COSMIC AWARENESS COMMUNICATIONS

P.O. Box 115, Olympia, Washington 98507

Helping People Become Aware

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

## GREAT CHANGES ARE COMING!

(Closing Message, CAC General Reading)  
May 28, 1988

### COSMIC AWARENESS:

This Awareness indicates that it appears for many entities that very little is being accomplished in terms of the changes that are necessary to bring about a more beautiful life on this plane; that many entities perceive so much corruption on this plane, they do not see that there are great changes taking place. This is especially so with those entities who are yet young, or who have had but a short time on this plane to view these changes.

This Awareness indicates that entities who have survived World War 2, who have lived in the 30's or before, these entities will see the changes that are occurring. They will see that there are things being brought out in regards to corruption that in the thirties were never known. They will see that there are concepts being presented in regard to information and technology and personal growth and development, that were beyond comprehension. They will see that there are greater problems in terms of society and its interaction with various cultures, individualities, such as those who involved themselves in conflicting lifestyles, detrimental lifestyles, value systems that clash with those things that once seemed so harmonious. They will see that there are these problems of a chaotic society, but at least they will understand that these things are out and visible, and that there are also great accomplishments that accompany these negative activities in society that parallel even while negativity is rampant; there are great things being accomplished, and there is tolerance that is being promoted.

This Awareness indicates entities who have lived in the thirties and through World War 2 will recognize that the great extremes of hostility between cultures, between races that was so prevalent in the early part of this century and is now being diminished through the various laws of society, concessions of groups, activities which include people from other religions, philosophies, races, nations; they will see that there is great change occurring.

This Awareness indicates that they will also find themselves becoming interested in other philosophies, other concepts, other cultures, other ideas. They will discover that their own mind is expanding at an ever-increasing rate, and that this was unheard of in the 30's, the 20's. This Awareness indicates that these entities will understand

this plane is changing rapidly. Great things are happening, even while difficulties are occurring. This Awareness indicates that entities in realizing this because they have seen many decades, do not feel so hopeless as might some who have lived only two or three decades and who see little change occurring from year to year.

This Awareness indicates that 15 years ago, 20 years ago, or 25 years ago, it was very difficult to find anything relating to metaphysics in a book store. It was difficult to find anything that allowed your mind to think along other than traditional thoughts of a very narrow nature. There were no computers for entities. Entities had no idea what a computer was. They had vague concepts. The computer as that which extended the workings of the mind. People may have understood a telescope which extended the ability of the eyes, but few understood that anything could take the place of the mind in doing mathematics.

This Awareness indicates that mechanics was the cutting edge, except for those very few who understood the potential and possibilities of something called the computer. Mechanics as that which seemed to be so important. This Awareness suggests that as entities look at things that are occurring today, at the great information flux, whereby entities can find almost anything they wish to find about almost any subject they wish to pursue without great expense, by going to a library or tapping into a computer data bank, it is something that entities in the 30's and 40's would be utterly amazed at, were they to have glimpsed this time period.

This Awareness indicates that in the 30's and 40's there was no television, there was only radio and newspaper. If you had such system today, you would understand the power and significance and influence that television has had on your plane in terms of altering, changing and giving information to the masses. This Awareness indicates that as entities become more and more aware of the great changes that are occurring, slowly, from year to year, month to month, week to week, whereby pictures of the foreign leader appear on your television in your own living room, to allow you to assess this person not as a name to be hated, or feared, but as a person with eyes, nose, ears, a face, that can smile, that can speak and whose

words can be heard and interpreted, and you see this entity is a being, a human being just as you, wearing a little suit.

This Awareness indicates that as entities see their enemy as a human with a face like a human, they begin to feel more comfortable, but if there were no such image or picture or sight of this entity, the tendency would be to look across the world and hate that entity, based on photographs, based on the name, based on words that are heard from someone else about the person. This Aware-

ness indicates that there are great changes occurring and that entities should realize you are on the brink of world peace. It is only a matter of time, whereby masses of entities will visit each other's countries, learn each other's languages, enjoy each other's company, and it is only a matter of time before entities of different philosophies will sit down to talk, to exchange ideas, to learn from each other. It is approaching the time when the lion lies down with the lamb.

## THE EMERGENCE OF THE NEW CONSCIOUSNESS — HUMANITY'S NEW DIRECTION

( Opening Message C.A.C. General Reading )  
February 2, 1988

### COSMIC AWARENESS:

This Awareness indicates there is seen a new beginning in the sense of energies in motion on this plane. This Awareness reminds you of an earlier reading which this Awareness gave in the early part of this decade, referring to the year of 1986 as being a deadline for the Dark Forces to wreck their havoc on this plane. This Awareness indicates that it has come and gone, and the havoc that has occurred has not been sufficient to do all that which was necessary for the Dark Forces to gain total control.

This Awareness indicates that in the coming years, regardless of many brief and uncertain disturbances, the tendencies on this plane are toward movements to Light. This Awareness indicates that it is now apparent to all who observe in a global sense, that democracy has begun a spread around the globe; democracy not being promoted by military might, but by the people in the countries and their demands for more freedom and choice in who is to govern; that this spread of democracy as that which will continue to grow during the coming years, not by the use of intrigue or military might, but by the will of the masses.

This Awareness indicates that also, the promotion of concepts of free thought, wherein entities are no longer prohibited to speak out and think, except along certain lines; that in terms of religious dogma, in terms of philosophical dogma, in terms of political dogma, there is much more dialogue in which concepts and ideas can be discussed without condemnation of parties taking a different approach. It is not uncommon for entities of different religions, different political viewpoints, or different national interests to sit down and talk to each other about their own interests and to explain and discuss the difference between their culture, their beliefs, their ideas.

#### The Melting of Humanity

This Awareness indicates that this dialogue between various cultures as a part of that process known as the melting of humanity. This melting

of humanity as that which not only tolerates and allows differences, but allows the differences to be recognized, acknowledged and accepted as part of the human condition, wherein entities do not need to force their beliefs on others, but whereby they allow each other to have their beliefs, and simply input more information, that they may make better choices, or may have more to choose from.

This Awareness indicates that this approach as that which allows concepts to merge and to spread and to grow, so that the Information Age becomes a reality. This Awareness indicates that in the past there has been the talk of the Age of Industry, or the Industrial Age. It is now considered an Information Age. This information age as that which allows entities to have access to information which in the past was limited to only a few, and even that information, which was allowed to only the privileged few, was meager in comparison to that which is available to entities now simply by walking into a supermarket and browsing through the library there.

This Awareness indicates there is more information in books at a supermarket even than was available to many entities 100 or 200 years ago. That as entities become more and more aware of the information available from booklets, and begin to browse through and accept differences in opinion, different kinds of concepts and ideas, the entity will become more opened and more aware and more selective in terms of what ideas are accepted in order to develop his or her own lifestyle. It is not that the entity needs to be sheltered from these various ideas in order to keep the entity programmed along a narrow way, but that the entity be introduced to all kinds of processes, thoughts concepts and ideas, so that the entity's consciousness, so that the entity's discernment can develop and grow and evolve in a manner that allows the entity to make proper choices based on the experience that has come from seeing such selections.

This Awareness indicates that if you had only the choice of one food in a supermarket, all entities would be the same in terms of their diet, but

as more and more selections are allowed, entities can pick and choose which diet that they want to have and in so doing, entities can gradually begin to learn which of the various types of diets is most beneficial for the human condition. It is the same with the food for thought or with thought as food. This Awareness indicates that as more and more entities browse through the supermarket of ideas, sharing information, sharing discoveries, there becomes more of an approach by entities to finding the proper ideas that allow them to have the greatest evolution, the greatest amount of growth in one lifetime.

This Awareness indicates as these ideas begin to melt among the masses, certain specific concepts are going to emerge as being universal and as solving the questions of life, and as these various concepts begin to emerge, a new science, a new religion will merge into one, and the science and religion will become one body of knowledge which will explain all the mysteries of life, and from that merging, that marriage of science and religion, not by enforcing science or religion on entities, but by the discovery of truth itself, wherein the absolute truth, being approached through scientific efforts, and the absolute truth being approached by spiritual seekers begins to merge into a marriage which then allows the masses to recognize an absoluteness about the reality of their own creation, and from that point on, energies will be devoted into the action of filling in details, filling in specifics of the general reality that has been accepted.

This Awareness indicates those who cling to the old paths, to the old ways, to the old concepts which are based, in many instances on dogma rather than on essential truths, will find themselves either having to be forced to change, or be totally out of step with reality. It is in this atmosphere of freedom, freedom of thought, that the New Consciousness will emerge, that the New Being will find itself.

This Awareness indicates the energies in motion are moving very quickly in this direction at this time, and by the turn of the century things will be well into a particular direction in which entities can see the movement of consciousness en masse, approaching that which is a concept of ultimate truth. This Awareness indicates that in looking back, many of the old truths, the old beliefs will be seen as symbolic, or as having been rudimentary, yet contributing to this greater vision, and many of the old beliefs will be seen as misunderstandings and will need to be placed aside for the greater truths to be allowed proper space.

This Awareness indicates that many of these old beliefs, old ways, will be seen as the birth pains of an evolving consciousness, wherein the greater evolution grows from the old ways and their decay. This Awareness indicates it is out of the ashes that the rose grows, and that rose of New Being often comes about in part at the death and decay of other concepts and ideas. It is not that one should

cast aside disrespectfully the old ways, the old ideas, the old methods, for they have their time and space in the scheme of things, but at this stage it is important to look forward, to constantly observe the horizons, to see which way the eye of truth is moving, and to pursue that direction which gives off the greater light.

This Awareness wishes to assist entities for a short time to be able to discern that greater light and to avoid those entrapments which still are placed, which still lie in wait for those who are not discerning. This Awareness indicates that it is not the purpose of this Awareness to promote *Itself*, it is not the purpose of this Awareness to promote *It's* own teachings; it is the purpose of this Awareness to provide information whereby entities can, for themselves, to their own satisfaction, find that greater truth, follow that greater light.

This Awareness indicates that in order to discern clearly that which is the greater truth as compared to that which is a lesser truth, the first discernment necessary is to decide whether or not the concept embraces an all-encompassing law or principle, or ties in with an all-encompassing law or principle that is universal in nature, for if it is only true in specific or partial or certain cases, then it is not universal in nature and is not divine, nor is it following absolute truth, or approaching the greater Light.

If it cannot serve to fit the entire scheme of things, the entire universe, then it is unlikely to have an all-encompassing universal value. For example, if a group decides that only the water from this particular well will save one's soul, such a group could perhaps garner a following of many entities in that location who will drink water from that well in order to save their souls, but that rule or that belief, being so limited to such a small area, could not possibly be a universal law or principle for saving souls. That likewise, any religion whose beliefs are so limited as to apply only to a location, a culture, or even to a planet itself, must come into question.

#### The Piscean Age--the Age of the Fish How Christianity Began

This Awareness indicates *It* wishes at this time to discuss briefly that which has served this past Piscean Age, the Age of the Fish as the prominent religion in the West, this being the Christian religion. This Awareness indicates that at the beginning of the Piscean Age, the Age of the Fish, there was that movement whereby, under Constantine, all of the fractured religions of Rome, and there were many, were in constant conflict with each other to the point wherein Rome was about to be torn apart by civil strife from the various religious sects. The Helios sect, which was a sun worshiping group in which the sun, at the center, was seen as God, and the twelve signs were seen as twelve disciples of God; and the Krisna group from India, in which Krishna came into the world to save man from his sins and was hanged, --this entity having

been born of a virgin; and there were those who were the followers of Tyana, who traveled around healing entities by his touch; and there were teachings by this entity; and there was that entity Jesus of Nazareth, whose followers saw him as the divine leader; and there were many more.

In all of these various religious factions there developed conflict: the Gnostics, the Jains, the various siddhus and different ones would come into conflict with each other and create great disturbances in Rome which became a threat to the government itself, to the peace in the city, to the order which had been established through its mighty military.

This Awareness indicates that Constantine then called for a gathering of these different factions and told all of the leaders to enter into a counsel and not to come out until they had unified all of the religions into one universal or catholic religion. This Awareness indicates the word 'catholic' means universal, and that universal or catholic religion would then be recognized by Rome as the official religion, otherwise, any religion not included would not be recognized by Rome.

This Awareness indicates that these entities then, most of these entities of the various religions, met and began to compare religions and began to merge concepts and ideas, began to work in an effort to unify into one catholic or universal religion. The various doctrines, writings, concepts and stories were brought together; these were discussed and studied for their universality and application that would allow them to serve and would represent the various factions.

This Awareness indicates from this emerged that which was the Christian religion, as it became known. This Awareness indicates however, a strange thing that happened, after the religion was assembled into a package which embraced the concepts, ideas, stories and information that satisfied all of those who gathered, the question was: What name shall we give this catholic religion? This Awareness indicates the greater majority at the time decided that the Godhead of the religion should be Zeus, but from the introduction of that, there came an outcry from a minority, saying: Zeus is a Greek god. Romans do not want Greek gods! This Awareness indicates that this then became an issue, and more and more of the leaders agreed: 'We should have a different name, a name that does not have any specific or past titles, or attachments to it.' They came upon the name which all of the philosophies had recognized, a name which had gone back in time for many centuries, back into antiquity, a title; that title that had always been used for all entities who were of high spiritual development; the title being the Christos. No one there objected to Christos, for Christos simply was a title for one who was with God. The word 'Christ' as the English version of the Roman Christos. This Awareness indicates that this entity and the stories that went with Christos needed also to be applied

in a personification, and thus, they took the name Jesus, for the name Jesus meant: neither he nor she. It was not personified as a polarized name. It was not a name that had any particular positive or negative to it.

The Meaning of the Name 'Jesus'

This Awareness indicates 'Jesus' as a name which meant non-polarity,--neither he nor she,--and Christos was a title. At that time, there were already entities in various countries; prior to that time, there were entities in various countries whose title: 'Christos,' was well known. There were also many entities using the name Yeshua, or Hesus (hay-soos), which are variations of the name Jesus; that Jesus was not the word chosen at this time; Jesus became the English version of the Latin term.

This Awareness indicates that Hesus Christos became the new religion, the title for the new catholic religion; that Hesus Christos then, evolved out of a merging of various religions. Stories evolved, and were brought in to that religion. It is not a historical reality, but a merging of various realities, stories and myths. This Awareness indicates there are many stories in the story of Jesus which can be found in prior writings from different cultures, different nations, that parallel precisely the stories of Jesus.

Clarifying the New Testament

This Awareness indicates entities may say: that this Awareness is attempting to destroy the truth of the New Testament. This Awareness indicates that in reality, *It* is attempting to clarify the truth of the New Testament. This Awareness indicates the New Testament as that which served its purpose, and its purpose was to serve as a guideline to influence masses during the Age of Pisces. This Awareness indicates whether a story is historically true, or whether it is a parable; either way it can have its influence.

This Awareness suggests that the entity Jesus spoke in parables, speaking of different stories in which a man, for example, planted seeds on rocky soil, and wherein some of the seeds dried up, but those seeds which were planted on good soil sprouted. This Awareness indicates that this was a parable, not a reality. It very well could have happened, and probably happened as long as there were people to spread seeds, but the entity was simply giving an example, for a lesson, for a purpose, for a concept, to help others understand something, and was not speaking historically; that this man which he spoke of was not a specific character he had in mind. He was speaking simply of a generic man, planting generic seeds on generic soil or generic rocks. If anyone had questioned: Where is this man who did this?, Jesus would have replied: 'I am speaking figuratively.'

This Awareness indicates that it was simply a metaphor, in order to make a point, in order to teach a lesson, to teach a principle. It had its value in that respect, it did not need to be historical in order to have its value. Likewise, the story of Jesus in the New Testament has its mythical value, has

its influence, has its power as a parable. The myths that have influenced humanity down through the ages are those forces which have guiding power to mold consciousness; these myths were used as a form of directive force to influence masses. Prior to this age, they were not intended to be recognized as historical, even at the time of the early Catholic beginnings, when Constantine brought about this movement and merger. Most entities of any education knew this was a mythical creation, to influence and program consciousness. It is likened unto a mind control, whereby entities hold onto these various myths as if they were realities, for the power and influence they have in bringing benefits to their lives.

#### Jehovah, the God of Abraham, Not of Creation

This Awareness indicates there has been information previously given that the entity Jehovah of the Old Testament was a lord commander of what may be termed, in your present day terminology, a commander of a star ship, or UFO. This entity as one who assisted the Hebrews in their efforts to escape from Egypt, using the powers of the UFO, (what you would now call the UFO). This Awareness indicates that this became the god of Abraham. It was not the God of creation mentioned in the first 13 verses of Genesis, but rather the god of the Hebrews. This entity was a powerful god. This entity exacted certain demands. This entity was one who carried out orders from those who were higher in an organization of what might be termed lords, in that group of beings who were known as the Jehovahs. This Awareness indicates there was more than one such entity flying more than one such ship.

This Awareness indicates that the Jehovah were involved in genetic engineering and created those two clone creatures known as Adam and Eve in a garden on Mars, and when things were not to his total satisfaction, he then promoted a movement of these entities to the earth and planted them East of Eden, or on earth, this in Africa, what is present day Africa. This Awareness indicates there were giants on the earth at that time, and the sons of Adam and Eve went into... This Awareness indicates as is recorded in the biblical verses, there was that action in which the daughters of those on earth wed with the offspring of Adam and Eve.

This Awareness indicates that from that time forward, for very many generations, the biblical records gave accounting of the movement of the genetic influence,--who begot who, who wed with who, the tribes that sprung forth, the tribes that came from Abraham. This Awareness indicates the children of Abraham broke into different directions and tribes were formed. The present day Moslems can date their ancestry back to Abraham. The tribes of many of these various cultures which are slowly beginning to melt together at this time were distinct family lines in the past, following down ancestral lines, and it is this ancestral purified lineage which has caused many of the prejudices regarding racial distinctions.

This Awareness indicates that indeed, there was a Jesus of Nazareth. The word 'Jesus' at that time was as common as the word 'John' is now. Indeed, this entity did have certain beneficial actions to many, and indeed, there were thousands, in fact tens of thousands of individuals who were crucified on the cross during that time. It was a favorite way of execution. This Awareness indicates there were also numerous efforts by various entities to follow and pattern after those secret school teachings; the parables or teachings that were taught in secret schools.

This Awareness indicates the entity Jesus of Nazareth did indeed ride into Jerusalem on a donkey, and was crucified. This Awareness indicates that this entity did indeed revive, or what may be termed 'resurrect,' in an etheric body and appear before disciples. This Awareness indicates this could happen and *has* happened since with others who witness the appearance of someone who has died. This Awareness indicates that the power of the action of Jesus of Nazareth was found in that he fulfilled the prophecy of Malachi and different ones who had been expected, the return of the messiah; only this entity, in his efforts, returned not in triumph as a great warrior and conqueror that many were expecting, but as a lowly and humble man riding upon a donkey, not in a great chariot, but with a small following.

This Awareness indicates that the children of Shem became the white race. This Awareness indicates that there is that mention of the lost tribe of Israel; this became that which is the red race. This Awareness indicates that throughout all of these times and the offsprings, there was an effort by the Jehovah, in their teachings and in their influences, to keep a certain lineage intact, because it was an experiment. This was a genetic experiment on this plane carried on by the Jehovah.

#### Jesus Comes to Alter Jehovah's Plan to Harvest the Jews

This Awareness indicates that the Jehovah, essentially, were the rulers of the earth plane during the previous Age of Aries; that the Age of Pisces, or that of the fisherman, wherein the lamb of David, the ram of Aries was replaced by the fisher of men. The Piscean Age then became one which did not destroy the law of Aries, but which fulfilled the law that began under Aries, but altered the plan of the Jehovah, where they were intending to come back and harvest certain entities of their genetic plan, and leave the others to destroy that which was left behind.

This Awareness indicates that the entity symbolizing the Piscean Age was that which promoted concepts of love and compassion as opposed to that Arien god, which symbolized power, jealousy and vengeance,--the God of Aries. This Awareness indicates that as entities move into that Age of Aquarius, the symbol is that of a man or an angel, pouring water. It is essentially the New Being pouring water. It has nothing to do with masculine or fem-

inine powers, although the Aquarian Age, if anything, is more feminine. It is essentially a neutral age, neither feminine nor masculine.

This Awareness indicates it is an age in which idealism is great; in which the idea of altruistic social expression is held in high esteem. It is an age in which knowledge is greatly valued. The key words for the Aries sign in astrological terms is: I AM, and it is said that the name Jehovah, or Yahweh, means: I AM THAT I AM. This Awareness indicates the key word for the Piscean Age is: I Believe. When you talk to Piscean entities they will often speak of what they believe, or they will say; the terminology: I believe such and such.

#### Common Traits of the Various Sun Signs

Speaking to Aries, is not uncommon, and quite common, for them to talk about what they are, who they are, what they've done. In talking to Taurians, it is common for them to talk about what they have, what they got, what they received. In speaking with Geminis, you will hear them using the phrase: 'I think,' In speaking with Cancer entities, you will hear them speaking of what they feel: 'I feel strange about this,' they will say, and they are concerned about what you're feeling; they will ask you: 'How are you feeling?', 'What do you feel about that?' This Awareness indicates in speaking with Leos, they will speak about directions and doing. This Awareness indicates that Virgoins will be involved in analyzing; Librans will be involved in seeing that things are balanced; Scorpios will be involved in what they want and what they are after and their desires; Sagittarians will often use the term: "I see"... and they will be looking to see what you see: "What do you see in this?" They will be probing to see the truth in something and they will speak of how they see it. Capricorns will talk about the usefulness of something. The key word is : I USE, and they will speak of how something can be beneficial or how it can be put to use. This Awareness indicates the Aquarian speaks of 'I know'. These are the true gnostics.

#### The Triune Self--"The Second Coming"

This Awareness indicates that during this Aquarian Age, entities will not speak so much of what they believe, they will speak more in terms of the experiences they have had and how they know from this reality that this is so. This Awareness indicates that in the movement through this Piscean Age, and the movement of that which has been the influence, the structure of Christianity as held together in the Piscean Age through all kinds of writings and books, through all types of enforcement, through threats of hell, through threats of excommunication, through the burning at the stake of heretics, through the imposition of the Christian religion onto the heathens through their military use; --all of these methods of structure of the Christian religion were designed on the grand plan in the higher sense, to hold together that philosophy of the Christ teaching, in order to reach a time when humanity had evolved high enough to accept the

7. spirit of Christ's teaching, so that at this time in this Aquarian Age, the second coming of the Christ could be for every individual, whereas in the past it was *one* Christ, it was *one* Jesus, now *each* individual can experience that which is the second coming, or the rapture of that Christ Light that comes to every individual so that every individual becomes Christed. This Awareness indicates that is the movement at this time in consciousness for humanity, that all entities become their own unified self, whereby the subconscious, the conscious and the super-conscious or that which is the Christ Conscious, becomes unified within the individual, and the entity, the individual becomes total, as a trinity, or triune self.

#### Humanity's New Direction--The Unifying of Individuality

This Awareness indicates that it is this movement which now is the direction and course and purpose in consciousness, and in understanding that this is humanity's new direction as opposed to the structuring of things; the new direction now is the unifying of things; the unifying of individuality into that which is the Father, or the Christ Light, the Son or the conscious mind, and the Holy Host or subconscious. In the unifying of this triune self, entities become total, become whole.

This Awareness indicates that in other philosophies there are also those trinities and these trinities are all representative of what psychology terms the subconscious, conscious and super-conscious. This is the animal self, the guest or human self in the body, the conscious mind; and the higher self, or that which is the Divine Nature, which has always been attuned to God, attuned to Universal Consciousness, has always represented the Christos, has always been a reflection or extension of the Christos.

#### The Christos Frequency

This Awareness indicates that when entities pray to Jesus, or pray to the Christos, they are praying to that Light, that Higher Self, which is universal in nature; it has always been there. This Awareness indicates it is that which is called *The Word*. In the beginning was the *Word*. It is that vibration of the Christos, that is the *Word*; and the *Word* was with God, and the *Word* Was God, and but for the *Word*, there was nothing that ever was created. All that *IS* is the extension of this Christos vibration. All matter is an extension of this Christos vibration, moving down from the highest vibration of consciousness in an ever-descending order; a slowing down of the vibration, step-by-step, until there is that very low frequency known as matter.

Between matter and the Christos, there is sound, heat, infra-red, visible light, ultra-violet, gamma rays, X-rays, and all of the various other cosmic rays and other rays,--many octaves of frequency,--all are reflections of that Christos frequency. That Christos frequency is consciousness in the highest sense. It is the God Consciousness. It is the Divine Light. It is that which is called the resonating electromagnetic energy. It is symbolized by the term OM, as a sound. It is vibration.

### What is Expected of the Aquarian Age

This Awareness indicates that it is the ultimate source, the truth, the beginning of that which creates the illusion known as reality from your conscious standpoint. Entering into that Christos consciousness, one realizes the only truth, the only reality, the only absolute, is being, is the ultimate consciousness Itself. The rest is but reflection of that ultimate being. This Awareness indicates that it is the purpose of the movement of energy on this plane at this time to awaken the masses to this new reality and it may take two thousand years to do so, but that is what is expected of the Aquarian Age. That is the purpose of the New Being, who awakens at this time, enraptured with the Christos descending into a merging of consciousness.

### The Real Meaning of 'The Rapture'

This Awareness indicates when one is raptured, one is not lifted up into the air with a figurative body of Jesus descending, for how could this entity do this to every individual on earth who is ready to rapture? This Awareness indicates it is a symbolic action in which the entity's consciousness is raised to merge with the Christos. The feet remain on the earth, except for those few who may levitate. This Awareness indicates it is truth, but it is expressed in a different way than that which appears literally in Biblical interpretation, and those many entities who are expecting the literal rapture will be waiting and waiting and waiting, and will continue waiting until they experience the real rapture, wherein their consciousness ascends to merge with the Christos, with the Christ Light of the Higher Self.

This Awareness suggests you may wish to ask questions in regard to this, or seek further information that may have been left out.

### WILL NON-CHRISTIAN COUNTRIES AND OTHERS NOW INVOLVED IN WARS ACHIEVE THE CHRISTOS STATE IN THE AGE OF PISCES?

(THE INFORMATION AGE HAS BEGUN)

### (FOLLOW-UP QUESTION):

I was wondering about what is going on in other parts of the world, which essentially is a religious holy war, for example, in the Muslim states, in the Middle East, and the tragic situation in India. Does Awareness see these forces changing and evolving more during the coming age into a Christos Consciousness rather than this Jehovah type consciousness that they're expressing now: An eye-for-an-eye and so forth?

### COSMIC AWARENESS:

This Awareness indicates that this as that which may be termed the laggard societies, or groups. This Awareness indicates there are many enlightened entities in these areas, but there are also many fragmented groups in these areas in which the evolution has been very slow in coming; that this retardation

of evolution may be considered as likened unto efforts of the Dark Forces to hold back the evolving Light Forces. This Awareness indicates that it is, perhaps to many, ironic, that the high technology which has developed from the need for more military power or to replace the income that came from the end of World War II military endeavors; it is ironic that this is that which is serving as the means by which information is allowing entities to awaken.

This Awareness indicates at the end of World War II, there was this great concern by the planners that because all of the factories would need to shut down, there was a necessity to create a new industry that would keep people busy, that would keep people occupied, and it was at this time that the early computers were being built. It was then decided that much funding and energy going into this kind of new electronic experimentation could create an industry that would take the place of the military industrial energies.

This Awareness indicates that gradually from this has evolved the copiers, printing facilities, and desk-top publishers and computers and other forms of networks, digital telephone systems and an array of other inventions that are contributing greatly to the information spread throughout the world. This Awareness indicates that this has barely begun; that within a matter of less than a decade there will be the ability to place, what some term 'the information of the world,' on top of a desk. This Awareness indicates the new storage equipment for computers will be able to hold so much information, or even without such storage devices, entities will be able to access through networking with computers any information anywhere in the world that has been placed into computers. It is this ability to access information that is creating the alteration in consciousness so that research can be done, so that printing and booklets can be released, so that ideas can spread.

This Awareness indicates in the time of Jesus there were very few entities who could read, fewer yet who knew what to read, or how to understand what they read. There were few entities who found an interesting or new revealing idea more than once or twice in their entire lifetime. Today, you can sit down for an hour and discover more than those entities could discover in a lifetime. This Awareness indicates entities in those days would need to go to secret schools and study for many years just to learn what you could find out in a magazine, just to learn a few concepts, just to learn what the word 'frequency' means, for they did have such words, so they spoke in parable, in symbol, saying: *In the beginning was the Word.*

This Awareness indicates in order to understand what was meant by that, entities would need to go to a secret school to find out what the word was, what it meant and what the implications were. This Awareness indicates that entities now, in discovering the meaning of the word can reread the Bible and discover many new things, for there are

great secrets locked in these teachings which the masses have not understood, thus the entity speaks and asks Jesus: 'Master, why do you speak to them in parables, but to us, you tell us other things?', to which he replies: 'It is for you to know these secrets, but not for them.'

This Awareness indicates this entity was taught the secret code, meanings, and the masses were left out and it has been thus for 2000 years; it is still so for most of the people on this plane, and especially those in the area of the world where, through the efforts to control by religion, entities are not allowed to meet, speak or merge with others outside their culture. If you were locked into one of these religious societies from time of birth and taught in a particular way, through threats and rewards, to accept only what they teach you, it would be a horrendous task to break free and to study a philosophy other than that which is acceptable in your society.

#### Hail! The Transistor Radio!

This Awareness indicates that if the societies change in these backward nations it will be because of the influence of television, radio, written information, printed information, geared to those who have the ability to receive, who have a television, who have a radio, or who have the ability to read. This Awareness indicates today, in countries such as Nigeria, these various countries, the great craving of these entities is to get a radio from the Western world, for it allows them to have something in their lives which is otherwise totally missing. This Awareness indicates the transistor radio is taking over the world in some areas, and in so doing, entities get information, and in receiving information, entities begin to discover, even when the information is controlled for a certain purpose, there is still some value, for as they become more and more use to gathering information, to receiving information, to knowing there is information out there, they begin to want more. This Awareness indicates the mind is never satisfied and will always want more, and the more it is given, the more it will want, and it is this hunger, this craving of the mind to discover that will create the motive for entities to want not just a transistor radio, but a television set, and there will be those who want to supply that television set, and when the television set is available, there will be those who come over to visit the entity who has a television set, and they will learn things, they will discover, and they will want their own television set.

This Awareness indicates those countries which are now where your country was in the early '50s, wanting radios, having radios, or just getting television sets; those entities in another 30 years will be approximately where you are now, with all the information that comes in to you through magazines, radios and television, and these entities' lives will be totally changed, in that they will have the ability to select, just as you now, from myriads of booklets, pamphlets and information. This Awareness indicates it is at that time, when all of the world becomes a world of information, that this planet

9. will emerge into its full bloom, that consciousness will become so evolved that it will see itself as having emerged from the dark night of its dream state, and at that time, the conscious mind, being saturated with information, in order to understand the information which has saturated it, will put forth a scream: 'How can I know which is right? How can I know which to choose? There is so much information!', and in that screaming of excessive input, a spark, a shorting of the rational mind occurs, and the entity flashes into the intuitive level of the Christ Consciousness and knows the truth, or knows from all that has been discovered, all that has been read, knows the reality without having to read further.

This Awareness indicates as the conscious mind becomes overstuffed, the entity suddenly must turn to the intuitive, to the Christ Consciousness, to the higher levels for truth. This Awareness indicates that science is gradually, in its materialistic efforts, studying physics, studying the black holes and the quasars, gradually coming to realize what metaphysicians have said for hundreds of years, and will discover parallels in their studies, so that eventually they too will say: 'As it is above, so it is below.' They too will speak of these energies of the White Light. They too will discover that the higher realms and frequencies are the location of consciousness. They too will see that there is a consciousness or frequency beside the individual as well as within the individual, and that the universe is a living being with consciousness emanating throughout, pocketed in clusters, here and there, creating stars, nebulae, galaxies, quasars, material and individual formations.

#### The Taurean Age

This Awareness indicates it is not that the old ways will be discarded, but that the old ways will be understood in a different light, from a different frame of reference. This Awareness indicates that these astrological ages need to be better understood; that in the Taurean Age, during that time of the bull, where the Mithra philosophy or religion began, or that which is the slaying of the bull at the end of that age, from whence came the bullfighting, and in that age of Taurus, from whence came the worship of cattle in the Hindu philosophy; that the Taurean age was ruled by the influence opposite on the zodiac wheel: the sign of Scorpio, which ruled the dead, which ruled transition from one life to another, in which transformations are the thing.

This Awareness indicates the Scorpio sign is said to rule death and sex, and rejuvenation and transformation. That during that Taurean Age, mummification was practiced, dealing with the dead, the priests working with the dead to transform them for their next life. In that age of the golden calf were the fertility gods of sex, and when that age came to an end, the Mithra philosophy, or slaying of the bull symbolized the end of the age, and then the energies went into that of the Arien Age, the Age of Aries, with Jehovah and its fiery god and its god of vengeance and wrath and jealousy and its military power, its

competitiveness, and the stories of the Old Testament of Jehovah are references to this.

The opposite age which ruled the Aries Age, the opposite sign is Libra; Libra as that which is the balance, the law, and the ruling force over the Aries Age, over the ram of David, and the slaying of the lamb on alters, the ruling force came out of the sign of Libra. It was the law: the ten commandments, and the ark of the covenant, a covenant or agreement; Libra rules law, agreements, partnerships, marriage, and these were the factors which had the greatest influence in that Age of Aries.

This Awareness indicates that as the Age of Aries passed, the slaying of the lamb on alters symbolized the end of that age, and the beginning of the Piscean Age, the sign of the fish, the Age beginning with the minister of love, as that which was not too unlike those early entities of the Aquarian Age, it was out of step with the previous age. They practiced in secret; they used the sign of the fish as a secret code to others, and in that secrecy they met, and the influence of the Piscean god spread.

This Awareness indicates the ruling sign opposite of Pisces is Virgo, and the power of Virgo expresses itself in analysis, in order, and its symbol is the virgin. This Awareness indicates that it is said the god of the Piscean Age was born of a virgin, and the priests who ruled the Age were called virgin priests; they were pledged to be virgin, and their influence was in analyzing and writing and attending to details and filing, the filing of information, the categorizing of information; the study and learning as that which was the influence from the Virgo aspect of the Piscean Age, and up until this century, all learning was from this form of the categorized, analytical, detailed, filing, library keeping aspect of Virgo.

This Awareness indicates that entering into the Aquarian Age, the opposite sign is Leo. Leo is said to rule the stage, marketing, packaging, demonstration, --a demonstration of a coffee pot in a supermarket is a Leo act. A demonstration on a street for a political purpose is a Leo action. A staging, or a presentation on television or in the movies, --any kind of costuming or packaging is an action of Leo, and if entities look carefully at this age, all of these things are the greatest influence in teaching entities. Where does the information you receive come from? It comes from movies and television and from demonstrations and staging and presentation and packaging, and the analysis, and the rational learning from reading and categorizing is taking a secondary position; that has become less of a factor, and the ruling factor has become that which is expressed through Leo.

#### Child-Abuse is Not Something New

This Awareness indicates that Leo rules children, and never before this century have entities cared so much for children, even though in the teaching of Christ the children were so highly

10. regarded. This Awareness indicates that in the focus on children there are those who deny them at this time, who abuse them, and yet this is not new. Child-abuse has always been present on this plane. Child-abuse has been expressed for thousands of years; even in the Old Testament, the great patriarchs were willing to present their child on the altar for sacrifice to their gods. This Awareness indicates it is not something new; it is only now being brought to the attention of the public, because the public does not like what is happening in terms of child-abuse. It is being put on the stage of consciousness so that entities will object and the children will have a greater chance to become the Divine Beings they expect to become if left to that opportunity, if not distorted by perverted consciousness.

#### Consciousness-Pollution Begins with Parents

This Awareness indicates if one simply gives the child a chance, the child will become a New Being, and teach great things. This Awareness indicates there is that which is consciousness pollution that distorts and disrupts the natural flow and evolution of consciousness, and it has always been with entities, and much consciousness pollution comes from the parents who themselves have received it from their parents, but much also comes from society; for once consciousness is polluted, it spreads its poison to others. This Awareness indicates that this is an issue that shall gradually become more and more important as entities begin to think in terms of purifying consciousness rather than polluting it with some kind of fearful act, or control force or coercion or other pollutant that disrupts the natural evolution of one's consciousness.

This Awareness indicates that as mankind moves more and more into outer space, which is part of the Aquarian Age; as this occurs, humanity will discover its home among the stars, and will think in a more global and a more universal manner. This Awareness indicates as this occurs, those little narrow viewpoints, the narrow thinking, will have no place in the world of reality. This is in sharp contrast to the last century, where entities who might think globally or universally would have had no place in the world of that reality.

#### The Mid 1990's Could be Heavy

This Awareness indicates that things indeed are changing. This Awareness indicates that this coming decade will see great intensities as the Dark Forces experience their death throes, trying desperately to create a last stand on this plane. This Awareness indicates that in the mid-part of the 1990's, there is considerable danger to humanity as these polarized energies attempt to regain power. This Awareness indicates the danger appears to be that which comes out of the Middle East. This Awareness indicates that the disarming of America, the disarming of Russia, as that which defuses the great dangers of the past, but which invites a new danger from the future. This Awareness suggests however, that

this future is never fixed, and that this danger which is seen may be altered by evolving consciousness through communication; that as time passes, opportunities present themselves each day, each month, each year, to alter the course of destiny, so that there can be an avoiding of things which presently are in movement.

## A MESSAGE FROM AWARENESS TO THOSE BEHIND THE IRON CURTAIN

(HOW THE CAC MEMBERSHIP CAN BE OF HELP)

### QUESTION:

Vikki received a letter from Barbara Rowinska, who lives in Poland. This entity wrote us several months ago stating she somehow found herself with a copy of the booklet we put out, *Cosmic Awareness Speaks*. How it found its way to Poland, an iron-curtain country, is a mystery. She says she belongs to what she calls 'a New Age' group of young people, and there's absolutely no reading material of that nature available, and she requested that if we send her some back issues, (which we did), she would share these with others. She says she can't pay to become a member of CAC because they can't get money out of Poland, but we did send her a packet of material and she's receiving the newsletters regularly now. I'll read her letter to Vikki, because there's a question in it.

She writes: "Dear Vicki T. From the materials received, which probably you sent to me, beings that it is you who answers reader's letters. Let me first of all thank you from the deepest of my heart for all the information and materials. Many best thanks also from my friends. We are very much grateful to you and all C.A.C. friends. There is plenty of information and practical explanations and suggestions. We do appreciate all the materials. It is of peakest importance for us here, for we have not good access to spiritual materials. I am personally very much interested because of my teacher's work in a secondary school--in problems of delivering children, educating them and preparing for the New Age. I found some materials amongst those sent by you devoted to these problems, and I was so happy about it.

"Has Cosmic Awareness mentioned or told anything about Poland or Eastern countries at any time? How could we best spread the spiritual messages here? Maybe Cosmic Awareness or you would have some suggestions for us. We hope you will be able to send us CAC regularly. It would be wonderful. Now let me close this letter. I am sending you and all Cosmic Awareness friends really best regards from Poland, from myself and

11. my friends. Stay in Light. Barbara."

### COSMIC AWARENESS:

This Awareness indicates that if this entity could in some way copy accurately information given by this Awareness into booklets or pamphlets in accordance to how she or her group, working together see the material as being valuable to others in their society; if she could take that information which she considers as valuable, and reprint the information and distribute this freely among those who are open and interested in reading the material, that this could be of great value to the people. This Awareness indicates that it should be copied very much the same as it is in its present form, in terms of the wording or meaning.

This Awareness indicates that there may be some differences in terms of translation into other languages, but the true meaning should be kept as close as possible to the original, even though the wording may be quite different. This Awareness indicates it is important that whoever translates has a good understanding of what is being said in the messages, so that distortions of meaning do not occur. This Awareness wishes that these entities, although not being able to send out money, that they do as much as possible, and keep CAC informed as to how they are doing.

### CAC Membership Can Help Those Behind the Iron Curtain

This Awareness indicates that at some later time, it might be possible for entities from the United States to help supplement the sending of messages from this Awareness to Poland so that the people could receive even more information and have more information to publish. This Awareness indicates that in the event publishing is too expensive for these entities, there may be some way to raise funds to send to them, so that they could have a degree of help or method or means by which to publish the information. This Awareness indicates that they will need to be selective, and choose those messages that are most valuable in terms of the needs of their people.

This Awareness indicates that the Aquarian Church can also assist in sending information to these people. This Awareness indicates that wherein there are those in Poland who have contacts in other countries behind the Iron Curtain who would like to receive further information; that these entities might send contact points or names of individuals so that they too could receive such information. This Awareness suggests there may in time become a support group in the United States that can help to send this information to these people who are so deprived of spiritual material, of New Age material behind the Iron Curtain. There is a kind of hunger by many of these entities for something that is lacking in their lives and whereby many of them know or sense a kind of spiritual essence and value, but need to have more input so that they can be assisted in finding the right definitions that can suit their needs.

This Awareness wishes to address these entities briefly. This Awareness indicates that *It* wishes to inform these entities in Poland that *It* does not ask you to worship this Awareness, for this Awareness is everywhere, throughout the universe, and *It* is within you also, nor does *It* need your worship in order to thrive and continue being *Itself*; but what this Awareness *does* wish is that you would learn to worship each other and that you learn to love each other, respecting your differences, respecting your individualities, and even respecting those whom you would disagree with.

This Awareness indicates that as entities become more tolerant of each other, and more loving of themselves, things begin to change, consciousness begins to change; consciousness is energy, and this conscious energy does have a way of moving from one individual to another, so that it spreads, even unto those who do not speak the same language. This is called vibration, and in this New Age, vibration has become a substance or reality that is connecting entities together into a common group, common form and common cause, wherein the entities rise in spirit together, and this movement of vibration is the spirit, the life force that inhabits the universe and creates all things that are.

This Awareness indicates that as you begin to feel the vibrations of one another, sense how each of you has a different feeling or vibration; as you become more sensitive to each other's vibrations, and as you begin to respect those vibrations for what they are, a new sense of unity and harmony will begin to emerge in your group, and this can spread to other. This Awareness indicates much of your culture has been for some time controlled in terms of physical oppression, in terms of economic oppression, but much of your culture allows for great freedom also, and much of the oppression you have felt is that which is also felt in other cultures. You are not alone; that many of the same kinds of oppression which your culture has felt is also felt in other cultures, even though they may not seem to be such on the surface. There are different ways whereby entities can be oppressed.

This Awareness indicates that *It* wishes you not to focus so much on the oppression, but to focus more on that kinship and that unity which entities feel toward one another when there is love amongst them. This Awareness indicates that the time shall come and is not far away, when all entities on this plane will begin to feel a greater and greater kinship toward one another. The polarizations and extremes of conflict will diminish as entities move more toward looking at their similarities. The great mediator which will help and which

is already helping entities around this world to forget their differences and become more harmonious with each other, is that medium of television, of radio, of the press, wherein entities are beginning to see with their own eyes, in their own living rooms, the face of those who have been their enemy, and they realize that indeed, they look just like us.

This Awareness indicates that when entities begin to realize there is really very little difference on the human level, many of the political differences, many of the political and economic problems between nations will also begin to diminish, and entities can then become friends as these differences of opinion, of political policy, of cultural differences begin to seem less important than the fact that here is another person, a stranger, who is very much like us. This Awareness wishes to encourage all entities to love one another, regardless of skin color, language, religion or nonreligion, regardless of nationality, ideals or politics, for all entities at heart are much the same. They have the same human needs, the same basic requirements for existence, for happiness, and for communication with one another.

\*\*\*

#### (Closing Message)

This Awareness indicates that as this New Age begins to come more into its own, entities from all cultures will begin to open their minds to new ideas, and in such opening truth will begin to appear out of science, out of religions of various types, out of cultures, out of fields of study, and entities will become surprised that these truths are all similar in nature. They will begin to realize that there is a reality that has its own uniqueness, which regardless of where one comes from, is equally true for all entities. It is likened unto entities who are climbing the mountain from all sides, each thinking they have the only path, when arriving at the summit, discover they have all taken different paths but arrive at the same reality, the same truth, the same point.

\*\*\*

ED's Note: We would like to suggest to the membership that those of you who have New Age type books and magazines that you are through reading, please don't throw them out, but package them up and mail them to Barbara at the address below. Label them "Gift".. "No Commercial Value"...and print "Books" on outside of package so they will then go by cheapest rate. Your postoffice will do this for you if you don't want to. As of November 1988, the following rates apply for shipping books to Europe: 1 lb. \$1.34; 2 lb. \$2.30, 3 lb. \$3.20, 4 lb. \$4.10, 5 lb. \$5.00, 6 lb. \$5.90.
