COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

ALL ABOUT PREDICTIONS: HOW THEY WORK, WHY SOME ARE ACCURATE, WHY SOME ARE NOT. AND WHAT ABOUT ALL THOSE COSMIC AWARENESS PREDICTIONS?

(C.A.C. General Reading)

April 28, 1989

QUESTION:

Awareness, we're here to begin a series of general questionings. Does Awareness have an opening message?

COSMIC AWARENESS:

This Awareness wishes entities to look at the idea of predictions with a greater understanding of how this works. This Awareness indicates that in the nature of prediction, there is the assumption that something will take place at a particular time in the future. This Awareness indicates that it is possible, under certain circumstances that a particular event from the future can be seen in the present to such a degree as to define or describe that event in clarity or in vague or unclear description, in whole or in part. Thus, one may speak in a kind of generalized vague riddle, such as did Nostradamus, in regard to some future event seen, or one may be more specific as in some of the Nostradamus predictions, even including words or names.

This Awareness indicates that the events of the future are in actuality information that has been presented by the collective consciousness from present time into that of the biocomputer or that which may be termed the information processor that is operating and which is in a different frequency than the one which is termed 'present,' this in terms of present time and present space. This Awareness indicates that each moment in present time and present space, entities are emitting certain energies that go into feeding the information processor or that which is the biosphere computer, the energy

field around the planet; this in reference to planet earth, in this particular discussion, although the same occurs on other planets; this biosphere which surrounds the earth as that which contains information that has been emitted from the collective minds of individuals.

This Awareness indicates that in previous discussions, this Awareness has suggested that the universe itself is a living being, a living mind, that it is conscious, and that entities in different levels of consciousness represent fragments or fragmentations of that Universal Mind, whereby their own consciousness is splintered off from Universal Consciousness and identified with portions or fragments of that Universal Consciousness, which are of particular interest to the individual. The individual can always expand his or her consciousness to embrace and include Universal Consciousness, but in so doing, the individual must give up the fragmented aspects of consciousness which he or she identifies as self, for how can one be identified as a sliver while still trying to identify as the entire mosaic?

This Awareness indicates that if consciousness is symbolized as a vase, then the fragmented consciousness would be a sliver or splinter of that vase, and it one sees oneself as a sliver or splinter, a part of Universal Consciousness, then the entity cannot comprehend the totality of the vase of the Universal Consciousness. Therefore, when one surrenders self to the highest, to the Universal Consciousness, then the entity gives up the concept of self, at least for the duration of the experience of Universality.

That likewise, the planet is but a small portion of the Universal Consciousness, and the biochemistry or biosphere computer which surrounds the earth, containing all of the thought-forms, and the collective ideas and consciousness of individuals and of the vegetation and of animals and insects which inhabit the planet earth; all living things inhabiting the planet earth,--these, in giving off their energies to the biosphere computer which makes up the consciousness of earth, along with the consciousness emitted from rocks and water and atmosphere and all of the minerals involved; all of this energy in combination creates the biosphere computer which surrounds the earth as a kind of invisible aura, a consciousness known as earth consciousness. This is following the presumption that the earth is a living being.

Remember Awareness in Your Will	16.

This Awareness indicates it is more than a presumption, but for many it is seen as a presumption. This Awareness presents it as an actuality. This Awareness suggests that every particle of earth matter, whether it be from the atomic level up through molecular structure to include minerals and organs and clumps of matter, or those growing living things that inhabit and surround and are placed upon the earth's surface or within its crust; all of these things, whether you speak of mountains, individuals, rocks, minerals, plants, insects, even the atmosphere surrounding the earth...all of these things are made up of tiny atoms and subatomic parts which in fact are energies that are in motion and are part of consciousness, part of the Universal Consciousness.

They are emanations of that Universal Consciousness, and as such, may be labeled as acting in the manner of an information processing device. This Awareness indicates that although it has many shapes, many forms, this consciousness processing information, whatever its shape or form, can be considered as a kind of device, although it is not man-made. It is made by nature. The atom itself is a device for processing information. All of the subatomic parts in their frequencies, vibrations and wave forms are also processing information.

This Awareness indicates that if you take this as given, and look carefully, seeing that all things are processing information, from the most minute particle in the universe, up to the universe itself, and you see that all of these parts in between are involved in the action of processing information; that the frequencies and vibrations are all part of this activity, it becomes reasonable that future and present have some kind of connection within that Universal Mind which is processing information, and that something which is presented in the present, fed into that information processor will have an effect on future events. Thus, present events help to influence future events and in turn, it is possible that present energies may glimpse future events, if the consciousness or information processing mechanism relating to that is active. This is called precognition, or knowing beforehand.

This Awareness indicates that if an entity sees something as coming in the future and makes a prediction relating to that future event and the event comes about, the effect is to label the activity as having been an accurate prediction. If, on the other hand, an entity sees something coming in the future, or perhaps guesses out of some logical possibility, that some event in the future might occur, and the event does not ever occur, the situation is referred to as a false prediction. This Awareness indicates the questions which entities may be concerned about in terms of predictions is how to make the predictions more accurate so that readings can be trusted, so that predictions can be measured and so that when one makes a prediction, it comes true.

This Awareness indicates that there are many entities who will read a prediction and because it is given in the context of a prediction they will automatically have faith that it will come about as predicted. There is a tendency for most entities to believe predictions will come about. There is also a tendency, because these entities want to believe in predictions being accurate,

to disregard those that do not come about. This is fortunate for those who are involved in the activities of prediction for most of their failures are quickly forgotten; their successes are generally pointed to with much applause and accolade.

Cosmic Awareness Predictions: How Do These Stand Up?

This Awareness indicates the same can be said for predictions made by this Awareness. There are times when this Awareness has given certain information as the likely scenario or outcome of certain events, but these events may not have occurred as suggested. For example, last fall, this Awareness suggested that there would be, during the springtime, a crisis, an economic crisis which could have further effects reflected in the fall. This Awareness indicates the crisis came and went without many people noticing. It simply occurred one day in which the stock market did a significant and dramatic movement, a decline, but then which was corrected quickly. This Awareness indicates that for many, as was previously stated, this was a disaster, but the publicity was not given for the masses to know of these disastrous events on the lives of those who lost, and the day passed, and life went on, and the masses continued to see in the month of March a relative stability on the economic scene in this country.

This Awareness indicates however, that was indeed a significant drop which in turn signaled a problem which may later again surface in the fall of this year. This Awareness indicates therefore, it is possible that predictions can occur in a manner that goes unnoticed or takes a form that is slightly off of what was earlier perceived by the entities hearing or reading of a prediction. In other words, there can be alterations in the degree of the actuality of, or outcome of a prediction. This Awareness indicates that the future is not fixed. Entities can see something that is in the future, based on influences and forces which are in motion at the present, acting in the information processing realm, whereby an event is seen clearly as going to occur at the time a prediction may be made expressing this concern.

This Awareness indicates that as an example of this Jeanne Dixon, many years ago, stated that China would become a democracy by 1980. Entities watching the news today will see that China is on the verge of becoming a democracy, but it is closer to 1990. This Awareness asks: was this entity's prediction in error, or was it not partially correct, only in error in regard to the time?

This Awareness indicates that the energies of the future can be influenced by energies that occur in the ever-moving present. As present energies move towards the future, the collective consciousness, which is inputting information into the biosphere computer, always carries the potential of altering a prediction, of altering that which was seen as an outcome so that a prediction may have been pre-ordained by the energies given at a certain time, but those energies being altered may also alter the outcome of that prediction so that it does not occur as scheduled, or to the same degree as previously perceived, or it may even be totally usurped and pushed aside by some other event which receives greater energy and attention in the new approaching moments of time by the collective consciousness.

Thus, an entity seeing the potential for some event may make the effort to energize a counter-action to that event, and perhaps even engage assistance from others who likewise energize for some different outcome, and the collective action of these entities may be sufficient to change the energy that was to have brought about the first event, so that a totally different outcome results. It is in this manner that prediction can be thwarted or altered by intent and can be changed by those who wish to change the future. It is a possibility.

Thus, it is dangerous for entities to make predictions with the assumption that they will be accurate, or with an audience assuming that the one who makes the prediction is bound by the prediction, or is to fail in his action of predicting, for failure in terms of prediction is always a strong possibility. It is quite important in fact, that anyone who is able to predict something also has a certain amount of power to alter that prediction so that it does not come about. It is also possible that other entities, hearing a prediction can alter the outcome so the prediction does not occur.

This Awareness indicates it does not mean that at the time the prediction was spoken that the energies in motion were not destined in the direction of bringing about that prediction. It means simply that when the prediction was spoken the energies in motion which were destined to bring about that prediction did not foresee the initiation of new energies which might interfere and block the outcome of the prediction, nor is it possible to always see the initiation of new actions, for these energies are not yet in motion. The initiated energies which would stop or interfere with something may not be in motion at the time when the prediction was made. This Awareness indicates for this reason, entities need to understand that even these things which are described as a scenario of events in the future which might come about, even on a large global scale, if sufficient energy is mounted to alter that outcome, these outcomes can be changed so that the prediction given do not occur. This Awareness indicates that much of what *It* has been giving forth during the past decade has been, in terms of predictions, has been designed to assist entities in defusing those predictions made in the *Book of Revelation*, regarding the antichrist and the tribulations which entities would need to pass through.

This Awareness indicates that by altering these predictions and the energies involved, it makes it possible for a smoother transition, a modified energy in the biosphere computer, so that the great suffering and tragedy as described in the *Book of Revelation* does not need to come about with such severity as has been given. This Awareness indicates that even those things which this Awareness has suggested as being on the horizon; the droughts, the shortages and the currency exchange, along with all of the maneuvering and potentials for crackdown of freedoms, even these things which are energized to a certain degree by the biosphere computer at this time, even these can be altered if sufficient attention is called to this area and if enough energy from individuals is sent into the information processing activity of the biosphere computer so that it can be altered and modified toward something which is more graceful and more easy to adjust to by the masses.

4. George Orwell's Predictions in his book: "1984"

This Awareness indicates that entities in looking back at the book *1984* from the year 1950, for example, could see that as we approach the year 1984, the technology was present that would have allowed the scenario given in the book to actually have taken place so that the book could have been a forewarning of things to come, and could have also been a prediction of things to come. As it turned out, there were sufficient number of entities still safeguarding freedoms and still concerned about individual rights and still working toward and using their individual freedoms so that it was not possible under the new biosphere computer, the collective consciousness, for the scenario presented in the book *1984* to actually fulfill its prophecy, if indeed it was a prophecy, thus, the book became more as that of a warning, rather than as a fulfilled prophecy and the warning may have been sufficient to help influence the energies away from such domination as was presented in the book. In other words, the warning itself may have been greatly helpful in preventing the book from fulfilling a prophecy or from the scenario described in the book from actually occurring.

The Self-Fulfilling Prophecy

Thus, there are those self-fulfilling prophecies and those prophecies which prevent the self-fulfillment. This Awareness indicates the self-fulfillment prophecy generally is that which promotes something in such a manner that everybody believes it, and therefore it comes about. For example, if an entity states: "I am planning to raise a certain amount of money in order to build a complex here which will benefit the city in a meaningful way, and this, I predict, will be completed within two years," and if the entity presents this enough times to the right people, and others add their voices, and their support, then the prophecy can very well be fulfilled within that period of time. It becomes likened unto a self-fulfilling prophecy which would not have occurred had the entity not said anything to begin with.

This Awareness indicates likewise, if the press were to start publications warning of depression, or runs on the bank, the masses would begin to respond by running down to the bank and pulling their money out, and in so doing, the depression would come and the banks would close. This would be an example of a self-fulfilling prophecy, wherein the event would not have occurred, had the prophecy not been made. This Awareness indicates that it is all a matter of suggestion. In some cases, suggestions are believed, and in other cases suggestions are not believed, but regardless of whether the suggestions are believed or not, a certain amount of energy goes into the biosphere computer and has its influence in terms of everything that is spoken by humans, in terms of everything that is experienced by animals and plants, so that the earth's biosphere is constantly processing information which works to adjust, to create and to implement a kind of natural balance based on the information that it receives.

For example, if one aspect of consciousness in this biosphere computer is seeking to tear down forests in order to raise money, the earth's biosphere will begin to balance that action against other potential concerns and information that is coming to it from the earth itself, from the weather, the atmosphere and from the

other masses of concerned entities, plants and animals, and all of those energies may take some kind of action eventually, in which there is a reaction to the cutting down of forests in such a manner that helps in some way to bring about a balancing. The question, of course, is whether or not there is enough reaction to this violation to prevent an aberration from occurring to the earth itself and to consciousness which is irreparable. *

* Examples: the raping and pillaging of the rain forests by corporate greed, financed and encouraged by the great international banking interests. Also, the disgusting desecration of the giant redwoods in the forests of northern California,--round the clock logging of these national treasures, many older than Jesus Christ, by corporate greedheads whose only excuse is that they have to pay the bankers "the interest on their junk bonds."
(Jesus H. Christ!)

This Awareness indicates if it becomes irreparable, and the earth for some reason cannot throw off the violation,--for example, the ozone layer becomes so weakened that it reaches a point of no return, and even if entities stopped cutting forests and tried to grow new ones, if perhaps the ozone layer could not reverse its diminishing process and began to shrivel up anyway, and the earth itself went through convulsions and died, and become a dead planet; the universe would deal then with that aberration, and seek to find a balancing action in some way whereby the energies of a dead earth could be somehow incorporated into the biosphere computer of the solar system so that a certain harmony eventually came even though the planet earth was no longer a living creature.

This Awareness indicates that throughout time and space there are those things which are living in a form that is of a very low vibration, which most entities refer to as being dead. There is a certain amount of life even in that which is considered dead. The rock itself has a certain amount of life. The atoms within the rock are moving. They are processing information, relating to their parts, their subatomic parts and to the rock and the molecules involved in the rock, so you cannot say that the rock is dead, you cannot say that there is a dead planet, except in a relative sense, relative to what entities perceive as a living planet.

The Book of Revelation Prediction & the Threat to Planet Earth

The living planet earth is threatened at this time, moreso than at any other time since man appeared on earth. This Awareness indicates that fortunately, there is also a growing awareness that this planet is being threatened, and it is possible that this awareness will begin to increase and grow, as entities begin to feed their awareness into that biosphere computer, the mind of the earth, the consciousness that surrounds the earth, that fills the space around earth, which in turn feeds information to entities who are open and receptive to higher insight.

This Awareness indicates that in this sense, while it can be predicted that the earth is destined to be destroyed as given in the *Book of Revelation*, the prediction may be altered by the increased awareness of individuals who feed new images and new future energies and predictions into that biosphere computer of the earth so that it does not need to be bound by a single prediction from 2000 years previous, so that it needs not be bound by those who are energizing those old predictions, but whereby entities can predict something new with greater voice, with louder

sounds, with more colorful tones and with the full confidence that they are capable of bringing about a healing to the planet earth, and that this planet earth healing will take place within this century, within the next decade, within the next two or three decades; that there is now time to move, to make these changes, and as more and more entities express this growing interest in making the changes to preserve the earth, it diminishes the power of the prediction in the *Book of Revelation*, that the earth will be destroyed at the end of this age.

A Glorious New Age is Coming Soon!

This Awareness indicates that it is quite possible, indeed at this time, it is seen as *probable* that the earth will be moved through a transition into a new and glorious age. This Awareness indicates that this could not have been said at the beginning of this decade, for the energies were not there. The energies at the time were pointing toward nuclear war and potential annihilation of life on this planet. This Awareness indicates that today there is a greater hope, a far greater hope and greater probability than has been seen in this century, that the earth will not only survive, but that the people will be altered toward peace-loving individuals.

Drug Problem Will be Healed in 3 Years

This Awareness indicates that it appears within approximately 2 to 3 years, the greatest problems facing humanity today, which is the drug problem, will also be healed. This Awareness indicates that the concept of Communism as a threat is that which is diminishing even as the value of the Communist doctrine is being scrapped in those countries which have promoted this concept, especially so in Russia. It will not be long, perhaps within this year, the the Communist party in Russia will be so fragmented that a new party will arise and have greater power and influence and that a two party system in that country, much like those two parties in this country, will become the new system of politics in Russia, with the Communist party vying here and there to gain control and the other party, for a period of time, having greater control so that much like the struggle between the Democratic and Republican parties, in Russia the Communist party will never be the same as it has been in the past.

This Awareness indicates that likewise, that which you see occurring in China is but the beginning of throwing off the power of the Communist rule, whereby it will not be long before this country too moves toward a democratic society, wherein entities have greater say, greater freedom, greater expression in terms of humanity, and the qualities associated with humanitarian expression. This Awareness indicates that even Cuba will be forced to change; that these things are occurring at such speed, that it will be a totally different world by the year 2000, and entities will look upon the events of this century with wonder that there could ever have been such great polarity, such extreme fanaticism.

This Awareness indicates that by the year 2000 entities will be able to freely move from country to country, moving, selling, buying, exchanging, and living in democratic lifestyles throughout most countries on earth. This Awareness indicates that area of the Middle East is that which will still hold some need for evolving; that there are still areas which are slow to change. This Awareness indicates that with all of these statements which this Awareness has just given, keep in mind that anything can be altered,

if energy is given by sufficient amounts of individuals with sufficient amount of energy to force the alteration, but this Awareness indicates from the energies available and those seen at this time in motion, in movement, these energies are quite strong in the direction of that which this Awareness has suggested; that greater freedoms are coming for all individuals on this plane; that the most troubled are as that of the Middle East, especially those Moslem countries.

This Awareness indicates that this too is seen as an action that may be altered within approximately 3 years. There is seen the slight murmurings of movement and energy flux which can alter much of that fanaticism within approximately 3 years, so that even these entities become more tolerant of others, so that their fanaticism diminishes and their presentation of their beliefs can be openly discussed with others in the world without the great sense of danger and threat from either side, and whereby individuals within those Moslem countries may begin to sense a greater value in terms of personal freedom which is promoted by and associated with greater tolerance for other ideas.

This Awareness indicates that when entities are intolerant of others' ideas and can only accept their own narrow beliefs, these entities cannot expect to have much freedom; that when entities begin to value and see the value of freedom, they automatically begin to allow others to have their freedom also and this leads to greater tolerance of others' ideas. Much of this kind of tolerance comes about only when different cultures merge and mix together in such a manner that entities have common goals other than making each other believe the way they believe, accept the thoughts they accept, worship exactly as they worship. When entities have other goals, they tend to tolerate each other in order to fulfill those goals, and in that toleration, they may allow others to believe differently, to have different loyalties than they have themselves, and this is what brings about greater freedoms for individuals.

Tolerance and freedom tend to go together. This Awareness indicates however, there is a limit to tolerance. One cannot tolerate fanatic behavior that denies liberty and freedom to others. When one seeks to violate another, that violation cannot be tolerated or freedom and liberty will suffer. This Awareness indicates that in general, the future looks bright. There are threats, there are dangers, there are potential quicksand experiences. There is potential for great economic struggle and strife. With increasing awareness as is now part of consciousness, these dangers can be minimized, if not altered altogether.

Prepare for the Worst & Work for the Highest

This Awareness indicates that entities in being prudent may prepare for the worst, and work toward the best, planning for the highest. By being prepared for the worst, entities can feel secure, regardless of what may occur. That security can give them the sense of confidence, that they can handle whatever may come, while at the same time it can provide a base for them to operate, to work for that which they see occurring in the future; thus, an entity in preparing for that which may be perceived as the worst event in the future, can be ready and can also spend more time and have greater

confidence and enthusiasm in putting energy into a healthy and harmonious future.

It is not prudent that entities should prepare for the worst, then close all the doors and wait for the worst to occur. It is better that they make their preparations, and then get out and try to bring about the highest and best, for all.

SAN FRANCISCO WILL DISAPPEAR IN ONE NIGHT? HOW LONG WILL THIS PREDICTION BE IN EFFECT ?

(THE EFFECTS OF THE AIDS EPIDEMIC)

(FOLLOW-UP QUESTION):

Awareness, in relation to predictions, the famous and most quoted prediction was by Edgar Cayce about the sinking of California, at least part of it, and this was verified later, or reinforced through a Ralph DUBY prediction, that in one night, within so many years, San Francisco would disappear. We understand about how consciousness affects the earth cells and so on, but my question is: Is this prediction, or part of it, going to continue being seen by future psychics and will this always be a threat.-for example, San Francisco disappearing one night, or does Awareness see a permanent ending to that threat?

COSMIC AWARENESS:

This Awareness does not see this as being a valid prediction at this time; that the energies have been altered sufficiently, that the modification of this prediction has been effected; that there can be, according to energies presently seen, a gradual breakoff or sinking of certain portions of California; these may also occur on a rather sudden level in terms of earthquakes, but it is not seen as such that in one night the city of San Francisco would be inundated by water, rather, it is seen as a potential; that a series of heavy earthquakes in the area could gradually cause a weakening of the earth strata so that it could be undulated over a period of time, this in terms of several years.

This Awareness indicates that the potential is there, even that potential is not seen as being highly charged. It is something that could become highly charged and occur as a result of those highly charged energies; that much has to do with the consciousness levels involved in those areas and in the biosphere computer. It does not appear at this time that this needs to occur on a

physical level. It appears rather that the energies have shifted into a kind of socialized earthquake and appears that this is somehow related to the AIDS epidemic; that this is not seen as being clear enough to define further at this time, but it does appear that somehow the AIDS epidemic has siphoned off much of the energy that would have been feeding into the earthquake prophecy.

HOMOSEXUAL ENERGIES AND THEIR RELATION TO EARTHQUAKES

(FOLLOW-UP QUESTION):

Yes, I was just going to ask that question. San Francisco, for some reason, has a very large homosexual population and I was just wondering if that would have a positive or negative effect, or no effect on the earth cells around that area?

COSMIC AWARENESS:

This Awareness indicates it has a negative effect, in that the polarization of male/male energies as that which creates in the biosphere computer, the consciousness of the area, that buildup of psychic energy that is of such charge that this could have had an influence in terms of the earth's cellular energies itself, and it appears that certain changes that have occurred have weakened this energy; that for one thing, even the more monogamous approaches in these male/male relationships have been more helpful to this kind of energy.

This Awareness indicates that consciousness affects the cells of the earth, the matter, because matter itself is consciousness, and the minds and consciousness of individuals being on a very high frequency level filters into those areas of lower frequency level to have an effect. Understanding this, entities may grasp more clearly the principle of mind influencing matter.

WOULD GROUP MEDITATION END THE THREAT OF THE "BIG ONE"?

(FOLLOW-UP QUESTION):

Awareness once indicated, (I believe it was through the Interpreter David Worcester), when asked a question about the earthquake in California,--that "big one" that they keep predicting and are still talking about,--at that time had been altered by two entities who were living in a cabin on the fault-line near Bakersfield, I believe it was, and were doing meditations on that area; whether intentionally or unintentionally for that purpose, these meditations were able to take the energies of the "big one" out in periodic amounts, out into the ocean where it was released in small earthquakes that did no damage. Now, taking that a bit further, would it be possible if two people could prevent that "big one" scheduled for that particular time, if enough awareness of how this worked was put out to entities, that a whole organized group of Californians in various parts of the state could do meditations periodically,--would this end the threat?

COSMIC AWARENESS:

This Awareness indicates that the energies build up and the energies subside in regard to those energies which could bring about earthquakes. In some instances, when the energies build up there is a slippage, and that slippage as that which releases great amounts of energies. In other instances, energies build up and the people themselves feel those energies to such a degree that they express certain kinds of emotional outlet, and in so doing, release much of the energy that would have otherwise contributed to earthquakes.

This Awareness indicates that in terms of meditation and releasing of these energies, the value in this lies only if the entity can open consciousness to the point of allowing those heavy psychic energies to go through the entity, as though the entity had a hole in the top of his or her head, and the energies of the earth could go from earth up through the entity and out into the atmosphere, and the entity in so doing, would feel this energy rushing through and out the top of the entity's head. Such an entity would need to be open in terms of chakras, or the entity would develop terrible headaches.

How Transcendental Meditation (TM) Works

This Awareness indicates that it is possible for entities to channel and release those negative energies from the earth which are building up for earthquake or from building up for discharge through emotions; that one entity can discharge through their own meditations sufficient amounts of energy as might otherwise be chaotic in a city. This has been demonstrated by those involved in transcendental meditation wherein they would enter into meditation in a city at certain times and the crime rate would diminish during those times when they would be meditating. This Awareness indicates it is because these entities were siphoning off or transmuting the negative energies of the city. They served as a kind of smokestack, wherein instead of smoke going through them, they channeled the negative energies up through their spine and out through the top of their head, into the atmosphere, transmuting these energies into higher frequencies.

Emotion Earthquakes & the Value of Parades

This Awareness indicates that indeed, it is possible for entities in meditation to help defuse earthquakes in terms of physical earthquakes, and emotion quakes in terms of

social type earthquake events. This Awareness indicates that the social earthquake as that which erupts generally in some kind of violence; a murder, a riot or some great violent action that occurs to individuals, even in some cases through accidental crises. This Awareness indicates that other forms of releasing such energy occurs in activities such as sports, and parades, wherein great crowds gather to observe, to cheer, to let off their emotions. This Awareness indicates that these may be called catharsis, wherein entities who build up, lock up energies within their body, holding these energies of frustration, have a way of letting out those frustrated energies.

This Awareness indicates that the rock festivals, music festivals, movies, entertainment, sports, activities and parades; anything of this nature, as that which releases much of the pent-up anger and energy which might otherwise erupt in some form of social violence, or if not in social violence, which would affect the structure and cellular levels of the earth itself to bring about tension in those plates, which might, if built strong enough, cause an earthquake type of eruption.

NEGATIVE PREDICTIONS: ARE THESE MERELY "PROJECTED PARANOIA"?

(THE "TRA-LA TRA-LA" ATTITUDE)

FOLLOW-UP QUESTION:

In reference to predictions again, we recently were at a conference of Awareness fans and other entities, and some of the information we put out on the vanishing farm and the possible food shortages coming up was dismissed by one entity as "projected paranoia." Now, I have seen in a lot of predictions, printed by entities like Veronica Leuken, whom Awareness has discussed, that a lot of their stuff is indeed projected paranoia (to put it mildly), but I was wondering, in the area of prediction, what percentage of predicted information, negative information particularly, could actually be considered as projected paranoia, which would probably mean that the channel is somehow influencing the information?

COSMIC AWARENESS:

This Awareness indicates that this is difficult, in terms of the question being asked, for a percentage of projected paranoia through channeling, because the channeling as not defined in regard to who is a channel, and in what form of channeling is being

referred to. This Awareness indicates *It* sees all entities as channels, and there are many who are paranoid and who see a gloomy future. There are also many who, as has been described, live with the 'tra-la tra-la' attitude and fail to see reality sneaking up behind them. This Awareness indicates it has also been said that just because you are not paranoid, doesn't mean they are *not* out to get you, and this too carries a ring of truth. This Awareness indicates that paranoia has been defined as unfounded fear. When an entity says something is paranoia, often they simply mean: "It's frightening to me, and I don't want to hear about it." They confuse the word *paranoia* with the word "fear," or "dread," when in fact, there are two types of fear. There are those fears that are unfounded, and there are those fears which may be legitimate. There's also a number of degrees in between these two. This Awareness indicates that one can have some unfounded fear that has a certain amount of basis of truth but cannot be proven. There are those areas of fear, which when looked at carefully, can be a probability, a good likelihood, a certain percentage.

Is it unfounded fear if 2% of the people who go out into a particular neighborhood are accosted and an entity is afraid to go into that area? Is it unfounded because there are only 2% who get accosted? This Awareness indicates that if the entity says: "I don't want to go out there," another might say: "You're paranoid!" But what if that 2% is 5% or 20%? Where does the concept of paranoia, legitimate paranoia, and genuine fear begin? It is a matter of degree. It is a matter of subjective degree. One person may say that because you are 20% in danger and are afraid to go out, you are paranoid, but then, if your chances are 1 in 4 of being mugged, you have a legitimate fear.

This Awareness indicates it is all a matter of subjectivity; which is paranoia, which is legitimate fear. It depends on the individual. For the individual who said it was paranoia, perhaps this entity sees this as unfounded, because for one thing, perhaps he does not know facts that were known by others. Perhaps he has not investigated the area at all. Perhaps he is simply throwing out a term to prevent himself from having to look at this area, from having to learn about these facts, or from having to deal with anything that might trouble himself or others.

This Awareness indicates that when there are unfounded fears, the definition of paranoia, then the entity is seen as being unreasonably afraid. This Awareness suggests that it all comes down to the question of whether these predictions were unfounded. If an entity sees the information as paranoia as unfounded fears, but has not taken the time to investigate, has not taken the time to look to see if there is any foundation for the prediction, any foundation for the fears, any foundation for the possibility that there would be farm closures, or that there would be a diminishing of food supplies; if the entity has not checked this out, then indeed, the entity is operating on the 'tra-la tra-la' approach to life.

This Awareness indicates that when an entity accuses someone of paranoia, it is rightful that the entity be asked: What information do you have as evidence that there will not be a food shortage?, or How do you know

9
that these predictions are paranoia? This Awareness indicates that these questions may be asked of an individual to find out on what basis the individual stands or operates from. If it is subjective belief because the entity operates from the 'tra-la tra-la' approach to life, then it is good that entities understand that, and if it is based on some research the entity has done, wherein the entity has investigated potential weather patterns for the coming year and sees, and knows that there are food supplies stored in graineries and in various parts of the country sufficient to last and to supply the needs of the people; if the entity has done research in this area, then the entity may have some basis for saying that it is paranoia behind the prediction of potential food shortages.

If the entity simply says it is all paranoia because every year there is enough food, there has been enough food in the past, there will continue to be enough food in the future because there has been enough food in the past, then the entity is also operating from the known, normal standard of behavior or assessment, but may not be aware of alterations of the norm, which need investigation, and that too would be valuable to know where the entity is receiving his or her information.

This Awareness indicates that the majority of entities do not bother to investigate or to research or to look deeply at things. They prefer, rather, to throw out an opinion and make it sound 'solid,' and the majority of entities hearing such opinions don't like to challenge someone who makes their opinions sound solid. The majority of entities maybe disagree but they aren't going to say anything, or maybe they don't know and they aren't going to say anything. Maybe they don't want to question and look stupid, so they don't say anything, and therefore, the entity who throws out a statement as fact, and gives the statement as though it were absolute, unquestionable, gets by, and generally gets by without too many challenges.

The 'Tra-La Tra-La' Approach to Life

This Awareness suggests however, that when it is serious to entities, they do need to look, question and discover whatever evidence they can find to substantiate or discredit the information which is of concern to them. If they are truly open-minded, they will look at both sides and search out those areas and arguments for both sides so they can have a better grasp and understanding of the situation that concerns them. If they are not very concerned, they may be just as well off to take the word of the individual who says, "Don't worry. Be Happy. Everything will work out fine!" This Awareness indicates that such an approach to life,--the 'tra-la tra-la' approach, works fine for entities, until they bump into the wall, or step off the cliff, or trip on the rake.

This Awareness indicates that those who wish to be more realistic look ahead on the path for obstacles with confidence that they can deal with the obstacle, providing they know about the obstacle in time, yet others will say: "Oh, no! You're looking for obstacles! You must be a paranoid freak!" This Awareness indicates it's a matter of how you wish to live your life; being paranoid of being paranoid, or looking for obstacles so that you can avoid them, or travelling through life with the 'tra-la tra-la' approach.

NEW BOOK:

"CONVERSATIONS WITH
NOSTRADAMUS"

--HOW VALID IS IT?

One final question about predictions. We got a news release from American West Publishers, who recently put out the new Bruce Cathie book, *The Bridge to Infinity*, that they have a new book called *Conversations with Nostradamus, Vol. 1: His Prophecies Explained*, by Dolores Cannon, who evidently channeled this material, and I'm going to read a little of this release and ask Awareness if this is valid information and whether the book would be of value if we stocked it for the membership. It says: "During one of her sessions of past-life regression work, Dolores Cannon had a most remarkable and mysterious phenomenon occur. The famous and controversial visionary, Nostradamus, asked to speak to her from his time to ours, through her regressed subject.

Conversations With Nostradamus, Vol. 1, is the fruit of the work between Dolores Cannon and Nostradamus. For the first time ever he has come to decipher and thus explain the actual meaning of his quatrains, quatrains which have confused and mystified mankind for over 400 years. In this first volume, Nostradamus and Dolores primarily work with 136 of his quatrains dealing with the next 50 years of mankind's future on earth. You will learn new information about the antichrist, the future of the next 3 popes and the Catholic Church, secret weapons and new technological inventions, cloning research, medical advancements, the spiral of time and so much more.

"The first of 3 volumes, *Conversations with Nostradamus, Vol. 1*, and our sequels are destined to become several of the most thought-provoking and controversial books of our time." It also talks about when we will have mass communication with extraterrestrials and why they make contact with us and so forth. Would Awareness please look at that information and that channeling and advise whether it's valid or not?

COSMIC AWARENESS:

This Awareness indicates that there appears to be a greater value in terms of positive qualities to this book than of the negative side. There are seen however, certain areas that can prove to be inaccurate in the sense of personal prediction into the material by the channeler, this being much less pronounced than the more clear and positive aspects of the channeling. This Awareness indicates that this appears to be a book that can be of great value to individuals. This Awareness suggests however, *It* always is somewhat concerned in recommending a book totally to your membership, in that there are so many areas within the book that may not be 100% accurate, which later, many of your members

might tend to believe without question, simply because this Awareness has suggested the book as being valid.

This Awareness suggests that every entity should read with discernment and that no book should be taken as Biblical in the sense of fanatically 100% right; that there are areas of great value in this work. There are also areas which, if asked specifically and individually in regard to certain things, might prove to be in error, thus, in the general sense this book as being quite valuable, as indicated in their advertisement. It can be a most talked about and highly controversial and thought-provoking book. If specific questions were to be asked on certain areas, there would be some questions that would deserve a negative response.

(Follow-Up Question):

In the past, the quatrains have been interpreted by so many different entities in so many different ways; my particular interest was the question: is this new interpretation of the actual written quatrains more valid particularly, than those that have been printed up in the past?

COSMIC AWARENESS:

This Awareness indicates there appears to be a considerable value in terms of the way this has been interpreted. There also appears to be a certain approach, based on the interpreter's beliefs and philosophy in such a manner that perceives certain information with a slight twist or slant that promotes her own philosophy, so that it is not clearly that of Nostradamus, but this must be understood as common for any individual, even a channel, to have a certain degree of personal interpretation based on their own perspective or perception, particularly if they do not lay aside mind, emotion and feeling totally.

This Awareness indicates that in another sense however, earlier interpretations have also expressed certain individual perceptions, even to a greater degree than this, so in this sense the entity's perceptions appear to be more in keeping with those of Nostradamus than have been many of the predecessors' interpretation of this work. This Awareness indicates however, when you speak of an entire body of work by the predecessors individually working to understand this entity's writings, you must remember that each quatrain is individually interpreted by those predecessors as well as by the channel, so that individually, the quatrains of one may in some cases be more accurate and in other cases less accurate in terms of an interpretation than would be found in another's perception, so that you cannot expect, just because an entity is said to be more accurate to the interpretation of Nostradamus that this is so in every quatrain. There are some in which she misses and some in which others miss and there are some in which she is more accurate and there are some in which others are more accurate, but the general reading of the information as that which entities will value and which shall give insight and that the understanding will be approximately 85% accurate, in terms of what the entity Nostradamus intended.

*ED's Note: Unless there is a stampede of requests, CAC is not going to stock this particular book.

THE ETHICS INVOLVED IN CHANNELING:

HOW COME RAMTHA IS HORSING AROUND?

QUESTION:

There is one final question I just remembered (it was in the paper the other day) that relates to these predictions readings. There was an item that said Shirley MacLaine was rather miffed with J.Z. Knight out here in Yelm, the channel for Ramtha, because Ramtha had told her to buy this Arabian horse from J.Z., for \$300,000, I believe was the figure, which Shirley MacLaine did, and she took this horse back to her ranch, and one week later the horse up and dies, and she wanted her money back. However, J.Z. declined to give her the money back, saying the horse was in good shape when she had bought it, and Shirley said, "Well, it seems to me, since Ramtha told me to buy it, he should have told me it was going to die."

Now who is right in a case like that? Should Ramtha have seen the energies that this horse was going to die, or was there something else involved?

COSMIC AWARENESS:

This Awareness indicates that Ramtha should not have been involved in using the interpreter or the interpreter's horse, or recommending the interpreter or the interpreter's horse for sale to a client, for in that instance, there was that which could be considered a conflict of interest on the part of J.Z. Knight in the minds of many of her followers; for Ramtha to be selling products for her, especially considering the fact that Ramtha is alleged to be, and is perceived by the followers to be a kind of substitute god for many of these entities, and it is as though a minister or preacher were to tell an entity: "God has spoken to me and says that you should buy my car."

This Awareness indicates that this kind of maneuvering as that which creates great controversy and distracts from the credibility of the interpreter, especially when large amounts are involved, and when something of this nature occurs, in which, for example, God tells the minister to sell the car to this person, who then buys the car, only to discover a mile down the road that a rod has gone out. Was it truly God, or was it the minister? The question is: Who is kidding who?

This Awareness indicates that in any business, an entity has a right to sell a product and if the product is in good shape at the time of sale, the purchaser assumes the liability unless there is some kind of written agreement that the seller will take back the property if it is found to be defective. In a case in which a horse was sold, it would be the burden of the purchaser to prove that the horse had problems before being purchased, or that the horse was in some way diseased or something prior to the purchase; however, in a case like this, wherein the entity who is influenced to buy the horse at the direction of a so-called spiritual advisor speaking through another, and the entity buys the horse from the advice

given by this spiritual advisor, not because the entity wanted the horse, but because the entity was advised to buy the horse; in such a case, it would appear to be bordering on fraud, or if not fraud, at least some form of deception, particularly if the entity refused to take back or make good the deal, when the horse died within such a short period of time.

This Awareness indicates that this is rather appalling for a spiritual advisor to advise an entity to purchase a horse only to have the horse die within a week. This Awareness indicates that it would call into question the motive of the spiritual advisor, whether it be Ramtha or not, it would call into question the motive of the one who channels or alleges to channel Ramtha. This Awareness indicates that this indeed creates a questionable blemish on the credibility of this entity's channel.*

THE FUTURE CAN BE MODIFIED

QUESTION:

Does Awareness have a closing message?

COSMIC AWARENESS:

This Awareness indicates that the future is said not to be fixed, yet influences that affect the future are fixed. Though these influences can be altered, added to or detracted from; and in adding to or detracting from influences, or modifying those instances, the future can be modified.

(The Law of Gratitude is given)

* ED's Note:

A lot of people in the area are asking questions of this nature. Why should JZ Knight, with all her wealth, need to rip off anyone, including her followers, whom some are saying she is doing by charging so much for access to Ramtha? According to local newspaper articles, JZ makes about 7 million a year, has a 50 acre estate, a mansion with 6 fireplaces, a swimming pool, sauna and tanning salon, a stable of Arabian horses, a fleet of Rolls Royce automobiles and charges up to \$1000 for a seminar. Last week a reported 900 Ram fans journeyed to Yelm from all over the country to attend one of these \$1000 seminars, almost a million bucks for JZ for a few days work. Not bad. However, some of the troops are getting restless. CAC receives a sort of open letter or newsletter from one disgruntled couple in the area accusing JZ of not only money grubbing, but deceiving her followers into thinking Ramtha is still speaking through her, while another spirit who calls himself "Jehovah" might be, and this entity is making some people paranoid with his threats and rantings, which appear to be just the opposite of what the gentle Ramtha preached, which was a more loving approach. (Ramtha did announce a year or so back that he would quit channeling his messages in the following spring, that he had given enough spiritual information and it was now time for his followers go go out on their own, leading the spiritual life and listening to their own inner guidance). However, JZ appears to ignore what the Ram said about disappearing, for she is still holding forth with her seminars, which one can assume would still feature messages from either Ramtha or some other entity. Rumours abound in the small community of Yelm, population 1425, about 12 miles from Olympia. It is a one stoplight little burg and many complain the highway is constipated for hours before and after one of JZ's get-togethers. Newspapers, TV tabloid programs etc. flock to the area

for any kind of story, namely because movie stars like Shirley MacLaine and Linda Evans hang out there, and both have bought homes in the immediate area. The local Baptist preacher and his tiny flock regularly picket the Ramtha stronghold, carrying signs such as "Jesus never charged money for his wisdom!" "Who's lying--Jesus or Ramtha?" Some are saying the whole operation is a 'cult' and worried citizens compare it with a possible Jim Jones type of mind control, that followers of the Ram are mere robots anymore, can't think for themselves, are trying to take over the tiny community of Yelm, and now outnumber the citizens when it comes to voting this fall, etc. Some are saying that JZ is another Rajaneesh and that she and her followers will wreck the community. The merchants, however, say just the opposite; they say that the thousand or more Ramtha fans who have settled in the area (namely because Ramtha had informed them that the Yelm area was about the only safe place in the country comes all that hellfire, earthquakes etc. etc.), have increased business 100% in a small community that was literally dying economically. Other rumours say JZ has kicked her husband out, filed for divorce and moved in what some say is a teenage boy, who may or may not be the channel for "Jehovah", and the papers are saying a very nasty court case is brewing because the husband who was kicked out wants palimony or whatever,--a larger piece of the cake than JZ evidently has offered him. Rumour also says JZ is pregnant and that is the reason why she no longer has seminars around the country, but now holds them only at Yelm on her 50 acre estate. Having met some Ramtha people myself, I personally feel that most of the stories are mainly hype and expressed by locals who have fear of the unknown. Ramtha teachings, such as everyone is a god, that there is no such thing as sin, and individuals create their own realities (where have we heard that before?), are troubling some local religious leaders, particularly the fundamentalists, who have visions of witchcraft and orgies going on behind that huge brick wall that separates them from the stronghold of JZ Knight and her many followers. As we well know, fundamentalists have to have something or someone to be 'against'--Satan, for example, or they can hold no power over others. Having read several Ramtha books, (in fact, CAC sells a couple of them), this editor has no trouble with the philosophy at all, much of which is similar to the Cosmic Awareness philosophy. What is disturbing, however, is the continued reports that this Jehovah character, who claims he is from Andromeda and his messages must be kept secret except for the chosen few, and who boasts of his omnipotent power 'to destroy whole civilizations in the twinkling of an eye,'etc.--very scary stuff. Could it be, HE has returned?

"WINDWORDS", a rather good publication that sprung up a few years back to promote the Ramtha teachings, folded this fall, namely because JZ would no longer allow them to transcribe and publish tapes and other Ramtha information, which adds to the suspicion that Ramtha may indeed have stopped his communication to this plane through JZ as he had promised many months ago.

If the reports CAC is getting about this entity who reportedly is now working with JZ Knight are true, then anyone who follows the 'teachings' of this Jehovah character are asking for trouble, and will surely find it. If anyone is interested in any of this, I suggest you contact the writers of one of these reports:

"JEHOVAH'S WITNESS"--IS THIS THE ONLY "TRUE RELIGION" ?

(A REVUE OF JEHOVAH AND HIS EARLY INFLUENCE ON THIS PLANE)

QUESTION:

a question from Mr. S.W. of Manchester, Great Britain. "Recently a religious organization called Jehovah's Witnesses have been trying to persuade me that I must join them, that theirs' is a true religion, proved by the way they conduct their lives as quoted by passages in the Bible. There are many other religions who 'fall short' of the behavior of this sect, but I fail to see how one religious faith can claim to be the *only* true religion. I feel that the true religion is an understanding of all religious faiths. Would Awareness comment on this and on the Jehovah's Witness sect?"

COSMIC AWARENESS:

How to Start Your Own Religion

This Awareness indicates you are essentially correct; that this organization originally began claiming that there would be only 144,000 entities who would be saved, and that this was the organization which was selected to be saved by Jehovah; that as the organization grew and surpassed that number of 144,000, they needed to revise their original premise and now allow more than 144,000 to be saved. This Awareness indicates that this is simply another ploy which has been swallowed hook, line and sinker by many entities who find their security in swallowing these lines which have been fed to them and which appear to be coming from the word of God.

This Awareness indicates that any entity who would like to do a do-it-yourself religious organization, can pick out at random lines from the Bible. This Awareness suggests you take a pencil or pen and close your eyes, and thumb through the Bible, stopping on a page and putting the point of the pencil down, then you open your eyes and write down that piece of scripture. This Awareness suggests you do this fifty times and then take that information and search through those fifty pieces of scripture and find some coherency which will appear to be reasonable and begin preaching those pieces of scripture as a church dogma. This Awareness suggests you take that church dogma and insist to any entity who believed in the Bible that *this* is the way one must be, *this* is from the Bible and therefore any entity who is not following your teachings must be in error. This Awareness suggests that before long you will have some followers.

This Awareness suggests that this method of course is not the most efficient way of creating a church, but that this is one way, and shows how foolish it is for entities to try to prove that their way is the only way, by references from the Bible. This Awareness indicates that obviously, they are leaving out much other information which is equally valid, obviously they are emphasizing some parts of the Bible while ignoring other parts, or giving little attention to other parts. Obviously, entities can prove anything they wish to prove by quoting scripture; the proof is only as valid as the sucker that takes the hook.

This Awareness indicates in terms of whether or not this organization is accomplishing spiritual assistance, is giving service to entities, is helping entities, whether or not these entities are living righteous lives, are living lives which are beneficial to themselves and others; this was not indicated nor discussed by this Awareness. This Awareness indicates that these entities are in fact entities, and that each has his or her own destiny, purpose, and motivations.

This Awareness indicates that these entities are not being evaluated by what was given, that the previous message only relates to the concept which is prevalent in many religions, whereby they seek to control others with the idea that only *they* are correct, and that the scriptures prove this. This Awareness indicates that it is not simply a problem of the Jehovah Witnesses, there are many others. This Awareness indicates that it is not simply a problem of various Christian organizations who prove their righteousness by scripture, for this occurs also in other religious organizations, such as the Mormons, the Buddhists and other Oriental religious groups. This occurs in basically all religions, as well as most sciences, whereby entities refer to their texts as the proof of their righteousness. This Awareness indicates this as a situation whereby a quote from authority or a quote from the basis of an accepted authority or book, the rule book, this is considered as proof by many.

This Awareness suggests that when an entity challenges the rule, those who follow that rule consider this as an attack upon the book itself, or upon the authority itself, whether this is a Bible, an IRS manual or any other legal, social, corporate or religious text. This Awareness indicates that entities have the right to question and doubt; that there are some religions, some nations, some legal systems which do not grant entities the right to question and doubt. All of this is a form of mind control. This is seen in military systems, in some social systems, in national governments, and in religious systems. You simply *do not question the authority*,--the authority tells you, dictates and you obey.

Awareness Asks You Not to Consider It an Authority

This Awareness asks that you not consider this as an approach when dealing with messages given by this Awareness, for this Awareness does not wish to be considered as an authority, but wishes that you discover for yourself and become your own authority. This Awareness does give information which can be thrown into your consciousness to digest, examine, research and consider, -- this as a sharing action,--but this Awareness does not ask you to be obedient to *It*, nor to fear the questioning and doubting process. This Awareness does not mean by this that *It* will answer every question asked, but does mean that you are free to ask and to question, and to *doubt* anything which this Awareness has given.

ANY REAL CONNECTION BETWEEN JEHOVAH AND THE JEHOVAH'S WITNESS SECT?

(FOLLOW-UP QUESTION):

Awareness, is there any karmic connection between the Jehovah's Witness entities of today and the clones and followers of Jehovah a long time ago, or is this primarily in the line of Jewish people?

COSMIC AWARENESS:

This Awareness indicates that there was basically at the beginning of the Jehovah Witnesses organization an influence from the forces of the followers of Jehovah, who assisted in starting this organization. This Awareness indicates that the organization itself as having little of this influence in it at present; that these entities presently as simply following the information which they have available to them through their present means and through Biblical interpretations of the scriptures.

Adam Created as a Duplicate of Jehovah

This Awareness indicates that the Jewish people, whoever that may be, generally are followers of the Old Testament, but not necessarily so; that essentially, the early Hebrews were the clones of Jehovah or the offspring of such clones.

This Awareness indicates that Jehovah, as has been indicated previously, indulged in the action of duplicating entities and duplicated Adam in his own image, duplicated Eve in a kind of feminine counterpart of Adam, using a different approach. This Awareness indicates that these entities as having been created on the planet Mars, and brought to the earth at the time whereby they were expelled from the Garden of Eden.

This Awareness indicates that the action of Jehovah, as has been previously indicated was one whereby he broke certain universal laws of the Galactic Confederation in creating Adam and Eve as servants to tend his garden, and began this race which was a duplicate of his own karmic self. This Awareness wishes to elaborate briefly:

The actions of Jehovah created through the DNA duplication, a race of Hebrews, who were basically reflections of Jehovah; these entities reflecting the rebellious attitudes of Jehovah and carrying on certain attitudes of superiority, love of power, jealousy, vengeance and a feeling of being righteous and superior to others. This Awareness indicates all this being inherited through the genes from Jehovah. This Awareness indicates the Intergalactic Confederation, or Galactic Man, as it is sometimes called, considered Jehovah to be a renegade immortal, and has since curbed Jehovah's behavior and has sentenced this entity to bring back the energies which he unleashed upon this earth; and this entity is in the process of reversing the forces which he unleashed, and in so doing, the entity is also making repayment for his own karmic purposes.

This Awareness indicates the entity Jesus, as has been explained previously, assisted to reverse the forces which this entity Jehovah began, and Jehovah at present is not in the process of destroying humanity, and saving his own, but rather is in the process of balancing out the energies of this planet in order to bring about harmony, and to undo the harm which he unleashed when he began his operations.

This Awareness reminds entities that the term Jehovah as likened unto that which applies to a tribe of space people, with one named Yahweh as the leader, and this entity as being the force behind this action. This Awareness indicates that these entities are working on this earth to undo some of the energies which have brought about much conflict through the Hebrews and their programming by Yahweh.

"HARVESTING" THE CLONES OF JEHOVAH

(FOLLOW-UP QUESTION):

In a previous reading about Jehovah, Awareness mentioned that the entity Jehovah had planned to "harvest" those entities and those clones. Would Awareness please explain what *It* meant by using the term "harvest"?

This Awareness indicates also a comment on the word "clone"; this word as not the exact terminology for the application of the creation of Adam and Eve, but as having been given as a close proximity to that technology. That essentially, the actions of Jehovah in creating Adam and Eve are similar to that which Dr. Beter has referred to as the method of creating the robotoids. This entity, however, had this perfected as a method whereby the entities lived long lives, whereas the present Russian system allows the entities to live only short lives.

This Awareness indicates that in reference to the harvesting, the entity Jehovah had intended to return at the proper time and to take those who were his creation away from this planet, to another place, and to destroy the remaining entities upon this planet. It was for this reason that the entity Jesus came from the Intergalactic Confederation, after having moved into Terrestria from Celestria, and through these entities moved into the earth plane, and was born, and remained in contact with these space beings while moving through the various places which Jehovah had touched, and fulfilling various prophecies which Jehovah had promised to fulfill, and thereby diffusing or duplicating the actions of Jehovah, but on a different level.

"They say that Jehovah has claimed responsibility."

COSMIC AWARENESS:

This Awareness indicates the entity Jehovah had promised to come back with great power and slay the enemies of the Hebrews and take them away to the promised land. The entity Jesus came back as a babe in the manger, and ended his life on a cross, giving himself for others. This Awareness indicates the entity being King of the Hebrews, rode into Jerusalem on an ass, and was crowned with a crown of thorns. This Awareness indicates this entire action, the mercy and the healings, indicated a God of love and mercy, and many of the Hebrews began to believe this entity was indeed a messiah, but a messiah not of power, vengeance and glory, but of humanness, love and mercy, and the entity opened the Hebrew religion for Gentiles also, this again diffusing the Jewish or Hebrew religion, diffusing the Hebrew clan.

This Awareness indicates Jehovah had created many laws to identify his people, ranging from circumcision to diet and to other forms of behavior, to the action of keeping track of the genealogy. This Awareness indicates this entity has intended to mark his people that he might come back and salvage them, but the entity Jesus began an action which diffused and scattered these people all over the earth, and in this manner made this harvest a near impossibility. This Awareness indicates that Jehovah has had to reconsider his plan for harvesting or rapturing his people, and destroying those who were not his own.

This Awareness indicates the entity as having to give up on that program. This Awareness suggests there was a deficiency in the gene of Jehovah, which while helping this entity to be a good scientist, did not allow the entity to understand qualities of mercy and universal oneness; the entity as having been vain and self-centered, a megalomaniac. This Awareness indicates the entity as having passed this on to his followers, to his duplicates, Adam and Eve, and through them to others of the Hebrew group, and that many of these entities, while being artistic and adept at dealing with material physics and materialism, did not have certain qualities which linked them to the immortal realm, and therefore many of these entities adopted the philosophy of atheism, not believing that immortality actually existed.

This Awareness indicates that many of these entities intermarried and brought into that DNA memory chain and the genes the concepts of immortality through these memory genes, so that some of the Hebrews have the capacity to believe in immortality from an intuitive level, from an inner memory. This Awareness indicates that this does not mean that those who did not have that memory were deprived of immortality, but rather that this was retarded in their consciousness as it was also retarded in the consciousness of Jehovah, because it had so little significance in his consciousness.

(FOLLOW-UP QUESTION):

To clarify then, in relation to Jehovah's plan to "harvest" these entities; they were to be servants on this planet rather than food?

This in the affirmative. This entity wanted worshippers and followers and servants to increase the size of his family and clan. This Awareness indicates there are many entities in the immortal realms, these being of all types; there are many planets in the mortal realm, there are many more in the immortal realms. These entities are often capable of moving between realms and through space from planet to planet and many of these are of very unusual nature, much as have been indicated in your science-fiction movies and stories, and many of these have great powers and also have strange ideas.

This Awareness indicates this particular planet has been heavily influenced by such a one, the entity Jehovah, and as having also been influenced by Luciferians, and those who were associated. This Awareness indicates there was a time when the Natas or Satanists and the Luciferians worked together, but these entities since that time have separated as there has grown a mistrust between these entities; that there has been a closer tie between the Luciferians and the Jehovahites, but this also is now changing. That in this particular case, both the Luciferians and the Jehovahites, or those who are followers of Jehovah, these are in the process of transmuting and merging back toward the Galactic Confederation.

This Awareness indicates this as associated with those who are the Galactic Confederation, often referred to as the Serpent People, due to the symbol used on their ships. That essentially, the Luciferians and the Jehovahites as now becoming more humane and less competitive in their behavior, these entities beginning to learn the meaning of the power of Love, for they have experienced repercussions in their efforts to gain control over the lives and energies of others. This Awareness indicates that this is largely due to the intense battle of consciousness which has been raging upon this earth between the Wanderers, the Luciferians, the Satanists, and the Jehovahites for thousands of years.

ED's Note: This reading was given about 8 years ago. (Awareness will not give any current info on robotoids).

For more on the Jehovah's Witness sect, please refer to 'Revelations of Awareness' No. 82-12; \$3.00 from C.A.C. For more on Jehovah, Adam & Eve etc. please refer to issues: 79-18, 79-25, 79-27, 78-29, 78-35, 80-09; \$3 each.

"You've got to hand it to the Israelis — they're incredibly good at these rescue missions."

...The nature of resistance:

HOW CAN VIETNAM VETS HEAL THEMSELVES OF NIGHTMARES & HORROR

(March 10, 1988)

QUESTION:

A question from J.W. He's a member of CAC, and a prisoner. He writes: "I have a question for Awareness. It concerns Vietnam vets, which I'm very proud to be one of them, but it also has caused severe problems in my life, such as drug use, nightmares and even the desire to go on fighting, but my question is: I would like to know if Awareness feels that the horror and nightmares we combat vets go through has a preferred meaning, if we will ever get rid of them, or will they end up driving most of us over the edge completely?"

COSMIC AWARENESS:

This Awareness indicates that if you can understand that these nightmares are in effect releasing some of the energies that have been locked up deep inside you, in the subconscious, and that each time you dream or have such a nightmare, that it in fact is alleviating some of that energy that has been blocked, and as this is further released and brought to the surface, through these nightmares and through the remembrances, that it is a form of purging the soul or system, or subconscious, and is releasing many of those energies that would otherwise create even greater problems in the future. If you understand that, you will have a different attitude toward the nightmares, and instead of being hostile to them, you will appreciate that something surfaced and can now be looked at from a conscious level, and discarded.

This Awareness indicates that if it were not for these releases, this energy would grow and fester and become even more damaging to you in future times, that if it is released too fast, too suddenly, then it could also cause an explosion of irrational behavior. This Awareness indicates that it is better that it be released slowly, such as in continuing nightmares, dreams or memories, and be looked at without resistance but with an appreciation that it is being released so that you can more quickly heal from the experience, and move back into that which is your normal reality, your healthy approach and attitude toward life that is the real you, which was before the experience.

This Awareness indicates that there has been great injury to these vets, to any entity who has been thrust into violence and war and the terror that accompanies such, and it is not an easy wound to overcome; that many entities never overcome the wound they experience from such action. That most entities feel annoyed and hostile and frustrated when they have these memories

15.

releases such as in nightmares and dreams, but those nightmares and dreams should be considered as blessings, and they will have a totally different effect, when so considered, for you will no longer be hostile or feel cheated when such dreams occur. You will no longer feel angry and hostile about the dreams. You will appreciate them and can say: 'Well, I released a little more, and I will continue releasing and these things will eventually become less and less frequent as I clear out more and more of that experience that has injured me so.'

This Awareness indicates with that attitude toward the dreams, without resisting the dreams, it will be much easier and the dreams will be accepted more favorably as a healing process; the healing will take place much quicker if there is no resistance toward these nightmares. This Awareness wishes entities to understand that the nature of resistance tends to create a greater force for that which is being resisted. This Awareness wishes for example, to indicate a question once asked by a member of CAC, wherein this entity was concerned about having certain sexual fantasies, and the entity had fought against these fantasies. The entity had felt ashamed and guilty regarding these fantasies and asked Awareness what to do to get rid of these fantasies.

This Awareness suggested that the entity not worry about getting rid of the fantasies, for this Awareness blesses those fantasies. This Awareness suggests that entities may wonder why this Awareness would bless sexual fantasies. This Awareness indicates that it is because if this Awareness were to condemn sexual fantasies the entity would become even more obsessed and resist them even more, but in not resisting, in letting them be, there is then no more energy on them, and there is no more sense of resistance toward them, and if one needs not resist them, then there is no more reason to focus on them, and if one does not focus on the sexual fantasies, they lose their importance, they lose their significance.

This Awareness indicates it is the same with nightmares; if one resists these nightmares and fights against these nightmares, then the nightmares become more powerful as an enemy, as a force against which the entity fights, but if the entity no longer fights the nightmares, no longer resists the nightmares, but sees these nightmares as being releases, and as a process of healing and if the entity welcomes these nightmares, experiencing them, awakening, and then saying: 'Good, I have released some more of that war,' then the significance of the nightmare diminishes as a form of enemy, and it becomes a friend.

This Awareness indicates that gradually the troubles the entity may experience lose their power over him, and the entity is then in control of his life again; that this is akin to that message of the *Law of Love* which suggests that you resist not.

ED's Note: for related information, please refer to 'Revelations of Awareness' No. 80-2 (Healing the Vietnam Veterans of War Horror & Guilt); \$3.00.

AMERICANS MISSING IN ACTION: ARE THERE ANY LEFT IN S.E. ASIA?

QUESTION:

He has one other question. Awareness has discussed this some years back, and I wonder if there's any new information because it's of interest to an awful lot of people. He writes: "Secondly, I was in a POW camp and went through hell. Out of the some 2000 Americans still missing in action in Vietnam, does Awareness feel any of these men are still alive over there, and are they still being held captive in camps as POW's? Something deep inside of me says that there are fellow Americans still there, and I feel that if the fact remains there is the slightest chance that one man is still there that wants to come home, somebody should go in and bring them or that one person out."

COSMIC AWARENESS:

This Awareness indicates that what is seen is that there are certain Americans remaining in that region; that these entities are now there of their own choice. They are involved in... This Awareness indicates this does not appear to be a large number; that many of those who were remaining there have died. Some are ...it appears there a small number who are more like vegetables, such as insane and without recollection of who they are; that there are also a number who have lost their previous identity and become involved in the society, having taken up with Vietnamese women, and some even have children.

These entities are being secretly protected from any advertisement or public notice of their whereabouts, as they wish to remain in the area. They are not exactly captives, but they are watched. This Awareness indicates that it appears most of those entities who remain there have reestablished in some way to the point where they are not seeking to leave the area. They are either resigned, or have begun a new life.

This Awareness indicates that of course attitudes of individuals will always fluctuate and change according to the circumstances. However, it does not appear that there is any large number of POWs remaining in that area who are kept as prisoners in the normal sense of being guarded at all times. This Awareness suggests however, that there do appear to be some, a few of these who are in a kind of camp-like situation where they are watched with suspicion and guarded with some stipulations; with some freedom also. It is not likened unto the prison in which you yourself experienced.

This Awareness indicates that things have changed so that these so-called prisons are more like internment camps with relative amounts of freedom, so long as these entities are cooperative. It could easily change if any of these entities were to create problems. This Awareness indicates the movie *Rambo* was fictitious in its portrayal of American prisoners in that region, that there is no camp similar to that which was portrayed by the movie.

REVELATIONS OF AWARENESS is a cosmic newsletter, published for the membership of Cosmic Awareness Communications, & the Universal Church of Awareness, P.O. Box 115, Olympia, Washington, 98507. Membership fees and donations are deductible from your federal income taxes.

INDIVIDUAL & FAMILY MEMBERSHIP: \$30 per year. CONTRIBUTING MEMBER: \$52; SPONSORING MEMBER: \$144; PATRON MEMBER: \$1000; ENDOWING MEMBER: \$5000.

ALL DONATIONS TO C.A.C. ARE USED TO SPREAD THE AWARENESS MESSAGES TO OTHERS.

WILL GERONIMO'S "CURSE" HAUNT GEORGE BUSH?

QUESTION:

There was an interesting article in a recent *Penthouse*, that George Bush is haunted by an Indian curse. It says: "President Bush might have inherited an old Indian curse put on his family, because his father, Prescott Bush, allegedly stole the skull of the Apache war chief, Geronimo. An Indian leader charged that Prescott robbed the warrior's grave at Fort Sill, Oklahoma, for a mysterious society at Yale University, and took the skull as a trophy. According to former San Carlos Apache tribal leader Ned Anderson, an old manuscript titled, *A History of Our Order*, allegedly containing the story of Yale's Skull and Bones Society, suggests that Prescott was the leader of the raid.

One of the most powerful of all curses is the one cast on those who disturb Indian burial grounds, explains Indian parapsychologist Roberto Diaz. If the story that Bush's father desecrated Geronimo's grave is true, the curse falls on the President as well as the father. Bush's brother, Jonathan, another member of the ultra-secretive society, has called the story ludicrous." I'd like to ask Awareness if that information is true, and if so, what would be the consequences of it?

COSMIC AWARENESS:

This Awareness indicates that this appears to be a fabrication. This Awareness indicates however, that there is the order, the Skull and Bones organization to which the entity has been attached. However, the story in regard to a link between this entity and the theft of Geronimo's skull as not being accurate.

REMEMBER
AWARENESS
IN YOUR WILL

Gifts and donations from individuals can assure the continued publication of the Awareness messages. Because subscription expenses exceed the minimum rate we ask, the generous support of our readers and members is essential to the growth and survival of our publication. Cosmic Awareness has indicated that by 1995 the masses will be ready for these messages, which today are studied by but a few thousand aware entities. But can C.A.C. survive until then? Making a bequest to C.A.C. is one way of ensuring that we continue to thrive, continue to increase the number of trance sessions, building up a large backlog of messages for the future, preparing booklets of indepth subjects for mass consumption. Much of the Awareness material is universal in nature and the philosophy is enduring and progressive. When you make a bequest, you can deduct the entire amount of the gift from your gross estate before taxes. You know you must make a will or everything you have worked for will simply go to the tax man. Talk to your lawyer. Include C.A.C. in your list of charitable organizations. In this manner we can assure you that you will be serving many and you will be serving them well.

C.A.C. has a brochure available with more information for anyone seriously considering such an action.
