader to think creatively about a possible world religion and his/her own spiritual evolution.

For each major religion—Hinduism, Judaism, Buddhism, Christianity, Islam—the book gives a brief history, its early teachings, its changes over the centuries, and its present stage of development.

References, bibliography and an annotated selection of materials for spiritual growth are included.

Price: \$9.00

This book contains the story of the evolution of Christ Consciousness within the races of humankind. The importance of this volume is that it produces documentation and confirmation of the existence, and possible acquisition of this very unique and divine faculty. The author believes this divine evolution of consciousness is now standing on the very threshold of humanity's highest self-conscious experiences. The races on this planet today now possess—

The highest forms of simple-conscious awareness  
Higher and lower forms of self-conscious awareness  
The very unique and isolated cases of Christ or Cosmic Consciousness.

Christ or Cosmic Consciousness itself implies an illumination or understanding of the whole cosmos, the expanding Sphere of Creation. Along with this tremendous enlightenment comes the intellectual illumination which has inspired the founders of all the world's great religions, past and present.
