Helping People Become Aware

DEVELOPING THE IMAGINATION

Published by Cosmic Awareness Communications and the Universal Church of Awareness, P.O. Box 115, Olympia, Washington, 98507, U.S.A. Reproduction of this material is permitted and encouraged.

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully-trained channels. The information contained herein was received from deep super-conscious 'trance' levels and 'interpreted' by an entity affiliated with C.A.C. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the interpreters necessarily agree with the statements of Cosmic Awareness. The interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

READING TO CHILDREN: SHOULD YOU, OR SHOULDN'T YOU?

(Healthy and Unhealthy Nourishment in Developing a Child's Imagination)

QUESTION:

A question from W.T. "I had a couple of questions in relation to the last information, regarding children. I think this is a very important subject, and there's a lot of people out here who have been waiting for this type of information. I'd like to ask a question in relation to reading to children:

"My 6 children, who are now all young adults, were discussing recently what they liked best about their childhood, and almost unanimously they all said the thing they liked best was the fact that their mother read to them every day, sometimes from an hour to three hours. She would read at all ages to those children, the Dr. Seuss books, *Charlotte's Web*, *Snow White*, *Bambi*, fairy tales, but not the type of Grimm's fairy-tales that had a lot of blood and gore and stuff, and as the children got a little older she would read books like *Treasure Island*, *Swiss Family Robinson*, *Robinson Crusoe*, and even *Gone With the Wind*, etc.

"Now, there's two schools of thought on that: if you read too much to children, it's possible they can go into a fantasy-type world. I don't think any of mine did. I'd like to ask Awareness to comment on mothers reading to their children on a regular basis, and what this does for these entities."

COSMIC AWARENESS:

This Awareness indicates that depending on the material being read, that this may be considered the same as a form of nourishment. Just as the mother nourishes the child in the sense of nutrition for the development of the body, so likewise a mother can nourish the child with ideas, experiences, stories, or other activities which allow the child's mental development, imagination and curiosity to expand. That wherein the diet for the mind and emotions is that which is given nutrition of a type which builds within the child certain fantasies and certain images, stories and relationships which can be of value to the child for the child to call upon in his or her future experiences; this then is a form of healthy nourishment. Of course, those stories or the relating of experiences to children which are frightening, or imply a hostile world, or possible dangerous experiences; this kind of story can of course be fascinating to the child but can also create many disturbances in the child's emotions and feelings.

This Awareness indicates that there are often persons who enjoy telling children blood-curdling stories or stories of how the rat chewed off some little boy's finger, or such similar tales, and enjoy watching the child's eyes light up and become frightened by such stories. There are often also children who encourage such stories, yet these stories are giving a kind of nourishment which can be very damaging to the child in terms of his or her emotions, just as giving the child the wrong kind of food can damage the child's body.

This Awareness indicates that stories which are put into the heads of children should be looked at as nutrition for the soul; that stories which threaten the child's welfare, such as stories of hell and Satan, which frighten the child into feeling that he or she may be caught by some evil force; these stories can lie dormant for some time, emerging suddenly because of some experience, and lead the child into an action which is totally destructive to the child's welfare. Other children may be able to handle such stories, or a child having certain protective energies throughout, may be able to handle such stories until older and wiser, and able to rationalize and dissect the stories, but one can never be sure just what effect these frightening tales may have on children.

Likewise, television shows, movies, comic books, can also have frightening effects on children. However, it is impossible to shelter children from these visions of violence; it is impossible to raise a child in an aura of total peace and harmony. It not only is impossible, but it would also be impractical, and likewise, could be damaging; that the child raised on visions of butterflies, cookies, candies and fairy-godmothers, may grow up having no fears whatsoever, but that lack of fear may lead the child into experiences which can be quite damaging.

Likewise, to raise the child without being aware of violence in a world wherein violence can surround the child, this can lead to an event wherein the child witnessing such violence may have an excessive reaction because of the experience, without having been prepared for an understanding of such experience. It is important that parents not raise children to be naive, yet it is important that parents raise children not to be overly fearful because of stories which have made traumatic impressions on their young minds.

This Awareness indicates that the parent giving the child stories which are adventurous, intriguing, wherein there are lessons to be learned, wherein there appears to be some potential danger to the child, but wherein the child emerges victorious, or the hero of the story emerges victorious; this type of story generally is quite healthy for the child, assisting the child to build a good self-image. That wherein the child does come in contact with movies or television shows, or literature or comic-books, or stories, real or unreal in regard to violence, it is important that the parent assist the child in understanding these things.

When the Child Confronts Violence

This Awareness indicates that when some young child hears of one of her classmates being raped, or hearing of some brutality or violence in the neighborhood, there is no way that the parent can say: "It did not exist, don't think about that." It is much better for the parent to inform the child: "Yes, these things do happen, and one must be careful, and there are ways to avoid allowing these things to happen. If you follow the rules, the chances of this ever happening to you is very slight indeed."

In this manner, you can help the child to be prepared to avoid situations wherein violence could occur. In this manner you may assist in educating your child to be protected against such experiences; that some fear is necessary in order for an entity to avoid the naive entry into a circumstance or situation which is damaging to the entity.

The value in reading, in literature, in viewing movies or television or in telling stories; the value in this is that you can give the child vicarious experiences, experiences of others, so that the child need not learn everything simply from his or her own immediate experiences. That by reading or hearing of the stories and adventures of others, one may enhance one's life and understanding of life in much more of an acceleration, for every story one hears, one may learn some valuable lesson which will save the entity from having to experience that lesson in order to learn the lesson for himself.

Raising your Child to be a Bore

The difference between movies or television, and the spoken word has much to do with the expansion of the imagination. If you wish your child to have the use of a healthy imagination, then written stories, the spoken word: these tend to enhance the imagination, for it allows the mind to fill in the images and pictures which are lacking in the story. If however, you prefer your child to have little or no imagination, and to deal strictly with facts that are observable, then a strong diet of television and movies, particularly those which leave little to the imagination; this will tend to help raise the child as a very factual type of person, who is not very creative, has little imagination, but deals more with the things at hand.

This can be helpful in teaching the child to deal with rational and methodical problems, but wherein there is a need for the child to think for himself, this child may not be able to do so; that many people are afraid of the imagination, having had experiences wherein the imagination ran wild; many people feel that a strong imagination may lead to insanity.

This Awareness wishes entities to understand that imagination can be a wonderful thing, or can be a terrible thing, depending on whether *it* controls *you*, or whether *you* control *it*. That wherein an entity knows how to use the imagination, and when to allow it to have complete rein, and how to pull it back, and control the imagination, this entity is bound to be very inventive and creative and original, and can accomplish many great things in whatever field the entity enters.

The Importance of Teaching Children What is Real and What is Imagined

Wherein the entity has a vivid imagination and allows it to run wild, and has no control over the imagination, cannot separate reality from imagination, has not been able to make that distinction between what is real and what is imagined; this entity is a candidate for later psychotic experiences, that the entity will probably develop some serious mental disorders. Therefore, it is important for parents to help children to learn when very young, what is real and what is imagined.

It does not need to be used too sternly, but whereby, for example, the child is watching a frightening movie which looks very real, and the parent sees that the child is truly disturbed; rather than let the child experience this great trauma, it is important that the parent rescue the child's emotion and simply whisper to the child: "Remember, it's only a movie; they're only acting out these parts; they're not really being hurt." This allows the child to have the advantage of being able to switch in and out of the levels of imagination, and into the world of reality, or to switch back into the imagination and remain there as long as desirable, or until it becomes uncomfortable; then the child simply pulls back and says: "Wait a minute, this is simply a movie; it is not real. Why am I getting all upset?"

Having this advantage of being able to shift levels also allows the child to grow up being able to shift dimensions, recognize the difference between dimensions of thought; seeing the photograph and seeing the difference in the time wherein the photograph was taken, and wherein the entity now looks at the photograph, seeing the actor playing the part, and seeing the actor outside the part. That this distinction as that which is healthy for the child to be able to discern shifts in consciousness, whereby the child may later be able to step outside of himself, and look at himself in this situation and get a new perspective, and get new ideas, or get a more objective insight into his or her role.

This Awareness indicates that imagination controlled, means that the entity is able to put it on or take it off, step into the story, or step out, at will. Imagination in control means that the child, or entity does not feel that he or she has any control over what is occurring in the entity's fantasies, or the fantasies being observed; thus an entity may have a delusion, and not be able to objectively look at this delusion, for the entity has not stepped out of the delusion in order to be objective.

"Suddenly, there was an ear-splitting crash as he slammed the filing-cabinet drawer home. 'My God, Hilton!' he hissed, 'You were right all along — it was filed under Miscellaneous!'"

How Handwriting Indicates Imagination

Anyone wishing to determine whether or not he or she has a vivid imagination may look to the loops in their handwriting, particularly this applies to persons over 15 years of age; looking at the loops in your handwriting; if these loops are open and large, then the imagination is quite vivid. If these loops are missing, then the entity has little or no imagination. That whether or not you can control your imagination will be shown by your objectivity in your handwriting. Wherein the handwriting is slanted greatly over toward the right, this indicates that external forces tend to influence you, and with a great imagination, you can take the smallest bit of evidence and imagine the most intriguing set of circumstances. Wherein your handwriting is straight up and down, or leaning slightly to the left, this means that you are judgmental; you hold back and you question rather than allow external forces to influence you greatly.

Wherein the handwriting shifts back and forth, from right, this is an indication of one who swings too far into responsiveness, responding too much to the environment, and then, recognizing this, reverts back suddenly to a self-centered and judgmental position. Any entity whose handwriting slants greatly to the right, with great imagination, is a highly disturbed individual, and should very likely need counseling.

Likewise, any entity whose handwriting slants greatly to the left and has extremely large loops may have many forms of paranoia, and fears which are repressed; that some entities having little or no loops in their handwriting may be so factual as to be rather dull in nature, yet they may also be somewhat fanatic in their opinions. That the openness of the loops indicates an openness of the mind, a willingness to allow imagination to have some place in their thinking. The loops which are closed, allowing no imagination, indicate the entity has basically made up his or her mind in regard to the circumstances or situations of life.

There are few people who are of either extreme, most entities being somewhere between; that to check yourself to see if you are the type who has a reasonable control over your imagination, you may look to your handwriting again to see how often you retrace, for retracing, such as in the "m" or "n", or letters which retrace the same track, these, if exaggerated, can indicate an entity who has certain fears and seeks security of the familiar and therefore, is not able to make judgments, or venture into new areas easily.

This Awareness indicates those "m"s and "n"s which come to a point indicate the ability to discern and make judgments regarding situations. Such entities are not likely to have excessive fears, and therefore, the imaginations are not likely to cause problems. This Awareness indicates that *It* had diversified somewhat into another area; that the question may be restated if desired, and if not fully covered.

ANY SOLUTION TO THE RAMPANT DEPRESSION AND SUICIDE AMONG CHILDREN?

(THE EVILS OF CHEMICALS AND MARIJUANA)

(FOLLOW-UP QUESTION):

Awareness, one last question in regard to children. We saw a TV special recently that dealt with the area of depression, and it seems to be a growing phenomena, where more and more children are getting depressed, a serious depression earlier and earlier in life, many times leading to suicide. What can be done about this?

COSMIC AWARENESS:

This Awareness indicates that much of this has to do with the excessive use of sweets and of refined carbohydrates, and also of food additives; this including coloring, and certain chemicals. This Awareness sees sodium bisulphate as being one culprit, that there are others such as sodium nitrate; that many of these food additives have an effect upon the emotions and moods of children, through the effects that these have on their endocrine system.

That sugar products as being the most damaging; that many children have inherited hypoglycemic tendencies from their parents and by indulging heavily in the use of sugar, these children may well have hypoglycemia at a very young age, thus being easily depressed during the low cycle. This Awareness indicates that Vitamin K, which is found in alfalfa sprouts as a good source for Vitamin K and that this is a good counter for depression.

Also, children who are easily or often depressed, should also be given multivitamins and minerals, which include the amino acids; that they may also need to be checked for heavy metals such as lead and cadmium. Also, there is much damage from marijuana and marijuana smoke, and cigarette smoke, but particularly marijuana among young children as that which affects them during their formative years, is especially hard on younger children as opposed to adults. That this can also lead to suicidal tendencies through depression; that the marijuana as having a strong effect on the pancreas, adrenaline, kidneys and liver, particularly for younger children.

HOW TO PREVENT SUICIDE

HOW TO PREVENT CHILD SUICIDE

(MORE ON THE CHILD ALCOHOLIC)

(FOLLOW-UP QUESTION):

Is there anything an entity can take after smoking marijuana that could neutralize those effects?

COSMIC AWARENESS:

This Awareness indicates that by stopping the use, the body can restore itself to normal. However, marijuana as not the only problem, that sugar as also a serious problem and cause. Also, children, more and more, young children are indulging in alcohol and the use of alcohol, which is also one of the major contributors to this condition.

Children of parents who are strong alcoholic users, children of alcoholics, do not tend as a general rule, to become alcoholic themselves, for they have an abhorrence to what they see happening to their mother or father through the use of alcohol. However, alcoholism being a disease, may be in their genes. It is passed from generation to generation, not always through each child, but often through one of the offspring or more, and on to the grandchild. That the genetic misfunction carrying this disease from the grandparent, often emerges into the grandchild, so that the grandchild becomes involved in alcohol slightly, but then, it becomes increasingly more and more until the child is a complete alcoholic. In such cases, the entity may need to totally refrain from the use of alcohol, if this is indeed a genetic misfunction; that other children may have alcoholic problems, without necessarily being alcoholic, or having that disease. They may drink too much, or may not be able to handle the alcohol, may cause problems from being drunk, or from drinking too much, and may have a habit of drinking too frequently, yet these entities may not have the disease known as alcoholism.

This Awareness indicates that whether or not the child has such a disease, the child may still have alcohol problems, or drug problems, or sugar problems, and any of these can cause serious mental disorder, including deep depression, and it may take only some incident of disturbance to lead the child to become suicidal.

Often a young person feels so helpless that when things go bad in many levels, the child's ability to fight back, to have any sense of power, being denied, the only recourse then is retreat; and if the child retreats on all levels available, except for suicide, then the child may feel there is no other way out of the dilemma. That any child reaching such a position is to be pitied, and does indeed need to have help.

... AND SO THE PRINCE AND THE PRINCESS USED CONDOMS AND HAD SAFE SEX AND LIVED HAPPILY EVER AFTER. THE END.

This Awareness indicates that parents should watch very carefully the children's moods, determining whether they are happy; that if your child is not happy with his or her life, it should indeed be discussed. That also, you watch the child to determine if the child has hope in the future, for wherein the child is looking forward to something, or if the child is happy with the present, you can be relatively sure that the child will not commit suicide; but if the child has lost faith in the future, and is unhappy in the present, you may have a suicidal tendency in the child.

That wherein you feel your child is possibly suicidal, it is beneficial and can help the child greatly to increase present happiness and to give the child something to look forward to in the future. That also, opening up the subject of despair so that the child can express freely without fear, and without feeling threatened, as that which will be beneficial to the child.

(FOLLOW-UP QUESTION):

In addition to the vitamins, how much effect would the Bach Flower remedies have in situations like this?

COSMIC AWARENESS:

This Awareness indicates that these can be of great importance, bringing about quick changes when properly used. However, the trouble with Bach Flower is that it is not widespread enough, thus, being unavailable to most people.

GETTING CLEAR: HOW TO TUNE INTO THE MORE SPIRITUAL LEVELS

QUESTION:

H.C., of Decatur, Georgia, has a sort of question here. I'd better read most of her letter to get at it. "I do have a general question on my mind that I have been struggling to formulate for some time. If you can make any sense out of it, could you ask Awareness for me? Thanks tons. I'm not real sure what I'm struggling with at this point, but here goes: It seems to me that people, (we), should look and listen to that inner voice, our real selves, for the answer to our problems, wait for life, God, spirit, to bring us the necessary experiences to answer these problems. It seems too easy to turn to something like *Cosmic Awareness Communications* to find answers for unsolved mysteries, for life readings and so forth. Are not the answers to all inside of us?" She asks: "If we were supposed to know all the answers, wouldn't we? I know we are God; I am confused. I cannot tune in to this inner self as of yet. Could Awareness comment on this, and maybe help with some techniques to help us experience our inner self?"

"Suddenly Fiona screamed at him like a scalded cat."

Rigby/The Bulletin/Sydney

COSMIC AWARENESS:

This Awareness suggests that this may be likened unto fine radio or television sets,--receivers, which are capable of receiving the ultimate in programming, but are being jammed by interfering transmissions of the Alien Force, of forces of confusion, and of mundane levels. This Awareness suggests that wherein entities wish to tune in to the more spiritual levels, that they must first move through the polarity thinking of their consciousness, that which is the tree of knowledge, which thinks in terms of right and wrong, good and evil, yes and no, positive and negative, as a way of reaching levels of understanding.

This Awareness indicates that to move beyond this polarity thinking, one must place aside consciousness that thinks in terms of these polarities, must place aside emotions that prefer one thing over another, and must place aside certain feelings in regards to what is occurring.

This Awareness suggests that in placing aside mind, emotion and feeling, there is no personal identification remaining and the entity enters into a catatonic

state, a mystical state, whereby there is no preference in terms of the answer, but there is simply the awareness of *what is*. This Awareness suggests that wherein an entity can look clearly at *what is*, and clearly remain in that level of attention and a question is presented, the entity will see clearly that which is the truthful reality at that moment.

This Awareness suggests that entities in studying the Laws and Precepts given by this Awareness, in studying the information given by this Awareness, shall be assisted in their movement to lay aside mind, emotion and feeling, to move beyond the third dimensional consciousness, moving beyond the tree of knowledge into levels of observation and clarity.

This Awareness suggests that entities need not rely upon any external truths or teachings, but may listen, may read and may converse to discover what others are expressing as channels. This Awareness suggests that entities may also listen to the still, small voice within themselves, but that entities pay great attention to what is coming through. For any voice that claims it is God speaking through an entity, or claims to be a Divine Spirit, yet creates concepts which are not of a reconciliation, which create concepts that tend to separate or make an entity feel inferior or superior to another; this voice is not of a divine nature, but of a deceiving nature and a representative of the Alien Force.

WHY THE TRADE CENTER PROJECT FAILED?

QUESTION:

(April 9, 1982)

The *Wall Street Journal* of March 24th, had the following news item: "A barter group called Columbus Trade Exchange must comply with an Internal Revenue Service John Doe summons, and disclose the names of its members and its records of their exchanges of goods and services without cash, a U.S. appeals court has held." I'd like to ask Awareness if this will have any effect on the *Unified States of Awareness Trade Centers*, when these eventually are established?

COSMIC AWARENESS:

This Awareness indicates that IF these occur, for the energies on this particular action as that which appears to have been sabotaged by certain so-called Light workers; but if this occurs through the Use-it system, (and this does appear unlikely at this time), then it would in all probability, be subject to taxation, for your IRS has ruled that all goods bartered are taxable. This Awareness indicates however, there is another option which is open in another direction, which this Awareness does not wish at this time to discuss, for as these energies are discussed, the

Light workers often....This Awareness indicates the entities who see themselves as Light workers, often are not totally clear, and tend to siphon certain energies before an action can be initiated properly.

This Awareness indicates that this has been tried previously, to allow entities who were partially enlightened to become involved in projects which could have been quite effective, but the partially enlightened entities tended to siphon the energies before the energies were ready to be used. Therefore, many of the projects which this Awareness wishes to initiate will be done quietly until the energies and projects are ready to move.

THAT CORAL CASTLE IN FLORIDA --HOW WERE THE BLOCKS LIFTED?

QUESTION:

A question from E.S., of Mingo Junction, Ohio: "Some years ago, the TV show called *That's Incredible*, did a story on a man who single-handedly built a coral castle with coral blocks, ranging from 10 to 100 tons, 25 miles south of Miami. He kept his secret methods to himself, but said it had to do with magnetic current and was the same technique used to build the great pyramids in Egypt. How did he do it, and when will this be understood and applied scientifically?"

COSMIC AWARENESS:

This Awareness does not wish, at this time, to give away this entity's secret. This Awareness indicates that this as information which appears to be somewhat deceptive, and containing implications without real substance. This Awareness indicates that there appears to be some validity in the story, yet there is also much deception involved which this Awareness does not clearly see at this time, nor does It wish to move into this at this time, as it would take more energy that is available. This Awareness suggests the Interpreter be brought from trance.

DID GOD REALLY VISIT PRESIDENT LYNDON JOHNSON AT THE WHITE HOUSE?

(DIFFICULTIES INVOLVED IN BEING THE PRESIDENT)

QUESTION:

I clipped an article a while back, which contains a question I intended to ask Awareness about. I'll read this with the request that Awareness comment on it. It goes: "Lyndon Johnson believed he was visited by God at the White House during the Vietnam war, according to a forthcoming biography on the former president. The biography, begun in 1967, is *The Politician*, by Ronnie Dugger, long time editor of *The Texas Observer*, a magazine published in Austin. In a chapter on Johnson's religion, the biography claims that during his presidency Johnson asked an unidentified ambassador if he believed if God, in the form of the Holy Ghost, was making earthly visitations. When the ambassador answered "no", the president said the Holy Ghost had been visiting him during the early morning hours when he received reports about the Vietnam war. At the time, the United States was escalating its role in the war, and Johnson was on the verge of sending 500,000 men into battle." That was the end of the article.

COSMIC AWARENESS:

This Awareness indicates the question be repeated.

QUESTIONER: The basic question is: Was this God, or the Holy Ghost which visited this entity during his years as president during the Vietnam war?

COSMIC AWARENESS:

This Awareness indicates that this as an etheric being. This entity as associated with, or as essentially the entity's guide or guardian; this entity as an etheric being representing that which may be called the Holy Ghost, or God, depending on the semantics and frame of reference. This Awareness indicates essentially, in the frame of reference and context of this particular experience, the entity *did* experience that which was representative of the Divine.

This Awareness indicates that from another frame of reference, the entity experienced an ambassador of the Force of Light, and this ambassador was essentially the entity's Higher Self and representative of the forces which were concerned in regard to this entity's use of power.

WHY THEN DID PRESIDENT JOHNSON CONTINUE TO ESCALATE THE WAR?

(QUESTIONER'S COMMENT):

This visitation evidently did not impress the president too much, because he proceeded to escalate the war anyway.

COSMIC AWARENESS:

This Awareness indicates that the difficulties in being president and having all of that power at one's disposal, cannot be imagined by entities who have never been in those levels or having never experienced that responsibility. This Awareness indicates that this entity as not fully ever feeling himself to have the power to create war, to stop war, but rather seeing himself only as a man who has grown up from a little boy, and who is now put in a position of responsibility where he must pretend to know what he is doing.

This Awareness indicates that the entity as simply attempting to do his job as well as he could so as not to be criticized by others to any degree which he could not handle. This Awareness indicates that the entity not seeing himself as a true Commander-in-Chief, but rather seeing himself waiting for reports from those who were running the show, and asking him what they should do, while at the same time, informing him through advisors as to what he should say. This Awareness indicates the entity saw himself more as a spokesman for all of the forces, speaking as a mediator between the forces, while also serving as a figurehead for the public.

This Awareness indicates the entity did not feel himself to be responsible for the war, but rather saw himself being put in a position of having to make decisions according to the information being given, and the advice being given in response to that information. In this manner, the entity personalized his particular role without identifying with the consequences of the words which came from his mouth. This Awareness indicates the entity did not see himself as having the power to affect the war in any great degree, other than to approve *this* plan, and not to approve *another* plan; the plans being simply that which were placed before him.

This Awareness indicates had the entity been allowed to move into the battle zone, and experience the heat of napalm, and experience the whine and buzz of bullets, and hear the cries of the wounded, the entity's plans might have been quite different, and those plans approved or disapproved, might have been altered. This Awareness indicates the entity, rather than being affected to make decisions toward peace by the visitation of the Light Being, rather this entity was of a soliciting nature, requesting and asking the Light Being to approve and support his decisions and his actions, and to assist him in his responsibilities.

This Awareness indicates the entity not actually seeking to receive guidance from the Light Being, so much as seeking to receive support for his purposes. This Awareness indicates that entities in high places do have a great responsibility which they seldom can realize, and entities looking at these in high places believe them to have greater power than they actually possess.

(FOLLOW-UP COMMENT BY QUESTIONER):

A lot of entities felt betrayed, because they voted this entity into office on his promise that within weeks he would end the war in Vietnam and bring the boys home, and within a matter of days after being voted into office, the entity escalated the war, and it just went on and on from there.

COSMIC AWARENESS:

This Awareness indicates that this entity as having been a puppet and a mouthpiece for other forces, and not having the courage or the ability to oppose those forces to a degree necessary to prevent their continuance. The entity therefore, went along with the forces which put him in office, rather than to oppose those forces and be removed from office.

(Closing Message):

This Awareness indicates that the weakness which is always at the heart of compromise in terms of one's ethics and principles and ideals, the weakness is that which relates to the desire for security, and that of survival, and the security which entities seek in reference to the material security and the survival of the material body and its wealth, is that which betrays the entity's soul when it is given greater significance than the security of eternal life.

SOME INFORMATION ON ASTROLOGY**(HOW IMPORTANT IS THE TIME OF BIRTH?)****(Excerpt from a Personal Reading)****QUESTION:**

As astrology can indicate energies available which could be used as a guide in life, could you confirm entities do, in fact, choose certain planetary positions prior to birth, as has been suggested by others? Reference to astrology and the Tarot has also been made, that these can be used as a tool for self-understanding, etc. There are many, many people who do not have their correct time of birth, myself included, and wonder is astrology still an effective tool for self-understanding if a correct time of birth is not available. The use of solar charts has been suggested by some; however, this would suggest that everyone born on one particular day, regardless of where or what time, would all have the same goals and destiny, which seems very unlikely, since twins can be born on the same day and be absolutely different personalities. I have spent considerable time endeavoring to rectify my time of birth, which would prove itself through the use of progressions, solar returns, etc. etc., and although the time now being considered would seem to be close, I am not completely satisfied it is the

**Harley Bird**

Next to Richard Nixon, no president has been so vilified as a war monger than Lyndon Johnson. The above is one of the more flattering poster of Johnson during the Vietnam war. During the Hippie era, some of the more popular Johnson posters depicted the president with a snarl on his face, holding a submachine gun as he crouched in a fighting stance. Another favorite was the head of Johnson on a donkey's body, with a headlong view of the donkey's tail end with his tail upraised.

correct one, since in the various progressed planetary positions there can be a 1 to 2 degree orb, which seems excessive, and I felt a 5 or 10 minute orb between progressions would be more desirable for accuracy's sake. In your opinion, for the purposes of birth time rectification techniques, what would be the minimal acceptable orb? Would you please advise a book which most accurately provides a valid rectification method?

COSMIC AWARENESS:

This Awareness indicates that the choice as that which occurs essentially on a subconscious or natural approach, being that wherein certain vibrations of the entity respond to the vibrations of the astrological energies at the time to bring forth the entity's incarnation.

This Awareness indicates that in reference to correct time of birth and solar charts, that the solar charts are relatively valid for each entity born at that time on that day, up to a point. This Awareness indicates that

the purpose of understanding the solar chart, is to recognize not the goals of the individual, or even the experiences, but the influences upon the individual which affect whatever experiences the entity is having. This Awareness indicates that the influences may be such that at one point the domestics of the individual are being accented, at another point the careers of the individuals are being accented, at another point the education of the individuals may be aspected, or the various houses of the solar chart affecting and influencing each of these individuals, according to the case whereby the individual exists. This Awareness indicates an example being that wherein a king was born on a certain day and a pauper was born on the same day; when the prince was crowned king, the pauper received a promotion and began a career; when the king was attacked on the highway in his carriage, the pauper was accosted by a band of drunks who stole his mule. This as an example; the situation may be different, but the experiences may be in parallel.

This Awareness indicates in terms of the entities knowing their natal chart, the time of day by which they may form their natal charts, this tends to give a more precise picture of not just the influences, but the environment in which the entity is influenced. The environment of one entity may be quite different from the environment of another entity born on the same day, having different birth times.

This Awareness indicates that the importance of having a precise timing of birth is only essential when a planet's position is crucial in terms of its placement in one sign or another. For example, if two minutes make a difference between a planet being in one sign or another, this may be crucial, and the entity may need to consider a planet on a cusp by compromising. This Awareness indicates that if 10 minutes make a difference, then this may be crucial. However, the mathematics of astrology by the systems used today, receive much greater attention than the interpretation; therefore, it becomes almost ridiculous to concern oneself over the 5 or 10 minute differences, or the one or two degree difference of a chart, when the astrologer does not know how to interpret the information anyway. That likewise, when the astrologer does know how to interpret an entire chart, a planet being one or two degrees off makes very little difference in terms of whether the individual receiving the information will act on the interpretation or not. This Awareness indicates that therefore, the precision of attempting to pin down the exact moment of birth is absurd in the usual cases.

This Awareness indicates that all is relative to a degree and it is simply a matter of how perfect one wishes to make one's chart, but this is relative only to the ability of the entity to use that information and that chart for constructive purpose, otherwise this is just a hook on which one's mind is fastened, preventing the entity from taking action.

This Awareness in reference to book rectification, that the information in *The A-Z Horoscope Delin-* *erator* as that which is sufficient for this purpose.

This Awareness indicates that in reference to astrology, that there are quite a number of entities who can work out the precision of the mathematics, but these entities fail to have the intuitive ability to interpret and add influences to each other to determine what the chart is saying. This is because such action requires service from the subconscious, and most entities working in astrology are dealing with the rational mathematical scientific approach, rather than the artistic and intuitive actions. This Awareness indicates the study of astrology can be most helpful in blending the aspects of an entity's rational and subjective or subconscious mind to bring forth the proper intuitive interpretations. This Awareness indicates for example, what does it mean to have Mars 16 Scorpio, Venus at 3 Cancer, Mercury at 4 Virgo, the Sun at 15 Virgo and Jupiter at 12 Libra? This Awareness indicates when one begins adding the meaning of each of these influences, the addition of the sign to the planets, the aspects of the planets to each other, the additions of the planets' influences on each other, and this upon the individual; that when these interpretations begin, what does one do with the precise degree placements, for they fall away, and entities no longer have any use for the minutes and seconds of the degrees, as the work is for the intuitive to add qualities together rather than quantities of numbers.

This Awareness indicates that the construction of the chart is dealing with quantities, the interpretation of the chart deals with qualities, and the interpretation requires a kind of mathematic approach of adding and subtracting qualities rather than quantities. This is called intuition.

HAVE ASTROLOGICAL SIGNS CHANGED NOW THE AQUARIAN AGE IS HERE?

QUESTION:

Would Awareness please advise which is the most effective house system (Placidius, Koch, Campanus, Equal, etc.) for me to use for a 51 degree north latitude? Have the fundamental planetary, sign and house interpretations presently available, changed in any way now that the Aquarian Age is here, and would Awareness please consider offering instructional astrological courses through CAC to members at an additional cost to those interested?

COSMIC AWARENESS:

This Awareness indicates that in reference to a house system for 51 N latitude, this Awareness suggests the Equal house system as being sufficient.

This Awareness indicates that in reference to the Aquarian Age, that the basic twelve sign zodiac is still accurate. This Awareness indicates that essentially, the constellations are not the zodiac as has been indicated previously through this Awareness: the zodiac is a theoretical 12-pointed map of the universe from which influences may be measured.

This Awareness indicates that the constellations were, in fact, named after these directions in the universe. That wherein entities can conceive of the signs being directions out from the center of the universe, these signs being directions and the constellations named after the direction which it rules, just as the planets are seen as rulers of certain signs, likewise the constellations are rulers of certain signs. This Awareness indicates that there are certain books that indicate that there are more than 12 signs because of the changes of the constellations, however, this as a result of not understanding the principles of astrology.

ESOTERIC ASTROLOGY--

SOME RECOMMENDED BOOKS

QUESTION:

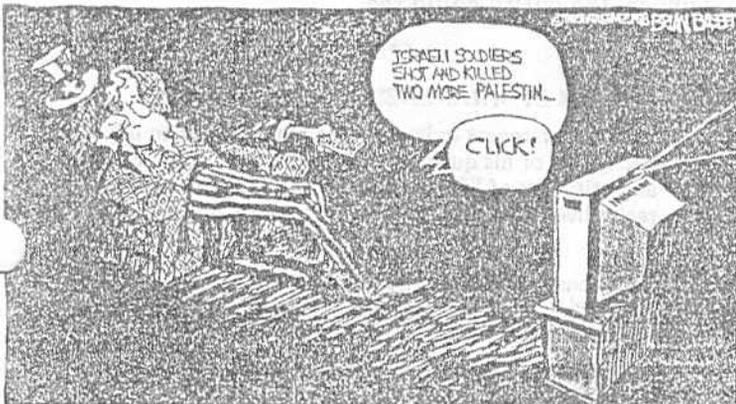

I would like to eventually study the works of Bailey and Baker on esoteric astrology, wherein both refer to the seven levels of hierarchy and the rays. Is the information contained in these books valid? or, for the subject of esoteric astrology, is there another author you would recommend?

COSMIC AWARENESS:

This Awareness indicates that these books (Bailey and Barker) are essentially beneficial in many ways, although there are some areas which are overworked, overmental and of little real value. That generally however, these works are of enough value that entities should read them at least once if they wish to become involved in esoteric astrology. This Awareness indicates that more supplements to this may be found in the works of Dane Rudhyer; there also appears to be a book written by a Tibetan entity, this appears to be *Spiritual Sun Signs*.

ED's Note: Although CAC does not stock astrology books, we have access to publishers that do. If you desire a certain book and cannot locate it, drop us a line. We can probably find it for you.

For more information on astrology, please refer to 'Revelations of Awareness' issue No. 79-8 (Astrology: How Anyone Can Easily Understand It--a New Explanation by Awareness); \$2.00 from CAC.

HOW TO USE VISUALIZATION FOR ABSENT HEALING

(FLAT EYES AND HYPNOSIS)

QUESTION:

A question from L.R., of Lazeer, Colorado. She writes: "I don't think this would be a personal question as much as it would be a health question. I have a nine year old grandson that was born with eyes that are flat on the back side instead of round. Consequently, he has no point of focus and is near-sighted. This was not discovered until he was about six years old. At present, he is wearing very thick glasses and the doctor says when his eyes are grown they will put in permanent contact lenses. My question is: What caused this condition, and is there anything he can do or take to help this condition while his eyes are young?"

COSMIC AWARENESS:

This Awareness indicates that this appears to be more of a karmic carryover than an actual physical accident; that essentially, the entity in forming his being *allowed* this to occur through a karmic memory and reaction to that memory; this having to do with a fear of seeing; that this relates into a time wherein this entity in a previous life experienced a shock far beyond his capacity to accept; that this in the area of Southeast Asia during the late fifties.

This Awareness suggests that there can be assistance given over a long period of time through certain sound treatments available through a doctor, a naturopathic doctor in Idaho, that information on this can be forthcoming at a later time, that this type of sound treatment can be beneficial in assisting this entity's development so that the eyes improve.

Under Hypnosis, Speak to the Cells

This Awareness indicates that hypnosis properly done, wherein the hypnotist speaks to the cells of the eyes after the entity is in deep hypnotic trance, suggesting to them that they align themselves in a curve, such as will allow the entity to see clearly as others see; this can be beneficial. This Awareness indicates in this situation however, the eyes and the cells will need to be directed in such a manner as to become aware of what is proper, for they presently consider their place and manner of being to be proper, and will need to be given a kind of programming so that they can understand what they should see, what it should look like, and what it requires of them.

Absent Healing by Visualization

This Awareness indicates that other than this, there also can be visualization healings directed by others to this entity so that they visualize these cells moving into proper place. This Awareness indicates that entities from a distance or nearby this entity can simply focus on the entity's name, that a picture would be helpful, but the name is sufficient; entities can visualize focusing on the name, visualizing the

eyes, the cells in the eyes moving into proper alignment so that the entity's vision is clear, and in that visualization, entities may watch this movement of these cells. This Awareness suggests this be visualized in bright or white light of a soft, cool color, and that once the vision is complete whereby the eyes are proper, this Awareness suggests that the entities so visualizing seal this image with a vibration, for the vibration carries the image into the universal plasma, or into Akasha, and this reaches the child.

This Awareness suggests the chanting of AUM, or Love, or even a humming at the time the visualization is complete, this will carry the image to these cells of this child. This Awareness suggests that this humming does not need to be aloud, but can simply be within the mind of an entity, but when done aloud is more effective. This Awareness indicates that even the visualization alone without the humming can have effect, but with a vibration to carry that vision or that image, the image is pronounced on more levels of the electromagnetic scale, so that it creates greater potentials for healing more quickly and for longer duration.

This Awareness indicates that the visual vibrations are of a higher frequency than the sonar vibrations, therefore the visual image fades more quickly, unless accompanied by the sound which is not as healing but is more sustaining of the healing energies; this serves as a carrier of the healing visual image, the sound itself is likened unto the spoken word. This Awareness indicates that a word stating you are healed can have some effect on a certain level, but does not have quite the sharp impact as the visualization of being healed; that the visualization accompanying the word has much greater impact as it is on a higher frequency and filters into other levels and the word carries that image into those various levels. This Awareness indicates that these two qualities, visualization and the vibration of sound accompanied by the will to heal, these three make up that energy necessary for distant or absent healing. This Awareness indicates that this distance can be a matter of two feet or two inches, or two thousand miles or more. This may also be a healing of one's self.

HOMER'S "CIMMERIA" HOW DID HE LEARN ABOUT IT?

QUESTION:

A question from A.M., Palm Beach, Florida. "In the CAC material the word 'Cimmeria' was mentioned, the realm of Cimmeria, the point of no return. In looking up the word in the dictionary, the closest I came to the word is 'Cimmeria' and its definition: 'A mythical place mentioned by Homer, where people lived in perpetual darkness, hence intensely dark and gloomy.' Can this be the same word as 'Cimmeria', and if so, how did Homer acquire this information?"

COSMIC AWARENESS:

This Awareness indicates this as the appropriate term; this spelling as Cimmera or 'eria'; there can be various spellings and changes in the pronunciation of this word at various times.

This Awareness indicates that the entity Homer, as one who received much insight, training and teaching from those ancient priests,--some of these coming from Egypt, from that known as the Oannes,--this from ancient writings and teachings from the early religion from which others have come. That this originally having been brought to this planet from outside, that this in relation to extraterrestrial and interdimensional beings, particularly to those known as the Els or Elders as having originated the basics of this religion; this as having been handed down from pre-Lemurian times through Lemuria down through Atlantis and Egypt, Chaldea, Judea, and to the times wherein there were secret schools which continued the flow of information from this religion. This Awareness indicates that Homer as one who studied from these ancient scripts and tablets and was informed on many of the mysteries.

(FOLLOW-UP QUESTION):

History tells us the entity was blind. Is this true?

COSMIC AWARENESS:

This Awareness indicates this appears to be true after a portion of his life; that the early part of his life, it appears the entity could see.

WISDOM OF AWARENESS: (On Philosophy):

This Awareness indicates that philosophy can lift an entity out of his quagmire, but philosophy can also lift an entity out of life, so that the entity never begins to really live because he is thinking about living.

REVELATIONS OF AWARENESS is a cosmic newsletter, published for the membership of Cosmic Awareness Communications, & the Universal Church of Awareness, P.O. Box 115, Olympia, Washington, 98507. Membership fees and donations are deductible from your federal income taxes.

INDIVIDUAL & FAMILY MEMBERSHIP: \$30 per year. CONTRIBUTING MEMBER: \$52; SPONSORING MEMBER: \$144; PATRON MEMBER: \$1000; ENDOWING MEMBER: \$5000. TITHING MEMBER: One who observes the Universal Law of Prosperity by honoring the Source of their spiritual inspiration by giving the first tenth of their income.
