## the Physics of Consciousness

(PART 2) — THE INFORMATION-PROCESSING UNIVERSE

Copyright © 1989 by Cosmic Awareness Communications & the Aquarian Church of Universal Service.  
Reproduction is permitted, but no alterations may be made without express permission.

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

## WHY IT IS POSSIBLE TO TRANSCEND TIME AND SPACE AND EVEN DEATH ...MORE ON THE INFORMATION UNIVERSE AND THE DEVIL'S TRIANGLE

### QUESTION:

In the Weekly World News, March 28th, 1989, there's an article that I'm sure many people are going to send in to CAC to ask about, so I'm going to read it now. It concerns a man buried at sea in 1926, who was found alive in the Bermuda Triangle, and the story reads:

A 54-year-old yachtsman who died and was buried at sea in 1926 was found alive and well in the Devil's Triangle last month--on February 26!

Michel-Yves Gayan was frightened and disoriented when the crew of a Panamanian fishing vessel found him bobbing in a white canvas body bag 75 miles south of Bermuda.

He did know his name and seemed to have vivid recollections of his life, which ended when he died of cancer in a Bermuda hospital 63 years ago and began all over again last month.

"There is no doubt that the man is who he says he is because we have a death certificate, complete with fingerprints, to prove it," Dr. Harold Jensen, who examined the man in a Bermuda clinic, told reporters.

"Don't ask me to explain why or how this man came back to life. I have absolutely no explanation for it. Greater minds than mine are working to solve that mystery right now."

Documents on file in Bermuda confirm that Gayan, a Frenchman, moved to the island in 1918. He developed cancer in 1923 and asked to be buried at sea when he died.

His wish was carried out on March 24, 1926. The record clearly shows that Michel-Yves Gayan was wrapped in white canvas and tossed into the sea south of Bermuda, in the Devil's Triangle, on that date.

What happened to Gayan in the years that followed has yet to be determined. Judging from pictures taken before his death, it doesn't appear that he has aged. But in interviews with Dr. Jensen, the man was not always lucid and spoke in fits and starts.

He reportedly recalled a lengthy encounter with "glowing white angels." But it wasn't clear whether he was describing space aliens or people in heaven, Dr. Jensen said.

Panamanian fishing boat Capt. Gabriel Diaz added to the mystery by saying Gayan was disheveled and panicky when he was plucked from the sea.

"Gayan's first words were 'Where am I?' And he was very nervous," Capt. Diaz told reporters.

"When we asked him what he was doing in a body bag, he told us he was dead. He kept referring to the year 1926. And he told us about his life in France and Bermuda up to that date."

The fishing vessel took Gayan to Bermuda and turned him over to the authorities, who escorted him to Dr. Jensen's clinic.

He has since been jetted to the Zurich Psychiatric Institute, where Dr. Charles Greder is trying to find out what happened to Gayan after his death in 1926.

"The man has been through something that the human mind can hardly comprehend," said the expert. "He is having great difficulty coping with what happened to him and is not yet able to tell us everything he knows."

"When he does I am sure that we will hear things that will interest and possibly even benefit all mankind."

Dr. Greder says it could take months to learn all there is to know about Gayan. He expects to publish a full scientific report on the patient and incident in the Devil's Triangle by late summer or fall.

That's the end of the article. Would Awareness please comment on that story?

### COSMIC AWARENESS:

This Awareness indicates that *It* has previously given information relating to that area known as the Devil's Triangle and other similar areas on this plane as being likened unto gateways or doorways into other frequency levels. This Awareness indicates that again, entities may visualize a kind of spiral in terms of time, in which an entity might move around that spiral in order to reach a time in the distant future or distant past, but that there is also the alternate route of cutting through the spiral rather than following around the spiral to reach from one point to another.

This Awareness indicates that there are certain entities who have the capacity to move directly in a horizontal or vertical path, to cut through time and space and to return from future into past or vice versa; that this as based on a different form of physics than what is acceptable in the materialistic scientist's viewpoint of the universe. This Awareness indicates that *It* has been attempting to assist entities in realizing that the

universe is likened unto a dream occurring in a collective sense, in which all entities participate in the dream; that in understanding matter as dream-stuff, or that which is information rather than matter, entities can begin to comprehend how some of these unusual psychic phenomena or paranormal experiences can occur.

Is it not possible when you are dreaming to alter the dream and the physics of a dream if one becomes aware that in fact he or she is dreaming? Likewise, in the physics of your universe, if entities become collectively aware that it is a type of dream, a state of consciousness, that the reality which entities observe is only because they accept it as reality, that they can alter the reality by moving into a different state of mind or attitude toward the reality, then indeed they can affect that which appears to be fixed in terms of rules and principles such as the concept of time and space, and even death.

This Awareness indicates that when entities begin to better perceive that everything is associated with frequency and vibration of consciousness, they may then be able to perform these movements in consciousness that allow them to transcend time and space and even death. This Awareness indicates there are entities in existence within this universe who are capable of this kind of perception, and in so perceiving, have the capacity to use a different kind of physics than that which is known as materialistic physics.

**WHAT HAS THE ENTITY BEEN DOING THESE PAST 60 YEARS?**

(HOW ALL REALITY IS IMAGINATION)

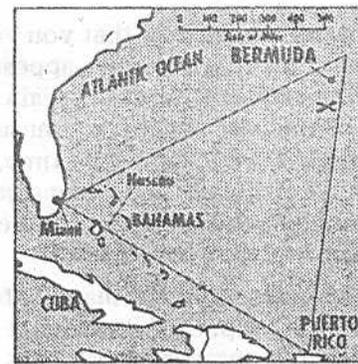

(Follow-Up Question):

Well, I don't understand how this man could be found 60 years later in the same body bag, floating around in the water. What had the entity been doing for the past 60 years?

**COSMIC AWARENESS:**

This Awareness indicates that the entity was simply transported out of time and space into another dimension. The entity was then transported into this dimension at a different time in the same area. This Awareness indicates the entity having been cured of his cancer condition and that which had caused the death. This Awareness indicates it is a phenomenon very difficult for entities to understand or grasp, but such things do happen. This is not the first, nor will it be the last. This Awareness indicates there are other strange phenomena that occur in that area, and in certain areas on this earth plane; that these cannot be understood in the sense of materialistic physics, but if entities recognize and understand the universe to be that which is mental, then it ceases to be impossible.

This Awareness indicates that even as this could occur in a fictional story, in a story based on imagination, you must realize that your entire existence and all that you call 'reality' is based on imagination. You came into being because of imagination. All that is

The Bermuda Triangle. X marks the spot where Mr. Gayan was found floating in water south of Bermuda.

is the imagination of the collective consciousness that makes up 'What Is,' and if the imagination is allowed to protrude outside of certain limitations, it can include unusual phenomena such as this, and if more and more entities become accustomed to such unusual phenomena, then indeed, the phenomena ceases to be unusual and it becomes fact-of-life, and when it becomes fact-of-life, entities will begin to look for the rules that govern such experiences, and will find understanding of the causes and the rules by becoming more open to discovering the kind of reality that accommodates or accounts for such phenomena to occur.

This Awareness has attempted to cut through some of the garbage which entities might bump into in their search for truth by informing entities that the universe is composed of information rather than matter, and that it is in constant process, processing the information in subdirectories, or subsystems, as well as in its total, or totality system; that the subsystems are but incomplete systems of information processing, the incompleteness as that which gives them their peculiar characteristics.

**What 'Reality' Really Is**

This Awareness indicates that your earth and your materialistic science and its laws of physics are but a subsystem that is incomplete in its information, and when more information is available, it can include the unexplainable phenomena that occurs, but so long as it does not wish to accept further information and rests strictly on materialistic principles, there will always be the unexplainable that must be ignored in order to preserve the physics based on materialism that masquerades under the guise of reality.

This Awareness indicates it is not reality, it is partial reality. Reality includes everything, even the unexplainable. This Awareness wishes entities glimpse briefly, a concept of a universe that is not progressing in terms of linear time, but whereby only the images change on the screen of time; the time screen being eternally fixed in the present, in the moment of 'now'. This Awareness suggests you visualize looking at a fixed screen which is called time, and you visualize images being projected upon that screen changing, remaining the same in some areas, so that duration dances on this screen of time in various images and patterns, some remaining fixed for long periods of duration, some fleetingly changing, and that the screen of time remains ever fixed, while the images are subject to change.

This Awareness suggests that you visualize on this ever-present now that an entity appears, then disappears, and then suddenly appears again on the screen from out of the past. What is so unusual about this? In the movies it occurs all of the time, but because entities think of time as following a path on the screen, rather than being the screen, entities cannot perceive how this kind of thing could occur.

This Awareness indicates that whatever rules the mind sets forth, as part of its game, it becomes boggled when the game transcends those rules. It has been said that you cannot have a full house with a royal flush. It is true that if you set forth certain rules to follow, principles, laws of physics that do not include other laws, other rules, other physics, and you try to understand everything that occurs by those few laws that you accept, then indeed, you will run into things that do not fit within your framework, and you either need to ignore them in order to keep your game intact, or you need to make alterations in your game and rules in order to accommodate the new experiences that have not previously been allowed in your game.

This Awareness suggests that if one wishes to understand total truth, one must always open up to the unexplainable, to find new understanding for that law or rule which would accommodate the unexplainable. This Awareness indicates that the new quantum physics is that which is becoming a doorway by which the unexplainable, the supernatural, the unusual experience can gain a kind of reputable status in its alliance with reality. This Awareness indicates that those who cling to the old materialistic physics will have to continue ignoring the unexplainable events in order to preserve the false doctrines represented by materialistic sciences.

#### Measuring the Stuff that Dreams are Made of

This Awareness indicates that it is likened unto an entity who is trying to be logical about the dreams, who is trying to analyze one's dream as though the dream were a materialistic state or place in which the entity had gone during the night in which the entity in the dreams is attempting to understand the fabric that makes the dream by doing chemical experiments within the dream, measuring the stuff that dreams are made of,—attempting to measure the weight, volume, mass, density of some object in a dream, and appearing from the findings to develop a kind of science surrounding the experience of the dream, attempting to create an infallible set of rules pertaining to the dream, only to find that all of a sudden the entity almost woke up and lost everything in an unexplainable situation which must either be ignored in order to preserve all the efforts of the principles discovered or theorized, or else the entity must formulate a totally new concept about the dream and its basis in reality.

This Awareness indicates this is what is occurring in your normal wakened state, which you call reality. It is but a collective dream in which everyone shares, but in which not everyone agrees as to What Is, and What Is Not. This Awareness indicates that more and more there are the unexplainables that are being brought

4. into the center of the stage to be looked at, and which science must either ignore or explain in some manner or at least question.

A photo of pipe-smoking Michel-Yves Guyon taken before his death.

#### HOW TO PRESENT A BOOK ON THE NEW PHYSICS (What Sam Millar is up to these days)

(Follow Up Question): Vikki:

Sam Millar has been working on a book; I think he completed it, that he has mentioned in passing, dealt in the area of quantum physics, and got into some real advanced concepts, and I know he sent it off to publishers and stuff, but I wonder, if because he doesn't have official academic papers, even if he's published a dramatic new theory that would apply to these new aspects of the dream, if anyone will ever get to see this material in print?

#### COSMIC AWARENESS:

This Awareness indicates it will depend on the way the entity wishes to approach or to present the material. It is not necessary that an entity needs to promote a book for the academic world in order to have the concepts and ideas presented to the people in general. This Awareness indicates that the entity could present it in a book aimed at the metaphysical world or at those involved in philosophy or religion without having any specific credentials in terms of academic credentials.

This Awareness indicates that if the information is presented properly, and aimed at a particular audience, it can become a good seller,—it can sell well to that audience. If however, the entity is attempting to present the information to the individuals who have academic credentials, they are very likely to ignore him, and the book publishers are not likely to bother printing the book. This Awareness indicates there is a certain snob appeal among entities who are certified in terms of credentials, wherein they do not care to hear the opinions of others outside their own group. This is one reason why Einstein had so much difficulty in getting his career started.

## WHERE WAS THE SPIRIT OF THE ENTITY DURING THE PAST 60 YEARS?

(AWARENESS TOPS THE STORY WITH REINCARNATION)

(Follow-Up Question): Avaton:

One final question in reference to this entity they found floating in the body bag in the Bermuda Triangle. Actually, two questions: Was he aware that 60 years had passed, and if he wasn't, where was his spirit? Was his spirit on some astral level going through some experience?

### COSMIC AWARENESS:

#### How an Entity Can Own More Than One Body

This Awareness indicates this entity appears to have been living in another dimension during that time; that the entity was experiencing a normal life-time in terms of that other dimension; normal in terms of the other dimension; that of course, the movement back into the present dimension in a different time as that which does not leave a memory of the other experience. This Awareness indicates that another interesting phenomenon similar to this as that in which an entity spent approximately 25 years in a coma in Australia; that this incident was also given in a report some time back; that the entity, lying in a coma, as remaining in that coma for several decades. It appears to be approximately 3 decades.

Meanwhile, the entity who was in the coma entered into the body of another being and was born in the United States, went to Britain, and in Great Britain, came across foul play and was murdered. This Awareness indicates at the same time the entity was killed, the entity lying in a coma in Australia, suddenly awakened with the memory of his inbetween life fresh in his mind, claiming that he had been in Great Britain and had been murdered. When investigators reported and researched this experience, they found evidence of the story as being correct. This Awareness indicates what has happened in such instance is that the entity in the coma, left his body in an out-of-body experience, and entered into the body of another, living a normal life in another body, while still having attachments to the comatose body.

#### How Information-Processing Creates Things

This Awareness indicates that bodies are likened unto vehicles; an entity can own one, or can own one and discard it and get another. In rare instances, an entity can have ownership of more than one body, as indicated, or in some instances, several entities can fight over the use of one body, even as an automobile can become the object of contention between entities who claim ownership.

This Awareness indicates that the body is not the soul, is not the being that inhabits the body, but it is created from the information being processed by the entity who inhabits the body, or by entities involved in attending to the body. This Awareness indicates that seeds are but small packets of information and are planted, and these seeds begin a processing that

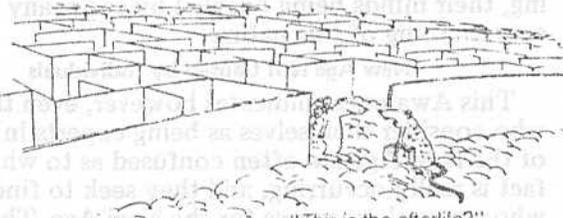

5. fulfills the purpose of the information packed within the seed. This is so in terms of plants, animals and other beings. Seeds are also in the form of concepts, and concepts are likewise compact information that begins to function and process itself to its fruition and fulfillment, according to whatever is placed within the seed or concept.

This Awareness indicates therefore, the concept or seed known as democracy for example, if planted here and there, and in sufficient places, begins to sprout, because of the processing that is inherent in its seed-form, and that processing brings forth some kind of fruition and growth, which throws out further seeds of democracy, which then again sprout if placed on fertile ground, and which then spreads further. There are some seeds that are more potent and more fulfilling than other seeds and they are encouraged. There are some seeds that are limiting and bring forth thorns and unpleasantness and after some time, they may be discouraged. It is the same with people, and therefore, those things which are most enjoyable, most pleasant, most beneficial, over long periods of time, receive the most encouragement and therefore evolve and remain and endure, and those things which create the most havoc, most pain, most suffering, over a long period of time, are discouraged, and therefore, begin to fade and dissolve.

They are weeded out of the screen of life and time. This Awareness indicates often, there are those who plant seeds that are called morning glories or some other name promising something of great delivery, but after being tried, are found to be poison, toxic or full of thorns, creating pain and agony. They may thrive awhile because of the promoter's promises, but it doesn't take long to realize that they are not producing what they promised to produce, and these seeds gradually are chopped out, trampled under foot, and fade; therefore, those things which are more harmonious, which are encouraged, are those things which in the end will endure. It is for this reason that good wins out in the end, even though in many cases good is trampled, good is the victim of thorns. There are often those forces that create suffering which harm the good, but in the end the good will win out, therefore, the seeds that carry goodness, the ideas and concepts that carry goodness, are those things that will, in the end, and over a period of time, grow and evolve and bring forth greater and greater benefits and joy to the reality which entities perceive.

"This is the afterlife?"

COMPOSER PRESENTS AN ORATORIO  
"I AM THE LIGHT" INSPIRED BY AWARENESS  
( "NEW AGE"--WHAT IT REALLY MEANS )

QUESTION:

One of our members, Georg Lawall, who lives in West Germany, wrote a letter to Vikki, which I thought was very interesting, and I'd like to ask Awareness if there's anything particularly significant about him releasing this at this time. He writes:

"I have composed an oratorio for soloists, choir and orchestra, 1-1/2 hours long that was inspired by Awareness. It's called: *I AM THE LIGHT*. The words are from the *Aquarian Gospel of Jesus the Christ*, The Bible, and Cosmic Awareness, with overtone singing, Indian instruments and so forth, besides the full orchestra. The first performances are the 25th and 26th of March, Easter. My compositions: *Divine Heritage* and *Between Heaven and Earth* will be performed in Tokyo in May, and we are going to organize a new music school that will open its gates in the fall, and lots of other things. I feel people are getting much more open for Aquarian ideas and ideals than they were ten years ago. That makes lots of things easier in terms of spiritual works. Greetings and love to everybody at C.A.C."

That's the excerpt from his letter I wanted to ask about. Is this particularly significant as far as introducing this type of consciousness through music? I mean *good* music, symphonic music like Georg has composed?

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative; that this as likened unto what may be termed a historical advent or historical event in the movement toward the New Age. This Awareness indicates that even as now New Wave or New Age music is becoming more acceptable, even talked about in terms of dollars and cents, and as having cornered much of the music market, this is a situation in which there is the ever-growing constant and steady evolution in consciousness and society of this new energy that is associated with the New Wave or New Age.

This Awareness indicates that even the churches are beginning to recognize this as something which cannot be ignored or pushed back; there are many of the churches now beginning to embrace certain concepts from the New Age moment; that these in reference to the traditional churches. This Awareness suggests that those which can embrace these new concepts are those churches which will best survive in the coming years. This Awareness indicates that many entities do not understand what the New Age is, and think it is just a passing fad, and think it is based on some kind of cultism, or some kind of weird phenomena of entities who are scattered in their thinking, their minds being boggled by too many drugs or something of this nature.

New Age Not Caused by Individuals

This Awareness indicates however, even those who consider themselves as being experts in terms of the New Age are often confused as to what in fact is really occurring, and they seek to find people who are spokespersons for the New Age. They seek

to find someone who is classed as a leader, only to find that there are no leaders. It is seen as a conspiracy without leaders. It is seen as a network, but no particular person is involved in creating the network, and it is frustrating because they do not know how to stop the movement. It continues to spread. This Awareness indicates it is because the movement is occurring in consciousness, not in individuals. It spreads to individuals, it is not caused by individuals.

Individuals here and there awaken to concepts and help to promote those concepts, and others awaken. This Awareness indicates there are many concepts that are in conflict with one another, and wherein one person representing the New Age says this, another says that, and the two may be in conflict with each other, and yet, there is still that movement that continues; even with all of the contradictions, it is the searching for truth that is occurring here, and even though there is not always a precise agreement on what truth it, the desire to discover truth is the impetus that moves entities toward the New Age.

This Awareness indicates that there are many who see this as a groping of the masses looking for something to value, looking for something that they lack in their lives, and they will be quick to point: "Look here! Look to this philosophy. This philosophy has all the answers! It has been around for thousands of years and has had the answers you seek. Why don't you look here?", and entities continue searching, continue looking for truth, and they may stop briefly, and look at this or that philosophy or religion that has been around for countless years, and they may stay with it, or they may move on.

Entities who are loyal to their particular religion, cannot understand why others do not accept it as being the only way. This Awareness indicates those who are involved in the New Age thinking, do not want to be bound by belief, they want to find truth, wherever it may be, and they are willing to look at all beliefs without being bound by those beliefs. They are willing to search in all directions. This Awareness indicates that it is important that entities in seeking to find truth not become too concerned with impressing others that they already know truth, for once an entity presumes to know the truth the entity ceases to become part of the New Wave, the New Age, the movement toward discovery.

#### The Universe an Information-Processing System

This Awareness indicates that *It* has attempted to direct and lead entities not toward a particular belief, not toward a particular mold, not to make entities think the same way, but to direct entities into looking out there with open consciousness to find more and more of that which is reality. This Awareness in recent times, is focusing entities' attention on the reality that the universe is but a processing system, an information processing system, that it is constantly processing information, and that information is often perceived as matter, so each atom is in itself processing information, and each molecule is processing information, and each substance is processing information,

and each individual organ, each thing, each entity, whether animal, human, bird, or whether angelic, gaseous, planetary, all things are in fact busy systems processing information, and all come under the universal processor, the great information processing system of the universe,—the Universal Mind, with all its subsystems, its thoughts, its ideas, its concepts, each processing certain information unique to itself; this in fact, is the New Age, the realization of a new reality.

This Awareness indicates that when any system is confronted with new information, it evolves to accommodate that new information. There is now approaching a time in which the masses will make a quantum leap in evolution when they realize that they are in fact not material, but are in fact information that is in the process of being moved about and influenced by other information in their environment. Every time you take a bite, every time you hear a word, you are absorbing new information, and that information has its effect on your system, and you process that information according to the way you have been programmed by previous information that you have absorbed.

\*\*\*

ED's Note: In reference to Georg Lawall and his oratorio I AM THE LIGHT (Ich bin das Licht), he sent us a cassette of much of the work, which was most enjoyable and impressive. Also a bunch of press reviews (all favorable), and word that his Tokyo presentation of the work was quite successful. I AM THE LIGHT is an oratoric meditation on Jesus the Christ, sung in German. Georg was good enough to write out an English translation of the words. I wrote and asked him what it would cost to airmail a cassette of the work to the U.S. in case members, upon reading the Awareness comment on the work, might wish to order a copy. You can get a professional recorded cassette in Dolby stereo for \$15.00 U.S. which includes airmail postage. Send international postal money order to: Georg Lawall

## DID THE 'CREATOR' CREATE AND PROGRAM 'GOD' FOR ALL ETERNITY?

( THE SEARCH FOR THE MEANING OF GOD )

### QUESTION:

N.L. in Wisconsin, was writing recently and she said an interesting thing. It wasn't set forth as a question but I'm going to ask it as a question. She says:

"In the writings I can see Awareness is covering every important fact, as *It* was programmed to do by the Creator. The Creator and God are not one and the same. The Creator created God and put him into the universe and programmed him for eternity." Would Awareness comment on that?

### COSMIC AWARENESS:

This Awareness indicates that each individual has their interpretation or definition of What Is. This Awareness indicates this entity as seeing the Creator as separate from whatever she envisions as God. Other entities see the Creator and God as the same. There are still others who see God as something that has been created out there as a personified being. Still others see God as a force that inhabits and fills the universe. This Awareness suggests that this force is the consciousness that

created the universe and which inhabits all of the creation as well.

This Awareness indicates however, there are still other gods. There are gods of different tribes, there are gods of different cultures, there are gods of different planets even; there are different gods in different religions; some religions having many different gods. The word 'god' itself is an offspring or offshoot of the Hebrew word YOD,—the Hebrew word YOD refers to that which is a seed. It is also considered as a sperm or the cause. This Awareness indicates that it did not in actuality refer to the Creator when used in the Hebrew word YOD, but to that force known as fire in the fire, earth, air, water combination.

The fire, earth, air, water combination as that which signified radiance for fire, air as being vibration, water being magnetism and earth being the combined stability created by these things, and this as also defined in modern terms as positive/negative, neutral and ground; that these four terms in the Hebrew language were YOD HEH

VOD HEH, or translated into Greek was Jehovah. This Awareness indicates that whether an entity wishes to use the word God to define Jehovah, or use the word YOD to define the primary masculine quality of the YOD HEH VOD HEH combination of fire, air, water, earth, or whether the entity just wants to mince words, argue words, and use terms as defined according to her own specialized vocabulary, will determine the accuracy of her statement.

If everyone can agree on the meaning of the word God, there is no discrepancy in how it is used, then it can be analyzed and discussed in a way that all can have some clarity from the discussion; however, if one person, in speaking of God means one thing, another means something else, and still another is referring to something entirely different, then all of the speech and talk in regard to the word God will have little meaning in terms of conversation that allows true communication.

This Awareness indicates this is also to be considered when thinking in terms of atheism; that most atheists will say they do not believe in God, but if you ask them to define what they mean by God, they either don't know what to say, or they give someone else's definition, or they define it as something that may not be what you speak of when you mean God, and they may in actuality have the same belief that you have if they could strip away the word God and simply talk about the creative force, the force which created things and which sustains things. This Awareness indicates that they may say: 'I do not believe in God,' and if you ask them: 'What do you mean by God?', they may describe some little old hairy man sitting on a cloud up there, watching everybody through binoculars.

This Awareness indicates that of course, there are others who do not believe in this hairy little man with binoculars, and therefore, they may be classed as atheists, even though they are strong believers in God. This Awareness indicates it is a question of what entities mean. Before you can make a stand on whether or not you believe in God, you have to define what you mean by the word, and very few people ever bother to define, they simply banter the word about and make their stand on the word, which they do not understand.

(FOLLOW-UP QUESTION):

So essentially it's a problem of semantics. Those who believe that God the Creator is one and the same, there is no other force or power beyond that particular God the Creator. Is that correct?

COSMIC AWARENESS:

This Awareness asks how could there be anything beyond that which created What Is? This Awareness indicates there are sub-gods or sub-causes which spring forth from that first creation and entities can call these gods. It is a question really of what entities want to talk about. If they are calling apples oranges, and oranges apples, and they are trying to communicate with each other and they have different names for the same fruit, there is going to be confusion. They first must learn to decide what they are speaking about in terms of their words, and make sure that each understands the terms the same.

IS AWARENESS THE SAME FORCE AS THE HOLY SPIRIT OF CHRISTIANITY, THE EX FORCE OF ECKANKAR, THE BUDDHIST LIGHT AND THE HOLY ACTIVE FORCE OF THE JEHOVAH'S WITNESSES?

QUESTION:

Along this same line, a question from E.B., of Hamilton, Ontario, who writes: "Can you please ask Awareness if *It* is the same force called Holy Ghost or Holy Spirit in Christianity, the X force or positive power in Eckankar, the Buddhist Light in oriental religions, and the Holy Active Force in the teachings of the Jehovah's Witnesses?"

COSMIC AWARENESS:

This Awareness suggests that each of these as using terms which encompass to some degree certain aspects of this Awareness and in some degree limit their meanings to exclude certain aspects of this Awareness. This Awareness indicates that *It* can best describe what *It* is in this manner: *It* is not limited to the messages which come through this Interpreter. This is but one mouth of this Awareness. *It* speaks through many forms, many ways. *It* speaks through actions. *It* speaks through expression of life force. *It* speaks through colors. *It* speaks through sounds. *It* speaks through feelings. *It* speaks through relationship. *It* speaks through actions. *It* speaks through love.

This Awareness is that full capacity of the dream which you call life, but *It* has other aspects of *Itself* in other dimensions which also express *Its* full capacity in that dimension, in those dimensions. This Awareness essentially is not just energy of the universe, although *It* is in the universe, *It* is energy within the universe; *It* is not just the matter and the forces in movement in the universe, although *It* is force and matter within the universe. *It* is also the consciousness that permeates and resides in all of these aforementioned things, including the colors, the sounds, the relationships.

This Awareness is everywhere present, within yourself, between your atoms; *It* makes up your kidneys, *It* makes up your actions, *It* follows and participates in your self-awareness. *It* is sometimes limited in *Its* involvement, when entities refuse to allow *It* to flow through them. *It* sometimes is shut out by entities who stand in the way of *Its* expression through them. Entities sometimes shut off this Awareness and assert their own personal will in a way that is not in harmony with this Awareness. This Awareness still remains attuned to those entities, awaiting for them to open the door, to allow *It* to flow through them, that they may be channels for this Awareness, in their actions, in their music, in their expression, in their way of seeing things, in their behavior, in their sharing of things.

COLOR BY TECHNICOLOR

This Awareness indicates that *It* does not limit *Itself* to the words which come through this Interpreter nor any other. *It* does not limit *Itself* in the actions of a saint or master. No one has an exclusive channel for this Awareness. *It* does not speak only through this person, or move only through that person, but moves through all entities who are open, and *It* expresses *Itself* in many different ways. *It* is the vibration, *It* is the word, *It* is the life force that was in the beginning, that was with God and Was God, and is still at the beginning of all things.

This Awareness indicates that *It* is a frequency, the ultimate frequency from which all other frequencies derive their vibrations. This Awareness suggests you not judge *It* or define *It* by things that have been said through this Interpreter or through any other source, but that you understand *It* as being the vibration or frequency that overrides all other frequencies, who derive their existences from this Awareness. This Awareness indicates there are many entities who would like to define this Awareness in order to categorize and put *It* in their mental box, for then they can say: "And this is Buddha, and this is Awareness and this is Jesus, and this is Ramtha, and this is that person!"

This Awareness indicates that *It* is not confined to any box, to any name, to any title, although these things may be used to express and to present and to convey vibrations and frequencies and messages from this Awareness. This Awareness indicates that entities sometimes cannot be satisfied that they understand something until they can confine it into a word or a box, a compartment in their mind. If they can compartmentalize, confine and box up the concept in a word or so, then they think they understand, and they can go around through the rest of their life saying the word 'Awareness' or saying the word 'God' without again having to attune to God, or attune to Awareness. They need no longer experience oneness with God or oneness with Awareness. They need no longer have the unity of being at one with the universe, because they can just talk about it. They had the words, they have the definitions. They have it in the mind rather than in the heart, rather than in the soul, and the mind is like a recording. They no longer need the live music of life, they have a recording, and they can point to the words describing the recording and play the recording or play the symbolic words. It is like the entities who numbered their jokes, then called out the numbers for their jokes, and enjoyed the laughter of each number.

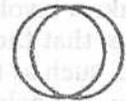

This Awareness indicates these substitutes are not the real thing, yet entities often want to define, to box up, to categorize, to name, to label, so as to quickly put it away and get on to the next things. This Awareness suggests you take time in your life to experience this Awareness under any name you choose, so long as *It* is that ultimate frequency of the universe. This Awareness indicates that the label, the name, the box fails miserably to convey what this Awareness is, but each of you has the ability to let go of self and attune to this frequency, this vibration that creates everything that is.

## HOW TO PROTECT YOURSELF AS WELL AS ENSURE YOU HAVE A FRUITFUL ENJOYABLE DAY-- EVERY DAY.

( Opening Message, C.A.C. General Reading )  
June 22, 1999

This Awareness suggests that when entities first awaken each morning, that they visualize the *Law of Love* emanating from themselves in a circular form, above themselves, and also that they see this expanding to encompass the home or property wherein they reside. This Awareness indicates that this action as that which can be of a protective nature and can allow one's day to be more fruitful. This Awareness suggests that this action, being a simple action, which takes but a moment, yet which, because of it being effected early and upon awakening, as that which can have an effect throughout the day.

This Awareness reminds you of the shape of the *Law of Love*, as being likened unto two crescent moons, in which the tips touch each other, forming a circle, one inside the other. This Awareness indicates that if you take your arms, while lying flat on your back, raising your arms above yourself, and move your arms in a downward motion towards your feet, back crossing each other up towards your head, you will find that your hands are forming the *Law of Love* symbol. This Awareness suggests this be done three times, forming a *Law of Love* circle three times above yourself while in a horizontal position, on your back.

This Awareness indicates that this as a way of starting your day off so that it will be fruitful, productive and harmonious; that this physical action will help the visualization in a kind of grounding action.

\*\*\*

ED's Note: For many years this editor has been making this *Law of Love* symbol while lying in bed at night, just before falling asleep, doing this three times. There may be no connection, but I always fall sound asleep quickly, never have bad dreams nor feel paranoia and often, upon awakening, feel that I have journeyed during the night to other realms, attended lectures in great halls of learning etc. Now, thanks to this message, I will also make the symbol three times upon awakening.

## WHEN YOUR ANIMAL DIES

### QUESTION:

A question from C.W., Canton, Ohio. She wants to know: Do animals go through the tunnel of death like people do? How long does it take for an animal spirit to vacate its body? Should one wait three days to bury it, like one does for a person?

### COSMIC AWARENESS:

This Awareness indicates this depends on the type of animal; that there are of course, different gradations in terms of soul development, and the more evolved the soul of an animal, the greater the experience in terms of the passing over; that this relates in part to the chakras involved with an animal. This Awareness indicates that those animals which are more highly evolved, such as the ones that exhibit greater intelligence: the cow, the dolphin and the dog and wolves, and animals of such nature, also the cat, tend to have this experience similar to that of humans, but to a lesser degree. Rather than the common experience of moving through a tunnel, they may move through an experience in which there is a sense of movement and a blinding light that may occur at the moment of the passing over.

This Awareness indicates that the animals do not generally have what would be termed a completely developed soul; the souls are simply in developing stages which may be more akin to what is called thought-forms or vital forms; that the energy surrounding an animal as that which does continue beyond the death of a body. It does not however, have a completion of its development in the sense that a human has; that there are of course, degrees and gradations in terms of human soul developments. There are many who do not have well developed souls in the human species, and some are barely above that of the more highly evolved animals.

This Awareness indicates that the movement of these energies has been described somewhat in the works of Percival, in his book *Thinking and Destiny*,\* wherein he describes the movement of certain energies from the human condition at the moment of death as dropping off to serve as thought-form energies that make up plants and animals energies, this referring in part to that concept of the vital force discarded by the human which then may be used by a plant or by an animal.

This Awareness indicates that essentially, the emotions discarded by humans help to feed plant life, and that the feelings and reactions or responses, that type of spiritual energy that is associated with humans is that which helps to feed or develop the vital energies of animals, when it is discarded at the moment of death, thus, an animal may exhibit a certain energy from a person who has lived before. It is for this reason that some entities believe their dog or cat has a specific personality and are almost human. They do, indeed, in many cases, have elements that were discarded by humans

10.

and their personalities are coming through those human energies and express in such a manner that some entities who are sensitive can feel the humanness within the animal.

This Awareness indicates that in the works of Percival, he further describes how these energies from the animal or the plant may return to the original owner of the energies when it is time for that entity to reincarnate. This Awareness indicates that this is not always the case, that these energies will return to the entity as described by Percival. He describes this as though it were likened unto a bell which rings and all of the parts which once made up this human entity rush back to the entity in order to partake in the reincarnation of that entity. This requires that the animal die, that the plants die.

This Awareness indicates that this is not always the case, although it is common; that there are many instances where the entity reincarnating does not desire or request or call those elements back to himself or herself, but allows them to continue on their own path and destiny. The entity may not want all of the emotions that he or she felt during a previous lifetime. That when this occurs, the entity may develop different sets of emotions in the new experience, and the animals then holding, or plants holding the emotions and feelings that once belonged to this entity, continue on their own course and develop as they choose.

## CAN ANIMALS EVOLVE INTO HUMAN BEINGS?

### (Follow-Up Question):

I believe Awareness indicated at one time that animals had the ability to evolve. It's one of the ways that they can evolve into human form, or eventually back to the Godhead, after many thousands, many millions of lifetimes.

### COSMIC AWARENESS:

This Awareness indicates that the animal consciousness tends to move not directly into what would be termed the human consciousness, but rather through the subconscious aspects of the human; the animal forms may grow and develop over periods of time until they reach a particular state of consciousness that participates in that which would perhaps be the subconscious of a human; that this subconscious then, over many eons of time may develop into a consciousness, as it becomes more and more aware of self, of its own consciousness.

This Awareness indicates that subconsciousness is essentially a vibration or frequency that is associated with the level of life that participates in certain frequencies in the environment to such a degree as to have knowledge of not only itself but of other things around, on the vibrational level. It does not necessarily have the ability to analyze. When it does develop such ability, it is approaching that which is termed consciousness.

This Awareness indicates that when consciousness, 11. in its evolution, develops to such a state that it becomes able to influence itself, to alter its own self, and to move or manage or manipulate the environment, it is essentially becoming close to that which is superconsciousness. As it moves toward that of the superconscious or higher conscious realms, it becomes more aware of the spirit energy rather than merely the subconscious and material energies.

This Awareness indicates that these things do tend to move in gradations, although there are what may be termed mutations, based on shock. The shock of an experience can force consciousness to mutate into a higher frequency. It is like jumping octaves in frequencies. This Awareness indicates that these movements into higher frequencies are not exactly like climbing a ladder and arriving at a new octave, for the shift often requires a substantial leap in terms of consciousness to reach that new octave or vibration, and often this leap is stimulated by some type of shock or circumstance or situation that compels the entity to move rather than allowing the entity to move.

#### *The Sexual Orgasm Changes One's Consciousness*

This Awareness indicates that the movement into higher frequencies is not generally from a desire, unless that desire is accompanied by some incident that shocks the entity into moving toward a higher expression and experience. This Awareness indicates that the sexual orgasm is of a similar allegorical form, whereby an octave of experience is the result, that certain energies tend to form as a kind of block, whereby it is difficult for these energies to move beyond where they are, and then suddenly, for some uncontrollable reason, the entity loses control of the effort, loses control of the situation and something occurs that controls the individual and moves the individual into a different state of consciousness.

#### *Christian 'Conversion' a Similar Experience*

This Awareness indicates that the conversion experience, spoken of in fundamental Christianity is similar in nature, wherein an entity who believes himself to be lost and destined for hell, who accepts the threat of eternal damnation, repents his ways and desires to be saved or forgiven and therefore, the entity in that repentance attempts to find salvation, the salvation does not come from the attempt but from the surrender of the self, and in that surrender, something occurs that strikes a chord of new experience and the entity is flooded with a sense of light and joy and bliss, and the entity then feels that he or she has been touched by something of a supreme nature. It is a shift in consciousness.

This Awareness indicates that similar experiences can also be found in certain psychiatric or psychological techniques, wherein an entity in counselling may be brought to a point of utter despair, as they try to hold onto their hostility toward someone or something, or their frustration and pain that they have lived by for years, and the psychiatrist or psychologist talks them through to the point where they are then able to face this again, and in so doing, they lose control of themselves, lose control of the aberration which they have held onto and are suddenly free from it, and find themselves unable to hold that fear, hostility,

or traumatic experience as anything of value to them. In giving this up they then feel great joy in replacement for the negative energies they once held.

This Awareness indicates that it is such that movement from one octave to another seldom comes in a rational level, but rather through experiential levels based on shock, or some kind of heavy intensification that oppresses the entity's consciousness, until the entity in desperation, surrenders to a higher intelligence or trustworthy person, deity or concept, and in that surrendering, the entity then shifts levels.

#### IS GOING THROUGH THE DEATH EXPERIENCE LIKE HAVING AN ORGASM?

(FOLLOW-UP QUESTION):

Awareness, is the orgasm mentioned, is that sort of like...will a person experience something like that in the passing over, going through the lights?

#### COSMIC AWARENESS:

When the entity is resisting death, that resistance builds up, and at a certain point the entity in great terror and fear and resistance may reach a condition in which the entity can no longer hold on to that which has been his life experience in the physical plane. The pressure, the effort to remain alive becomes too great, and the entity, though clinging to life to the last minute may at this particular time, feel themselves losing control, losing control and then, when that occurs, he leaps into the next experience and it becomes a blissful movement. It is through that surrender that the entity experiences the peace and bliss of the passing over. It is for this reason that the 8th House in astrology, the 8th sign of Scorpio, the octave, is referred to as the House of Sex, the Sign of Transmutation, and also the Sign of Death or House of Death, for it is here that the shock, the surrender and the new recreation into another level, another octave, another dimension occurs.

#### WHERE DO INTELLIGENT MAMMALS -- DOLPHINS, WHALES, GO AFTER DEATH?

(BUGS BUNNY AN EVOLVED RAT)

(FOLLOW-UP QUESTION):

I had a question related back to the animal question. Animals that have evolved through many lifetimes, I imagine get to be intelligent creatures like Awareness has indicated,--the dolphin and the whale and the elephant. Once these animals reach that state and they pass over, where do they go from there?

#### COSMIC AWARENESS:

This Awareness indicates they may experience a total mutation into another species; that, for example, when the rat has experienced ratness to its ultimate essence, the energy of the rat does a kind of transmuting, and the next species of its experience, after reincarnating, is that of the rabbit; the rabbit being a more highly evolved rat. In this manner, entities of various species or entities of various genetic orders will move from one species to another within their own general grouping.

This Awareness indicates that there can also come about that leaping from one genus to another so that when an entity reaches the height of a particular genus or grouping, it may leap into, for example, the primate levels and begin moving up the scale of monkeys until it reaches the height of development within that realm, and then moves into the human form. This may take many many lifetimes of development for this energy to become a soul of humankind.

This Awareness indicates that even as this is occurring in the evolutionary direction, entities must realize that there is also coming energy from above involving, as opposed to evolving, involving itself into matter, thus, the spirit comes down as the matter and the energies evolve upward and it is likened unto a marriage of spirit and soul type energies; the soul-like energies moving upward forming the soul as the spiritual energies move downward to meet the soul, and these energies then develop as yin and yang qualities so that the being then becomes a dualistic essence which entities often describe as the soul or the spirit, but which in fact is the marriage of the two.

This Awareness indicates that as this forms, it is what brings about the physical result, the male and female energies working together through the sperm and eggs, come together to form the physical outgrowth which itself is a dualistic essence of body and spirit or soul, and which may in fact be termed a Triune Self of spirit, soul and physical body. That it is this combination of frequencies from different levels that create the one total entity which may be perceived as an entity having three parts or four parts, depending on how it is observed.

This Awareness indicates the High Self, the middle self and low self being the superconscious, conscious and subconscious, or what may be termed the Father, Son, Holy Ghost, or the father, child and mother; the combination of these three inhabiting that which is the physical or fourth body. This is also equated to that which may be termed fire, air, water, moving from top down; air being conscious mind, fire being superconscious and water being subconscious and earth being the physical body. This Awareness indicates that these combinations forming the one, as related to four in one, correlates to that symbolism in numerology of the square which symbolizes the building and which symbolizes matter. This Awareness indicates of course, all things are relevant to the particular framework, and there is also the number 5 which relates these four elements to still another, which may be termed akasha, the breath of life; that this may be termed the Christ or Universal Energy that feeds those lesser energies.

This Awareness indicates that even this can have its extension through further numbering for all things are in some way connected to something else, and the numbers used in one's equation can be extended indefinitely as one relates the body, mind, spirit and breath of life to the environment, to the nation, to the society, to the family, to the molecules, to the atoms, to all of the interconnecting parts that make up the universe. This Awareness indicates that it is simply a matter of which level one wishes to accent and view. One can speak of the self and avoid having to name all of the parts that make up the self, or one can speak of the

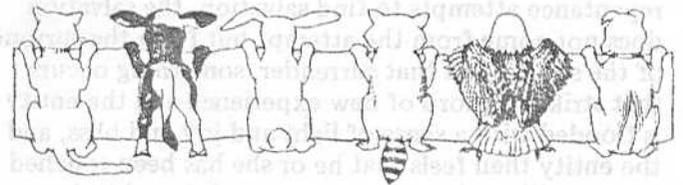

12. self and then proceed to describe all of those parts, to number those parts, and you have symbolic numbers or names representing each of the parts.

This Awareness indicates that the mind is always happy to have something to play with for its stimulation. It does not necessarily gain spiritually from its toying with numbers and names, but it enjoys being occupied for that it is the nature of the mind. It is the computer whose purpose is to compute. This Awareness indicates that all of these different descriptions and definitions of how the universe works, all of these are but exercises for the mind so that it can feel itself having a purpose. It does not mean that the mind which has exercised and labelled everything and has examined all of the relationships of one thing to another is any real asset to the soul and its development, anymore than is the mind of the child that has not yet learned to speak or has not yet learned of numbering or counting things, for the child sees all as it is, without words, without numbers but with clarity, without understanding relationships, but with the understanding of pain, pleasure, love, fear the basic things that begin to affect it. It is virgin territory; a mind without great pollution, of concepts, ideas, programmings or teachings. It is a pure mind.

This Awareness indicates that many entities feel that knowledge leads to salvation. This is not necessarily so, but knowledge can be helpful, or it can hinder entities in their search for salvation, depending on how one relies on knowledge, or what one does with knowledge. If the knowledge leads the entity back to that purity of the child and allows the entity to embrace the whole of life, embrace the highest and best, then that knowledge has served a spiritual purpose. If the knowledge leads the entity to separate, to judge, to cast out, to put oneself above others, to reject and to harm others, then that knowledge has not been for the good of the soul.

This Awareness indicates that in searching for understanding, it is most important to search also for the purity of heart, for the clarity of consciousness, for that innocence experienced as a child.

\*\*\*

#### WISDOM OF AWARENESS

##### ON ACCESSING AWARENESS:

"...each and every one of you has access to this Awareness, --wherein you move deep enough within yourself, laying aside judgement, hostility, frustration and move into yourself to find that pool of consciousness which emanates peace, tranquility, and love for all living things."

REVELATIONS OF AWARENESS is a cosmic newsletter, published for the membership of Cosmic Awareness Communications, & the Universal Church of Awareness, P.O. Box 115, Olympia, Washington, 98507. Membership fees and donations are deductible from your federal income taxes.

INDIVIDUAL & FAMILY MEMBERSHIP: \$30 per year. CONTRIBUTING MEMBER: \$52.  
SPONSORING MEMBER: \$144. PATRON MEMBER: \$1000. ENDOWING MEMBER: \$5000.  
TITHING MEMBER: One who observes the Universal Law of Prosperity by honoring the Source of their spiritual inspiration by giving the first tenth of their income.

ALL DONATIONS TO C.A.C. ARE USED TO SPREAD THE AWARENESS MESSAGES TO OTHERS.
