## HOW TO DEVELOP YOUR MAGNETIC CENTER

( THE SECRET OF MANIFESTING IS REVEALED )

(C.A.C. General Reading, February 20, 1991)

OPENING MESSAGE:

This Awareness indicates the entity P.D. Ouspensky, in his books, spoke of the development of a magnetic center. That the concept of a magnetic center as indicated by this entity as that which is likened unto something within oneself that draws oneself to something of interest to oneself. That wherein you have a magnetic center toward a certain topic or a certain information or certain activities or concerns, you will find yourself being drawn automatically to areas to satisfy that quest.

This Awareness suggests that at this time *It* wishes to assist entities in helping to develop their own magnetic centers, so that they may be drawn to those areas of their own specific interests. This Awareness indicates that without naming any specific interests, but allowing you to decide for yourself your specific interests, this Awareness suggests that the general formula for developing your magnetic center would be to allow yourself the freedom to be spontaneous, and while you have energized the interest in a certain topic of interest, whether it be philosophy, religion or some specific type of thing that interests you personally, if you have already energized this by developing a kind of mental and emotional focus, you will find that during times of spontaneity you may be moved to go somewhere that you had not planned.

You might find yourself inclined to go downtown without knowing why, but follow the urge. You may ask yourself: "Why am I doing this? What am I downtown for?" This Awareness suggests you may find yourself walking around and perhaps walking into a bookstore or some other store only to discover that you are now standing in front of a bookcase, looking at a particular book and finding it to be of great interest to you in terms of your quest, that which you have been inquiring into. This Awareness indicates that it is the spontaneity and your ability to respond to these subconscious urgings that allows you to be directed to finding that which is important to your search.

This Awareness indicates that as you allow this to occur, the magnetic center that draws you to these discoveries becomes stronger, and more accurate. It becomes something that does not occur in the realm of thought, but occurs more in the realm of action, without your own willing of the event, occurring only because you open yourself to follow certain urges from inside, without having any idea of where these urges are taking you.

This Awareness indicates that sometimes you will find great treasures in your quest for certain information or for certain contacts. You might, for example, have an urge to go out without knowing why, find yourself on the street, in a cafe, or somewhere, sitting next to someone, talking with this someone, only to discover that this entity has information that you have been seeking, and did not have or did not have means to.

This Awareness indicates that in this manner, you begin to develop and strengthen the magnetic center in your subconscious that allows you to be directed subconsciously to that which you seek and need for your further quest, your digging or researching into those areas of interest. This Awareness indicates it does not take long to develop such a magnetic center around any particular topic that interests you. It is simply a matter of giving it considerable mental and emotional focus, and then letting go and relax-

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

ing and more or less forgetting the concern, and following any subconscious urgings.

This Awareness indicates that the trick however, lies in being able to stop thinking about it while you relax, for it is during the time when your mind is not consciously searching that the subconscious urges shall give a suggestion for you to go somewhere, or do something. It will be recognized as feelings of boredom and a desire to get out and find some kind of stimulation, but it is also likely that during such times, you will find yourself running into exactly that which you need to solve the problem of your quest.

This Awareness indicates that there have been many unusual events occur to entities who have this kind of talent, who develop this kind of talent; that entities, for example, might be driving across the country. They may have an interest in a certain kind of information, and may come to a small town and pull off briefly, only to discover that in this town, on that particular night, at that time, a meeting is being held in which someone is speaking on the very topic that is of great interest to them.

They may consider this to be a coincidence that such an event would be occurring on a night when they just happened to be driving by and that they just happened to decide to stop briefly in the town, and that they just happened to notice the advertisement for the event. This Awareness indicates that if this occurred only once, then it might be a coincidence, but when similar things occur in the entity's life frequently, leading the entity to meet different individuals in similar haphazard and coincidental ways, the entity must begin to recognize that he or she is being directed by a magnetic center or subconscious pull.

Why Should Anyone Pray to Cosmic Awareness?	17.

This Awareness indicates that many of you probably already experience this kind of event at various times. It is a matter of common programming to have these events occur. Some entities are automatically centered to be magnetically drawn to garage sales, and they can, without any knowledge, find themselves driving in a direction totally different from anything they intended or had previously driven, to suddenly come across a garage sale and believe it to be a great coincidence or miracle that they ever happened to drive down that street to find that garage sale, because it had exactly what they wanted to purchase.

This Awareness indicates that other entities may develop this quality in terms of clothing, finding themselves being drawn into clothing stores to discover the most beautiful dress, or other attire, and feel that it was almost like some kind of guardian angel directing them to their find. This Awareness wishes entities to realize that this kind of programming can be developed for mundane things, or can be developed for more meaningful and valuable things also.

#### Don't Just Settle for Garage Sales!

An entity who is involved and hungry for opportunities will develop a magnetic center that draws him or her to constantly find opportunities to his or her liking, and thus, many entities are constantly running into great opportunities for business or whatever it is they are inclined toward, while other entities are being moved to garage sales, or to shopping centers for gifts or other things of interest.

This Awareness indicates still others may find books on spiritual guidance, or books to unravel mysteries that they are seeking answers to. It is important for entities to know that they can build this magnetic center for almost anything that is of interest to them. It is much likened unto the entity who is totally broke and who needs money, and who in standing in a crowded room, suddenly hears a quarter fall on the floor, or a dime, and no one else seems to hear it. It is because the entity is focused and attuned to money that he hears this falling coin.

Likewise, the entity who has a spiritual quest and seeks answers can be drawn subconsciously into a store, a bookstore, or to a meeting with some mentor or teacher who can provide the entity with the answer that he or she seeks. This Awareness indicates that it is important for entities to realize they can develop magnetic centers to answer their quest, whatever it may be, and that in realizing this, entities should consider having lofty quests; that they need not settle for cheap mundane quests because you can energize the solution or answer to your quest, whether it be simple and easy or cheap, or whether it be more lofty, simply by the continued focus on your quest, and in knowing this, this Awareness suggests that you keep your focus on quests that are of significance to your long-term goals and plans, and that your immediate quests which need immediate answers or immediate response in terms of some immediate emergency; these can likewise be answered by intensifying your focus, and in such manner, moving toward that which would satisfy the quest.

This Awareness indicates for example, if you are hungry for a meal and have no money, it is better to move toward areas wherein there is a large amount of food than to move out toward the desert, where there is no food in sight. Thus, putting yourself in the proximity of that which you seek is a step in the direction. Then, by continuing to focus on your quest, opportunities are more plentiful than were you to move toward an area where the opportunities are rare.

Likewise, entities who seek a certain companionship, should move into those directions wherein that quest could be satisfied, rather than making themselves aloof and hoping that the companionship will search them out. This Awareness

indicates that there are many entities who are lonely, but who put forth no effort to meet anyone, for they are too afraid of rejection and do not wish to put themselves in a position of being rejected, but the least they could do would be to put themselves in a situation where there are many people and from the many people, perhaps one or so will offer companionship to them.

This Awareness indicates that in other words, by going toward those pockets of energies that would satisfy your quest, you increase the opportunity for such satisfaction, thus, if you seek information about a topic, you can help by going toward the place where such information might be found. You can move to the bookstore or to a library or to a specialty store that might provide that information.

This Awareness indicates that in other words, you yourself can do much and the magnetic center can do the rest. There are too many entities who expect miracles to be brought to them on a silver platter without their having to get up to walk even to the door, to open the door for the delivery. There is much that entities can do to help in the manifestation of those things which they seek in their quest.

#### IS SYNCHRONICITY A MAGNETIC CENTERING?

##### QUESTION:

Several weeks ago, Valdamar Valarian, the UFO researcher, was in Olympia for a 6 hour lecture, and he spent considerable time discussing the idea of synchronicity, and he read quite a bit from Robert Anton Wilson who has written at length on the subject. The gist, as I recall, was that synchronicity is no accident. It's a built-in natural or cosmic law of the universe. Is basically this what Awareness is discussing tonight?

##### COSMIC AWARENESS:

This Awareness indicates that this as being another way of presenting a similar concept. This Awareness indicates that by synchronicity, entities generally refer to energies coming together in time; that it also tends to imply coincidences of meeting of energies or entities or of things at a time, even if at a different place, in the same time period. This Awareness indicates that the concept of something being synchronized implies a similar time, even though the events or objects are not the same, nor the place the same.

The term "synchronize" means "same time"; chronos being time, and syn as synonymous: "synonymous time." This Awareness indicates that in *Its* discussion of the magnetic center, *It* is speaking more in terms of the manifesting or pulling to oneself those things which are desired by an entity. The quest for something, if held in focus, helps to bring that something to the entity, or bring the entity to that something.

This Awareness indicates that holding the focus on that which you seek, holding the focus on your goal, is that which allows for the manifestation of bringing the goal to oneself. This Awareness indicates that if the goal is unclear, you do not know what you seek, but you seek an answer to a quest, you may find yourself being drawn to that answer, and not recognizing it is the answer until it has appeared to you, until it appears before you.

Thus, you may be drawn into a town, a city, find yourself walking into a bookstore without having anything specific in mind, find yourself walking to a place in the bookstore, and looking at books, and suddenly finding a book that catches your eye, opening the book to read a paragraph, realizing that this book is exactly what you have needed in your repertoire of information, to solve the problem that you have been wrestling with.

#### How to Fill a Vacuum in Your Life

This Awareness indicates it is somewhat different from synchronicity. It is more like being able to satisfy a quest. It is the filling of a vacuum. This Awareness indicates that if you have a vacuum in your life, let the vacuum remain strong, while you energize the exact and perfect energy that you want in that vacuum, to fill that vacuum in your life. Too often, for example, an entity may want companionship, but the entity will not clearly define the kind of companionship he or she seeks, and the true companionship desire may be that of a very close companion, but because the entity will not tolerate the vacuum, the entity tends to fill the vacuum with companions that are not of the quality desired, thus the entity may find himself going out and forming companionships with buddies or friends or associates who do not satisfy the real need to fill the vacuum.

It would be better to hold the vacuum, extend the pain caused by the vacuum. Energize the proper quality of companionship that you want in your life. When the desire is strong enough, the energy that is being envisioned to solve or fit that desire tends to move toward your magnetic center, created by the vacuum.

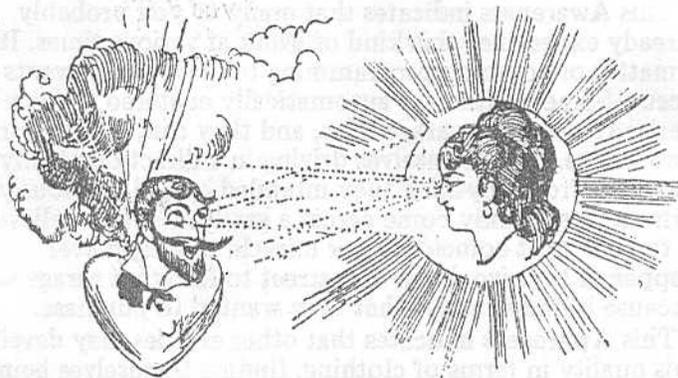

This Awareness indicates that there is a basic law in the universe that a vacuum is abhorred and must be filled, but the vacuum can be filled by the wrong energies, other than those which you desire. This Awareness suggests that desire itself is a vacuum; that desire creates a vacuum in one's life, and thus, by creating a desire, you can suffer from the desire, and the desire can strengthen, and the strengthening of the desire creates the greater vacuum to be fulfilled.

This Awareness indicates that this can cause a negative event to occur, wherein the entity whose motives are such as to violate others in order to fill one's vacuum. This will be of a negative energy from the universe. This negative energy will be brought in to fill the vacuum because of the entity's distortions, when the entity allows manipulation or violation of others to become part of the fulfillment process.

If the entity's motives are pure and the entity does not seek to violate others in order to gain, then these entities' energies of fulfillment from the universe will eventually be drawn to fill that vacuum. This Awareness indicates that it cautions entities not to think that they can manipulate people to fulfill their desires, for people do not like to give up their own personal will to another, and any entity seeking to have control over the will of another, is a violation of universal principles.

This Awareness indicates therefore, in using this *Law of the Vacuum*, or desire as a means of manifesting, it suggests that you not fixate on a particular individual person as being the thing that would satisfy your desire.

This Awareness suggests that you may create a vacuum with the idea that you need someone of this or that particular quality, or feature to fill that vacuum in your life, and then allow the universe to provide for you that entity with those particular features and qualities, but if you choose a particular person and say: "I have this great desire and I am going to create an even greater vacuum in my life

for this person to fill, and it is *this* person who will do it, whether they like it or not!" When you begin to select the precise individual without concern for their personal wishes, using magic to enslave them to your will, you are violating the rules of magic and manifestation, and it will surely backfire on you and cause extreme grief for you. This Awareness suggests you not do that.

This Awareness suggests instead that you list the qualities, if you wish to bring someone into your life to satisfy a certain vacuum in your life, you list the qualities you want; you list the features you desire, and create the vacuum in your life for the entity to fill, and then hold that vacuum and wait for the universe to provide, and it will provide accurately, according to your creative form and vacuum.

This Awareness reminds you that the creation of a vacuum in your life for such manifestation can be somewhat painful, for entities may long for another to come into their lives and may suffer from the holding of the vacuum. This is part of the manifestation process. This Awareness suggests you not suffer too greatly, or appear too lonely and too hungry, or you may frighten off the visitor when he or she appears in your life, for no one wants to be the guest in the home of an entity who appears to want to devour them.

This Awareness indicates that any entity who feels that he or she is the rescuer of another's hunger and cravings will automatically be nervous at least and possibly will be terrified of the encounter. Thus, you cannot assume that the first entity who comes along is actually the one who will fill the vacuum you have created. This Awareness indicates that what you want in your vacuum form is to have an entity appear who willingly enters your life to fill the vacuum, whereby you do not have to grasp and to sink your claws into the entity to keep them and possess them.

This Awareness indicates that the creation of the vacuum, and the vacuum alone should be sufficient to hold the entity. There should be no further need for manipulation or possessiveness. This Awareness indicates the vacuum itself may emanate love and affection toward the entity who moves into your life, but it should not be such as to express excessive possessiveness. This Awareness indicates that there is room for a small degree of possessiveness, even jealousy, after entities become more familiar with each other in a give and take relationship.

FOLLOW-UP QUESTION:

My nephew Eric, who's got some kind of a self-worth problem, always has unsuccessful relationships with women, and he's always complaining about it: "Why can't I find the right woman?" and so on, and we've asked Sam to check this out in the Tarot, and Sam would always see in the cards that there is a right woman, the right woman is out there waiting, but Eric has to change himself before she'll come. Now does this same law operate in a case like this, that perhaps his lifetime mate is out there and he might have made a previous agreement in a prior life for them to get together, but she instinctively knows that he hasn't gone through the necessary changes to accommodate her?

COSMIC AWARENESS:

This Awareness indicates that it is not exactly instinct at work; it is the guardian angels of these entities that will bring them together when the time is right. The time will be right when these entities are seen as being able to effect a compatible relationship; that the guardian angels do not see the time as being proper until each of the entities is of enough maturity to be willing to sacrifice some of their own personal ego in order to express respect and love for the other.

How to Overcome the Rule of the Ego

This Awareness indicates that essentially, relationship requires the sacrifice of ego from both parties in the relationship, and if these personal egos are too fragile and unwilling to give up themselves to the other, then these entities will have a poor relationship. This Awareness indicates that the interesting irony is that the more fragile the ego, the less able the entities are to relate well. If the egos are strong, they know that they are essentially the Phoenix bird and can rise from the ashes of their demise, thus they live and die repeatedly.

They live in action, and they may be destroyed by a word, a slight of behavior from someone, or a feeling of unimportance, and yet a strong ego can rise again, and the ego that knows it can rise again and will always rise again, ceases to be afraid of the ego death, ceases to be afraid of an onslaught from another. This Awareness indicates that when an entity can allow the ego to experience vulnerability, the entity is then ready for love.

When one can experience a relationship in which one's ego is vulnerable without being afraid of devastation, the entity's love can be expressed through risking affection given to another, and the risk itself becomes part of the relationship. There can be no love from an entity who is afraid to risk the ego.

This Awareness indicates therefore, the entity who has a poor self-image may find it very difficult to risk because the entity may be trying to hold on to whatever good self-image is left. It is better that the entity accept his or her own vulnerability, say: "I am weak. I am not the greatest, but I am what I am. What you see is what you get!"

This Awareness indicates that an entity who can accept himself or herself, then becomes stronger by accepting all of the weaknesses along with the strengths. The entity can then risk himself or herself before another and the ego may be shattered by some word or expression of disdain, but the entity can also recognize that: "Hey! My ego has just risen from its ashes. It was destroyed, and now it is resurrected!", for the ego always comes back.

It never lies buried forever. It gets knocked down and it always comes back, and the higher it sees itself, the greater it believes itself, the more surely it will find itself being crucified by someone.

This Awareness indicates that in this understanding the entity may say to himself: "So what's the big deal about preserving my ego? Why not just care for others? Why not just care for this person and not worry about my personal ego?" When the entity can take this attitude, the entity then matures beyond ego level, and becomes a master of himself. The entity is no longer ruled by the ego or self-esteem, but rules the ego and rules his self-esteem.

The entity then is an entity who is able to love others and risk self to present that love, and this makes the entity quite strong to the other, one whom the other can rely on for a permanent and meaningful love, one whom the other can trust to be loving. This Awareness indicates the entity who cannot do that, who loves only when his ego is being massaged, is not highly valued, because the entity's love is only available when the entity's ego is being stroked, and this implies that the entity's relationship with the other is only there to satisfy the need of the ego to be stroked.

This Awareness indicates that many entities build relationships on having their ego stroked by their partner, and if the ego is not stroked, their love is quickly withdrawn and they become hostile toward their partner and thus begins the tug-of-war between them. This Awareness suggests that the healthy relationship is not ruled by the egos of entities, but is ruled by the love entities have which supersedes their personal egos and is expressed in spite of ego hurt and pain.

This Awareness indicates that when this is understood, the entity will be mature enough to have a healthy and meaningful relationship and at such times, the guardian angels will find a way to bring the entity together with his beloved.

## WHEN STRANGERS SUDDENLY APPEAR OUT OF THE NIGHT AND LATCH ON TO YOU

### QUESTION:

In relation to the magnetic centers: over the years Vikki and I have experienced a number of times, when we've been out on the town, so to speak, or at a party, or a dance, where total strangers would somehow approach us and engage us in conversation, and often it would end up that they needed a ride home, and we would give them a ride home and we'd spend a few hours with them, either talking in the car or at their house, and several times these entities have gotten up and shaken our hands and thanked us, and Vikki and I later would ask each other: "What was it we said to these people?" It was generally a philosophical type of information which was instigated by them. It's happened so often that Vikki started referring to it as, "Looks like tonight was another night of missionary work!" My question is: Is the magnetic center, where Awareness mentioned entities could go and find a book and so on, can people be unwitting sources of information and advice, that this magnetic center of somebody else is attracted to?

### COSMIC AWARENESS:

This Awareness indicates this as so, absolutely. This Awareness indicates that this is quite common; that there is a statement given in Oriental teachings: "When the student is ready, the teacher appears." This Awareness indicates that this is because of the magnetic center that draws these entities together. The one has the vacuum, the need to know; the one as a student is in a state of quest, and the other has the answers for that question.

#### A Social Parallel to Sexual Intercourse

This Awareness indicates that the question and answer tend to be drawn together, thus, one having a vacuum and another having something of excess to fill the vacuum, come together, there is a relief for both, for the one having the vacuum becomes satiated with the information that is given by the one who had the information to answer the quest, and the one who had the information was carrying around with him or her, information that needed to be shared.

This Awareness indicates that it is as painful for one to carry a great truth which he wishes to share and to give to others, as it is for an entity to carry a great question which he wishes answered. When these entities come together and an exchange is made, where the question and answer are brought together and shared, both parties find considerable relief. It is a means of harmonizing and balancing polarities in the parties.

The one with the question has a feminine polarity, the one with the answer has the masculine polarity, and when they are both released, both feel reconciled in a neutral state, the polarities being reconciled. This Awareness indicates that this is a kind of social intercourse that parallels on a different level, that which is known as sexual intercourse, wherein the male and female energies, through sexual intercourse, can become reconciled, alleviating the excess male energy, which seeks to express itself, and alleviating the vacuum or questing energy of the female so that the energies are then balanced between the two.

This Awareness indicates that it is a matter of natural flow of energies, after energies have been built up in one area and a vacuum created elsewhere, that the high-pressure area flows to fill the low-pressure area. All of this is but natural law, or laws of nature. It applies also in terms of these ideas and conversations and meetings between entities. It applies likewise to individual desires, wherein the

6. desire creates a vacuum or a need to draw in that which would fulfill the desire.

There are also entities who have something to give, and they seek to give to those in need. It is important for entities to communicate with each other their needs and their vacuums or desires as well as those things which they are willing to offer others. Thus, it has been said: "Seek and you shall find." This Awareness indicates also that entities should remember: "Ask, and it shall be given."

This Awareness indicates that it may not always be given, when you ask for something, but your chance of having something given to you increases greatly if you are willing to ask for it. If you do not ask, how is anyone to know what to give you, even if they have it to give?

## "LETTING GO AND LETTING GOD"

### FOLLOW-UP QUESTION:

Awareness indicated the magnetic center and the quest, after being energized, the trick was in letting go of it. Is this related to the idea of letting go and letting God?

### COSMIC AWARENESS:

This as in the affirmative. This Awareness indicates that as long as you keep your mind on your desire and your quest, the subconscious forces and the higher forces cannot do anything. It is when you turn this over to the subconscious and the subconscious turns it over to the Higher Self or from there to the God Self, it is then that these higher forces can begin the work of manifesting.

This Awareness indicates that you may have noticed that on some things you can focus and work until you complete it and you accomplish it, if it is within your own personal power. If it is something that lies beyond your personal power and needs help from another level, it is then that you need to energize and work to your utmost to achieve the thing and then to admit that you need help from higher forces, and turn it over to the higher forces.

Thus the phrase, or saying: "If it be Thy will, let it be," and in so doing, you let go and let God attend the completion, and if it is not completed at that time, the higher forces will at least create an opening through some opportunity or event that allows you further movement in the direction, assuming of course that what you are seeking to do is legitimate and ethical.

#### Will God Really Get You a Million Dollars? (Awareness Pleads Indigence)

This Awareness indicates that these higher forces may provide you with the means whereby you can continue in your struggle for achieving it, or they may even provide you with the thing you seek. You must be open to either. Some entities think that they can ask for a million dollars and have it provided at a certain date, but it may be that the higher forces do not have a million dollars on them, since they are not a bank and do not rob banks. It may be that they need to create the way or help you find the way to achieve the million dollars you seek, and thus they provide an opportunity for you to learn how to find the million dollars you seek, or they may provide an opportunity for you to study some of the ways by which others have earned millions of dollars.

This Awareness indicates that too many entities think it is supposed to be a short-cut where they can circumvent the earning of the money and simply be handed the reward by God Himself or Itself. It doesn't work that way. This Awareness indicates that this Awareness is broke in so far as being able to hand out a million dollars to every entity who asks for such. It simply does not have these material things in Its hands. All It can do is provide entities with information. The information can direct entities to other

information, and entities need to be aware that information can provide them with everything they need.

This Awareness indicates that in fact, it isn't the goal of this Awareness to provide every hungry entity with a million dollars just because the entities would like it. Most entities would not know what to do with the money and would become less worthy if they were to have such amounts of money. This Awareness indicates that especially if they did not earn the money or do anything to deserve it.

This Awareness suggests that the manifestation of things that entities need can come in many different ways, and they do not need to have money as the bottom line. An entity may say: "I need a new home, or a better place to live," but the entity may not need a million dollars in order to have that manifestation, thus, the entity is manifesting or seeking the manifestation of a home or better place to live may have a much better chance than the one who seeks a million dollars so that he or she can find a home or a better place to live.

#### How Spiritual Forces Do Help Provide Wealth

This Awareness indicates that it is important for entities to realize the Divine Forces do not always grant exactly what entities ask for, particularly if the request is unreasonable and if the request would be harmful to them, and if the request can be better supplied through natural channels instead of by manifesting something out of thin air. The manifesting of money from thin air is often the only thing that will satisfy some entities in their quest. They think that simply by praying for money or by energizing money, that it is supposed to appear out of thin air, and they may even become somewhat angered if it doesn't work for them.

This Awareness wishes you to know that if you are worthy of receiving large amounts of money, it may be that the Divine Forces will provide you with direction or with information or with some kind of opportunity to discover how to earn the large amounts of money you seek, or you may be led to work with someone whom you meet or know who may be led to work with someone whom you meet or know who will help you to achieve your dreams. It is in this manner that spiritual forces often help to provide entities with those quests for wealth or large amounts of money.

#### Praying to God for that Lucky Lottery Ticket

It is indeed unlikely that your energizing and prayers for money will result in the money appearing out of thin air as though God were handing it to you from heaven. It simply doesn't work that way, and it is unlikely that God will influence lotteries to provide you with the winning ticket over others who also pray to be the winners. Praying does not, in itself, constitute justification for winning. Just because one prays to win a lottery ticket does not mean that they should win over others who do not pray or others who also pray.

Yet, this Awareness indicates there are many, many more than you would imagine who earnestly pray that they will win the lottery ticket, and these entities may all have a strong degree of faith in their prayer. This Awareness suggests that if you energize some outcome, if you seek a certain goal, this Awareness suggests that you be watchful for opportunities that may not be easily apparent, which might be your guardian angel giving you a chance by letting you hear about some opportunity, some information or some technique or something that will help you to begin earning the money you seek. It may not be through lotteries.

People seek to win lotteries because it is so easy if it occurs. All they need to do is spend a dollar or so and then pray that they have the winning ticket, and they may possibly, one chance in a million or so, become a winner. Most people would prefer to win in this manner than to have to have

an opportunity to work to earn something which then could be invested into a business or something, which then in turn could grow and produce more income, which in turn could still be reinvested in something or to expand the business so that over a period of several years the entity could be earning up to million dollars or more; most people consider that as too difficult, not worth the effort. The amount they want to give is a dollar or so, that much effort, and then have the gods do the rest to bring them the winning ticket.

This Awareness indicates that one in a million or so will have the winning ticket. These are facts. It is not a matter of whether you like it or not, or whether it is fair, or whether it is unpleasant, and it is not a matter of blaming the gods for your plight. It is a matter of odds, wherein the state or the entities running the raffles and lotteries are creating a game that creates illusions of potential winning that overshadow the greater realities of perpetual losing.

Entities never hear about the losers of the lotteries. They only hear about the winners, and thus they tend to think that they too might be lucky and become a winner. They fail to realize how many losers there were, and how great the chance is of losing. It seems so easy to win. All you have to do is be lucky. This Awareness indicates that luck of course, to most entities, means that there is some kind of Divine Force directing that luck and thus entities become angry with God or with the Divine Forces and feel that they are out of favor if the Divine Forces did not smile upon them. Actually, it is but a matter of odds.

The point this Awareness wishes to make is that in the manifesting process, do not always expect the manifestation to occur out of thin air, or to pop into your life in a big magical moment. The answer to your quest, the manifestation you seek might come as a whisper or a sign, a message, or an ad in the paper or a statement by someone, suggesting a course of action that will help you to reach your goal or to manifest that which you seek.

#### BURNING UP THE WISH LISTS IN JAPAN

( More on the Effects of Ritual )

##### QUESTION:

Chris Locke in Japan, sent us a full color brochure which depicts a huge field about 3 or 4 times the size of a football field it looks like, with several mounds of scrolls piled up, which from the perspective of the photo, perhaps 3 stories high, and there is a bunch of priests who are gathering these and throwing them on the pile and they lit these afire, and it's a huge conflagration that evidently people can see for miles, and it must be a tourist attraction, because the brochure is designed like one, and Chris penned in: "Up go the millions of prayers in smoke and flame."

I'd like to ask Awareness, if in Japan, they put their prayers on these scrolls and during some kind of ritual like this, they are burned,--how effective is this?

##### COSMIC AWARENESS:

This Awareness indicates that this is relatively effective. It is not something that is necessarily infallible or even highly effective; it is something that works through subconscious levels to give entities a sense of faith that they have sent their prayers to higher sources, and it depends somewhat on the individual. It is a kind of magical act. It is a ritual.

Rituals have the effect of working on individuals' subconscious minds and have to do with the influence of the subconscious mind to help it believe and to work for the manifestation implied by the ritual. This Awareness indicates that just as going to one's knees before praying or doing a rosary or other actions of any sort wherein a physical act is involved, an emotional feeling is felt, mental energies

are spent, and imaging is involved; all of these things contribute to the magical rituals for manifesting.

The effect will be felt to the degree of the individual's faith in the ritual, along with the complexity of the quest. In other words, if the quest expressed in the ritual is something that can be easily obtained, it will be more likely to manifest than if the quest expressed is extremely difficult to obtain. An example being, if an entity makes a prayer, saying: "I want to restore and reconcile my relationship with my father," that would be much easier to obtain than the entity who says in a prayer: "I want the Hope Diamond delivered to me free of charge."

This Awareness indicates that the one becomes extremely difficult and complicated because there are so many energies keeping the Hope Diamond elsewhere, and the other is quite simple because all it may require is that the entity in the prayer make an effort to communicate with the father. That may be all that is necessary. Thus, the one prayer may be easily answered, the other may be never answered, and yet the prayers may be ritualized the same way.

Thus, the effectiveness of the ritual may depend not only on the faith the entities have but on the complexity of the request.

### HOW ONE MAN CREATES WEALTH THROUGH 'SADHNA' (How Mantras Work and Why Most Prayers for Wealth Don't)

#### QUESTION:

In reference to this subject and the magnetic center, there's a man we know here in Olympia, named Kumar, from India, who owns a restaurant that we go to occasionally, and he has mentioned that he has written a book, a philosophical book, and he wouldn't tell us much about it, thinking perhaps because it was related to philosophies of India that we might not understand it, but out at the college, attending a lecture, I just happened to pick up *The New Times* newspaper, and it happened to have a full page article, and an interview with this very entity, and it's called "Financial Gain Without Pain—Creating Wealth Through Sadhna." I won't read all of it, but essentially,...well, I'll read a little of it.

ED's Note: Actually, I ended up reading a lot of it. It's an interesting article and relative to the subject of magnetic centers, so much of the article is reproduced below.

## Financial Gain Without Pain— Creating Wealth Through Sadhna

by Jerry Greiff

Wealth... prosperity... we have thought about it long and hard and tried numerous techniques, and still it eludes us. We want to spend more money on courses and seminars and more time on our spiritual path and still we struggle just to survive. We feel frustration at wanting to do more to help the planet and the world financially but we're stuck in the rut of just trying to pay our bills month after month. We may belong to any faith or may be following any religion, may be associated with any school of thought, but we have to accept the truth of attaining prosperity and realize its importance.

Reversal of our money "fate" is possible by performing the appropriate sadhnas. These sadhnas consist of very specific rituals in which one chants a particular type of mantra in a particular way to achieve the target goal. Through this process fate or destiny can be changed.

Kumar Srivastava now resides in Olympia, Washington. He arrived in the U.S. in 1980 from his ashram in northern Tibet without a penny in his pocket and has achieved wealth through these techniques. He received from his guru, Swami Sacchidanand, the art of practice of Laxmi mantras, Laxmi being the

Goddess of Wealth, and has brought to light a number of very powerful mantras which are being revealed to the public for the first time, and which, he states, work immediately. Kumar's mission is to teach people the use of these mantras and performance with proper implements, especially to those already on a spiritual path, so they can achieve prosperity and focus more on their inner work. What is also unusual is that the cost is a fraction of what is being charged today (the cost being so high only a few people can afford them).

**Jerry: In the West, there are many books which talk about prosperity. What is the secret to prosperity from the Vedic point of view?**

Kumar: Shastras have established the importance of Laxmi, Goddess of Wealth. The scriptures mention that God predestines the fate and that man cannot reverse it through his efforts and labor. If you are going to make \$100,000 for a period of a 70-year lifespan you're going to get \$100,000 regardless. There is only one factor which can alter a man's destiny. Though fate has been destined as poverty, even then can the fate be reversed into wealth and prosperity, and this very element is sadhna.

**Jerry: What then is sadhna?**

Kumar: The definition of Sadhna is a practice. Practice of anything. Whether it's an attorney, doctor or whatever, you take that trade and you read books about it, you practice it and become one of the professionals. Whether it's the practice of prosperity or towards a specialty or any path you choose, you're doing sadhna.

**Jerry: How does someone get started in learning your techniques?**

Kumar: All the mantras you recite have to be activated. Your tape recorder is there, the tool is in front of you, but if there is no electricity and you don't push the button it's useless. So mantras are like that. Mantras create a certain kind of vibration to attract that particular field. If you want to build a house you go to an architect who builds houses, you don't go to a doctor. In spirituality if you want to go into a higher form of yoga you go to a person who is master in that and you acquire that. You cannot combine those two things. You cannot consider that while you're doing meditation you can get wealth also. No. In order to acquire wealth you go to that person who has money and in this case we consider that Laxmi is the Goddess of Wealth. So you recite the wordings of the mantra related to Laxmi.

**Jerry: So you're greeting Laxmi and Laxmi comes to you?**

Kumar: Right, you are offering and you are telling her that I require this, this and this, as far as

you are using it in proper form. You are making yourself visible to the higher entity and telling them "I need this help and I need it now, I don't need it after I die, I don't need it after 50 years or after 20 years. I want it now, and whatever the requirement is I am ready and willing to do it — you tell me what else I have to do and I'll do it." And you'll see that bond start building stronger and stronger. It also depends on how much you want it. Is your desire so strong that you need something now and how much and how will you use it.

**Jerry: Where did this knowledge come from?**

**Kumar:** This particular knowledge is coming from an ashram in northern Tibet with over 100 siddha yogis. They are doing a higher level of meditation which we never heard about. They are the actual ones who sense our consciousness in the people who are ready. It's like when you are in an airplane you can see thousands of lights underneath you but those which attract you are the lights that are brighter.

In the same way they see us on that level of consciousness and the person who is more intense into whatever he or she is doing, their light shows and then the yogis attract toward that — who is that? Because we are giving knowledge on the mantras, does not mean we are starting any kind of group. It's just for the general people who are already on a certain level of understanding of Eastern philosophy, to push them higher.

Because of the atmosphere getting more polluted every day, no matter how much you meditate, still the air you breathe makes a big difference in your system. If your system is not clear and you're meditating, you lose so much of clear experience. These mantras create a certain kind of energy field in the atmosphere around you so that you can progress much faster than what you're doing by yourself.

**Jerry: Did you learn yourself from this group? Did you spend time there?**

**Kumar:** Yes, I spent three years there. In the Vedas it says there is a siddha ashram and people have been living there so many thousands of years and it's somewhere in Tibet. I decided that if there is a siddha ashram I will find it, otherwise I'll die. Simple as that. When I first saw my guru what I saw was a halo around his head. I sat there for three days without realizing three days had passed. I just lost track of everything. It was very, very hard to leave that place and come down.

But I had to come down and let people know you can go ten times, maybe one thousand times faster. You can achieve within your life span. It is not a hoax. We're not talking 50, 20 or five years of your life, we're talking days, months. You're not wasting time. You'll see the difference.

When I left the ashram I came down to Bombay, then I traveled to different countries and ended up here in 1980. After a few years I started my businesses and I utilized the mantras towards my growth.

**Jerry: Why do you feel that helping people to create wealth is so important to the individual and to the world?**

**Kumar:** Wealth is important. This is for people who are already on a spiritual path, but some barriers come in their way. They are sincere, they want to reach a certain point, but they can't do it because they have to go to work, their boss is such and such person, they're not getting paid for so much. So 90 percent of their time is consumed towards survival. That is why we are giving that knowledge to the people so they can have some more time towards their spiritual growth.

**Jerry: They won't have to worry so much and their energy will be more powerful on their spiritual path.**

**Kumar:** Right, once you start doing six to seven hours a day of meditation you don't have to worry about where your next meal is coming from, or whether your boss is going to fire you. You can go ten times faster than you are going today. You need a car, you'll get a car which is a comfortable car and won't break down every two miles and you're standing with your thumb up, and you don't have money in your pocket to call Triple A or anyone else. The mantras will achieve this. And it is not just wealth we are talking about — next we will explore how to improve the physical form if barriers are there.

**Jerry: Some people feel they might already be a disciple of a certain guru and they feel they want to stay with that knowledge. They're a little concerned if they're going to become the disciple of another guru.**

**Kumar:** No, you're not becoming the disciple of anything. It's just a mantra that can enhance whatever you are doing. It can put you into the top of the class.

**Jerry: You said that the knowledge has been available for a long time, but it has only been available to the very wealthy, who have been able to pay the high price. Why is it now that you are trying to teach it without the high cost?**

**Kumar:** The reason is that I had to fight for that. I was thinking that the people who were on a spiritual path were taken away from that, whether through their labor or through their money, and they're not going anywhere, even though they are sincere in their system. So something should be done about it. If you don't, then people start disbelieving it. And we don't want to do that.

**Jerry: Was it your idea or your master's?**

**Kumar:** This was my idea. That's why I had to fight with them.

**Jerry: Have you seen it work for other people?**

**Kumar:** I can tell you right now, the prime example is myself. I came to this country in the end of 1979 with nothing. Today I have three Dairy Queens, one Oyster House, which is a seafood restaurant, which has sales of about \$3½ million, and an exporting firm which gives me enough money to do whatever I want to do. I don't go to any bank or anything. The thing is, I have not forgotten who I am. If my Guru Dev called me today and said that is it, you are done, I will leave, without a second thought that I am leaving a huge money, culture and luxuries, in order to go to the ashram and get up at 4 o'clock with one dhoti on my body and nothing. That's my first priority. That's what makes me what I am.

**Jerry: Is there some kind of personal instruction involved?**

**Kumar:** It's all personal instruction. It's not mass media. Different malas are used. Malas are beads. Different malas have different effects. Everybody has their own chemistry. We can tell by date and place of birth and what he or she wants to acquire. From the date of birth we can tell what mala they use. You can't say that because I like rudrash I want to do mantra with rudrash. It won't work. If you have a Volkswagen you don't put Ford parts into it. It's the same — we all require different models.

**Jerry: If any of the mantras are done incorrectly will there be a negative reaction?**

**Kumar:** No negative reaction. That's the good part about it. There would just be no result.

**Jerry: Once you have finished a particular set and a few months later you have different desires, will the first set take care of those or do you have to do it again?**

**Kumar:** You have to go for higher. Every mantra has its own limitations. You can take a car, and it will only go so fast, a sports car will go faster. If you take a plane you'll get there a thousand times faster. You choose where you want to go and what you want to do, and that will take you towards it. You determine the speed.

**Jerry: So you might need to do it more than once, choose more than one?**

**Kumar:** Or you can choose a mantra which has more requirements to achieve that.

**Jerry: How would you know?**

**Kumar:** That's what we are here for. What is your requirement?

**Jerry: Let's say the average person on a spiritual path just wants to have a comfortable life. But they want something they perform once and the effect is felt for the rest of their life. Maybe this is too magical to be true.**

**Kumar:** Yes, right. If you have that it will stay for the rest of

your life. You have to master it and also keep it activated — do one mala every day in order to keep that thing vibrating.

**Jerry: So you do it for whatever the required time was, twenty to forty days. But then after that you should still do it once a day?**

**Kumar:** Yes, just one mala, which is about 108 beads. It takes about three minutes to do it, or even 60 seconds or 30 seconds.

**Jerry: If my astrology says that I'll be having financial difficulties for a certain period of time, will I be able to get around that karma by using my mantras?**

**Kumar:** Yes. Even if you can't get the money yourself, maybe the mantra would create an affiliate of yours to receive it, and he would be around you so that whatever you required you would get it. It creates a certain atmosphere so that if your karma is to suffer, you won't suffer, it won't affect you. Mantra can decrease the effect of your bad karma. Instead of getting hit by a truck, you get hit by a bicycle. This can also apply to wealth and spiritual growth.

**Jerry: Some people have done maybe some mantras to Lakshmi before and they haven't produced results. Why not?**

**Kumar:** The mantra weren't activated. They probably got them from a book. If you don't have a battery in a car it won't work. You have to have an energy source. The mantra has to be live first.

**Jerry: Does belief enter into this or is it just the practice that is important?**

**Kumar:** You have to believe it. Belief is the kindling of the fire. If you don't believe, you're just wasting time.

**Kumar Srivastava.** He believes the use of mantras for those on the spiritual path can bring inner focus and prosperity.

Well, this article goes on and on, but would Awareness comment in relation to gathering wealth through this technique of the mantras that he activates here?

#### COSMIC AWARENESS:

This Awareness indicates that this entity has a good understanding of the proper use of magic in regard to the acquisition of wealth and material things. The entity also has a good attitude in regard to wealth and material things. This Awareness indicates that the entity recognizes the use of mantra as that which... This Awareness indicates that mantra or ritual, or other magical means as that which helps entities to hold their focus, to believe in themselves and to have the faith that they can acquire or achieve their goal.

This Awareness indicates it is not the mantra that brings the wealth, but the mantra is part of the energy that sets the mind to acquiring the wealth. The same may be said for other magical means for acquiring wealth; that these set the mind to the right mind-set for acquiring wealth, but as the entity indicated, these are useless without the actions. The tape recorder does not work without being activated. The actions that are required in order to stimulate the sales or to close the deals or whatever else is used in the process of mundane activity of gaining the wealth.

In this case the entity has restaurants and other means besides the mantras through which he acquires wealth. The mantras did not materialize the money; the mantras helped the entity to set his mind in the proper mind-frame so that it could create the means to acquire the wealth. This Awareness indicates that this is the *key* that appears to be missing for many who think that metaphysics allows them, or should allow them, to become wealthy through chance or through imaging or through thought.

The book, *Think and Grow Rich*, would imply by the title that you can grow rich simply by thinking. This Awareness indicates even in this book, it explains ways by which entities need to organize their life, a need to set up their teams to do the things necessary that will bring about the riches they seek. Thus, they may have a team of engineers or a team which includes a lawyer, an accountant or several other specialists, and from that team they then may develop a business that helps them to grow rich. There is more than just thinking, there is the activity, the activation of an organization or company or something that allows them on the mundane level to earn money.

This Awareness indicates that *It* finds it extremely distressing to see how many entities prefer not to deal with mundane realities and to delude themselves into thinking that all they need to do is appeal to the gods and sit back and think or daydream about money falling into their laps. It just doesn't work this way, and entities waste many years of their lives waiting for something to happen.

This Awareness indicates that this book would be a valuable book for CAC to provide to its membership; this in reference to the book by Kumar. Of course, the book *Think and Grow Rich*, by Napoleon Hill, also as being valuable for entities who wish to increase their personal wealth and ability to manifest.

ED's Note: So far we have been unable to purchase Kumar's book. It appears it is being used as part of a course at this time and is unavailable to those not participating in the course. Nor do we have Napoleon Hill's book, "Think and Grow Rich," but this classic can be found in most bookstores. Also, you can order it from Wilshire Book Co. 12015 Sherman Rd. No. Hollywood, CA 91605. Write for their catalog of many self-help books of this type.

## SOME THINGS REQUIRED FOR WEALTH & SUCCESS (How to Lose Friends and Not Influence People)

#### CLOSING MESSAGE:

This Awareness indicates that there are many things that entities can do to create patterns in their lives which would lead them to become successful. This Awareness indicates that the creation of a magnetic center, especially if it is aimed toward certain valuable attractions, is that which entities should consider in their spiritual development. This Awareness indicates that the creation of speech patterns based on good English, proper grammar, to allow them to commingle with others, as that which can be most helpful and should be considered because speech often sets one apart or with another.

Those entities who find themselves using excessive four-letter words of a vulgar nature immediately stigmatize themselves from many of those who do not want to be associated with that kind of language, and in so stigmatizing themselves, cut off many associations that could otherwise be quite profitable to them. This Awareness indicates that dress as also being an important factor; that entities should of course be comfortable, but it is important for them also to be dressed in a way that allows them to fit in well with the group with whom they associate.

This Awareness indicates that there are, of course, many other factors in personality and characterization that effect whether one is to be successful or a failure. Ethical and honest relationships never hurt, and always create stronger friendships than those relationships which are deceptive or are manipulative or dishonest. There is no quicker way to lose a friend than to deceive the friend, or to manipulate or steal from the friend.

This Awareness indicates that these are obvious traits which entities need to be aware of as being very important to success; that your credibility is priceless, and your name and credibility tend to follow each other long after acts and deeds have been done. This Awareness suggests there are certain other qualities of success: strong desire, high ambition and persistence. Education is important. Cultivating friendships is important, and specialized knowledge about certain things is important, but of all of these, persistence is probably the most important, next to credibility.

This Awareness indicates you may ask yourself: 'How is it possible to develop in myself persistence, the quality of not giving up, just because I am turned down, just because I fail? What is it that makes me get up to try again? How can I develop that quality?' This Awareness indicates that it is best developed by others, but it can be developed by oneself, simply by refusing to quit. This Awareness suggests that it can easily be developed through little children, to give them persistence in a way that develops a quality in their personality so that they don't even realize you have assisted them.

#### How to Develop Persistence in Your Child

This Awareness indicates that for example, the child asks for a cracker, a cookie or piece of candy. You may say: "No, you've had enough!" If the child does not repeat the request, the child is not persistent. Most parents will be happy that the child is not persistent, but if you want your child to develop persistence, which is a quality necessary for future success, you will say then to the child who does not repeat the request: "I might give you another cookie if you do such and such for me." Generally, the child will respond by doing it, and then ask you for the cookie, and you give the child the cookie. The next time the child asks you for a cookie and you say: "No!" the child will think about it

and will probably recall the incident before, and say: "But I'll do this, and I'll do that, if you give me a cookie!", and you may say: "Well, I don't need those things done!", and if the child stops asking, you may say something to give the child a glimmer of hope that he might still get a cookie, so that the entity learns not to give up, and if the child does give up, you give them the bait, or reason to ask further.

You might even say something to the effect that, "You don't really seem to want the cookie very badly anyway!" This will invite the child to say: "Oh, yes, I do! I really want it!" Then you can say: "Well, how badly do you want it?" and the child can respond to that. The idea is to keep the child hoping and asking for a cookie or working for a cookie before you give it to him. This creates persistence.

This Awareness indicates that after a few times the child will automatically begin to ask you and repeat the request. You might say: "Ask me later," or, "I don't feel like giving you a cookie right now. Come back in five minutes." This Awareness indicates that your action of having the child keep requesting the cookie is creating in the child's thinking pattern persistence. But the persistence does need to be rewarded. If the child learns that though it can't get the cookie the first time, if it persists, it will eventually get the cookie, then the child is learning persistence, and this pattern gradually sets into the child's consciousness, so that later in life, or from that time forward, actually, anytime the child runs into an obstacle to his desires, he simply tries again.

The child might be taught to try in a different way, so as not to repeat the same way each time, thus, the child learns to continue trying to get what he wants. When this child has developed this to the point where he or she is driving you nuts with his or her persistence, you need not cultivate it any farther. Allow it to be part of the child's personality. Don't resist it. Acknowledge it as a good quality that will help the child become a winner in the future, and after the child has made his or her request sufficient number of times, reward the child; say: "Okay, okay, I'm getting you the cookie!"

This Awareness indicates that in this manner you can help to create in an entity's personality, the quality of success, the quality that is most essential to success; that quality of persistence. This Awareness indicates there are of course other qualities necessary to success, such as courtesy and patience and the respect that a child can show in communicating to others: attention to details, a good understanding, a good vocabulary, all of these can be beneficial, along with those other qualities previously mentioned, such as good ethics and honesty.

This Awareness indicates that these, along with patience and guidance, can help the child in his or her later life to become a winner, to have a good self-image, to know that he or she can get what he or she sets out for, even if the first response is, "No!"

This Awareness indicates that the action of manifestation and the creation of a mind or set of mental qualities in order to manifest and develop a winning attitude, is that which can be cultivated and can be of great importance to entities to turn failure into success, to assist entities in developing their higher potential. This Awareness indicates it can be extremely valuable in helping entities to find happiness in their lives.

This Awareness indicates that there are many children who are punished for being persistent and thus they are taught: "If you are rejected once, don't try again." This is tragic.

(The Law of Gratitude is given)

ED's Note: For related information on these subjects, please refer to the following 'Revelation of Awareness' newsletters: 80-6; How to Attract a Mate; 83-12 (When Romance Cools; Part 1); 86-8 (Part 2); 85-7 (How Your Guardian Angels Operate); 84-16; Gambling and the Cosmic Laws; 79-22 (A Petition to the Inner Plane to Bestow Riches Upon Light Workers), \$3.00 each from C.A.C.

REGARDING THAT PORK BILL PROJECT IN YOUR AREA...  
THE TRAGIC IMPLICATIONS OF VOTING FOR SECURITY  
(Making Your Children & Grandchildren Pay Your Debts)

(C.A.C. General Reading, May 14, 1992)

OPENING MESSAGE:

This Awareness indicates that there is a great concern among entities in regard to the earnings in terms of wages and income, partly because entities see their earnings as giving them a certain degree of freedom: freedom to possess, freedom to avoid being possessed by forces and situations in society. This Awareness indicates that one of the greater values in having excess earnings and moneys is that entities believe they can have more freedom with the extra income. It is largely for this purpose that many entities vote in certain ways that will hopefully increase their income, their earnings, because they want more freedom.

This Awareness indicates that the irony of this is that much of the freedoms that entities have taken for granted over the past ten decades or five decades, are freedoms that will be denied if entities begin focusing too heavily on income and financial securities, because the financial security often comes at the expense of some of the more common freedoms that have been taken for granted.

This Awareness indicates that many of your children and grandchildren will be laden with heavy debts that are being incurred presently because of the efforts to keep the income and economic picture bright or at a good powerable level, based on borrowed money. The trillions of dollars that are owed will take your children and grandchildren their lifetimes to pay off. In addition, the trillions of dollars presently owed are not the end of the indebtedness, if this kind of mismanagement continues in this century. This Awareness indicates that it is not unique to

the United States; other countries are also having some similar problems, but it is more common and of greater magnitude in the United States than in most of the other wealthy nations of the world.

This Awareness indicates that when entities vote for their security in terms of military projects, in terms of their favorite projects that will take huge amounts of funding, this funding must come from somewhere and generally is borrowed or comes from your children's future earnings and entities must be made aware of the consequences of living on borrowed money.

During the past ten years, the increase of the national debt by several trillion dollars as that which has shifted the burden of taxation onto not only your own future earnings, but the earnings of your children and your grandchildren.

This Awareness suggests that this indicates and suggests that certain future freedoms will be denied these entities as well as freedoms in your own future will be denied, unless there is some kind of real knowledgeable and concerted effort to undo the mischief caused by the indebtedness that has occurred during the past ten years through the excessive spending in terms of military budgets, those budgets that allow for the build-up of equipment and munitions which are of no lasting purpose, which must be blown up and destroyed so that new equipment and munitions can again be created to keep the military industrial complex working at full operation.

These jobs which are created for this military industrial complex are being created on borrowed money from your future and your children's future earnings on which taxes and interest must be paid. This Awareness suggests that entities consider these things and consider the alternative of paying off the debts without incurring new and horrendously high interest rates on further expenses of this type.

Since the cold war has ended, it would be wise now to pay the piper for all the expenses incurred on the munitions and equipment purchased to fight the cold war before building up new armaments.

This Awareness indicates that surely there is the opportunity for a peace dividend, which could be used to stimulate new business, new jobs, new activities, for greater earning for all people so that the extreme indebtedness can be reduced during the next decade, to unburden the children and grandchildren of this load.

This Awareness indicates of course, this being done to preserve the freedoms, not at the expense of freedoms, which have been taken for granted by the older generations.

#### THE WAR MACHINE'S CONTINUING WASTE

(Our Country for the Banks, by the Banks, and of the Banks)

#### QUESTION:

A question from J.M. along these lines. "I am in the Marine Corps and work with computers. My question is: if the government and military need so much money to spend on the aliens, how come they don't put a lid on the mismanagement of funds? In my field especially, millions of dollars are wasted buying products that don't work with each other and end up sitting on shelves, or their fancy equipment like \$12,000 laser printers and never utilize them to their fullest.

At the end of every fiscal year, everyone rushes to spend any leftover funds so their funding will not be reduced the following year. They don't keep strict inventories of gear and a lot of it mysteriously disappears. There is no way the military would survive as a business enterprise. I could just imagine all the vendors laughing on the way to the bank to deposit the money from the over-priced products they sold to the government. Why isn't something being done about this. I am really surprised we have won any wars at all. From my experience, I have seen mostly mismanagement, disorganization, and extreme inefficiency in the military."

Would Awareness comment on that?

## House, Senate negotiators agree to \$1.5 trillion budget

WASHINGTON — House-Senate negotiators agreed Tuesday to a \$1.5 trillion budget for next year that would hold defense spending \$1.8 billion below the amount President Bush had said he wanted, congressional sources said.

The agreement would provide \$289.1 billion for military spending for fiscal 1993, which starts Oct. 1, said the sources, who spoke on condition of anonymity. That is a split-the-difference compromise between the House, which wanted deeper cuts, and the Senate, which supported Bush. Democrats have been trying all year to shrink Bush's defense plans, arguing that the breakup of the Soviet Union made Cold War-era spending levels unnecessary.

Bush

#### COSMIC AWARENESS:

This Awareness indicates that this is a common observation among many entities in military operations. It is seen that there are many different types of mismanagement activities. This entity points out the purchase of incompatible programs and equipment being purchased and unusable because of the incompatibility factor.

This Awareness indicates there are other similar purchases wherein entities buy equipment that is too complex for those in charge to understand, and therefore it is not used in its full intent. This Awareness indicates a \$2000 laser printer could do most of what is done with the \$12,000 or \$20,000 laser printer, and that most entities having the \$20,000 laser printer do not use the extra features or qualities of the printer.

This Awareness indicates that in many cases the extra quality of the printer is totally unnecessary. The printing of a document with a \$20,000 laser printer is not much better than that of the \$2000 laser printer, where only a trained expert could see a real advantage in the type print of the documents.

This Awareness indicates that the important thing is to get a clear message printed so that it can be used for its necessary purpose. If one needs the highest quality of printing, it could be sent to a special place for that higher quality printing, but the various computer terminals need not have such expensive equipment in most cases.

This Awareness indicates that all of this is waste, and this is where much of the trillions of dollars that have been wasted in the past decade have gone to. It is likened unto putting the money up in smoke. There is a term called 'vapor-ware' used in association with computer purchases wherein a program is purchased and does nothing for you and becomes as meaningful as vapor.

#### Big Funds for 'Vapor-Ware' but None for the Homeless

This Awareness indicates that this is a common quality of much of the military and government purchasing activities, wherein most of the purchasing creates vapor-ware or vapor products that do little other than go up in smoke. It may be the best on the market, but if no one knows how to use it, or if there is no need for it, then it is as vapor or smoke, and the extra money that is spent for that extra quality is meaningless and wasteful. This Awareness indicates that this is a very common problem with government purchases and has been for many years. The days of the \$500 hammer purchased by the Pentagon are not over. Such purchases continue, even today. This Awareness suggests that for all of this, your own children and your grandchildren will pay, for these moneys are being wasted while the trillions of dollars borrowed from the banks must either be paid back to the banks, or a moratorium on the debt be declared, (which is highly unlikely), or these banks will in their own time foreclose on the nation and take over the nation, discarding the Constitution and imposing their own rules of government upon the people.

### Runaway Spending a Real Threat to You and Yours

It will be a country for the banks, by the banks, of the banks, and the people will serve the banks that own the country at that time, and this will be the end of freedoms as entities have known them. This Awareness suggests that entities must be made aware of these dangers, for they are not simply imaginary. These are real dangers of this runaway spending of the government, wherein there are no checks, no bounds to the limits of such spending.

Most people would like to blame the poor for the excess government spending; they see those who receive food stamps or some pittance for sustenance of their livelihood, those who are on welfare, those who are on food stamps, those who are on Social Security, those who are on Medicaid; they see these entities and perceive them to be the cause of the great indebtedness. They seldom look at the real cause, wherein the merchants of war receive the greatest welfare gift of all, in huge allocations of money which is wasted on the \$3000 toilet seat, the \$500 hammer, the allocation of software for a computer wherein the software is incompatible with the computer's programs of application programs, and must simply go on a shelf somewhere, until a new version comes out.

They see all of this waste as being just part of the running of a country and that is seen as excusable, but they look at those who are hungry and in need, on the street, and if they should happen to get some grant, some fifty dollars, some one or two thousand dollars a month to stay alive; they see these entities as stealing from their hard-earned tax dollars.

This Awareness indicates that they have greater respect for the waste in government spending than for saving the lives of those who have become victims of a society that takes away the opportunity for livelihood. This Awareness indicates they make an assumption that those who receive a handout want the handout without working, without earning it.

In most cases, entities would prefer to have a steady occupation, something dependable in their lives and not to receive handouts at all. Those who would live by handouts alone are truly rare, and only become that way by conditioning. Such entities could easily be unconditioned from the handout mentality, if they were given opportunities to earn their way by respectable occupations.

#### Would Ross Perot Put an End to the Waste?

This Awareness suggests that perhaps a total change in government will bring about a more effective way of dealing with the spending and indebtedness of this country. This Awareness sees the entity Ross Perot as gaining great momentum in the grass roots movement and sees that this entity would be more inclined to clean up this kind of waste than have been other presidents of recent time.

This Awareness indicates that in the event this entity does not become the leader through the elections, then it will be necessary for entities to petition and write to try to get this situation straightened out, whereby waste is eliminated and greater efficiency in use of the tax dollars is promoted.

### WHAT ABOUT THE CHAKRAS OF THE CANDIDATES?

#### QUESTION:

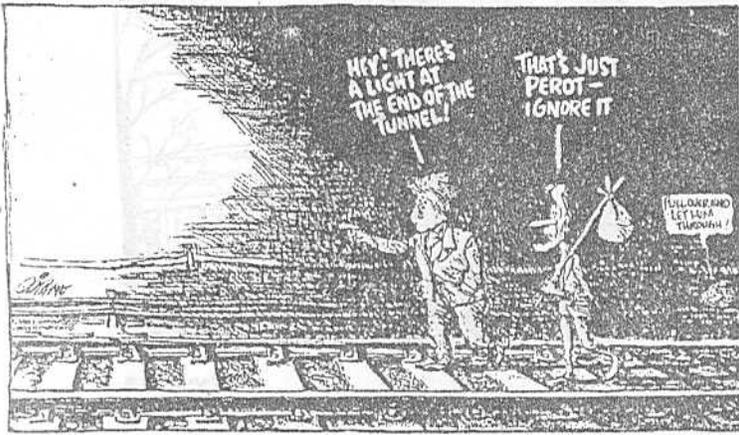

In regards to Perot, M.G. of Jacksonville, Florida, asks: "Does Awareness think Ross Perot is the best choice so far to be the next president of the U.S.? It is said he has a bright aura and with no black or gray spots. In the case of Bill Clinton, the leading presidential hopeful, it is said that he has a black spot on his first chakra and that a negative spirit is also attached to this spot. Can Awareness confirm or not the correctness of this information and if so, should that info make him unfit for this office?"

#### COSMIC AWARENESS:

This Awareness indicates that *It* does not wish to get into labeling entities according to chakras and auric readings. *It* suggests, however, that the entity Ross Perot as having come from a background that is very wholesome, very well taught in terms of compassion for those in need, in terms of business, in terms of ability to be blunt, to be straight forward and honest.

The entity is one who has a strong practicality and a devotion to the traditional values of this nation. The entity is seen as one who could have a most powerful impact on turning the nation back to its ideals and elevating the Constitution to new heights, thus guaranteeing opportunities and freedoms for the people, and in the process, influencing the rest of the world toward higher achievement.

### QUESTION: THE RODNEY KING AFFAIR

When the black entity Rodney King was assaulted by four police officers and beaten for 10 minutes or so while lying on the ground, the spectacle was video-taped all the while by a Los Angeles citizen from across the street. It was a foregone conclusion that when the policemen went to trial, they would be convicted on several charges, the least of which being excessive force. However, the jury later delivered a 'Not guilty' verdict on all counts, and while a stunned America could not believe any jury in America, possibly short of Nazi skinheads, could find these policemen Not guilty, the outraged black community in Los Angeles and other cities began lighting matches, killing and looting and plundering; these mainly teenage thugs and other low-life, using the King decision as an excuse.

Having watched this spectacle on TV and pondering over it for some time, it occurred to me that the authorities knew, as did most of us, that a court decision of Not Guilty would precipitate such acts of violence, using Watts, Atlanta and Detroit and so forth, as examples of similar previous acts of violence and terrorism. Therefore, I suspect the jury was selected specifically, probably programmed beforehand to find the police Not Guilty and was part of the plot to instigate more racial hatred and to convince the public that more harsh laws were needed: martial law, suspension of Constitutional rights and so forth.

To take it even further, it could be that the entire event was staged, even to the citizen who videotaped it, who, by the way, died mysteriously within a year of the incident. How accurate is this scenario, and can Awareness comment on that incident in general?

### COSMIC AWARENESS:

This Awareness indicates that there was considerable concern which the jury felt in regard to the case, for the fact that they were judging local police officers. This Awareness indicates that if you will consider the mafia cases, whereby the juries most often are fearful of bringing a guilty verdict against a Mafia leader, you can understand some of the apprehension these entities felt.

To bring a guilty verdict against a Mafia leader could bring the Mafia to harass or even to kill the jurors after the verdict had been concluded, and thus, many entities will go out of their way to bring an Innocent verdict to the Mafia leaders, if possible, or if they do not feel they could be well protected.

This Awareness indicates that the Los Angeles Police Department officers and the Los Angeles Police Department, in representing and standing by the officers gave an aura of solidarity among themselves which led some of these jurors to feel intimidated to some degree, even if it were not expressed among themselves, to feel that they too might suffer such a beating by a police officer in the near future, if they did not vote these officers innocent. They were catering in part to the Police Department in hopes that they would be left alone, in hopes that their families would be left alone by the Police Department, for

in fact, they each, to some degree or another, had such thoughts cross their mind, that the Police Department might single them out if they voted for a Guilty verdict. Thus, this played a part in their verdict and decision.

This Awareness indicates that the verdict was not fully anticipated by the city of Los Angeles. Even the Police Department in general was surprised at the verdict, and therefore, the consequences of the verdict were not prepared for, nor was there a preparation for, or expectation for such an extreme reaction to the verdict, though there perhaps should have been. This was not seen.

Once the reaction was experienced and the looting occurred, a great portion of it occurred in areas among the Blacks and Koreans, and there has long been a kind of racial conflict between the Blacks and Koreans in these areas, which reached an apex, and much of the burning and looting grew out of this conflict between Blacks and Koreans.

There was also, of course, a conflict between Blacks and Whites, but in that general location the conflict between the Blacks and Koreans was even stronger than between Blacks and Whites. The Koreans were seen as hard-working and clever people who managed their money and gained position through their businesses in the community and it left many Blacks feeling betrayed and jealous of these Koreans, for the Koreans were making money off of the Blacks in the neighborhood, and there was also felt in some cases, a sense of superiority among the Koreans, in regard to the local Blacks.

This Awareness indicates that this added to the conflict surrounding the Rodney King verdict. It is an aspect that has not been discussed in your media or among those who discussed these situations. Most of the coverage of the situation as having saturated the information available, having studied and digested and discussed repeatedly to the point of excess, where talk becomes pointless and only action is left. It depends now on what action should be pursued or what action will be pursued in terms of cleaning up the remains of the disturbance, of making things right, in terms of adjusting justice, adjusting the social justice. It appears that in San Francisco, another recent beating by several policemen of a Black entity occurred, wherein these policemen believed that the man beaten had been beaten to death, but the entity, still alive, was able to identify his oppressors and this may lead to another situation in which White policemen will be on trial for violation of the rights of a Black man.

This Awareness indicates this may continue until entities wake up to reality and begin to respect one another as human beings, not as some kind of punching bag for venting their own hostilities on each other. How long this will take is unknown, but it is *enough already*, and it is time that entities began to put a stop to it, hopefully through law and social tactics or social traditions other than violence in return for violence.

This Awareness indicates that while the violence that followed these situations cannot be condoned, it should have been expected, and in the future should be expected when injustice is so blatant. This Awareness does not see the jurors as blatantly unjust, but sees them as cowardly in their performance in a general sense.

FOLLOW-UP QUESTION:

Although it wasn't promoted generally in the media, I read somewhere early in that incident of the Rodney King bashing that he was also a homosexual, known to the police, and I wonder if the severity of the beating was something other than just racial; that the police could be engaged in what they call "Gay Bashing", an increasing problem in many places, usually by rednecks and Nazi skinhead types. Does Awareness see this as a possible motive for such a beating by the police?

COSMIC AWARENESS:

This Awareness indicates that this is seen as a very strong element in the hostility expressed, especially through the entity who was most noted in the beating process. The people who engage in this kind of Gay-Bashing, generally have latent tendencies in those directions themselves and are so frightened by those tendencies they seek to beat others for being what they fear they might become.

It is a way of dealing with their own feelings of inadequacy, or what they consider to be potential shortcomings. They are terrified of their own feelings and tendencies and would like to beat it out of others, when they see it there.

ED's Note: This cop, just referred to, is Stacey Koon, who is out peddling a book, his memoirs called "The Ides of March", being the 15th of March the day Caesar was assassinated and the day he almost beat Rodney King to death. In his book he glorifies incidents where he beats and verbally abuses Blacks and Hispanics. Koon also wrote that he became a "legend" in the LAPD for kicking in the groin a Hispanic man who was under the influence of PCP. "My boot came from the area of lower California and connected with the suspect's scrotum about lower Missouri," he wrote. "My boot stopped about Ohio, but the suspect's testicles continued into upper Maine."

THE RODNEY KING INCIDENT: ANYTHING ELSE?  
( Was George Bush Trying to Start a Race Riot?)

FOLLOW-UP QUESTION:

Awareness just gave a scenario, an overview. There's some questions sent in on this by a number of people. Several I'll ask, just to make sure there's no relationship here. One from J.K., Bradford, Massachusetts. He wants to know: "Why were the police officers who beat Rodney King not convicted of the charges brought against them? Is Darryl Gates, the police chief, involved in trying to start some type of race war? Is George Bush involved with trying to start or perpetuate a race war? Is the so-called female juror who seemed to be available for every televised interview genuine?, or was she a mouthpiece for some other personal group? If so, who was keeping her in shadow, for a legitimate reason as presented, or for some other purpose?"

Is there anything more sinister involved in this than the overview Awareness has given?

COSMIC AWARENESS:

This Awareness indicates that it appears the only thing of this nature was that after the events' spontaneously erupted, it was seen as an opportunity to test the preparedness for martial law, and to test the reaction of the masses to that martial law approach. It became a kind of practice for future actions of a similar kind, and the situation was also seen as an opportunity by George Bush to flex muscles and to use force in a bid for increasing the poll standing of his campaign.

This Awareness indicates that prior to this, there were efforts to start something in Libya relating to the two fugitives who were caught in connection with the Lockabee air crash and terrorist explosion, and there had been considerable speculation that such a military action against Libya, if Libya refused to release them, would be beneficial to George Bush's campaign polling and would raise him in prestige, much the way the Desert Storm war gave him an extremely high rating immediately following.

There was some hope among some of his staff that his speech on using whatever force is necessary and his quick response to the cry for order in Los Angeles would bring about a heightening of his role in the domestic affairs, but this did not work out.

When Justice Goes Awry it Creates Tinder for the Flames

This Awareness indicates *It* does not see anything as having been planned in this regard, prior to the events spontaneously breaking out. There were, of course, warnings before the verdict was released by various Black leaders, that unless a guilty verdict was given, the country would suffer the worst riots since Watts or before, perhaps the worst in history.

Most entities did not take these warnings too seriously and saw them as efforts to manipulate the jury toward conviction. This Awareness indicates that when it did bring forth the verdict, the officials of the police department should have been sufficiently warned and ready for trouble as it erupted, but in going into those areas, the police realized that the anger was against them as they represented by proxy the four policemen who beat Rodney King, and therefore they were hesitant to go into those areas of extreme hostility and held back, and much of the rioting then became a free-for-all looting spell.

This Awareness indicates that Gates went to a party, though it was for a short time, but it shows his lack of concern for what was occurring on the streets. This Awareness indicates that these various factors all were part of the tinders that made for the flames that were ignited. It suggests that even the best laid plans and the best structured societies cannot be assured when justice goes awry that it can be contained without consequences.

All that happened was the scales of justice tipped wrongly and everything went into extremes, and further injustices occurred in greater extreme than the first, and that is in part the way the universe works. If things go awry, those imbalances create even greater imbalances elsewhere, if there has been an environment of injustice that awaits triggering.

Had all the entities in the society been satisfied with their lives, had they all felt there was reasonable justice in their lives, this one injustice might have been self-contained, but when one injustice at a time when all entities are feeling they have been unjustly treated, that one injustice can become a trigger to unleash all the pent-up emotions and feelings of others who feel there has been a total injustice.

This Awareness indicates that it is a matter of balance and there was a great imbalance and this Rodney King verdict triggered a reaction that set off all the imbalances in the society in Los Angeles, and in other areas where there were similar feelings of imbalance in terms of what is just.

This Awareness indicates that perhaps there will come out of this some meaningful action that will create more social justice for those who have experienced the injustice of the past, but entities need to continue to focus on the need to balance and harmonize and bring about this social justice rather than to forget it and sweep it under the rugs of history.

## Did Riots Prove the War on Poverty is a Failure?

This Awareness indicates there are many who attempt to reason that since this happened, it is proof that the social programs initiated under Johnson did not work. The war on poverty was a failure, they say. This Awareness indicates that the social programs under Johnson were never completed; they were scrapped by Nixon, and the social programs that were promised were never fulfilled. They were left undone.

This Awareness indicates that the social programs such as CETA did have a powerful and workable effect, giving many entities jobs and helping to stabilize the lives of many entities in society, but these programs have been, in the last ten years, cut back with such vigor and callousness that this is part of the injustice that many entities felt, and in seeing the further injustice in the courts, the totality was enough to lead some entities to feel "What does it matter to do things right?"

They simply tried to get something when the opportunity was there, and thus, they would loot a store or go out into the streets to express their hostility in whatever way they could. This Awareness indicates this is not to say this was correct action; it was incorrect action, but anyone who is put into a corner and who is unable to escape or move or improve their situation, anyone who suffers excessively and sees no way out, will eventually crack with emotion and do things that are not acceptable socially, are not polite, and may be violent in nature, whereby they seek to fight their way towards something better or to gain some miniscule advantage for the moment.

### The LA Riots May Make Leaders Think Twice

You cannot oppress people forever without a consequence. This Awareness indicates that one of the possibilities of good to come from this is the realization that if there is a plan in the future to oppress the masses, how quickly the masses can unite into a mob, into activity that equates to a civil war. It would be wise for any leader of this country who contemplates setting up a totalitarian system in this country, to think twice and to reflect on what happened just from one little ruling over a Black man being beaten by four police, for in a totalitarian country, this kind of event would have to be commonplace, and the masses would see it repeatedly in every city.

This Awareness suggests that if this could be enough to trigger such a reaction throughout the country, imagine what kind of reaction would come if it were occurring in every city throughout the country, whereby police were beating on individuals, or dragging them from their homes and shooting them in their yards.

This Awareness indicates that it is enough to make those who seek to hold tyrannical power shudder in their fantasies and dreams.

### THE RODNEY KING AFFAIR: MORE QUESTIONS

#### FOLLOW-UP QUESTION:

Several more questions while we're on this subject; this one from R.M., Sierra Madre, California. She writes: "The video-tape of Rodney King's beating was played excessively over the past year on the media. Was this done intentionally to incite social unrest and disunity? And along these lines, why haven't the police readied before the verdict for this possibility, even though the Chief of police set aside one million dollars for the possibility?"

#### COSMIC AWARENESS:

This Awareness indicates that it was played because it was news. It was news because it was so awesome and unusual to the masses. This Awareness indicates that there are many who would like such things never to be seen, never to be shown, but there are others who want to know the truth. It is the job of the news-media to bring out the truth. If they had hidden this information they would be accomplices to the beating; they would be contributing to the cover-up of such a beating. This Awareness indicates that it was played repeatedly over the year because the

16.

trial continued over the year and the images of the beating were so poignant as to the purpose of the trial. They spoke for themselves and saved many words by the announcer.

Anyone giving news on such a thing without the pictures might have to remind the masses, the listeners, of the beating that took place last September in the Simi Valley area when four policemen beat the black motorist, and then go on to tell the story of what is happening now.

While such words might take a good one full minute or two minutes, the picture portrays it much more quickly, depending on how much of the tape is played, but entities seeing this repeatedly know exactly what the trial is about.

This Awareness indicates that there is very little left for the person to question when the entity sees the tape. It is likened unto someone walking up and shooting someone in the face and then having someone tell about it, when a tape is available that shows it happened. The person who tells about it may tell it exactly as it happened, but unless you saw it on tape with your own eyes, another person who says: "No, that's not the way it happened! It happened like this..." and then portrays that he shot him with a water pistol, it would leave the observer with great questions as to whether there was a crime or not.

Words cannot match pictures. The picture is much more real in portraying the event than the words that entities use to describe the event, and therefore, when a picture is available, it becomes the greater evidence. Now if these entities are to see this picture of the man being beaten and they watch this and see it is truly happening, and it is not simply a staged portrayal, but it is real, and then the policeman tries to say: "I barely hit him! I only struck him a little bit on the shoulder, and only several times, maybe three or four times," you have a picture that says 52 times, and a man whose mouth is saying something totally different.

You know there is a discrepancy. Are you going to believe the picture, or the man who is describing it totally different from the picture? This Awareness indicates it is for this reason that the masses could not accept the jury's verdict, because the picture told What Is, and the jury and it's verdict suggested something else must have happened.

This Awareness indicates there was no conspiracy in the news-media showing the beating. It was simply showing fact. Can there be a conspiracy to show fact?

### WAS THERE AN ALIEN CONNECTION?

#### QUESTION:

L.B. of Clarksdale, Arizona, asks Awareness "If the aliens, in retaliation for their destruction by our government, somehow triggered the implants, especially in LA to cause the chaos." In other words, was there an alien connection at all to these riots?

#### COSMIC AWARENESS:

This is seen as negative.

QUESTION:

One final question here. I clipped an article by a man named DeWayne Wickham who brings up an interesting question. I'll read a little of this. It appeared in a Gannett newspaper.

It's a sad irony. Last week thousands of people spilled into the streets of this city to protest a jury's decision to free four white cops accused of beating Rodney King.

"A black man can't get any justice," in this country, some of the protesters were heard to complain as their rage gave way to riot. Six days later, in the wake of the worst rioting of this century, more than 12,000 people, most black, were under arrest, accused of riot-related crimes.

Where's the irony? Because it was this city's judiciary--not the mob that took to the streets--that sparked the widespread death and destruction.

Sure, the rioters must be held accountable. There's no way to excuse the harm these people have done. But true justice also demands that the judge who transferred the King case from Los Angeles to Simi Valley also be held accountable for his injustice.

In granting the change of venue request, Judge Stanley Weisberg could have sent the King case to any other jurisdiction in California. Prosecutors asked that it be sent to either Alameda or Riverside counties, places whose racial and ethnic makeup resembled that of Los Angeles County.

That the judge chose Simi Valley--a largely white, bedroom community for area law enforcement officers--tilted the scales of justice heavily in favor of the accused men. What Judge Weisberg did was an act of judicial violence, the kind of Jim Crow lawmaking that once sent Ku Kluxers into the night with the assurance that no court would hold them accountable.

Could Awareness comment on that perspective?

COSMIC AWARENESS:

This Awareness indicates that this is a perspective of the entity which makes certain conclusions and assumptions that cannot be in all cases, proven true, but which make sense in a common sense manner. There cannot be too much to say. It was his expression and opinion and appears to hold considerable truth in light of the situation, but it cannot be certain because it is speculation.

You cannot, for example, say that the judge's decision to move it to Simi Valley brought a different verdict than would have occurred in another place. Perhaps so, but you cannot know for sure. This Awareness indicates that the man expressed himself with a good argument and opinion that deserves contemplation and consideration, but it is not necessarily the absolute truth because you cannot know what otherwise might have occurred.

THE STATURE OF RODNEY KING

QUESTION:

Thank you. Does Awareness have a closing message?

COSMIC AWARENESS:

This Awareness indicates that there is another element in the entire scenario that has been somewhat overlooked and that is Rodney King himself.

The fact that this man expressed himself with such conviction and concern about the riots, asking entities to please stop, to stop hurting one another, to bring about some kind of condition whereby all can get along together, indicates that this entity does have a deep compassionate side to himself, which brings his stature into that of a very spiritual and sensitive position among humans, showing that a man who has the right to be extremely bitter and who could justifiably laugh at all the hostilities and rioting that occurred in the city, saying "This is what you get for beating an innocent man!"--the man did not do so.

Instead, he simply begged entities to "Please stop! Let us learn to live in peace!" This man has great stature.

\*\*\*

( The Law of Gratitude is given )

RODNEY KING:  
As the death toll passed 40, he asked, "Can we all get along?"

WHY SHOULD ANYONE PRAY TO COSMIC AWARENESS?

(What is Cosmic Awareness in Relation to the Godhead?)

QUESTION:

A long question from L.H. in Canada. Actually there's a number of questions in it. Awareness has given this information in bits and pieces for the most part, but he's got it here in sort of a compact package, so I'm going to read his entire statement and ask Awareness to respond:

"This question deals with the subject of: What is Cosmic Awareness in relation to the Godhead? Awareness has stated in the past that *It* is that which is next to that which does not speak (Issue 84-17, Page 2). Am I correct in assuming that this means that the Force that we call Cosmic Awareness is that Energy which emanates from the Godhead, yet is not particularly the Godhead Itself? When Awareness referred to that State of Beingness which does not speak, (Sach Khan) *It* is referring to a state of Pure Beingness, a state of pure bliss, which can only be experienced to be understood. Am I correct in visualizing that the Force we address as Cosmic Awareness is that Energy which is the First Thought, the Ultimate Vibratory

Creation from this Godhead, and in being such, can only be surpassed by that which is so Ultimate in terms of Beingness, that *It* can only be experienced and cannot be described sufficiently to be understood?

"In my mind I often compare this to an electric fan whose blades spin quickly to produce a breeze of air. The breeze which emanates from the fan could not be called the fan itself, but if the fan could not produce this breeze to circulate air then it would have no reason to exist. The air that comes out of the fan is the fan's reason for being, but if the air in motion could talk, it could not stand up and say, "I am the fan." Nor could the light which comes from a light bulb say to itself, "I am the light bulb." Both the breeze of air from the fan and the light from the bulb are independent creations from their sources, yet they cannot claim to be the source itself. Could this be the same for the Force which we call Cosmic Awareness? Is it the Consciousness that is the direct result of the thoughts of the Godhead,

yet which as being an independent energy as a thought, cannot claim to be the Godhead Itself?

"To use a more appropriate comparison, a person perspiring under the sun on a hot day during the summertime, will eventually think to himself, "I am very hot!" The voice (or consciousness) inside the person's head that says that understands full well how hot the person is, but that little voice inside the person's head is not the actual experiencing action of what it feels like to be hot and perspiring. If the person had never said anything to himself about being hot and uncomfortable, he still would have a full experience just by going through it, except he would have done so without reflecting upon it.

"The idea for this question arose when Tom McQuay and I were talking about people praying to Cosmic Awareness for various things in their lives when Tom asked me the question: Why would anyone want to pray to Cosmic Awareness, when Cosmic Awareness Itself is simply consciousness?

In this sense: What is Cosmic Awareness in relation to the Godhead (or Sach Khan)? And are entities wasting their time by praying to It?"

### "The First Cause" is Explained and Defined

#### COSMIC AWARENESS:

This Awareness indicates that if you can visualize a cube of space that is totally void of motion, no vibration whatsoever, that cube of space that is not vibrating at all would be the ultimate source of potential, but it would not have any force other than being a potential force. If it should vibrate, the action of the vibration becomes a cause, a movement of the potential. The potential is no longer static. It is a cause, a force.

In most definitions of creativity, the First Cause is recognized as the Divine Deity. Therefore, the highest vibration or frequency that is in motion is that which assumes or falls under the definition of the Creator. This Awareness indicates that beyond that Creator is that which does not speak, which does not vibrate, which does not move. This Awareness indicates that it is the static potential.

This Awareness indicates that the problem entities seem to have is in understanding the broad array of vibrations available in the First Cause, in that these vibrations that occur are not limited to one thin band of frequencies but may exist in a vast array of bands of frequencies which on a collective sense are given different names, ranging from Sach Kahn, which is more or less considered as a place, when in actuality it is a realm of frequencies, to Cosmic Consciousness or Cosmic Awareness, or God or The Word, The Vibration, the Ultimate Frequencies.

There are many many varieties of frequencies that make up those higher bands of vibration in the levels that are associated with the First Cause. If you want to get very technical, the First Cause would be the highest of all frequencies, that fine movement next to that which does not vibrate at all.

This Awareness indicates that if you want to be more broad in definition, the Awareness energies of the Creator extend not only through the realms of the highest frequencies, but all the way through the electromagnetic frequencies, down to the densest and most gross levels of matter in their slowest forms of vibration. The infrasound, or frequencies that are so low they become inaudible to the ears or instruments available.

They are all part of the Divine Mind that is the vibrating electromagnetic spectrum in the universe, and is the creative force for all things that are.

### The Interpreter's 'Attempt' to Interpret the Energies

This Awareness wishes to add something for the purpose of clarifying, so that entities do not become confused; that when *It* speaks of these energies, and this Awareness being all these energies, it is important to understand that *It* is speaking in behalf of all the frequencies involved, and that *Its* speech in these terms are but the interpretation as viewed by the Interpreter for this Awareness as he understands the images being shown to him as representing what is meant by these descriptions and expressions of frequencies seen.

This Awareness indicates that the Interpreter attempts to put into words, pictures of energies, frequencies and vibrations that are shown to him by this Awareness in response to the question that was asked, and the words given by this Awareness through this Interpreter are the Interpreter's own expressions of these images that are presented to him. This Awareness indicates that therefore, it is not this Awareness that speaks through the Interpreter so much as it is the Interpreter laboring to put words to the images which this Awareness presents to his consciousness, and in that frequency and consciousness available to the Interpreter, this Awareness has presented an image of frequencies, an image of a cube of space that is static, an image of a very miniscule and fine movement in that static cube of space, that is representative of the highest vibration possible as a First Cause, and has presented from this First Vibration, echoes and reflections on other frequencies lower on the scale, all the way down the electromagnetic scale to the most dense or deepest and slowest forms of vibration.

This Awareness indicates that in presenting these pictures to the consciousness of the Interpreter, this Awareness conveys *Its* message in response to the question and the Interpreter puts this into words in response to the question. This Awareness indicates that it is important that entities in reading this message not confuse the Interpreter with being this Awareness for this Awareness is not in human form, *It* is in vibration and speaks to entities through imagery, through the medium of consciousness.

This Awareness indicates the Interpreter attempts to put these images in consciousness into words that can be reconveyed into the consciousness of the readers, so that the reader also can see what this Awareness has conveyed to the Interpreter.

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, WA. 98507 (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will! ("How many have you served and how well?")
