A PEEK AT LIFE ON VEGA

INDEX IS ON PAGE 20

WILL C.A.C. SELF-DESTRUCT SOON?

This Awareness indicates that entities need to be aware that while Cosmic Awareness Communications has operated steadily and in a manner that allowed for entities to feel stability in its existence for many years, for decades; it has not been so without effort and difficulty on the part of those working behind the scene getting forth these messages.

This Awareness indicates that there will be a time when this action can no long continue or when it will undergo such change that it will no longer be the same. This Awareness indicates that it is important for entities to understand these things are not occurring in the same manner that a corporation continues generation after generation.

There are not dedicated people ready to fight for the right to help run the organization, because it is a labor of love. It is not something where entities are envious or have reason to be envious of those who are putting forth the efforts to get these messages out. There is no great reward in a monetary sense, nor in a prestigious sense for the work that is done by these dedicated entities.

Therefore, it is unlike many corporations. Entities may think of it as another company putting out some product and apparently making enough reward to keep the company going. It is not like this. It is a company putting out a product in which sometimes the people working for the company must put their own money into the company to keep it going, must volunteer time, must volunteer labor and work.

Sometimes the entities wonder whether it is worthwhile, whether the recipients of the product care enough to make it worthwhile to continue. This Awareness indicates that therefore, when these entities have given all they can give, this organization may self-destruct or come to an end.

There may not be anyone willing to dedicate themselves to continuing the work of this organization, and this Awareness wishes entities to be forewarned so that they do not say at the time, "Why didn't someone tell us? Why didn't someone let us know so that we could have somehow done something to help at the time it was in need of help?"

This Awareness indicates there are many out there who write saying how much they have benefited from the work of this organization and how they really appreciate the material they have received and that they are happy to continue receiving the information, but they do not want to give more than the absolute minimum hardship amount to remain involved. This is the measure of one's appreciation.

What entities send in support of the organization indicates their true appreciation. This Awareness indicates that *It* simply wishes entities to understand that while there are many who express true and honest appreciation, there are others who would rather give words than energy of a monetary nature which sometimes is so deeply needed.

This Awareness indicates that there will come a time when these messages can no longer be presented. Therefore, entities are forewarned to learn what you can while this is still available and not take this too lightly, or for granted.

This Awareness wishes also to express *Its* own appreciation to those entities who have helped as much as they could to keep these messages flowing to the public, to those who want these messages.

HOW TO FACE REALITY IN A WORLD OF ILLUSION

QUESTION:

A question from JD in New York. "We are said to be living in a world of physical illusion for the purpose of growth and learning, where reality is disguised. Yet, the sages exhort us to become God-realized, like themselves, and utterly dispel the illusion. Wouldn't this be counter-productive?"

COSMIC AWARENESS:

This Awareness indicates the question being: If you are in a world of illusion for the purpose of learning from that illusion certain lessons that will help you to grow spiritually, then why do the sages suggest that you go beyond the illusion and live and see the reality outside of the illusion?, implying that if you stay in the illusion you can learn messages or information that helps you to become more spiritual. The sages asking you to go beyond the illusion into the spiritual reality, to overcome the physical limitations that are there to help you learn to become more spiritual.

This Awareness indicates the entity asks: "Isn't this counter-productive?"

It is likened unto a Catch 22. If you go beyond the illusion to become more aware of the spiritual reality, then you no longer need the illusion, but if you are caught in the illusion, the very purpose of being in the illusion is to help you to learn how to get *out* of the illusion and into the spiritual reality.

This Awareness indicates you could say it is counter-productive, or you could say you have the choice of growing more spiritual because of the illusion, or stepping out of the illusion and being more spiritual. This Awareness indicates it is simply a question of whether you are in the fishbowl or outside the fishbowl looking in, and realizing a different freedom from outside than that which is available from within.

Shall you evolve from the fish to something that is free of the fishbowl? Or shall you be outside of the fishbowl and recognize the illusion inside the fishbowl? This Awareness indicates if entities could simply step out of the fishbowl so easily as the sages ask you to, it would be a very simple solution, but not everyone can step out of the illusion, simply by being told to. Therefore, they remain in the illusion, gradually learning and working themselves out over a long period of time, perhaps many lifetimes.

FOR THE CURIOUS: A CAC HOME BASE ON THE INTERNET

For your non-member friends who are curious about Cosmic Awareness and CAC and who are "on line", please direct them to the CAC Home Page (web site) which is: <http://www.tezcat.com/Cosmic.Awareness/html/cachome.html>

IS THE "SPIRITUAL HIERARCHY" DISSIPATING?

QUESTION:

Paul Shockley, Interpreter

Another question from this entity. She sent in a copy of a reading given many years ago about "masters" and fully illumined teachers, and I'll read a paragraph of what Awareness says here, and then I'll ask the question.

"This Awareness indicates that every eye shall see that the movement of consciousness is such that many entities who are now gurus and teachers are now being left out of the levels of realization. This Awareness indicates that the spiritual hierarchy, wherein certain entities claim to be more highly evolved than others; the entire concept of spiritual hierarchy is that which is in the process of dissipation.

"This Awareness indicates that *It* is moving into those levels wherein there is sorrow and suffering. *It* is moving into those levels wherein entities say "I don't know! I don't understand!" This Awareness indicates that many of these entities who do not have answers are opening up to become channels whereby this Awareness may express *Itself* through these entities.

"This Awareness indicates that many of the so-called "masters" who have moved into levels of power and control over the minds of others by claiming themselves to be authorities; many of these shall find themselves among the last rather than the first."

It goes on but I think that's the paragraph She's referring to, and I'm not sure that she understands it, but I'll read the question:

"Awareness has said that the entire concept of spiritual hierarchy is in the process of dissipation." Her first question is: Only on *this* planet, or elsewhere? Is Awareness saying that no entities are any more highly evolved than others? This appears to be saying that the murderous brute is as fit a guide for mankind as the sage, the healer, the master of the physical; that one who can teleport, telepath, materialize and dematerialize, et cetera, is in no way more evolved or superior than the least conscious, capable or compassionate."

COSMIC AWARENESS:

This Awareness indicates that putting words in the mouth of This Awareness is not appropriate. That may be what you interpreted from that message, but it was not the message that this Awareness intended. This Awareness indicates *It* was speaking of the kind of spiritual hierarchy that so many entities project as their paradigm or reality.

This Awareness indicates that many entities, especially at that time, and perhaps still do look at the spiritual hierarchy as a kind of hierarchical society of spiritual masters who stand in a kind of positioning similar to a military hierarchy wherein the sergeant is subordinate to the master sergeant and the master sergeant is subordinate to the lieutenant, who in turn is subordinate to the first lieutenant, who in turn is subordinate to the captain, who is subordinate to the colonel, et cetera, et cetera, throughout the generals, and all of this hierarchy is superimposed on the concept of spiritual masters, so that entities are praying to some subordinate archangel to seek help from a higher

archangel, until they reach authority that allows them to have something they need.

This Awareness indicates that there are all of these ranks in the spiritual hierarchy that get so much attention from those who are into the ranking of spiritual entities, and this is what this Awareness was most concerned about, for it is possible for entities to attune directly to the Universal Deity.

Because the Universal Deity is a frequency that is everywhere present in the universe, why are entities playing around with the various ranks of spiritual entities, thinking that they can climb some kind of ladder by buttering up to the spiritual entity one step above where they are?

All you have to do to get to the top rung is surrender to the Divinity within the universe that is everywhere present; and in reference to the dissipation of this rank network of spiritual hierarchy, this Awareness was referring to the dissipation of its significance in the lives of entities so that they no longer help hold together this pattern of ranking spiritual positions in order to keep some kind of illusion going.

This Awareness indicates that of course there are entities that are more highly evolved spiritually than others, and of course those who are more highly evolved spiritually are spiritually ahead of those who are more demonic in their expression and this Awareness appreciates the more highly evolved spiritual entity, and is concerned about those who are dabbling in demonic energies.

This Awareness did not intend for entities to interpret *Its* message as saying "All entities from the most demonic to the most divine are equal." *It* does not see where this interpretation could have come from. This Awareness indicates *It* is simply saying: "It is not necessary to climb the corporate ladder of spiritual positions in order to reach the top of the corporation of spiritually structured existence, for the divine top, the top of the pyramid or corporate ladder that comes to spiritual evolution is everywhere present and entities at the bottom has as much ability to surrender themselves and attune to the Divine energy that is present in that place and surrender to Divinity in the lowest, as are those entities at the highest level in the pyramid of the divine corporation."

This Awareness indicates in other words, you don't have to butter up to your superior, to the higher guru, higher teacher or higher spiritual master when you can simply surrender to the highest wherever you are, for the Divine is everywhere present throughout the universe.

This Awareness indicates that the master of masters is within yourself, if you can surrender to it, but if your focus is on climbing the corporate spiritual ladder to try to get control through your positioning and power, growth of a spiritual nature, seeking of spiritual power by climbing higher on the hierarchy; this is apt to cause you more difficulty in becoming one with Divinity.

This Awareness indicates that there are many entities who have been taught to think in terms of rank. In the Catholic church there is the ranking of the priests all the way up to the pope, and these entities, having been taught to think in this way, find it very easy to assume the spiritual hierarchy is also ranked and that there are those whose rank is higher or lower than

another and they like to think in terms of these rankings, and there are some who even promote the idea that one spiritual being in the spiritual hierarchy has greater rank than another.

This Awareness indicates that all of this is detrimental to the reality, to the paradigm this Awareness wishes entities to recognize; that the highest vibration, the highest frequency in the universe is everywhere present and that entities need only to surrender to that, and in so doing, they will be One with God, they will be One with the Divine and that there is no other ladder that entities can climb which can put them higher in position than surrendering self to the Divine.

WILL A GLIMPSE OF A MASTER ADVANCE YOU SPIRITUALLY?

QUESTION:

Another question from this entity. She recently got back from a few weeks in India, and so these questions are sort of oriented in that direction. "Is it true, as the Indians say that the Darshan of a Mahatma, or Great Soul, has profound benefits? Even a brief glimpse of a saint, for example, is said to confer great blessings, obviate a number of incarnations, guarantee greater rebirth or quicker liberation; that sort of thing.

"Does this sort of stuff really result from having a mere view of the physical form of a great beings"

COSMIC AWARENESS:

This Awareness indicates that this is part of the marketing of a great saint, and the marketing of a saint is part of the hypnogogic process of creating an attitude toward the saint, and the attitude one has toward the saint can give an entity a sense of spiritual growth and a sense of spiritual growth can impress upon the entity that he or she is more spiritually evolved as a result of that saint's influence in his or her life, and this recognition or realization can have a profound effect on an entity in helping them to become and to be a more spiritually oriented person.

This Awareness indicates in other words, you can convince an entity that he or she is more highly evolved because of some circumstance or presence of an entity who is special, and that person actually can, by his own convictions, become more spiritually oriented.

This Awareness indicates it is much like giving a cross to an entity who sees himself as being a sinner, and being told that "This cross of Jesus will help save your soul!", the entity who takes the cross and values the cross, will see himself as a much better person, and if he sees himself as a much better person, he will be a much better person.

This Awareness indicates that if you can convince entities that the very sight of a great master improves their spiritual value and worth, then the entity will naturally be improved by having seen the spiritual master. It is a matter of suggestion. The more the entity accepts such a suggestion, the greater effect it has on the entity's psyche.

This Awareness indicates you could also reverse the process and tell an entity that: "He who looks upon

this horrible form that you are about to see, will become Satan's archangel" If you convince the entity that this is going to happen, what do you think will occur in the mind of that entity and in his future behavior?

This Awareness indicates it is much the same, only in reverse. This Awareness suggests that by suggesting and convincing an entity that the sight of a great teacher will cause an improvement in one's soul can be of extreme significance in helping that entity's soul to become more spiritually oriented.

This Awareness indicates that it also benefits the master to have entities believing such an idea. This Awareness indicates it also benefits the master's prestige to have entities being convinced of this idea. It is the prestige of the entity that is most benefited.

It is possible that the master might suffer problems if he himself believes that the sight of him is all that is necessary to raise the spiritual evolution of entities, for it may make the master excessively conceited or vain if the master is not fully understanding of what is being said, why it is being said, or if he buys the notion that he has such a spiritual presence that he can, by being seen, cause others to become more highly evolved.

This Awareness indicates the information on some entities might cause them to lose humility and to become very vain. Therefore, you cannot simply say that it would benefit the master, for it may only benefit him in certain areas, and may be harmful in other areas, if the master isn't highly evolved spiritually

WHO OR WHAT IS SAI BABA ?

QUESTION:

Another question along this line: She writes: "Cosmic Awareness seems not to have commented on Sai Baba. Sai Baba of Shirdi, was renowned for breaking down Hindu/Muslim animosity in India. He had miraculous abilities and predicted his two subsequent incarnations. The first of these as Satya Sai Baba, born in the state of Andhra Pradesh, at Puttaparthi, eight years later.

"Some 80 million people around the world, of all religions and no religion, are now his devotees and evidently regard him as God Incarnate. (Hindu tradition says that when mankind strays too far from the path of righteousness, the deity itself takes human form to guide man back to the spiritual way of life).

"He has also spoken of himself as an Avatar, and in many quarters is called a "cosmic avatar (as distinct from a "planetary avatar, who has risen up through the ranks of human evolution to be its most "perfected" "elder brother" and hence spiritual guide.)

"In any case, he seems to originate from off the planet and likely another than the physical dimension. He is clearly the most powerfully loving being I have ever encountered, and has been noted for his control of matter, materializing rings, trinkets, vibuthi ; (which means holy ash) and so on for his devotees, saving them miraculously, transmuting objects, healing the sick, even raising the dead.

"Speaking unabashedly of himself and his mission, he avers that he is omnipotent, omniscient, et cetera. He answers visitors' questions before they have a chance to

ask them, and speaks to them in their own language, whatever it may be."

Her question is: "Please tell us from the Cosmic Awareness viewpoint, who and what Sai Baba is, and how and why he does what he does. Is this sort of appearance in a world like ours *rare*, or regular?" she asks.

COSMIC AWARENESS:

This Awareness indicates this is obviously quite rare. The entity has spiritually evolved. One might say he has evolved certain powers of his spiritual capacity far beyond what most others are capable of doing. This Awareness indicates that there are many highly evolved entities who can do some of what he does or has done.

There are few that can do as many of the things he is capable of doing because his focus is more on consciousness and the development of certain aspects of consciousness in himself, attuning these to the Divine Consciousness so that his life with the Divine becomes so totally commingled that he does not separate himself from Divinity.

This Awareness indicates that most entities accept their physical forms as being themselves, and while trying to hold on to their physical essence, reaching also toward spiritual essences, you cannot easily gain great spiritual growth while trying to hold onto the less physical self.

This Awareness indicates that the entity appears to have psychically relinquished personal self and merged with Divine Self so that the Divine operates through him with great ease, with little resistance.

Does this mean the entity is a god? This Awareness indicates that as long as the entity is surrendered to the Divine, that Divinity is operating through him and to that degree the entity is a god.

If the entity separates his personal human self from the Divine, to that degree he is not a god.

WHAT IS THE RELATIONSHIP BETWEEN AWARENESS AND SAI BABA?

QUESTION:

I believe Awareness answered this next question, but I'll read it anyway. "Sai Baba states that he is, (and he surely *appears* to be), omniscient, omnipresent, eternal, et cetera. What then is the relationship between Cosmic Awareness and such God Realized Divine Incarnations?"

COSMIC AWARENESS:

This Awareness indicates to the degree that these entities are attuned to the Divine vibration or frequency of the creative origin of the universe, whatever entities wish to call that creative frequency or vibration of the universe; whether it is called Universal Consciousness, Cosmic Consciousness, or Cosmic Awareness, or God, or whatever entities wish to call it; to the degree that entities are attuned to the omnipotent essence of the universe, they are to that degree divine reflections of the energy of the Creator.

If the entity separates emotionally and psychically and seeks to promote personal self as a god, that entity loses some of the divinity. To the degree that the entity

is separate, the entity is fragmented from the Divine. To the degree the entity is unified with the Divine, that entity is to that degree Divine. It is very simple.

If you have a bucket of water, and you call the water "Divine" and you pour in another liquid and that liquid is overcome and devoured by the water, then that liquid becomes part of the Divine. If that liquid that was poured in to the water and became part of the water should separate, perhaps through a temperature change or something, then it loses its divinity or union with the water.

It is very simple. You cannot claim separation and unity simultaneously. If you are separate as a self, you cannot be unified as a divine reflection of God. If you are unified with God, you cannot claim to have a personal self, because the personal self is but a *fragment* of the Divine. It is a fragment, it is a deviation of the Divine. It is a particle, a broken-off piece.

This Awareness indicates that the DNA may be a reflection of your body, of your being, but if the DNA separates from you, it is not you. If the DNA merges with you and you speak of yourself, you are including all the DNA that makes up what you are, but as soon as the DNA takes on the concept of a separate self, it cannot claim to be you. It cannot walk around, using your credit cards, driving your car, because it does not have the full power of being you that you have.

The entity who claims that he is God may be a reflection of God as an entity separated from God, but he is not God. The entity cannot do the things that God does. The entity may only be a reflection with the potential of being able to merge with, through surrender, to merge with God, to become One with the Father, and thus the entity may experience the God Energy by surrendering to God, but cannot separate from God and walk around and play God and do the things that God does, anymore than your DNA can separate from you and go to work in your office or in your workplace, or relate to your family members or do your business.

It cannot do these things because it is not you, once it separates. It can only merge with you, experience you, be capable of loving you and feeling what you feel, just as an entity can surrender to God and feel the love of God.

This Awareness indicates there is a big difference between the entity who is surrendered to God and able to say in that surrender: "I and God are one!", but the entity will also recognize that as he speaks of "I", that the "I" that speaks is actually God speaking, and not the separate entity or self, and when the separate entity or self separates from that surrender to God and becomes fragmented from God, he can no longer say "I am God!", because God is far greater than the "I" that speaks of himself as a fragmented and separate entity.

It is only through surrender that one can experience Godness. It is only through joining, that the DNA can experience what you are, and who you are.

WHO ARE THE "MASTERS OF WISDOM" ?

QUESTION:

Another question from JD. She keeps hammering away on this subject. She writes: "Please make clear the difference between the "Masters of the Wisdom" who

are described as the most evolved members of the human evolution, and the putative alleged "Ascended Masters" about whom you have already said quite enough? What can you tell us about those "elder brothers" of mankind?"

COSMIC AWARENESS:

This Awareness indicates there are and have been over eons of time, entities who are spiritually evolving and growing more attuned to the Divine Energies of the universe. What more can be said? This Awareness indicates that should these entities be worshipped above God, should these entities be sought and pulled on for favors, should these entities be looked upon as your master, and should you surrender yourself to them?

This Awareness indicates, what did these entities surrender themselves to in order to become so highly evolved? Do you think they surrendered to those entities who were a little further down the road than they? Or do you think that they surrendered themselves to the Divine Energy of the universe, the Great Creator of All, the God of the Universe?

Do you think these entities want your worship if they are truly Divine Beings? Do you think these entities need followers to pull on them, cling to them, cry out to them? Do you think they appreciate having dependents? Do you think they glory in the vanity of being masters over you?

This Awareness indicates that these entities simply want to focus on their own spiritual development and be of help where they can, but they do not want dependents who cling to them, who pray to them, who grovel at their feet. This Awareness suggests the next question be asked.

Are All Symbols a Product of Man's Intellect

QUESTION:

"Are some things inherently symbolic of something else, such as a dot in the center of the circle, or the cross, representing the juncture of spirit and matter, or is all symbolism a product of man's intellect, et cetera, i.e., a human invention?"

COSMIC AWARENESS:

This Awareness indicates you might say it is a human "interpretation"; that the cross, a spirit rising crossed by matter or horizon, is an interpretation of the human mind, or of other minds that are highly evolved, not necessarily human.

This Awareness indicates that the circle often is symbolic of the sun, for it is the most universally recognized sphere or circle, and when it is used in symbology, it often represents the sun. It also can represent other extrapolations from the sun. It can represent the globe of the earth or the concept of the universe, since the universe is recognized as spherical.

It can also represent infinity, since it has no beginning and no end, as the serpent biting its tail; the beginning and the end coming together.

This Awareness indicates that these symbols generally are interpretations or representations of human creation or of entities from higher intellectual standing. Many of the symbols are likewise recognized on other planets and even among entities who are not considered

human. The Dinoids and Reptoids would have some overlapping symbols with humans

This Awareness indicates that not all symbols are universal. There are some cultural symbols that could be interpreted from a universal approach. For example, a circle may have a universal or more broad symbology as being a symbol for the sun or the earth, but in some cultures, a circle might simply represent a seed and the seed-symbology might imply seed grows from one generation to make a plant which sprouts forth a seed which then creates another plant, which creates another seed. et cetera, in a cyclic or circular fashion, so that the circle becomes an excellent symbol for the seed, showing the cycles of generations in a circular movement.

This Awareness indicates this is as sensible and meaningful in one culture as would be the circle representing the sun, in another culture. Therefore, it would be erroneous for entities to automatically assume that all symbols are the same in all cultures, for there may be a difference.

HOW CAN SO MANY MINDS CREATE A CONSENSUS REALITY?

QUESTION:

Another question from JD. "Our experience is said to be mind-created illusion, but how can so many minds trained in such diverse directions create the common consensus nuts and bolt reality which we all share?"

COSMIC AWARENESS:

This Awareness indicates that if the minds of all entities are constructed in the same way, if they all follow the same genetic pattern, a question could also be asked: "How can these minds come up with so many differences in the realities they witness?"

This Awareness indicates that there is a theory being promoted in modern science that the middle brain is attuned to time and space reality, and that its attunement to time and space reality is what causes the human being to see into future and past and present time, and to recognize space outside of its own self or inside itself, and the conclusion of certain of these scientists is that this part of the brain is what creates the universe and eternity as an assumption of the brain in its recognition.

From this, of course, one would have to ask: "How can this be that one's brain creates outer space, and the universe, simply by its perception, when there are so many others who have their view of outer space and the universe, from their vantage point?"

The obvious answer is that all entities have this same middle brain activity in which they perceive outer space and infinite time in all directions, and therefore they are collectively creating outer space and infinite time in all directions as a perception which all share.

This Awareness indicates the implication of this is that if all middle brain were suddenly destroyed, would it mean the collapse of the universe and the end of time? This Awareness indicates that this is simply something to meditate on, to think about. It is not intended to provide you at this time with an answer to this question.

This Awareness indicates, however, there is more that one could ponder. If this is the case, that your collective middle brains create your collective recognition of the universe and of time, then what about the concept of dimensions? Are there other dimensions? And are these other dimensions created by shifts in the consciousness of entities, or do they exist intrinsically in some physical reality?

Are they dimensions that can be traversed by altering your mind? Are they dimensions that can be visited when your mind ceases? Do you automatically enter into another dimension when your brain ceases to function? If so, are you provided with another brain attuned to that dimension, so that that dimension can have its characteristics based on the nature of your brain in that dimension?

This Awareness indicates these questions, these concepts, can lead entities to look at a totally different reality, a different kind of paradigm for the Creation. Our three-dimensional view of reality with us as visitors to that reality now becomes something totally different. Are we perhaps *creators* of the reality we find ourselves in? This becomes the question.

A PLAN TO END POVERTY AND STARVATION?

QUESTION:

Another question from JD: "Would Awareness please comment on my plan for world economic organization?" Namely, that a proportion of everyone's income, probably fifty percent, be put into a common fund, out of which every person alive receives back an equal allotment of credits good for food, clothing, shelter, medical care, et cetera.

"Minors would presumably be exempt, or receive a smaller return or some such. This would appear to benefit everyone and eliminate poverty and starvation, et cetera, very quickly."

COSMIC AWARENESS:

This Awareness indicates that this concept as that which essentially would be classed along with the concepts of Communism, wherein the state takes over all the wealth and divides it out to the members according to its perception of what is equal and fair among the masses.

This Awareness indicates there would be enormous resistance by those who hold great wealth at having half their wealth being taken in order to benefit those few entities at the bottom of the scale, the economic scale.

This Awareness is reminded of the entity John D. Rockefeller who was challenged by someone in the audience where he was speaking. The entity says to him "Why don't you divide up your wealth among the masses?", to which Mr. Rockefeller reached in his pocket and threw him a dime and said, "There is *your* share!", meaning that were he to divide up his wealth among the millions of masses, each would receive perhaps a dime, and he would then be as flat broke as the rest of them.

This Awareness indicates that the entity saw himself able to do more for society by using his

wealth in regard to creating service-stations, telephone systems, and numerous other businesses that serve society than by sharing all of his wealth with everybody in the society.

This Awareness indicates those who hold great wealth are not anxious to share it with the poor. In fact, they often are very irritated at having the poor seek their wealth. The poor, on the other hand, the entity who has perhaps a few dimes to his name, would be most happy to have your plan be implemented, because he could spare half of his income or half of his holdings if Mr. Rockefeller and others would share half of *their* holdings to help those who are poor.

This Awareness indicates that this action over everyone taking half their earnings or holdings and putting it into a pool would sound great to some and sound absolutely horrible to others. The ones who would see it as horrible are the ones who would have the greatest influence in society because they would be the ones who hold the most power, since they have the most money.

This Awareness indicates that it would not be so important for entities to split half of their earnings or holdings to help the poor of the world. It would not be so important because it would not be that beneficial, and if it were done, within a matter of years, the ones who know how to gain and hold wealth would have rebuilt their fortunes, while the ones who have only learned to consume and do not know how to make wealth would be back at the poverty level or below, and things would be much the same within a matter of approximately one generation.

This Awareness indicates, however, if there were a way whereby entities could get back to the basics on which this country built its great wealth prior to the Federal Reserve Bank taking control of the economics of this country, then all entities would have a greater chance of improving their lives. Perhaps not proportionate to each other, whereby there would still be poor entities and there would be wealthy entities, but the entities would have a more fair playing field, whereby they could keep what they earn and learn to use what they earn for the betterment of each other's business operations.

Originally, rather than being taxed, entities were free of head tax, or personal income tax, and the taxes came with the exchange of goods. There was a tax on products, and every time a product changed hands, it would be taxed.

This excise tax was legal, but head taxes were illegal, until the fraudulent amendment occurred, wherein entities tried to make it an Amendment to the Constitution that would allow the head tax, or personal income tax.

How the Illegal Income Tax Came Into Being

This Awareness indicates that this Amendment was never ratified by the states, but the spokesperson, who wanted this to be passed, rose in Congress and announced that at last a sufficient number of states had passed the income tax amendment and now it was a matter of getting the structures together to collect on the income tax, and that this would be very beneficial for the country, particularly since it was preparing for war; this during World War II.

The fact is, it was *not* ratified by the states, it was a bald-faced lie, but no one stopped to challenge or to investigate that fact, and it has only in recent times been resurfacing that the income tax is constitutionally illegal, having never been properly ratified by the states.

How the Illegal Federal Reserve Bank was Created

This Awareness indicates that likewise, the Federal Reserve Bank, having been passed on Christmas Eve, when most of Congress was gone, allowed for this quasi-bank to mint and coin money in behalf of the Treasury Department whereby the Treasury would print up bank notes for the Federal Reserve notes and use those in place of the US Treasury notes.

When the US Treasury notes were being used, the Treasury could print up whatever notes were necessary for government spending. If there was a war, the Treasury could print up all the money necessary to carry on the expense of the war, but once the Federal Reserve Bank was created, the Treasury had to *borrow* money from the Federal Reserve Bank to fight its wars, to fight the wars of the country. If there was a road project, the Treasury had to borrow from the Federal Reserve Bank to build the roads. If there was a government program of any kind for the people of the United States, if there was any kind of spending budget, the money had to be borrowed from the Federal Reserve Bank. The Treasury had to borrow.

The irony is that the Treasury printed all of these notes for the Federal Reserve Bank. It did not save it any trouble. It still had to print the notes, but instead of being able to print their own notes for the country, they printed the notes for the Federal Reserve Bank, then borrowed back those same notes at face value, not at printing value.

The printing costs perhaps a penny or two per bill, but the bills might be marked at hundred, thousand or ten thousand dollar values, and the Treasury would have to borrow at those face value amounts. Thus, trillions and trillions of dollars were borrowed for the government over the past eighty-some years, and a national debt of trillions and trillions of dollars to the Federal Reserve Bank has been created.

It is an amount that will be passed on to the children and grandchildren of entities, far into the future. The children and grandchildren will be paying off this trillion dollar debt long, long after all others have died from old age. This Awareness indicates it is also ironic that the *interest* on this trillion of dollars has risen to such a degree that within another five years that interest will be consuming all of the tax available on the payment toward the national debt, so that there will be nothing left to pay the principal, which amounts to trillions of dollars.

The Fact it was Illegal is a Way to Get Out

This Awareness indicates the only thing that appears to be a way out is the fact that the action in 1913 was illegal in the first place. It was anti-constitutional. The creation of money lies in the province of the Congress. According to the Constitution, there is no other authorized to mint and coin money, and to pass this off would require a constitutional authorization, which is not present in the Constitution.

Therefore, Congress, in passing a law creating the Federal Reserve Bank acted unconstitutionally, and it was void from the beginning because it was illegal, and therefore, all actions stemming from this act of creating the Federal Reserve Bank are fraudulent. This is the action that is now being challenged by certain Patriot groups who have raised the question: "Do we even owe a national debt?, and what can we do about the damage that the Federal Reserve Bank has done to our country?"

This Awareness indicates that the IRS was created to collect money for the Federal Reserve Bank and the Federal Reserve Bank has taken this money and has shipped it out to overseas banks it holds, in other countries, to the tune that only approximately 20 to 26 percent of the taxes collected in this country ever are used by the nation for its own debts or for its budget.

The IRS is a Collection Agency for Overseas Banks

The rest of the money collected, the other 74%, goes to the Federal Reserve Bank for its overseas activities. Thus, the IRS is a collection agency for overseas banks. This Awareness indicates that these are things that, if understood by enough people, and if clarified, and if acted upon, could help to increase the benefit of the poor, so that they need not be catered to by entities who want to take from others to help them.

The Welfare programs would not even be necessary if entities had a playing field that was fair, but when there is a super-organization, a quasi-government organization such as the Federal reserve Bank and the IRS, and other similar agencies, then how can anyone expect the poor to improve their lifestyle or earning powers?

This Awareness indicates that instead of the poor growing richer, the middle class is growing poorer, and the wealthy are growing richer for it. This Awareness indicates that in terms of your idea of everyone Splitting their income in half and giving it to the government to divide among the masses equally, it might be a good idea, but you will never see it happen. There will not be any cooperation, except perhaps from the poor, who have very little influence in making it happen.

This Awareness indicates that at present time, the Republican victory in the last election is moving in the opposite direction. It is trying to cut off benefits to the poor from taxes that insult the wealthy and insult those who have money to spare. In other words your plan would be bucking the system or going against the current at this time.

Everyone in Congress Can't be Ignorant of this Federal Reserve Scam, Can They?

QUESTION:

Awareness, there must be many people, particularly I would think, conservatives in the government, who are more than aware of the Federal Reserve scam, and of its illegality, including the IRS, but yet, the few bills that have been introduced have never gotten the necessary support, and even in the Congressional Record, many years ago, the entire scam was printed, it was delivered on the floor.

What is there about this thing that is keeping the politicians, who know better, from doing something about this, informing the people that this was illegal

from Day one, and therefore, the national debt is now dissolved?

COSMIC AWARENESS:

This Awareness indicates these entities receive large campaign contributions from sources that are closely allied and loyal to the Federal Reserve system and its many associated organizations. The Council on Foreign Relations, the Trilateralists, the various large organizations associated with that which the Birchers call the Conspiracy Hierarchy; these are entities who contribute to the benefit of the various legislators and senators.

This Awareness indicates that many of these senators are invited to join these organizations, and therefore, their loyalties are committed to these New World Order organizations. They are not likely to vote on anything that would disturb their paychecks or their campaign contributions. This Awareness indicates that this is the reason why the Patriots are now pushing the Redress of Grievances, to make it clear that they see these problems of the Federal Reserve Bank, they clarify this in the Redress of Grievances, and they also point out that support of this illegal act is an act of treason, when entities have sworn to uphold the Constitution.

The Redress of Grievances Spells Treason to Supporters of Federal Reserve Bank

Thus, they are informing Congress-people and senators and governors, that "if you continue to support the Federal Reserve Bank, the IRS and these agencies that have illegally taken over the economics of this country, you will be tried for treason!" They even declare in this Redress of Grievances, that there is a war between the government and the people. This is not a declaration of war by the people, it is a quotation from those persons in government who made the statement years ago that they were at war with the people on this issue.

The people have for some long period of time, since 1913, some say 1933, been under Martial Law. Martial Law is shown when the flag of the United States is embroidered around the circumference by a gold braid. It means that the Martial Law rules the country. In other words, there is a war going on. Every two years the war has to be restated, or re-affirmed, in order for the Martial Law to continue.

Thus you have, in one period, a war on poverty. A few years later you have a war on drugs. And there are more and more of these wars occurring every two years. Otherwise, Martial Law would have to be canceled and you would be back under the Constitution, and your freedoms could then be restored. You could then plead Constitutional Rights in courts of law. However, at present, the courts of law are following Admiralty Law, the law of the high seas or that which is used in Martial Law settings.

This Awareness indicates the courts use Statutory law which is essentially Martial Law or Admiralty Law, and therefore, if you plead Constitutional Rights in court, you are not likely to get anywhere. Those Constitutional Rights only count when you get up into the Supreme Court, for there is a tendency to continue to use the Constitutional law in the Supreme Court because

they do not want the people to know that the Constitution has been superseded by Admiralty Law.

This Awareness indicates that therefore, the Supreme Court will often rule if there is a constitutional discrepancy, so that the lower laws are supposed to follow the Constitution, and yet, entering into a court of law, arguing with the Constitution, seldom is beneficial to an entity because they will say, perhaps not outwardly, they will say the entity is in the wrong jurisdiction in this court.

They do not recognize your Constitutional Law in the jurisdiction of an Admiralty setting or court, and therefore, they will rule against you. This is the purpose of lawyers. They are clearly aware of their role in the Admiralty courts and they do not represent constitutional arguments in an Admiralty court, because you are not in the right jurisdiction for such.

This Awareness indicates that for this reason, some of the Patriots who have been arrested for their activities have created Common Law courts in which they are tried. They have managed to persuade the states to allow them to try their case in a Common Law court, and have won. This Awareness indicates the entity Mike Thorn who was involved in the claims case, was recently arrested, was tried in a Common Law court and won his case, and Federal Marshals escorted him to freedom, making sure that no one else could arrest him in an Admiralty court.

The Secret War Between Patriots and NWO

The entity being free by Federal Marshals who recognized and enforced the Common Law. This Awareness indicates that these are situations that are happening in this country, even as this Awareness speaks. It is a secret war going on between Patriots and those who represent the New World Order. It is a secret war that could be lost by either side.

There will be a time when entities may be asked to send copies of the Redress of Grievances to their Congress-person, to let them know that they are being put on the spot to act in behalf of the Constitution and that they are treasonous if they fail to do so. This Awareness indicates that this Redress of Grievances is being redrawn to be consistently the same throughout the country, so that entities, in sending it in, are not sending in variations or different versions of the Redress of Grievances.

The Redress of Grievances May be as Important as the Declaration of Independence

This Awareness indicates it had already been prepared and sent to these people at one time, but it was discovered that there had been variations or changes made by some so that the document was not the same. This Awareness indicates that this may be the most important document since the Declaration of Independence was presented at the beginning of this nation's history.

The Redress of Grievances is a statement that the country has been taken over by a foreign power and that it is the responsibility of those who represent the people to stop this and return the country to the Constitution. If these Congress-people and leaders do not act, they will be perceived as being agents of this foreign power, and then must face whatever consequence will follow.

This Awareness indicates it is something to be taken quite seriously, because there is a strong possibility that unless enough people persuade the Congress and Senate and state governments that this is serious, and meaningful, they will not do anything. Already, many of the Congress-people have been claiming they haven't received any such document.

This Awareness indicates for this reason, people are being told that when you send it, send it certified mail, so they cannot deny having received it. This Awareness indicates that a copy of this Redress of Grievances should be made available soon from various sources.

History is Being Rewritten at This Time

CLOSING MESSAGE:

This Awareness indicates that you are living in a time of historical significance. It is a very momentous time. It is a time when things can erupt suddenly, when things can change gradually, but the significance of the change that is coming will not be forgotten in history.

This Awareness indicates that it is extremely noteworthy in terms of the history of this nation. Already there are those who are trying to rewrite the history of this nation, whereby the great heroes of the past are deleted from the history and instead of speaking of the founding fathers: Washington, Jefferson, and so forth, the histories will be focusing on activities such as women's right to vote, the social changes that give more equality, the Gay Rights laws that liberate them, or changes for social programs that have developed such as the war on poverty, and in terms of present times, how the Republicans moved to cut off Welfare.

These are the kind of events that will make up the new history, so that if the New World Order has its way, it will all be seen as a kind of class struggle, rather than as a significant conflict between the powers of oppression and the people throwing off the yoke of oppression.

Great causes, such as the need for freedom, will not be included in the history books. The Constitution will not be given significance, nor the Declaration of Independence, but things such as the social programs that allow entities to have freedom of expression, such as the removal of censorship in the arts and in general expressions, so that for example, the arts can be a vehicle for more vulgar expressions; these are the things that will be seen as good historical changes that will be included in the future history books.

This Awareness indicates that it is simply a matter of changing the focus so that entities forget about, and give little significance to the idea of people fighting for freedom, or for rights, human rights, and instead whereby everyone is seen as gaining some kind of social rights to be similar to each other so that entities are melded into a common type rather than individualistic.

This Awareness indicates this rewritten history is a major part of the New World Order agenda, and it has already begun in quiet circles.

(THE LAW OF GRATITUDE IS GIVEN)

God comforts the disturbed
and disturbs the comfortable

THOSE WHO APPEAR TO MOVE BACKWARDS SOUL-WISE

(The Importance of a Good Environment)

QUESTION:

A question from F.K. in Indiana. He writes, "I know that one of the main purposes of life on earth is for the soul to evolve, yet it seems that in many cases, people are the most spiritually evolved very early in life and in a sense, move backwards during the rest of their life."

"Young children, for example, are generally much more accepting of people that are different from them than adults are. Until, and unless they are persistently mistreated, they also know the importance of showing love to others, both adults and other children. Very young children know instinctively that their thoughts can affect matter, until they are taught "better" by well-meaning adults. Would Awareness comment on why many people appear to often move backwards spiritually after childhood, and what purpose this serves for the soul?"

COSMIC AWARENESS:

This Awareness indicates that the premise that entities are here for the development of the soul is not precisely correct. This Awareness indicates that while this is essential and important for entities on earth to develop their soul, part of the purpose for entities on earth is to make the earth a better place for each other and for creating an environment that preserves the natural beauty of the earth in order for future generations to have a place of enjoyment.

This Awareness indicates that being stewards of the earth helps entities to develop values which in turn helps the soul to have a proper climate for growth and development. These go together. This Awareness indicates that wherein entities fail to understand the importance of promoting a better place for each other in terms of the environment, wherein entities fail to understand the importance of creating beauty and loving environments, entities will grow in a hostile environment to become more concerned with survival and more willing to fight each other for survival, and this is what causes the appearance of soul to be retarded as time passes.

This Awareness indicates as entities enter into a hostile environment, the soul growth becomes less important and physical preservation becomes more important to the entity, and thus the soul does appear to move backward. Rather than developing, it is losing its development. This Awareness indicates therefore, not only should entities seek to develop their soul, they should also seek to promote an environment where others can develop their souls, can have more harmony in their world, and can enjoy the beauty of great art, great expression, enjoyment, pleasure and security and knowing that they are socially safe and loved by others.

This Awareness indicates that if all entities cared for each other's general welfare, promoting the best world possible for each other, the soul growth would become much easier and more enduring throughout life.

Today's Youth: What Will Become of Them? (A Showdown is Coming)

QUESTION:

C.W., Canton, Ohio, asks: "What does Awareness see for the young people coming up? A lot of them are all drugged up. What kind of America will the future generation create? Most don't want to work, and can't read."

COSMIC AWARENESS:

This Awareness sees great difficulty for these entities. *It* sees these entities who, in another generation will be the generation of influence in the world, in the society, and these entity's values are not strong enough, clear enough, or of such quality to be leaders of the society. Therefore, it will be a time of great difficulty, if these values are continued without some interruption and change to bring about a greater society and set of social values.

This Awareness indicates *It* does not see this distorted value system being of any worthiness to the future society, and does see that there will be some change affecting these entities to force them to wake up to reality, and to develop more meaningful values for themselves and for their future children. *It* also sees that the drug influences that are helping to promote this kind of degeneration of values, will slowly and gradually be discarded as entities begin to realize the need for something meaningful in life.

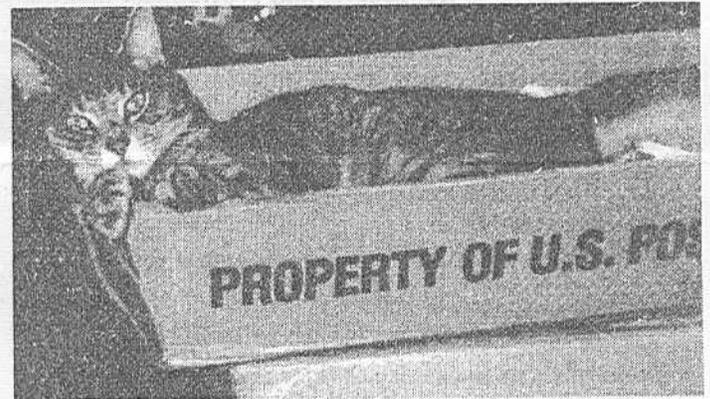

Drugs to End, Values to Return

This Awareness indicates that those forces that are working toward the New World Order, that are seeking to enslave the masses, that are seeking to keep entities ignorant, to destroy the educational systems; those forces are seen as on the threshold of diminishing their existence and purpose and influence in society, so that they will gradually cease to have influence over the generations of children and young people so that the drugs will fade, the values will return, and future generations will begin to recognize the importance of good social values.

This Awareness indicates that this is seen as that which may not come about without some great crisis and intensities from sources other than the children, the leaders of a society, but may come instead from the people in the society who had and held strong social

values and are willing to step out and take a stand for those values and try to preserve such values for future generations.

This Awareness indicates that there is a showdown coming, and those social values will be a key force in the middle of that showdown.

INTRODUCING WILBER !

A LITTLE PEEK AT LIFE ON VEGA (And Particularly Planet Number 22)

QUESTION:

Some questions from B.A. in Florida. I'll read her statement because there's a number of question in it, and I can go back and re-ask them if Awareness suggests.

She writes: "I would like to ask a general question for Awareness, if you deem it appropriate, please, in regard to the constellation Vega and in particular planet No. 22. Little information is available on these entities, yet as I understand it, they are and have been involved in helping planet earth evolve for eons of time.

"Would it be possible to enlighten us as to their belief systems, the physical aspects of these beings, and their planet; the atmosphere, vegetation, water bodies, cities, et cetera? "Are their technologies as advanced as say, the Pleiadians?, or much more so? Pleiadians, who we know a good deal about from Awareness, Billy Meier's books and tapes and so forth.

Is their mode of travel more advanced than that of the Pleiadian beamships, which can be almost instantaneously traveling from one star system to another, et cetera? Would it be possible to compare the differences as to frequencies and evolvment, their general nature and so forth with that of Sirius, Arcturus, and Pleiadians? About how many Vegan volunteers are on planet earth serving at this time?"

And she writes: "I would be so grateful for any information on this subject that can be given. I do so appreciate the incredible fountain of knowledge given with such love and dedication from Awareness and the members of CAC."

There's a lot of questions in that statement!

COSMIC AWARENESS:

This Awareness indicates that there are enormous areas of focus necessary. It does not appear there is sufficient energy for all of this at this time. This appears to be something that would require an entire reading at the minimum. This Awareness indicates that *It* can give *some* information at this time.

This Awareness indicates the planet No. 22 of the Vega constellation as that which is the center for the main part of the civilization of the Vega constellation. There are other planets in the system that have life, but this appears to be the major center from which most of the policies and culture and civilization originates.

This Awareness indicates that the entities have been a staunch ally with the Pleiadians for eons of time and have been very much involved in helping to stop the spread of the Orion/Draconian threat in the galaxy. The entities are well aware of other galactic civilizations and have sent a large number of their people to reincarnate on earth.

Many Vegans Have Reincarnated on Earth

These entities being programmed for certain tasks often forget their origin, and therefore are not as effective as they would desire, but the entities often do bring back enough information as to be of considerable value in their appraisal and research of the earth and its particular nature and needs. This Awareness indicates

the Vegans have a kind of dedication to help free the earth of some of its negative karma, but also they have grown weary of losing so many of their own on earth to those dark forces and especially when they don't see the earth people changing that much.

This Awareness indicates they simply cannot comprehend why earth people are so controlled by the dark forces, why they can't throw off the dark forces and make an attempt to free themselves. This Awareness indicates by sending their own to reincarnate on earth, they have begun to gather a greater understanding of what it is to be an earth person.

Spacecraft Pilots Comprise Governing Council

This Awareness indicates that their own culture is guided largely by a council of several hundred entities, many of whom are what might be termed military by your terminology. These are entities who are pilots for the spacecraft used. Many of these entities are not military, but of domestic nature, representing certain of the domestic needs of the planet and star system.

No Money System on Vega

This Awareness indicates that they have no money system in Vega, but they do have a kind of evaluation system wherein every entity is evaluated, in other words, given a certain value, and the entity can alter that value by proving oneself more capable or less capable and more worthy or less worthy, and the value attributed to the individual helps to determine what kind of reward system is available for that individual.

Most of the Work is Done by Machines

Most of the actual work is done by machines that operate from solar type energy and from wind and water and there is some human involvement in guiding these machines, but in general there is very little heavy duty work as is found on earth.

This Awareness indicates that with entities being allotted certain personal value, wherein the council, through its organizational structure, passes on to each individual a particular evaluation that may change from time to time. The individual's personal evaluation determines how much of society's wealth is allotted to that individual in accordance with what he or she has earned as a citizen of the society.

How their value system works

In other words, it is not how much they work, it is how much they are *worth* to society. If they are seen as a person who contributes or as one who is potentially a contributor, they are given a certain number of evaluation, and the child, in other words, who may not be productive at all, is seen as potentially valuable as a productive member of society, so the child is allotted a certain number of value, and this increases as the child develops, as the child is educated, as the child takes on responsibility.

This Awareness indicates that every individual is aware from childhood what their particular value is, and they generally watch their value rise as they mature. This Awareness indicates that when an individual becomes destructive or negative in his or her behavior, the individual's value begins to change and entities tend to focus on such entities, to work with them, to counsel them, to help them reverse the trend so that their value

begins to rise. This Awareness indicates there is no cash or money transactions. There can be gifts between entities and there is no taxation. There is simply the record-keeping of one's evaluation and the record-keeping of products and services and goods that are attributed or given to individuals according to their value.

Being given a certain amount or allotment of society's products does not detract from your value for the next year. Your value may remain the same; your value may diminish only when you cease to be as valuable to the society. This Awareness indicates in other words, if you become incapable of doing certain things through no fault of your own, your value will drop only slightly. If it is because of your own misdoing that you no longer are able to contribute to society, then your value drops further.

How the Handicapped are Treated

This Awareness indicates that in other words, a handicapped person may have high value, but if the handicapped person refuses to contribute anything that he or she is capable of contributing, the value would drop further. In most cases, there is very much compassion for those who are handicapped and these entities receive enough help to keep them sustained or give them opportunities for improvement in their lives, to overcome some of the handicap that they face.

The music and Culture of Vega

This Awareness indicates that as for culture, some of the entities are involved in artistic pursuits and expressions, others in engineering pursuits. There is music on this planet. This Awareness indicates the music is somewhat quite different from the earth in that the tones and melodies tend to go much longer. A typical song would be approximately 30 of your minutes long, whereas on earth the typical song is three or four minutes long.

This Awareness indicates that the typical song on Vega might run 30 minutes with interspersing of words here and there to express throughout the song different lines of story or thought, while the music continues for approximately 30 minutes. This Awareness indicates that in some cases these songs will go much longer. These are more likened unto special productions. In other cases, they play in the background when entities are at meetings or are at special assemblies.

Their Dance Similar to Tai Chi

This Awareness indicates there is dance, but the dance is not as much of a repetitious patterns as found on earth, but is very much like spontaneous Tai Chi, or movements that are not so repetitious as fluid. There is much fluidity and much improvising in the common type of dance. Although the dance has changed many times and there are different types of dance in different areas, the general common dance of this time tends to be more likened unto many people doing Tai Chi without anyone following any one else's pattern, if you can visualize this.

The Council Govern from Gigantic Table

This Awareness indicates that of course, there are design engineers, who make furniture, who make homes, who make machinery. This Awareness indicates

that one of the more outstanding features is the gigantic table around which the council sits. It is a table that would take up approximately one fourth of a football field. The entities are far apart from each other, but each entity has before him or her a kind of screening device that places the face of the entity speaking within inches of themselves, within arm's length on the screen so that they are easily heard and easily seen. This Awareness indicates that from there they conduct the business of the planet.

How Homes on Vega are Created

This Awareness indicates the homes of today on Vega are created by first creating a kind of electronic field. It is likened unto an invisible electronic field. Then mineral is sprayed into the air and attaches to the field, forming a covering, and this becomes the outer shell of the home. It can be of different size. It is very quickly built. It can be assembled within a matter of hours in your time. The windows are simply created from a certain device that moves the minerals away from the field of energy, leaving just the field of energy through which entities can see. Therefore, you can have a window at any place you want it, at any time you want it, and you may close it and open one somewhere else.

How Schooling Takes Place

This Awareness indicates that much of the schooling takes place at home with similar devices as that described for the table of the council, whereby the teacher's face comes on the screen and the entity sits and works directly with the teacher's face on the screen. The teacher will talk to the child regarding that particular day's lesson.

If there is an area the child wishes to discuss further, when the teacher's lecture is completed, the teacher's lecture being that which goes to all children at once; when this is completed, the child may ask individual questions about different things, and by pushing a certain button, the sub-teacher comes on screen to answer those questions of the child.

There are occasions where one-to-one relationship between the teacher and the child must take place via the screen, and there are other more rare occasions in which teachers will come out and work individually with the students.

Everything Moves on Conveyor belts

This Awareness indicates that in regard to food and food distribution, much of the food is raised outside the city's main area, but there are clusters of cities....This Awareness indicates it is difficult to explain because this is unusual. If you can visualize miles of conveyor belts that carry products, and between these conveyor belts there are domes, and inside those domes are cities, small cities, and entities can travel on the conveyor belts.

Also, food is shipped and products are shipped on these conveyor belts that run from city to city and these domes fill up the space between the various conveyor belts that run in different directions. This is common for this country. There can be numerous areas wherein these types of conveyor belt cities exist.

Domed Cities and Outside Gardens

There are also areas between such cities in which nature reigns and no conveyor belts are seen and domed

cities are seen. This Awareness indicates in other words, they only automate the movement of products from the areas outside of the domed cities to bring the products in as well as areas from outside the conveyer belts which may be used for even larger forms of agricultural systems.

This Awareness indicates the orchards appear mostly to be outside of the entire structure and products are brought in from there. The more common garden products may be interspersed near the conveyer belts within the structure, and the domed cities or what may be called towns, are dispersed around the domed city so that conveyer belts run through these towns, and between the conveyer belts are gardens, and outside the entire city are the orchards and manufacturing plants and the goods are brought in on these conveyer belts.

The conveyer belts are shielded overhead from weather and environment hazards so that the products are conveyed to arrive fresh. This Awareness indicates that there are different types of conveyer belts; some are smaller, some are larger, depending on what kind of products are being sent. Some of them are even traveling inside cool or refrigerated tunnels.

Trade and Travel Between Planets

This Awareness indicates that the energy is not strong at this time for further information on this. This Awareness indicates there is trade between the 22nd planet and others in the Vega system. Much of this trade has to do with raw products. There is mining on planet Number 10 that brings raw products, minerals et cetera to planet No. 22. This Awareness indicates there are ambassadors that travel from the Vega constellations; these are more diplomatic and there is not a great amount of actual trade that goes on between constellations. This Awareness indicates that it does appear there are some areas of trade between constellations, mostly relating to the starships and technological information that is exchanged, particularly between the Vegans and the Pleadians.

The Belief System of Vega

FOLLOW-UP QUESTION:

Could Awareness describe their belief systems?

COSMIC AWARENESS:

This Awareness indicates these entities recognize the universe as a living being, and recognize that some parts of the universe as being more alive and more highly evolved than other parts. They recognize that some of the areas that are less evolved have produced entities that are more dangerous and unrefined and that these entities can be a threat to much of the universe.

This Awareness indicates that they believe these dark unevolved forces can be helped by speeding up their evolution, but they also recognize that in order to do so they first have to stop their mischief and must create so much difficulty for them that they will begin to become more cooperative with the higher or spiritual forces.

This Awareness indicates that they do not actually recognize the concept of heaven and hell or good and evil. They simply see it all as evolution and slower evolution, wherein those who are evolving much slower

are mischief-making creatures who need to be pressured into behaving in more of a civilized way.

This Awareness indicates that they believe that by putting pressure on these entities it can gradually raise their vibration to become more cooperative, or at least become less assertive in their mischief-making, and by doing so, they will slowly begin to evolve toward a more civilized culture.

This Awareness indicates the entities recognize reincarnation, although none of them uses the term. They have a totally different language for describing all this, of course. They believe each individual is a sacred offshoot of the Divine Deity that makes up the universe, thus they are all seen as sons of God, in human terminology. They see everyone as aspects or creations of the Divine God, the Creator God.

They look at earth as a place in which many of their people have reincarnated. They also see earth as a place in which people are quick to learn, quick to evolve, because there is so much suffering on earth and the lessons are so vivid and clear, when on earth.

Thus, they have a compassion for entities on earth, but at the same time they also feel very concerned for their own people who have incarnated upon earth and are suffering from actions of people on earth. They do realize that people on earth are not consciously picking on Vegans who have reincarnated on earth. They do not see this as if it were some kind of prejudice situation. They see their own kind suffering, even as mankind suffers on earth, and it bothers them. It bothers them more than merely watching the suffering of mankind.

There has been, for example, a recent consideration of pulling all of their people out of earth and back to Vega, but this idea was dismissed. They do not like the fact that the Dark Force on earth is strong and that earth people cannot seem to comprehend what is happening or what to do about it.

PHYSICAL CHARACTERISTICS AND LIFESPAN

FOLLOW-UP QUESTION:

Are their physical characteristics and lifespan generally similar to earthlings?

COSMIC AWARENESS:

The life spans are much longer on Vega. Their physical characteristics appear to be similar. They are biped, humanoid shaped, but there appears there are some difference in facial features.

Handicapped Souls Injured by Dark Forces

FOLLOW-UP QUESTION:

Awareness mentioned the handicapped entities. Is this similar to some of the handicapped entities on earth; that they come back deliberately in such a situation to make up or to learn from experiences in previous lives?

COSMIC AWARENESS:

This Awareness indicates that many of these handicapped entities who have returned to Vega have come back from missions, such as that of an

incarnation on earth and the Dark Forces have injured their soul, so that their body incarnates with a distortion.

This Awareness indicates this is one reason why they felt so strongly about bringing back their people. They did not want their souls being distorted or injured from being on earth.

This Awareness indicates there is actually very little personal karma created on Vega which would require entities reincarnate for karmic reasons. There is some, but most of it is of a very minor nature. There is no central group of people who are trying to subvert the planet in order to gain greater power for themselves. This just does not occur on Vega.

Trance Level of Readings is Improving

QUESTION:

I believe Awareness pretty well covered the questions of the entity. Does *It* have a closing message?

COSMIC AWARENESS:

This Awareness indicates the energies from these readings have been on this particular set, on a scale of 1 to 10, approximately that of 8; that there may have been certain areas within some of the readings that were somewhat vague or unclear. This Awareness indicates that this is in part due to the Interpreter's energy level and certain stress factors.

It is in part due to the fasting program that entities are into which should have a beneficial effect in the long run, but which may have had some slight detriment to the energy levels of these readings. This Awareness indicates especially near the end of the readings when energies became somewhat depleted in some instances.

This Awareness indicates that in general it appears that the energy levels of the Interpreter are on the mend; that this entity has had some potentially dangerous health problems that have affected not only his kidneys and vision, but which have also had an effect on his mental and mood or attitude states. This appears to be on the mend, and this Awareness suggests that with his continued effort to improve situations, and relieve stress factors, *It* foresees the next set of readings as being better energized.

This Awareness indicates that there was a question whether the Interpreter should even continue doing the readings, but it does appear that the energies have stabilized somewhat so that this is not as much of a concern as it was several weeks ago. This Awareness suggests the Interpreter be brought from trance. *

THE LAW OF GRATITUDE IS GIVEN.

*ED's Note: This reading was given in August of '94, a time when the Interpreter's health was recovering from a crisis brought about from his diabetic condition. During this period the energizers questioned Awareness several times about the depth of trance the Interpreter was getting into, for we felt that some of his readings at the time were rather shallow and that the Interpreter's mind itself was getting into the act.

As a result we often asked Awareness in the middle of a reading what level the Interpreter was at during that particular moment. Also, whenever Vikki gets the chance, she puts Paul on a fast if she doesn't like the way he is looking, healthwise. The fast is usually the Ultra-Clear prescribed by Dr. Shahbaz, and we all would participate in it. In this Closing Message, Awareness mentions this particular fast is helping, even though it has helped to deplete the energy of the reading. As I type this reading a year later, I am pleased to report that Paul has been working on his health and his diet and that when he appeared in Olympia for the December series of readings, he looked better, and slimmer, than he has looked in years. He had much more energy for the readings and he looks 10 years younger. Dr. Shahbaz is

keeping a close watch on Paul in regard to his health and we can all, hopefully, look forward to many more months, and possibly years of Paul channeling the Cosmic Awareness messages if he continues on this present path.

Since December, however, Paul's health seems to go up and down again and this affects his energy level. To avoid stressing him out, we have changed his schedule for doing the CAC readings from every 3 weeks to every 6 weeks, have cut the number of readings to 8 and increased his fee per reading so as not to create financial hardship for him. *It has, however, created considerable financial stress for CAC in the process, and Vikki, being the guardian of the treasury, informs me lots more often these days that there is very little treasury to guard anymore. If you get occasional letters hitting you up for donations, this is the main reason.*

The June, 1995, series of readings were once again from a high level of trance and Paul appeared in pretty good health. Awareness, however, periodically picks up on the health and financial aspects, and *opening messages often refer to the dire possibility of CAC going out of business or the Interpreter "retiring" as a channel. The latter is a possibility, but CAC has a backlog of unpublished readings that could keep your mailboxes full for another 12 years! The real question is: can the staff continue to hang in there that long?*

HOW DID SIRIANS MOVE EARTH INTO PHOTON BELT?

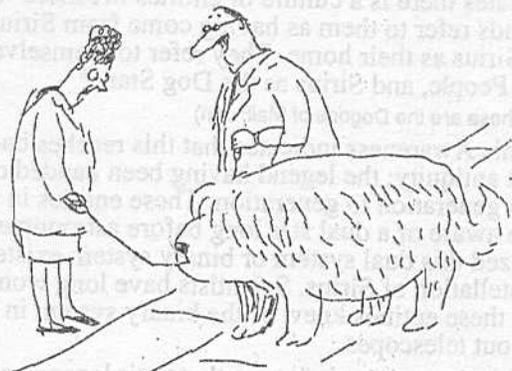

QUESTION:

Another question from JD in New York. "Just how *did* the Sirians "move earth into the Photon Belt?" This wasn't a natural event in earth's orbit? Was the Photon Belt placed in our path or what?"

COSMIC AWARENESS:

This Awareness indicates that this is an event that periodically occurs. The Sirian and earth-link is historically strong. It has been a link that goes back into prehistory. This Awareness indicates that the Sirius earth or solar system is a kind of axis where these come together periodically. The Photon Belt is and has been a natural phenomenon in the orbit of the solar system through the galaxy and has in prehistory occurred periodically.

This Awareness indicates it is not an artificial creation. It is not artificial in the sense of it having been created recently. This Awareness indicates it is an energy field in the orbit of the solar system as it moves through the galaxy. The Sirians have some capacity for moving energies and appear to be able to use certain energies within the Photon Belt to allow new energies in the solar system to be influenced by the photons in such a way as to help align the earth and Sirius, help align the solar system and Sirius in a certain maneuver based partly on the use of energies that are already present.

"Well, it's a dog-eat-dog world.
Eh, Miss Wilberry?"

There will be a slight deviation in the normal orbiting path of the solar system for it to come together with Sirius but in general, Sirius and earth tend to converge because of the Photon Belt and this converging is generally a natural occurring event with some slight assistance from the Sirian technology that has been developed in recent times to help bring that convergence into a closer harmony than would naturally have occurred.

The main contribution of Sirian technology to the solar system is that of assisting the planet's life forms to accept and adapt to the new energies that will be part of the Photon Belt influence on the atmosphere of the earth particularly as it will disrupt any types of polarized electrical fields, neutralizing these electrical fields.

These entities will help bring the new energy of photon energy, (light energy), into focus and help re-establish energies and energy technologies and applications for replacing the electrical objects commonly used on earth. This Awareness indicates that some of the old electrical appliances will be still usable, but the energy that powers them will come from Photon energies and devices.

This Awareness indicates that other electrical devices will have to be scrapped as they will no longer be of any value.

FOLLOW-UP QUESTION:

The quotation: "Move earth into the Photon Belt" sounds almost like earth was attached to a giant tug boat that moved it a few million miles out."

COSMIC AWARENESS:

This is negative. The Photon Belt is in the path of the solar system as it moves through its orbit in the galaxy. The effect of Sirian technology is to help guide the movement of the solar system as it enters the Photon Belt, using certain photon energies and technologies available to the Sirians as they help to veer the solar system in its movement so that it comes closer to the Sirian star system than normally would have occurred.

QUESTION:

When the earth passed through the Photon Belt in past history, did anything significant occur because of its passing through the Photon Belt?

COSMIC AWARENESS:

This Awareness indicates that this did help to create changes in the evolution of humankind. This Awareness indicates there is a culture of entities in Africa whose legends refer to them as having come from Sirius. They see Sirius as their home. They refer to themselves as the Dog People, and Sirius as the Dog Star. *

*(these are the Dogons of Mali: Jon)

This Awareness indicates that this reaches back into great antiquity; the legend having been handed down from generation to generation. These entities in fact were aware of a dual star long before astronomers realized this dual system or binary system existed in the constellation of Sirius. Scientists have long wondered how these entities knew of the binary system in Sirius without telescopes.

This Awareness indicates that their legends carried the information from ancient antiquity and it is this close connection of earth and Sirius coming together in ancient past that gives the tie of earth and Sirius which

has been discussed previously by this Awareness and by Sitchin's book *The 12th Planet*, where he describes Enki from Sirius as one of the creators of the modern humans.

This Awareness indicates that essentially it is that these Sirius aliens or people from Sirius are cousins to humankind. They are also in part responsible for the modern version of humanity.

In Photon Belt: Will we Read by Osmosis?

QUESTION:

JoAnn L., Cleveland, Ohio, asks: "Once we enter the Photon Belt and begin to be fully conscious humans, will we be able to absorb reading material through the process of osmosis, by holding the book et cetera, up to our solar plexus or through some other method of absorption, or will there be no longer any need for books or reading?"

COSMIC AWARENESS:

This Awareness indicates that many entities will go through this action and benefit from the absorption of information. Others will not find this available. Still others will find it available for a short time, a time that will pass; but in general, the majority of humans will experience telepathic communication and it will become more and more the natural talent of entities to be able to communicate telepathically, which can also mean absorbing information from a book telepathically.

Will we Take Our Addictions With us to the Next Dimension?

QUESTION:

Another question from JoAnn: "Once we become fully conscious humans, will we be able to easily give up our vices, such as addictions to tobacco, drugs and alcohol? Supposedly, when entities cross over into spirit with these addictions, they still crave these things on the other side, so I was wondering, will entities still have these cravings once they become fully conscious humans or ascend into a higher dimension? In other words, will entities still have these addiction problems?"

COSMIC AWARENESS:

This Awareness indicates that entities can rid themselves of addictions easily *today* with the proper knowledge of how to do so. This Awareness indicates that almost all addictions are caused by a disruption in the flow of energies to the body, and when entities have an understanding of how to straighten that energy flow in the body they lose any addiction.

Addictions are simply a compensation for the discomfort of the distorted energy flow and entities trying to compensate for the distorted energy flow will turn to something that will ease the concern or escape the feeling of being distorted, and whatever the entity chooses may become his or her addiction.

Some entities may, for example, want chocolate to ease the distorted feelings. Others will want tobacco. Others may want alcohol. Whatever it is the entity settles on can quickly become his or her form of medicine for doctoring the distorted energy flow in their various meridian paths, and by simple meditation entities can also change the energy paths so they do not

crave that which they have used as their medicine for such treatment.

This Awareness indicates that there is a program available. It appears to have a price tag of approximately less than a hundred dollars. There is seen \$29.95. It appears there may be three payments of \$29.95 for the program that describes the type of meditation that helps to straighten the meridian flow in the body for ridding yourself of addictions.

This Awareness indicates that the Interpreter has this information and can provide this as a supplement to this reading, for entities who wish to pursue it. The use of tobacco is also discussed in this. It requires approximately five minutes of meditation for the tobacco addiction. It requires approximately one minute for other kinds of addictions, and they need to be repeated periodically when there is the disruption of the energy flow.

The meditations to get rid of addictions is: The Callahan Techniques; phone: 1-800-359 CURE (call for video tapes.)

Also try Mega Systems Inc. PO Box 888, Morton Grove, Illinois 60053 or call 1-800-634-2990 for info on package of anti-addiction and anti-phobia information

Will Computers be Used in the New Dimension? (Which Industries Will be Made Obsolete?)

QUESTION:

One last question from JoAnn: "Will we be using computers in our new society, or will there be no need for computers then? And could Cosmic Awareness give a brief overview of which industries will be made obsolete following the Photon Belt experience?"

COSMIC AWARENESS:

This Awareness indicates that *It* could not give an overview of the industries that will be made obsolete because it could cover too many things. Any industry that relies upon polarized energies such as positive and negative charges, will not be able to function and therefore, these would become obsolete.

New industries will be created using photon energies to bring about new products. This Awareness suggests the first part of the question be repeated.

QUESTION REPEATED:

She wanted to know: "Will we be using computers in our new society, or will there be no need for computers then?"

COSMIC AWARENESS:

This Awareness indicates the computers will need to be altered to function properly. There *will* be some further use, depending on what stage of the new society you are speaking of. It will eventually reach a point wherein these computers will not function because of the disruption of polarized energies that are part of the computer processing and basic mother board systems which rely on the positive/negative magnetic principle.

This Awareness indicates that there is, however, the potential for computers running from photon energy, light and darkness, to become a new industry which will allow the computers to be created along different lines.

FOLLOW-UP QUESTION:

But basically, those industries that rely on working for the war machine and that type of negative thing; these would be obsolete at that time, would they not?

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates, of course, all of this is a gradual action. Some of these things will occur immediately, wherein automobiles will be stalled on highways or will not start in your driveway, but there are other things that will function for awhile, until the energies become too strong and many of these things will simply cease to work altogether.

At some point there will be introduced new types of creations using light and darkness rather than positive and negative forces.

Accept Uncertainty in these coming times

CLOSING MESSAGE:

This Awareness indicates there are many things that cannot be clarified as to all of the changes that are likely to occur. There will be many strange and unusual and new experiences for entities. This Awareness suggests that entities need to be prepared to accept a considerable amount of uncertainty during these coming times and not to be surprised at how radical some changes can be.

This Awareness suggests that it is a time in which entities must learn to accept some greater degree of insecurity as part of life. It will be for a relatively short duration, and where insecurity in regard to some things that are familiar hits the masses there will be other things that come in to give a greater sense of security and new types of technology that can be of great benefit, giving greater hope to humanity.

This Awareness suggests you focus on that new hope more than on the insecurity caused by losing much of the old ways.

She Dreams of Needles and Implants and Hires a "Karma Release Healer"

QUESTION:

A question from K.G. in Delaware. She writes: "I just received my first CAC mailing after becoming a new subscriber. It is challenging and chalk-full of information. I will be studying it with interest. I appreciate the prompt mailing. I have two questions for CAC which have been bothering me as conundrums for a long time now.

"When I was a child, I had visual semi-dreams, of people standing around me, inserting a needle into my vagina or urethra. When I asked my mother, she replied, "That's just nonsense." Eventually the nightmare went away, although I can still see the visuals. This scared me tremendously as a child.

"Recently, out of sheer fear, I paid money to go to a "Karma Release Healer", who, using a crystal layout and presumably a trance state "released" implants in two sections which she claimed to have been put there in the present life and/or in past lives by entities desiring control.

"These implants take various forms she said. Like for example, cups over the chakras, crystals/ rods through the neck, and pituitary areas, (some kind of) yokes, and more. During the second session she said she "saw" two implants released from my ovaries. She said they were from this life from extraterrestrials; that they looked like burdocks, that the metal was shiny new and the center

was crystal". (She drew an illustration of it: a circle with what looks like fishhooks going all the way around the outside of the circle).

"Now the reason I went to her in the first place was because of a fearsome dream recently in which I saw an implant of steel and some cryptic message about "the missing piece". I am experiencing some difficulty, as you can imagine, in putting this all into perspective. It is hard to know just what the reality is here, and if any is linked together. On the other hand, was the karma release healing simply another money-making scheme that has nothing to do with real implants?"

"Lastly, is there any possibility that said implants were for the good and weren't or shouldn't be removed for Light-workers? I am confused and baffled. Are my questions clear enough for elucidation? Thanks ever so much."

COSMIC AWARENESS:

This Awareness indicates that there is seen no actual implant having been put into your body; this in reference to physical implants. There *is* seen the activity of a kind of psychic ritual of removing these imaginary implants as a way of relieving the subconscious of certain anxieties. This Awareness indicates that it appears that this activity or ritual in removing imaginary implants of a psychic nature does have a certain small degree of benefit for some individuals, even if they have not had real implants in them to be removed, because it helps to alleviate the anxiety that they may imagine.

It is likened unto having someone, who, under hypnosis is told that "You have a huge sore on your hand and it is a terrible sore. It causes you great pain." And if the person under hypnosis feels that pain or feels that sore, it can still be felt post-hypnotically, after the entity returns- to normal. If, after several years of an anxiety about that hand, the entity were then put in to another hypnotic state and told "I am removing the sore from your hand! It will now be healed completely and upon awakening you will no longer have this problem." This Awareness suggests that this would indeed be removing the imaginary sore, even if the sore did not actually exist in a physical sense, and the entity's psyche would be free of the anxiety associated with the imaginary problem.

This Awareness indicates that *It* does not see that you actually experienced the problem that created anxiety. *It* sees that there were some experiences that occurred to you outside of the physical body when you were; this appears to have been prior to this lifetime, prior to entry into this lifetime; whereby you experienced some type of vicarious medical procedure.

It may have been associated with something that occurred to you before entering into the physical body of this lifetime, and something that carried over from a previous lifetime. This Awareness indicates that this then carried over and was experienced in a dream as a kind of memory or flashback to another time. This Awareness indicates that it appears to have had some basis in a reality other than the present reality, and this was the basis of your dream or nightmare in the earlier part of this life.

This Awareness indicates however, *It* does not see that there was any implant in this present lifetime in your physical body. This Awareness indicates that the action of going through the ritual of removing these imaginary implants may well have helped to alleviate real anxiety if not the real implants.

FOLLOW-UP QUESTION:

Then it's possible that in a previous lifetime she could have been subjected to experiments by the Greys or other types of aliens?

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates that it is possible this occurred on a different dimension prior to entering into this plane in this lifetime.

QUESTIONER:

Because that sounds like the sort of thing I've read they do.

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates however that the entity may have experienced this in a different setting not involving the Greys at all, but some other type of beings.

IS AWARENESS GOING TO SPLIT UP LIKE AN AMOEBEA?

QUESTION:

A question from R. P. in Colorado. It's sort of a strange question. He writes:

"This question I am asking here has to do with a concept dealt with in an off the wall book I read. I feel it was based on a lot of speculation, like what I do myself when I try to make sense out of all the fragments of information available. The gist of it is that we are going through all this experience of separating from the source; you, Awareness, while on earth, so we could be "inoculated" in order to deal with the real thing: real separation, possibly forever.

The idea, Awareness, is that *you* are going to split, something like bacteria do. You want to explore areas that are not accessible to you through the process of expression or swelling up like a balloon. I know this sounds kind of weird, but is there anything to it?"

COSMIC AWARENESS:

This Awareness does not have any idea as to what you are referring to. This Awareness indicates that it appears to be the concept that this Awareness is going to split into separate parts like an amoeba might split into two parts. This Awareness indicates that it appears that this Awareness has *already* split into umpteen zillion parts in order that so many parts could be found everywhere present in this universe.

This Awareness indicates that every human face is an aspect of this Awareness. Every creature, great and small is an aspect of this Awareness. This Awareness indicates that all of the so-called splitting is but an illusion, and the consciousness of all things glues all things together as a Universal or Cosmic Mind, and therefore there is no split, there is no way whereby things may split, even if those things may form into lumps and bodies and globules having individual names or faces or appearances. They are all still part of that Universal Consciousness, regardless of what eyes they look from, or what face they appear behind.

This Awareness indicates that perhaps the questioner can better understand the question and rephrase for further elucidation if this is not sufficient.

QUESTIONER:

I think that's pretty clear. Evidently what he's worried about, when he says "so we could be inoculated", I suppose he means that we're getting used to the idea of a possible *real* separation, possibly forever, from Awareness.

COSMIC AWARENESS:

This Awareness indicates there is *no way* of being eternally or totally separated from this Awareness. Those few entities who lose their identification with the spiritual realm or spiritual essences of their being may move into a kind of dull spiritual existence which this Awareness has described as Cimmeria. It is a kind of seething unconsciousness that has no identification, but even this is to some degree a portion of this Awareness and is capable in time of being regenerated into the creative stuff that can be used for new creations of higher consciousness and beings with higher consciousness.

This Awareness indicates that as energy cannot be lost in the universe, likewise, consciousness is never destroyed totally, but will move on through time and gradually evolve into higher frequencies, given sufficient time and sufficient energizing, and therefore, all of this "whatever" that exists within the universe is part of this Awareness, and all beings great and small are part of this Awareness, and every human face is part of this Awareness and therefore, to think of separation in an absolute sense is an illusion and true reality or ultimate reality has no place for ultimate separation.

There is no such thing in ultimate reality. The two are mutually exclusive. Separation occurs *only* in the world of illusion. The world of ultimate reality contains everything that is. Nothing is left out or separate.

A DIFFICULT DECISION: WHETHER TO LET THEIR CHILD LIVE OR DIE

QUESTION:

A question from B.K., in South Dakota. He writes: "I have an eight-year old severely disabled daughter. She was born with most of the rear of her brain gone, but other than an ear half-missing is normal physically on the outside. She is now in a hospital, but we have custody of her and see her often and bring her home as much as possible.

"We had her home for about five years, but I got hurt and it's difficult to lift and care for her. She has had a lot of operations and is on medication for seizures. Anyway, we had to decide on a code for her so we put her on a "No Code", which means the doctors can't hook her up to life-prolonging machines or to save her if she dies. This was a difficult decision for us to make, but we feel she is trapped in a body like a jail.

"She feels, and we think, she thinks, but can't do anything, so we felt that if she wants to leave, she can go onto something better when she is ready. What does Awareness think of this decision? We are not asking for absolution or anything. I am 99% sure about this decision and will pay whatever karmic price I have to not to see her suffer, if there is any suffering, but I would greatly appreciate Awareness's opinion on crippled children and "No Code." Thank you."

COSMIC AWARENESS:

This Awareness indicates that essentially, what you have chosen is to not interfere with fate or life or that which is natural law in this instance. This Awareness indicates it is likened unto saying "Let the Divine Powers take care of this entity, in accordance with Divine Will." This Awareness indicates that were you to interfere and put your own will into the equation, you might experience at some point the occasion of having your own personal will affect a circumstance in which she is given some treatment or special handling that would prolong her circumstances, whether for good or ill, and you do not wish to take on this kind of power over this entity's life.

You essentially have accepted the Will of God in the life of this entity and are willing to allow it to occur. This Awareness indicates that it is not something that would accumulate karma for you of a negative or positive direction; it is simply an abstinence from any involvement. If you were to act in a way of prolonging the entity's life in some circumstance in the future and things worked out well for the entity, then you might hopefully acquire good karma, but you have no way of knowing whether this would occur or whether your interference might cause the entity even more suffering in the future, and therefore cause you negative karma.

This Awareness indicates, however, it appears that your own karma is not the issue anyway. Your concern is with the entity's welfare and you want to make sure you do not tamper with Divine Will.

This Awareness indicates *It* does not see any reason to be concerned or apprehensive over this approach. If there were some way to assure the entity's improvement in terms of her life situation and you were negligent in doing so, this would be of a negative type of behavior, but this is not the case in this particular instance.

This Awareness indicates that it is obvious you *do* care for this entity. You care for her enough to be able to give up the entity if it is within her own will to leave the earth plane. It is not something where you would hold onto her and keep her in a suffering state, if that became part of the equation.

This Awareness indicates therefore, *It* sees no reason for you to feel any concern for your decision. All you can truly do is trust in the Higher Forces to make her life more wholesome and worth her time and energy while she is here, hopefully giving her what she needs to fulfill her reason for this existence at this time.

"THE WILBER" Guards the CAC Office From This High Vantage Point Above Vikki's Desk

PAYING SOME MOTHERS TO GET STERILIZED: A GOOD IDEA?

QUESTION:

There's a controversial Bill going through the Washington state legislature, right now in session, in which they would offer money to women who have had babies with what they call the "fetal alcohol syndrome", and other types of babies that are born from mothers who are addicted to alcohol and drugs, and they bring forth a permanently damaged baby. The Bill states that the state would pay them, the mother, ten thousand dollars, if she has had one of these babies, if she will submit to being permanently sterilized.

Thus, she would no longer be having babies that would have to be supported by the state, which figures in the long run they would save the tax-payer many more thousands of dollars than the ten thousand put forth. Immediately, an outcry came that this was a violation, that this would be a violation of the woman's civil liberties, and the women's group argued that what if she got over her addiction ten years down the road and wanted to have babies again? I'd like to ask Awareness what *It* thinks about a law like that. Is it a violation on any level if the mother herself makes the decision?

COSMIC AWARENESS:

This Awareness indicates that it is the creation of temptation for mutilating oneself in order to gain some kind of reward of a temporary nature. Whether this is a violation or simply an argument or bargain being offered is truly questionable. For one entity who later regrets having accepted the bargain, it would be viewed as a temptation and violation. To another it might be viewed as very beneficial to her.

To others who might have to support the deformed or inadequate child for many years, it is seen as perhaps unfair that this entity should be allowed to have babies, if she is going to do so in an irresponsible manner, and this would be seen as an offer to express a responsible approach to the tax-payers.

This Awareness indicates that depending on which way entities wish to view the situation will determine whether it is seen as proper or improper. There are some things that may be seen as right for one, but violation for another, even as the one is helped, the other is hurt. This Awareness indicates it is not an ideal situation. The ideal situation is that which occurs when all involved are benefited and none are hurt.

Unfortunately, not all situations can be ideal. This Awareness indicates that therefore, it is a situation that has some merit on the one hand, and has some demerit on the other hand. This Awareness reminds you in other countries, such as in the country of India, there are also different types of problems that are of a similar principle; wherein, for example, a child is born healthy, but the parents of the child have no way of making a living and cannot feed the child, so they determine to make the child part of their income-producing equation and will cut off the arms of the child and stand on the corners of the streets begging for money in behalf of the child.

This allows the child to have food, and allows the family to have food, but at the expense of the child's entire lifetime: The child resides in the body with no arms. This is a very common practice in India today, and anyone having traveled there will witness having seen these beggars.

This Awareness indicates that in putting this image forth, entities might see a similarity wherein the economics becomes the key factor and becomes more significantly important than the humanitarian aspects of the equation. This Awareness indicates that until entities get beyond the economics, or until the economics becomes adjusted for society to such a degree that entities are no longer excessively concerned over economics; this kind of decision making will probably continue to be part of the social fabric of various societies.

FOLLOW-UP QUESTION:

Wouldn't there be heavy karma involved in the case of the parents in India, or is it totally the motive that would determine it, for chopping the arms off of their child?

COSMIC AWARENESS:

This Awareness indicates that there would be karma involved. This Awareness indicates that there are unions of beggars who consider these situations as being privileged, wherein they are part of a beggar's union and own certain corners, and anyone who enters into their territory will be driven out by the beggar's union, and these people consider this and their particular sympathy-grabbing children or illness or ailment or handicap as being part of their trade.

This Awareness indicates there is little that can be done to stop these entities from this action under the present type of culture. This Awareness indicates that indeed, it is a heavy karma for the country as well as for the individuals involved.
