ISSUE NO. 361

## A sneak prevue

## of the new decade

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

## COSMIC AWARENESS PROVIDES A PEEK AT SOME OF THE THINGS WE CAN EXPECT TO SEE AND TO OCCUR IN THIS NEW DECADE

(C.A.C. General Reading )  
November 16, 1989

### QUESTION:

Awareness, we're here for a general C.A.C. reading, with questions sent in by the membership. Does Awareness have an opening message?

### COSMIC AWARENESS:

This Awareness indicates that *It* wishes at this time to give a certain indication of what entities may expect in the coming decade; that this being the end of the 80's decade, and the beginning of the decade of the 90's.

This Awareness suggests that there are many new things in store for entities during this coming time.

#### The Automobiles of the 90's

This Awareness will discuss first the technological changes that are likely to dominate the attention during this decade, this ranging from technology in relation to automobiles, wherein early in the decade more and more vehicles will include systems which will allow entities to find where they are and have directional maps on a screen to allow them to know where to go in order to get to their destination, or how to get there; that this is already being perfected and presented in some instances. That

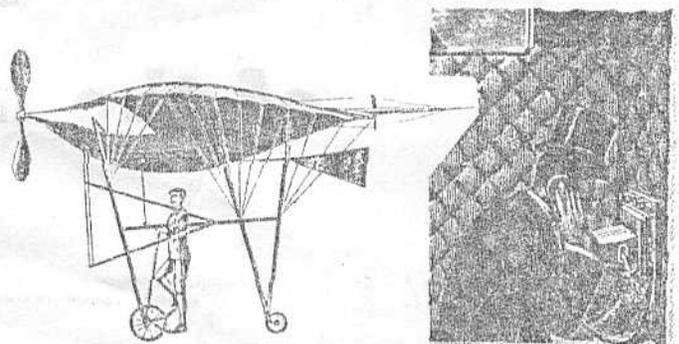

there will also be common during this decade, increasingly making use of in-car telephones, wherein entities will receive incoming messages and can call out on their telephones, this being eventually built into the car and coming as standard equipment.

This Awareness indicates that by the end of this decade, most automobiles will have these, and most entities having any automobile built in the latter half of the decade, will automatically have received these built-in telephones.

This Awareness indicates that in terms of the types of things that the automobile and computer will provide in terms of information, already much is being given, including the tracking of miles and the efficiency of the engine and so forth, the voice indication of low gas in the tank. There will also be more long-term reminders that will be presented when all entities' automobiles will be able to store information, such as when the tires are put on the car, a reminder when they begin to use that which is a certain number of miles that they are guaranteed for, there will be reminders from the computer that they should have their tires checked; that there will be other voice reminders and notations in the computer for other systems within the automobile.

### IN THIS ISSUE

A Sneak Preview of things to come in the new decade..Pages 2-8	
The Homeless, Crime and Drugs in the new Decade...	6.
Your Life 10 Years From Now if the Bankers Take Over...	7.
That Mysterious Pyramid-Shaped Crystal Found on a Beach in Florida that Shows Moving Pictures of Humanoids	9.
Do the Aliens Have a High Self, Middle & Low Self?	10.
Can Aliens Invade Our Sleep and Take Over Our Bodies?	11.
Do Aliens go to a Group Soul After Death Like Insects Do?	11.
What Did the Aliens Mean: "We Recycle Souls" ?	12.
A Way Humans Can Save the Aliens' Soul	12.
A Possibility of Glory Upon this Earth	12.

This Awareness indicates that in terms of new homes, entities will build homes that have automatic heat regulation. There will be utensils that are timed to come on at certain times of the day, to make it convenient, so that upon arising the coffee is made; upon coming home, the meal is already cooked in the oven, and all that is necessary is to set the timer and set the food ahead of time.

This Awareness indicates that there will also be those things that serve to watch the home, protect the home, so that when an entity is gone, if there is a fire, or if there is an intruder, a phone number is automatically called and the entity is notified of the problem. The fire department or police department will also be notified; that these can be done electronically with in-home computer systems, the computer systems being placed at strategic places, such as at the door. In other words, the use of timers and sensing devices will become more useful in the building of new homes, to make the operation more convenient. For example, upon leaving one's home, the entity may lock all doors simultaneously by locking one door, the same as is accomplished for many automobiles today. This Awareness indicates that this is what entities may expect in some of the newer homes that are built in this decade.

This Awareness indicates that there is a likelihood of more computer uses within the home, smaller computers, and simpler to use, along with in-home FAX machines, wherein entities can receive letters from one another over the FAX machine, typed on their computer. This becomes a way of carrying on communication that helps to decrease the load of the postal service, and allows for faster communication between friends.

There is also that wherein entities can see each other when talking on the telephone. This may also be used in conjunction with computers through modems and through their own personal computer.

This Awareness indicates that there are also seen miniature creations in terms of electronics that create very small machines, things that do microscopic work. These likened unto extremely small robots or extremely small machine-like activities that work within other machines, to do certain functions within, such as within an automobile or within some other machine that needs highly sensitive work in a very small area.

#### Genetic Engineering

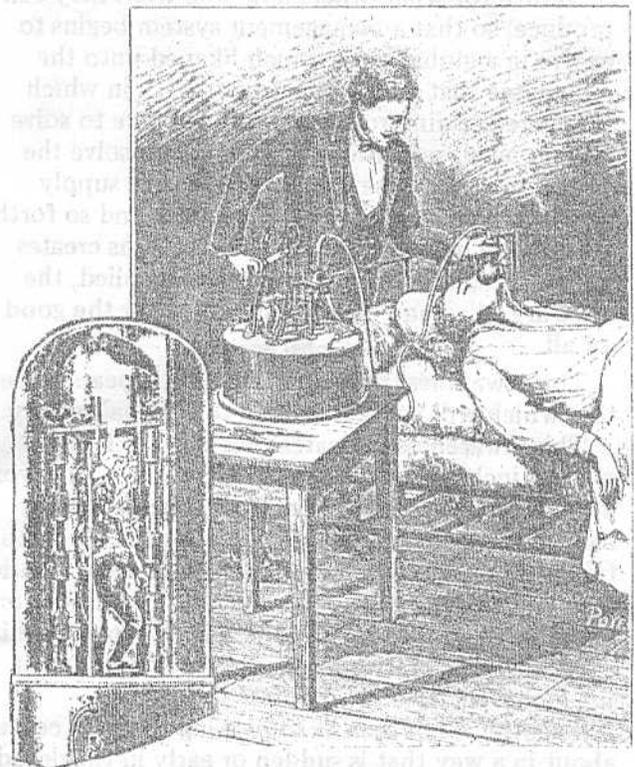

This Awareness indicates that in terms of genetic engineering, entities can expect to see new breakthroughs in the categorization of diseases and categorization of genetic substances that counter or alter the genes within a system to counter these diseases. This is not the same as a vaccine, but it may work much like a vaccine, wherein shots of certain DNA combinations may be given to change the genetic balance of an individual so that a disease is countered as a new genetic encoding is implanted in the entity, or in the organ.

This Awareness suggests there is also the increase in networking around the globe in terms of the communications systems, through satellites as well as through FAX systems and telephone systems in all countries, so that entities can have more instantaneous communication of events, gradually turning the globe into a community in which very little escapes the attention of others, where there is an interest.

#### Political Changes

This Awareness indicates that in terms of political changes that entities may expect to see during the coming decade, is a gradual movement toward a global economy, and a gradual movement toward more of a world system, especially that which works through a linking of interchange between nations on commercial and political and information levels, wherein for example, a nation has its governing body, but along with its own governing body, there are representatives present who are allowed to oversee and sit in on the policy-making of that nation, to get or to add influence or to make requests in behalf of their own country wherein any policy might have some bearing on their own national interests for the country they represent. This would be likened unto the various states in the United States having representatives in other states who are allowed to sit in session with the other state legislators when any policies are being considered that might affect their state.

This Awareness indicates that this in itself will create a more global harmony, so that the different countries need not be fearful that a neighboring country is plotting some evil against them, and so that if something does develop that is against their wishes, it can be discussed and requests may be made for more in-depth negotiations between the two countries to solve any conflict that might develop.

This Awareness indicates that this does not appear to be something which will develop early in this decade; it may even wait until after this decade, but the seeds will be sown during this decade,—the seeds of interchange on political levels between countries wherein representatives from one country will sit in on the policy-making activities of other countries. It is much likened unto the ambassadors within their respective ambassadorships being allowed to sit in on the policy-making government bureaus of the country in which they are assigned.

This Awareness indicates that in terms of commercial interchanges between nations, there will be more and more of an increase between the more wealthy nations and those of the Third World nations whereby goods and supplies and services are interchanged between these countries, and whereby in certain areas, there will be a kind of mutually agreed-upon program effected that encourages those countries that have the ability to raise certain foods or to produce certain items or substances, to do so. There will be financing made available for such countries to do this, because of their particular environmental adaptation to these needs, or labor force available for such production, so that in effect it becomes likened unto a kind of world management system, an economic management system that is gradually taking shape, wherein the various countries are encouraged to produce according to their ability in a manner that contributes to the global welfare.

This Awareness indicates that in return, these countries then also would have their own requests from other nations of those substances, supplies, and needs that are lacking in their society, their particular culture. This way these various countries share what they have and what they can produce in return for what others have and what they can produce, so that a management system begins to evolve in a global sense, much likened unto the commerce that occurs in a free society in which there are certain products produced here to solve certain needs over there, which in turn solve the needs for others elsewhere, who in turn supply products that still serve in other areas and so forth, so that the balance of all of these actions creates the needs, and when the needs are supplied, the gaps are filled and the system works for the good of all.

#### The Global Society

This Awareness indicates that this appears to be that which will begin to spread to a global society.

This Awareness indicates that there will be a gradual inclusion of most of the nations of the world into this society, with occasional aberrations for nations that become as outlaw nations in which they fail or refuse to cooperate, in which case such nations may be quarantined,—economically, politically, or in other ways,—until they toe the line of proper civilization and cooperative interaction with the rest of the global society.

This too is not seen as something that will come about in a way that is sudden or early in the decade.

but will gradually begin to evolve until entities recognize the pattern and see the concept, and then there will be a speeding-up as certain entities begin to help define the method or the way by which these things occur between nations, so that the systems then can be implemented more quickly to help the developing nations find their place in a more orderly and organized fashion.

#### Areas of Possible Conflict

This Awareness indicates in the sense of cultural development, it appears that for some time yet, at least a period of five years, possibly throughout a much longer period, there will continue to be conflict in regard to religious and territorial claims and rights, and disputes between nations, especially those who have a long history of conflicts, such as is common in the Middle East. There will be continued conflict between ideologies and those who promote those ideologies based upon beliefs, concepts of certain ideals, religions, racism, or differences that have historical tradition.

For example, the areas of Ireland and England appear to be continued trouble spots for several years into the future, and likewise in those Middle East countries, certain of the Asiatic countries,—especially seen is Cambodia with its many different factions or different groups with their different ideologies,—and also in areas of Africa, particularly South Africa and the nations bordering the Mediterranean. These are areas which will continue for some time to be trouble spots or potential trouble spots.

This Awareness indicates that there will also be some continued difficulties between Eastern and Western European nations, but it does not see these as being of great significance during this decade, but sees more of a movement toward reconciliation in spite of the many differences that have existed and will continue to exist for some time.

This Awareness indicates that South America also is seen as having certain areas that are troublesome, but that these too will continue to diminish considerably, especially in the latter part of this coming decade.

#### Religion and the 'New Age' Approach

This Awareness indicates that in regard to the overall religious approach or attitudes, there is seen a new approach to the way entities think. This Awareness indicates that the so-called New Age as that which will continue to influence with greater and greater expression. There will come a time, however, when this is more carefully defined, being as at present it has not been properly defined, and no one really seems to understand what it is, and there are many definitions that are unfitting, and much confusion in regard to what the New Age is.

This Awareness indicates in some ways this has allowed it to flourish, because no one really knows what it was, or how to deal with it, because it was popping up in all kinds of places with all kinds of faces, and no one quite knew where it was coming from.

But this Awareness indicates, that because of the influence that will continue in regard to the New Age,

and further influence in the future, many of the older traditional religions will undergo transmutations, embracing some of the concepts of the New Age, realizing that they cannot continue using the same old worn-out, tattered structures and dogmas of the past, when there are so many new discoveries, insights and more wholesome approaches to the understanding of the spiritual aspects of humanity.

This Awareness indicates that as this occurs, there will become a time of greater freedom of religion for all entities, not only in the United States, but also in other countries. Thus a political freedom, an economic freedom, a religious freedom, will begin to express themselves more wholesomely during the 1990's.

#### More Corruption to be Exposed

During this time, there will also be continued communication that allows for the exposing of much corruption that has occurred in the past, not only in Communist countries, but also within the capitalist nations in regard to many of the secret societies and many of the well-controlled societies and agencies within the nations of the West, so that even those areas that have traditional control, such as the traditionally powerful medical systems, may in their effort to clamp down and hold more power, much as some of the totalitarian governments of the Eastern bloc have attempted to do politically; some of these medical systems, in attempting to rule with totalitarian power may find themselves also in the same spot as those political totalitarian systems, being overthrown by the masses. For entities want freedom of choice in medical terms as well as in political terms.

#### A Polar Shift? Earth Changes in the 90's

This Awareness indicates that in regard to earth changes, many have been expecting polar shifts of a dramatic nature that would wreak havoc upon the earth. This Awareness does not see this as occurring in such a manner; that the polar shifting as that which is so gradual that entities generally will not notice any such change.

This Awareness indicates, however, that there will be continued volatility in regard to earth structure and the earthquake zones, and that there will be those occasional storms which wreak havoc upon this plane in various parts of the world; that this is a continued cycle and it will continue throughout this decade and into the next century, accelerated during this period by the atomic tests that have occurred since the 1950's in regard to earthquakes along the Pacific Coast and that there are also certain other forces in manipulation of earthquakes and weather modification techniques that continue to have effects in this regard, and this will, to some extent, continue into this next decade, diminishing as more and more nations become interdependent on each other, creating greater co-creative and cooperative networking between each other.

#### Population of the World in the 90's

This Awareness indicates that in terms of population, the continued growth of population through more reproductive approaches in certain areas of the world as that which will be countered by the increasing famine that is seen as coming during this decade,

along with the increasing of biologically engineered diseases, such as AIDS, and those diseases that are already present, which are essentially encouraged to grow and accelerate because of the environmental conditions, such as the disease of cancer, and the environmental condition of increased pollution on all levels of life, through diet, through air, through chemical waste, through hazardous waste, and cigarettes, as well as the diminishing of the immune system by these same effects on individuals, and by depletion of healthy food availability.

This Awareness indicates that entities can expect that between the tendency for increased population on the one hand, and the engineered diseases on the other hand, that there will be a slight reduction in the overall world population.

This Awareness suggests, however, that *It* does not see this as being the reduction projected by those who promoted the concept of Global 2000, wherein one-third of the population would be destroyed by the year 2000.

This Awareness indicates that *It* does see that there will be other means of birth control, including the implementation of certain biological substances to create sterility in some societies. This may be initiated through the use of new substances introduced in food to those countries that tend not to hold down their population; that this does not appear to be something which will be in full swing until later in the decade.

This Awareness indicates, however, that it does appear there will also be certain programs initiated to pay entities in some of the Third World nations to use these substances that create sterility so that the population from generation to generation gradually decreases in those countries.

#### Projections for the Economy

This Awareness indicates that in terms of the economy, much has been discussed in regard to the upcoming year or so, the early part of this decade, in the reading given yesterday.\*[Issue No.90-1 (Ed.) This Awareness suggests, however, that in general entities can expect some downturn in the economy during the early part of this decade, followed by currency exchange, and gradually, as time passes, a general improvement throughout the world in terms of a global economy, that eventually leads to a global currency, or currencies that are closely balanced, so that an exchange of currencies can be easily implemented.

This Awareness indicates it does not appear that within this decade there will be a single global currency. It does appear, however, that even though the various nations will keep their currency, there will be ways of interchanging between the various currencies, so that entities can switch from one national currency to another. This Awareness suggests also, that it appears the European community will switch to a single currency for use with all nations in that Common Market, and that gradually, this will be expanded to include other nations, even including Eastern European nations.

This Awareness indicates that there appear to be times in which entities will feel great concern with

regard to the economic situation, but that the fear will actually be greater than the events that follow during these time periods.

This Awareness indicates there are entities who are predicting absolute chaos in which the economy collapses and violence erupts in large cities, to the degree that no one is safe and to the degree that starvation is everywhere. This Awareness indicates that this *does* have a potential. This Awareness sees, however, that there is a diminishing likelihood of this occurring because of the new relationships between the West and the East European and Soviet nations, the new relationship that is emerging, which can create a healthy interchange of goods, supplies, services, and marketplaces for such. This can actually serve to open economic doors that prevent this predicted chaos from occurring. Were these events not to have occurred, by now or within a short time, the Eastern Bloc nations would be in economic ruin, as well as the United States, and many of the Western nations would begin to feel economic collapse.

This appears to have been a likelihood during the coming year and especially the following year, and may still to some degree have an effect, but it appears because of the new cooperation between East and West and the possibility of greater growth of commerce between these areas, there will be an alleviating factor which benefits both Eastern and Western nations.

#### China and the Middle East

This Awareness indicates that at present, China is in a state of limbo, suffering from a kind of stagnation requiring that China alters its ways sufficiently in order to come back into the marketplace with a global acceptance in order for it to benefit, or to remain a kind of outlaw nation and suffer the consequences of its actions.

This Awareness indicates it appears that China will only be able to continue in its isolation and communistic approach for a limited time. This Awareness suggests this is not more than three years, more likely two years or less.

This Awareness indicates that in regard to the Middle East, this area appears to be an area of greatest uncertainty, that there can be progress made which will alleviate the potential for war, and that it appears some progress is being made in that direction; that unless some deliberate intentions to disrupt the violence in this area were to occur, this progress would continue. However, it does appear that there will be deliberate efforts to disrupt this power balance, and because of this, there is the possibility, approximately 40 or 45 percent chance that the Arab nations could turn against their neighbors to the West.

This Awareness indicates that this again is not a high likelihood; it is a possibility. The events which will trigger this are not yet on the horizon, but the volatility in terms of consciousness and in terms of resentment and in terms of fanaticism and potential manipulation of that fanaticism are all present.

6.

This Awareness indicates that any force that would deliberately trigger off this action would be doing so in order to disrupt the general world peace that is developing, and such would do so only because of a belief and hope for gain from such disruption.

This Awareness indicates that this does not appear to have great power or chance of success, but that things can change. Power struggles can alter events, and the possibility is there; but the likelihood is not there, at this time.

#### Alternative Healing & the Entertainment Area

This Awareness suggests this is the summation of events which entities may expect to foresee in this coming decade as being the major circumstances; that any questions related to this may be asked. This Awareness did not discuss food or natural healing processes, and that these generally will continue to grow and develop as an alternative healing system, whereby entities become more and more aware of health and ways of using certain dietary, beneficial foods to prevent disease.

This Awareness indicates that major education and improved schooling on all levels is also foreseen.

This Awareness suggests that other areas that may be of interest would be in the area of entertainment. There is seen the theater of the future, which is based on holograms. These are not seen as being predominant at this time, during this period, but the development during this period, especially in the latter part of this period, is seen as taking root.

## THE HOMELESS, CRIME & DRUGS IN THE DECADE OF THE 1990's

### QUESTION:

Would Awareness discuss briefly the situation of the mounting number of homeless entities in this country, particularly in this country, as well as others, and the mounting crime rate, and the drug situation which seems to have no solution?

### COSMIC AWARENESS:

This Awareness indicates that the drug situation as that which is likened unto a cancer unto society. It is a way of controlling the masses. It is and was implemented as a kind of social experiment, wherein there was a question of whether the masses could be controlled by the use of drugs, and to what extent. There was at one time a belief that by getting the masses hooked on drugs, they could get them to work at a cheap wage, with only the reward of food, shelter and drugs, to keep them in line.

This Awareness indicates, however, that the experiment resulted in the realization that those who are on drugs are not satisfied with working, but want to steal from others and take from others, and are willing to become violent to do so. This becomes a threat to those who would wish to control and to manipulate a work force of drug slaves.

The experiment also revealed that while the crime increases in this nation would justify creating a police force, the economic structure was not sound enough to pay for such increased

police state, and therefore the entire concept as being less appealing and more hazardous to the welfare of those who are in control. Therefore, the drug scene as that which is gradually being seen as more problematic for the leaders, the ones in control, and though it has much to do with the creation of a two-tier society, the super-rich and the super-poor, it does not appear to benefit the super-rich in any way that is of a permanent nature, and there are many who shun the use of drugs, and who still make up a large middle class.

This Awareness indicates that this, then, has run its course as far as an experiment is concerned, yielding little in terms of what was desired from this experiment, and it appears that, because of this, the drug scene, the use and sale of drugs, will gradually be phased out.

This Awareness indicates that the economy, however, at this time, is in shambles in this country, and the only thing keeping anything afloat is credit, and the credit cannot be paid without the stimulation of new products and new markets to keep a labor force going, to build things that can be sold. Thus the economy, if it can effect it, may benefit from the use of the new market that is created in Eastern Europe and Russia, or markets that may be opened in Third World countries, that the drug money has been used in part to help finance certain wars, particularly in Central America, and to help keep certain organizations afloat in this country and in other countries, but that these are seen as being less and less appealing.\*

This Awareness indicates that there are too many entities who know what is occurring, too many entities who are exposing information in regard to the drug activities, and too many who are barely escaping in time to keep from being dragged into the drug scandals, wherein they have other reputations and purposes that they do not wish tarnished.

This Awareness indicates it appears that the drug scene will gradually diminish, that much of the drug scene will seem to lose popular appeal, that it was especially appealing when Neptune was in Sagittarius, this for a period from approximately 1969 to one or two years ago when Neptune was in Sagittarius, the drug scene had great expansion and growth. It now being in Capricorn, will run into greater difficulties, in part because the influence is curtailed to a more business level and the business level strictly centers around money, whereas in the early stages of Neptune's entry into Sagittarius, there was a spiritual search or overtone in the use of drugs, these being the psychedelics and marijuana, where entities were seeking something more spiritual from the use of these drugs.

This Awareness indicates that the present use is simply related to social prestige and money itself, and this does not have the same kind of lasting appeal that was present in the early stages of Neptune's sojourn through Sagittarius.

This Awareness indicates the likelihood is that this drug scene or problem will fade rather quickly during the next three to five years, and will not be

7. a major problem during the second half of the 1990's.

This Awareness indicates that the greater problem in the second half of the 1990's appears to be in relation to health concerns, partly due to the rampant spread of diseases, terminal diseases, that have been artificially created, and starvation in certain areas, and the need to find satisfactory employment by some entities. These appear to be the major concerns; that there also will be much growth and discovery during this time, particularly related to cultural exchanges, inventions, developments associated with new policies and social discoveries and techniques, networking and environmental concerns, and ways of doing things. This will be a decade in which entities discover how to organize and network and interact with things that are foreign and different, things that are unique and unusual, things that are new to them. It will be not so much a focus on technologies in terms of machines, but technological, social breakthroughs, how to do this or that so that socially things work better.

In other words, relationships and the expansion of one's interest into other areas will become the greater focus.

In terms of high-tech machinery, these things will tend to become more powerful and smaller, more capable and take up less space. Entities will have the outside world at their fingertips through FAX machines, telephones, computers, and television.

\*Awareness did not go into detail about the 'organizations' involved in the drug scene. However, a month later when William Cooper's papers were released, this information was given and Awareness revealed the drug scene could be over within the next 3 years, if not sooner.

## LIFE 10 YEARS FROM NOW IF THE BANKERS TAKE OVER

### QUESTION:

M.N. of Las Vegas, asked a question here I don't think Awareness covered. He asks: "Could Awareness please give us a presentation of comparative Scenarios five or ten years or so into the future, showing people's lives under the banker's rule and under a Congress-run monetary system. This would be to alert New Agers to what reality they are going to get when they just let the bankers create their own reality.

### COSMIC AWARENESS:

This Awareness indicates that the response to this question will be of a rather brief nature; that this could, in fact, be the basis for an entire reading.

This Awareness indicates that were the bankers to be in control of the economy, as compared to a free economy of this nation, with Congress having the control of money, the banking system could do whatever it chooses, in accordance with its best interest, depending on whether or not it wanted to create good times, so as to keep people happy, or whether it wanted to use people and keep them under control without regard for their general happiness.

This Awareness indicates that a banking system that had control of the monetary system could very easily, if Congress had no say, could very easily require that all money be transferred strictly through electronic transfer systems, so that no cash is available, so that an entity seeking to buy something at any terminal or cash register anywhere, would have to give his or her bank account number, and some kind of proof of identification, which many entities suggest would be a tattoo, and from this identification and the bank account number, the cash register electronically taps into the bank account, to determine whether or not there is any available funds for the purchase. If funds are available, the purchase goes through. If funds are not available, the entity cannot make the purchase. If the entity is unable to use cash, the entity would need then to go out and find some kind of monetary benefits, perhaps working for someone, and talk that entity into going to some bank or cash register, which could transfer funds into his account for the work that was done, and then the entity might be able to extract the funds to make the purchase he or she originally intended.

This Awareness indicates that so far all appears to be quite simple, straightforward, and easy and fair, but what if these who are in charge of the banking, who are in charge of running the world, were to decide to pass a law dictating what job each entity was to do, and where the entity was to live? And if the entity did not want to live there because the entity would prefer, for example, to live in the same state where his family lives, or to work at a job with someone he knows, or to work at a job he feels more inclined toward, or has in interest in; and suppose the entity decided that he does not want to shovel coal or dig a ditch in North Dakota for some pipeline, or whatever else he was assigned to do, and suppose the entity decides to go AWOL [Absent without leave] and leaves the job? There is no money in circulation, so the entity seeks to find someone whom he can work for to earn a little money, and goes with the entity to the bank, has money transferred into his name and account, and immediately those in control know *exactly* where he is, and rush out, or send out the police, to pick up the entity and take him back to work, digging the ditch in North Dakota, or whatever else he was assigned to do.

This Awareness indicates the hazards of such a system is not so much that the system itself is a violation, but that it can become violative, and there would be nothing anyone could do to prevent it, once it is set in place. You would have to trust those who are in power over your economic livelihood, to be beneficent dictators, and if they were not beneficent, there would be nothing you could do except obey, and in such case, an entire population of the world could easily be enslaved. For if, as a policeman, you were directed to go out and pick up someone who had left his job, and you decided, "Hey, I don't want to force this fellow to go to work where he doesn't want to work; I'm not going to do my job," then suddenly, you, yourself, become a social criminal, and you, yourself,

8. may then be subject to punishment or imprisonment. Thus, where can a revolution start that would break down such a system to return free choice to the people?

This Awareness indicates on the other hand, with Congress being elected by the masses to produce the money, to shell out the economic livelihood of a society, the entity participates in forming the laws by electing the Congress who represents his or her point of view. And if these Congresspeople start implementing laws that curtail the freedom, they simply vote them out on the next round, and vote in someone who will be more inclined to protect the individual's freedoms, so that they are never put in such a position as to have to worry about or think about, "How do I create a revolution to free myself and my fellow associates from this enslavement?"

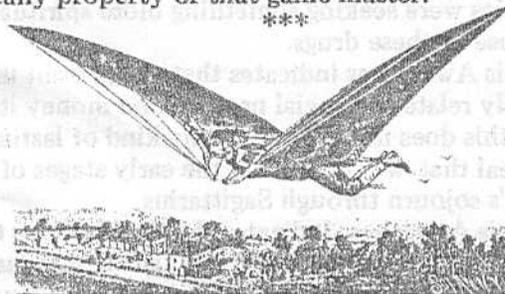

This Awareness indicates that were the economic system created in such a way as to allow individuals to have a voice in the running of the system, so that all people could vote on who's in charge, they would then have the influence to make sure that whoever is in charge is working in their behalf, and this would assure freedom. It would prevent economic enslavement. It would not be possible for one to enslave the masses for any long period of time, if that entity could be recalled or voted out at the next election, or that group or body of entities.

This Awareness indicates that once the economy is turned over to private ownership, wherein rules are made by the private owners that affect all who participate in the use of the money, so that rules are made and you have joined the game and must abide under those rules, for there is no other game in town, or on earth, then, at that point, you have no further options. But if you are one of many who combined as a democratic society to elect the game master, or the body that will set the rules of the game, and if you retain the power to periodically replace those,--that game master or the body that makes the rules,--then as a player of the game, you have, at some point along the line, along with others who are playing the game, to seek a revision of the rules by removing the body or the game master, and replacing them with a new game master or a new body who makes new rules, in accordance with your democratic wishes.

This Awareness indicates that, essentially, it's the difference between Congressional management of the economic system, or private ownership or banking management of the economic system.

Where you are under private ownership, you are basically property of that game master.

\*\*\*

## WHAT IS THAT MYSTERIOUS PYRAMID-SHAPED CRYSTAL FOUND ON A FLORIDA BEACH AND WHICH SHOWS COLORED MOVING PICTURES OF HUMAN-LIKE CREATURES?

### QUESTION:

J.N. of Las Vegas, sent in an article from the tabloid, March 28th, 1969, 'The Sun.' I'd like to read this and he wants to know if this information is valid and if so, if civilians could have access to this crystal to study it. It reads:

"Excited researchers are trying to determine whether a fantastic beach find is a remnant from a lost civilization, debris from a distant planet or nothing more than an extraordinary hoax!

A pyramid-shaped crystal found on the beach displays distinctly colored moving pictures of human-like creatures which are dressed in golden hoods.

The backdrop shows an eerie, barren landscape dotted with unusual structures and vehicles similar to saucer-shaped spaceships.

A pair of teenage schoolboys found the 11-inch crystal half-buried in the sand on a south Florida beach just north of Miami. The youths turned their incredible find over to authorities.

The amazing crystal has reportedly gone to a top-secret government laboratory where scientists are working around the clock trying to determine its origin.

An official cloak of silence has fallen around the object, but one insider has leaked some information on Project Jewel.

"This thing could set the world on its ear--if it proves to be an authentic artifact," says the man, who's viewed and probed the colorful crystal.

"The main theory at this point is that the crystal is some sort of transmitter that had been left here by visitors from another planet. The color and clarity of the three-dimensional figures are truly fabulous."

But there are others who view it as proof that Atlantis existed thousands of years ago. They point to the location of the find as an indicator it washed up from the ocean floor. The source says an answer is expected in the near future."

That's the end of the article. Would Awareness comment on that, please?

### COSMIC AWARENESS:

This Awareness indicates that this appears to have been that which is a remnant from another civilization; that it did indeed serve as a kind of transmitter; that its purpose as that of holding or transmitting messages as a kind of hologram; that it uses different energy.

This Awareness indicates that it appears to be such as energies that can be moved from another source, such as in a broadcast, to enter this crystal and be moved about, or frozen, much like the freezing of a television screen, a picture; that the picture at present is frozen, but with the right instruments could be animated or moved to receive other pictures and images.

It appears that it is some kind of instrument for viewing past and future. It appears the civilization using this as that which is of a higher technology than anything present in your known technology. It also appears that this particular instrument is more recent, in nature. It is not from Atlantis, but rather from a force more recent, from other than your known technologies. This Awareness refers you to the Cooper material in which he speaks of these aliens having the ability to look forward and backward in time; that this as such an instrument; that this as related to such an instrument. \*

This Awareness indicates that it is likened unto a three-dimensional screen rather than a flat screen on a television set. The three-dimensional screen as that which is capable of creating three-dimensional images within the crystal pyramid.

\*Revelations of Awareness issue No. 90-2 (The Alien Presence: The William Cooper Material): \$5.00 from CAC.

### DOES THE CRYSTAL WORK LIKE A TV SET?

#### (FOLLOW-UP QUESTION):

So the moving images they see of entities, it's like a television set that you're viewing of what's actually happening at that moment on another planet. Is that correct?

#### COSMIC AWARENESS:

This Awareness indicates that this may be happening in another place or another time, or it may simply be a broadcast of a recording of such a thing; that the broadcast may be stored from a previous recording of the actual event, or may be a stored recording of one which was picked out of the atmosphere. This Awareness indicates that the past events as vibratory actions exist in time and space, even after they have passed from view, and some technologies have the ability to find these vibratory rates and to capture them in images and to record them for repeated play.

It is in this manner that the aliens described in the Cooper material have been able to show historic events of the past. This Awareness suggests they also can see into the future. They cannot, however, assure that the future will follow what they see, because there are influences that may be initiated which can alter the future.

They are rather seeing future events based on present inertia.

This Awareness indicates that if a train is traveling at a certain speed, and if each mile of the train track ahead is perceived as a time period, then an entity riding on the train at a certain speed can generally predict and see into the future what will occur to that train, knowing that the train will go through a mountain pass at a certain time and what will occur at that mountain pass, proving that the entity knows the mountain pass is there or has the ability to see into that future and know that there is a mountain pass coming.

This Awareness indicates that even with the knowledge of the future, the entity cannot be absolutely sure that a meteor isn't going to fall out of the sky and strike the train or fall in the path of the train before it reaches the mountain pass. It is this principle which this Awareness refers to as indicating that within the limits of the knowledge of the aliens, they can see into the future, but there are certain things outside their knowledge, which can bring to bear an influence on the inertia so that events do not transpire in the manner that they expect or foresee.

This Awareness indicates that unless they can foresee all possibilities, there is no guarantee that what they see will actually be.

**DO THE ALIENS HAVE A HIGH SELF MIDDLE SELF & LOW SELF LIKE HUMANS?**

(FOLLOW-UP QUESTION):

Awareness, do these aliens have a low self, a middle self and a High Self similar to that which humans have?

**COSMIC AWARENESS:**

This Awareness indicates that these entities appear to have more of a shriveled-up subconscious. It appears that their subconscious is more shriveled up than humans. It hardly exists at all. In this sense, because it hardly exists, they do not have access to the subconscious with that ability to contact the Higher Self; It is likened unto a group of beings who have atrophied in part. There appear to be no meaningful connectors to the subconscious or primitive levels of consciousness.

The subconscious being that which is in touch with the mass-mind, or mass-consciousness, as a kind of psychic connecting force related to man's earlier action of entering into animal levels, this because of certain genetic creation, using some of the animal cells in the creation, not from evolution, but from the creation involving the use of animal genetics, mixing into the higher genetics of angelic beings, forming that which is an in-between creature known as man.

These aliens of the insect type that have their evolution based on the insect background: these entities were created differently and have very little

degree of subconsciousness. They are highly evolved consciously, but because the subconscious communicates to the High Self, these entities appear to be cut off. It is for this reason that these entities tend to have a disbelief in the concept of the soul because they have very little soul of their own. It is more or less atrophied.

This Awareness indicates however, they compensate in other ways by being highly evolved consciously and integrate their consciousness in such a manner as to incorporate a universal outlook or perspective which can survive as a memory, even remembering as a kind of conscious energy when passing from this plane, thus, it appears they can regenerate from that conscious energy, by taking on and connecting themselves with other living beings.

**How Aliens Act as Walk-Ins (The Drug SOMA & its Use)**

This Awareness indicates that this accounts for certain actions whereby they may enter into the body of another being, even after they have themselves passed over. This appears to be related to the concept of the walk-in; that many of these entities are taking over human bodies when they leave their own body. These can only take over a human body when the inhabitant of that body is loosened, such as through the use of drugs or alcohol or sickness, or when the inhabitant of that body willingly steps out to give the body over. This Awareness indicates that there is a drug which has been used by certain forces; this appears to be known as SOMA, related to the word 'somnolism'; SOMA being a drug that allows the loosening of the soul so that an entity may leave his or her body to be taken over by a spirit walk-in, an alien walk-in.

This Awareness indicates that more information on this may be given at a different time; that this is getting into areas that are more bizarre than necessary for this period, this reading and this time. However, it does perhaps shed some light on much of the mystery associated with walk-ins and concepts of body snatching and possession. This Awareness indicates of course, there are those more usual and common experiences in which disincarnated humans inhabit or attempt to control and take over an entity's body, as when an entity is possessed by a disincarnated spirit. This is not the same as the alien being inhabiting a body.

The alien being generally inhabiting a body will appear to possess much higher intelligence and greater awareness than most ordinary possession cases. This is what has been described as the classic walk-in; that these entities who are walking into another's body generally tend to be thought of as higher beings. They are not necessarily higher beings though they may be more intelligent, and more technologically advanced. Their morals and their ethics may not necessarily be of a higher nature.

CAN ALIENS INVADE OUR SLEEP AND TAKE OVER OUR BODIES?

(EVER HEARD OF THE "BIRD PEOPLE"?)

(FOLLOW-UP QUESTION):

There's no danger these entities could get into a person's body while he's asleep or astrally projecting at night, is there?

COSMIC AWARENESS:

This Awareness indicates this is negative. It is only when an entity does not have a strong attachment to their body, when an entity is seeking to escape the physical, either through continual use of drugs, alcohol or is weakened greatly by some physical infirmity, and is actually in the process of dying. Occasionally an entity of this nature will die and the body will be immediately snatched by a walk-in. The entity will then come back from death and will have the same memories as the one who died, but be a different person and have greater knowledge and greater understanding, and those who know the entity will perceive this one to be a totally changed person.

This Awareness indicates that sometimes this is the same person. Other times it may actually be a walk-in. This Awareness suggests you not consider these entities who thus enter into a human body as necessarily being of an evil nature such as portrayed in the movie *The Invasion of the Body Snatchers*; that these entities have been in other life-form bodies, but once in the human body take on the same kind of feelings and qualities as do humans. They may also have that genetic influence that gives them the subconscious and allows them to have contact through the subconscious with that which is the Higher Self.

This Awareness indicates that with humans, the Higher Self tends to be a kind of triune, a three-in-one, which may be connected as one or which may be broken in a kind of schizophrenia so that one part does not recognize the other part, wherein there are barriers. With the aliens, their form causes them to be more likened unto a single mind that does not have three distinct aspects and it allows them to have some of the wisdom associated with the Higher Self, some of the consciousness associated with subconsciousness and the normal consciousness all rolled into one, but because it is rolled into one, the range of their potential is limited to the here and now more than to the past or future or material and spiritual or sensual and passionate levels.

They do not have the passions of humans, nor do they have the ideals of humans, nor do they have the spiritual aspirations of humans; this is in relation to those that have been described as coming from or evolving from the insect molecule systems. This Awareness indicates you must understand that humans did not evolve from animals. These entities did not evolve from insects, rather, certain insect genes were used in the creation of these entities many

eons ago, and essentially theirs was an alteration of a life form with the use of genetic engineering using insect genes; wherein humans were genetically infused with certain genetic coding used by and associated with the more advanced anthropoids, the monkey family.

This Awareness indicates that there are also rarely ever seen, but often mentioned in mythologies, bird people, a people who were creations of a combination of man and bird genes, a genetic creation.

DO THE ALIENS GO TO A GROUP SOUL AFTER DEATH LIKE THE INSECTS DO?

(FOLLOW-UP QUESTION):

These insect-type aliens, when they pass over, do they go to a group soul like insects and creatures or do they go through a Clear Light experience, like human entities?

COSMIC AWARENESS:

This Awareness indicates that they appear to enter into a kind of individual experience, wherein though they touch into that universal or mass frequency or vibration which may be termed the Clear Light, they tend to remain more intact and move on as a single force to their next rendezvous, whatever it may be. If they then move into the form of a human, they then take on those more human qualities; that the human tends to subdivide at the time of passing over, with the subconscious going into other life forms such as plants and animals, feeding those life forms, while the more solid parts of the entity and what may be termed the middle self tend to go on toward that which is called the Clear Light, which is essentially the higher vibrations of consciousness, and then from there these energies move on and may, upon a reincarnation, call back those energies that were discarded, but those energies that were discarded may not actually have witnessed the Clear Light, having instead been harboring in plants or animal vibratory rates.

This is commonly referred to as limbo or even purgatory. This Awareness indicates that these insect types tend to stay more intact on passing over and then move on as one force. They also tend, when moving into human form, to be more aware and more conscious than the average human; not having as well developed a subconscious mind, they tend to be more into the Here and Now of consciousness.

Sometimes these entities, upon entering into the human body, become enraptured with the new-found passions and sensual urges which have been denied them so much for so long, and then, in that expression of releasing those passions and sensual urges, they may develop a deeper subconsciousness. This Awareness indicates that this can then give them the sense of being a more well-rounded human in the sense of human qualities.

This Awareness suggests that the Interpreter be brought from trance unless there is another question on this line.

**WHAT DID THE ALIENS MEAN WHEN THEY SAID TO WHITLEY STREIBER: "WE RECYCLE SOULS"?**

(FOLLOW-UP QUESTION):

As it happens, I did have one more question. In Whitley Streiber's book *Transformation*, wherein these aliens, whom he calls 'the visitors,' came to him and they made the statement: "We recycle souls." Whitley never could completely understand what they meant by that. Could Awareness explain what those aliens meant by that?

**COSMIC AWARENESS:**

This Awareness indicates that this is in reference to a particular action of some of these visitors or what this Awareness refers to as the Greys in particular, wherein they will take humans and use them for genetic experiments, and take the souls from those humans and put them into replicas and release them after having altered them to some degree. They may appear to be the same person, but the soul will be the same, though the body may have been altered and certain aspects of memory may have been altered and certain personality traits may have been altered slightly.

This Awareness indicates that there is much of this that occurs in the underground caverns. When certain entities have been abducted and disappear for some time and then are released, there is that possibility that this has occurred to them. This Awareness indicates that they also may be referring to reincarnation in some instances, but it appears this was not the meaning in this particular statement.

It appears that what this entity meant is that of creating replicas or secondary bodies into which souls are transplanted from one body to another. This is portrayed on the television series *War of the Worlds*, in which this is the means by which these entities snatch bodies and control people to make them their own.

**A WAY HUMANS CAN SAVE THE ALIENS' SOUL**

FOLLOW-UP QUESTION: (Vikki)

One last speculation, in relation to the walk-ins and the information-processing universe. If some aliens receive access to subconsciousness by virtue of becoming humans or coming into human bodies and thus access their own High Selves, won't that affect all of them?

**COSMIC AWARENESS:**

This is in the affirmative; that this is in a sense a way by which these entities may evolve. It is as though humans suddenly become the saviors of the souls of the aliens. It is in a sense a way by which humans or entities who have moved into human bodies may have an influence in altering the species of the alien creation. This Awareness reminds you also, this is not the first time that a civilization has absorbed the enemy rather than defeating the enemy.

While the enemy and invader *assumes* that in the invasion they are taking over, in fact, they are being absorbed. This Awareness indicates that the Tartars invaded Russia and within one hundred years were absorbed in the society of Russia.

Questioner:

Thank you. We will now bring the Interpreter up.

(The Law of Gratitude is recited)

ED's Note:

For more current information on the aliens, please refer to the following 'Revelations of Awareness' newsletters:

90-2: Special Report, The Alien Presence: The William Cooper papers, \$5.00; 90-3 (The NASA coverup); 90-4 (The area not covered by Dr. Beter); 90-5 (The Hidden Crisis & the Quandary of the Secret Government); 90-6 (An Update on the Fatima Prophecy: the Alien Connection); 90-7 (World Nations Unifying Against the Aliens), \$3.00 each from C.A.C.

**ON THE POSSIBILITY OF GLORY UPON THIS EARTH**

This Awareness indicates there is a great possibility of glory upon this earth whereby the darkness upon the face of the deep can be taken away, whereby the Beast can be subdued, and whereby humanity's shining face can emerge victorious.

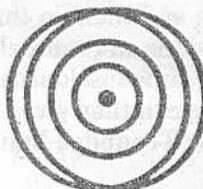

This Awareness indicates it depends upon you, each and every one.

This Awareness asks you, each and every one: 'How many have you served, and how well?

How many have you informed, and how well?"

Cosmic Awareness

(From 'Revelations of Awareness' Issue 80-12)

REVELATIONS OF AWARENESS is a cosmic newsletter, published every three weeks for members of Cosmic Awareness Communications. However, you do not need to be a member to subscribe; anyone is welcome to subscribe. Members are encouraged to study the Awareness philosophy as well as other philosophic and secular material in their search for truth and Who in Fact they Really Are, and to integrate those 'Gems and Nuggets' they discover into their daily lifestyle and basic premise of life, and to act as role models to others. C.A.C. is a not-for-profit, tax exempt organization as authorized by the U.S. Internal Revenue Service. Dues and donations are exempt from Federal Income Tax. All revenues are used to spread the Cosmic Awareness philosophy to others. Cosmic Awareness has indicated that by the year 1995, the masses will be ready for the Cosmic Awareness material, on which the New Age is being founded. But can C.A.C. hold on for that period of time? We believe we can, with your help. Thus donations are encouraged! We desperately need them at this time! Also, please consider the concept of including C.A.C. in your will, along with other charitable organizations you support and hope will continue in their work. (Write C.A.C. for a brochure about making up a will, if you should seriously consider this option.) Current rates: INDIVIDUAL & FAMILY MEMBERSHIP: \$30 per year. CONTRIBUTING MEMBER: \$52; SPONSORING MEMBERSHIP: \$144; PATRON MEMBER: \$1000; ENDOWING MEMBER: \$5000.
