Helping People Become Aware

THE GREAT ENERGY MANDALA OF THE C.A.C. MEMBERSHIP
AND WHAT IT HAS ACCOMPLISHED

C.A.C. General Reading, October 10, 1992

OPENING MESSAGE:

This Awareness indicates that energies of the membership, those who read these messages, as that which is likened unto a great mosaic, in which there are many different shapes, sizes and colors, and that this mosaic has no two parts which are exactly the same. This Awareness indicates that all those different parts together, all the entities taken together, create a great mandala of energy that has a very unique and specific kind of power and energy.

It does not appear to recognize how much power or how much energy it contains as a total composite, as a mandala, for it appears that each part sees itself individually, without much real recognition of the others. This Awareness wishes entities to realize that during this past summer, this mandala of energy helped to preserve democracy, helped to prevent what could have been the end of democracy in this nation.

This Awareness indicates in your meditations, if you can visualize this mandala of energy, you will feel a great warmth and deep respect for yourself and all others who have helped to present this mandala as a magical face for humanity to reflect upon, for it indeed did bring about magic in preventing something which was almost certain to have happened, had it not been for the right energy at the precise moment, sufficient enough through these entities making up this mandala to serve as leverage to turn the energies of the world.

This Awareness suggests you not forget the power that comes through group action, through unified action, through the multiplicity of many entities serving a purpose. This Awareness indicates that in the coming days you may see this energy at work in other areas of life, in the political arena and in your society, wherein entities working together create forces that do things which no individual working separately could ever accomplish.

This Awareness suggests entities seeing this, watching for this, understanding this, shall begin to have a new realization of empowerment, and shall not so easily feel weak or insignificant. This Awareness indicates that one person who can put forth the right leverage and energy at the right moment, even if it is only a call to arms, a call to unity, that one person can bring energies of many together and those many energies, working together, can have a profound effect on the face of humanity.

This Awareness suggests that you may remember this and recognize that each is capable of contributions to the whole of humanity, particularly when that contribution is used at the right time to effect the kind of leverage which effects the movement of energy.

This Awareness indicates that once great masses of energy are set in motion, it may take enormous power to change that motion, but if you recognize the potential for that energy to be put in motion, and you see it as going in the wrong direction, in a direction that would be detrimental to others, and if you see this soon enough, early enough, before the energies are overwhelmingly in movement: a word, a picture, an image, a few energies expressed through a group or an individual can keep that great energy from ever being put in motion, or if it is better that the energy be put in motion; the right word, the right energy, the right expression can start the movement of the energies and it may become nearly impossible to stop those energies.

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Paul Shockley, Interpreter

This Awareness indicates this is what this Awareness means by leverage; the right word at the right time can begin the movement or prevent the movement of enormous energies, and when it is used at the right time, it works much like leverage in a mechanical activity, whereby great energies can be moved or prevented from movement.

Examples of How the Law of Leverage Works

This Awareness suggests that as entities understand this, they may also begin to realize their own power in effecting social change or preserving social values through the use of the right word at the right time, the right activity and deed at the right moment. It requires, of course, that entities foresee what could occur and how they may prevent it, prior to its occurrence, or how they may implement it, to make it occur, if that is the proper use of energy.

This Awareness indicates that *It* wishes more entities understood this principle and used the Law and power of leverage in effecting a better world, a better society, a better sense of values. This Awareness indicates it can be used in helping a young child to develop certain understanding or certain values early in life, to prevent that child from taking a wrong turn, and becoming a being of negative nature, or it can be used to guide the child in a proper direction so the child becomes a great force for good.

That also is another example of the use of leverage, particularly when you know that an early movement or a movement of energy at a time when things can be expressed and moved will have a powerful effect on that same energy when it becomes greater and develops more intense momentum. If you can move it at the right time you can effect great changes for good in future times.

This Awareness suggests that entities meditate occasionally on the *Law of Leverage* and find ways it can be applied to their own lives in order to effect better experiences and to prevent difficulties that might otherwise occur in the future.

This Awareness indicates another example might be to recognize you have perhaps offended someone and in that offense, you realize the entity is quite disturbed and that the entity could have reason for seeking vengeance in one way or another, and you realize that it was mostly from a misunderstanding, or perhaps you were not in a good mood and said something which was offensive to the person.

The *Law of Leverage* can allow you to re-contact that person and straighten out the relationship before it crystallizes over long periods of time, in a negative way that later would cause you much grief, or cause the relationship to become crystallized and hard and bitter so that you would have greater difficulty at a later time, after the crystallization had occurred.

This Awareness indicates that sometimes, entities can become embittered over a word or two and not reconcile, and years will pass, and the bitterness increases until the entities never speak again to each other and may even affect other relationships, among those who want to be mutual friends, whereby one entity says, "I cannot be your friend, if you are a friend to that person." This Awareness indicates that with the proper use of the *Law of Leverage*, these extremes may be reconciled before the extremes are set, before they crystallize.

This Awareness indicates that it would be helpful for entities to think of other situations or types of experience that occur because of the action of movement through the *Law of Inertia* wherein something is set in motion or something is set static and unmoving, but whereby, with the *Law of Leverage*, one could move or alter or change that block of energy before it becomes too powerful.

If you understood this *Law of Leverage* and begin to use it in your life, you will find many many different ways where it can be applied, to make your life, to make your society much more worthwhile, enjoyable and pleasant, not only for yourself, but also for others.

A kind word here, a word explaining confusion between two people so that they may reconcile, a movement of energy to help someone at a point in their life where that little help becomes very significant to them, a few dollars given here or there at the right time; all of these things can be used when properly applied as leverage, to create a better future.

This Awareness suggests you learn this by watching and determining how to apply leverage to situations of all kinds so that the situations bring about better situations because of the energy you applied in the right place at the right time.

This Awareness indicates of course, you must apply the energy in the right way, also, to get the most leverage in your application.

QUESTION:

We received a letter from Lois P., over in Leavenworth Washington, whose past letters have been rather perceptive and interesting. I'd like to read this one to Awareness and ask It to comment.

"About Hot August Night--I think it did happen--different from what we expected, and in miniature. I get three Spokane TV stations and watched them all for flaws--the stand-off between an alleged but not proved 'White supremacist.' The Feds moved an army in to subdue a small family, in a 20' x 30' mountain cabin in north Idaho. They caught the family unaware--shot the dog who discovered and flushed out agents, then shot a twelve year old boy,--then tried to kill, with sniper fire, the rest of the family to cover up the first murder. In the fray, a Fed was killed (some think by the Feds themselves in order to pin it on Mr. Weaver). The excuse used by the Feds was that Randy Weaver tried to sell two sawed-off shot guns to an agent. Weaver says it was a set-up and it didn't happen. One thing which was lightly touched upon was that Mrs. Weaver practiced some sort of religious ritual in her special place. (Was she a channel of some kind?) She knew ahead of time, by several years, and documented it in the county Court House, that they would be attacked by Feds and wiped out. The Feds were forced to regroup and explain why it took an army like Desert Storm with tanks, helicopters and high-powered guns to subdue a family on a mountain top--in a 20x 30 foot cabin. No illegal guns were found. The skinheads shown on TV were imports from Portland who waved their arms like Nazis and managed to have their illegal guns confiscated. These are the guns shown, not the ones owned by the Weavers.

I think the Feds didn't start their operation in black or hispanic communities because the people were alerted. I also think that white supremacists are in disfavor, same as the Gay community, and public opinion is against them (so this family was set up to look like white supremacists). We are now in the position to protect this families' rights whoever they are or what they believe because several Amendments to the Constitution have been violated in this case. The whole set-up was constructed to be used as scare tactics and set an example to the rest of us.

There were a few facts brought out before and after the eleven day stand-off. (1) The cabin was clean and well organized. They had a neat, well-tended garden, healthy animals, healthy clean kids. The baby, born there, walks at seven months. They were well read and religious, were good neighbors, helped others and knew how to live in an isolated area. Now the Feds are making it look like Randy Weaver was a mad killer, he's seen only in yellow coveralls and in chains. He only surrendered after he was allowed to make statements before the Feds could get hold of him and drug him. The Feds moved tanks in and set up a Desert Storm operation and snipers with high-powered rifles picked off Mrs. Weaver and a family friend. The family kept her body in the cabin for eleven days, and it was no doubt who killed her.

I'm seeing this as a form of transmutation as the Feds lose face by the day. Weaver has a good lawyer and he may just turn out to be the hero in this nasty situation. The Feds right about now don't need a real live martyr--especially since they've branded him a white supremacist.

Awareness did say that by flooding the world with "Hot August Night" letters, it might cause certain forces to change course. And it seems to me this operation fizzled (like swine flu). The Feds just can't stand the light. If this one incident is brought to light, it may cause the domino effect! Let's hope so! So I'm backing this family, in spite of the alleged white supremacist label. They are covered by the Constitution like all the rest of us and are guilty of attempting to defend their

rights to religion, the keeping of arms, and privacy.

The account of this which was shown on national TV was altered so much that our Q6 TV station is protesting. Also the Woody Allen affair and Hurricane Andrew pushed it off the front page.

Another thing that I see as an experiment and is not going to work--the herding of thousands of people in Florida into tent cities--looks just like a concentration camp, complete with army, guns and guards. The reason this will fizzle is that the soldiers themselves are transformed into care givers as opposed to life takers, and they are becoming truly humanitarian.

Thanks for reading this--you might ask Awareness if I'm seeing this clearly. Love you all. Lois."

COSMIC AWARENESS:

This Awareness indicates that the entity has seen the situation from a very unique and clear position, which carries much accuracy. This Awareness indicates there is so much in regard to all of this that is still hidden and confused in terms of what really transpired, that it is next to impossible to get a clear understanding.

This Awareness indicates that an operation mounted by Federal agents can occur because of information gathered, even if that information is not totally accurate, and once the operation is mounted and put into effect, there is no way to reassess whether they should be attacking the family or whether the information that triggered the action was correct.

The only thing the operation is to do is to take these entities prisoners or kill them if necessary, and therefore, it becomes likened unto a war, and those Federal forces who have been trained in the killing process can very easily slip into that mode and not stop to ask whether they are correct or incorrect, but they simply do what they have been trained to do.

This Awareness indicates that it is much the same with police in a car chase. They may be chasing someone because the entity did not fully stop at a stop sign, or slowed down, but didn't quite stop, or because the entity's licence plate has expired, but if that entity begins to try to escape from the police, they may chase the entity with a fury and a willingness to kill the entity if necessary, and in fact, they get into the excitement and the thrill of the chase so much that they may even kill passerbys or bystanders, in order to catch the person who is trying to elude them.

This is not at all uncommon. It is even so common that there is now being considered a bill that would prevent police from chasing entities without certain guidelines being met, whereby certain factors have to be considered before a chase is allowed by the police.

This Awareness indicates the problem is that these guidelines and factors have not been implemented in police or military actions or SWAT team actions, to give any kind of sensitivity to the approach in apprehending the one who may be considered a threat to society. It is likened unto the Karate student who is not taught to use only enough force as is necessary to protect himself, but instead is taught all of the ways by which he can eliminate his opponent.

It appears that this is the approach that most police and military forces and SWAT team forces are taught; that they are taught how to main and kill, but are not taught to use only the force necessary to apprehend or to protect themselves. This Awareness indicates that because of this there is a kind of brutality in the militia that often goes to excess, whereby the crime may be of a very minor nature, but the punishment may be extreme, much as recorded in the story of *Les Miserables*.

This Awareness indicates the entity being caught for stealing a loaf of bread, hounded and tracked for years, to be imprisoned, whereby the crime and the punishment are not equated by any means. This Awareness indicates that it does appear that in regard to the family mentioned in the question, that a simple action of a more civilized

4. approach in dealing with this family could have been more effective. The action could have included a kind of quarantine, if necessary, which would have been much less extreme than invading with helicopters and guns and attempting to wipe out the family. This Awareness indicates some of the killing is totally inexcusable. The shooting of the mother while she was feeding her baby; the shooting of the young boy; there is no justification for this kind of police action.

It would, if occurring in a foreign country, bring down the wrath of all Americans who heard about it. There is a phenomenon, whereby Americans hearing of such things in their own country, generally think that it must have been warranted, because it could not have happened in America unless these entities deserved it.

This Awareness indicates there are too many entities who believe the justice system in the United States is actually fair and just, and they will continue believing that until they themselves come up against the justice system, even if they are innocent. This Awareness suggests that the justice system is more expedient than just.

A MEDIA BLACKOUT ON THE WEAVER INCIDENT

FOLLOW-UP QUESTION:

Well, there seems to be a media black-out, except for the papers out here in the West. Neither *Time* magazine or *Newsweek* even mentioned it. The *Spotlight* had a reporter on the scene and they claim all he was wanted for was a 'Failure to Appear' warrant, a misdemeanor, which could have been served by any common process server, and that it *did* look like they set him up.

The gun that he sold had been sawed-off only 1/4 inch shorter than the law said it could be, and the newspapers out here, one of them I read, stated that when this army entered the cabin, they deliberately wrote it up like those people, the Weavers, were white supremacists, and one line said they even "had a poster that said 'New World Order,' and there was a big cross slashed across it, meaning 'No New World Order,' like this was some kind of heinous crime in itself.

It seems to me that the government, which sent these people in without badges or without uniforms, and the first thing they did was shoot the family dog, was a deliberate provocation and they used this man as an example to a lot of the other so-called "patriots" who might have similar ideas as Weaver did. He believed in being self-sustaining, and he didn't pay income taxes and so on, because he didn't have income. Doesn't Awareness agree that the basic reason for this tragedy is much broader than the newspapers or the media has put out?

This is in the affirmative. This Awareness indicates that it appears that there were distortions of facts, disinformation and a lack of clarity as to who the entity was or what the entity was all about. It appears that as with many entities who are not in close communication with the mainstream, the entities became labeled and branded as misfits in the community because they were somewhat different and entities are often afraid of others who hold different views or opinions or who live a different lifestyle, and they attribute or project their fears and hostilities on those entities, attributing to them all kinds of accusations.

Had it been five years ago, during the cold war, these entities would have also been considered and called communists or some similar name, and many entities would have branded them as communists and anti-American. This Awareness indicates that it would have been a sincere belief that they were communistic and anti-American, not something that was falsely attributed to them, but was believed to be so.

This Awareness indicates that were it possible for these entities who became so hostile to the family to have gone in and spent an evening with them, relating to them, talking with them, they might not have agreed with the family on all their views, but they would have likely come to respect them, to understand them and to realize they are basically harmless and just have some unusual ideas.

This Awareness indicates that it is generally true however, that when someone is different, society attacks them. Children in schools may often be attacked simply because they combed their hair differently or because they have a birthmark or have some other feature that is not common to the other children. This Awareness indicates that the Interpreter's grandson, being allergic to milk, could not drink milk and became the victim of children's hostility because he would not drink his milk at school.

This kind of activity is common with school children who do not like others to be different, who pick on the differences. It is much like the old story of the speckled hen: if the hen is different from the other hens, it tends to be at the low end of the pecking order.

This Awareness indicates that it simply reflects on the low mentality, lack of tolerance, lack of understanding that humans develop, and how this can develop even in the first and second grades in school and then grow throughout schooling to become a prejudice which leads from high school into the business world, whereby entities become hostile just because someone paints their car different, or wears their hair differently.

This Awareness indicates that the action of being different in idea, in physical form, in dress, in behavior often brings down the wrath of others. There is no justification for this. It is a fact of life. Entities who do not wish to challenge society learn to conform. Entities who wish to assert their individuality often become non-conformists.

The non-conformist is the entity who suffers the wrath of society. The conformist is one who always compromises and goes along, to get along. This Awareness suggests that entities learn there is a kind of balance so that you do not need to compromise totally and become a total conformist, nor do you need to stand out like a sore thumb constantly confronting and showing yourself as a non-conformist.

It is a kind of individuality that is not too extreme, but which remains flexible enough to allow you to fit fairly well in any area of society, without fitting too well and without annoying others too much. This Awareness indicates that this is an area that creates a certain amount of individuality and a certain amount of social culture, and if entities can fit into that, they will find their lives much more satisfying and less abrasive to their existence with society.

This Awareness indicates if you spend your life in a confrontive mode, being abrasive to society and its values, you may spend all of your energy just trying to survive, to deal with those hostile forces of society. If you want to do this,

of course, that is your choice. It is not that it is bad, it is just not very intelligent, if you want to have a reasonable expression in your life without wasting all of your life energy trying to fight off a hostile society.

This Awareness indicates that likewise, to compromise continually, to go along, to fit in, can also waste a great deal of your time and energy and give you a sense of non-description, a person who has no individuality, who just fits in as one of the many faces of society: nameless, pointless, without any individual purpose or meaning.

Such entities will join the crowd to attack the outcast, the non-conformist, and they will think that it is proper because everyone feels that way. They seldom take a stand on their own for they don't want to offend anyone. Either of these extremes can be very useless. One wastes time and energy of one's life, the other keeps it from ever being worthwhile.

Somewhere in between, one can develop a unique individuality that still has enough respect for society to be unabrasive or not too abrasive, whereby society looks upon the entity as interesting because of the differences, because of the non-conformity, because it is not too extreme and too anti-social.

It is anti-social enough to be of interest to society, and therefore, the entity can get the best of both worlds, of being individualistic while at the same time having contacts with society, having friends in society and having a certain degree of harmony in the society in which the entity lives.

FOLLOW-UP QUESTION:

That whole episode sounded very closely to that scenario this Seattle man, K.C. dePass, is going around lecturing on: "Operation Midnight Van," or something to that effect, on the plans that certain powers have to take out the patriots, only this one attracted the attention of the local residents and they brought the media in.

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates that you may also be reminded of the family in Philadelphia some years back, the Black Rosicrucians, the family that would not conform to the neighborhood requests or rules relating to their yard and housekeeping rules, whereby the family had their own unusual religion and conformed to the religion, which included strange dress and clothing and hair, and when city officials were called in to check out the family and were not welcomed in or were not treated properly by the family, it led to a police confrontation, which in turn led to the entire building, including a neighboring building being destroyed by bombs from the air.

This Awareness indicates that these kind of situations are very disturbing in that they are so unnecessary. It is likened unto using a tank to kill a mosquito, or a cannon to attack a mouse. The extreme action is in order to show who's really boss and that you cannot challenge the power of city hall or the government without extreme prejudice.

FOLLOW-UP QUESTION:

Bo Gritz was very instrumental in getting this entity to surrender, along with the promise to get a good lawyer, a man named Spence, who's rather famous and who's never lost a case. He recently defended Imelda Marcos, who was charged by the United States for various crimes, and he got her off stark free. The media now, what little you hear about Weaver, perhaps a one inch story on page 4, that the government instead of dropping charges, which it was thinking about earlier, is now adding additional charges such as conspiracy. My question is: If Mr. Spence actually can defend this man in court, it will be opening up a can of worms to the public, the likes of which will probably astound them, but there seems to be such a media cloak put on this incident by the government that few people will probably hear of this. Does Awareness see this as being so, or will it attract enough attention that the media will cover this fully?

COSMIC AWARENESS:

This Awareness indicates that it appears that it will be generally ignored by the mass media. There will be a few publications that cover it. It appears the *Spotlight* newspaper will cover this. It appears that there may be some coverage by certain magazines or television tabloid media, and special interest type publications, but it appears the main networks and main news media will avoid it.

There may be some brief mention of it in the news media on rare occasions, depending on what the outcome may be. This Awareness indicates that there is a considerable amount of information that the news media becomes aware of and knows about, but which they do not report. Part of it is because the editors of these publications do not want their publications to become targeted for harassment from government agencies or government individuals.

The IRS, the CIA, the FBI or other government agencies can be used to effectively cause certain trouble to these editors and their publications if they become too much of a nuisance and many of these entities are intimidated, even by the potential threat of such harassment.

ED's Note: To my knowledge, the *Spotlight* is the only publication following this story. (The *Spotlight*, 300 Independence Ave. SE, Washington DC 20003. \$21 for a full year's sub.) It is also being carried on Tom Valentine's radio program on the Sun Radio Network. (2870 Scherer Dr. St. Petersburg, Fla. 33716) Write them for a list of stations in your area. Weaver is still in jail without bail, although his flamboyant cowboy attorney, Gary Spence, is trying to get him out. The trial keeps getting postponed and is now scheduled for Feb. 1993. In addition to the baby who was nursing at his mother's breast as she stood on the porch of her home and a federal sniper "blew half of her face away" in an alleged retaliation for the death of a deputy by a teenage friend

6. of the family, several other children remain, for which a trust fund has been set up. Those wishing to send donations should write: Weaver Children's Trust, care of Lorenz Caduff, Rte. 4, Box 628, Bonners Ferry, Idaho 83805.

Presidential candidate Bo Gritz, reports to reporters and supporters of Randy Weaver at the Ruby Creek roadblock

WHAT IS THE TRUTH ABOUT "SHAMBALLA" THE ALLEGED "SPIRITUAL CENTER" OF THE WORLD

(Why is the Area Being Hyped as the Center of Enlightenment? What About the Adolf Hitler Connection?)

QUESTION:

A question from J.J. in New England. "Concerning Shamballa, I'd like to learn how the Buddhists of the Tibet area came to regard this region erroneously as the home of the enlightened or some such. Also, I'd like to know more about the Tibetan lamas and monks who were in Germany and were associated with Hitler. Tibetan Buddhism has always been represented as the whitest of magic."

COSMIC AWARENESS:

This Awareness indicates that Shamballa is not in Tibet, it is more toward China and lower, below the mountains.

It is down toward the more flatlands of China; the opening into the Shamballa area which has been referred to as the place that Hitler and his associates visited.

This Awareness indicates that information on this can be found in the book, *Spear of Destiny*, and also in writings related to or about Rudolf Hess, and to a lesser degree there appears to be some information in Rudolf Steiner's work and some information relating to Rudolf Hess and some information relating to the Golden Dawn organization set up in England. This Awareness indicates that the *Spear of Destiny* will give considerable information related to this, and should also contain references to other literary sources that relate. It appears that an entity of German connection, one with Hitler, was also a member of the Golden Dawn and that this entity helped put Hitler into connection or into relationship with those in Shamballa, whereby those entities in Shamballa began to give information and allowed certain contacts with underground civilization, whereby Hitler met with aliens and alien technology. This prior to the beginning of World War II.

"Thul" as a name or group that bears connection with this research and the effort to track down more information on this.

It appears that Rudolf Hess played a key role in this, along with others. This Awareness has given information on this previously, relating to the Vril stick. It has been several years since this information was given.

SHAMBALLA NEWS UPSETS SOME PEOPLE (The Dark Side of Shamballa is Revealed)

QUESTION:

N.Z. has a similar question, plus it goes into other areas. I'll read this. She says: "I am very upset about the info on page 5 of issue 92-12 regarding Shamballa priests and their connection with Deros. I have Shaver's publications on them, aliens and Nazis. My occult teachings from several mystery schools I belong to has always indicated that Shamballa was the spiritual center of planet Earth and the source of the most spiritual energies and teachings extent today. *Cosmic Awareness's* recent comments are the first negative ones I have ever heard against Shamballa and it upset me very much. I would never doubt the truth of what Awareness says, except *Its* predictions, as I have been an ardent follower of CAC for many years, as you know. I guess I am asking for a more detailed clarification of what was said on page 5 recently. I believe I was a Tibetan monk in another life, and I have always been deeply fascinated and much impressed by the teachings of the Great White Brotherhood."

This Awareness indicates there are great truths that have come out of the Shamballa sources and teachings, because these entities are highly evolved in terms of metaphysical and alien technologies. They understand very much of that which is hidden from the masses and they can release information that is of great value to the masses and they do so occasionally through individuals who manage in some way to locate and find them and learn from them.

More on the Dero Connection

But there is also the dark side of their culture which has a kind of motive not of the highest. This Awareness indicates that the motive has much to do with a desire for power, and world domination. This Awareness indicates that many of these so-called "Masters" who enter into this underground city known as Shamballa, have contact and communication with the Deros who are essentially demented beings that are remnants of an ancient race of aliens to this planet.

This Awareness indicates they appear to be descendants of Zeta Reticuli or Orion Greys. It appears to be more the Orion Greys of an ancient time whereby these entities came to this planet, built underground cities and caverns and became demented partly because there was no light, partly due to radiation, partly due to the nature of the conditions. These entities are quite hostile to the Zeta Reticuli of modern times; both races being hostile toward each other.

It appears that the contacts with certain monks in Tibet have allowed some of these entities to gain common access into Shamballa, to learn many of the teachings that relate to their power, their knowledge, and to the alien technology. This Awareness suggests that it appears the Orion influence on Earth is centered in Shamballa and this is a source for much of the technology that Hitler depended on in terms of his psychological controls for manipulating the masses, and also, to a lesser degree, some of his scientific developments prior to the end of World War II.

The aliens did not give Hitler all of the technology they had to give. They gave only a small amount and Hitler's scientists, working with that information, developed more of the technology that became so highly prized at the end of World War II, which in fact led to the space age.

This Awareness indicates that the mythical belief that Shamballa is a shimmering light of spiritual abundance is a kind of illusion that was perpetrated by many of the mystics and so-called masters who studied there and brought back their spiritual messages for the world. There was much that they did not know of the darker side of the alien presence and influence in Shamballa and there was much that they used in terms of the Light and spiritual qualities of Shamballa, so that the information they gathered could be very impressive if they presented it as Light spiritual energy.

Most of these priests would not dare to try to offer any dark negative messages from Shamballa and still call themselves spiritual teachers for they would simply be recognized as less than the highest in their teachings, so when one enters in to a library or city in which there is great new technology, and returns to the world to impress, they don't talk about the negatives of that society.

If entities were to come to the United States from some island in the Pacific and learn all of the great gifts and spiritual information and higher technologies, and return to the island, they would not wish to speak of the drug addicts, the murders, the crimes on the street, the prostitutes and the greed of the masses and all of those negativities. Rather, they would talk about the beauty, the wonder, the great technology, the Light, the spiritual energies of this country, and thus, the natives of the island would have the impression that the United States was a highly spiritual, almost heavenly place to live.

This Awareness indicates it is much the same with Shamballa. It is a source of high technology in terms of alien technology. It is a source of ancient wisdom and teachings that can be of great value. It is also a source of demonic activity in some areas, and these entities attempted to use Hitler to bring about the One World Government or New World Order so that they might take control of the Earth and join the Earth into the Federation or Orion Empire.

It was unsuccessful because of World War II's outcome, and there is now the effort and attempt by other forces to bring about the New World Order; that the Orion Forces might yet bring the Earth into an alliance with the Orion Empire. This Awareness indicates there is not much more that can be said in regard to the entity's question. It is simply not the heavenly place that entities have been led to believe.

Although it does have much that can be of great value, it also has a dark side where entities live who are with motives not of the highest.

**MOST "MASTERS" FROM SHAMBALLA
ARE FALSE**

("Scamballa" From Groups Promoting It?)

FOLLOW-UP QUESTION:

These so-called "Masters" that have been there and have come back and set up mystery schools around the country and indeed, the world; I believe there's some in South America; are these entities, once they've set up their mystery school, are they still influenced by the Dark Forces down there in Shamballa? Do they still have connections with them?

This Awareness indicates that this is often the case, not always. There are many who do not, and many who do attempt to keep contact with certain beings in Shamballa. It must be recognized that there are no phone lines and mail service going to Shamballa, so any contacts that may occur require the entity to either contact psychically or through physical travel, which is very rare, if ever repeated.

This Awareness indicates there are not a great number of so-called "Masters" who have actually gone to Shamballa and studied there with those beings. Most of these so-called "Masters" have studied from other so-called "Masters" who have been there or who have studied from someone who has been there, if there is any connection to Shamballa at all.

Many of the teachers have never really been to Shamballa, even though they may claim so. This Awareness indicates that many of these teachers who claim to have been to Shamballa are speaking in terms of astral travel or travel through meditation. The temples in higher regions of Tibet are more spiritually oriented and the entities who have studied there become spiritual masters through the disciplines and teachings of their system and their teachers, and these entities have much to offer and are often the true Masters and have never set foot in Shamballa.

SHAMBALLA NEWS UPSETS SOME PEOPLE

CLOSING MESSAGE:

This Awareness indicates the nature of the human mind appears to be that which is attracted greatly to that which it expects, to that which it wants to see, and in many cases, it wants to see things of a negative nature, and in other cases it wants to see things of a positive nature, and thus, it is constantly shifting and seeing something positive and something negative so frequently that it begins to label something as positive or negative, even when there is no real evidence for such labels.

This Awareness indicates that often these labels come about because someone else placed a label there. It is likened unto an entity who walks up to a door where someone has placed the label "Bomb," and the entity becomes frightened thinking that there is a bomb behind the door. It is the first thought the entity has. The entity does not tend to think "Someone put a 'bomb' label on the door," rather, the entity thinks: "There's a bomb inside this door!"

It is obvious that someone put a "bomb" label on the door, but the entity tends, because the label is there, to accept it as true. This Awareness indicates that if the entity had gone to the door and there had been no label there, or there had been a different label and someone yelled to them: "Don't go in there! There's a bomb inside the door!", they would find it hard to believe. They would most likely think that someone is trying to play a joke on them.

Entities tend to believe labels even more than to believe words, and whatever comes first, if it is a word labeling the door, whereby the entity comes to the door and someone yells "Bomb!" before the entity has had time to imagine what is really behind the door, the entity will accept that there is a bomb or will look to the person who indicates there is a bomb for further verification.

This Awareness indicates that whatever comes first as a label, tends to set the mind of the entity to judge that thing that is labeled and it becomes more difficult to remove the label once it has been placed. Thus, to say that a family is evil makes it much easier to believe if you had no previous contact or understanding or relationship with that family, and if you are told that the family is evil, it becomes reasonable, when later informed more information about the kind of evilness in that family, and you may even feel relief in knowing that someone is going up there to rid the world of that family.

You really don't know the family at all, you have simply been given certain labels which you tended to believe

without question. That likewise, if you have been told that Shamballa is a wonderful place, it can be very disturbing to hear otherwise. In fact, it is more likely that you simply won't believe it.

This Awareness indicates that it really doesn't matter because you are not likely to go there anyway, so you might as well keep your dream and fantasy that Shamballa is a wonderful place, but before you actually go there, if you ever have the chance, this Awareness suggests that you gather more information from various sources to make sure it is what you believe it to be, for labels, good or bad, are just labels and you may find that things are not what they appear to be.

This Awareness indicates that all labels are impressive if you have no idea in fact what is behind the label. Medicine placed in a bottle that has already been labeled for some other medicine can be very dangerous, and likewise, a person being labeled something when they are not what the label claims can be quite disconcerting, if you believe the label.

This Awareness suggests entities pay attention to labels, but not necessarily to believe all labels without question, and this Awareness suggests that entities be very cautious in labeling others. It is very easy for one person to say, "She is stupid!" They may think of one incident where the person said something that was incorrect and then label the person as stupid.

You see children doing this frequently. Occasionally you see adults doing the same thing, and once a label is placed, the next person who hears it has to deal with that label in their own mind. Will you accept that she is stupid simply because someone said so? Will it affect how you relate to that person who is said to be stupid? Will you be able to befriend the person who is said to be stupid or will you tend to shun the person simply because the label has been placed?

This Awareness indicates that it is important to think of labels and to question labels and ask and research to determine whether labels are truly fitting to that on which they have stuck. This Awareness indicates it is especially important that entities check the labels that have been placed upon them, and ask your self: Should I keep wear in this label so that others see in this way? Is this the label I really want them to see when they look at me? And you may find that a label you have worn for many years, a term that entities have called you in terms of perhaps a nick-name or a behavior or mannerism is not really the label you want to wear.

You may wish to take action to eradicate that label. For example, someone may say you are hyper or that you are nervous, or you may say you are too critical, and these are labels, and you may wish to remove the label, and if you wish to remove the label, you may need to remove also the mannerism or behavior that brought the label to you, and if you are tired of being called too critical, you may decide to quit being so critical so that the label does not stick.

This Awareness suggests that you may also consider putting different labels over the old, or in place of the label you have removed; labels that are more acceptable to you. If someone says you are too critical, you may wish to object and say: "No. I'm just very discerning." Discerning is a much more pleasant word than 'critical'.

Thus, you modify the label that has been placed on you and it is easier to live with being discerning than to live with being critical. This Awareness indicates that as you pay attention to these labels you can actually redefine yourself or you can redefine others so that they are more comfortable to be around, so that they accept themselves more completely and so that they enjoy being who they are, so that you enjoy being who you are, because you are truly properly labeled in a way that satisfies you and them.

9.

NEW RESEARCH PROVES GROUP REINCARNATION EXISTS
(Scientific Proof of Karmic Families Getting Together for Missions)

QUESTION: (Excerpt from a C.A.C. General Reading, November 17, 1992)

Some questions from Reverend R.Y., Baltimore, Maryland. I'll read his letter.

"Dear Avaton and Vikki: You may have heard of (or read) Arthur Guirdham's *The Cathars and reincarnation*, *the account of a British psychiatrist consulted by a woman whose spontaneous recall of a past life involved with the Cathars (Albigensian heretics) in the Languedoc section of southern France, made her wonder if she were losing her mind. It is gradually revealed that Guirdham was "Roger" in that time, and "Mrs. Smith," the patient, was a young peasant girl who became his lover.

In subsequent books (*We Are One Another*, *The Lake and the Castle*), Guirdham describes encountering or discovering a number of people in this life, including his wife, who have been together in a number of past lives: fourth century Rome, 7th century Celtic England, 13th century Languedoc, around the time of Waterloo in England and France. Guirdham also traces a thread of Dualist belief (his capital 'D') held by this group of about a dozen souls altogether from Mithras through Celtic and Cathar dualist forms of Christianity, to a present day full blown Dualism. Many of them were persecuted and executed for their beliefs in various lifetimes, particularly those burnt in the massacre of Monsegur on 16 March, 1244. (Coincidentally enough, my birthday in this lifetime. I know I had some connection with the Cathars, but have almost no clear cognitive information. I suspect in that life I was a Cistercian monk, and hence a priest, rigidly faithful to my vows and followed orders contrary to inner inclinations.)

Some of the information comes to Guirdham from his own 'far memory' as he calls it, some from the far memory of the others currently living, but also from the souls, entities, whatever, of who these people were in their past incarnations. These he calls 'revenents,' and they usually come through one or another of the living persons, and eventually to Guirdham himself in *The Lake and the Castle* as his ability for this develops.

My question for Awareness, if it should become possible to ask, is this: What is going on here? A person known in this life, after death communicating with (and appearing to) those still living (sometimes to two or three simultaneously though they are separated by several thousand miles), but as a persona of an earlier incarnation, and with (eventually) clear purpose to strengthen and spread this Dualist perception of the nature of the cosmos in the present time. And what about this Dualist critique of the western Church and Dualist understanding of the world as a creation of an evil force or deity and all the rest of it in relation to the actual teachings of the Avatar Jesus?"

That's his letter. Can Awareness comment on that?

* We have not heard or read the books by Guirdham (I think they are published in England), and the questioner did not name the publisher. Don't write us! Will notify you if we locate a source for these books.

COSMIC AWARENESS:

This Awareness wishes first to suggest that the entity's perception of himself, having had experience in these previous lifetimes with these entities is correct. It is what drew him to reading the books by this entity mentioned. This Awareness indicates also that it is not uncommon for collective groups of a lifetime to reincarnate in such a manner that brings them together or to be drawn back to meet with entities whom they have been

with in previous lifetimes, and if there is an opportunity for such meetings, it is not truly uncommon for them to some degree, to have a feeling or sense or possible recollection of having been together before.

What is uncommon is for such a group to delve so deeply into the research and to accept those feelings, those memories as being real. This Awareness indicates that the fact that these entities were open-minded, were willing to research a time period in history and compare this with their own subjective feelings and memories, allowed this group of entities to uncover much that would be lost to most people.

This Awareness indicates that this is a major discovery in experience that will help to substantiate for others in the future ways by which group reincarnation can be verified or can be researched. It is suggesting that entities who are close in terms of groups may find through their own interrelationships and past-life memories, that by sharing these past life memories, there can be a further awakening of group past life memory which allows for even further discovery of a time period in previous lifetimes.

This Awareness indicates that this book is seen as one of considerable significance in the research of reincarnation and in the encouragement of entities to pursue studies of this nature.

THE DUALISTIC CONCEPT OF GOOD AND EVIL

(How the Dark Force Originated in Some Religions)

FOLLOW-UP QUESTION:

The question he asked: "What about this dualist critique of the Western Church and dualist understanding of the world as a creation of an evil force or deity and all the rest in relation to the actual teachings of the avatar Jesus?"

COSMIC AWARENESS:

This Awareness is not certain what the entity refers to in his use of the term dualist and in the comments that follow. It appears the entity is referring to the concept of good and evil as part of the teaching of the Western Church and that the entity is asking about this concept and its relationship with the teachings of Jesus.

This Awareness indicates that the dualistic concept of good and evil of course is common among the Western mind theologians and stems from Persia as well as other cultures of the West whereby there have been certain cultures in the West that did not have the dualistic concepts. For the Egyptians there was a much milder form of deity order, whereby rather than having opposing forces, there was seen forces of a nature that enhanced or hindered the efforts of man.

The forces that enhanced or encouraged man's efforts were seen as being beneficial, and those that hindered were seen not as evil, but as being part of the obstacles that required man to put forth extra special effort. They were part of the necessary demands placed on man. Thus, the ancient Egyptians did not see the dark gods or what would now be called evil gods as being evil, they saw them more as being a necessary problem to help drive entities toward the greater good.

The concept of good and evil emerged mostly out of the Zarathustrian philosophy in Persia whereby the idea of a negative or dark force opposed the force of Light. Ormazd as the force of Light was opposed by Zamael,* the force of darkness. This Zamael later became the Persian concept of Satan which was later brought into the Christian doctrines.

No Polarization in Oriental Religions. Ignorance Was Key

This Awareness indicates that the orient never had the same kind of polarization in its philosophic teachings. They did not include in their deity hierarchy a dark force such as Satan. They had instead a sense that ignorance was the absence of Light and that Light or Knowledge or Awareness was the key to overcoming the problems and pain and suffering in the world. The tendency to polarize in terms of good and evil is most acceptable to the immature mind. The child easily takes to polarized concepts of good and evil. It is much easier to polarize a young child to good and evil, but once the mind has been so polarized, it is very difficult to change that polarity, even if the child ages, grows older and more mature, but when a mind becomes truly mature and learned, it begins to look at those polarized childhood attitudes and recognize that they are not suitable for the intellect of a more mature concept or conceptual level of thinking.

Western Polarity Created Both Good and Bad Qualities

This Awareness indicates that in this sense, the Western mind, based on polarized concepts of good and evil, has been kept in an immature level of thinking, creating fanaticism and extreme bullheadedness or close-mindedness for many centuries as the philosophies of that good and evil polarity played itself out.

This Awareness indicates it has led to such violence in the Western world and yet it has also produced much of the technology that is characteristic of Western thinking. This Awareness indicates that the extreme polarity of the mind in the Western world has been powerful in its effects, both good and negative. It has created wars, which out of necessity led to inventions which served the people well.

In finding ways to develop collective teamwork, it has led many groups to commit violence against others because they were perceived as evil. This Awareness indicates that the polarized mind does not lean toward compromise. It is fanatical and determined in working toward one goal and therefore, it can accomplish things that cannot be accomplished by a more reconcilable type of consciousness.

If an entity needs something and doesn't have it, and the mind is the kind that polarizes, then the entity will focus on what is needed ever more strongly, and that excessive focus will lead the entity to find ways to accomplish that which he or she desires, but if the mind is not the type that polarizes, it will look at that which is needed and say: "I'd like to have it, but I guess I can live without it," and thus, the entity accepts What Is rather than trying to change What Is, and this is more the nature of the oriental or Eastern mind.

This Awareness indicates therefore, the immature Western mind has helped to develop in a fantastically short time a technological society that analyzes, probes and invents new things in the world capable of changing the very nature of the world to suit its demands and needs, whereas the oriental mind has for centuries developed concepts and ideas relating more to the reconciliation of yes and no, towards the reconciliation of good and evil or black and white, so that the polarities can be brought into harmony.

This Awareness indicates that this idea of a dualistic world being able to function in harmony as with the yin and yang, each needing the other, is acceptable in the oriental world, In the Western world, the idea is to destroy

evil and leave only good. Of course, in the effort to destroy evil, that which sees itself as good often becomes the evil for others to worry about.

Why Western and Eastern Philosophy Should Combine

This Awareness indicates that there is the necessity for both types of Western and Eastern thinking, but there is a greater value as these two types of thinking merge together, for the merging of these two extremes allows creativity to occur that will lead to new inventions, new discoveries, new methods of solving problems.

At this stage in your Earth history, the oriental mind tends to accept more of the polarizations from the West and the Western world is starting to accept more of the reconciliation of the East, so that as things are reconciled in the Western mind, a greater sense of peace and acceptance will develop, and in the oriental mind, in the acceptance of polarization, the Easterners will develop a greater sense of the need for accomplishment.

They will struggle and raise themselves out of poverty levels that have existed for millennia and will soon find themselves in the forefront of technology by borrowing Western concepts and ideas and developing their own desires, fulfilling their desires with these Western ideas and the emotions relating to desire and fear that are so common to the polarized mind.

This Awareness indicates that the Western mind gradually will diminish its fears and desires to become more accepting of life as it is, and will enjoy the bounty that has come from 2000 to 3000 years of polarization and its development of technological rewards.

Awareness Takes Us Back to Ancient Atlantis to Understand WHY KARMIC FAMILIES KEEP COMING BACK FOR MORE (Why Being Burned at the Stake Once Isn't Often Enough)

FOLLOW-UP QUESTION:

In this question by R.Y., when he talks about this karmic family reincarnating, if that's the correct term, this group of entities that reincarnates over and over together and are most often persecuted and executed by the state and church and so on, over and over; I wondered about this, when Awareness, through Ralph Duby, particularly, in some group readings and private readings (and Sam Millar has also indicated in some readings to some people), that they were burned at the stake in various lifetimes, more than once.

My question is: Why would a group keep coming back? If they burned at the stake once, you'd think that would be enough. And I wonder, maybe these guys are crazy or something! Specifically, knowing in advance, I'm sure, what they're heading into, why would these groups continue to do this? Is this part of the Cosmic plan or something?

A Brief History of Some Awareness Movement Families

This Awareness indicates that much of this began in Atlantis. Many of these entities were part of an experiment by the priestcraft in Atlantis in which they were brought together and mummified as one group, and as a group they were given certain understanding of a future mission based on their future incarnations. These are entities who showed up later in ancient Egypt as described in the Cayce readings at the time of Ra-Ta and helped in the building of the Temple of Beauty and Temple of Healing to bring about a new Egyptian era for the correction of many of the mistakes that occurred through the efforts of the black magicians in ancient Atlantis.

How the Black Magicians from Atlantis Are Doing Mischief Today

This Awareness indicates that this group of black magicians in Atlantis sought power; that the seeking of power through the manipulation of the masses was a key in their plans for developing certain political structures and directions. This Awareness indicates that the Interpreter as one who was involved in this struggle and the entity who the Interpreter is now legally involved with in a civil lawsuit as one who sought power through certain means over others in Atlantis.

The entity having a belief that the masses were not to be trusted with information, and he withheld information from the masses, and as a priest in Atlantis, sought to keep the masses ignorant. The Interpreter as one who believed the masses had a right to know and sought to educate the masses. This struggle between these two entities and between others resulted in the formation by the one side of a power group, and this power group eventually led to the reign of Baal, and the other group sought to diminish the problem by teaching and informing the masses as much as was possible, but the power group, under the reign of Baal, generally wiped out the other priests of Atlantis at that time.

This Awareness indicates that this contributed to certain destructive forces that eventually culminated in the sinking of Atlantis. This Awareness indicates that many of those who were hypnotized and later mummified as a part of a collective force for the general good of Atlantis, reincarnated into Egypt and helped in the construction of the Temple of Beauty and the Temple of Healing.

This Awareness indicates that after this experience, which is described in the Cayce readings, these entities again reincarnated in that which became the Zarathustra movement, the Zoroastrian philosophy; this in Persia. At this time there were also aliens involved in directing humankind and a priestcraft was created to help promote certain concepts of religious philosophy that became important in the molding of civilizations that would follow.

The group again reincarnated on different occasions, one being at the time of the Essenes and the time in which the historical Biblical account of Jesus was given. They reincarnated prior to that in Greece during times described by Homer. They reincarnated later in group manner as described by the questioner of this message, and again in the time of the Carmelites, and again at this time.

There were many other reincarnations also where these entities came together, including the time of King Arthur, although the current King Arthur stories are more myth than fact. The King Arthur events were relatively close in account but much less dramatic and much less well defined as characters as is found in the current stories of King Arthur. There were more people involved in the reality and the characters were not as well defined and symbolic in the

11. same sense. This Awareness indicates however, that generally, the group continued to reincarnate out of a sense of subconscious mission to accomplish certain effects in consciousness, to keep humanity on course in its evolution, and it does so today in this time. This Awareness indicates that the group is not necessarily all together during these times. There are times when some of these entities will separate from the group or nucleus of the group, and as individuals may form other groups, or may have personal influences that reach out in other ways.

This Awareness indicates that some members of the group in one life may take on more significant parts and in other lives may fade into insignificant activities, while still others become more significant in their roles and activities. This Awareness indicates that in some instances group members may be well known or even famous or notorious and others not well known at all, while in a different lifetime it may be reversed.

Those who were once famous are not even noticeable and those who were previously unnoticed might become quite famous in this other lifetime, but the group may continue to reincarnate, even though some members may be far apart in terms of space, or even in terms of culture or nationality. It is the time that is significant.

They generally reincarnate into a certain time period together, wherein one time period may be led by influence from entities of the group which set the stage for others to follow to continue on the work that was started, but the influence on the group during a particular time period will alter or redirect or refocus the course of human history and that is the purpose of this group reincarnation that has been occurring since the late stages of Atlantis and up to the present time.

George Bush and Hitler Still Working Off Karma

This Awareness indicates that the entity George Bush was one of the black magicians during this time of Atlantis and was offered a chance to overcome any karma from that experience in this lifetime. The entity *did* work off much of the karma in this lifetime. There still remains a very small part for the entity to still work off.

This Awareness indicates as has been given previously, the entity Adolf Hitler was the reincarnation of that Atlantean known as Baal. This entity Adolf Hitler has not yet worked off much of the karma from that Atlantean experience.

How the Awareness Movement Group Branched Out

This Awareness indicates that many entities in the Awareness Movement today relate back into those Atlantean times. Some of these entities were associates and friends who were part of the group or who lived in neighboring lands that related carefully to this group and who later became entangled with the group more deeply, and in that more deep entanglement became part of the group.

In other words, some entities may not have been in Atlantis at the time of this struggle as it began, but may have, at a later lifetime, come in contact with entities of the group and become involved more deeply with the group so that they too became part of the group incarnation because of their attachment. In other words, the group picked up converts along the way as it reincarnated from one culture to another over approximately a ten thousand year period.

Some of these group incarnations have spanned a period of several thousand years between, while others have been mere hundreds of years between incarnations, but in the process, occasionally, entities would be picked up by the incarnating group and taken with them through future incarnations because of attachments that were formed

between entities of the group and those outside of the group.

This Awareness indicates that this is not intended to give entities a sense of being special so much as a sense of being inadvertently involved in a situation that has not yet resolved itself. This Awareness indicates that this incarnating group does not always produce a pleasant lifetime. Sometimes it produces a very difficult lifetime for entities who come together for this group dedication or purpose may find themselves again being burnt at the stake or otherwise ostracized or brought into great harm.

So, this Awareness is not trying to imply that these entities are all something special. They may simply be caught in the group incarnation and programming, the programming being designed to help reassure a certain direction in the evolution of humanity.

DO BLACK MAGICIANS REINCARNATE IN GROUPS ALSO?

FOLLOW-UP QUESTION:

Well then, can we assume that this group that reincarnates over and over to help humanity move forward, their motivation is basically good? Is there other groups comprised of say, black magicians, who have the opposite motivation? Do they reincarnate in groups also?

COSMIC AWARENESS:

This is in the affirmative; that there has been to some lesser degree this kind of influence. This Awareness wishes to suggest however, that these entities do not have the union of this group. They do not have the united front. They are more individualistic and concerned about their own personal gain, and though they often reincarnate together or in the same time period, they sometimes are at odds with each other.

This is all part of the effects of a sabotaging of their original plan whereby these entities were trying to bring a mirror reflection after discovering the plan of the so-called "good guys." These guys, the "bad guys" sought to create a counterforce that would reincarnate and counter the effects of the good guys, but instead, their plan was sabotaged by certain priests who did not particularly like the power seekers, and who gave some of them a programming that would keep them from cooperating completely with each other so that there were releases in their consciousness that would cause them to confront or feel hostile toward each other so that they might war against each other rather than cooperate with each other in future lifetimes.

This Awareness indicates that this was all part of a plan by a certain priest who had been wronged or felt he had been wronged by these black magicians and it effectively diminished their power in times of future incarnations, because it hindered their cooperative potential. This Awareness indicates this is also what will help to assure that the group incarnation of those who sought to do good would eventually direct the human evolution into a higher and more wholesome direction.

MOST C.A.C. MEMBERS ARE IN THE AWARENESS FAMILY

(A Chance to Use the Law of Leverage to Help the Interpreter)

FOLLOW-UP QUESTION:

Did the energy mandala of the membership which Awareness indicated had a telling effect on the Hot August Night scenario this summer...are most of the entities involved in helping to avert that, are they part of a group that came down here as discussed to help move consciousness?

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates just for the purpose of this message, we may refer to these entities as the Awareness group and that this Awareness group has reincarnated through many lifetimes from the time of Atlantis. We may refer to the other forces as the dark group. These being those entities who were the black magicians of Atlantis that have reincarnated down through history.

Some of the dark group incarnations have put one member against another in great wars that have been historical in nature, but which have caused great agony for many people on Earth. The entity Baal, through Adolf Hitler, for example, as having created great agony for many entities on Earth, and as having led to excessive suffering of many Jews and of many individuals from various nations who participated in efforts to stop this insane effort of world conquest.

This Awareness indicates that there were forces on both sides that were now in opposition but which had been in harmony as black magicians in the time of Atlantis. This Awareness indicates that some of these forces during World War II worked off their negative karma and became free of that negative karma from Atlantis. The entity George Patton for example as one such entity.

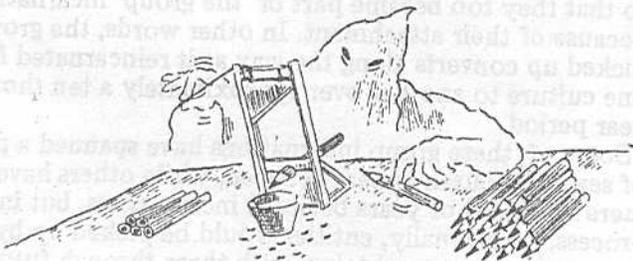

FOLLOW-UP QUESTION:

Over the years we've received a lot of letters from people stating to the effect that they wished that they could be more active somehow in changing the consciousness, but they've felt helpless because they were tied up with their own problems and their own families, jobs and so on, and this message from Awareness about the energy mandala, which has not yet been published, I'm sure is going to be reassuring to a lot of these people, that they've been participating in this all along and just don't realize it.

COSMIC AWARENESS:

This is in the affirmative. This Awareness wishes also at this time to call the attention of your members to a situation that they can help with which will greatly enhance this strength of this movement, your organization and the Aquarian Church. This is in reference to the lawsuit involving the Interpreter and his ex-partner in their American Trading Company, wherein the American Trading Company became two thirds owner of a diamond mine in Ghana, or that which is Western Africa, whereby the ex-partner of the Interpreter as president of the American Trading Company attempted to loot the company and put the diamond mine into another company of his own creation, giving it to other people, giving the shares the Interpreter owned to other people.

This Awareness indicates the situation is coming up for trial in January of '93. Meanwhile, the ex-partner is also under indictment by the FBI on four different counts of criminal charges, ranging from two counts of fraud, wire fraud, and money laundering. This trial to occur on December 15.

This Awareness indicates it would be of great benefit to the Interpreter and to the organizations the Interpreter associates with, such as *Cosmic Awareness Communications*, the Aquarian Church and the World Peace University, that the membership could focus energy toward the resolving of this case in such a manner that brings back the portion of the diamond mine that is rightfully owned by the Interpreter.

Cosmic Awareness Asks You for a Favor

This Awareness indicates that there may be other assets owned by American Trading Company that have also been looted; the Interpreter as having had difficulty in getting documentation on these corporate opportunities. This Awareness indicates that *It* requests the membership to focus energy in behalf of the Interpreter for the purpose of restoring the rightfully owned corporate opportunities to the American Trading Company and to the Interpreter as a 50% stockholder in that company.

This Awareness indicates *It* does not ask for anything more than is rightfully owned by law; that the energizing of the masses of this membership can be of great value in helping to bring this to a just conclusion. The opposing attorneys in this case are attempting to do everything possible to confuse, to muddle, to discredit the Interpreter, to make the Interpreter appear to be the bad guy, to make him appear to be a disreputable person.

They are planning to ridicule him for his activities as 50% holder of shares in the company, which the Interpreter plans to give almost entirely to the organizations: the Aquarian Church, *Cosmic Awareness Communications* and the World Peace University and to certain individuals who have been of great help during these times.

He has already planned to give 10% to his attorney. This Awareness indicates that the value of this diamond mine is estimated to be approximately 200 million dollars. The amount owned by American Trading Company was approximately 133 million dollars. The amount owned by the Interpreter would have been approximately 67 million dollars in value. The amount held at present is zero.

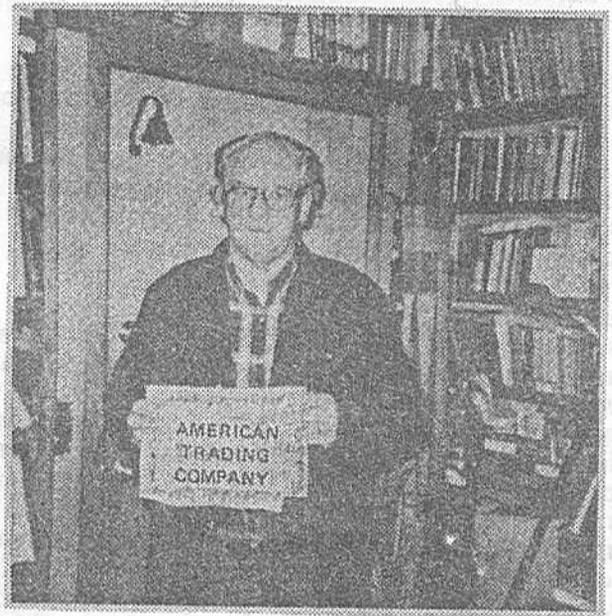

How Your Combined Force Can Now Help the Interpreter

The stock was transferred without the permission of the Interpreter to another company created by his partner called the African Trading Company. It is this stock that the suit seeks to have returned. The partner will not lose his 50% share. The Interpreter at this time is not asking for punitive damages, he is simply asking that his stock be returned to the American Trading Company.

This Awareness indicates that if entities can spend even 30 seconds focusing and visualizing this energy, this stock being returned to the American Trading Company, it will have a profound and powerful effect in helping to do so. This Awareness indicates if you can spend 30 seconds a day until this trial is over, it will be even more profound.

Simply visualize the stock or visualize a field of earth and soil in which diamonds are mixed being returned to the ownership of American Trading Company. This Awareness indicates you can, if you prefer, visualize paper stock certificate-like images being handed to the Interpreter as symbolizing the return of the stocks to the American Trading Company.

Keep the image simple and easy for you to understand and it will be more powerful.

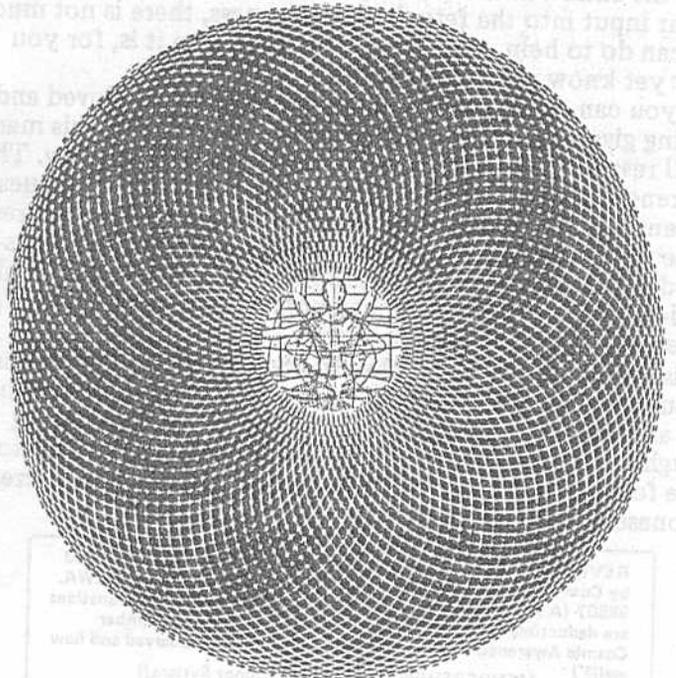

QUESTION:

Thank you. Does Awareness have a closing message?

COSMIC AWARENESS:

This Awareness indicates that you are the arms, legs, hands and fingers of this Awareness, and can do for this Awareness those things which *It* cannot do for *Itself* on the physical plane. This Awareness indicates that in asking for your help at this time in this manner, you will be helping to finalize a situation which this Awareness has worked on for several years in trying to change the fortunes of your organizations, of the Interpreter's church, and of the World Peace University in order that these groups might better serve you and others like yourselves throughout the world.

(The Law of Gratitude is given)

PREPARING FOR THAT NEW BABY: HOW TO HELP

(Can You Make the Baby Remember Who He Is?)

QUESTION:

A question from J.P., Milford, Pennsylvania. "My wife is 5 months pregnant and is expecting in February. I would like to know if there is any way to facilitate the child entity into remembering who and what he is, and secondly, my mother passed this plane 13 months prior to our baby's conception, so I'd like to know if my baby and my mother might be the same entity, if this is a fairly common occurrence?"

COSMIC AWARENESS:

This Awareness indicates that it does not appear the entities are the same. It appears that the child is one who has been waiting for approximately 25 years to enter in to this life experience; that the mother as having gone on to other experiences and is in the process of training or learning certain information in other dimensions that is satisfying to her.

This Awareness indicates that in regard to assisting in the process of birth of the child, the best you can do is to make the mother's delivery and life, up to the time of the delivery, as easy and as pleasant as possible; giving her help, helping her in terms of diet, in terms of proper nutrition and in terms of peace of mind and emotional comfort are all important to the child and to the mother, and in so doing, it will make the entire process and the child's birth much easier. This Awareness indicates that after the birth takes place it will be beneficial to begin slowly forming a bond with the child, occasionally holding the child until the child becomes used to your voice, your vibrations and your touch, and keep this bond developing over a period of time so that the child becomes very much aware of you as an important and key figure in its life.

FOLLOW-UP QUESTION:

He also wanted to know if there's any way to help facilitate the child entity in remembering who and what he is while he's still in the womb.

COSMIC AWARENESS:

This Awareness indicates that other than piping music or messages through a tape recorder held to the mother's body near the child, with messages to give the entity information and music or some other form of communication to stimulate the child's awareness of your voice, of music and other similar input into the fetus's consciousness, there is not much you can do to help the entity remember who it is, for you don't yet know who the child is.

All you can do is help the entity accept that it is loved and is being given attention by those who love it and in this manner it will retain its self-awareness and sense of individuality. This Awareness indicates that the question: Who am I?, is a question that entities always ask, and generally they are not answered in the manner that they ask the question. They may be answered by a name or by descriptions of what they do or their relationship to something or someone else, but: Who am I?, raises questions that cannot easily be answered.

This Awareness indicates that the best you could do in answering such a question is to point to the entity's own consciousness and divinity and argue that the entity is a living being brought into existence by some Cosmic or Universal Creator, some force that is aware of itself and that has helped in creating oneself as an aware being.

14.

This will mean very little to a small child. The thing that may be meaningful to the small child would be influences in terms of the calm pleasant voice or music or touch or something of this nature that stimulates the child toward the appreciation of something in the child's society, especially toward the mother. This Awareness indicates the entity may at later times begin to question again: Who am I?, what is my source prior to this life? It is almost impossible for entities to help answer these questions to a newborn who doesn't yet understand how to even formulate the question.

FOLLOW-UP QUESTION:

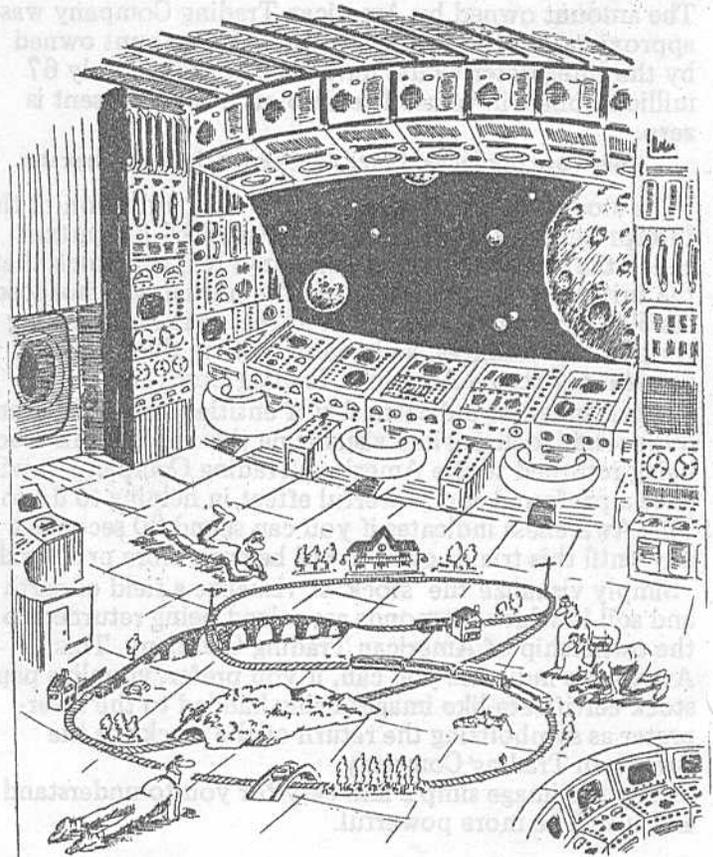

I think what the entity was getting at was that if there's some means of communicating something to it to remember who in fact he really is, so that he will be more spiritually aware and developed at a younger age.

COSMIC AWARENESS:

This Awareness indicates this is negative. The only thing you can do is help to ease the entry into this plane so that the doorway of entry is not seen as a traumatic blockage when the entity looks back on this movement from the inner plane to the outer plane. Simply keeping things as easy as possible in the birth transition will help the entity to carry through into this plane some of the energies of the soul in its awareness on the other plane.

There is nothing that you can stimulate in the entity's consciousness to force him or cause him to remember something regarding his inner plane experiences, but the entity will tend to remember better if he does not pass through a traumatic and shocking experience during the birth period which could cause him to forget. It is just the same as if you were to go through a traumatic experience yourself.

You might forget things that happened during and prior to that time, and thus look back and wonder: What happened there? Who was I before all of this happened, and how did I change to be what I am now?
