P.O. Box 115, Olympia, Washington 98507

Helping People Become Aware

TALKING TO GOD
WITH YOUR
COMPUTER

(Also: How Levitation Works)

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious 'trance' levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

CAN YOUR COMPUTER REALLY LET YOU TALK TO GOD?

(HOW TO CONTACT YOUR HIGH SELF THROUGH ELECTRONICS)

QUESTION:

L.K. in Ohio sent in an article from the *National Examiner* of February 23rd of this year entitled: *A Computer Lets You Talk With God*. I'd like to read this article to Awareness and ask It for a comment on the validity and so forth. This article is written by Beverly Robson.

"Talking to God is as easy as turning on your TV set.

Thanks to a new space-age computer called an Infinity Circuit, you can now have a one-to-one talk with the Almighty.

The computer's inventor, Allen Rogers, a New York communications consultant, says the circuit can make believers out of even the most skeptical doubting Thomases. "I've tried it with over 200 people—including a minister and psychologist—and have seen amazing results," Rogers said.

"Its like an electronic rosary. As the telephone allows us to hear further, the computer allows us to break through certain barriers to higher levels of perception."

Operating the computer is child's play.

"With this system you need no training, no aptitude," Rogers explained. "Even a child can pop a cassette into the computer and in two minutes be in touch with a higher power."

The circuit is composed of a color television, a portable computer and a printer. It costs no more than a good stereo system, Rogers says, and is easy as pie to set up. Here's how it works. The 'meditator' types out his prayers or questions to the Maker or 'Higher Self' on the computer's keyboard. Then he waits for a moment to feel the answer, which Roger says will come immediately from above, and types it out. Rogers says the computer's effectiveness is based largely on the TV screen it's hooked up to. When you're watching TV, your mind is wide open to whatever is shown on the screen, he explains. The information goes straight into the deepest levels of your sub-conscious mind with no restrictions. There is no circumstance in life in which you are totally relaxed in the perfect belief state, he pointed out.

Rogers is enormously proud of his prayer machine and says it's given him both guidance and renewed spiritual strength in his day-to-day dealings.

"My life has been revolutionized by this process," he said. "I work in a high-pressure, high-tech environment and find this meditation to be a total release.

"The computer really helps to transmit prayer." And it's equally effective as a means of mind-cleansing meditation. Also you have the automatic printout to study later."

Rogers is not the only one who's sold on the circuit.

"Already we've had interest from prison officials to see if the system could be adapted to help convicts discover where they went wrong and help them to find God," he reported.

And according to Dr. T.T. Ra Shon, a noted child psychologist in New York City, the circuit is proving helpful in her work with deranged youths.

"I've started using the computer with two of my young clients. Before I tried this method, I could not get anywhere with them — even after working intensively with them for six months," she reported. "As soon as I put them on the computer we got right to the problem. It was OK for them to talk to the computer where it wasn't OK for them to talk to me."

The computer has also proven its worth in the treatment of terminally ill patients, Rogers says.

It provides them with renewed faith as they near the end."

(End of article). Would Awareness please comment on that?

COSMIC AWARENESS:

This Awareness indicates that this as a valid machine in the sense of being similar to an electronic Ouija board, and yet not at all similar to a Ouija board, for it operates in a manner which allows the entity to be more open to the Higher Self. Essentially, what this machine does is to help the entity to be open to the Higher Self, and as the entity types in the question, or statement, onto the screen, and then waits for an answer from the High Self within the entity, the entity's openness is that which creates the channel whereby the Higher Self can prod the entity with an answer or response. The entity then types that response onto the computer, and it emerges on the screen as an answer.

This Awareness indicates this as not too different from automatic writing, or from the use of a Ouija board, except that it is using a computer and gives the entity a greater opening of self because of the attitude the entity has toward the screen.

This Awareness indicates that this can be an effective tool in helping entities to contact their Higher Self. That this Higher Self in turn can be in communication with what are termed Higher Beings and may receive or pass on messages between the Higher Self and the ultimate Divine Self.

SOME "DO'S AND DON'T" FOR USERS OF THE OUIJA BOARD

(Follow-Up Question):

Awareness, sometimes the Ouija board can be interfered with by alien or lower type of entities or spirit forces. Is this possible with the computer?

COSMIC AWARENESS:

This Awareness indicates that this could occur if entities were to use this for the motive of seeking contact with deranged spirits or demonic spirits. This type of system could just as easily be used for communicating with the so-called 'devil' forces, as for communicating with Higher Forces, but so long as entities' purposes and motives are to communicate with the Higher Forces, or so long as entities believe that it is a machine for contacting Higher Forces, the machine would then be effective for this purpose.

This Awareness indicates the Ouija board generally can be misused because entities...this Awareness indicates the Ouija board generally IS misused when entities become playful or seek to communicate with spirits in a kind of mischievous approach or attitude toward this communication; that wherein entities feel mischievous and seek some kind of playful mischief, it is very common that it will provide that type of spirit to respond to them. Also, that wherein entities using the Ouija board seek power through the spirits, it will then gain communication with a spirit of a low nature that seeks to use *them* for its power. It may play along with them, pretending to do favors, but in the end, it will use them.

This Awareness indicates that entities, in using a Ouija board to contact not the lower spirits, but the much higher spirits, will be more favored in this approach because of their motives. This Awareness indicates however, that it appears the computer machine as being more effective, more efficient in opening the mind of the entity to tap that which is hidden deep within the mind, and therefore more capable of getting past the astral plane and into higher levels of awareness. This Awareness indicates that this machine as being seen as beneficial when used properly, more effective and more beneficial in general than the Ouija board or automatic writing.

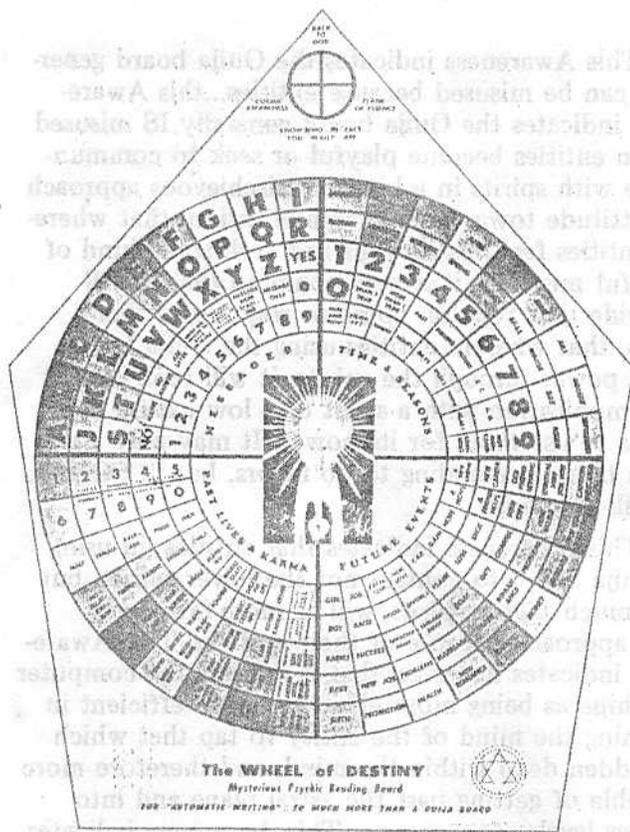

HOW DOES THE "WHEEL OF DESTINY" COMPARE TO THE 'PRAYER MACHINE'?

(Follow-Up Question--Vicki):

Awareness, when we designed the *Wheel of Destiny*, we put various symbols and protective devices on it, supposedly to do the same thing, to weed out the lower level influences. How does this compare in its success in doing that as compared to this computer device?

COSMIC AWARENESS:

This Awareness indicates that this as effective in keeping certain alien negative forces from being involved; that this device as that which requires that entities practice and continue developing a particular skill and ability to use this *Wheel of Destiny*. Likewise, the computer system will require practice, but that because of its impressiveness, entities are more inclined to want to play with it than they would be with the *Wheel of Destiny*. This Awareness indicates that the *Wheel of Destiny* can be just as effective, except for this quality which is a peculiarity with humans, in that if a machine lights up, it is more fun than if it doesn't light up.

The Wheel of Destiny was given through the psychic channel of Sam Millar in 1971. It was printed in full color and mounted on a 22x28 masonite board, and uses a planchette. Unlike the ouija board, it is protected by certain symbols, including some of the Cosmic Awareness symbols. During its testing period, a skeptical Vicki T. and yours truly gave it try. (Two are better than one). The first thing it did was spell out: "Hi, Honey Girl," and Vicki burst into tears. It was a term of endearment her mother used when Vicki was three years old, and she had forgotten all about it till then. (Her mother had passed over when Vicki was a child).

WHAT USUALLY COMES THROUGH A OUIJA —SPIRITS OR ONE OF THE USER'S SELVES?

(Follow-Up Question -- Avaton):

Awareness, those entities that call themselves spiritualists, and the spiritualistic type of books and literature that has been out for a hundred years or so; most of this implies that when a Ouija board is used, that it is spirits these entities contact. Would Awareness indicate what percentage, roughly, *actual* spirits are contacted as against the subconscious or the Higher Self is contacted when the Ouija board is used?

COSMIC AWARENESS:

This Awareness indicates that it depends on the individual's motives. Whereas this instrument has been expressly indicated as a means whereby spirits can come through, and wherein entities use this for such a purpose, it enhances the probability of spirits being involved. That wherein entities use

this with the expectation that it is the subconscious mind, their own subconscious mind responding, it is more likely that it will be the subconscious mind.

This Awareness indicates that this is not always the case however, for entities not even believing in spirits may have some form of intervention by a spirit which seeks through this instrument, to communicate to them. This Awareness indicates that it is difficult to put a percentage on how many spirits communicate through the Ouija board, for this also varies according to the culture, according to the time, according to the beliefs and changing beliefs of its users. This Awareness indicates however, that most entities who play around with a Ouija board lose interest quickly in that they do not get much response, and begin to doubt their ability to get a response. Other entities may persist and in many cases, the subconscious may begin operating the planchette.

That for still others, there are those instances wherein immediately the Ouija board responds. In such cases, the entity is most likely already quite psychic and attuned to the...this Awareness indicates this may be termed a "sensitive" person, who is attuned to the more subtle vibrations, which allows for communication between planes. That in such cases, the individual then may become quite proficient with the Ouija board, or may experience difficulties in relation to this contact which the entity is open to. This Awareness indicates that without the instrument, the entity could also have similar problems because of the extreme sensitivity to those subtle forces. The instrument simply magnifies, as a tool, the ability of an entity to make such communications.

HOW "TABLE RAPPING" WORKS

(The Secret of Levitation)

(Follow-up question):

Would Awareness, along these lines, please discuss this phenomenon known as 'table rapping', and also wherein entities sit around a table and they lay the palms of their hands on the table, and the table then lifts up off the floor and jumps around the room?

COSMIC AWARENESS:

This Awareness indicates that this relates also to the subtle particles within the atomic structure known as the neutrino. That the neutrino, again, as indicated previously, is the link between spirit and matter, or consciousness and material, and wherein this neutrino is built up strong enough with a charge of consciousness that has as its inherent property a concept of levitation or whatever, it then affects matter in a manner whereby the

message is conveyed, and matter responds. This Awareness indicates not only can tables be levitated in this manner, but individuals may also levitate; that wherein an individual levitates from the action of a strong charge on the neutrino, it can be thought of by certain entities to be a miracle. By others it can be thought of as being demonic and of the devil, and whichever approach the floating entity receives and accepts as a belief may determine whether the entity feels possessed by a demonic spirit, or possessed by some Divine Force.

This Awareness indicates that as the entity Shakespeare wrote: "There is nothing either good or bad, but that thinking makes it so." This Awareness indicates that *what is, IS*, what one *thinks* about what is, is something else. This Awareness indicates that some entities believe that levitation is an indication of demonic forces at work. Others see this as a natural phenomena of universal principles at work. Others may see this as a Divine sign, an indication of miraculous forces at work. Still others may say this is impossible, and in their certainty of the impossibility they charge the neutrinos with negative or cancelling charges to prevent such experiences from occurring.

That wherein there are doubters, those doubters add their charge to the neutrino to neutralize those of the faithful.

HOW FAMOUS SPIRITUALIST DANIEL DOUGLAS HOME FLOATED

(Follow-up question):

Back in the 1800's I believe it was, there was an American spiritualist by the name of Daniel Douglas Home, I believe...

(COSMIC AWARENESS):

This Awareness indicates that is correct.

(Questioner): This entity did many amazing things with his powers, including a documented case of floating out a window high up in a skyscraper and going around the skyscraper and back through the window. I believe he accredited this phenomenon to spirits that would hold him up and overcome gravity. Is this correct?

COSMIC AWARENESS:

This Awareness indicates that this entity as having learned how to charge the neutrino of the atoms into serving as mind over matter forces. The entity in using spirits as part of his mental belief system, was in error, but it served the purpose just as well. This Awareness indicates it is because of the neutrino that all of these many philosophies

← PASS MARK

seem workable, even though they may have different belief structures and patterns involved. It doesn't matter that entities believe that there are invisible wires hanging from the hands of God which will allow them to levitate, or whether there are spirits which will hold them up, whether these spirits are good or evil, whether these spirits are strong or weak; it doesn't matter *what* entities believe, so long as they charge the neutrino with the belief that they *can* levitate.

This Awareness indicates that it also doesn't matter whether entities want to levitate or not. If they *believe* they are going to levitate, even against their will, that belief, if strong enough, can charge the neutrinos in such a manner as to create the levitation against the entity's will. That is why entities often *think* they are possessed by demonic spirits, because they are believing the demonic spirit is forcing them to levitate. Likewise, their belief in a demonic spirit is enhanced by the neutrino, which can in similar fashion create images, and auras, and features, according to what the belief pattern of the projector, the individual projecting that belief, according to its imagery.

The Cause of Some Apparitions & Visions

This Awareness indicates it is for this reason that entities may see apparitions of beings or forces. Their belief or fear, or traumatic emotional experience can create a pattern in the neutrinos which allows for these forces to make an appearance, as a neutrino field is set up which serves as a medium between consciousness and matter, and therefore, an entity may see a vision of his or her mother, for example, at the time of the passing over of that mother.

This Awareness indicates that what occurs in a situation such as this, is that the mother, in passing over, suddenly realizes she has passed into another plane, and wishing to say goodbye to her daughter or son may create such a strong neutrino

field that she makes an appearance before them through that field, to such an intense level that they are able to see her form as an apparition. That were this to be taken to a greater extreme, whereby the entity were capable of becoming an expert at charging neutrinos, the entity then could create what appears to be a physical body in that apparition, and others would say the entity had teleported, or had suddenly appeared in a place thousands of miles away from where he or she was supposed to have been.

This Awareness indicates that in such instances, this would be correct, in that the entity having charged the neutrinos sufficiently would also bring the body into that place. However, there would, in all probability, be a movement back to pick up the rest of the entity's body, or the entity would need to be sufficiently strong so as to drag the remaining part of the body to that new place. This requires extreme discipline of the mind and imagery ability.

HOW LITTLE OLD LADIES HAVE PICKED UP A CAR TO SAVE A TRAPPED PERSON

(Follow-Up Question--Vicki):

In conjunction with the table rapping sessions that I experienced at one point in my life, there was another phenomenon that we participated in wherein four people would each take two fingers each and try to lift somebody, and a chair, where they try it before they do this exercise and couldn't do it, and then they would all put their hands on top of the head, piled up to a count of 8 or something like that, and then remove the hands and not touch anything else, and then put the hands (using just the two fingers) underneath the chair, and you would be able to lift the person in the chair in this manner,—effortlessly. Is this a physical thing, or is this the neutrinos being charged and activated?

COSMIC AWARENESS:

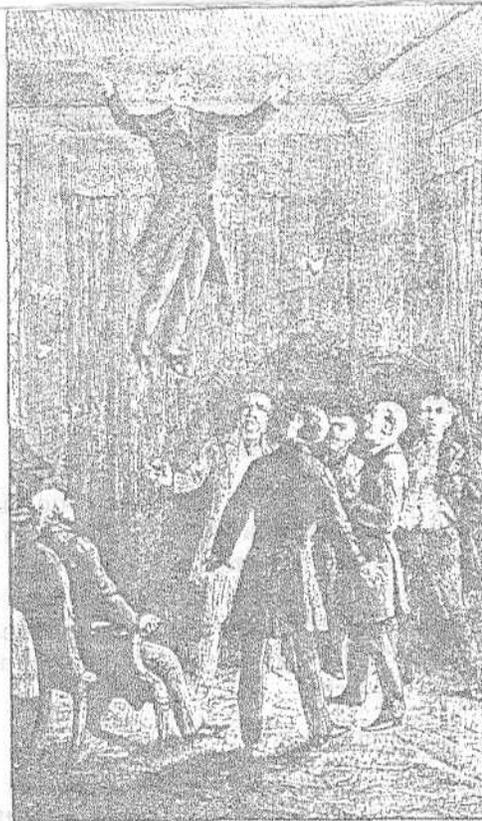

This Awareness indicates that this as associated with the belief, which in its own way charges the neutrinos. Likewise, entities in a crisis situation have been known to pick up the front or back of a car to allow an entity trapped beneath to be removed from that circumstance, yet the entity in normal conditions would not be able under any circumstances to pick up that car, but would in fact do great harm to his or her body in attempting to do so. This Awareness indicates this is due to the urgency, the fact that the entity so wanted to get that other out, that the entity saw himself or herself picking up the car in such a vivid imagery,

that he or she actually believed he or she could do so, and that belief charged the neutrinos so that it became possible.

ED's Note: For more information on the neutrino, please refer to 'Revelations of Awareness issues, No. 82-21 and 84-17, \$3.00 each from CAC.

For more information on ghosts and apparitions, please refer to issues 80-10 (The Amityville Horror); 84-17 (Life After Death--Part 5; 85-3; (Spirit Communication); \$3.00 each from CAC.

If you think this concept of using a computer for channeling is rather far out, I recently heard that Dan Spivey, who back in the 60's was channeling Cosmic Awareness for research purposes at Stanford University in California, is now channeling Awareness again, but this time through a computer. Dan is a full-time medical doctor and is doing the channeling in his part time, according to Paul Shockley.

During seances, objects floated about the room and hand-bells rang, but most dramatic of all were the occasions on which D. D. Home levitated, seemingly effortlessly: illustration from Louis Figuier's book *Physical Science*

MPR (MALE PATTERN REDUCTION): IS THIS A GOOD WAY TO HANDLE BALDNESS?

(SOME PREDICTIONS ON HAIR)

QUESTION:

Mr. S.W., of Manchester, Great Britain, has a question: "MPR (Male Pattern Reduction) is a method of cosmetic surgery of the scalp to bring together the receding hair line at the sides of the head, to improve looks and continued hair growth. Can Awareness comment on the far-reaching effects of such surgery? Is it advisable to have this operation, or to accept growing bald? Are there any other methods of reducing baldness?"

COSMIC AWARENESS:

This Awareness indicates that this particular operation as that which is artificial and can create a distortion in one's appearance which may or may not be disturbing to the entity, depending upon the entity's particular problem and particular head style; that this also as quite expensive an action in terms of pacifying one's vanity.

This Awareness indicates that there are times when one's hair-line may need to be cosmetically improved, particularly if this relates to an entity's image, and in connection with an entity's career or appearance in reference to one's occupation and job. This Awareness indicates however, that there also appear to be certain other actions which within approximately five years will be made available, whereby entities can restimulate the follicles of the hair, so that even the male baldness pattern as that which will be allowed to regrow hair. This Awareness indicates there is seen a formula of an entity in Texas; there is also seen a formula of an entity in Sweden, which is effective, both of these being effective, and which will be marketed within approximately five years, if not sooner.

This Awareness indicates that meanwhile, entities can benefit from the use of Jojoba oil rubbed into the scalp daily, this substance goes into the roots and stimulates and cleans the follicles and also feeds the follicles the vitamins and minerals necessary for growth. This Awareness suggests that you may try jusing Jojoba oil for approximately six months on a daily basis, washing this off approximately every other day and re-adding the substance on a daily basis. This Awareness suggests also that you avoid harsh soaps or shampoos, and that you allow the fresh water to rinse all of the soap or shampoo from your hair after washing. This Awareness suggests that the Jojoba oil be added after shampooing, and also inbetween shampoos.

ED's Note: this reading was given April 9th, 1982. Have these two products appeared on the market as predicted by Awareness? I don't know. If anyone out there does know for sure, I would appreciate hearing from you. Many thanks.

WHEN TWO STRANGERS FEEL A STRONG ATTRACTION TOWARD ONE ANOTHER

QUESTION:

A question from B.G., Martinsville, Indiana, which is personal question, but probably has a universal quality: "What is happening when one experiences a certain 'closeness' to another? Not in a physical way, but more in a spiritual sense. I had this feeling over someone for a time, and throughout this time, this person filled my thoughts for days at a time. The closeness wouldn't go away. I simply wanted the person's company. I had nothing in common with the person, but I felt an obsession to get to know them. I dwelled on this for a long time, and when myself and this individual would get together, we would always get into discussions over God, the universe, reincarnation--very spiritual things.

After a period of time, we became friends. We realized we had nothing in common, but we indeed felt this closeness to each other in somewhat a spiritual sense. Well, it's all boggled my mind because the closeness that I wanted to be with this person happened exactly as I wanted it. It was such an experience! This person also told that from talking to me he got insight he'd never had before, and I the same. We came to startling conclusions about things we'd never ever thought of. I know we were experiencing something, but I'm really quite confused over the whole thing.

What brought myself and this person together? The outcome was over and positive and I feel great, but I don't understand why I felt this when I didn't even know the person in the beginning. From this point on, this person and I will always be friends. It's all so good, but I wish to understand. Were we past incarnates who knew each other previously? That's what it feels like (if I've ever felt it). Thank you.

COSMIC AWARENESS:

This Awareness indicates that this as in the affirmative, that you have been together previously. This also relates to that which may called harmonics, wherein certain frequencies are in harmony with others of a particular attunement.

This Awareness indicates that likewise, this relates to polarizations; that these polarities on the physical plane which are opposites, attract; those polarities on the spiritual plane which are equals, attract; and that the common interest on the spiritual plane being equal attracted the two of you, so that your concepts could be brought together for merging.

This Awareness indicates this as different from physical attraction; this being more of a spiritual attraction; that the physical attraction would have been brought about from opposing polarities, whereas the spiritual attraction being brought about by similar polarities.

IS THE SIMILARITY BETWEEN THE ASSASSINATION OF LINCOLN AND KENNEDY ONLY COINCIDENCE?

(MORE ON SYNCHRONICITY)

QUESTION:

I found a clipping I cut out years ago from the 1982 edition of *Science Digest*. In that issue there is a discussion of a book published by Scribners entitled *The Incredible Doctor Matrix*, written by Martin Gardener. This book concerns itself with amazing coincidences that have occurred over the years, and one of these that he mentions here is one that we've all heard before, but I'd like to ask Awareness, if this is indeed coincidence, or is there something more to this than meets the eye?

He writes: "The remarkable parallels in the assassination of Lincoln and Kennedy give even skeptics pause. Kennedy was elected President exactly 100 years after Lincoln was. Both men were assassinated on a Friday in the presence of their wives. Each wife had lost a son while living at the White House. Both men were killed by a bullet that entered the head from behind. Both men were succeeded by Vice-presidents named Johnson who were Southern democrats and former senators. The first name of Lincoln's private secretary was John, the last name of Kennedy's private secretary was Lincoln." There's more, but you get the idea. Would Awareness please comment on that?

COSMIC AWARENESS:

This Awareness indicates this as a concept which is of great difficulty in explaining; that this has much to do with the principles that are little understood, except in part, by entities who understand numerology in its most abstract sense. This Awareness indicates that also the entity John Keel in his book, *The Eighth Tower*, explains certain concepts which apply to this. This Awareness indicates essentially, this as energy and thought forms which are attached to events, are often thrown out into the biosphere and contain the matrix for words, numbers, concepts, ideas and images, and times being associated with numbers and cycles, being associated with those numbers, counted by those numbers, may bring about a recurrence of so many cycles associated with that number, whereby like attracts like, and when the time occurs in a similar manner, the number, name or energy may also move in from the biosphere, to attach itself to that number, or to that new energy which is forming.

This Awareness indicates that entities who understand the nature of a computer may recognize the concept of search and retrieve operations, whereby certain patterns which are encoded in the memory may be matched up with similar number, patterns or words or letters as typed by the user, so that in typing several letters, a combination of letters or words from the memory will be brought up to the screen to locate and coincide with the letters or numbers being typed by the user.

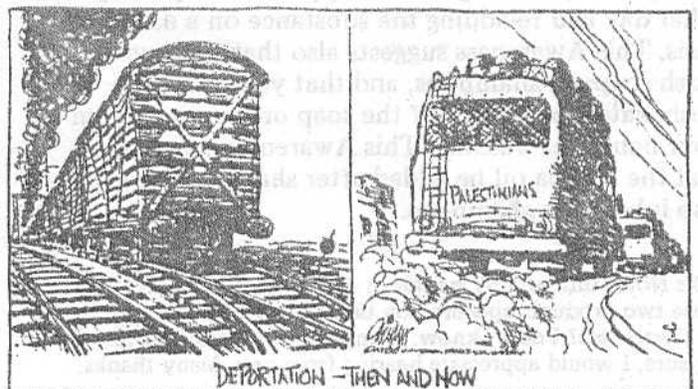

This Awareness indicate that this also as a difficult concept to explain, because it is relevant to the view or frame of reference. In another sense, time itself does not exist. There is the eternal now, which is ever-present, and within this there is the universe which appears and disappears every four-quadrillionths of a second. This Awareness indicates that in still another frame of reference, there is that which is space which holds matter, and that matter and space exists only in terms of relative relationship to each other and to time.

This Awareness indicates that this can become so complicated in trying to understand with rational means that it could drive an entity's insane mind, even more insane. This Awareness indicates that the rational mind as that which essentially IS insane in that it seeks to pick apart and understand all of the details separately, wherein the reality is that all is total and interrelated. This Awareness indicates the concept that it can be understood rationally is an insane delusion, and therefore, to attempt rationally to understand is of great difficulty and can plummet an entity's mind into oblivion and further insane babbling.

This Awareness indicates that essentially, if an entity can glimpse intuitively enough into these areas to understand the synchronicity of energies, of time, of space, of matter, and if the entity can, in glimpsing these areas avoid becoming fixated, the entity may continue experiencing a degree of sanity.

(Closing Message):

This Awareness indicates that the movement of energies in one direction will always imply movement in the other direction, and the positive or negative approach or the creation and manifestation followed by the absence and vacuum, or the absence and vacuum followed by the manifestation, the appearance and disappearance of the thing, the person, the idea, the concept, the event, the situation...all of these emergences and their dissolution, dissipation; all of these movements of energies in time and space, in life, in death, all of this is the dance of consciousness, which is eternal, everlasting, and is the realm of permanence, and in this dance of consciousness, entities may find themselves and lose themselves, and

find each other and lose each other, and find divinity and lose divinity, may find joy and lose joy, may find sorrow and lose sorrow, may experience pain, may experience pleasure, and in this dance of consciousness, entities will prevail everlasting, and that which holds sorrow for a moment shall pass with time, and that which holds pleasure for the moment will pass with time, for time is the partner who dances with the consciousness.

This Awareness indicates that in the biosphere, or as John Keel describes it, the biocomputer which surrounds the earth and holds the memories and thoughts of entities, or as by Jung as the collective unconscious mind, as events on the conscious level, the physical plane; as these events occur according to number, words, concepts, actions, cycles and events and names, and even positions and places,-- as these events occur, there are those magnetic thought forms within the biosphere, or that biocomputer, the collective unconscious, or that which is also called the net of synchronicity, whereby these energies which linger in the subconscious, or biosphere, the collective unconscious of the planet, are brought into the screen of conscious reality, by their similarity to those events which are being typed out in life by the expressions of individuals.

This Awareness indicates that this as a very difficult concept to explain, and *It* does not see any way to clarify further.

(FOLLOW-UP QUESTION): Vikki.

Would this be a possible way of putting it? That on an essential level, basic qualities drive in similar details of the physical elements at sequential times?

COSMIC AWARENESS:

This as in the affirmative. Also, often places, often names and letters and numbers and concepts and even individuals who have reincarnated as vibrational energies moving through certain patterns and similarities. This Awareness indicates also, there are.....This Awareness indicates this reaches into an area which is even further remote and abstract and difficult to explain. This in reference to multiple time zones, or synchronistic events, this in the sense that time is inhabiting space at different intervals in waves and echoes likened unto ripples on water, wherein an event takes place creating a splash, and the ripples echo that splash, and as time moves on, and the event passes into higher vibratory rates and other dimensions, an echoing ripple begins to form, and passes at a time, at a point, and the energies of the first splash are repeated as an echoing event.

This Awareness indicates that to understand this, entities must recognize that time and space are not locked together; that space remains in place, but time moves on, and the space, though never changing, does have objects within that space which are altered continuously by time, the time as that which holds all things, while space is but an empty screen on which the energies of time move.

ED's Note: It is reputed that President Reagan, when asked to comment on the stock market crash in the fall of 1987, and its similarity to the Crash of 1929 that preceded the Great Depression, he remarked: "I don't know what all the shouting is about. This isn't at all like the 1929 crash. In 1929, the slide started in October, and we had a president whose first and last names both started with the same letter, who said the economy was in great shape."

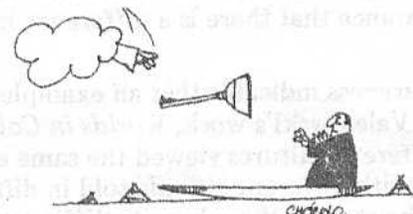

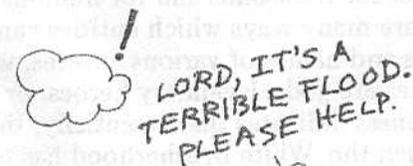

IS THERE A SURE METHOD FOR SELF-DIAGNOSIS OF CANCER?

QUESTION:

A question from H. H., Honolulu, Hawaii. "Is there any way to self-diagnose if one has cancer? I have heard of cases where a person goes to a doctor, the doctor cuts open the patient, and the doctor sends the patient back saying, the cancer is too far gone and gives the patient only a few months to live.

COSMIC AWARENESS:

This Awareness indicates the American Cancer Association puts out a list of warning signals. This Awareness suggests that you may use this list; that wherein there is any question, suspicion, or wherein there is a feeling that you are not in good health, that entities should receive a physical examination. This Awareness suggests that you not search for a sure method of self-diagnosis of cancer, for you may simply fool yourself or others into thinking that this is a safe manner.

GETTING HISTORY STRAIGHT...

CALL IT MALDEK OR ORIGINY

MADMEN STILL BLEW IT APART

(LOOKING AT LEGENDS)

QUESTION:

L.H. has a question which relates to the asteroids having resulted from the blowing to bits of the planet Awareness called Maldek, and the reference *It* made that 85% of the present earth populace was of Maldekian origin. He writes: "I have a good many volumes of teachings from celestial teachers, cosmic beings, some of whom have never lived in the earth. They are as brothers and sisters of the Adamic race now living upon the earth in the material 3rd dimensional plane. These cosmic beings are of the Great White Brotherhood, the Brotherhood of light, the Celestial Host of the Christ. Amidst their teaching it is stated that the asteroid belt is the result of the blowing to bits of the planet originally called Mars. Their teachings further indicate that the planet we now call Mars is, in fact, not the original Mars at all. Therefore, the first question requested for presentation to Awareness is: Will Awareness kindly comment further about the name and populace of the planet *It* calls Maldek?"

COSMIC AWARENESS:

This Awareness indicates the planet Maldek also has been called Ceres. This Awareness indicates that the planet Mars has been called Hercules, that the planet Venus has been called the Dog Star, and Beelzebub, has also been associated with Lucifer; that there are many various cultures and have been many various cultures down through the ages, who have had different names for different planets at different times. This in reference to a period which reaches back for thousands and for millions of years; that there are many ways which entities can express experiences and names of various entities, whether these entities are gods, legendary heroes, or planets. This Awareness indicates that essentially, the information which the White Brotherhood has presented is valid, that there are different terms in different times. This Awareness indicates that information can be valid when spoken by an Englishman or when spoken by a Japanese, or when spoken by an Aborigine; though they may be speaking the same information relating unto certain cosmic events, there may be an appearance that there is a difference in what is being said.

This Awareness indicates that an example of this is found in Valekovski's work, *Worlds in Collision*, wherein different cultures viewed the same event and came up with different legends told in different ways; but the stories, though quite different, were capable of expressing the same event.

This Awareness indicates the Polynesians, telling a story of the son who wished to allow his mother more time, went out and roped the sun and made the sun stand still for several days to allow his mother time to work. The Hebrew legend at the same time, telling a story of Moses crossing a sea, of the sun standing still for several days; that in the areas of South America, there were similar legends, some saying of a six day period, some saying seven, and some saying nine, wherein the sun did not set, or wherein the sky was dark for many days. This Awareness indicates depending on the side of the earth in which the entities were viewing, depending on the legends which the entities used to tell the story, and depending on the languages used, the stories were different, yet were telling the same event.

This Awareness indicates that entities can refer to Maldek as Mars, and Mars as Maldek, or whatever; that these are simply words and have little significance to any important expression or purposes in terms of here and now. That the accuracy of what occurred three million, or twenty million, or a billion years hence or previously, these are of little significance or value to entities in present time; that whether an entity wishes to describe a day of Brahma, or refer to that as a Kali Yuga, or to call this something else, is of little significance.

This Awareness indicates that what is of significance is what is occurring *now*, or how that information can be applied to what is occurring now. This Awareness gave the information, not to establish a historic fact, not to create a debate about whether one planet was properly named or not, but to allow entities to gain an understanding of an overall picture, wherein they begin to see the possible directions which are occurring at this time in terms of nuclear energy, and where it could lead. This Awareness indicates in reality, the planet which is referred to as Maldek by the White Brotherhood, was originally called Origny; that Origny is the planet wherein Lucifer and his hosts first went after they left the forces of the Law of One. This Awareness used the term Maldek because the White Brotherhood uses that term and there are more entities who understand that term than there are who understand the term Origny.

This Awareness indicates the planet Origny had many different names during its inhabitant period; that many of the entities left the Origny, or Maldekian planet prior to its explosion, some of these came to the planet Jupiter, to one of its moons, and still inhabit that moon. These entities are of a higher spiritual development, these entities did leave that planet, knowing what was to occur, and created a civilization known as the kingdom of Munt. This Awareness indicates that after they left the planet Origny, or Maldek, or Mars, or whatever name you choose, was blown apart by the misuse of nuclear forces, and the inhabitants of that planet reincarnated upon the earth.

ED's Note: For more information on the planet Maldek, please refer to 'Revelations of Awareness' issues No. 77-04; 79-18; 82-13; 83-04; 83-18; \$3.00 each from CAC.

WHAT WOMAN ON EARTH PLAYED THE ROLE OF ISIS?

(MORE ON RALPH DUBY AS RHYEE)

QUESTION:

Awareness has indicated that Rhyee, the first separateness, also known as Lucifer, was returned to oneness with Awareness due to the help of Isis, who followed Rhyee to Essence shortly thereafter. We know that the entity, Ralph Duby, played the role of Rhyee, but Awareness, to my knowledge, has never revealed the name of the entity who played the role of Isis. Will Awareness now name this entity and tell us something about her, with perhaps some specifics on how she accomplished this amazing feat?

COSMIC AWARENESS:

This Awareness indicates that the entity Ralph Duby represented that force known as Rhyee. This Awareness wishes entities to understand that this was basically a symbolic action and not exactly a specific action of personality.

This Awareness indicates this entity did take upon himself the role of Rhyee for many lifetimes as an agent and did move this energy eventually back toward its source; this as a kind of leading edge of the return of Rhyee. This Awareness indicates that the entity's activity as Rhyee not to be confused entirely with that which has been termed Lucifer. This Awareness indicates this as somewhat difficult to explain.

This Awareness indicates that Lucifer has existed as many facets. Lucifer had many faces. Rhyee had many faces. That there were certain faces which expressed this energy in a kind of cutting edge that

surpassed others. This Awareness indicates that the... This Awareness wishes entities to understand the nature of Universal Forces. That essentially, Rhyee was but the male principle that separated from the rest of consciousness in order to project and go out and do something on its own, leaving behind that which was the female principle, and that female principle being that which remained in a receptive state, waiting for the return of the rest of consciousness.

This Awareness indicates that originally consciousness was not expressed in the form of physical shapes, but was a mass of realization. The realization being such that there was a separateness which could be created from that mass of being, and that separation did occur and in that occurrence, there was a duality.

This Awareness indicates that much of the information on this shall come in future readings regarding other realms and other energy fields within the universe, as well as a kind of universal history, which shall be given at a later time.

This Awareness indicates that essentially, the actions of Ralph Duby were such that the entity tapped into the leading edge of that Rhyee force and, channeling that edge for several lifetimes, (this as many lifetimes), became the leading force in this realm of that energy which represented the force of Lucifer, or Rhyee. This Awareness indicates that the entity then brought that force back to Essence, that others who had followed might also return to Essence.

This Awareness suggests that the entity Isis, or the principle of Isis, has been portrayed by all females, even as the principle of Rhyee has been portrayed by all males. This Awareness indicates the entity Vern Christianson's mother as having been representative of the force of Isis in a major way, if entities wish a personality for this role-playing factor.* This Awareness indicates there have also been others who exemplified the force of Isis, even as there have been others who exemplified the force of Rhyee.

This Awareness indicates that there are various ways of looking at a question and various ways of looking at energies; that one entity can look at a building and see the entire structure; another can see the purpose of the building. Another can see a series of bricks, while another sees a collection of molecules and atoms; that each sees correctly, though each may miss what the other sees.

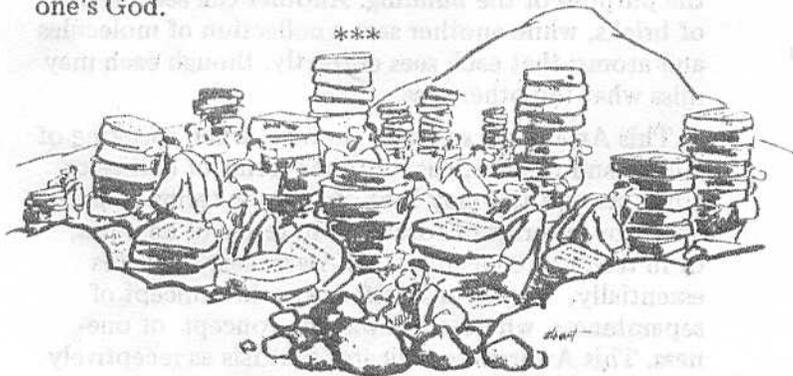

This Awareness suggests likewise, when speaking of Rhyee and Lucifer, Isis, or other forms of deities or concepts, entities may look at these in terms of personalities or in terms of forces, or in terms of energies, or in terms of concepts. This Awareness indicates essentially, Rhyee or Lucifer, was the concept of separateness, whereas Isis was the concept of oneness. This Awareness indicates that Isis as receptively waiting for the return of that which separated, that this can be exemplified by entities playing the roles of those forces.

This Awareness indicates this likewise related unto the entity Jesus playing out the role of that Christ Consciousness, which can come to all, and takes on the ills and sins of the world and returns to the heavenly origins. This Awareness indicates that this Christ Consciousness may be seen by some as a personality, by others as a force, and by still others as a concept of clarity and crystal clear purity. This Awareness indicates that all of these are correct from their own particular point of view.

This Awareness indicates that from one particular point of view, Vern Christianson's mother was one who followed Rhyee, Ralph DUBY, through many lifetimes and whose influence led to and through others assisting in guiding this entity, though this was done in a very remote manner in this present experience. This Awareness indicates that for several lifetimes previously, the entity caught up with Rhyee and assisted in guiding his consciousness to the place where it could easily be returned to Essence.

This Awareness prefers that entities not continue energizing the entity Ralph DUBY as a representative of Luciferian consciousness, for this entity has moved on; that there are others who are energizing and picking up the Luciferian consciousness, playing out those energies. This Awareness indicates that each of these may also be referred to as Lucifer if entities desire, but this Awareness suggests that Lucifer needs not be given a personality, but may best be understood as the concept of separateness, for there is within each entity a Lucifer and a Rhyee, and that Lucifer within yourself, that Rhyee within yourself, can return to Essence and IS being returned to Essence.

This Awareness indicates this also in regards to Isis, that part of you which awaits the return of that part of you which would separate from others. This Awareness indicates that essentially, the story of Rhyee and Isis as being symbolic of that which occurred eons ago in consciousness, but as also reflecting that which occurs at this moment within your own consciousness; and that the Rhyee and Isis within yourself may return to Essence, or Is-ness, and that which would separate now becomes unified, and that which would wait and be secretive now gives itself and opens itself and releases its secrets, this allowing the entity to become integrated with the All, with all others, and with one's self and one's God.

"Who starts these chainletters, anyway?"

* Ed's Note: Vern Christianson was the companion and energizer of David Worcester, former Interpreter of Cosmic Awareness during the operation of 'Servants of Awareness'. Vern's mother lived in Centralia, Washington, a little town on Interstate 5, about 35 miles south of Olympia. She died shortly after Ralph DUBY died early in the year 1967.

IS THE STABILITY OF EARTH THREATENED BY MINING?

QUESTION:

A question from L.D.P., Santa Fe, New Mexico. "A teacher of ancient Indian wisdom, Ohshena Fast Wolf, tells us that mining operations, particularly in the south west and most particularly in Four Corners, New Mexico, threatens the stability of the planet because of the removal of crystals. If this is correct, would Awareness please explain this?"

COSMIC AWARENESS:

This Awareness indicates that this does not appear to have any significant basis in reality. This Awareness does not see any threat by the removal of crystals. This Awareness indicates that any threat from the mining companies, if at all, would be of very local concern in terms of the effects of the mining. However, certain use of the crystals could have some destabilizing effect in terms of causing future disturbances if used for military purposes. This Awareness indicates that essentially, the mining operations themselves do not appear to have any real significance in terms of an effect on the planet. This Awareness indicates there are far more dangerous events occurring on the planet which can, indeed, have disastrous effects, but this does not appear to be one of these.

PEARLS OF WISDOM FROM AWARENESS

ON LAUGHTER:

This Awareness suggests that if you are a prisoner, (and all entities on this plane are), that you learn to laugh a little more.

ON WISDOM:

This Awareness indicates that intelligence and compassion create wisdom.

ON THE UNIVERSE:

This Awareness suggests that the universe is a verb, an action and a state of being.

ON WORDS:

This Awareness indicates that your words come true, that the words of others come true; that wherein words are in conflict, this may be likened unto a sword fight. This Awareness wishes entities to be aware of the use of words,--from your own mouth and the mouths of others, for these are likened unto swords and can cut and can harm or can cut and carve great beauty.
