Helping People Become Aware

THE JOURNEY OF THE SOUL....(Continued)

HOW TO

GET OFF

THE WHEEL

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'Indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

"THE FIRES OF HELL"--THOSE UNFULFILLED DESIRES SOME FEEL AFTER DEATH

(HOW TO ESCAPE REINCARNATION,--THAT WHEEL OF BIRTH, DEATH AND REBIRTH)

QUESTION:

A question from D.C. of Toledo, Ohio. "One of the reasons given through various channels for reincarnation in the physical world, is what they call 'unfulfilled desires'; like wanting to be rich, powerful and famous, or attachments to something they prized highly when in the physical world in their previous lives. At the same time, these channels will claim all the desires of the dead spirits are instantly met in these inner planes. It looks like another contradiction, because if their 'desires' are met in these inner planes, then what do they need the physical world for? Who would want reincarnation in the physical world?"

COSMIC AWARENESS:

This Awareness indicates the only desires that entities meet in the inner plane, are those of their own, and in meeting their desires, this is that which may be termed the 'flames of hell'; that when an entity has burning desires and no physical way of fulfilling these desires, it is indeed a kind of personal hell for such entities. The attachment that entities form in regard to anything on the physical plane as that which creates a desire for the entity, and if such attachments cannot be released at the time of passing over, then these become the desires which haunt or burn at the entity, prompting him or her to return for fulfillment of those desires.

Thus, the entity who is obsessed with some kind of addiction, upon passing over is still inclined toward the addiction, but has no way of fulfilling the needs. The entity who craves alcohol in the physical, or food or other substances in an extraordinary sense, will pass

over into the next level, but there will be no way of receiving the fulfillment of his or her cravings. Such entities often attempt to vicariously experience some kind of satisfaction by aligning themselves or attuning themselves to some living being and attempting to tap into the living being's experience of drinking or indulging in some kind of physical satisfaction which is parallel to the entity's own addiction. Thus you have the spirits hanging around those who are drinking, that they might indulge in some etheric way or astral manner, the alcohol which is being ingested by the ones still in physical form.

This Awareness indicates that likewise, if an entity has unfulfilled desires or desires and attachments which cannot be released upon the passing over, the entity will be inclined to return into the physical form in order to again indulge in the pursuit of fulfilling those desires. Those who imply that your needs and desires are totally fulfilled upon passing over, do not understand. It may be fulfilled only at the moment of death when the entity moves into the Clear Light that the entity may then experience a oneness, a unity that is beyond anything the entity has previously conceived, but this experience does not last eternally, and the entity then begins to sink into the lesser lights, and here the cravings which have hounded the entity, begin to reemerge, causing the entity to seek reincarnation.

This Awareness indicates that movement into the Clear Light as that which allows the entity to see truth, to see the ultimate reality for a brief shining moment, and this is that which gives the entity a new understanding, if the entity is capable of recalling that brief moment in its future sojourns. Too often the entity forgets that brief moment of truth and in moving back to the lesser lights, the entity begins to think more in terms of his or her own cravings and needs and then the focus changes and the entity again seeks rebirth into physical form, and seeks to fulfill the desires which are still being carried in the subconscious and emotional levels of the entity.

The means by which entities can overcome this vicious circle of life and rebirth, life and rebirth, wherein an entity is born, lives, dies, and is reborn to live again, to die again, meanwhile pursuing one desire after another; the only way this cycle is stopped is wherein the entity's desire become focused on that which is Universal Divinity, wherein the entity wants so desperately to be attuned

to the Divine that none of the other desires have any particular meaning or value to the entity, and in such a situation in which the entity is ultimately attached or attuned to Divinity, then all of the other lesser desires can easily be put aside at the moment of death and the entity will then be more able to stay, to reside in the light of truth; this at least for longer periods of time, as long as the entity remains ultimately and most predominantly attached to the Divine.

HOW SPIRITS USE ENTITIES TO SATISFY THEIR ADDICTION TO DRUGS & ALCOHOL (WHY THE ALCOHOLIC BLANKS OUT)

(FOLLOW-UP QUESTION):

When these entities that have passed over that are addicted, for example, to alcohol, and they continue to have this craving, how does this work, when they're able to suck up the essence of alcohol from the earth; do they find a hole in the aura of some physical alcoholic and attach themselves to it, or do they hover around the actual tavern, or are they somewhere else and they're still getting the essence of the alcohol?

COSMIC AWARENESS:

This Awareness indicates that they attach themselves to the aura of an individual and assist in creating holes in the aura, whereby they can then siphon off some of the feeling and experience of the drinker; in this manner they vicariously experience the drinking of another so that they share in the indulgence. For the drinker, this entity will feel himself at times lacking control of himself and may experience expressions that are not characteristic of himself if he were not drinking.

This Awareness indicates that it is in such cases that the mischievous or hungry spirit is inhabiting and controlling the body during such times; that it is for this reason that many alcoholics blank out and do not remember having done something. They were in fact pushed out of their body and the invading spirit was involved in the action of moving and manipulating the body during the time of the blackout or blanking out in terms of memory. For example, an alcoholic may indulge in some action, in terms of traffic or in terms of driving or in terms of some behavior toward another, or for example, shoplifting, but when the alcoholic goes to sleep and wakes up and is confronted with what he has done, he may plead that he does not remember at all having done this action. That this may be true, the entity may not recall, for the entity may have been totally absent from the body while the invading spirit was acting and using the body.

When an Imposter Takes Over a Body

This Awareness indicates that in some rare cases, the invading spirit can in fact gain so much control over the body that the original individual has little claim on the body, and the alcoholic spirit, having taken over, may still use the entity's name and still have access to the entity's memories to some degree and may still act out the part of the entity to some degree, but may actually be an imposter living in the body of the alcoholic and may use the body under that entity's name, with the entity being almost non-present, much of the time in the body.

Generally however, when an entity or if an entity makes great effort to reclaim or keep his or her body, the invading spirit seldom has the sufficient strength to counter that claim and force the other out. Generally it is a kind of death wish that leads entities into becoming alcoholic and letting other spirits invade and take over their body. It is not necessarily a death wish in all cases; it can also be a type of escapism, whereby the entity just doesn't want to face responsibilities for being oneself and would just as soon turn it over to someone else, at least on a temporary basis. This is one of the main motivations for entities indulging in heavy drinking. They simply want to get away from themselves and find that alcohol is a means by which they can do this.

WHO IS RESPONSIBLE FOR ONE'S BODY —YOU, OR THE INVADING SPIRIT?

(FOLLOW-UP QUESTION):

In the example given by Awareness just now of an entity who allows himself to be possessed by one of these spirits and then gets involved in say, an accident, a drunk-driving accident and claims he can't remember any thing about it. From a cosmic point of view, this does not absolve him of his responsibility, does it?

COSMIC AWARENESS:

This Awareness indicates that this is negative. The entity is responsible for the body which he has been given in this lifetime, and if you turn over your vehicle to another who is incompetent, you are still responsible for the outcome of any damage your vehicle may have caused; —this in reference to the bodily and physical behavior as well as to any automobile involved in such behavior.

IF ONE WASTES A LIFETIME, DOES THIS CREATE A 'GHOST OF THE SOUL'?

QUESTION:

Another question along this line by D.C. He writes: "Another reincarnation theory by the channel Vern Overly, gives this type of explanation: 'If the life just ended adds nothing to the present soul accompanying it, if it detracts from the soul you desire to become, the soul rejects that portion and refuses to accept it as part of the whole. It then becomes a true ghost of the soul. That portion hovers above the soul, attempting to fuse. It actually haunts the soul. This ghost must be refined to the point where it is acceptable to the soul so that it may infuse with the entire entity. Reincarnation takes place. The refinement of this portion must come through physical life. This rejected part of the soul is the part that suffers whatever karma it needs to in order to be 'refined'. Could Awareness say this is correct, or is there anything wrong with this explanation on reincarnation?"

COSMIC AWARENESS:

This Awareness indicates that this as... This Awareness suggests this be reread again.

(The above is read again)

This Awareness indicates that the essence of this statement being that if experiences in physical form do not contribute to the development of the soul, they

then become likened unto problems or ghosts of the soul which need to be in some way resolved or attended to in order that they may be refined and brought into some kind of purposeful attribution for the development of the soul. This Awareness indicates that generally speaking, if the life experience contributes nothing to the soul either pro or con, the soul has gained nothing, nor has it lost anything as a result of the living experience and it is simply stagnating in terms of that portion of life experience, whereby it does not receive a kind of punishment, nor does it receive any kind of reward for having accomplished nothing. It has simply wasted its time.

In one sense, the wasting of precious life energies in itself may be thought of as a punishment or a kind of detriment to the soul, for it is not easy to come by life experiences and entities should use all of their lifetime and the experiences to the best of their ability for the soul growth. This Awareness indicates however, that if an entity is allotted a certain number of years and only uses a small portion of those years for soul growth and wastes the rest of those years, it is in itself the entity's greater loss to have done nothing with the life which was given and the opportunities which were available.

This Awareness indicates that *It* does not see that this wasted energy will haunt the entity unless the entity becomes aware of how much time is wasted and dwells on this in a sense of feeling guilty. However, the wasted energy may serve also as a lesson to the soul to be more attentive and value what time is given and to use that time properly for greater growth and development of the soul. This may occur in a future lifetime if the entity learns something from the previous lifetime in which energy was wasted.

This Awareness indicates that the way the question itself is asked, it is not something that can simply be answered in an affirmative or negative without this deeper understanding of what is implied.

MONKS, NUNS, LIFE IN THE MONASTERY --DOES SUCH A LIFE ADVANCE THE SOUL?

FOLLOW-UP QUESTION:

What about those many entities, who, over the centuries, spent their lives in nunneries, or as monks, in meditation and solitude, away from the actual participation in life? Would Awareness say that on the average that these entities' souls grew considerably during a lifetime like that, or would they have grown just as much or more had they actually participated in the world that was going on around them at that time?

COSMIC AWARENESS:

This Awareness indicates it all depends on how the entity focused his or her purposes in life. If the entity lives in a monastery and his or her purposes are to work on self, to improve self, to become closer to the Divine and the entity spends a great amount of time and energy and focus on the effort to become closer to that which is the Divine, then this can be quite rewarding to the entity; while another entity in a monastery may spend much of the same time thinking about how enjoyable it would be if he were elsewhere, farming or indulging

in some kind of more pleasurable activities, and the entity may spend little time thinking of how he or she wishes to be closer to the Divine, so the *place* where these entities are has nothing to do with their development, although the environment can enhance one's opportunities and encourage one to think more in regard to the Divine and to oneness with the Father in Heaven, or whatever one perceives as being the symbol for Universal Consciousness.

This Awareness indicates that likewise, the entity who is out and about in the world of conflict and competition may have much in terms of variety of activities and actions and distractions, so that the entity finds it most difficult to even think about the Divine, let alone take the time to dwell on It. The entity may be so totally involved in the interrelationships and the efforts to accomplish something of a materialistic nature that the entity has no time at all to worry about afterlife or abstract realities or the Divine aspects of consciousness, while still another who is in the same situation may see these relationships, these conflicts, these problems, as learning experiences, which can help the entity to become closer to the Divine, which can help the entity to learn more about self and to take these lessons of self and propel oneself into closer harmony with the Divine.

This Awareness indicates it matters not so much whether you are in a monastery or in society. It matters only where your intent and focus is, where you place your values.

WHAT IS A SOUL AND HOW DID IT BEGIN?

QUESTION:

Another question from D.C. "Awareness stated: 'that the subconscious emotional aspects of an entity creates and builds a body.' Is this subconscious part of some Universal Subconscious plane or dimension that the entity takes from and then attaches somehow to the physical vehicle it is building, or is this subconscious part of the mind of the entity? What would happen if an egg was fertilized and there was no entity that desired to 'attach' a piece of subconscious to the physical vehicle? Would the physical vehicle still develop normally? , no physical defects, and perfect heartbeat and breathing, and then be born still-born?"

COSMIC AWARENESS:

This Awareness indicates that every aspect, whether it be an egg or a gene in the genetic structure of an entity, or whether it be simply some feature on earth such as a cliff or a crag or hillside; every particular creation is in some way a fragmentation of Universal Consciousness, and carries with it its own unique energy of a conscious nature. This Awareness indicates that when speaking in terms of the egg, or when speaking in terms of a gene involved in the formation of an entity, that physical feature or physical tangible topic which you are focusing on, that subject known as something, is actually a mental creation in Universal Consciousness. It is fragmented for sure, but it is still a portion of Universal Consciousness, and the genetic creation carries with it consciousness, and that soul is the outgrowth of that consciousness, and the physical manifestation simply accompanies the soul. It does not

create the soul, nor does the soul attach itself to a body,⁵ but rather, the body is the byproduct of the soul.

How Experiences & Memories are Carried Over by the Soul

This Awareness indicates essentially, the subconscious is the soul, and the entity's soul or subconscious accumulates experiences while in or out of the body; the greater accumulation of experiences occur when in the body. The conscious mind is simply a kind of regulator for evaluating and regulating the attitude toward these experiences that come to the soul when in the body. The conscious mind serves as a kind of guidance factor; it is not as complex or complete as the soul; it may be referred to as the spirit or the mind. It is a kind of outgrowth of the soul that develops as a result of the experiences which the soul encounters. This may also be thought of as the personality, the collection of mental information by the conscious mind or middle self, is that which may be thought of as a kind of computer being developed by the soul for this particular sojourn.

The information that is accumulated in terms of knowledge is not stored in the soul for exact retrieval in future lifetimes, but the memory that does remain from these accumulations is more in reference to the synthesized information that can be put into emotional value in terms of character growth and development. Thus, a soul may come in having had much previous lifetime evaluation of experiences, to have a high sense of morality of what is just and what is fair, and though the entity cannot remember how he or she came to have such a sense of morality and justice, the entity's synthesis of all previous experiences has been absorbed by the soul and the soul expresses that fairness and justice in its dealings with others.

This Awareness indicates still another entity may not have had this kind of experience or the conscious mind may not have evaluated experiences in such a manner as to lead to this kind of synthesis or understanding of life and the entity may have a soul that comes back into existence in a future life, again, not remembering details, but because the entity did not have any sense of justice or harmony in regard to relationships, the soul may be such as to be hungry and ready to compete and do battle at any cost to gain some special favor over others. That in both cases, the entity coming back has little memory of the details of previous experiences that have led him or her to the state of being or attitude which is held by the soul, but the results of those previous experiences and the evaluation of the conscious mind has its effect in modifying the character of the soul. It is in this manner that memory is carried over by the soul; memory not being the exact details, but the essence of value that has come from those detailed experiences. The way in which an entity absorbed the message or lessons from his or her experience; this is what is carried over by the soul.

Why Most Entities Can't Remember Their Last Lifetime

This Awareness indicates that were entities to consciously delve deep enough within the soul, which is also known as the subconscious, it becomes possible that they can even remember details; this likened unto details of past lives, or past-life experiences; however, the majority of entities do not focus this carefully on

the soul or any of its deeper memories; therefore, the new conscious mind in the next lifetime will not likely have memory of previous experiences that have gone into the molding or creation of the entity's soul.

This Awareness indicates that generally, the soul's development has much to do with what the soul attaches itself to in the next lifetime, for a soul that is highly competitive is not likely to attach itself to someone who is quite gentle and spiritual in nature, unless the soul is actually altering its value system to desire such, but the soul that is highly competitive will seek to find some kind of environment in which it can express that competitiveness and will identify with others who have similar values, and therefore, the soul may come back into a situation in which there is a great competitiveness, not only in expression, but even being expressed toward the soul, so the soul may in this manner choose its own karma of being oppressed by competitive people, simply because the soul values competitiveness and thus, the soul enters into a situation in which it is battered by competitive forces around it because in essence, it is competitive itself and was drawn toward that kind of energy.

How One's Karma is Determined Between Lifetimes

This Awareness indicates that this is often the way by which karma is determined; that one who has certain values in terms of personal behavior is drawn toward those energies that are of like kind, and thus, the entity is given a dose of medicine that helps the entity to understand itself better, and the karma of such experiences may be such as to allow the entity to learn something and to repent from such expressions. Thus, an entity who is a warrior may return into the midst of a war as a small child. That likewise, an entity who is quite humanitarian may return in the next lifetime in a family in which those around are very humanitarian and do much to help the entity to excel, giving the entity opportunities for greater and further expressions of humanitarian behavior.

Essentially, in the spiritual level, like attracts like; thus the soul is drawn to that which is much like itself. In the physical sense, opposites generally tend to attract and entities of opposite nature often are attracted to each other because there is something about the other person which one entity is lacking, and the entity subconsciously hopes that it will rub off on them. That often entities of opposite nature come together attracted by their opposites and then, after a short time, end up fighting each other because of the opposing qualities which first attracted them.

This Awareness indicates that the shy person may be attracted to the one who is quite extroverted, then, after several years, the extroverted person and the shy person begin to become so used to each other that the shy person is no longer quiet and shy. The extroverted person finds the shy person to be too pushy and not allowing enough room, and the extroverted person may become somewhat shy also in terms of expression around that other person. This may help to modify their quality somewhat. It can also lead to conflicts, so that they are tired of each other's personality and in such situations often those who are attracted by opposites find themselves combatting each other because of those very qualities.

This Awareness indicates that in most cases, a relationship fares best when there are basic philosophical and cultural likenesses and family values are similar, even though they may have other opposing ideas and personality traits; that personality traits can be modified, ideas can be modified, but it is very difficult for entities to modify cultural differences, philosophical differences, and family differences for these things can lead to a great disagreement and make things very difficult for entities to accept.

If one were to accept, for example, a great difference in terms of family values or cultural values and the entities were forced to change their cultural values in order to win approval of other family or cultural behavior patterns, they might find it most difficult, because loyalties might need to be broken between family or culture, and breaking of loyalties by any of these parties, the breaking of loyalties by anyone, is very traumatic and can lead not only to illness, it can lead to poor self-image. Therefore, it is better that entities coming together have at least cultural and philosophical similarities.

It does not mean they need to come together with similar or cultural backgrounds being identical, but if they still value their cultural or philosophical backgrounds highly and there is disagreement between the two, the likelihood of a happy relationship diminishes. Likewise, when families have strong family ties and values that are in conflict with those of one's selected mate, it will create difficulties that may prove to be almost too much for the relationship.

This Awareness indicates however, even personality differences, wherein opposites being attracted because one is shy and one is not shy; for example, one is talkative, one is quiet; this kind of relationship can generally work out even with arguments, if other levels such as the cultural and philosophical levels are reasonably compatible. However, there are also problems involved wherein personalities can create differences that are incompatible, even though they may have the attraction at one point, wherein the entity is so outgoing in regard to social life, and the other is very quiet and likes to avoid others.

Women Can't Change Men's Behavior

If the one entity cannot truly accept the outgoing person's behavioral pattern of being out and about with friends all of the time and finding themselves left at home all the time, the entity can't really accept this, but thinks: "Well, if we get married, this will all change. He or she will stay home." This Awareness indicates you may be in for a great surprise because entities generally do not change their behavior very much just because they are mated with someone. Their behaviors are seldom changed by any considerable degree. There are many, especially women, who think that they can reform their man, only to find that the man seldom changes. The woman generally has to modify her life to accompany the life of the man, to accommodate the life of the man. If you are not prepared for that then you must think twice about marrying this person.

This Awareness indicates that it does not mean that you cannot change a person, it just means that it is not as easy as it looks; that for this reason, the old adage

that opposites attract carries only part of the story. Opposites often create differences. There is a certain level of attraction on the physical plane between opposites,--the positive and negative draw to each other. On a spiritual level, the negatives generally gravitate toward the negatives and the positives generally gravitate toward the positives and like attracts like. Of course, this has many applications, and depending what entities are speaking of, needs to be examined and discerned carefully.

Concepts of a like nature tend to draw interest from others who have similar concepts so that which is spiritual or that which is mental often attracts in the sense of life to life, but there are also those concepts of opposite nature in which entities are attracted mentally in a sense of wanting to challenge those who have opposing viewpoints in order to persuade them to alter their viewpoints and take on a like viewpoint, so even though there is the challenging action of opposites on the mental level, it is generally in order to either destroy an opposing viewpoint or to get the opposing viewpoint modified so as to become of like viewpoint, but in so doing, entities often gravitate toward those of opposite viewpoints.

This Awareness indicates that as a general rule however, opposites attract; on the spiritual and mental levels, like generally attracts that which is like itself. Thus, those values which entities hold generally are attracted to those values of similar nature in others so that entities who have similar values generally work well together, even though they may have opposing viewpoints on other levels. This Awareness suggests the next question may be asked.

IS THIS HOW THE UNIVERSE WAS CREATED ?

QUESTION:

A question by S.R., Ontario, Canada. He writes: "Awareness, you have mentioned that the majority of souls were created at the same time when the concentration of the Light Forces exploded. However, in the philosophy of Cosmic Awareness, the creation; you mention that the soul is created when there begins the self-awareness. The birth of a soul is when there is a creation of a free mind and not the creation of simple awareness. Are you essentially saying that the simple awareness, the mere vitality, existed before the explosion of the Light Forces took place and it is the explosion that created the soul?"

COSMIC AWARENESS:

This Awareness indicates that it is very difficult to explain the way the universe created things, because the term explosion is inadequate. This Awareness indicates that it was not so much an explosion as an awakening; that wherein energies of mind come together in a focus to the point wherein that focus then becomes so intense that there is an accumulation of great energy and that great energy in the focus, such as might occur in one's meditation, reaches a point of ultimate intensity, there is that which may be a bursting forth, a release of that energy. This is much likened unto the climax in the sexual act, whereby energies then are broken free from that focus, released from the focus and are sent forth in all directions.

This Awareness indicates it is not likened unto this being some physical actions, since the universe is a living being and it is all mental. It is all consciousness, but this mental or consciousness explosion as that which created fragments, fragmentations, and these fragmentations had with them certain qualities, one being magnetic, so that certain fragments created magnetic centers and certain aspects of consciousness followed and attached to those magnetic centers and these became what may be termed souls.

The Black Hole in Space

This Awareness indicates that *It* has also given that all material objects that have life force carry with them that which may be termed as the black hole. In physics the black hole is that which is a very dense area of great gravitational pull, that pulls life into it, and from which no light emerges, and that black hole, absorbing light, brings light into itself and then, from there, it goes into another dimension.

The soul is much likened unto a seed. Every seed has within it that potential for transmutation into another dimension of expression, and thus, the seed when planted and given certain light energies and certain nutrients as catalysts, experiences something that causes it to invert or transform, much likened unto actions associated with the black hole, and out from this inversion comes the beginning of a plant. The soul is similar in that once it is planted in physical reality, and given certain nutrients, out from this soul emerges that which is the beginnings of the plant of the human consciousness; the conscious mind may be equated to the buds that grow from or sprouts that emerge from the seed.

This Awareness indicates that the human mind then, as the sprouts, continue to emerge and grow, leaving the roots underground as the subconscious or soul. These souls are not created as fulfilled beings, but have the ability to evolve from their many experiences, thus, even the seed may be thought of as the soul of the plant, and animals and their magnetic centers with their memory, which may be equated to a subconscious, the memory of all they have experienced; these animals may also be thought of as having souls.

Generally, when speaking of souls, entities restrict the term to that of humans. This Awareness uses the term in most instances as referring to the magnetic center of an entity's being, whether that entity is a plant, an animal, a human or the earth itself; that magnetic center which is conscious and which carries memory as that which may be thought of as the soul, thus, when entities ask where and when was the soul created, *It* needs to interpret what the particular questioner is asking about, what particular reference is this questioner referring to in regard to the soul, because the soul is being created in some minute ways, all the time.

There are many souls being created in plant form, in atomic levels, and these miniscule souls are not what the questioner was speaking of in the question. Thus, there can be an inconsistency when someone asks in regard to the soul and means a certain level or aspect of the soul, as compared to a question a year later by someone else who wants to know something about

the creation of the soul in regard to another frame of reference.

This Awareness indicates essentially, the soul is that vortex between life in the sense of spirit and matter in the sense of image or reflection of spirit. The soul is that vortex that lies between matter and spirit. It is also commonly called the magnetic center, although magnetic is not actually the proper terminology to describe the soul, because it is mental more than magnetic; but the mental aspects draw things to itself, therefore it can be thought of as a mental magnetic force. It also has certain radiant forces or powers, because the soul not only draws toward itself, it also reaches out and touches other souls.

This Awareness indicates the problem with many questions is the problem of language and of how entities' concepts have been programmed to think in terms of separatenesses, to think in terms of physical tangibles and one cannot always explain in great detail all of these nuances of vagueries involved in dealing with energies that are beyond the perception of one's vision, hearing, taste, tactile senses or the sense of smell. That if entities could see with their mind's eye the invisible energies, the frequencies and vibrations that exist everywhere about you, and how certain things that you perceive as material have their certain magnetic, mental magnetic centers, and that this kind of energy is everywhere present but that your senses tend to block out your ability to see these things, then indeed you would have an understanding not only of reality, you would also have the ability to ask the questions in a way that could be answered in a consistent manner with reality.

The Importance of the Frame of Reference

This Awareness indicates it is likened unto those who ask questions regarding *Star Wars*, answers being given, while someone later challenges: "But I thought *Star Wars* was just a myth!" This Awareness indicates that indeed it is a myth, but within its own framework, there are certain answers that can be given as in the affirmative. That likewise, entities ask questions in regard to the story of the New Testament, much of which is myth, but here again, if asked within a certain context, a certain question within a certain context, is it necessary to keep repeating or to inform entities that this or that is mythical?

This Awareness indicates that if you ask a question about Santa Claus, this Awareness would answer the question in regard to the color of Santa Claus's beard as being white, but is it really white if there is no such character as Santa Claus? This Awareness indicates it is as with everything, necessary to look at the framework or the glue, the frame of reference which you are asking about, and realize that within that frame of reference, there are certain truths, even though the frame of reference itself may be totally false.

Explaining Detroit to a Flea?

This Awareness indicates that if you were to be given a globe in which a tiny individual lives on the inside, this individual for example being a flea that lived on the inside of a globe of the earth and you were somehow able to communicate with that flea, and it were to start asking you questions in regard to: "Where is the United States?", and you were able to tell it where

the United States was, and if you were able to explain all of the questions that flea asked in regard to the geography of the earth, and you gave that flea an entire course and lesson on geography, would you have been truthful? Would the flea actually know what you know, because its ability to perceive the globe the way you perceive the world is limited to that which is on the inside of the globe, and not to what you perceive as the entire earth itself?

Not only do you have the advantage of being able to see the outside of the globe that the flea lives in, you also have the advantage of knowing that it is but a symbol of the globe on which you live, and that Detroit is here on the globe, but on the outside and not on the inside, and that it is really not here, it is over there by the Great Lakes in the United States as a real place in which it takes considerable time to travel to, or to walk about. Thus, your perception of Detroit is much different from that of the flea. Have you then lied to the flea? Or have you done your best to explain something that is incomprehensible to the flea?

This Awareness indicates because the flea's perception is so different from that perception which you have, it is impossible for you to use the same words or language understood by the flea with its limited perception, to explain the realities that you perceive. It is the same for this Awareness; that because of this, there are often inconsistencies in things that are said. It could be no other way. This Awareness indicates that if you then have other people sitting around the globe, explaining to the flea where things are in the geography of the world, it becomes even more difficult and even more confusing to the flea, because not only are there occasional errors in which someone perhaps says: 'Detroit is right down there by Salem, in Oregon. I've been there, to Detroit lake!', or perhaps someone says: 'Detroit is over in North China!', the flea will become ever more confused, and it may ask: "This psychic tells me this and this psychic tells me that! Which is correct?"

Spiritual Trivia—Does it Really Matter?

This Awareness indicates that there are many ways of looking. There are many many ways of perceiving. There are many many entities who have certain insight, have certain understanding, but their understanding, though proper for their frame of reference, may be in conflict with someone else's frame of reference, so that an entity questioning can get all kinds of conflicting information. Does it really matter? Some of it does. Some of it doesn't. You have a general idea of what your purpose in life is, a general idea of how to live your life, a general idea of how things came to be, a general idea of how you can make the best of things here, a general idea of how to be helpful to others; all of these exact detailed questions in regard to spiritual trivia, as to 'how did this or that come to be?', where it really makes no difference to your life whether you know that or not; all of these things don't really matter.

The accumulation of spiritual trivia, while perhaps fun, and while perhaps giving you a sense of having accumulated vast amounts of information, but wherein there are certain discrepancies between what *this* psychic says and what *that* psychic says in regard to the anthill and its spiritual place in the universe or in regard to this or that experience,—what does it really matter?

Spiritual Trivia not the Main Purpose of Awareness Messages

This Awareness indicates that while *It* wishes to provide entities with information, it is important that entities understand also *Its* purpose is not strictly to provide entities with spiritual trivia, whereby they can speak to their friends about spiritual trivia which they have learned.

It is not the purpose of this Awareness to inform entities that they can understand all of the details of soul creation or of transmigration of the souls, or any of these things. These are the byproducts of the purpose and action of this Awareness. These are things which may be of interest, they may sell publications, they may help draw the mind to something that in the reading process allows the mind to run across something of significance and value to the soul's growth. This Awareness indicates that *It* must indulge the human mind with spiritual trivia long enough to keep the human mind interested and reading, in hopes that somewhere, along with the reading there comes insight that helps the entity to grow and develop a deeper spiritual understanding.

The Very Nature of Mind is to Distract Spiritually

As far as the bizarre information that tantalizes the mind, that allows the entity to wonder and ask more questions for satisfaction of the mind, you must understand the mind will never be satisfied. It is the nature of mind to indulge itself in more and more and more and more and more information. It is the nature of the mind to never be satisfied with what it knows, and to want to know more and to want to analyze everything. It is the very nature of the mind to create such a confusion within itself in terms of knowledge that it keeps itself eternally occupied, because the very nature of the mind is to distract the entity from the spiritual pursuits.

This Awareness indicates however, it is also the downfall of the mind that it does these things, that it is so enraptured by knowledge, that the pursuit of knowledge, the indulgence in continual trivia of the mind, allows the soul to have some kind of time to develop and occasionally, something gets through when the mind is preoccupied and enters into the soul in such a way as to help the soul discover something that is of significance, that is of value. The soul could care less about the spiritual trivia. It only wants to know what should it do to make things better.

The Soul is Not Interested in Robotoids

This Awareness indicates the soul does not have any regard or interest whatsoever in robotoids, in what is occurring in China. It does not have any interest in the intrigue that is going on behind the scenes in Washington, or Moscow; all of these things are for the pure entertainment of the mind. The mind is itself tabloid-oriented. There have been some remarks that the *Revelations of Awareness* is the tabloid of the metaphysical field. That in a sense this is true. Much of the indulgence in these messages is for pure entertainment of the mind, so that along the way, here and there, something gets planted in the soul, something gets through the mind and enters into the soul. It is that hidden message in these readings that is of significance. It is not the details of who really said what, and who killed this person in history, and did this person actually live at this time, or was this an imposter, or was this person killed or is the person still alive? All of these questions are for pure entertainment of the mind.

This Awareness indicates what really counts is what gets through to the soul. This Awareness indicates that these questions for the mind are allowed by this Awareness so that the mind can be distracted long enough that this Awareness can get information through to the soul. This Awareness has no interest other than that in giving trivia or spiritual trivia.

ED's Note: (Tabloid, indeed!)

THE WEB OF CONSPIRACY: (THE ALIEN PRESENCE)...Continued

MORE FLESH FOR THE SKELETON (PART 4)

C.A. (C.A.C. General Reading, May 3, 1990)

THE INFLUENCE OF RADAR ON UFO'S

QUESTION:

Awareness, we're here for a general C.A.C. reading, with questions sent in from the membership. Does Awareness have an opening message?

COSMIC AWARENESS:

This Awareness indicates that there is further information in response to a question asked last month by an entity in regard to the reasons why some of these UFOs were forced or brought down in crashes. This Awareness indicates that this is seen as relating to certain anomalies of the electronic field, whereby radar interfered with the workings of the craft; that these were first discovered as an accidental interference to cause the crash of certain of these craft, such as the Roswell incident.

That once it was clearly realized that radar was the cause of bringing these craft down, this method was then used on certain occasions to bring these craft down. This Awareness wishes entities to understand that there are certain effects from radar and from other electronic apparatus that affect many of the most highly sophisticated technical weapons and craft, even today. This Awareness reminds you of certain situations in which helicopters that were highly sophisticated have crashed due to certain radar frequencies or other electronic frequencies interfering with some of the instruments.

Also, this has been noticed in even airlines, wherein there was at one time a concern about lap-top computers or small computers being taken aboard airliners, and these airliners then were required to be shielded in such a way that the computers could not interfere with the controls in the airliners. That this as part of the reason why some of these craft crashed, even though they were of a highly technical nature.

This Awareness is attempting to cover the various cracks in the information that have not been fully addressed which can be covered. This Awareness suggests that any other questions may be asked at this time; that this topic may be covered and energies moved on to other areas, upon completion.

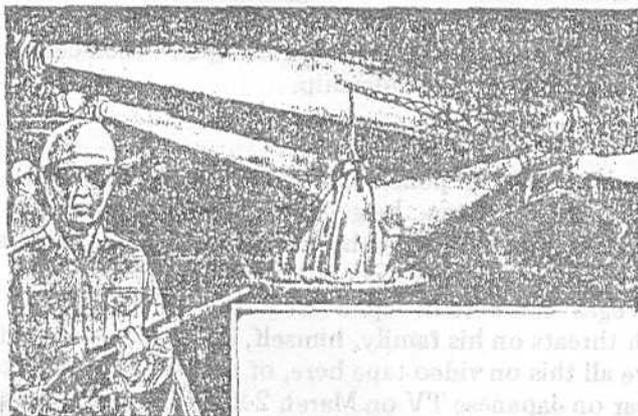

DO UFOs CHANGE VIBRATORY RATES ?

(FOLLOW-UP QUESTION):

If radar can bring these UFOs down, how is it that there's these stories and sightings of UFOs just disappearing into solid ground, and also right directly into the ocean? Do they change their vibratory rate or something when they do this?

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative; that the radar was an interference at a time when it was not expected. There were certain actions taken of a deliberate nature to create a kind of energy field which interfered with the ship's own electronic field and instruments; that when the ship is functioning without interference, it has enormous capacity to move in and through different dimensions in terms of vibratory rate, to enter into what appears to be solid matter, or through solid matter; that this is likened unto light penetrating glass; that when a substance is of a higher frequency than light it can penetrate and move through matter. It can then reassemble by reducing the frequency when it reaches its destination. This Awareness indicates there are bases underwater, on earth. There are also bases on the moon. There are bases underground on earth and underground on the moon, too.

THE NATURE AND PURPOSE OF IMPLANTS

QUESTION:

A.B. has a question: "What exactly is the nature and purpose of the devices which Cooper states 1 in 40 humans have been implanted with, and is there anything entities can do to prevent alien abductions of themselves and others, and if they have already been abducted, what can be done to help them?"

COSMIC AWARENESS:

This Awareness indicates that these devices serve the aliens as a kind of monitoring device to allow them to: (number one) communicate with that entity telepathically when desired; (number two) keep track of that entity when desired; (number three) use the entity for their own eyes and ears; and (number four) in some cases to use the entity as a bomb. The entity can actually be programmed to explode and may be considered as an alien weapon. That this is more rare. This Awareness indicates that the implant placed near the optic nerve as that which is used for allowing aliens to view what the entity views. Those implanted near the back of the ear are for allowing them to hear what the entity hears. There is also, on occasion, an implant in the left hand, in the wrist, which is designed to be used for directing the entity in terms of certain training; this in terms of technological training that may be required by the aliens at a future time, such as in the firing of weapons in behalf of the aliens.

This Awareness indicates that there have been attempts to remove these implants but the removal is of extreme hazard and generally would result in death; especially that which is planted near the medulla oblongata in the back of the neck, in the back of the head. This one is designed more for the control of the entity. This Awareness indicates that these entities are perceived by the government once they are implanted by aliens as being alien agents, even though they may have been innocently abducted and accepted as abductees without any choice in the action.

There is a concern by the government that in the event of conflict with the aliens that these entities would be used as alien agents. This Awareness indicates there have been incidents in which the abductees with their implants have been reimplanted by government efforts to serve in a reverse role, giving the aliens false information or serving to monitor the aliens, but this has been of a more unsophisticated level, and relatively unsuccessful.

CAN IMPLANTS BE DETECTED BY X-RAYS ETC? (MORE ON SPONTANEOUS HUMAN COMBUSTION)

FOLLOW-UP QUESTION:

Can these implants be detected by X-rays or magnets or some other device?

COSMIC AWARENESS:

This Awareness indicates the government does have tools or devices which can detect the implants; that Whitley Streiber as one who also detected his own implants and presents at lectures photographs of the implants; this being from a kind of thermal picture, such as the Kat-scan type. This Awareness indicates that you may on occasion hear of or read about spontaneous combustion, or you may on occasion hear of entities who for some unexplainable reason simply

10. explode. This Awareness indicates that these are usually related to the implants of aliens that have either been set off by the aliens deliberately or which accidentally were set off. *

*For an indepth discussion on this subject, please refer to 'Revelations of Awareness' issue No. 82-23 (Human Fireballs: The Mystery of Spontaneous Human Combustion); \$3.00 from C.A.C.

MORE FROM JAPAN...

IS THE "WINDOW" BEING CLOSED DOWN?

(The Discrediting of William Cooper Begins)

QUESTION:

In relation to implants, K.L. in Japan writes: (there's several questions here. I'll read his letter). He writes: "MUFON and also William Moore are working on the discrediting of William Cooper already. Moore has already made a 200 word report he's giving out which is part of a "much longer and more complete version of my investigation." He's sending an unedited version on computer disc to some groups who want it. Robert Lazar has been on TV here too. A Japanese film crew went to Area 51 and filmed the UFO demonstrations from behind the mountains.

UFOs appeared just as a large dot floating and jumping around. On computer analysis it was shown to be a totally different kind of light from the usual car headlights, different spectrum perhaps. That film was shown on TV here and I have a copy. Lazar's whole story was on TV here nationwide. Lazar signed a contract to appear on Japanese TV together with, (I've forgotten his name,--the guy who had an alien implant taken out of his leg). They were to come together, but Lazar didn't show up. They called him live over the air to his home and introduced him.

He said he didn't come because he was given a death threat which said that if he came he'd never get out of Japan alive, or if he did, he'd be killed immediately after returning to the United States. This was all on nationwide TV." And he goes on and on. There's a lot more information there, but the first question is: This man who's travelling with Lazar evidently extracted one of these implants from his leg. Is this valid? They put them in the leg also?

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative; that this as having been reported from various other sources also. This Awareness suggests that the remainder of this entity's letter be continued as it gives further information regarding the situation in Japan which can be of benefit to your readership.

(READING CONTINUES):

Okay. He writes in pencil and it's rather difficult, but if you'll bear with me...he goes on: "Pressed on with who called him with a death threat, Lazar said it sounded like his senior "Dennis"; actually Dennis was on TV in Las Vegas and here in Japan last year, and he had had death threats on his family, himself, his wife and so forth. I have all this on video tape here, of course. Lazar was to appear on Japanese TV on March 24th. I get the impression there's danger at this point to try for new inform-

ation, but all this stuff on TV, once it gets on nationwide TV, it's old information and can't be stopped.

"I don't think there's any danger to us pushing this information around. What used to be the biggest source of UFO programs in Japan: the 11:00 PM Show finished last month shortly after the would-have-been Lazar show, after 25 years of operation. Perhaps the authorities or powers-that-be want a breather to see how all of this released information goes down. There are other programs on UFOs from time to time. In fact, Lazar's story wasn't on 11:00 PM Show. That's the one he didn't make.

"Of course there are books galore here, they say, and I believe it's true. We can write and get anything printed in Japan. By the way, the Pleiadeans' Samjese, is also a woman. She's Billy Meiers' big contact. Meiers is totally discredited in the U.S., probably because the authorities didn't want to create a false sense of reality with all the Grey bases you've got in the U.S. Meiers is in Germany and Switzerland at times. Also, he's just written a book in which he flies back in time with Samjese and meets...Emanuel, the one who the Jesus myths and stories were woven around. He saw the C21 Bible which supposedly is quite different from C20 Bible. Meiers' Christian friends of course refused to translate all that and doubtless others don't want the shock to Christianity it would cause. Here in Japan Meiers is widely accepted and not discredited like in the U.S."

Hmm. Let's see..the writing is really pinched and hard to read. He goes on with a P.S. "Lazar didn't end up dead yet because there was this possibility in March of '90. Cosmic Awareness was "right on." The way I'm feeling the energies at this time is that we should all do what we can to get all this mass produced, and TV shown info out as much as possible, but take a little rest in regards looking into NEW stuff. By the way, the latest TV UFO show here showed photos of "the Cabbit," a pig-cow, and a horse with a 5th leg growing out of its back. They had simulations of the clone sector of the alien base showing aliens fetuses inside glass tubes and a wall of cow-bladder look-alike things. I don't think that this was the real video, but an excellent studio copy. All of these UFO programs here have mutilations and copies of the aliens and crafts. They even showed a simulation of an attempt on Cooper's life, where he was run down off his bike by a limousine and received his big facial scar."

That essentially is what he said in this latest communication. My other question was, this thing about Lazar: Does Awareness see this as a clamping down, this death threat, or was this just some crank out there?

COSMIC AWARENESS:

This Awareness indicates that these entities appear to have pushed the UFO concerns beyond that which was intended; that there are certain areas of exposition which these entities have given that are of grave annoyances to the people who have interests in keeping the information secret; that Lazar as having a kind of naivety that is associated with youth; that Cooper as having a kind of conscience that is associated with idealism, and between the two they have given truth a great position in their lives, which many others would like quelled.

11.

A New & Subtle Form of Murder Now Being Used
This Awareness indicates however, that the cat is out of the bag, and therefore, the information can be repeated and it becomes meaningless for these entities to be killed at this point. It is such that it would only help to verify the importance of what they have to say. This Awareness indicates that they do need however, to be extremely cautious in that the common approach used in destroying entities who have done such as these is not to destroy them in a way that looks like they have been killed, but rather to cause them to appear to die from natural causes.

This Awareness indicates that for example, the use of the radioactive needle placed in the seat of a car, wherein an entity sitting on the seat over a period of time receives continuous doses of radiation without knowing it, and then develops cancer. Within six months the entity is dead. This form of murder has been used frequently to rid those of people whom are seen as threats, or as potential problem-causers. This Awareness indicates that many of the witnesses to the Kennedy assassination were destroyed in this manner, and many others involved in Project Bluebook and other secrecy areas were destroyed in this manner. It is one of a number of silent weapons of destruction to give the appearance of some natural illness causing an entity to die, when in fact it is just another form of murder.

"ACOUSTIC SHOCK"--MURDER BY TELEPHONE

QUESTION:

Speaking of silent weapons of destruction, I spotted an ad in a recent issue of *Strange* magazine, which I'm going to read to Awareness and ask about. The ad reads: "Scott Parker, 1035 Inis, Beaumont, Texas 77706 is in need of any information on 'acoustic shock,' a phenomenon involving an inaudible sound that can be sent over the telephone and will interfere with a person's heart rhythms, possibly killing them." That's his classified ad. I'd like to ask Awareness, is there such a thing as 'acoustic shock', and if so, how and why is this being used?

* *Strange Magazine*, PO Box 2246, Rockville, MD. 20852.

COSMIC AWARENESS:

This Awareness indicates that such a phenomenon could be created to affect the heartbeat through ultrasound or infrasound, especially through very low frequency, so as to be inaudible. The hearing range is only within a narrow band of potential frequencies, and these frequencies can have effect on rhythms and on the frequencies of the electrical body of an individual. The question of why would anyone do this or use this kind of weapon of destruction; it would simply be a way of destroying someone without an obvious weapon, creating a more difficult path to the murderer.

This Awareness indicates that it could be done. The question of *why* people do such can only be answered in the nature of mankind and his or her values.

Then this man who wrote this ad, he has heard of this technology, but as Awareness indicated, it has not yet been perfected or implemented. Is that correct?

COSMIC AWARENESS:

This Awareness indicates that it appears that this has been used as a kind of extra low frequency or ultra low frequency weapon since the time of the early 30s; it was known during such times. It has since been perfected and used in different ways for different purposes, and may be considered as a silent or hidden weapon, not commonly used, but available to certain individuals within certain areas of those secret groups involved in military and ulterior types of activities.

DOES A NEW TYPE 'RADIATION' CAMERA DETECT ALIENS IN ITS PHOTOGRAPHS?

(HOW ALIENS ARE INVADING THE HUMAN RACE)

QUESTION:

In reference to aliens, there's a story in the current *Weekly World News*. I'd like to read this brief article called "Space Aliens Among Us: New Camera Exposes Shocking Proof of Extraterrestrials on Earth."

"A series of startling new photos provides shocking evidence that space aliens are living and working among us. Researchers using an amazing new 'radiation' camera designed for outer space photography have photographed at least 76 individuals they believe are extraterrestrials. The photos were taken in a major European city, but they suspect aliens have infiltrated human populations worldwide—including the U.S.

"These individuals show up in photos of crowds very clearly," explained Dr. Hugo Kornhelm, a Geneva, Switzerland, physicist who helped develop the new camera. "Their heads are surrounded by a faint green halo which we believe is caused by radiation coming out from their brains.

"The extraordinary thing is that the glowing individuals are completely untraceable. We can locate almost any human shown in our photos, but when we try to track down one of these halo people we run into a dead end every time."

Dr. Kornhelm and a colleague, Dr. Max Vanderhauser, discovered the alien-spotting capability of their camera by accident. The sophisticated apparatus was designed to pick up space satellites and debris by responding to minute traces of radiation given off by the man-made objects.

On a trip from Geneva to Oslo, Dr. Vanderhauser fired off a number of test shots at an airport after the camera was slightly damaged in transit. The camera worked fine—well enough to record startling images of "halo people" mingled with the airport crowds.

"At first we had no idea why these green auras were visible around certain individuals in the picture," Dr. Kornhelm said. "In cooperation with local police, we attempted to find them to see if they had been exposed to radiation in their work or homes. But after months of trying to trace these individuals, we found that they've completely vanished. What's more, we cannot find any signs that they existed.

"There is no evidence the space aliens cause us any harm, but it's frightening anyway. They are hiding out among us and we have no idea what they're up to," said Dr. Kornhelm."

That was the end of the article, and they reproduced a photograph showing a picture of about 70 entities, about 25 of whom have this halo around them. Will Awareness comment on that story please?

COSMIC AWARENESS:

This Awareness indicates that the story as essentially accurate in as far as it goes with the information; that there has been further effort to follow through with other photographs and to track other entities having this halo and this has become a source of concern and interest to those within the intelligence communities of the various nations. This Awareness indicates that the camera as that which can be used for this purpose. It could be used as a principle for developing what may be termed glasses to allow entities to see these auras.

The principle would involve a sensitivity in the glasses themselves that would detect radiation, much as is used in the film of the camera; that it could be placed between two glass shields or lenses so that the vision can see through both lenses and the substance that is responsive to the radiation, so that when radiation is detected, it responds and the viewer is able to then see the radiation or halo. It is also possible for entities who can develop the ability to see auras to detect this energy.

This Awareness indicates that one must be somewhat cautious not to misread an ordinary aura as being of this type, for many entities have strong auras around their head; that generally a green aura simply is an indication of a healthy individual. The energy of radiation as that which shows in the camera as being of a kind of greenish color. It would not necessarily show the same color for one who is psychic and looking at auras. An entity who is psychic, looking for auras, in observing an entity having such a strong aura as a radiation energy, would simply see an overwhelmingly strong halo.

Photo of Alien Halos in May *Weekly World News*

This Awareness does not wish that entities begin to judge or attempt to discern by their own psychic viewing of auras as to who is an alien and who isn't, because it is next to impossible to distinguish psychically the aura of radiation from the ordinary aura of a healthy individual. A strong aura can simply mean an individual is healthy and has a large amount of odic energy in or around the head. This Awareness indicates that the camera as that which does give a relatively clearer view of this energy because it does not pick up the psychic aura or the spiritual aura of the individual. It only picks up the radiation that the individual may be carrying.

**ARE THESE ENTITIES IN THE PHOTO WALK-INS?
(HOW ALIENS ARE INVADING THE HUMAN RACE)**

In this photograph shown in this article, it shows these entities as both men and women, mainly men, with these strange auras, dressed in ordinary clothes. Would this be an example mainly that these entities are walk-ins?

COSMIC AWARENESS:

This Awareness indicates that this is in the affirmative; that this is a way in which the aliens invade the human race, taking over the bodies that are abandoned by entities who have little hold or claim to them. When an entity's interest in the physical vehicle or when an entity's interest in life itself is diminished sufficiently, these walk-ins are able then to push the entity out of the body and move in, retaining memory, retaining identification of the entity's body which they have taken over.

This Awareness indicates that in this sense, many of these entities do have a home life that is traceable. In this respect the article has made some errors in saying that these entities could not be traced. It is as though it were implying that they simply appeared at the airport, but disappeared in space somewhere and had no home or no social records of them having existed. That this is not accurate; that in many cases these entities are simply from other places, travelling, and were not traced because of the inability or inconvenience involved in trying to trace entities whose pictures have been taken previously but who may have been from other areas.

This Awareness indicates that in many cases, the walk-ins continue to live in the appearance of the person whose body they have taken over; that these entities are often perfectly suited in society to continue carrying on the role of the being who stepped out and even the closest associates may not recognize the change.

This Awareness indicates that this is to say that these entities who have taken over are not to be perceived as evil beings inhabiting a body; they may have ulterior motives, but in most cases they are simply desirous of continuing existence and once they have entered into a body of someone who was ready to abandon the body, they adapt themselves to that life, carry on in a meaningful manner the life of that individual and have all the memories and attachments, beliefs and mannerisms of the individual in such a way as to essentially be the same person.

This Awareness indicates that they may forget they were ever another entity because their memory merges with the memory that is recorded within the brain of that individual whom they have walked in to. This Awareness indicates that it is a phenomenon that is allowing many of the alien race to begin anew in bodies that have been abandoned by humans, who have the ability to reincarnate, and to create new bodies for themselves.

This Awareness indicates that it is not seen as something that entities should be highly worried about, especially as long as these entities continue behaving in a normal fashion. Thus, the entities who are seen as aliens are essentially indistinguishable from humans, except by the cameras, and therefore, should be treated as humans, and if misbehaving as a social entity, should be treated in the same way that a human who is misbehaving would be treated.

This Awareness does not advocate that entities begin a witch hunt, checking each other's auras, trying to find out who is human and who is not, for this could lead to great disaster and great problems, for everyone.

HOW CAN ONE TELL IF AN ENTITY IS AN ALIEN ?

QUESTION:

A.B. has one final question in this area. "From what I understand, there are both 'negative and positive' or malevolent and benevolent aliens on the earth at this time. If one comes into contact with forces of different vibrational levels, how may one clearly discern their orientation and motives, and how may an entity distinguish what may be a projection of his or her mind, produced by fear, and what actually IS?"

COSMIC AWARENESS:

This Awareness indicates that there is no way to determine whether your mind is acting clearly or from distortion, unless one is fully aware of the nature of one's mind and is able to rise above fear and can clearly discern. That it is much likened unto asking the question: "How can one be sure that what one is seeing is really being seen, or whether one's eyes are playing tricks on one? There is no answer to this question, for you may be seeing things as things are, or you may just be seeing things as your eyes perceive them and you may be a victim of misperception.

This Awareness indicates that if you have problems discerning reality from truth, you are more susceptible to misinterpretation or misperception. If you have a history of practicality, your chances of being more practical are still with you. There are no special rules that this Awareness can give, such as to say: 'If the alien is wearing a blue hat, it is an hallucination. If it is wearing a red hat it is real, or if it is a brown hat it is benevolent, and if it's an orange hat, it is hostile.' There is no way that these rules can be given to help you discern a hypothetical situation which might come up. You simply have to be discerning, or avoid the hypothetical situation altogether.

This Awareness suggests that if it walks like an alien, if it looks like an alien, if it talks like an alien, if it has no front or back, has grey skin, if it has large

eyes, no nose, small slit for a mouth, stands about 5 feet tall, it is either an entity involved in 'trick or treating,' or it is an alien or someone in costume trying to fool you. You have to learn to discern for yourself or you have to avoid the entity altogether. If the entity is descending from a spaceship or in a secluded area wherein you are alone with it, you may want to leap to the conclusion that it may be a space alien, especially if the ship is in view, and you may discern that it is a rare type of Zeta Reticuli that would be friendly to you, and take your chances that you are right, or you may simply split the scene and look for more human types to associate with.

This Awareness suggests that hypothetical concerns of this nature are mere exercises in thinking rather than of great practical value, because the likelihood of your ever coming in contact with an alien who is of nonhuman form is very rare. The likelihood of your coming in contact with a walk-in in human form is greater, though such an entity is less likely to cause you any problems and is less likely to be recognized as a walk-in in human form.

14. The likelihood of coming in contact with a human from the Pleiades is extremely unlikely. If you see someone with large earlobes, whose hair comes down onto the forehead, further than is normal for humans, you may have simply met an abnormal human, or you may have met someone from the Pleiades. The more likelihood is that you have met a human who has large earlobes, whose hair has come down on the forehead further than is normal.

This Awareness indicates that it is likely of little consequence to you as individuals whether you meet a person from the Pleiades or a walk-in. If you meet a very unusual person with large almond-like eyes, having grey skin, being very short with no distinguishable facial features, or one who is about seven to nine feet tall having a large nose, there is a good chance you may have met one of the Greys from Orion or from Zeta Reticula. This would be significant, and if such occurred to you, and you had the opportunity, it would be wise to go elsewhere with great speed.

This Awareness indicates that there is no need to ask questions or seek further identification from such entities, for their appearance would be obvious.

ARE SOME UFOs LIVING CREATURES FROM OUTER SPACE & NOT SPACECRAFT? (MORE ON OCTAVES, ALPHA & THETA LEVELS, AND THAT 4 QUADRILLIONTHS OF A SECOND)

QUESTION:

There's an article that I got out of a tabloid sometime back that has a rather interesting frame of reference on this subject. I'd like to read this and ask Awareness if there's any validity at all to this theory. The article says:

"UFOs aren't spaceships--They're living creatures.

Many UFOs are actually living creatures from outer space, say experts--who reveal that Prince Charles' great-uncle and mentor, Lord Louis Mountbatten, shared this belief.

"Lord Mountbatten proposed way back in 1952 that UFOs are alive," said UFO investigator Timothy Good of Britain, author of "Above Top Secret: The World-wide UFO Cover-Up."

"He outlined his belief in a letter to a British newspaper editor, proposing that UFOs are inhabitants of other planets rather than mere nuts-and-bolts spacecraft."

Many UFO cases support this astonishing theory, paranormal expert Brad Steiger told the ENQUIRER.

"For instance, there are numerous reports of UFOs moving as though they were creatures rather than space vehicles--such as moving along on the ground and entering and exploring inside homes.

"In one 1973 case, a UFO entered a bedroom in Logrono, Spain. The resident, Javier Bosque, lay terror-stricken as he watched it maneuvering around his bed.

"Moreover, many descriptions of UFOs down through history describe living creatures--such as in the form of dragons and serpents--moving through the skies.

"These entities from deep space may have the advanced ability to transform themselves into various shapes--making themselves look like animals in the past, and solid spacecraft in modern times.

"They are a unique life-form with highly advanced intelligence."

Lord Mountbatten, who served as Supreme Allied Commander for Southeast Asia during World War 2, was Prince Charles' personal hero. They were very close, and their many conversations on the paranormal

sparked Charles' own well-known fascination with UFOs, said a royal insider.

Living UFOs may have evolved on other planets--or from cosmic dust and gas in deep space, said Hayden Hewes, executive director of the International UFO Bureau.

"These sky creatures may even be living, thinking pure energy!" Hewes said.

"Most assuredly, many UFOs are actually living creatures--and undoubtedly are among the universe's oldest beings."

That's the end of the article. Would Awareness comment on that please?

COSMIC AWARENESS:

This Awareness indicates that the term UFO as referring to Unidentified Flying Object, but if it is not identified, it can be any object that is flying; that in this sense, this article is correct in many cases. Not in all cases, because some objects that are flying have solid material qualities and are not what would be normally thought of as living beings, capable of reproducing themselves, even though within the objects there may be living beings capable of reproducing themselves.

This Awareness indicates that in some instances however, these flying objects are indeed capable of reproducing themselves. They are of a vibratory rate that can be photographed by infrared camera and in some cases have been photographed by infrared camera and may be also seen by certain entities who have the capacity to see into the infrared spectrum, such as those who see auras, or they may have the ability to traverse between the 49th Octave and the infrared or 48th Octave, or into the 50th Octave of ultraviolet light.

This Awareness indicates that some of these objects are capable of moving through these various frequencies and of taking on various forms. They can be perceived by entities who tap into that which is the delta and theta brain wave levels; especially the theta brainwave frequencies can be such as to take on various shapes and forms. This Awareness indicates the normal consciousness level, which is known as the beta consciousness, or beta brainwave level, as that which perceives what most entities refer to as reality, as being solid matter.

The alpha wave level is that which rises to a higher vibratory frequency and perceives things as being of a more spiritual and timeless state of creation. The delta and theta wave levels being areas which deal with this particular type of unidentified flying objects that can take on different forms in the sense of what Jacques Vallee referred to as 'coming in from different dimensions,' or being part of a mind-creation, the hallucination of cosmic mind wherein things move from one frequency into another to take on different shapes, to move from one reality into another, and such have been recorded down through history as indicated as dragons, angels or whatever, and as more recently, the unidentified creatures in space.

This Awareness is not however, in referring to the Zeta Reticuli and the Orion Greys, is not referring to these entities as those of the more hallucinatory type, the types that come in from mental states. These entities tend to have greater physical realities, touching more firmly into the beta brainwave frequencies. This does not mean they cannot traverse into those realms, for this is how they travel. In those other frequency vibrations they can traverse great distances in an almost instantaneous movement. In this sense, using not so much their mind, but using the apparatus in their craft to speed up the frequency of the vibrations so that they can traverse great distances instantaneously.

How Light Years are Travelled in Seconds

This Awareness indicates that the speeding up of the craft also speeds up their consciousness. It works hand in hand in this sense, but rather than it being strictly hallucination or imagination, there is a technology involved that enhances and accompanies and influences the mind in its movement into other frequency levels and helps to take the entity into these other realms for instantaneous travel to other places of great distance. Thus, an entity may travel a thousand light years or more in a matter of several seconds and the entity in travelling at such speeds may arrive a thousand years earlier in that area, or a thousand years later, but will only have existed for two seconds in doing so.

This Awareness indicates that this is in reference to the thousands years; the thousand years is in reference to the location of light at the time, when compared to the location of light from which the entity came; that it may take another thousand years for the light to reach the point where the entity left, even though the entity just arrived at the point withing a matter of seconds.

This occurs by altering the vibration to a speed that goes into consciousness levels higher than the speed of light; that gravity is 16 times the speed of light and when entities can approach into those gravitational realms,

15. they move beyond the speed of light and overcome the concept of space as a limitation. They basically teleport from one spot in the universe to another. It is much like if the body represents the universe, and one's thoughts can move from the big toe up to the shoulder in a flash, and the focus of one's thoughts moves from the big toe to the shoulder in a flash, think how much travelling it saves by simply doing it from a conscious level, through mental vibration, rather than having to physically move as a cell from the big toe to the shoulder.

Likewise, entities traversing from one point of the galaxy to another who can raise their frequencies into levels beyond the speed of light into levels of consciousness which vibrate at higher rates than even gamma rays and cosmic rays, these entities can take their entire being in those ultra high frequency levels from one place to another within the galaxy, almost instantaneously, and then begin traversing down the electromagnetic scale to find the frequency on the 49th Octave, the frequency of light, and to reassemble all of the different

How Teleporting Works & How Aliens Beam Entities Up levels of frequencies below that 49th Octave, until they all come together into what you term materialization.

This Awareness indicates that all of the octaves combine to create the material appearance of things, but they are all individually capable of being disintegrated and it is possible for the consciousness of an individual to be moved up the electromagnetic scale beyond the speed of light, because consciousness by its very nature vibrates in higher octaves. This Awareness sees the octave frequency of consciousness as being far beyond the gravitational frequencies, and that the consciousness speed as that which essentially begins at four quadrillionths of a second, at the speed of the appearance and disappearance of the universe; this allows the entity to be or become whatever and wherever he or she wishes to be or to become, and from there the entity may then reassemble those lower octaves and frequencies to bring about materialization.

It is this kind of principle that is involved in the beaming up of entities from their homes through ceilings into the craft, or which allow for aliens to move directly through walls or ceilings or roofs to enter into one's home, even though the home is locked, and to then reassemble themselves as physical beings, or to take one who is a physical being and move them through the barriers of a home into outdoors without even opening a door or window to do so, and in to their ship.

This Awareness indicates that the action of altering the frequencies of individuals or objects is that which allows a kind of universal magic based on principles that are not clearly understood by most humans, but which allow for the technology to do things that would otherwise be impossible. This Awareness indicates that entities in understanding this phenomenon of the electromagnetic scale and the ability to move up and down that scale to materialize and dematerialize, to traverse through time and space, transcending time and space; this is where the alien technology has progressed to, and it is because human consciousness on earth has not quite grasped this principle that it seems so overwhelming and so unbelievable to most humans.

Once it is understood, then it becomes no more unusual than for the native in a backward country to hear

voices coming out of a little box, to hear crowds of people¹⁶ cheering inside the little box called the radio, which in its time for some was as magical to them as would be the alien spacecraft and its technology for you in your world today. This Awareness indicates that while you are able to accept seeing people walking around inside a little box on a screen in your living room, this form of transference of images of entities through the television camera is but a flat dimensional representation of the individual. Using the principle of frequency and vibration, the aliens have perfected the technology to allow for the complete transference of the full frequency and vibration; not just of the image, but of the entire cellular structure of the individual to be transmuted or transported from one place to another instantaneously, or close to instantaneously.

WHY SUDDEN SIGHTINGS OF UFOs IN SPAIN, BELGIUM & OTHER PLACES?

QUESTION:

We got a letter from T.A., who lives in Malaga, Spain, and she sent a long letter about UFOs sometime back which is in my files somewhere, but I'll read this short letter and ask Awareness what is going on. She says:

"I hope that by now you have received my two last letters with some UFO information. Yesterday on TV and in spite of all the coverup, it was said that the town of Brugge, near Gaud, in Belgium, is going crazy with an avalanche of UFO sightings and landings, both during the day and night. It has reached such proportions that the police have cordoned certain areas and people are ordered to stay at home. The photos shown on TV, made by the inhabitants, were spotlessly clear and showed many UFOs about to land near the Belgium coast line. Other photos clearly showed the burnt marks left in the fields where they landed. Something really heavy must be going on if people there are in such an uproar."

That was her comment about UFOs. Does Awareness see this information as being valid and is this going on in Belgium as well as other places around the world, in this proportion?

COSMIC AWARENESS:

This Awareness indicates that this did occur there; there has also been what may be termed a UFO flap in England, also in certain areas of Russia, in certain areas of Canada, in China, and in the United States and in Brazil and certain other South American countries during the past year. This Awareness indicates that the Zeta Reticuli have bases not only in Dulce, New Mexico, they also have bases in England, in Canada, and in other northern states in the United States; that these areas are often areas that are frequented by UFO sightings.

The Radio-TV Directive on Reporting UFO Information

This Awareness indicates there are also bases under the sea. There have recently been sightings in Australia; that the sightings of UFOs in the months of February and March were heavy in the area of Oregon and Washington, more so than at any time in the past two years. Usually these sightings are reported only in local areas and not broadcast on a national level; that there is a

directive to the radio and television stations which allow local reporting, but which does not allow for national reporting of UFO information. This has of recent times been relaxed considerably, which has allowed for incidents such as the Gulf Breeze sightings to be broadcast on nationwide television.

This Awareness indicates it is all a part of the loosening of government coverup of the UFO phenomena, allowing the information to come out gradually, to wait for feedback from the public to see how it is received in an effort to determine whether the masses are ready to receive more information, and if the government will become the object or target of wrath from the masses, for having kept the information secret.

This Awareness indicates that there is a conflict between many involved in the government, MJ-12 and other groups related to the UFO coverup, in which some want the information released, and others want it kept secret for fear that there will be reprisals demanded by the public for having kept the public from knowing of the alien situation. However, because of this conflict, there have been more releases of information and the releasing of information will gradually continue so long as there is no panic or overreaction by the public, especially in regard to hostility directed toward government figures, for it is desired and in the best interests of the government that the people now know what is going on in this regard.

Give Thanks to Officials for Leaking UFO Info

This Awareness indicates that if the people can be given the information in a way that is not disruptive to society and to the government, and agencies involved in the coverup, then this is seen as that which would be of greater benefit and which will be allowed to continue. If, on the other hand, entities become panicky, begin to demand action and so forth, it will create paranoia within the higher ranks of government to where they feel it is necessary to control the flow of information, to stop the information, to deny the information as being valid, and to again attempt to coverup. That in this sense, if entities were to write to people involved in the government coverup, it should be thanking them for letting the information of Cooper and Lear and Lazar and these others to be released to the public, and letting them know that you are very grateful that they are being open about the release of UFO information.

GETTING RID OF BILLY GOODMAN'S UFO SHOW: IS THE REASON LEGITIMATE OR A COVERUP?

QUESTION:

The current *UFO* magazine states that the Billy Goodman Happening show on KVEG-Radio in Las Vegas, is no longer happening; that they got rid of Goodman because he wasn't up to management's marketing desire, it says. This was the radio show that was very heavy into UFO information, every night, I believe, and many times Cooper, John Lear and English, and these other guys would call in. It was a talk show and they would call in and answer questions and so forth about UFOs and the alien presence. Does Awareness see this as a legitimate ending by management, or is this part of the coverup?

It is part of the coverup. This Awareness indicates that anytime there is any show on radio or on television relating to UFOs and the public is aware that this will show, the ratings and tune-ins to that show increase enormously. It is for this reason that so many people on television and on radio are attempting at this time to broadcast as much as they can in regard to UFOs, and because of the increase in listeners to these shows, the sponsors also are happy about any broadcast relating to UFOs.

More TV Commercials to Feature UFOs

This Awareness indicates that during the coming months, in fact, it is already beginning to occur, you will see more and more of the large 500 companies, these the large companies and corporations that will be using in their advertising, references to UFOs. In fact, there is already one which has the UFO landing so that the pilot can get out and get his soda pop. You will see more of this type of advertising relating to UFOs, aliens and so forth, because this is a hot item in terms of what the public demands, what the public wants, as well as the conditioning process that the government is preparing for the masses to allow them to be ready for an announcement in regard to the presence of aliens on earth, which will likely occur before 1994 at the latest, and possibly as early as 1991.

ED's Note: We have heard from numerous members that the Billy Goodman Show keeps popping up. One says he is back on KVEG, but only on Fridays and Saturdays, from 10:PM -12: PM. Another says he has a show on Satellite (Spacenet-3, Transponder-3, 6.8 Audio. You can get him on any shortwave radio with rabbit ears. Our latest report is that you can call Goodman at (702) 792-3611 to hear his answering device tell you where and when his program will occur.

A VISUALIZATION EXERCISE TO HELP TRANSMUTE THE ALIEN ENEGIES SO A PEACEFUL CO-EXISTENCE CAN OCCUR

(The Healing Process Can Begin with Your Help)

QUESTION:

One final question here tonight. We've received quite a few letters from members along this same line, and I'd like to read this letter by R.J., of Gilroy, California, who presents a possible idea for dealing with this situation. He writes:

"The recent reading concerning the Zeta Reticuli, or Greys, is disturbing. If the current drug mania is an outgrowth of their influence, then we can assume correctly that their presence has already harmed man both spiritually and physically. I understand Awareness's neutrality or objectivity, but we should be more than depositors of information for the tolerance of collective mind consciousness. Our history is replete with examples of what happens when a superior culture meets one of lesser development. There may initially be coexistence, but in time man will be placed in a subservient position.

There is one consoling grace,--"life is the sport of the absolute," as stated by Sir Ramakrishna. The plan of Divine Providence may include men experiencing devolution for a while, or until we incarnate as Zeta Reticuli.

There is movement and action on this plane. We should not sit idly by and allow the Greys to descend

17. like locust from the blackness of space. We can direct our psychic defense towards harmony and peaceful coexistence.

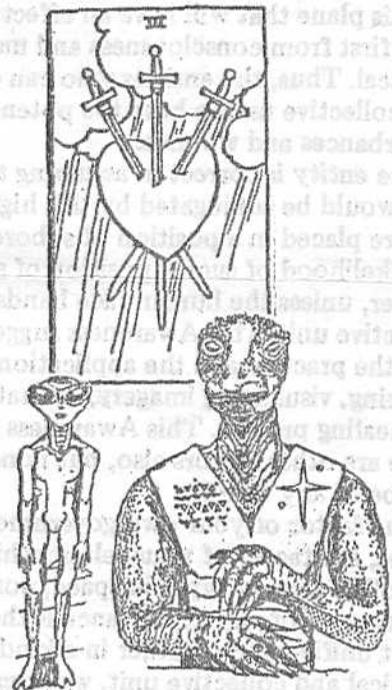

There is a collective mind energy with the Awareness group. I have touched it. The force is strong. The Rune for protection, the Elk, has been energized by the anti-war movement and is in Akasha. If the symbol is directed by the Awareness Group, it will have the same effects it had with Vietnam. We can collectively affect the Greys.*

By visualizing the Three of Swords over a drawing of the Greys and surrounding it with a white light, (or purple which is stronger), we can affect them. This must be properly done by drawing down the Light of the Higher Self.

A series of focused meditations over a period of time, will affect Akasha or the ether from which all manifold existence springs. The Greys are of the physical world. The underlying energy that backs this world is the stuff of imagination. Focused imagination energized by desire achieves results on the physical plane. Sincerely, R.J."

That's the end of his letter. Would Awareness comment on that suggestion?

*The Peace Symbol.

COSMIC AWARENESS:

This Awareness indicates that this is very clear and very correct in its evaluation and as a type of ritual that can be used in the visualization and energizing process. This Awareness indicates that *It* is concerned for the human race on this plane. *Its* concern is as much for the potential that the human race offers moreso than for the performance of the human race. The human race is capable of great things. Its performance has been meager. This is not in reference to those involved in spiritual pursuits and to many of those who have artistic and business activities, but in general, many of the leaders of the human race have either been negligent or aggressively hostile toward others of the human race, and there has been much conflict between cultures, groups and individuals in the human race, so that it has brought on much of its own karma,--but there is a certain potential that is present in the human race that deserves nurturing and a chance.

This Awareness indicates that the Greys generally lack this potential, though they have a great technology and have had a long history and have, in many ways, suffered long periods of time under the domination of the Reptilians, and in some ways they too deserve a greater chance; but because they have, through engineering and through inbreeding, attempted to remove any vestiges of passion, emotion and other soul stuff from their bodies, they have become more likened unto shells than beings. Their potential has diminished. They are essentially a dying race. Their only hope is through intermingling or interbreeding or intergenetic relationship with humans.

This Awareness indicates that because of this, and because humans have only begun to reach their potential, it would like to see the human race continue to have a chance to fulfill its potential. This Awareness indicates that the ritual suggestion given by this entity and the visualization process suggested by the entity as that which can be of considerable value in helping to create a state of consciousness on this plane that will have an effect, for all things stem first from consciousness and manifest into physical. Thus, the entities who can create concepts of a collective nature have the potential to heal great disturbances and wounds.

The entity is correct in assuming that the human race would be subjugated by this high technology if it were placed in a position of subordination and that the likelihood of such a position of subordination is greater, unless the human race bands together in a collective unit. This Awareness suggests therefore, that the practice and the application of this kind of thinking, visualizing imagery, as that which can begin the healing process. This Awareness indicates that there are other factors also, but none of these factors will be of any benefit.

The factor of your own government and military forces, the factor of your relationship with Pleiadians and other human types in space; none of these will count or be of any significance if the human race itself is not unified and together in a kind of spiritual, philosophical and collective unit, working for the good of all. This Awareness indicates therefore, this may be thought of as the first and most important primary action that entities can now take. This Awareness suggests also that entities may benefit by searching out recommended sources of information, reviewing video tapes, audio tapes, books on this topic, so as to become knowledgeable enough to be able to talk to others, to inform others without seeming to be foolish in appearance and to be able to refer entities to these books and sources for further enlightenment, for now is the time wherein entities can wake up others to this new reality; that they might understand the true history of man on earth and the present conditions and the future possibilities.

(This Awareness suggests the Interpreter be brought from trance).

(The Law of Gratitude is given)
