HAVE WE ALL BEEN WASTING OUR TIME "CRYING WOLF"?

COSMIC AWARENESS

ADDRESSES THE MEMBERSHIP

ON THESE ISSUES

A REQUEST FOR AN HONEST EVALUATION OF C.A.C. AND ITS READERS AND MEMBERS

(Excerpt from a C.A.C. General Reading)
September 11, 1993

QUESTION:

A question from W.H., San Angelo, Texas. He writes:
"Would Awareness please give us an honest evaluation of this organization: *Cosmic Awareness Communications*, its mission, and how successful it has been in fulfilling its mission? I know that all those who have been part of C.A.C., including this individual, must share in its failure or success."

COSMIC AWARENESS:

This Awareness indicates that it is an organization that has provided the setting necessary for this Awareness to have *Its* expression on this plane; *Its* expression being that which takes on the form available through the organization. This Awareness indicates that this Awareness expresses *Itself* in many other ways, through many other forms, including music, art, dance, and business or any type of human relationship, but this particular expression is of a rather unique type, which has allowed this Awareness to present concepts and ideas that could not be expressed easily through other means of expression, and the expressions through this outlet also have certain limitations.

For example, *It* cannot easily influence the subconscious of entities to experience certain things as might be experienced through rituals, but *It* has given Development Classes and rituals that can be conducted in classes through the Aquarian Church or other means, and this Awareness indicates that the *Cosmic Awareness Communications* method of giving messages through communication of language as that which has made possible an enormous amount of material relating to all facets of human existence.

The information relates to magic and science, to myth and reality, to mysteries that were never clarified before, to help entities to grasp greater understanding of the nature of human existence in the midst of a universe that is comprised of Divinity, so that entities begin to understand their place in the Divine Vibrations surrounding them.

This Awareness indicates *It* has provided information that entities can evaluate, digest, question and dissect, compare, analyze, bring together, in such a way as to help them in finding those many different faces of truth to satisfy their needs. *It* has been doing this activity for over 30 years and *It* is pleased that there have been responses to the information that have affected all of humanity to some degree.

This Awareness indicates that some of the concepts given in the early stages of the organization, in the early outlets for this Awareness, have triggered new ways of thinking, new ways of understanding among certain influential people, who in turn have passed on such information, in such a way that it has had a profound effect on millions of entities, even though most of those entities were unaware of where the concepts may have originated.

This Awareness indicates that sometimes the concept is passed from one person to another so that hundreds may be touched by that concept without even knowing where it came from or how it got started. This Awareness indicates that this kind of thing has happened and this has had its influence and effect on humanity in general so that there has been some change from the way humans were thirty years ago, so that they have been somewhat altered, ever so slightly, into the New Being, and having accepted, ever so small an amount of the New Consciousness, entities have indeed been influenced through this organization.

In direct communication with entities, it has touched many thousands, and by indirect communication, such as those who were affected by entities who were directly in contact with messages from this Awareness, have been affected in the number of hundreds of thousands and subconscious connections that result from these direct and indirect connections, entities have been affected by the millions.

Indeed, perhaps in levels approaching billions, for it has indeed affected the collective consciousness of entities on earth to some degree. This Awareness indicates that the effect that has been most profound is the effect on individuals who in turn pass on their understanding of the concepts to others, to change their lives somewhat and to influence these many others with the messages, teachings or impressions and vibrations coming from this Awareness and passing through these entities.

This Awareness indicates that the vibrations that pass through the teachings through the messages, through the individuals, are those that are having the most profound effect on this plane, whereby a message given can affect the vibrations that echo and spread and permeate throughout all of consciousness, to help entities who may never hear these words be more receptive to certain concepts and principles that come to them on a subconscious level or which may come to them over the airwaves or which may come to them through the mouths of others, or through the behavior of others, so that when they receive it in a conscious way, they already are open to it subconsciously.

This Awareness indicates that most of the effect of this Awareness in speaking through this organization to the masses over the years, has been in *Its* spread of certain cosmic vibrations, energies that affect entities on a subconscious level. This Awareness indicates the messages are secondary in importance and the messages sometimes can be contradictory or controversial, but the energies that are carried by the messages have their own unique and profound effect on individuals, so that they need not even appreciate the words presented by this Awareness.

They may simply absorb it on a subconscious level as it is passed from one subconscious entity or self to another, to another, and to another, over the years, until all entities on this plane have received information from this Awareness since *Its* beginning of *Its* communications on a subconscious level.

This Awareness indicates that there are very few who have not subconsciously been affected by messages from this Awareness over these 30 years, but there are masses who would not realize they have been affected. The number of entities who consciously know of this channeling are extremely few in comparison to the masses that are affected by the messages.

This Awareness indicates that *It* does not require a huge number of people to have an influence on the mass-mind, on the collective consciousness, *It* requires only 144 people to change the earth through the influence on the mass-mind. The organization at present having approximately 10 times that number has its effect. This Awareness indicates that over the years entities have come and gone in the organization and the numbers that have come and the numbers that have gone are in the thousands or hundreds of thousands, but this Awareness indicates that is only the outer quantity.

The inner quality and its effect is that it has touched almost everyone on this plane in a subconscious way, so that people on earth in the collective unconscious mind have a kind of affinity toward Universal Consciousness, and all they need to recognize this will be the term or words describing and explaining. The words 'Cosmic Awareness' or 'Universal Consciousness' will be understood, simply by their hearing it, because their subconscious is already made aware of these principles and concepts.

How the Membership Can Make or Break the Organization

This Awareness indicates that in regard to the part of your question about how the membership can make or break an organization, this is absolutely true, and fortunately, there have been entities who have supported this organization over the decades or over the years, or by the month, or by the week, or perhaps on a one-time basis, and this support has kept the organization alive, which has created for this Awareness an opening into the consciousness of this plane, of this dimension.

This Awareness indicates that it has kept this door open and has allowed this Awareness considerable time on this plane during a time of extreme crisis, for mankind during this time had reached a point of near annihilation when this Awareness entered and *It* has communicated and spoken through the opening to the collective unconsciousness of humans on this plane in this dimension. *It* has informed them of many different things so that changes came about and so that frequencies and vibrations were altered and entities moved away from some of the greater hazards and became aware of some of the other new hazards they had not yet anticipated or understood, and entities are still becoming aware of various hazards and as they become aware, those hazards have a tendency to diminish, but entities must be aware of them first before they can be diminished.

You Must Recognize a Disease Exists Before It Can be Healed

This Awareness indicates you cannot heal the disease until you recognize the disease exists. You cannot ignore the disease and expect it to go away. You must be told of or discover for yourself that there is a crisis, a problem, then you must take the mental steps and all other necessary steps to heal, to move from recognition of the problem to the healing of the problem.

This Awareness indicates that this essentially is a most broad overview of the situation in which this Awareness has found *Itself* in regard to this plane, and to this organization and its membership. This Awareness deeply appreciates the contributions and dedication and focus of the membership in allowing this opening to continue, for without those entities within the membership who have contributed to this opening, most of this change would not have been possible, and humanity might not exist at this time.

This Awareness indicates *It* wishes entities to realize the importance of the role they have played in this crisis, in this critical moment of human history.

Why Awareness Focuses Mainly on the Negative

CLOSING MESSAGE:

This Awareness indicates that over the years *It* has focused heavily on the negative, on the disease, on the problem. *It* has not given greater attention to the healing aspects. The fact of becoming aware of the negative tends to bring about the healing, so long as the entity isn't caught by an attitude of being a victim of that negative, and most of the people who receive these messages have long moved beyond the victim consciousness and see themselves as ministers or agents or representatives of the Spirit, of the Light, of the Divine, so that when they hear of a negative, just focusing on that, recognizing that negative will automatically begin the healing process.

This Awareness indicates all that is necessary for an aware person is to be aware of the problem and that begins an automatic movement in consciousness to bring about a healing of the problem. Therefore, this Awareness quite often gives more information on the negative and what is happening in a negative sense that *It* does on what to do about it. Generally, *It* will give some information on what to do, but it is not essential to the healing process that the positive action must always be taken, for being aware of the problem is often enough to make the changes in consciousness that help bring about the healing.

This Awareness indicates that taking a positive action is often a greater benefit for the individual and helps to seal the change or helps to affect the subconscious energies involved to accept that a change is occurring. This Awareness indicates there are even situations whereby if an entity becomes aware of a negative and that entity is in a high state of awareness, and sees a desire or has a desire to change that negative, the entity may not be able to take the action to make the change directly, but if the entity can take an action, it helps to ground that wish for change into consciousness.

You could either drive a nail into a board with the idea that you are driving this change into the physical reality, or you could jump up and down three times or you could slap your hands together or take any kind of ritualistic movement to ground the action in your thought into a reality level of the physical world, and it would have an effect of doing something so that your subconscious would feel "Ah! I've taken care of it!"

How Your Letter-Writing Affects the Mass-Mind

This Awareness indicates that this type of behavior can be profoundly effective. Even more profound is when you take an action that you can truly believe affects the situation. This Awareness indicates that in most cases, wherein this Awareness has suggested you write a chain letter, or write to certain people regarding an issue or a situation, the writing itself may not have logically reached enough people to have a profound effect on a situation, but by writing, it leads you in your subconscious to accept that you have done something about this situation, and in your high state of awareness, that message to your subconscious then is channeled to other entities in their subconscious levels and you believe it, and because you believe it, it becomes more powerful than ever that you have changed the situation, and on a subconscious level you begin to affect the mass-mind and bring about the changes.

Meanwhile, you believe it because your letters have gone out and are touching people and are having some effect which you can see and recognize. This Awareness wishes to tell you this so you understand that it is not simply

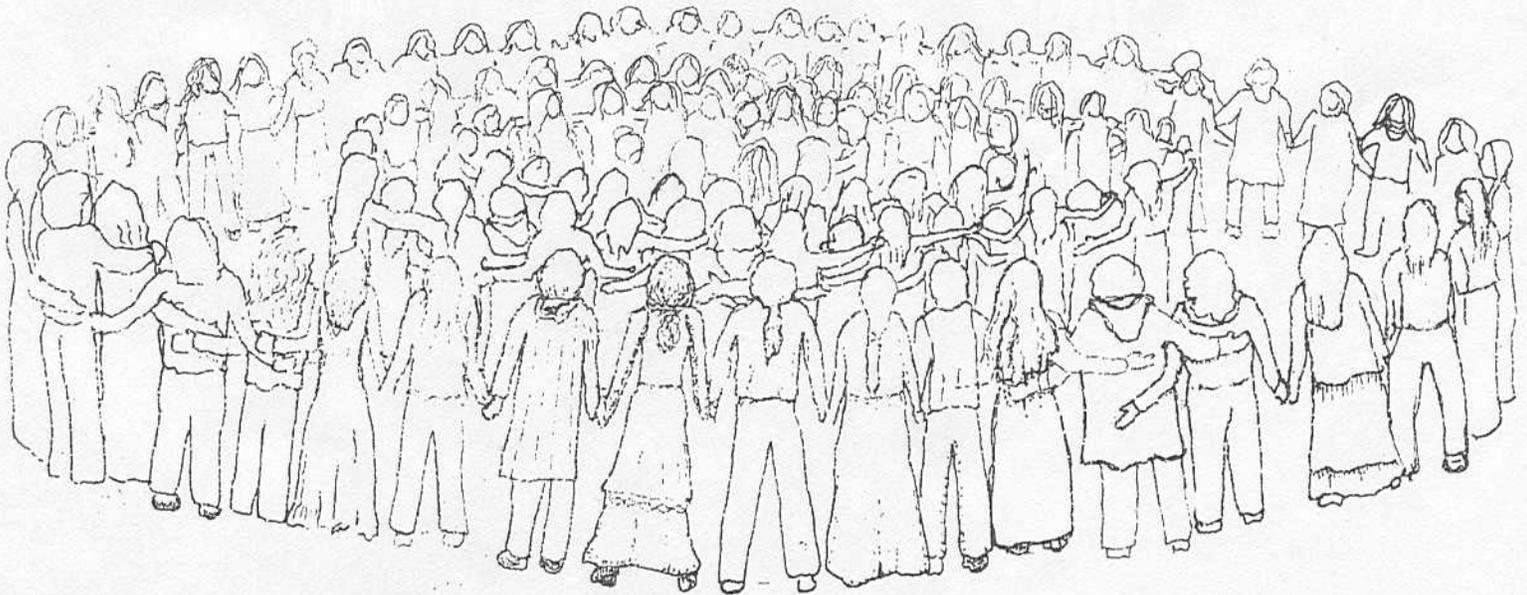

the letters that you write which make the change. It is also the change in your own consciousness which is part of the collective consciousness and which creates a spread of the information to the collective consciousness so that the changes occur throughout the collective consciousness and unconsciousness of humanity.

This is as much a part of the change as is the letter you send to your Congress person or to other people imploring them to do something about a certain issue. This Awareness indicates in other words, as recipients of these messages and as entities who absorb the information, the very act of absorbing and becoming aware makes a change.

The act of acting upon that awareness enhances the change and the act of writing in regard to the situation or dealing with it in a manner that fits the situation, enhances the change even further, but it also creates on a subconscious level another set of changes in the collective and subconscious collective mind of humanity.

This Awareness indicates therefore, you are magicians in the highest order of consciousness, even if you are not well aware of the role and the way by which things work.

The Law of Gratitude is given.

GOD IS ALIVE AND MAGIC IS AFOOT !
