"Celebrating Our 20th Year"!

Let's go for it!

Wait a minute! Ramtha says we must avoid it!

I'll settle it! Once and for all!

THAT GREAT WHITE LIGHT -- SHOULD YOU, OR SHOULDN'T YOU ?

THE WHITE LIGHT AND THE DEATH AND NEAR-DEATH EXPERIENCE (Is it a Trick of the Greys to Trap the Souls of Entities as Strieber Claims?)

QUESTION:

A question from A.R., Sun Lakes, Arizona. "This morning, April 24th, (1992), I was listening to a talk show from Las Vegas, from 3:00 AM to 5:00 AM. The host of the show, Art Bell, had John Lear on as a guest by way of the telephone. A caller asked a question about near-death experiences and subjects seeing White Light, and asked John if he could comment on this.

"John Lear said at one time he had talked to Whitley Strieber for three hours and at one point, they did discuss the White Light. Whitley said that it was a trick of the Greys to trap the souls, and put them in black boxes where they are kept for thousands of years. Whitley said: 'Stay away from the White Light.'

"Sounds like Whitley is working on the side of the Greys. Her question is: 'Why would Whitley make a statement like this? Does he really believe this? I would like Awareness to comment on this!'"

COSMIC AWARENESS:

This Awareness indicates that Whitley himself said that he had been implanted by the Greys, and that therefore, anything he said should be held in suspect. This Awareness suggests that long before the Greys even came to this earth entities were experiencing near-death experiences and witnessing the White Light.

This Awareness indicates there are some who will argue that the White Light is actually a demonic source because it only represents energies up to the 49th octave and that there are vibrations far higher than that.

This Awareness indicates that the White Light of Cosmic Awareness or the White Light at the moment of death, this is simply a term, and it refers to a kind of energy, a vibration energy that is only the beginning of pure Amitabha Clear Light vision.

This Awareness indicates it is an energy that is cool. It is not hot light. It is a cool light, a life-giving blissful energy. The fact that it is blissful and that it is cool and that it is life-giving suggests it is from the highest frequencies. If you are experiencing a hot energy that takes from you or burns you, it is not that of the White Light.

This is a reference to cool blissful life-giving energy, and entities often call it the White Light. This Awareness indicates perhaps this is not the proper term for this. Perhaps a better term could be made. The term 'Divine Light' would be more appropriate and entities would sense that it was Divine and therefore not need to wonder if it was the White Light or the Divine Light.

This Awareness indicates that the whiteness of it is simply that it appears white rather than golden or blue or red or any other color. It is clear, but it is not a real color. It is colorless, as is white. This Awareness indicates it is liquid in its appearance.

This Awareness indicates that it appears to flow throughout your body, to engulf you in blissful brightness; that when anyone witnesses this, there is no doubt as to its Divinity. It is a Divine Light, and it is light, even though it appears as a kind of consciousness.

It is likened unto a liquid consciousness. In fact, it may even seem to be a liquid metal that flows through your consciousness. It is like lava from a volcano, except that it does not have heat. It does not bear down as a heavy weight, but rather it levitates, it lifts one.

This Awareness indicates that the entity Whitley Strieber, in discussing his version or his concept of the White Light, may have been speaking of something that he witnessed in terms of a technological frequency or vibration that the Greys use in capturing entities or in capturing their essences or souls, but the entity who fully experiences the Divine Light knows that this is not part of any artificially created force.

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

This Awareness indicates that when an entity experiences that feeling of Divine Merging and one feels lifted in bliss by this Divine Light energy, there is no question, there is no suspicion. There is no way to acknowledge any aspect of alien technology as being involved. It is far beyond that kind of technology.

Satanists Say the Dark Light is Divine

This Awareness indicates the Satanists also have an argument that the White Light is evil and that the Dark Light is the Divine Light. They argue this is showing that if you stare at a black dot with your naked eye on a white background and then you close your eyes, that black dot becomes the white light on a black background.

This Awareness indicates that with this argument, they attempt to convince entities that they should pray to the black light rather than to the white light, and thus, that Satan is true light, rather than the Christ.

This Awareness indicates that this of course is simply making use of the way by which your eyes function when opened or when closed, affecting the rods and cones on the back of the eyeball on the inside. There is a reversal much like that of a negative or positive in a camera.

The negative has that which is light in dark tones, and that which is dark is in light tones, and therefore, when the negative is developed, it reverses to create a picture that represents that which was photographed.

This Awareness indicates that these arguments relating to White Light are not of any great significance but are designed only to confuse entities. The dark forces do not operate well when entities focus on White Light in their presence. In fact, the White Light bothers them enormously.

If you are with an entity who is of a dark nature, who is into witchcraft or Satanism, and you begin to speak of covering them with White Light, they will object vehemently and try to get away from it. Some have even complained that it takes a long time to get rid of the White Light once they have been covered by it.

This Awareness indicates that you can project the White Light covering to those who are of a dark nature. You can project a White Light covering to those whom you wish to protect. By White Light, this Awareness refers to Divine Light. Use whichever term you prefer. You may even prefer to use the term 'Christ Light,' which is the same.

WHY IS THE RAMTHA SCHOOL TEACHING ITS STUDENTS TO AVOID THE WHITE LIGHT?

(One-Upmanship at the Spiritual Schools)

FOLLOW-UP QUESTION:

The so-called Ramtha School of Enlightenment allegedly is teaching their students to avoid the White Light. If this is true, what is the purpose in telling them this?

COSMIC AWARENESS:

This Awareness indicates this is the same. That these entities believe the White Light only takes them to the 49th Octave and that higher frequencies beyond the 49th Octave are superior to the White Light. This Awareness indicates that it is true that White Light, in terms of colors, would be represented in the 49th Octave. It is the octave of sight, wherein entities see things.

The seven colors of the rainbow with all of its millions of variations and shades of color are all in the 49th Octave, and this in itself is not precisely the spiritual octave. It is the sensual octave, the octave of sight, but symbolically, the term White Light symbolizes the spiritual light.

The spiritual light is on the frequency of 144 and on 288 frequencies. This Awareness indicates this in terms of octave levels; that the calling of the 144 octave of light, the White Light, is just a symbolic thing. It does not diminish it by calling it White Light. You can call it the Christ Light or you can call it the Divine Light.

This Awareness indicates it is likened unto the entity who refers to Divinity as a color white, or sound frequency High C. The High C, of course, is not representing the vibration the same as the octave of 144, or the 49th Octave for that matter. It is much lower in vibration. But if one is using symbolism and talking about spiritual levels in terms of sound, then High C might be a good symbolic reference to a high point in the scale.

This Awareness indicates that this is very much likened unto the entity who says that he or she is a Divine messenger from the 6th level, and then is confronted by someone who argues, "Oh! You're on the 6th level! Well, I'm on the 7th level!" and once entities begin numbering levels or naming levels there is no end to it.

The next person will say, "I'm on the 10th level!" and depending on how far these idiots can count, the levels will continue. This Awareness indicates that the only measurement of their divinity or spirituality is their ability to count higher than the next person and their claim to that level.

Thus, it becomes futile to discuss these things between such entities. Therefore, those who began referring to the White Light in earlier metaphysical discussions, who set up a standard by means of the word White Light, are now being pointed at and saying, "Oh, you're into the White Light! We're into the lights beyond White!"

This Awareness indicates it is simply a one-upmanship expression. If they cannot conceive of something higher than the White Light, then they will have no color to it at all. It doesn't matter. It depends on what it means to you. If the White Light means to you something Divine, if it means Divinity or Divine Light or Christ Light, then that term White Light in that sense is sufficient.

If the White Light terminology bothers you, perhaps you are for example, black, or native American; perhaps the White Light offends you. You've had it with Whites, and you would like to have the Red Light or the Black Light. Perhaps this would be better for you. It doesn't really matter.

What matters is what your definition of it feels like to you. If it feels like it is the Divine Light, then that is its meaning and the term, the words mean nothing, anymore than your name represents you in your essence. Your name is something associated with you artificially. It is not you. It is an artificial attachment or label, just as White Light is an artificial label attached to a meaning.

How Important Are Labels?

The meaning is what is important. If you need a different label to define the meaning, then get your other label. This Awareness suggests that many entities in dealing with these things do not seem to understand that words are not realities. Words are simply labels attached. It is like chopping up a bowl of jello into many different little blobs or pockets of jello.

If you have, for example, 25 teaspoons of jello laid out around the table, all of these may be the same essence, but you can put names and labels on each one and make yourself believe that one of these teaspoons of jello is higher in value and more significant than the other because one is labeled White Light, the other is labeled Divine Light, another is labeled Brown Light, another Yellow Light or Red Light, and these labels then become the more important, while the essence, the reality is forgotten.

This Awareness indicates the reality is in fact the same. These are all the same thing, but how you label them only determines how you feel about them, and if you label one with a certain name and another with a name that is less impressive to you, another with a name that is extremely impressive, naturally you're going to like that which has the most impressive name and you're going to shun that which is least impressive, but the reality is: the jello is the same.

It tastes the same, it feels the same, it has the same texture. It is exactly the same except for the label. Which do you want? Do you pay for the label? Do you sacrifice for the label when the other is exactly the same?

This Awareness indicates that if you can select a label that you like, fine. If you wish this Awareness to refer not to the White Light, but to the Divine Light, *It* will do so in the future, to make you happy, but it doesn't really matter. *It* is not changing religion, *It* is not changing devotion. *It* is not changing anything except the label.

FOLLOW-UP QUESTION:

Is the term "outer darkness" also an artificial term or label?

COSMIC AWARENESS:

It conveys a feeling that many entities can empathize with. To be cast into outer darkness would imply that an entity is set apart from others in a darkened area in which they are alone or have very little contact with anything known, and therefore, it creates a sense of dread, but in reality, outer darkness is just a term.

Outer darkness means nothing without the nuances and feelings that may accompany, based on entity's experiences. If an entity has experienced being put out into the dark, away from family and friends, then outer darkness means something to that entity, or if entities have even imagined being cast into the darkness outside, away from family and friends, then outer darkness would have a meaning, but if an entity has never experienced or never imagined being put into a dark area outside of something, it may not mean anything at all.

This Awareness indicates if all of your friends were sitting in the dark and you were sitting under a spotlight and someone said, "If you don't perform, you will be cast into outer darkness, outside of your spotlight area," it might take on a totally different meaning. You might say, "Hallelujah! That's what I want! I want to go sit with my friends and watch someone else out here in the spotlight!"

Therefore, outer darkness may mean something else in that circumstance. This Awareness indicates that words are but labels that have meaning, based on experiences or what you imagine from implications and experiences, and therefore, to use a term or to think of words in terms of something absolute is absurd.

WHAT EXACTLY IS THE "OUTER DARKNESS"?

This Awareness indicates that there are many who will form religions around words. There are many who say, "I believe in God! I am a God-fearing person and if you don't believe in God, then you are my enemy!", and they may fight over the belief in God, but if this entity were to be asked: "What is God? How do I know whether I believe in your God or not, when I don't even know what you are talking about?", the entity might say: "Well, God is God! " That is no definition.

The entity might say: "Well, God is everything that is good in the universe!" The entity can say then: "Well, I believe in that, too! I love everything that is good in the universe!" And the entity might argue: "Yes, but you don't believe in God! You just believe in everything that's good in the universe!" And the second entity will say: "Isn't that how you defined God?"

And therefore, these are arguments over words and the words have no substance without definitions, and the definitions must be clear for entities to agree or understand each other, so when one says: "Don't follow the White Light!" what does it mean to the next person when the White Light is an evasive or an illusive concept to everyone?

What does it mean to people when they hear the term "White Light?" If it was something they were familiar with, like marbles or ice cream cones, or coffee, and someone says: "Do not drink coffee!", that is something everyone can understand clearly. "Do not pick up marbles!" Who can understand that?

But when entities say: "Don't follow the White Light! It is a trick of the Greys!", it means nothing. It is simply words in a line, sounding impressive, saying nothing, for no one knows what is meant by those words. What exactly is meant by the White Light?

Does this entity refer to the Divine Light? To the Christ Light? That if you follow the Christ Light, it is a trick of the Greys to put you in a box? What kind of box? A cosmic box? A shoe box? A little box that you can't get out of? A psychic box? Does it box you in some way to the Divine Light to where you are stuck with Jesus, to where you are stuck with the Christ Light, to where you are stuck with a cosmic light, a Universal Light, a Divine

4. Source of Love and Light? What is meant by these terms, by these words?

This Awareness indicates that there are some who say: "You cannot know truth with words." Ouspensky wondered if perhaps all words should be stripped from the universe so that entities could begin to know the truth. If there were no words, what would the White Light be? If there were no words, what would the Divine Light be?

These words are simply sign-posts to point you in certain directions in hopes that you can find the meaning. It is like looking for a city, following signs. The signs themselves are not the city, but they may have the name of the city. They may say *White Light City*, but they are not the city. You must follow where the signs point, in hopes that you can find *White Light City*.

There are always some who will change the signs, so that *White Light City* points to *Dark Light City*, to confuse the wanderer, to confuse the traveler or to entrap someone. You want to go to *White Light City*, but the sign is turned, and you end up in *Dark Light City* and you think it's *White Light City*. For shame! How sad!

This Awareness indicates that all entities can do is put out their feelers for the Divine Vibration and sense the direction, listen to those who say: "It's down that path! I just came from there!", and look for signs that say: "It's down this path! Keep going! And consider those signs and those travelers and messengers as possibly being right, but rely on your own feelers, the feelers that say: "Divine Vibrations are this way! Keep following!" Follow your instinct to the Divine Vibration.

Most signs, most entities are trustworthy, and you can give them some credit, but must also be willing to question and to doubt. If your antennae say: "It feels like something other than Divine Vibrations to me, but the signs say this is the way, and the traveler said this is the way, I must stop and reconsider, because my antennae don't indicate Divine Vibrations in this direction!"

This Awareness indicates words are but pointers. They point the direction to what they signify, but sometimes they are wrong. They have been tampered with. They have been turned. Therefore, you cannot rely on words, and if it says White Light, it may be right, it may be wrong.

FOLLOW-UP QUESTION:

One last question on this Whitley Strieber thing. If the Greys did program him to say that it was a trick of the Greys to trap the souls and put them in a black box where they are kept for thousands of years, for what purpose would the Greys program such a statement?

COSMIC AWARENESS:

This Awareness indicates this is totally hypothetical, if they did that. We do not know that they did that. However, if they did that, it would be to send disinformation. This Awareness suggests that it is unlikely that they programmed him to do so. It is more likely that they have confused him with the implants and that he does not know what he is talking about in this regard or has not thought it through clearly

Perhaps he has seen some kind of White Light from the Greys through some of their technology which lured him into a situation that he did not like and therefore, has apprehension about this bright light experience. One can never know what another person's thoughts are or how he reaches a conclusion about some terminology.

This Awareness indicates *It* is not interested in Whitley Strieber's concern about terminology, *It* is only interested in responding to the question of the question as to whether or not one should follow the White Light. This Awareness suggests: Forget the White Light! Follow the Divine Light! If you must have labels, label it 'Divine Light.' Understand what Divine Light is. Throw the White Light in the toilet. Flush the toilet. Say good-bye to it. It doesn't matter.

Divine Light is a better term and has less chance of being picked apart by people who do not understand meanings and who are hung up on words.

CLOSING MESSAGE:

This Awareness indicates that it appears there is a great difficulty in assisting entities to think beyond surface levels, meaning words or labels. This Awareness wishes to ask entities to imagine that they are in a great warehouse and that the warehouse is filled with all kinds of pallets holding packaged goods, and each of these packaged goods has a label on it, and each of these labels is a different word, and there are hundreds of thousands of these packaged goods with words pasted on top of their package.

This Awareness indicates that as you move about looking for something, you look for the words to see what is in the package, and for awhile you believe that the words are correct, that they are descriptive of what is in the package and thus you see a label that says: "Milk," and you open the package, hoping to get a drink of milk, only to find that you have opened a package which is filled with signs that have the word 'milk' printed on them. Thus you discover that the words didn't mean what you thought they meant, and you go to each of the other packages and you examine the words on the packages and you open up the packages only to discover that with every package, the word describing what is in the package describes exactly what is in the package.

There are nothing but signs in the package, signs that reflect the sign on the outside of the package. It is a warehouse filled with signs and every label is a sign showing what is inside the package. Thus, inside a package labeled "Cars" are labels with the word "Cars" painted on them. Inside the package with the label "Berries" are signs that say "Berries" and the words are exactly what appears inside of the package which they label.

This Awareness indicates this is a warehouse filled with goods that specify what is in the packages. There are many entities who take words literally. The package is expected to contain exactly what the words indicate.

This Awareness indicates that these entities, taking these words literally, would get exactly what the words indicate. The sign on the outside is exactly like the signs on the inside. There is no difference whatsoever. If a package says "White Light", then inside the package are signs that say "White Light". This makes it very simple for entities because they do not have to use their imagination to figure out what the White Light is.

They can therefore create a world religion in which the White Light is held sacred or is held in contempt. They can evaluate it literally. They don't have to describe it. Another package opened will reveal the words, signs that say "God", and thus entities can look at this package and say: "I believe in God. I base my life around God!", and they never need to understand what God is. It is simply a word that appears on signs in print and sounds good when they speak of it.

They don't have to describe God, they don't have to understand God, they don't have to try to understand what God is. It is simply a word. Most entities in using language use language in this way. The words are flat, meaningless. They

simply convey flat meaningless lines of thought. Few people think of words in terms of their deeper meanings.

Some words yield deeper meanings than others, even to the flat-liners, those who think of words in terms of lines, leading to a conclusion which they claim is their essence or belief structure. The word "Father" for most people, has a depth. It means different things, even to the same person. It can have several levels of meaning.

One person may see it as representing his or her father, their physical human father, or a step-father, or the entity may see it as representing fatherhood in general, or the entity may think of it in terms of some kind of generic father or Heavenly Father. This Awareness indicates that the same is so with the word "Mother."

To mother someone is different from being the mother of someone. Being the mother of someone calls into play a specific form. To mother someone calls into play a specific action. This Awareness indicates that words have different meanings and therefore cannot be boxed into flat packages on flat signs that have no depth or sub-meanings or sub-levels of meaning.

Therefore, the entity who speaks of the White Light, who becomes concerned or who labels the White Light and says: "Do not follow the White Light, it will lead you astray!", is speaking of an abstract term that is multi-leveled in meaning. It has many different meanings. It is like saying: "Do not follow love. It will cause you agonies unheard of."

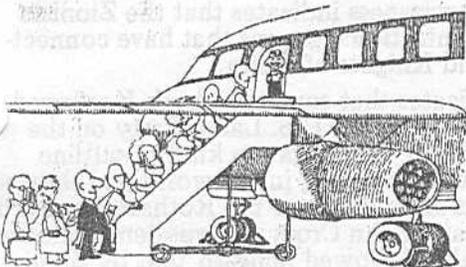

There is some truth to that, for those who have experienced agonizing love. There is also other meaning in the word love that counters this definition, and the entity who says: "Do not run from love and you will find great bliss and meaning in life!", is also true. How can both be true, when one is totally opposite to the other?

Is it not so that the word 'love' has multiple meanings?, and that both these views or definitions can be correct? Is it not so also that the word "White Light" is an abstract term that can have many different meanings for many different individuals, according to how they define it?

One person can say: "Watch out for freedom! It always leads to problems and excess!" Another will say: "I value nothing more than I value freedom! It allows me to be whom I am, to do what I must!" Both are correct, because the word 'freedom' is so abstract. It is not a concrete thing like marbles. Marbles are not abstract. They are specific.

This Awareness indicates that beware those entities who warn you against abstract concepts, ideas or words, because most abstract concepts, ideas and words are so broad in nature that you cannot be specific about them. It is like warning entities of desire. There have been some who say: "Watch out for desire!" There are others who say: "Desire is the powerhouse that leads you to your goal. Cultivate desire and reach your goal!" These are true statements.

Desire is an abstract concept that describes real energies and feelings, and to warn someone specifically about an abstract concept is to limit that concept to a specific meaning, which it is not.

1.

THE DIFFICULTY IN MAKING ACCURATE PREDICTIONS

Why Awareness Says the Future is Not Fixed

Excerpt from a CAC General Reading, April 28, 1991

OPENING MESSAGE:

This Awareness indicates that entities may sometimes wonder why this Awareness often gives contingency or optional possibilities in regard to future events; that some entities would like to see an absolute picture of what is going to occur, and expect that this Awareness could provide an absolute picture so that they know without any question as to what the future holds, just as they can look backward and see what happened in the past.

This Awareness indicates that *It* wishes to explain why and how this is so difficult for this Awareness to provide an absolute in terms of future, and why, as *It* says, the future is not fixed. This Awareness indicates that if you consider that which is likened unto a black hole, a kind of vortex in which light is coming in, and that energies are rushing toward the point, which becomes ever more condensed with gravity, and you let that point symbolize the moment of *now*, and that that is the moment from which an entity can look back and see what has occurred, what has gone by, what has passed through the black hole, and in looking at this vortex point, trying to look forward as to what is coming, the entity sees all kind of things coming from vast distances and from the periphery, coming from all directions toward that point.

This Awareness indicates that it is next to impossible to determine what such things will be that enter the point exactly where you happen to stand or exactly where your energies are viewing from. It is like one who stands near a point in a stream in which there has been enormous amounts of material dropped upstream by a boat that has capsized. There are all kinds of articles and products, ranging from fruit to sugar cubes, to soap and household items. The river is afloat with all these many different things that are floating downstream, and an entity says: "Awareness, what is coming to me in the future?"

This Awareness can look at all of these potentials and all of these things, but to be absolutely sure as to which of those things will come directly into your path is not easily seen. For example, the sugar cubes may dissolve before moving very far; the soap may dissolve. The other products, the fruit and the various other products may float in directions that bypass you and do not come directly to you, and some of these things may simply sink to the bottom before ever reaching you.

This Awareness indicates that it is not an easy matter to be absolutely sure as to what items are going to float down the river to your particular attention. If you think of this as the river of time, and upstream as the future, and downstream to where you are as the present, and that which has gone on as the past, then you can have an understanding of why it is not easy to be precise as to what would be predictable in terms of items that would float to your particular position in the river.

This Awareness indicates that is similarity to the effort needed in attempting to see what events are coming to you in the river of time in your life. This Awareness indicates that if there are certain things that appear to be on course and appear to be floating in your direction, this Awareness will describe these as probabilities and likelihoods or scenarios, and if these things appear to be dangerous, *It* may warn you about them, but *It* cannot guarantee for certain that these events will come about. This Awareness indicates the future is not fixed.

How Awareness Can Alter Events

This Awareness suggests that even the change in current from a wind or from some slight event or from words spoken by influential forces or people, groups or individuals can alter the course of history. This Awareness indicates that the number of people who write in, who attempt to notify and make things aware to others, can

6. alter the course of events. The very fact of Awareness calling attention to something can alter the course of events. The very act of predicting can alter the course of events.

There are many ways to change the outcome of energies in motion. This Awareness indicates that if sufficient number of energy or energy forces act upon a moving object, it can alter the direction of that movement or alter the course of events. This Awareness indicates that sometimes, in order to alter the course of events, this Awareness will give certain predictions and warnings as to forces that are in motion in the hopes that by calling attention to these things there will be energies that alter the course of the predicted event.

This Awareness indicates also, that sometimes by speaking of a situation, this Awareness can cause the situation to come about. Therefore, it is important to understand that this Awareness must be most careful in some instances not to describe an event that is seen, even though it may be seen clearly, for in describing it when it is a potential may cause the event to become a reality. *It* may energize the event.

Therefore, this Awareness sometimes does not answer questions completely, yet other times *It* may give information as being a probability and in time it may prove this Awareness spoke incorrectly. This Awareness indicates that this Awareness generally speaks according to what is seen as far as energy in motion, and in giving information, *It* gives the information that is necessary for entities to prepare themselves if an event does transpire, an event that threatens.

This Awareness indicates that therefore, do not assume that everything this Awareness has given as a possibility is going to become an absolute certainty. This Awareness attempts to keep entities from believing that the future is fixed. *It* has repeatedly told entities the future is *not* fixed. This Awareness indicates that if this has not clarified the condition surrounding predictive statements, that questions may be asked further in this regard.

ED's Note: For more on predictions, please refer to 'Revelations of Awareness' No. 89-15 (The Nature of Prediction: How it Works); \$3.00 from CAC.

NAZIS AND THE VATICAN CONNECTION

QUESTION:

I think that pretty well covers it.

A question from A. H., which pertains to the last reading about Nazis. "This is a request for any specifics pertaining to the aliveness and wellness of the Nazi party and any connection between its current-day activities and the Vatican?"

COSMIC AWARENESS:

This Awareness indicates that the connection, whatever there may be, is that which relates to the Knights of Malta. This Awareness indicates that this and also the mafia; that these two organizations have some infiltration or alliances within the church and also have had some connection with the Nazi party. This Awareness indicates that the Zionists as also part of the organizational groups that have connections with the mafia and Knights of Malta.

This Awareness indicates that sometime back *It* referred entities to information from the U.S. Labor Party on the book: *Dope Incorporated*, which gave a kind of outline of the pyramid of power operating in the world and showed in this book the banks and powers of the Rothschilds listed at the top, with the Saint John Cross of Jerusalem, followed by the Knights of Malta, followed beneath that by Zionism and the Bilderbergers, Council on Foreign Relations and various other national agencies, especially the intelligence

agencies and the mafia and the secret organizations such as masonry and on into the local governments, particularly the courts, which generally are infiltrated greatly by masonry. Most judges and many lawyers being masons.

This Awareness indicates that the Catholic Church was not mentioned in this book, nor were the Rockefeller forces mentioned. The Rockefeller empire and the Catholic Church representing a second ruling party. There is however, the mention of the Knights of Malta as having been formed by the pope in the 11th Century; that this being a kind of military arm of the church. The connection with the Bavarian Illuminati and the Nazi party, which sprung from the Illuminati, as well as the Communist party which sprung from the Bavarian Illuminati has also been discussed.

The Bavarian Illuminati having set up Karl Marx to write the *Communist Manifesto*, a book which would later be used as a kind of Communist bible on which the party would grow and dote, and the entity Karl Ritter, who at the same time was commissioned to write a book that would later become the work which brought about the Nazi party. This Awareness indicates that this incorporated works from Hegel and Nietzsche, which promote the concepts of destruction and war as a means to change the course of history and to bring in new social systems under the guise of necessity for change.

This Awareness indicates that there are books available for entities to study. The classic being that of Commander Guy Carr, who wrote *Pawns in the Game*; this entity having been killed for writing the book. The entity as a Canadian intelligence officer who gained much information during World War II and discovered the general overview of the conspiracy behind wars and plans for setting up a One World government.

This Awareness indicates that there are others who have taken up where this book leaves off and have brought it into a more modern context. The entity Anthony Sutton is one who has researched the conspiracy groups and has written much information on this topic, and has in particular researched the Skull and Bones Society which was a Nazi society based in Germany, but had a counterpart in Yale University and in the United States, one of an organization to which your president belonged.

This Awareness indicates that there are also works by Gary Allen and Lindsey Williams which touch on some of these connections and the little pamphlet called *Desert Shield* which sells for \$1.00 a copy as that which contains enormous amounts of information and references to further reading and books relating to that topic.

This Awareness indicates that *It* does not wish to get into great detail on this, but *It* did wish to give entities a referral for further study and a very brief overview, for those who wish to pursue this further. This Awareness indicates that many of those book sources that sell these books on conspiracy provide catalogs with other listings for further research also.

ED's Note: Most of the books recommended by Awareness are stocked by CAC. Please refer to the CAC Book Price Sheet under "Conspiracy Books". The books on the Skull and Bones Society and the Bush connection, written by Antony Sutton: "An Introduction to the Order," and the "Secret Cult of the Order", plus other books, including "The Two Faces of George Bush," are available from Veritas Publishing Company, P.O. Box 67555, Station "O", Vancouver, BC, Canada, V5W 3V1. (These books were too hot to be published in the U.S.) Send them a dollar and ask for their current catalog.

The book, "Dope, Inc." is out of print and unavailable. This was put out by Lyndon LaRouche and is probably the main reason he is in prison today on trumped-up federal charges. However, much of the information in that book has been duplicated in the new book, "Conspirators' Hierarchy: The Story of the Committee of 300," by Dr. John Coleman. 288 pages. Price: \$16.95 plus \$1.50 postage. Note: this is a very informative book, published by America West Publishers. However, you should ignore the books plugged in the back of the book by Hatonn. We do not recommend these at all, for reasons expressed in earlier readings. However, CAC does sell this book, regardless of who publishes it.

The book "Conspiracies, Cover-Ups and Crimes, Political Manipulation and Mind Control in America" by Jonathan Vankin also covers these areas discussed, including a chapter on Mae Brussell, the Nazi connection,

George Bush, La Rouche, etc. This published by Paragon House Publishers, New York, and currently available from CAC. Price \$24.95 plus \$2.00 postage. (319 pages, hardbound).

For those who want more dirt on George Bush, CAC has located a 90 minute cassette tape of a radio interview: Jack Barry interviews Sherman Skolnick, Investigative Reporter. The information on this tape is dynamite and the radio station in New England who broadcast this interview by now may be shut down or lost its license for releasing the information. It alleges, among many other treasonous crimes, the connection between Saddam Hussein and George Bush, who for 10 years has been receiving secretly millions of dollars in oil kickbacks from Hussein, which accounts for the deal he made not to kill him when he created the Middle East war. CAC is making this tape available to those interested for a \$7.00 donation, plus \$1.00 for postage.

The 'pamphlet' on "Desert Shield and the New World Order" is a 40 page 8-1/2 by 11 booklet put out by Nord Davis, and is available from Northpoint Tactical Teams, PO Box 129, Tipton, N.C. 28781. (It sold for only .50 cents, but they can't even mail it for that. Send them at least one or two dollars for a copy!)

HOW TO DEAL WITH A PROBLEM: FACE IT OR ESCAPE IT?

(The Nature of God: Does It Really Give a Hoot About Anything?)

QUESTION:

We received a letter from Y.M., who isn't asking a question, but it is a fascinating little letter. I'd like to read this letter and ask Awareness to comment on whether this entity is pretty 'right on' with the analysis. He writes:

"Our thanks to Paul, Avaton, yourself Vikki, and of course Cosmic Awareness for answering all our questions and providing us with a transcript to refer to. Your last two newsletters are very informative and interesting, as usual. I must admit that all the information about the Zetas, Dracos, Illuminati, Bolsheviks, Zionists, Skoptsis, Rockefeller vs. Rothschild, the hall of horrors underground, etc., is in total opposition to the lives and teachings of the masters of the Far East, the White Brotherhood, the life and teachings of Yohua-ben-Yoseph, the great Saint Germain, Djwal Khul, and many, many other luminaries among men.

The good guys vs. the bad guys...yes, people who are turning inside and listening to the whisperings of their Higher Self, and people who choose to listen to their negative ego; in other times, we could have said the 'good angel' and the 'bad angel'. The story is old hat, but with new characters, changed appearances, new names. That makes me wonder about the nature of God, and since nobody knows exactly what "God" is, I prefer to call it First Cause or All That Is. The word "God" carries the connotation of a male figure, leaving "Goddess", its other half, totally in the dark, like if she did not really exist!

Since imagination, the emotions of love, mothering, nurturing, etc., are all aspects of the Goddess energy, who has immense powers, I strongly protest against this chauvinistic attitude which shows, among other things, how brainwashed we are, how little we think by ourselves, and how incomplete our notion of "God" is. We always miss a good 50% of it.

I have always wondered why "God" allows all these negative things to happen in the physical, etheric, astral, causal, and mental worlds. I have come to the conclusion that All That Is does not have the capacity to take sides, to judge for or against, like humans do.

One of the terribly misleading aspects of organized religion is that it inculcates the idea that "God" takes sides, "God" prefers good over evil, "God" prefers the Roman Catholic Church over the Mormons, or vice versa.

The truth may be that this famous god everybody talks about without knowing what they are talking about, is an omnipresent, omnipotent, and omniscient "something/nothing" that is totally incapable of taking sides, a little like electricity. All that this "something/nothing" is interested in is dividing and subdividing itself in so many little pieces that interact with each other, and from that interaction is born a conscious awareness, an experience that seems to be valuable and appreciated by First Cause Itself.

So, frankly, whether All That Is manifests Itself in the form of a Draco or Saint Germain, or both fighting each other, and one winning temporarily over the other, or losing temporarily over the other, what difference does it make? Both are valuable experiences for First Cause, and the interaction is certainly lively!

If I am right and "God" does not give a hoot about anything, in the final analysis, does not take sides, does not judge, does not punish, does nothing of what we, humans, say "he" is supposed to do, why should I bother?

I shall confine myself to my own preferences, and let the universe be what it wants to be. You just don't fight All That Is, you let it be! My thanks and gratitude. Y.M."

Would Awareness comment on that letter, please?

COSMIC AWARENESS:

This Awareness indicates there is much clarity and understanding in the entity's analysis. In regard to the nature of God or what this nature terms as God, this Awareness has long indicated that the higher forces in the universe, the Divine Force, is that which is nonpolarized, but there is one area which this entity has not quite understood. This nonpolarized energy is that which experiences to some degree all of the polarities that do exist, and it recognizes that these extremes create tragedy and suffering that is unnecessary, therefore, It seeks to call attention to those extremes so that entities can find ways to reconcile or to bring those extremes into neutralized positions.

Face or Ignore the Problem: Dealing with Polarized Energy

This Awareness indicates that the best way to deal with polarized energy is to make those entities who are either highly polarized against and aggressive towards something, as well as those who might be victims of that aggression, to make them aware of their place and of their potential for something greater.

This Awareness does not particularly like to see victims suffer simply because they do not want to deal with a problem. There appear to be two different approaches that are very common, although they will use many words to dress up the particular approach, either to confront a problem, or to ignore and attempt to escape the problem. This entity indicates by attempting to avoid dealing with the problem that he is one who would prefer to escape, rather than confront a problem.

This Awareness indicates that this has certain merits, and can be beneficial in some instances, but if everyone were to take on the same approach, then there would be no one to deal with problems and everyone would seek escapism. This Awareness indicates that in some cases, the best approach in dealing with a problem is to ignore it. This Awareness indicates that sometimes this does not work, that sometimes it is essential for entities to face the problem rather than to flee from the problem or ignore the problem.

This Awareness indicates that this is what it really comes down to: whether you can face problems and deal with them in a way that helps to resolve the problems, or whether you want to confront them, and each one has its own set of further behavior. The one who confronts the problem may attack it as though it is an enemy being polarized against it. The one who wishes to escape the problem may ignore it or may run from it or may in some way push it off on someone else to deal with. "Let the gods take care of it! Just don't include me in the scenario!"

This Awareness indicates that this may sound fine for one who is referring to something that can be avoided, but to those who are targeted for extermination, the entity who says, "I'm not going to deal with this! It is not part of my world! It is not part of my reality! Just ignore me, and I'll ignore you!", this will not solve the problem of still being a target for extermination.

The Very Act of Knowing Can Change the Situation

This Awareness indicates that the one thing that tends to solve problems of all types is attention. The understanding and knowledge and awareness of What Is. The very act

of knowing what is happening will have a greater healing effect on a situation than any effort to avoid it. This does not mean entities cannot seek to escape or should not sometimes ignore problems. In fact, an entity might escape by playing dead, and many entities have done so in the midst of battle.

This Awareness indicates that this may be the smartest move. What this Awareness is suggesting is that entities need to know what is going on so they can make the right choice at the right time as to what is best to do in any situation they encounter.

This Awareness indicates also that if enough people become aware of a potential danger, the very act of that group awareness tends to take on a direction which breaks into a movement which in many cases counters the threat so that there is indeed a confrontation or escape or alteration to the very nature of the threat, so that it does not come about, or is altered to something that is acceptable

If Jews Had Been Aware of Hitler's Gas Chambers

This Awareness indicates that the many entities in Nazi Germany who were taken by trains to the gas chambers were informed that they were being taken to another city or to some place in Russia, and would be living in another country. These entities were then unloaded and moved into these buildings to be informed that they were to take showers. They were, in other words, kept unaware. Had they been aware of what was occurring to them, would they have all walked into those buildings for these so-called "showers," wherein they were gassed to death?

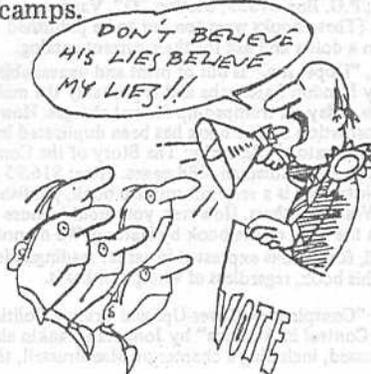

It would have been a totally different history had these entities been aware of what was occurring.

Why Gandhi Was so Effective Against the British

This Awareness indicates that one of the reasons why Gandhi was effective in leading the people of India against the British is that he not only helped to guide them as an example, but he also kept them informed through their various information networks and the entities knew what was going on and what he was going to do, and gave great support and joined him in the various actions.

This Awareness indicates another reason why Gandhi was more successful in his efforts than would have been those in other nations or other circumstances; this entity also knew the power of the press and foreign influence. The press gave much publicity to the entity and this was the kind of publicity that brought influence upon the British at home so that their conscience and their politics began to clash. The political power they sought to keep in India clashed with the conscience of the people and this led to the eventual surrender of the British to this man and his people. This Awareness indicates that you have witnessed recently a similar power of the press in dealing with the Kurds and the forcing of the United States to join in helping these entities survive.

This Awareness indicates that the images that entities hold in regard to their leaders can have a powerful influence on the behavior of the leaders. In Nazi Germany, the press was so well controlled that there was no real exposure of the treatment of those sent to the gas chambers until the war was over. Therefore, the actions could continue throughout the war up to the very days of allied troops coming into the camps.

The Prodigal Son: the Divine Fall from Grace

WHY WOULD ENTITIES IN HADES TEMPT EARTH ENTITIES INTO WRONG DOING? (What the Immortal Realm of Hades Really Is)

QUESTION:

S.K. writes: "After reading a past issue, No. 78-19, on the Immortal Realms of Hades, some questions come to mind. Why would entities in Hades need to tempt us into wrongdoing in order to increase their work force? Aren't there already plenty of wrongdoers on Earth, enough to keep them well supplied?"

COSMIC AWARENESS:

This Awareness indicates it is all part of a kind of cosmic game that is occurring. The concept of Hades and the idea of tempting entities into negative behavior is more or less an allegorical or metaphorical description of any of the forces that would lead entities into such negative behavior in order to entrap their being, entrap their souls.

This Awareness indicates that *It* does not refer strictly to a particularly located prison or place in the universe, for Hades can appear even in your own home or even in your living room or even within your own being. Hades is a state of mind, as much as it is a place. This Awareness indicates in fact, that heaven is also a state of mind as much as it is a place; that the heaven and earth and Hades and all of these descriptive terms refer to places in consciousness more than three dimensional places.

This Awareness indicates these places may exist in the space and time dimension, but they exist there because they first exist in consciousness and are reflected into an existence in time and space, for in reality time and space are only the result of consciousness.

This Awareness indicates that therefore, in speaking of Hades and the negative forces tempting, it is a kind of metaphysical way of explaining that entities can be entrapped or lured into negative activities and behavior by various forces in consciousness that seek to capture the soul as part of their own energy force.

This Awareness indicates that too many entities think in terms of realms as being locations, but in fact, realms are more like vibrations and there are many realms occupying the same time and space. Many vibrations can occupy the same space and time and entities can travel up or down those frequency levels, enjoy bliss, or enjoy the sorrows and suffering of those lower vibrations.

This Awareness indicates the reference to entities in Hades wanting to work has to do with the nature of the mind, which is not satisfied with harmony and wants something to butt against or battle against. To work on something that is incomplete, that is a challenge, that is in great opposition to an entity, gives the entity the opportunity to prove himself and all of this action of an entity seeking to prove himself is the activity that is necessary for building individuality.

The Importance of Developing an Individuality

This Awareness indicates that the very reason that consciousness left the Divine level of vibration was to go out and return after many adventures and trials and tribulations with a personal or unique individuality. Thus, the individuality becomes the prized reward for the entities who fell from heaven, who fell from grace, who went into sin and suffering and who in time return to Celestria with their individuality intact and developed.

This Awareness indicates that any entity who has not completely developed his or her individuality is likely to return to the realms of darkness for further work, and it will not be even to their benefit to force them toward the Light before they are ready. This Awareness indicates that thus, you see some entities who are bound and determined to do things that are essentially not good for themselves or others.

You may understand this better by realizing they are working on their individuality and they are taking the path of suffering rather than the path of alchemy or service. They may, at some point, reach the worst case scenario for themselves: the Dark Night of the Soul. They may then turn back toward the Light. The story of the Prodigal Son is the story of every soul that has fallen from grace and goes out to find themselves.

To find oneself is the effort to develop individuality, and there are many entities on the path seeking to discover who, in fact, they really are. They are in fact building their individuality, often on mistakes, often on great error, often at the expense of others, but eventually, something occurs where they see that they have wronged themselves and others, and they return and they carry with them that uniqueness which is their own from their negative experiences and behavior, as well as from any lessons they might have learned, and when they do return, they then are unique individuals in their own right. They are not mere reflections; they are not the perfect reflection of Divinity. They are individuals who have made mistakes, who have suffered, who have caused others to suffer, and they learn from these things and are then ready to try something for greater living and greater experiences and are then satisfied, having eaten of the fruits of the Tree of Knowledge, having eaten of the flesh and appetites, having eaten with the pigs at the trough and wallowed in the pig pens, they are through with that experience and are ready for a more blissful and serviceable expression.

Thus, they become more interested in giving of themselves than taking from others, more interested in doing worthwhile things than causing trouble for others or for themselves. That essentially is the nature of the metaphor known as Hades. Hades is a state of being in which entities challenge themselves, challenge others in order to develop their individuality, and once this is developed, once they reach a point of total dissatisfaction with themselves and with their world, they then cry out for salvation. They then reach out for help or they cling to the Light and return to the Divine as New Beings.

The Three Paths That Lead Out of Hades

This Awareness indicates that this repentance can come through grace or it can come through the path of suffering and labor and long journey home. The path of Grace is an alchemical path which brings the change suddenly, so that the entity converts immediately to the Divine Light. This Awareness indicates that the Path of Service is somewhat slower than the Path of Grace, wherein the entity begins to give service to others, and learns in the service many lessons as to the wondrous rewards of watching others have better lives because of the energies they can give to these.

This Awareness indicates that the three paths of sorrow and suffering and the Path of Service and the Path of Alchemy: these three paths are ways to return from the state of Hades; that the slowest return is the Path of Suffering and hard work. The next faster return is the Path of Service, wherein one works for others, and the quickest return is the Path of Alchemy in which one's consciousness is suddenly changed to the degree that an entity's entire life changes from within.

There are many ways of this alchemical path of consciousness change to occur: meditation, the Christian conversion, the Development Classes this Awareness has given, and other metaphysical rituals and techniques from other disciplines such as yoga and even some high-tech vibratory brainwave balancers may be useful in this alchemical change of consciousness.

This Awareness indicates that sometimes the meeting of an entity who radiates love will alter an entity's consciousness to where it too begins to radiate love, and this brings about an alchemical change.

All These Realms Are But Thought-Forms

This Awareness indicates that entities should realize that place and times are but illusions and all that really exists in the ultimate sense is consciousness and the various forms or thought-forms that are created in consciousness. It is alright to play with time and space as though they were part of a game and to experience the game of matter, but if you really want to understand what lies beyond the game you must recognize that consciousness is the ultimate reality and that all the time and space and matter simply come out of consciousness as solidified thought-forms.

This includes also those realms you have heard about such as Hades, hell, heaven...they are but thought-forms.

The highest levels or frequencies in consciousness lead entities into those thought-forms that are more highly evolved, heaven being part way up the scale, Celestria and Sach Kahn being near the top of the scale, Hades being lower on the scale of vibration, with hell being even further down on that scale. These are but concepts created by the minds of entities to name, to locate, to classify these vibrations on this scale of consciousness.

This Awareness indicates the concept of purgatory as being somewhat higher than that of Hades, although purgatory is generally recognized as being part of Hades. This Awareness indicates that hell is generally considered as part of Hades, in some of the more harsh realms or areas of the Hades vibrations. This Awareness indicates the important thing to understand is that these are vibratory realms; that even your Earth experience is a vibratory realm and all things in your Earth experience are vibrating and you can lock yourself into the vibration, just as your body can be made to vibrate at the same rate as the physical realm so that it cannot easily escape the vibrations of the physical realm, because it is made to vibrate within a certain range that locks it into that realm of reality.

This Awareness indicates that the same could happen in regard to other vibratory ranges and realms, but entities need to match their physical vibration in order to remain in those realms, therefore, by attuning to Hadean energies, entities could experience Hades. By attuning to energies associated with and vibrating with hell energies, entities could experience hell as a reality. By attuning to frequencies and vibrations associated with Celestria, Sach Kahn or heaven, entities can experience those realms as realities.

LOCKING IN TO THE PHYSICAL VIBRATIONS: "COMING DOWN TO EARTH"

(How to Ensure Going to Hades or Hell)

FOLLOW-UP QUESTION: (VIKKI):

Does this tie into the grounding, the locking-in vibrations, like to a physical reality? You notice that teenagers seem to be spacy and my uncle, when he was 60 and I was 10, kept telling me: "Come down to earth! Come down to earth!"

COSMIC AWARENESS:

This Awareness indicates that this is in the affirmative; that most young people are likened unto spirits who have not yet landed in the vibration of Terrestria; they are flighty, they are very much unsettled or nongrounded. This Awareness indicates that likewise, you will see older people who are in the transition approaching death, perhaps even over periods of months or years, whose minds are out there in the clouds, who cannot find any practical expression, and they seem to be out of touch with Terrestrial vibrations.

It is because they are getting ready to transcend into other realms. In some cases these entities will be preparing to move into higher frequencies. In other cases, they may be preparing to move into lower frequencies. Those whose energies at that time are bitter, painful, angry, or seem extremely depressed and evil in appearance or in behavior; these entities may be attempting to tune into those lower vibrations of Hades and are almost sure to go there after their moment of death experience.

¹⁰ This Awareness indicates that whatever level entities tend to vibrate on; if they are extremely bitter, or if they are joyous and blissful, can give an indication of their level of vibration and where they are coming from in terms of frequency level. **The Importance of Overcoming Bitterness**

This Awareness indicates that *It* does not give this information in order for others to judge each other, but rather for others to have an understanding of the frequency levels so that they might help others to escape and move to levels that are more suitable for their true spiritual development. Some entities become bitter because they have had harsh experiences, or have lost loved ones, and some become bitter because they have been violated by others.

They need to learn to overcome that bitterness, either to forgive others or to recognize that the bitterness does nothing for them and that it is hurting their soul growth, and if they can learn this and somehow let go of the pain and suffering they are clinging to, which is feeding the bitterness, they then may have more joy in their lives and their vibrations may rise to greater heights. These lower vibrations that entities often develop in a lifetime may not be their own true reflections, may not be the reflections of their own true selves. Many entities come into run into extreme difficulties and hardship and become bitter because they do not learn how to handle or deal with those problems that were forced upon them by life's experiences, and thus, their vibrations, rather than rising to greater heights become entrapped in lower energies, and such entities might then be regressed into lower experiences after passing over if they cannot rid themselves of those bitter and angry feelings. They may need to regress back into Hades, for example.

Resentment a Temptation that Can Bring Entities Down

This Awareness indicates that this may be considered as a kind of temptation, wherein an entity has a good excuse for being angry and bitter if the entity wants to be angry and bitter, or allows himself or herself to be angry and bitter. *The sufferings that entities incur in life can be temptations for anger and bitterness and can help to bring their vibrations down, and these can be entrapments as well as lustful temptations.*

Temptations need not necessarily be caused from desire. It can be caused from feelings of resentment. In fact, desires themselves are not so much the kind of temptations that bring entities down, unless these desires are unfulfilled and leave the entity feeling resentment. Resentment is probably one of the greatest temptations to bring entities down in terms of their spiritual vibration. Resentment leads to revenge, or the desire for revenge.

DO ENTITIES ON OTHER REALMS FACE THE SAME SPIRITUAL QUESTIONS AS WE DO?

11.

FOLLOW-UP QUESTION:

All these other realms, systems and vibrations and so forth, where entities exist: do the entities experiencing in those realms understand for the most part the nature of consciousness and who, in fact, each really is, or are similarly faced, as we earthlings are, with the necessity to pursue such questions throughout their life experience?

COSMIC AWARENESS:

This Awareness indicates that some of these higher realms do not appear as solid and material as does the earth plane or Terrestria. Terrestria is a kind of vibratory point that is likened unto a juncture of many vibrations from different realms coming together. It is much like in the musical scale, the "Do Re Me Fa So Lah Ti Do"—the "Do" of the scale has greater solidity than do the other notes in between.

This Awareness indicates that so it is with Terrestria. Terrestria seems much more solid and entities are much more entrapped in the realm when they enter it. Other realms in between these various frequencies of the different octaves tend to be less solid, more like dream states. They form images, but the images can be changed. The consciousness becomes more apparent.

Entities who have dreams may not be aware during the dream of the role consciousness is playing, but once they exit the dream it becomes very much apparent that the dream occurred in consciousness and was made out of consciousness. This Awareness indicates that the dreamer may awaken to the reality of the dream enough to realize that it is possible for him or her to change elements of the dream in order to have things go better.

If this occurs, and this often referred to as lucid dreaming, which essentially means enlightened dreaming, the entity may direct his or her dreams along lines desirable to them.

This Awareness indicates that entities who understand this and can practice this may also apply the similar rules to their earthly life and find that they can have enlightened living or enlightened dreams in life, wherein their life-dreams can come true because of the enlightenment or lucidness of their consciousness in working on these life-dreams.

ED's Note: For more information on Hades and other realms, please refer to the following "Revelations of Awareness Newsletters: 78-19 (The Immortal Realm of Hades); \$2.00; 81-27 (The 4 Levels of Hades); \$3.00; 83-13 (Hades and Celestria and Dual Hierarchies); \$3.00.

IS THE EARTH ENTERING THE 4TH DIMENSION?

A question from J.K. in Detroit. Awareness has previously given information on this. "Cosmic Awareness, the Pleadians said through channel Barbara Marciniak that the Earth is seen "breaking off into two completely different and separate Terras. You are moving to the 4th dimension. When this move is made literally, you will form a new Earth and literally, you will be there, and it will seem to you as if you have all awoken from a dream. You will awake in a world that is pristine and beautiful." And he asks: "Please tell us if this is true, and if so, when is the soonest this can happen?"

COSMIC AWARENESS:

This Awareness indicates that this appears to be that event which begins to occur in or near the time of 2012; that this has been given previously as a date in which the Earth was to come to an end in the sense of the Earth as you know it. This Awareness indicates that it appears this will be also the beginning, for every end is a beginning and every beginning is an end.

This relates also to the concept of a new birth. The death of the old is the birth of the new.

This Awareness indicates that there will be many entities who will go in the new direction. There will be some who cling to the old and will find themselves experiencing a dying planet. That many of the plans of the aliens and those who support them may find themselves taking over a world which becomes another dying planet for them.

IS TIME SPEEDING UP?

FOLLOW-UP QUESTION:

Marjorie D.G. mentioned in a letter that this Professor Zachow says we are now living four days in one, the vibrations in the Earth are so speeded up. She stated, "I know the drivers on the expressway are driving like lunatics and everyone is so stressed out." Is this true, and is this a sign that we're going into this splitting-off period which culminates in the year 2012, as Awareness just indicated?

COSMIC AWARENESS:

This Awareness indicates that time as speeding up refers to the speeding up of actions, durations; all of these are moving much faster. This Awareness indicates that it does not necessarily mean that you can accomplish in one day what used to take four. In some ways this is so because of the new technologies that allow entities to get things done faster.

This Awareness indicates that the experience of increased motion is not necessarily a sign of the changes in the Earth's frequency, but the increased motion itself can create more frequencies on Earth. If everyone on Earth speeds up their activities then the energies of the Earth are speeding up, in terms of those energies that have increased in speed and multiply that around the globe, look at the globe with all those energies of people who are working faster, driving faster, doing everything faster, trying to increase their speed, and it becomes a more frenzied Earth than it was in, say, the 50s or 30s.

This Awareness indicates that all of this can be presented in a metaphorical sense, or you can view it literally in terms of the speeding up of energies. This Awareness indicates that there is also the fact of radiation that has polluted the Earth to some degree and this radiation as a by-product of the radiation; this has caused many atoms and subatomic parts to radiate at a higher speed. In this sense, it is also creating a much more rapid breakdown of particles in their normal duration. Thus, duration becoming speeded up so that things wear out faster in nature, can be seen as another way of saying that time is speeding up, not necessarily the clocks, but the duration of things wears out more quickly..

This Awareness indicates that all of these, and the speeding up of vibrations through higher levels of awareness contribute to the higher frequency vibration of Earth, also reflect the higher frequency vibration of Earth, much of which is coming from interstellar vibrations, relating to the place the Earth is entering in the galaxy; this referring to the movement of the solar system on its course in the galaxy. This being in reference to a position in the galaxy wherein higher frequencies are pronounced and have effect on the planet Earth.

SUBJECTIVE AND OBJECTIVE TIME DIFFERENCE

FOLLOW-UP QUESTION (VIKKI):

It may be subjective, but it seems like this time thing has gotten sort of odd, when Avaton and I will be looking back over maybe just a day or two back, it seems like much further back in history.

COSMIC AWARENESS:

This Awareness indicates that subjectivity is always a matter that cannot be made objective; that as the poet suggests, the time one experiences when waiting for freedom or to meet a lover is always much slower than the time when entities enjoy their freedom or enjoy their lover; such time is fleeting. This of course is subjective, and even if it is subjective, entities looking at it objectively may try to understand why time seems to go faster or slower.

The subjective and objective being opposites, cannot properly use the same standards of measurement. If one uses objective time, one needs something that counts time in a way that is irrelevant to the enjoyment or pleasure or personal feelings, such as a clock. If one measures time subjectively, it is simply a matter of how one feels about the length of time involved.

This Awareness indicates that objectively, you know the clocks run at the same speed, subjectively you feel that time has gone very slowly or very rapidly. It is a question of which way you wish to view time; objectively or subjectively. It is not a matter of which is right, it is a matter of which favored or which is appropriate for your purpose in viewing time.

A DREAM THAT CHEMICAL WARFARE KILLS BUSH

QUESTION:

One final question. In a letter from M.D.G., dated April 21, she writes: "Something is in the air. I'm like a cat on a hot tin roof and have no nails left. I picked them all. I have heard or read from three sources that Bush and Quayle would be found dead on the lawn of the White House in 1992 of chemical warfare. I've been cancelling that thought when I think it. That could bring the Beast movement together real fast." Does Awareness see anything at all to that?

COSMIC AWARENESS:

This Awareness indicates that *It* has seen a strong potential for the possibility of assassination; *It* has not seen this particular event as being a reality. It does appear that such an event or similar energies could come into being as part of the larger conspiracy; that these entities could be used for certain purposes and then wiped out in order to create an atmosphere that would allow for other forces to take control.

This Awareness indicates that it would be quite a dangerous situation to have this occur. It would be very volatile, particularly if such a situation were from those who conspire against the United States, as is usually the case when there is any type of assassination. It is seen that such an event would not likely be from some individual, but from a larger plan to affect the very nature of this country.

This Awareness indicates that there is however, another thing to consider in your statement that you have heard this from three different sources. The three different sources may have been feeding off of each other, that is, two of the sources may have been parroting or repeating or echoing the first source and that the three different sources is not necessarily meaning that these were independent conclusions from these three different sources; they might have depended on each other for the information.

This Awareness indicates that *It* does not see strongly that there is danger to these entities; *It* sees that there is potential for such because the assassination could fit in with the plans of those who would control the destiny of this country. This Awareness indicates it also could reflect a potential of rebellion from those who do not wish to see the New World Order envisioned by this entity.

This Awareness indicates that *It* does not see this as a strong potential.

...HERE IN OUR STUDIO AN EXPERT
ON EASTERN EUROPE...

CLOSING MESSAGE:

This Awareness indicates that in the prognostication of events, there are so many energies swirling, that to see where an energy will land or the outcome of an event, is likened unto watching a whirlwind picking up papers and attempting to determine where these papers are going to land. There is probably a pattern that could predict, but it would need to foretell the exact nature of the whirlwind, whether it would continue at its same speed or whether it might alter and speed up or slow down, whether it will bend its flow upward or remain exactly as is.

There are so many potentials for change in the world, and any single change of even the smallest thing can cause other changes elsewhere so that predicting cannot be a precise action, especially when predicting through an interpreter. There are, however, some events that by fluke of consciousness, allow one to see into the future. It requires an extreme and unusual event for such to happen. These are not events that can be called up at will.

Entities cannot simply by willing it look into a screen and see the future. Entities can see energies in motion, or may grasp from tools such as Tarot cards or other tools to assist the mind, may grasp some pattern in consciousness that allows them to glimpse to some degree future events, but hardly ever can one truly depend on these things to be totally accurate.

If they are couched in terms that are nebulous, then they are usually more accurate because they are not precise. If you ask for a precise information on the future, it is next to impossible, and yet there are occasional cases in which an entity glimpses a future event which later comes true. This Awareness indicates that this occurs only when entities slip into antimatter realms for a moment; that in order for this to occur, the entity needs to flash out of the Terrestrial realm.

It is a moment of death experience, wherein the entity essentially dies in a flash and returns to his or her body, and that death experience allows them a glimpse into the antimaterial world.

How Dreams Can Also be Prophetic

Another way by which this may be accomplished is through a dream experience, for dreams tend to flow with antimaterial energies, and the entity may glimpse the future in a dream. Usually this requires certain astrological configurations at the same time, or it may be caused by genetic vibrations that are linked to someone at a distance, so that an entity whose vibrations genetically match or approximate the genetic qualities of another being at a distance, may suddenly glimpse that entity as being injured or in some way experiencing a traumatic event and to find later that the dream or experience was correct.

This occurs sometimes because the genetic vibrations are in synch with each other, much like the tuning of a transmitter and a receiver on the same vibration.

This Awareness indicates that insofar as this channel is concerned, *It* does not have this kind of capacity or ability to be precise and *It* does not wish to cause this channel to flash into antimatter experiences, which could be quite dangerous, nor does *It* wish to attempt to force the Interpreter in any way that would be hazardous in order to get future information in a precise and absolute manner; therefore, the prognostications are made mostly through this Interpreter by reading the energies that are in motion at the time of the question and dealing with the likelihood of their course and directions.

Thus, this Awareness repeats that the future is not fixed.

The Law of Gratitude is given

IS THE "COLD WAR" REALLY OVER?

(U.S. Grooms a New Adversary
so Arms Race May Continue)

C.A.C. General Reading, April 11, 1992

OPENING MESSAGE:

This Awareness indicates that a few months ago, letters were coming in, these a very few letters, suggesting that this Awareness was being duped or working in behalf of Communist Russia to dupe the people. The letters would suggest that the coup in Russia as a false coup and that it was all being staged to disarm the United States so that Russia could then rearm quickly and have a greater advantage over the United States.

This Awareness indicates that the arguments included the argument that the democratic quest in Russia was false and it was still truly a communist Soviet empire, simply playing a sly trick on the people of the world. This Awareness indicates that this trick, if it were such, apparently is backfiring against the Soviet Union, for it has broken into separate sovereign states or nations and has little or no power left in the area.

This Awareness indicates that this has led most people to assume that the cold war is over and that all is well with the world and the United States is the remaining superpower. This Awareness indicates that this is far from over. This Awareness reminds you approximately a month previous to this reading that the question of why the United States was still preparing itself for potential conflict was asked and that the only logical explanation was that China could become an adversary of the United States and that there were real concerns among entities in the Pentagon in this regard.

This Awareness indicates that for the past several years after the Tiananmen Square incident in which thousands of Chinese students were massacred in their demonstrations for democracy, the Chinese have held steadfast in their maintenance of communism and rejection of democracy. There have been many in the United States and around the world who have asked for, who have demanded and argued that China should be boycotted and people should put economic sanctions against China for those massacres.

This Awareness indicates that the entity George Bush has held steadfast that China should be given Favored Nation status and that the United States should open trade doors and commerce with China and encourage this as a way of improving relationships with these entities, and that this improvement would be a more prudent way of bringing these entities into the kind of relationship that might transform this country toward a more pro-democratic nation.

This Awareness indicates that as a result of this Bush policy and also because the Bush family has investments in China, the relationship between the United States and China has been on an improvement basis, improving considerably during the past several years, allowing more trade and reducing restrictions to that commerce.

This Awareness indicates that some of the best computers are being sent to China. China has a policy in the electronics field of taking the best of the foreign electronic devices, breaking them apart to understand how they work, and creating their own assembly lines to reproduce those electronic devices from their slave labor.

This Awareness indicates that they first did this to Japanese computers and computer components. They are doing this also with American computer and military devices. This Awareness indicates the Israelis have sent China U.S. supplied air-to-ground weapons and the Patriot ground-to-air weapons, and China now is in the process of taking these apart, analyzing them, to create their own factories, in order to build these things in China.

In other words, China is preparing itself to become a superpower, using foreign technology in both the private and in the military sectors for its new emergence into the world, whereby within the decade, China can have as great or greater power than did the Soviet Union, particularly when you consider the population of China which is approximately one-fifth of the world's population or better.

This Awareness indicates that by helping to supply China with the technology and arms, it can become a very formidable adversary and the problem of peace can be set aside so that cold war mentality can again rise and the military/industrial complex can again take control of the nation and begin creating the fears that lead to a need for national security based on military contracts and the construction of new armaments to replace old outdated armaments, so that things can go back to "business as usual" and the recession can become a thing of the past.

This Awareness indicates that this appears to be one purpose in letting China have these recent advantages of most favored nation status, so that China can become a better and more formidable adversary requiring the United States to again get back on a war footing with huge military budgets allotted.

This Awareness indicates it is a kind of comfort zone for those involved in the money chase to have this activity which they are well familiar with and know how to manipulate more effectively than a peace oriented society. This Awareness suggests you not be surprised if within 5 years or less, that the threat of China against the United States has become a substitute for the Russian communist threat of 5 years ago.

HOW ALIEN SITUATION WOULD FIT IN

FOLLOW-UP QUESTION:

How does the alien situation and Bush's planned 'New World Order' affect China, or would it?

COSMIC AWARENESS:

This Awareness indicates that it may be part of the action to serve as an excuse; this in reference to the Chinese/American conflict or threat may serve as an excuse for enhancing the global military budget of all nations so that preparation for a Star Wars-type military system can be excused under the guise of a China threat to the world.

"Friendly Enemies" All Part of the Game Plan

This Awareness indicates that you must understand of course, that the Chinese would be made aware of their adversary role in the game plan of the higher game, so that they did not take their role too seriously and get carried away, actually causing a war.

This Awareness indicates that throughout the cold war, Russia and the United States on their higher levels understood that it was all part of the game plan to take money from the masses in order to build up a greater global society and mobilize the world militarily and politically for a time in the future when these countries would unify against the alien threat and also to bring about a One World Order.

This Awareness indicates that there were seldom any times when the conflict became so real that the basic overriding agreements were threatened. This Awareness

suggests it would be the same in the China/U.S. scenario. It would be, in a metaphorical sense, somewhat like two friends in a small town hearing that the neighboring gangs in another local nearby town was planning to come into their city or town and beat up on certain entities and set up new gangs in their town. These two friends decide that they will have to mobilize all of their acquaintances in order to be able to cope with this threat from the next town, but their acquaintances do not believe there is any real threat from the next town and so they do not go along with the plan.

These two friends then have to devise a way to arm their friends and get them ready for the time when the neighboring town invades. Suppose the two friends then take adversary positions, siding against each other and taking friends from their own town and dividing them into two different groups, one behind one friend, the other behind the other, and the friends now pretend to be enemies and they must arm themselves against the threat of the other group in their own town.

Thus, the different followers, lined up behind each of their leaders, picks up arms just to be safe from the threat of the other gang on the other side of town. Now, assuming that this continues over a period of time, building up to the potential of the invasion; just before the invasion is to occur from the next town, these entities decide that: "It is time we reconciled our differences! It is costing our friends, our followers too much to keep their weapons polished and up-graded. We are having trouble with our personal budgets. We don't have enough money to continue this kind of conflict. Let us see if we can settle and become friends!"

Thus, the two friends who became enemies rearrange their relationship to again be friends, just in the nick of time so that when the neighboring threat does appear, all of the entities in town are now armed or able to re-arm quickly in order to deal with the invading forces from the next town.

This Awareness indicates it is this kind of scenario that is being considered, the difference being that the Russian or Soviet Union was unable to follow through in its long-term commitment to the conflict. It ran out of energy and was unable to continue the cold war as long as it was required and so a 'new kid on the block' of cold war game-playing, the Chinese, are being asked to set up their play and become the opposing super power while the Star Wars game plan is promoted as a necessity in a new world situation.

This Awareness indicates that this arrangement should lead into the time period when the extraterrestrial threat is either eliminated or made apparent and entities will have been made well armed in preparation for the threat perceived from China, and as Chinese, in the threat perceived from the West.

SEXUALLY REPRESSED N.W.O. ARMY IS 'MAD AS HELL'!

QUESTION:

There's an entity in California by the name of Dave Emery who puts out tapes about political conspiracies. He says nothing about the alien presence, but he's uncovered these various conspiracies himself through his own efforts, and he says that one of the government's plans for the New World Order is to build up an army of young men who they deliberately keep sexually repressed with the AIDS scare and so forth, and that these young men will be less educated, will be frustrated, ready to be "mad as hell" in whatever job they're sent to do. They will be easy to control and manipulate and to vent all these sexual

14 energies and frustrations out at the citizens who oppose them when the time comes to start rounding up patriots and to bring down our Constitutional rights and so forth. Does Awareness see this entity's theory on this as being valid?

COSMIC AWARENESS:

This Awareness indicates that this corroborates research done by other entities and is valid; that there are also others who speak of similar events that are planned and have been leaked or released from inside circles such as the entity K.C. DePass, who claims to have been on the inside of these plans for some time and is now giving seminars to warn the masses about these covert intentions.

SCENARIOS TO ELIMINATE BOTH BLACKS AND WHITES

QUESTION:

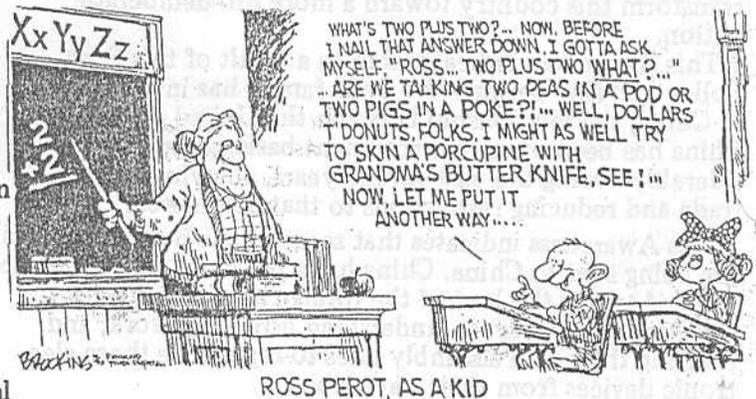

This entity Dave Emery worked with Mae Brussell, and one of the things she talked about was a plan to put all blacks in the United States into concentration camps and kill them; that its a rightwing fascist plot outlined in a fictional book a few years back, but yet he said that this information on this whole scenario was found three years before in a government wastebasket. When he investigated, the government denied any such thing. It was a work of fiction only. Is this information valid?

COSMIC AWARENESS:

This Awareness indicates that this is seen as a gathering of information based on documents and material that he has seen. It is not necessarily a plan. This Awareness indicates that there is also a counter-plan written by certain right-wingers that state the same kind of scenario except in reverse, where the whites would be eliminated by the year 2000, leaving only the other races: the Blacks, the Jews, the Brown, the Red and the Yellow races.

This Awareness indicates that it appears that each of these works, which motivates entities into racial considerations, are designed to pit one against the other out of paranoia and fear that the other is going to, or has designs on destroying them, and such can then serve the purpose of the race which might be most threatened by the story or fiction or scenario presented.

This Awareness does not see any great substance behind either of these works. This Awareness suggests however, that there are racial bigots who would gladly participate in wiping out other races which they perceive as threatening their own, if it came to a point where they could do so without fear of retaliation or punishment. Therefore, to that extent, there is concern, but to deal with these things objectively is the best defense in keeping them from getting started and getting out of hand, because of unwarranted paranoia and fear.

ROSS PEROT, AS A KID

INDIAN CHILDREN IN ALASKA ARE DYING FROM AIDS ¹⁵

(Global 2000 and Hepatitis Shots Again)

QUESTION:

In one of his lectures, this entity said that Leonard Peltier who's in prison, but he's head of the Indian nation groups, claimed that Native Americans in Alaska, the children, are being taken out of school without their parent's permission, given hepatitis shots, and these children are now coming down with AIDS, and these children are too young to be engaged in the sexual aspects of transmission. He says this is part of the Global 2000 scheme to get rid of all Native Americans. Is there any truth to this?

COSMIC AWARENESS:

This is in the affirmative. That this appears to be true. It is patterned after the same inoculation programs used in Cameroon and other West African countries where AIDS was originally introduced, through inoculation programs.

DO THE ALIENS READ THIS NEWSLETTER?

QUESTION:

A question from W.H. Actually two. He wants to know: "Do the aliens read this newsletter we put out?"

COSMIC AWARENESS:

This is negative.

HOW CAN MANKIND'S SECOND ENEMY BE ELIMINATED?

(The Character of Most Politicians is Described)

QUESTION:

His second question: "I can understand that a victory over the alien races that want to dominate this planet would be in the best interest of us all, however, I see it only as a victory of eliminating the worst of two enemies. I cannot see a new world dawning until we also rid ourselves of institutions such as the CIA and men like George Bush who, in my opinion, is on a par with men such as Noriega, Hussein, Khadafi, Shamir, Mobutu, etc. The question: Can Awareness give us some insight into how the second enemy of mankind will be eliminated; that of power and dominance?"

COSMIC AWARENESS:

This Awareness indicates it will come as entities grow in awareness; that as any nation develops, its leaders become a leader because the leader reflects the opinions and attitudes and views of the people, and as the people become more aware, they grow to become intolerant of those leaders that do not properly reflect their new levels of awareness.

This Awareness indicates that unfortunately, the majority of entities who involve themselves in politics are masters of duplicity. They are chameleons who change as a kind of catering or pandering to the voters. They may have some hidden agenda of their own which guides them, but they do not generally have strong principles that are common to the masses, therefore, they are one thing to this group, and something else to the next group, and always look to get the vote rather than to serve the good of the people.

The Difference Between a Diplomat and a Politician

If there is enough pressure on them to sell out the greater number of people in order to get the money to get the vote, they will do whatever they need to do to get in office and then will sell out the people to honor their agreement.

This Awareness indicates that this is the kind of character that most politicians develop in order to be good politicians. It is not to say that all politicians fit into this category. This Awareness indicates that it may be said that a diplomat is a person who knows how to say something in a way that is acceptable to the listener, even though the diplomat may be stating the thing in an opposite mode from what he or she means or wishes to say.

CONSPIRACY CATALOG NOW AVAILABLE!

ED's Note: An alert California member spotted a unique catalog of conspiracy books and tapes and sent us a copy. It is full of books, videos and tapes, many on the research into Nazis in America by Mae Brussell. This editor highly recommends all CAC members order this catalog, which is full of info confirming much of what Awareness has released over the years. Send one dollar, or a dollar's worth of postage stamps, to: Prevailing Winds Research, PO Box 23511, Santa Barbara, California 93121. Or telephone (805) 566-8016 to obtain a catalog and hear current message on conspiracies, or use 24 hour FAX (805) 569-2411, or for the PWR Bulletin Board System (805) 569-5005. This outfit also has very hard to find books such as Barbara Honegger's "October Surprise" which were ordered recalled from most book stores.

The diplomat tries to express an opinion or truth in the absolute least offensive way possible. A politician will try to state a truth or an opinion in a way that is least possible to pin down later. Thus, when Nelson Rockefeller was once asked: "How do you feel about birth control?", he simply stated: "I think family privacy should be respected," and the entities then have to make a link between birth control and the answer in order to try to understand the entity's response.

The fact is, he didn't answer the question. He spoke about a different matter entirely. This is the mark of good politics. This Awareness indicates that unfortunately, it is not the mark of good communication or of good character who can be relied upon for his word, because his word is a tool for manipulation rather than a conveying factor of information.

DID THE KAL 007 CRASH HAVE ANY SURVIVORS?

QUESTION:

In the January 20, 1992, *Spotlight*, there's a story that claims evidence that the KAL 007 had survivors. It says:

The establishment media reported the tragic shoot-down by the Soviet military of Korean Air Lines flight 007 on September 1, 1983, resulting in the loss of all passengers and crew. But a startling letter from a U.S. senator to Russian President Boris Yeltsin reveals the possibility of a different fate altogether.

The publicizing of shocking, little-known evidence surrounding the downing of Korean Air Lines flight 007 has led the ranking minority member of the Senate Foreign Relations Committee try to enlist Russian President Boris Yeltsin's aid in answering questions that still linger about the disaster.

Sen. Jesse Helms sent a four-page letter to Yeltsin December 10 requesting access to "files of the former KGB and of the Ministry of Defense."

According to the official TASS statements, the Korean Boeing 747 was mistaken for an American spying plane, attacked therefore by Soviet fighters, hit by two rockets and crashed into the sea killing all the 269 persons on board. According to Avraham Shifrin, director of the Research Center in Jerusalem, which accumulates data on Soviet gulags, psychiatric hospitals and forced labor camps, "Our investigation had led us to the following conclusions refuting the official Soviet statement as a lie.

"Having been partially damaged by two Soviet rockets launched by the Soviet pilot Col. Osipovich from his SU-15 fighter, the Korean Boeing 747 did not go out of control of its pilots."

Shifrin claims there are eyewitnesses that the plane had a soft landing near Sakhalin—an island occupied by the Soviet Union and which the Japanese and Soviets have both claimed at least since the end of World War II.

Shifrin says McDonald, a leader in the John Birch Society, was taken "through a number of prisons in Moscow." Passengers were divided among various camps. Children were separated from their parents and "safely hidden in the orphan houses of one of the Soviet Middle Asian Republics."

The questions of Jesse Helms asks Yeltsin to answer mirror the charges made by Shifrin verbatim.

The final version of the Establishment media's account of the fate of the plane says it went down at sea with no survivors. Immediate dispatches from the area, disseminated within minutes of the attack on Sept. 1, 1983, told a different story, however.

Associated Press, for example, reported KAL 007 "with 269 people landed safely early today on the Soviet island of Sakhalin." Even McDonald's brother was quoted saying, "We've heard from the State Department the plane is down, and the passengers are safe."

Korean Air Lines officials initially said the craft landed on Sakhalin Island.

And it goes on and on, but is there any truth to this story that there were survivors from that tragedy and that they were incarcerated and are alive in Russia?

[The Spotlight, 300 Independence Ave. SE. Washington D.C. 20003. (\$21 for a one year subscription. 52 issues)]

COSMIC AWARENESS:

This Awareness indicates that it appears there were some survivors. It appears the story was distorted in this article; that the plane did crash in the sea, but that there were several survivors. This Awareness indicates that it does not appear that it made a soft landing on an island. This Awareness indicates the energy is weak for this, and that It does not see anything further. This Awareness suggests the Interpreter be brought from trance.

(The Law of Gratitude is given)

CAN HEALING ENERGIES BE ENHANCED WITH CRYSTALS?

QUESTION:

L.K., Granger, Indiana, asks: "Would your Healing Wednesday project be enhanced if you energize small crystals in the energy chamber, or whatever it is, and sold them to the participating members? The charged crystals would link up our own thoughts to your basket of letters. Perhaps a photo of the basket might do the same thing."

COSMIC AWARENESS:

This Awareness indicates that this is that which could be beneficial, helping to enhance the energy involved in the system. The principle here is likened unto that which this Awareness has recently described regarding the processing nature of the universe information, in which there are systems and subsystems. That this Healing Wednesday program, essentially, is a system that is evolving, and can evolve into and include this aspect suggested in the question. It will simply enhance the effectiveness of the system.

That the carrying of a picture helps the energizing and helps the imaging, and the crystals being involved and shared by participants as that which also would help to convey information and network throughout the system through psychic energies that would be connected through the aka-cord webs.

For example, with all the crystals being placed together in the basket, then mailed out to individuals, this gives an aka-cord connection with all individuals involved. That this could be repeated on occasions, such as every year or every six months, so that the energies would recharge and strengthen, and you could include new participants; and they, too, would have a connection with all other entities in the project.

FOLLOW-UP QUESTION:

We ask them to visualize the illustration that we mailed to them of the basket with the letters requesting healing. Wouldn't this essentially do the same thing?

COSMIC AWARENESS:

This Awareness indicates that this would be of benefit, that with the picture being available for the visualization, this would be most helpful. That the activity of having a crystal that has been in the basket which is seen in the picture, particularly if the picture includes the crystals

16. together in the basket, this would enhance the process further, by allowing them the power of the touch as well as the power of sight; and this could then enhance even further the suggestivity of the healing involved, and the connectivity of the many minds working together in this healing process.

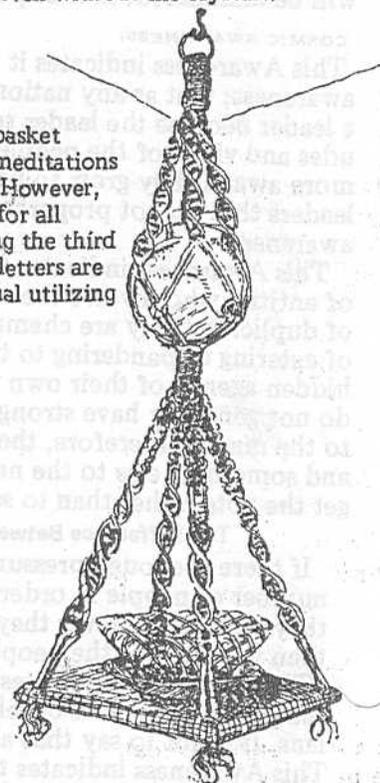

This Awareness indicates this, of course, would require an effort for the mailing of these crystals, and entities participating would have a slight participation and action, which may be thought of as a part of the ritual, which in turn would also enhance the effects of the healing. For as entities participate in their own healing, the healing process becomes more powerful.

This Awareness indicates that one key to individual healing is that the entity being healed should have some participation in the healing process.

This Awareness indicates that this is an aspect in which, as an entity takes charge of one's own healing, the effects become more pronounced than if the entity is simply relying on someone or something else to heal them.

ED's Note: So far CAC has not added crystals to the Healing Wednesday energies. However, each member does have the Healing Wednesday information, and we do request they meditate and energize the illustration, visualize Light from above streaming down upon it and all the letters requesting healings that reside within. In this manner the energies are coming from many others to help make the healings possible for those who have requested them. Those who do request healings are, of course, supposed to also energize the basketful of letters, for if they do not, it is likely that the Law of Gratitude will not return to the entity bearing gifts, since the entity did not send out anything other than a request for his own personal healing. The Healing Wednesday energies have been working for many years here at CAC and we know from many many letters received that it really works. At this time the main reason a crystal project is not being introduced relates to finding the space each week to attend to this new aspect. Until we do, please continue to send in your healing requests for health, finances, relationships etc. You will find it works fine, even without the crystals!

Note: The Healing Wednesday basket should be visualized in all your meditations at any time or day of the week. However, the main focus of the project is for all members to meditate on it during the third Wednesday of each month. The letters are all burned the next day, in a ritual utilizing the Kahuna ritual.

THE C.A.C. HEALING WEDNESDAY BASKET

Excerpt from a CAC General Reading, April 10, 1992

QUESTION:

Iris N., in Wisconsin, sent in an article taken from a tabloid. She wants to know if this has any substance, so I'll read part of it. It says:

The Cocaine kingpins use psychics to control President Bush. Colombian drug lords are turning America into a nation of addicts and our President can't do a thing about it, insiders say--because the cocaine kings are paying powerful psychics to control George Bush's mind! Psychologists working in a high level government project say they have uncovered proof of a sinister plot to hamper the efforts of U.S. drug-busting agencies by ensuring that the chief of state makes all wrong decisions when it comes to the drug trade. They say the psychics work on Bush's thoughts and emotions and treat him like a puppet on a string.

"In every other area, Bush is still our leader, but when it comes to breaking up the big drug cartels, he is totally helpless," said an expert in mind control.

"These psychics have only to suggest he do something and he follows their orders. We found out about this by accident when we realized that his decision-making was strangely flawed. Now we're working on a way to protect our President from evil forces who want to influence U.S. policy."

According to information provided by insiders, the Colombian drug kingpins contacted a number of psychics, all world-famous, two years ago, offering them work on a top-secret project of unspecified nature. Two psychics--a man from Poland and a woman from Cuba--agreed to work with the Columbians and three months later the President's drug policies became erratic.

The drug lords are paying their psychics millions to do the job for them, but it's worth it, the sources say. "They can do anything they want to with the U.S. drug market now because the President Bush is on their side."

That's basically the gist of the article. Is there any substance at all to that story?

COSMIC AWARENESS:

This Awareness indicates that it has no basis in fact. Even if these entities are hiring psychics, the entity was previously involved in assisting the drug lords and has continued to have a poor policy in ending their action. This Awareness indicates that *It* cannot say anything further, it could endanger the organization and the entities involved. That those who have studied the involvement of Bush in the Iran/Contra affair and the time in which the entity was involved in Zapata Oil and the entity's own son flying helicopters to pick up drugs for the distribution in the United States; all of these things are part of the public record, for those who want to investigate these areas, and this Awareness sees no need for *It* to further comment or make statements regarding this.

This Awareness indicates that the question of whether these psychics are behind the president's loose drug policy is utterly absurd.

(More on Eliminating the Patriots)

This Awareness indicates that it is extremely distressing to this Awareness to answer questions relating to the character of public officials. *It* does not like to point fingers, but at the same time, *It* sees these entities also as creating so much tragedy and suffering in the world for others to endure that at times *It* must weigh the ethics of being gentle with the ethics of being too gentle and not expressing reality strong enough.

This Awareness indicates that if *It* could simply blurt out truths as *It* sees these to be, there is so much that would be told in regard to corruption, in regard to hypocrisy. This Awareness suggests that entities would benefit greatly from reading the book, *The Two Faces of George Bush*; it is a very small book, but it traces his life and allows entities to see where the entity is coming from and to have some better understanding of where this entity is likely to lead others. It is but one small book. There are others that go into greater detail.

The works of Bo Gritz, in his book *Called to Serve* also touches into much of this information that is in the public domain, but seldom ever seen on the news, or spoken of on the streets or in the open, but this entity documents very well all that he has to offer, in terms of the connections of George Bush, the CIA connection and their connections with the drug lords.

Shades of Hitler: That Secret Furnace in Eastern Oregon

This Awareness indicates that it is much like signing a potential death warrant for this Awareness to speak of these things through this Interpreter, through this organization, because *It* sees in the future plans by the Bush organization to destroy all patriots. There are already, in Eastern Oregon, for example, there is a furnace for burning the corpses of those who would be picked up and arrested in a sudden raid. Those who would be picked up and arrested would be chosen from a list of patriots whose names have been collected over periods of time.

This Awareness indicates that messages such as this are almost certain to add the names to the list, if they are not already present. This Awareness would not be giving this statement except that the indications are these names have already been placed on that list of those to be taken. This Awareness indicates that when the time comes for this dictatorship to be implemented and patriots to be taken, they will not be taken as patriots. They will be classed as drug dealers and will be taken in the middle of the night from your neighbor's home or from down the street and put into buses, and driven away, and inquiries about the entities will simply result in your being told they were arrested because they were involved in drugs.

This Awareness indicates that this crime bill which they are so desperately trying to promote is designed to serve as a cover for picking up political adversaries and patriots across the nation. When this will occur is not set as a definite time. It is very likely to occur in the next year. This Awareness indicates that as subscribers to the publications, you are not likely to be targeted. There is only one mailing list on a computer and it can be easily erased, nor does your reading of material suggest that you are a believer of the information.

It is only those who are active in promoting information and active in doing things that will be selected This Awareness indicates that enough has been said in this regard.

ED's Note: for more information on this plan to execute the patriots under the guise of drug dealing, please refer to 'Revelations of Awareness' No. 91-18 (The Moonlight Scenario); \$3.00 from CAC.

Info on Sutton's book, "The Two Faces of George Bush," can be found earlier on page 7 of this newsletter.

The book, "Called to Serve," by James "Bo" Gritz, a definitive account of a nation betrayed, is a massive and well documented book (over 600 pages) is available from Center for Action, Box 472 HCR-31 Sandy Valley, Nevada 89019 for \$24.95 plus \$4.00 shipping. Other books, tapes and videos on the subject are also available from this publisher. Ask for catalog.

HUMANITY IS FINALLY AWAKENING (After the Election Things Will be More in Focus)

Excerpt from a CAC General Reading, October 9, 1992

CLOSING MESSAGE:

This Awareness indicates that the economic times in the near future may call for entities to be very assertive and imaginative. It appears that some of the information given in the "Hot August Night" scenario can still be activated; that there may still be a problem after the election in which the economy is sabotaged, the stock market may crash, or whereby the economy tends to collapse more quickly in a slow turn-down. Much of this will depend on who emerges victorious in the coming months in the election, and how much influence is shifted from one group of power brokers to another. At present time this is all in a kind of stalemate, wherein forces are poised in opposition to each other, awaiting certain moves.

That there are those within the CIA who are opposed to others within the CIA and that within the intelligence communities in general there is a kind of secret war and struggle between opposing factions in this country, and much of what happens in the future will depend on the outcomes of this internal struggle in these intelligence agencies.

This Awareness indicates that one thing however appears clear: the people have been awakening for the past several years. There has been a continued and steady awakening of the masses to realities and the recognition that they have been betrayed by the government forces that they have trusted and it appears this will be the real power of the future that determines the course of future history and direction of the nation.

Even if those Dark Forces somehow gain control, it will be short-lived, for more and more, the masses are awakening. This Awareness indicates that it appears within a month the picture will change sufficiently to indicate the new direction of this nation; whether there will be an attempt toward a totalitarian leadership, or whether democracy as has been known will continue.

It does not mean the struggle will have ended, but it will be more clearly defined, and it appears that democracy as has been known will prevail without the interruption of totalitarian controls being very influential or strong in that democratic future.

The comet is coming, the comet is coming!

N.Y. Times News Service

With deliberate understatement, the International Astronomical Union, the world astronomy authority, has for the first time issued a warning of a potential collision between Earth and a comet big enough to disrupt the climate and end civilization.

The date of the potential collision with Comet Swift-Tuttle is more than a century away: Aug. 14, 2126. And the odds of catastrophe, astronomers say, are vanishingly small: on the order of 1 in 10,000.

Dr. Brian G. Marsden noted that if the year 2126 began to look ominous, the human race could save itself by sending out an armada of nuclear-tipped rockets to try to knock the comet off course.

"If we have to take evasive action, the place to do it is out beyond Saturn," Marsden said.

Seattle Post Intelligencer, October 27, 1992

HOW TO RELAX SO MEDITATION IS POSSIBLE

QUESTION:

A question from D.R., Dalton, Illinois. She says: "Many people want to meditate, but due to extreme abuse in childhood, are afraid to relax in their bodies. How do people experiencing extreme self-hate and extreme fear overcome these problems in order to be able to relax enough to meditate?"

COSMIC AWARENESS:

This Awareness suggests that you quietly situate yourself, close your eyes, turn your attention inward, and when you begin to feel anxiety, calmly turn your attention to that anxiety and observe it without judgment. Observe any flashes of memory, any images that appear without judgment, as though you are looking at it and not judging it, observing, strictly observing, without forming opinions, and let this be the meditation until this anxiety passes.

THE LAW OF JUSTICE

The Law of Justice as likened unto scales in balance in which that which is heavy on one side must be balanced by that which is equally heavy on the other side. Thus when one violates another, the heavier the violation the heavier must be the balancing weight. This is related to the Law of Karma. All things in time come into balance.

Wherein entities put on a heavy karma, they may help remove that karma by lightening the load of another who has been violated by that karma, if possible, or by lightening the load of someone who has an equally heavy load. It is simply a matter of weights and measures and this is Cosmic Law of balance, justice, and karmic accounts.
