(the Mind of God)

IN RELATION TO ACCIDENTS

CO-INCIDENCE

YOUR SOUL GROWTH

PROTECTION FROM THE ALIEN FORCE

Published by Cosmic Awareness Communications and the Universal Church of Awareness, P.O. Box 115, Olympia, Washington, 98507, U.S.A. Reproduction of this material is permitted and encouraged.

GOSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious 'trance' levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

ALL ABOUT SYMPATHETIC VIBRATIONS, THE ENERGY/ INFORMATION PRINCIPLE ETC.

ED's Note:

This is another one of those readings that starts innocently enough with a single straightforward question, but which leads into seemingly unrelated but very interesting areas, which of course are all tied together by Awareness through the concept of what Awareness refers to as the 'Biocomputer' -the Mind of God. (Please stay with this one).

IS THERE SUCH A THING AS "CO-INCIDENCE" ?

QUESTION:

N.P. of Spring Valley, California, wants to know: "Is there such a thing called co-incidence?"

COSMIC AWARENESS:

For something to co-incide with something else, this simply means that the incident as that which occurs at the same time as something else. This Awareness indicates in this sense the co-incidence or coincidence of things is ever and always present, for all things in conjunction with other occurrences. This Awareness indicates that

the unusual aspect of occurrences of things coinciding is that which stands out in the mind, whereby something occurs at a particular time and another thing occurs simultaneously, and the fact that the two occurred at the same time is unusual; this is that which entities refer to as coincidence.

Anything which appears to be unlikely to occur at the same time, yet perhaps fitting in one sense, is that which has the overtone of poetry or of the paradox. For example, the entity who dies in China, whose mother or loved one sits up in bed suddenly and says: "My son is dead!", and without having been informed through any outside means, simply *knows* the entity is dead. This may be called a coincidence when the entity, two weeks later, receives a notification of her son's death.

This Awareness indicates that such may not be coincidence at all, but may be caused by the sympathetic vibration of the cells of this entity's body along with the magnetic consciousness surrounding the cell, which feels and knows and is in sympathetic vibration to the cells of the entity elsewhere in China, so that when those cells of that entity are suddenly divorced from the electromagnetic frequencies surrounding the entity's physical cells, the entity here feels the disturbance and knows.

This Awareness indicates that this relates to the previous message in which this Awareness indicated all energy is information, and that energy carries information, and information carries energy. That this principle and this concept as that which will explain many things of the paranormal nature, whereby entities in recognizing this principle, the principle of information and energy as the same thing; when entities fully understand this, they will have a much greater grasp of the paranormal.

This Awareness indicates that in this manner, the energy which surrounds the earth holds information and regardless of where an entity is, the energy holding the information can allow entities who are capable of being attuned to that energy, turning on a certain frequency just as dialing a television or radio set, tuning in to the frequency of another being, can feel and receive, feel energy and send energy to that other being and also can receive information or send information to that other being.

Why the Awareness Readings & Healings Occur

This Awareness indicates it is through this principle that this Awareness functions through this Interpreter in reference to readings and healings, and it is this principle whereby entities who receive a healing from this Awareness through this Interpreter receive the energy. This Awareness indicates that the spoken words carry certain amounts of energy as they are also energy, and they carry information; the information carries energy and the energy carries information; but likewise, the information received on the psychic level in the unspoken feeling levels, when the reading is given, when the healing is given, is also sent and is also received in an exchange when the Interpreter tunes in to the vibration of the questioner.

This Awareness indicates that in terms of coincidences of this nature, this energy/information principle is generally the clearest and easiest to understand. This Awareness indicates that there are other types of coincidences which are more difficult to explain or to understand, particularly unusual are things that have occurred in reference to names, whereby the name of an entity in relation to a particular event may be such as to parallel the name of another entity who, at the same time or in close proximity experiences a similar event.

This Awareness indicates that wherein two entities named Jerry McGilligut die at the same time in an automobile accident, whereby a train strikes the automobile but in different states or different places, this would be called a very strange coincidence. This Awareness indicates that wherein two entities named John Smith were to experience the same incident or coincidence, it would not be quite as strange, because there are more John Smiths than there are Jerry McGilliguts.

This Awareness indicates that statistically, there are many things that happen which are coincidental, but which once, out of a million or ten million or a hundred million, could occur by statistical accident and nothing strange would be actually involved in such an occurrence; but there is that other area in which the occurrence of the coincidence is more than would be normal, is more than would be considered accidental in a statistical sense.

This Awareness indicates that often this is associated with names, or with places, for example an accident occurs at a crossroads, and exactly twenty years later, on the same day of the year, a similar accident occurs under similar conditions. This Awareness indicates that this may be either an accident, in the total sense, or it may be a coincidence, in which there are parallel events that make it appear to be more than mere accident, whereby energies are such that there may be something more at work than mere chance.

The Lincoln--Kennedy Coincidences

This Awareness indicates that all entities are familiar with the multitude of incidents associated with the Kennedy death and the Lincoln death, whereby a list of similarities was presented to show parallels between Abraham Lincoln and John F. Kennedy, and these parallels appear almost to be uncanny in their number. This Awareness indicates that the element of chance appears to have been surpassed by the number of elements and events associated with the parallel energies between these two.

This Awareness indicates that often this is because of the energies or information surrounding the entities, or surrounding the time periods, or surrounding the years, the dates which carry certain energies. This Awareness indicates that both Lincoln and Kennedy being involved in the Negro and Civil Rights issues and Lincoln having a secretary named Kennedy and Kennedy having a secretary named Lincoln, and all of the other types of parallels; these are in part brought about by the information/energy principle, whereby energies become associated with information, and information triggers certain energies.

This Awareness indicates that even places wherein an accident has occurred may carry information in the energy surrounding the place, and likewise, certain information such as an entity's name may trigger off energies. That wherein one entity's name triggers off an energy, it may also affect others having that name because of the vibration of the energy associated with that name in its sympathetic harmony with a similar or the same name elsewhere.

Similarities of UFO Sightings

This Awareness indicates thus, John Keel in his books on the strange and unusual, refers to the many incidents wherein entities having the same name report UFO sightings, although these entities have no connection with each other, and are in wide and varied places. An unusual number of entities having a similar, or the same name may report UFO sightings during a particular period of time, while at a different period of time the names of the reporters of UFO sightings might be changed, and a similarity of a different name appearing.

This Awareness indicates that these are coincidences, but are based on the concept that energy carries information, and information carries energy.

THERE ARE NO ACCIDENTS --
HOW DOES THIS CONCEPT WORK?

(FOLLOW-UP QUESTION):

Awareness, through the entity Ralph Duby, I believe it was, Awareness indicated that there were no accidents. This is a concept that has created a lot of questions among people. I wonder if *It* would expound on that concept at this time?

COSMIC AWARENESS:

This Awareness indicates that this of course becomes a matter of semantics in terms of what is meant by 'accident'; that if, for example, one drops a glass because the glass was soapy, and the entity didn't realize the glass was soapy, picking it up, drops the glass; this may be called an accident. This Awareness indicates however, that from another point of view, this is no accident at all, it is causal. It is caused by the soap on the glass and the ignorance on the part of the one picking up the glass or the lack of awareness of the soap. Therefore, from the point of view of a more aware entity, it is not an accident, it is a causal event, or causal incident. This Awareness indicates that this applies on all levels; that there are *causes* for everything and it is interpreted only as an accident by those who do not foresee or recognize the cause.

(FOLLOW-UP QUESTION):

Well, as I recall that particular reading, it seemed to me there was more implied in it than that. Like people involved in major physical accidents, for example, in automobiles and airplanes, and breaking their legs at a particular time; it seemed to me, if I remember correctly, it implied that it wasn't really an accident at all, but it was some kind of a lesson they were supposed to learn.

COSMIC AWARENESS:

This Awareness indicates that this may be, in the sense of more complex examples, whereby an entity having, for example, experienced some particular action in his or her life, still feels some kind of internal energy in connection with this, but the energy not having yet been released, may create a vibration, or may carry a vibration which is either in harmony or in conflict with other energies on other vibratory rates, perhaps in another entity's mind or in the movement of certain natural energies, and thus these energies come together to balance each other or to confront each other.

This Awareness indicates that it is much likened unto music; that certain notes harmonize with each other and when brought together, cause others who hear or feel these harmonies to react accordingly and feel harmonious. There are also energies that are in conflict with each other, and when an entity comes in contact with

these energies, hears or feels the energies, that entity could feel annoyed or disturbed by the conflict of these sounds or vibrations.

This Awareness indicates that if the entities were agitated enough, they might even do something of a violent nature, breaking something or becoming highly disturbed emotionally. Assume you did not have ears to hear these vibrations, but the vibrations were there anyway, and were having strong effects upon your cells, upon your nerves, without your being fully aware of these vibrations because you did not have ears to hear; assume this occurs all around you at all times; that these vibrations are so powerful that they are affecting you, and you are sending off vibrations of a similar nature, not through the mouth through shouting or screaming, but through the mind, through your thought, your anger, your hostility, or your love, your affection, and these vibrations are being sent out from you toward others and they are feeling these vibrations from you, and assume that all of these vibrations which are passing back and forth between entities, which are disturbing or pacifying entities are unseen, unheard, and that entities don't even realize the energies they are sending are being felt by others.

Assume that all of the screaming and shouting which you are perhaps doing goes unheard because you do not hear it, and others do not have ears, but all of the shouting is there anyway, and the vibrations are there, and the vibrations disturb the nerves of the entity, disturb the cells and cause the entities to feel agitated, moody or to feel happy and joyous, and assume that these energies cause reactions of various types from other entities, and the agitated parties enter into the same space, close to each other, and being locked into their own frustration bump into the other because they were not aware or not observant, because they were tuned in to their own frustration and lacked sensitivity to attend or care for the other's frustration.

Thus, the entities bump into each other and injure one another. This Awareness indicates that is this an accident, or is this causal? This Awareness indicates that now, assume that you receive an instrument that allows you to hear one vibration out of the tens of thousands, and each entity tunes in to this instrument, they can communicate with each other, to these grunts and noises on this one frequency, and thus they assume that they have some kind of communication, can hear each other's tones and words and can then have some kind of rapport with each other, and because of this one vibration, this instrument that allows them to have one vibration on which they can communicate, the entities become what they call 'knowing', and they feel satisfied that they know whatever there is to know, by questioning and by expressing vocally on that vibration; receiving and sending on that vibration, they assume that they know what is going on.

This Awareness indicates meanwhile, all of the other vibrations which they do not hear, and do not realize they are sending out, are still acting upon them and causing them to have run-ins, to bump into each other, or to experience other things which appear to be accidental. This Awareness indicates that now assume that they are capable of hearing frequencies from one range of sound to another on a wide scale. Then entities, of course, are sure that they know what is going on, except on occasion there are what appear to be accidents, things that happen, regardless of all of their knowledge, and they cannot explain or understand how it escaped them.

This Awareness indicates it escaped them because it was not in the frequency level for which their ears were tuned, for which their minds were tuned to listen. It was outside the realm of their computer. This Awareness indicates that in this manner, accidents or what is termed an accident, appear and seem to be haphazard in nature, but from a viewpoint of one who recognizes frequencies of all levels, this so-called accident was predictable, could be foreseen, had a cause, and resulted in a logical effect.

This Awareness indicates that the entities who are tuned to the frequency of mob violence, moving into a circumstance wherein they see an entity who appears to have committed a crime, the outcome is foreseeable by those who are not in the frame of mind of those in mob violence consciousness, but those in the frame of mind of the mob violence consciousness may be so sure that this entity is guilty that for them, there is absolutely no doubt, because everything the entity states, utters or does, only confirms the entity's greater guilt, because these entities have already made up their minds.

This Awareness indicates that for the entity who is not in that frame of mind, the entity may see all kinds of evidence that this entity is innocent and the outcome of the mob violence consciousness may also be seen. This Awareness indicates that when the entity has been hanged, and then the true culprit is apprehended, the mob will say: 'It was an accident! We didn't know! We *thought* he was guilty!' This Awareness indicates there is no accident in this instance or in others; there is only a lack of understanding of the nature of cause and effect.

This Awareness indicates however, this does not give entities the right to condemn others for their ignorance for having what may be termed an 'accident', for becoming involved in some incident or accident unless the entity who is condemning others is of such high clarity as to have been able to foresee the incident and to have warned the others ahead of time. This Awareness indicate there are many entities who enjoy spouting slogans such as: "There are no accidents! You deserve what happened to you", without fully understanding the nature of what they are talking about, and without being any clearer in terms of understanding the various vibrations themselves than the one they are condemning.

This Awareness indicates that it is a concept and a principle that there are no accidents, but it is not intended to be used as some type of tool by which to belittle others when they *do* have an accident or incident that appears to be an accident. This Awareness indicates that *Its* messages are not intended for this purpose. *Its* messages are intended to assist entities, to uplift and assist them in understanding those things which can lift their consciousness and are not intended to be expressed as means of belittling another person.

PROTECTING YOURSELF FROM THE DARK FORCES...
RECKLESS IN BATTLE -- YET ONE KNOWS
HIS NAME IS NOT ON THAT BULLET. WHY?

(THE TELL-TALE SIGNS WHEN DEATH IS NEAR)

(FOLLOW-UP QUESTION):

Well, no, of course not. But I would think that most people, using that concept, how would this relate for example, to the soldier who gets reckless in battle and doesn't get killed because he says: "I know that that bullet doesn't have my number on it", or the person who is almost killed or side-swiped, but not quite, by some intoxicated person swirling drunkenly down a mountain road, for example; that he just *knows*

that his time is not up. How does this fit in to this concept?

COSMIC AWARENESS:

This Awareness indicates that often an entity will sense when his or her life is close to finish; that there are telltale signs which entities often experience,—these coming from subconscious levels. This Awareness indicates that often before an entity reaches such a state, he or she will have a desire to pass out of this life and into something else; he or she will become so tired, so discouraged with the course of his or her life, that they will actually be looking toward some escape, even through death.

This Awareness indicates that the entity who still has great hopes or plans, or desires for the future, when coming into close contact with death, such as an incident, an accident of this nature, will often know that the event is not to be fatal, will know this ahead of time because he or she has something more to do, has still a great desire to live. That entities essentially, though not always, have much influence over their time of death.

Why the Dark Force can Destroy Light Workers

This Awareness indicates that in some instances, an entity may have a great desire to live, but something will cut the entity short because of conflict of wills from someone else. This generally is referred to as murder, and may occur either consciously or on unconscious levels between the entities. This Awareness indicates that on occasion the Dark Forces will use another entity as an agent for them to destroy someone they do not want to continue.

This Awareness indicates if that entity, the victim, is of a frame of mind of not being aware of the potential for his or her destruction, the entity being in a state of semi-ignorance of this potential, the victim becomes easier to destroy through that party who may be reckless or who may be unaware of being used by these Forces of Darkness.

This Awareness indicates therefore, it is important for entities who are working in the field of Light, in Awareness energies, or working for the good of humanity, to be aware that the higher one moves spiritually and the more potential one has for being a spiritual influence, the more the Dark Forces will be inclined to attack you. This Awareness indicates this clearly demonstrated in the Biblical story.

This Awareness indicates that it still occurs today; that there are greater attacks to those who are the more highly evolved spiritual teachers than to those who are already ignorant and obedient to the Dark Forces, -- this in reference to attacks from the Dark Forces. This Awareness indicates that therefore, being aware of this (if the entity is), the entity should take precautions and be extra careful because otherwise, the Dark Forces can simply wipe one out before one ever gets started doing anything good; and mark this well: the Dark Forces are capable of *seeing* your potential.

How to Protect Yourself from the Dark Forces

This Awareness indicates that they are not always so concerned with what you are doing *now*, but they are concerned with what you *might do* in the future. Therefore, entities who are anticipating doing something good with their life must be extra cautious in terms of their thinking, thinking more positively, having greater faith in the protective Divine Forces, having an identification with these Divine Forces, knowing without doubt that you will be protected and that the Dark Forces cannot harm you, though you walk through the valley of the shadow of death.

This Awareness indicates that this type of faith or identification with the Divine Forces is its own protection, for the Dark Forces cannot destroy the Light, cannot destroy the Divine Forces, and as you identify with these super forces, you become more and more invincible. This Awareness indicates the sorrowful side of this is that many entities who are essentially good in nature, who are Christ-like in nature, do not realize the need for identifying with

the Light as protection, and fail to protect themselves against the Dark Forces, are too trusting without recognizing that their own welfare can be threatened or could be destroyed by Dark Forces.

Many entities feel that all that is necessary is for them to be nice and likable, friendly and kind, loving and generous and caring for the welfare of others, and that this alone is the spiritual path, and will earn them protection from the Higher Forces. This Awareness indicates that it requires *more*. It requires that you be *aware* of the purity and value of yourself to the point wherein you take *action* to protect yourself, knowing that there *could* be those who would not like your beauty, your Christ-like energies to be expressed upon this plane.

This Awareness indicates that in the Wilhelm Reich concept of *The Murder of Christ*, he speaks of those entities who are Christ-like and innocent, who become victimized by those Forces of Darkness upon this plane, who cannot stand the reflection of the Christ, the innocence, and therefore would destroy that innocence. This Awareness indicates that this is a very real, a *very* real problem upon this plane, and *It* asks *Its* ministers and those who would be ministers to be most cautious as you develop your soul growth and Divine Bodies, that you become aware that there are those who would prevent this development.

As you develop your plans for doing good for others, become aware that there are those who do not *want* these things to happen, for they want the world to be in chaos. They want to sustain the violence, the greed and the suffering. This Awareness indicates that being aware of this, you may find ways to protect yourself psychically, spiritually and physically. This Awareness indicates *It* does not wish to create paranoia, but *It* does wish to help entities have greater strength to ward off those energies.

This Awareness indicates that entities who naively move into energies of helping others in high levels of vibration, in service to others, invariably fall into vibrations whereby they are criticized, attacked and whereby their actions are hindered, whereby forces seek to stop them, and these forces can come from many different places or through close proximity through loved ones, through family members.

This Awareness indicates the Dark Forces generally come through the weakest link, the link wherein there is fear or greed or some type of hostilities. That in being aware of this, entities can hook their faith to the Divine Light, and this allows them not to become too confused, or to be whipped about by waves of emotion, to be disturbed by the storms that may occur in their life, for they are stabilized and identified with the Divine Light, and if they did not have that stability, the rest of their experience could be such as to churn them up and down, over and out, around and about to the point whereby they felt they had nothing with which to identify except chaos.

This Awareness indicates so long as entities can identify with the Divine Light and let that be the ground on which they build their life, on which they stand, they will always be stable in the psychic, spiritual and emotional sense, regardless of what is happening on the physical earth and their physical standing. This Awareness indicates that while it is always important and pleasant to have a good physical standing, it is more important to be standing firm in the Spiritual Light, for this is the more permanent realm.

The Cosmic Insurance Policy --
'The Peace that Passeth Understanding'

The physical realm is that which can, at any moment, be blown to smithereens, or be yanked from under one, or whereby the entity can be yanked from the physical realm; but the spiritual realm, the Divine Light is ever and always present, regardless of what occurs on any other level, and the entity who stands firm on the spiritual level and is identified with that spiritual Light, can maintain stability emotionally, spiritually and in feeling levels and mental levels, so that the entity can hold to a peace that passeth understanding, even while chaos reigns on the physical plane.

This Awareness indicates that the entity who attaches to the spiritual Divine Light with the concept included that he or she *is being protected* against the Dark Forces, that concept being included is likened unto an insurance policy, insuring that protection. This Awareness indicates that entities should not ignore the power of this inclusion. This Awareness indicates that by stating mentally that you *are being protected*, it allows the information of the thought to be put into the energy vibration, and as energy and information are the same, it creates an insurance for you, an insurance of protection against the Dark Forces.

This Awareness indicates that these forces may still attempt to attack, to destroy, but they will be incapable and will be weakened and the greater your belief in Divine Protection, the greater your strength in shielding yourself from those Dark Forces. This Awareness indicates it is because of this principle that entities are capable of going through those experiences whereby bullets fly, or the slings of a thousand arrows may pass and none touches the entity; that the stronger one's identification with the Divine Light as a protector, the greater the protection the entity will experience.

This Awareness indicates likewise, the identification of the entity with the Divine Light as a provider allows provisions from the Divine Light. Whatever interpretation you wish to place upon the Divine Light, and your identification with this, this identification and the thought or information which is associated with the energy is that which then becomes a factor of reality in your life.

This Awareness indicates that energy is data, holds data. It is likened unto what John Keel refers to as the biocomputer. The energy may be likened unto the random access memory which is available for your input; the input is the thought or idea that you place into this biosphere computer, or this living energy; the thought which you place in the random access memory of the biosphere in its relation to you, which you can extract by tuning in or by asking for its output after you have input your concepts or information.

Thus, prayer is a form of inputting your request to the biosphere computer known as the mind of God, and the blessings you seek are the output from this biosphere computer. This Awareness indicates that if you put into the biosphere computer fears or thoughts of self-rejection, feelings of inadequacy, feelings of hostility toward others or toward self, feelings of incompetency; if these are the thoughts you are putting into the computer, what do you think will come out?

If you program the biosphere computer with these thoughts, how do you expect to get anything out except what has been put into the program? This Awareness indicates the entity who constantly talks about the negativities of life, who talks about how nothing ever works, who talks about how he wishes he could become healthy, wealthy and wise, but all that happens is he becomes sick, stupid and poor; such programming which is going into the biosphere computer is placed in the random access memory banks, the energy is being programmed by the information on which the entity is attuned by his or her own frequency vibrations, and when the entity wants something out of life energy, the only thing in the memory bank is that which the entity put in.

This Awareness indicates the entity gets back that which was placed in. It may come in a slightly different format, but it is the composite of what was placed in in accordance with the efforts of the computer to manipulate the data, and to present as near as possible that which was requested, based upon the input, based upon what was placed in the memory of the biosphere computer.

This Awareness indicates that if *nothing positive* has been put in, if no positive energy has been expressed and no positive information has been expressed, then *nothing positive* will come out. This Awareness indicates also, that if a mixture of both positive and negative energies and information have been put in, then the computer will work to bring about something that will be composed of both positive and negative energies, in accordance with the prayer or request of the entity's vibrations.

Why Prayer Often Doesn't Work

What the entity desires is not simply what he or she says in the prayer. It is *what* he or she vibrates

in his or her being to the Higher Divine Energies. Thus, an entity may say: "I want to be President! I want to be great! I want to be this or that", but the entity may actually vibrate the feeling of wanting to be punished for not doing something worthwhile and though the prayer is said in one breath: "I want this great thing", the message that comes through is: "I want to be punished for my errors", and thus, the entity receives a punishment, even though he prayed for something great.

This Awareness indicates that it is not that words do not count, it is just that words count best when spoken from the heart, when spoken from the true feelings the entity has, and thus when the entity is truly in tune with what he or she wants, and when the entity has provided those vibrations and energies and information to the Higher computer, the biosphere, the mind of God, the energy of life; when the entity has provided those energies and the proper information and seeks to receive something back in a like manner to the energy which has been given, the entity will receive the appropriate reward. It is as simple as that.

This Awareness indicates the entity who laments and raves and cries and blames and points fingers at others and expresses hostility toward others, and then expects the Divine Forces to lavish him or her with all of the heavenly goodies available is simply naive and foolish. This Awareness indicates that you cannot spend your time and your life putting negative hostilities into the biosphere computer and expecting it to transform the energies into something totally the opposite, whereby you are lavished with great things.

This Awareness indicates that the computer essentially is neutral and accepts what you put in, and gives back that which is based on the data that you have put into it. The information and energy which you have put into the computer may be returned to you in an orderly fashion according to your request, according to the order which you have put the information in, and it can be a useful tool, and can provide you with many benefits.

This Awareness indicates that when you spout hostilities into your computer, lamenting about this race, or that race, about this person or that person, about the inequities of life, about the hostilities you feel toward various factions and persons, about how unfair life has been, about how nothing works, there is no Divine Force...what do you think the computer can do with this information when you push the button of prayer to get something out?

How the Law of Gratitude Works

This Awareness indicates the *Law of Gratitude* is that sense of satisfaction wherein energy which has been *given* receives a *certain* reward. The certain reward is related to the energy which was *given*. This Awareness indicates that you cannot spit in a bucket and expect to pick up pearls from that spit.

This Awareness indicates that whenever you put forth energy of a positive nature, it breeds energies and information of a positive nature, and comes back to you.

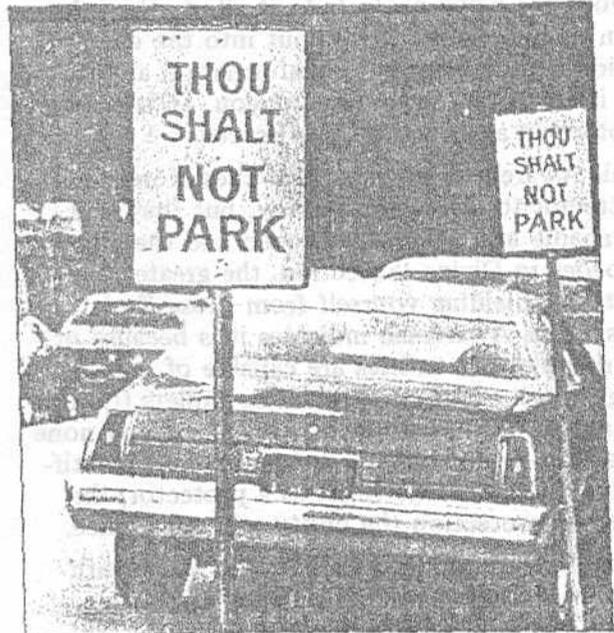

This Awareness indicates it is as simple as ABC, or 1, 2, 3, yet there are millions upon this earth who cannot grasp this principle, who insist that by expressing negative numbers, they should be able to get back positive output, who insist that by expressing hostilities, resentment, accusations and separateness, they should receive in return: love abundance.

THE "LAW OF INFORMATION"

(Closing Message):

This Awareness indicates the *Law of Information* is that Law which states that all information is energy, and carries energy, and that all energy is information and carries information; that the understanding of this Law explains the principles of the paranormal situations.

Associated Press

Who saith? Rev. Robert Fosse of All Saints Church in Carmel, Calif., gets results with his '11th commandment' parking signs. He posted them after standard signs did nothing to deter Carmel's critical parking problem, which hindered access to his church. Drivers are obeying the new signs.

HOW VALID ARE THE BOOKS OF WILLIAM HOGARTH?

("I shall teach thee terrible things")

1/12/79

QUESTION:

I hold in my hand five little booklets written by an entity named William Hogarth, etheric medium from Belmar, New Jersey, which I obtained about ten years ago, the author having advertised these booklets in classified ads for many years. These are strange books,—one called *The Hidden Message*, one called *Man, the Human Meat Machine*, one called *The Sealing of the Forehead*, one called *I Shall Teach Thee Terrible Things*, and one called *Strange Research*. The information in these booklets is scary, yet somehow I have the feeling there is a ring of truth to them. I'd like to ask Awareness if the material in these books is valid, and should they be researched for possible questioning later on?

COSMIC AWARENESS:

This Awareness indicates that some of this material as valid, some of this material as being projected by the entity's imagination and personal fears and paranoid and prejudisms. This Awareness suggests that this as being approximately fifty percent accurate, fifty percent distortion. This Awareness indicates that there is too much accuracy in these books, of such an unusual nature, to be ignored, yet there is too much of this unusual information to be taken seriously. This Awareness suggests that there are areas within the entity's writings which would be too shocking and would create much too great a reaction for some entities to accept or even read without psychically or emotionally becoming distraught and upset and unable to handle these concepts. This Awareness suggests that these not be released to the public at this time. That the information within these booklets can be considered as relating to the UFO readings, whereby much of this will be clarified.

This Awareness suggests that this particular question not be printed or sent out to the public, that the information from this question may be released later with the UFO material, or thereafter. This Awareness suggests that the release of this information at this time would bring in a barrage of questions about these books which would be unnecessary and create energy loss for no real purpose.

ED's Note: It has been about 8 years since CAC released the UFO information and this question was never published till now. For many years William Hogarth advertised these little books in the classified section of magazines such as FATE. To my knowledge the books are no longer available and I have not seen any ads for them in many years. However, these may still be available somewhere. If anyone out there hears

about them being available anywhere, please write CAC and let us know. Thanks.

These little books by Hogarth are very trippy, (and scary in light of the Beast information given by Awareness), and are concerned with subjects like man-eating space cannibals (shades of the Jehovah!) lurking about up there, with occasional forays into town to rapture hapless humans up to the dinner table. There are other sinister subjects as well as interpretation of the *Book of Revelation*, all real downers, with no hope in sight for a sleeping humanity which had no idea of what was about to come down on it. These books, of course, were published well before the Awareness revelation of the Beast conspiracy and the awakening and transmutation of those energies which is now occurring. How much, if any, of the information ever turns out to be valid, these little books would make some pretty interesting science-fiction movies. (Avaton)

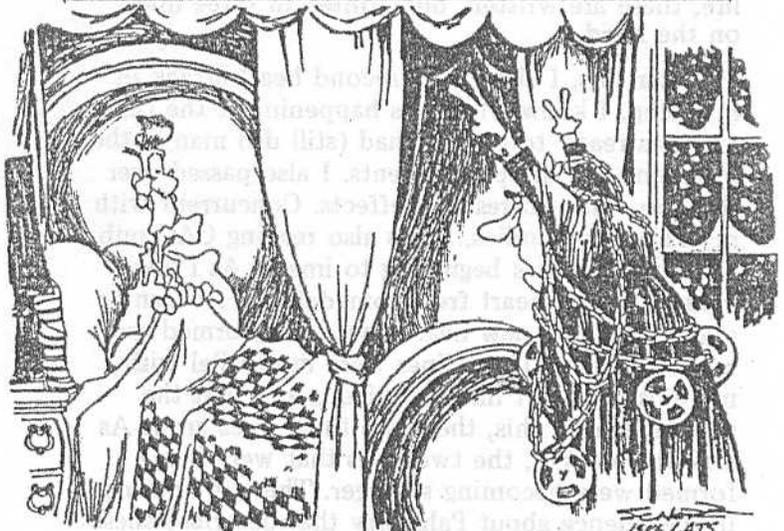

WORLD WATCH

(OILGATE?)

(Editorial)

The London Times, Oct. 5, 1986 reported that Israel has accumulated over 100 atomic bombs (200 according to Dr. Beter), which are located under the Negev Desert (also the site of a U.S. built airfield). This, of course, was never reported in the Zionist controlled U.S. press. Now, with the lid off the arms for Iran scheme run by the White House and insiders of the Trilateral Commission and CFR, we have the United States government officially supplying arms for international terrorism, while covering up their actions by attacking Libya and Syria. Israel, of course, has been secretly selling arms for years to any country which has cash to buy them, these including those Arab countries who are 'sworn enemies'.

According to Dr. Beter recently, Iran is being built up to create great problems in the Persian Gulf area. This is where the US obtains the bulk of its oil. If this situation can be brought to the point where the US can publicly be told these oil reserves are at stake, then don't be surprised if the US secretly gives the 'green light' to Israel to nuke these oil fields in a scorched earth type operation, thus capping off these oil fields for at least the next 10 years. This, Dr. Beter says would cause much suffering in America due to extremely short oil supplies (moreso than in Europe because of the North Sea oil reserves). With most of the US oil wells now capped and many oil companies in bankruptcy, high gas prices and long lines at the station may once again be in order.

" I'M THE GHOST OF CHRISTMAS PAST ..."

DOES SELF-HEALING ALTER ONE'S PALM PRINT?

(HOW PALMISTRY WORKS)

QUESTION:

In the past we have received a considerable number of letters asking about palmistry, and we have never asked about this subject. I think this rather long letter from H.G. of Danbury, Connecticut, might bring forth some information on this subject. He says:

"Back in 1975 I had a heart attack which occurred during my sleep. I had a vision about this time, but I thought it was a dream. I passed over this heart attack and had no side effects. At this time I didn't realize what was going on. A while later I received information through a psychic source that yes, indeed, I did experience a heart attack, my heart could be X-rayed to see the scars and prove it. This source also said I might have heart trouble from here on. After this I got involved in two things,—one, I joined CAC, and two, I purchased a book on Palmistry.

"The book on Palmistry taught me, and also my hand also confirmed that I was going to have heart trouble; it was written in my heart line on both my right and left hands. As a brief refresher to you, the left hand is the blueprint for life on this plane, while the right hand records the changes. The three basic considerations are heart, mind and life, these are written, blueprinted in three lines on the hand.

"After this, I also had a second heart attack in my sleep. I knew what was happening at the time and was ready to go, as I had (still do) many other problems and disappointments. I also passed over this too, with no residual effects. Concurrent with my Palmistry studies, I was also reading CAC publications, and was beginning to image. As I was imaging a new heart free from defects, I began to also notice two new heart lines being formed on my right hand. These lines were in parallel with my existing heart line. I noticed, too, that the more I imaged this, the more these lines grew. As a matter of fact, the two lines that were being formed were becoming stronger. There is nothing in the science about Palmistry that describes these lines or attributes them to anything.

"I think at this time I went through a number of weak daytime heart attacks. I can feel this, and the imaging seems to reduce the effects, make it better. A very interesting effect was also experienced as I meditated on the image of this new heart. I could feel a tingling sensation in the new heart line in the right hand, along my newly-created heart lines. This was much like a magnifying glass focusing sunlight to a point along the new heart lines. Let me give a brief description of the techniques that I used. These were in part given by Awareness in past dissertations.

"To image, I pictured a beam of light going through space; a new heart, or my old one, was within this beam. The beam extended to infinity, to a point, any obstructions were gone over or under by making a clover-leaf with the beam of light. In meditation I used the technique implied by the sixth Tarot card, ie. focusing on the sixth center in the forehead, and using a breath count, at five counts inhale, and ten counts exhale. Let me tell you, it is difficult to both image and meditate at the same time. Let me say that these results of my new heart line were obtained without meditations, ie. both not necessary.

"Let me caution people to beware of correcting the effect and not considering the cause. Who is to say that now I may have to contend with something worse than heart trouble? There are many more details which I could supply but at this time they would create confusion. I would appreciate some comment from Awareness."

COSMIC AWARENESS:

This Awareness suggests the last paragraph be read again.

[Last paragraph is reread]

This Awareness indicates there is seen no particular problem involved in this action of visualizing an improved heart. This Awareness suggests that the entity not think so much in terms of a new heart, as a rejuvenated heart; that the entity may visualize his present heart moving into a rejuvenated state. That the entity may also choose to visualize a new heart which comes into and merges with the present heart, and in this manner repairs that heart.

This Awareness indicates that in terms of lines on the hand, that this changing of lines is not unusual. This Awareness indicates that there have been records wherein entities being operated on have been observed, whereby their hands responded to the operation, leaving a change or reflection, or mark in the hand during the time of operation or within the few days following the operation.

This Awareness indicates that the hand does reflect the brain, that the nerve networks between the brain and the hand are connected, that it is not unlikely that the marks on the hand, the shape of the hand and other features associated with Palm-

istry, might change with the changing of consciousness and experiences which the brain is witnessing. This Awareness indicates that the use of the word brain as a recorder of the experience, does not substitute or deny the consciousness which is also the voltage or energy operating through the recorder and recording not only in the brain itself, but in the cell tissues of the hand.

RIGHT AND LEFT HAND DIFFERENCES

(FOLLOW-UP QUESTION):

Is it true that the left hand of an entity is a blueprint for life on this plane, while the right hand records the changes as one goes through life?

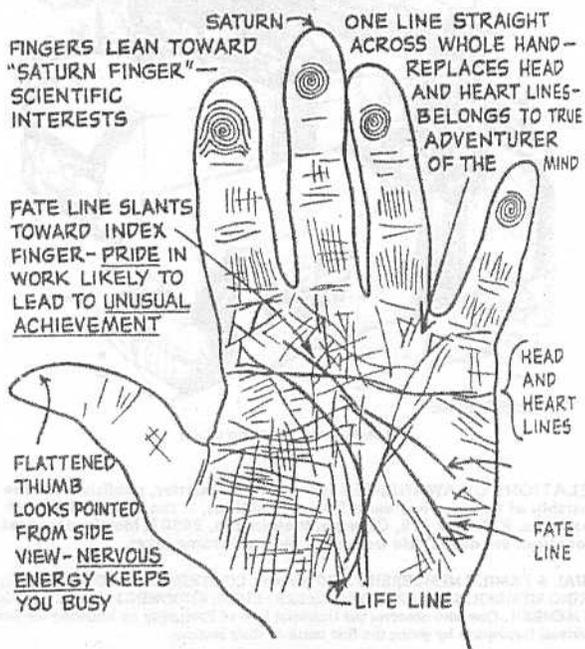

COSMIC AWARENESS:

This Awareness indicates that the left hand as recording that which the entity *planned* or was given to work with when entering upon this plane; that the right hand *records* what the entity has done with that energy, or is doing with that energy, with that blueprint.

This Awareness indicates that many entities will notice that there are certain qualities in the left hand that are not well-developed, which are well-developed on the right hand, or vice versa.

That the meaning of this, wherein the right hand shows greater development, is that the entity has struggled and overcome certain limitations which the entity was born with.

This Awareness indicates that wherein the left hand shows greater development of certain talents and qualities than is shown on the right hand, this indicates that the entity has not used all of the talents he was born with, and the talents are atrophying or being denied in this life.

WHAT ABOUT ONE'S LIFELINE ?

(FOLLOW-UP QUESTION):

Many entities seem to have a very short life line, or what the palmists call the life line...

COSMIC AWARENESS:

This Awareness indicates that the line encircling the thumb area, known as the mount of Venus, this line known as the life line, is in actuality the vitality line. This Awareness suggests that entities not consider this as a line which indicates the length of life; that this as a line which indicates the vitality. That the longer the line, the more pronounced the line, the greater the indication of vitality for long periods of time.

The Fate Line

This Awareness indicates that the fate line, a line beginning closer toward the center of the hand near the wrist, moving upward toward the first or second fingers, this line as one which indicates the events, the major events of one's life.

The Head Line

This Awareness indicates the head line, the line running between the thumb and finger starting at the life line, moving across the hand, as that which indicates the intellectual capacity and the nature of the mind. Wherein this line moves downward, that the entity is expressing greater emotional experiences; wherein it moves straight across or upward, this indicates greater demand for practical thinking, and this indicates also more demands and hardships.

Finger Spacing

This Awareness suggests that the space between each finger, as representing approximately twenty-one years of life in relation to that head line. That is wherein an entity were to draw a pencil mark down to the head line, from the space between each finger, that would represent twenty-one years moving from its beginning by the life line toward the other side of the hand, each of those marks being twenty-one years. This also can give an indication of the events in relation to the effect of the mentality or intellectual development of the entity.

The Heart Line

This Awareness indicates that the heart line as in one sense reflecting energies from the thymus area, or the heart chakra; that basically the heart line registers emotions. This Awareness indicates that heart attacks are often related to stress and emotional experiences or attitudes.

Recommended Books on Palmistry

This Awareness indicates that there are many good books on Palmistry; that the works of St. Germain as one, that the entity known as Cheiro as another.* This Awareness indicates that the Interpreter's friend John Brecken wrote a book for Zolar, which correlated Palmistry, Astrology,

and handwriting analysis, whereby these three could be seen or cross-indexed in a manner that verified the techniques, verified the qualities or accuracy of each of these psychic sciences, by the other, and by the entity applying these to himself. This Awareness indicates that Mir Bashir (phonetic spelling, ED), as also having a good book on palmistry; that there are a number of such books for entities wishing to explore this interesting area. This Awareness suggests that entities avoid the cheap books which are not written with background experience, but are simply written to commercialize on the topic.

This Awareness suggests that entities not consider that having read one book, they have learned all there is about reading the palm. That there are variations and different interpretations used and expressed in different books. This Awareness suggests that those mentioned as being of high accuracy. That your own experience over a period of time can assist in determining which particular details within these books are inaccurate and which are accurate, according to experienced research.

(HOW ENTITIES PROGRAM THEMSELVES)

CAN ONE ALTER THE LIFELINE PROGRAMMED BEFORE BIRTH ?

(MORE ON SLEEP-LEARNING)...

(FOLLOW-UP QUESTION):

If an entity has a short life-line, does that mean that the entity was programmed before coming to this plane to have a particularly short life? And if this is true, and he decides that he would rather have a longer life, that this also is possible and might reflect on that hand or the other hand?

COSMIC AWARENESS:

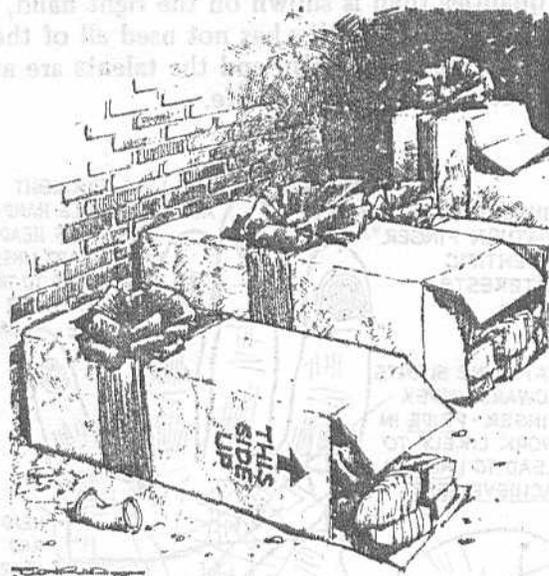

This Awareness indicates that entities are in constant activity of programming themselves, or being programmed. That much of this takes place in an intense and deep and very subconscious level, prior to entering this plane, and therefore the programming is much more pronounced. That even the time of birth as that which has been programmed; and entities programming themselves to a particular time of birth and place and family will be stuck with that horoscope, that birth date, that birth place, and the influences at the time of birth, and whatever changes are required in terms of overcoming or adjusting to those influences. This Awareness indicates therefore, the greater general programming occurs prior to being born, but that entities can program themselves after being born. This Awareness suggests this done best through sleep-teaching, sleep-learning, autosuggestion, meditation, or during deep levels of hypnosis, or over a period of time through repetition of concepts and ideas.*

This Awareness suggests that this kind of programming can and does also reflect on the hand by changing certain patterns and lines on the hand. This Awareness indicates that the hand is likened unto a mirror of the programming which you are experiencing: the left hand being the mirror of the programming which you had perceived prior to entering this plane. In a similar manner, the eye mirrors the disease or health within the body, this being the study of iridology. This Awareness indicates there are other similar psychic sciences,-- phrenology, and there is that science of reading the foot, reflexology; that even the shape of an entity's body can give certain information as to the overall expression or attitudes or psyche of the entity within the body.

*ED's Note: Although CAC does not permanently stock books on Palmistry, there are two books mentioned by Awareness in this reading that we can special order for you if you are interested in this subject. These are "Palmistry for All", by Cheiro (Price: \$2.95); and "Practice of Palmistry" by Comte DeSaint-Germaine (Price: \$6.95, plus \$1.00 postage).

* In reference to sleep-teaching, Awareness has indicated that it was by this method that entities were taught in Atlantis, that also 'sleep cocoons' were used to reprogram antisocial and criminal type entities into changing their ways. There are several companies today offering tapes in the field of autosuggestion, hypnosis and sleep-teaching. One of the oldest of these happens to be right here in Olympia: If interested, write for free information and catalog to:

Sleep-Learning Research Association
P.O. Box 24, Olympia, Washington, 98507.

HOME FOR CHRISTMAS

REVELATIONS OF AWARENESS is a cosmic newsletter, published for the membership of Cosmic Awareness Communications, & the Universal Church of Awareness, P.O. Box 115, Olympia, Washington, 98507. Membership fees and donations are deductible from your federal income taxes.

INDIVIDUAL & FAMILY MEMBERSHIP: \$30 per year. CONTRIBUTING MEMBER: \$52; SPONSORING MEMBER: \$144; PATRON MEMBER: \$1000; ENDOWING MEMBER: \$5000. TITHING MEMBER: One who observes the Universal Law of Prosperity by honoring the Source of their spiritual inspiration by giving the first tenth of their income.

ALL DONATIONS TO C.A.C. ARE USED TO SPREAD THE AWARENESS MESSAGES TO OTHERS.
