The New Philosophical Revolution

**A Growing Awareness of the Jesus Myth and the Truth About Aliens
Is Starting to Bring Forth Incredible Changes**

(CAC General Reading November 9, 1990)

THE NEW PHILOSOPHICAL RENAISSANCE HAS BEGUN

OPENING MESSAGE:

This Awareness indicates that entities are now living on the brink of a new philosophical renaissance in which new concepts and ideas relating to life itself will spring forth; that this will come to be more common as the millennia approaches.

This Awareness indicates that in the late 1800s and early 1900s, as psychology began to take hold of human thought and open new areas of exploration into the mind of mankind, this will be a time in which consciousness itself will be explored and the exploration will question many of these long-held beliefs of humanity to bring new understanding and new ideas to light.

This Awareness indicates that even today this has begun. This Awareness has given entities information regarding the nature and presence of aliens and has given references to books that point back in history in an historical context to times long forgotten, whereby the origins of religion can be re-examined. This Awareness suggests that entities now consider several other books which are on the market that explore religion in light of the alien presence and alien involvement in human affairs, past and present.

New Books for Those Daring Enough to Seek the Truth

This Awareness indicates a new book by Zechariah Sitchin called Genesis Revisited which brings in the Biblical accounts of alien visitations in the past; that this book tends to bring together much of the information that Zechariah Sitchin brought forth in his earlier works but applies it in the context of Biblical research.

This Awareness indicates that another book, Gods of Eden, by the entity Bramley as one which helps to fill in much of the mystery of humankind in regard to the early origins of humanity and humanity's relationship to the alien visitors to this planet and how these custodians of the planet and of humanity to set up a priestcraft and secret organizations that would direct and lead mankind into certain historic paths and civilizations to develop to the place where mankind is at present.

This Awareness indicates that this includes the various old secret organizations such as masonry. It also shows how the custodian, alien custodian influence ties humanity's history in with the CIA and KGB and other more modern secret organizations.

This Awareness indicates that still another book on the market at this time which relates to religion and alien presence is that book Extraterrestrials in Biblical Prophecy; that this book explores the Bible carefully and thoroughly in regard to alien or extraterrestrial contacts, looking at it from a totally unique position, different from that of most clergy or scientists or historians of the past who have studied the Bible.

This Awareness indicates that in looking at these books, one will have a new understanding of the true nature of human past as given through Biblical chapters and ancient writings and historical records. This Awareness indicates it will have a profound effect on entities' previously held belief systems but entities

cannot continue forever to ignore reality. This Awareness indicates that those who are daring enough to seek truth should find these books to be absolutely essential in their search for truth.

This Awareness indicates that the *Cosmic Awareness Communications* organization has these books available.

HOW COME ALL THE BOOKS ON ALIENS AND BIBLE RIGHT NOW?

QUESTION:

Awareness, what is the reason, after all these years, suddenly all these books examining the alien connection with the Bible and early history, suddenly come forth? Were these deliberately suppressed in the past?, or was it like the telephone: when its time came in consciousness to come forth, it was invented by several entities all about the same time. Is this info on the alien connection another example of an idea that needed to come forth at this time?

COSMIC AWARENESS:

This Awareness indicates that the information has long been available. There have not been entities with sufficient interest or curiosity or courage and daring to dig deeply, devote their time and energy to uncovering and assembling the information so that it was presentable in a way that would be acceptable to the public until recently. Zechariah Sitchin as a key figure in this action. William Cooper as also a key figure in bringing forth the hidden side of the UFO phenomena to allow entities to discover some of the realities that had previously been hidden, enough so as to cause entities to look more deeply at the presence of these entities in accordance with their game plans and historical connections with earthians and with past history on earth.

This Awareness indicates that others have picked up and brought the work done by Sitchin into further consolidation for easier reading or for a different point of view. This Awareness indicates the Bramley book has much that relates or parallels the work of Charles Fort, but goes back in history further than did Fort. This Awareness indicates that there were, because of Sitchin, entities who, having an interest in Biblical history, decided to explore further into the past history of visitors from out there or from up there, in relation to mankind's history and to do so with an orientation to Biblical records, and this as that which was the natural next step in the expose of such information.

It would be only a matter of time before someone did so. In fact, it is probable that there will be numerous books of this nature being released. This Awareness indicates that there will be further books released along these lines; some will become more and more simplified, some will be more scholarly, and depending on one's own personal preference, either the scholarly works or the simple explanations, entities will have many choices during this decade and into the next.

The Idea of Space Travel Till Now Was Only In Fantasy

This Awareness indicates it has only been in the last couple of decades that the concepts of space flight has even seemed to be a possibility and therefore, such ideas would not be given much credence by intellectuals, nor by the public, so in that sense, the timing would not be

right in terms of finding an audience or market for such information. It is only now that entities recognize the potential of flight between solar systems and galaxies as being a remote possibility, and as having the potential for answering questions relating to humanity's past history..

This Awareness indicates that at the beginning of this century, the average individual perceived the earth to be the foundation of all creation and the starry sky to be but a covering out there for the earth, an extension of the earth, like a ceiling above the earth. This Awareness indicates that there were no doubt, scientists who understood the nature of the starry sky in a different way, but the average person saw the land as the solid floor of the creation and the sky as but a domed ceiling and there was not the right atmosphere for entities to understand or even dream of entities coming from out there to earth in any way other than through fantasy.

This Awareness indicates that the concept of visitors from Mars became a more realistic possibility after the Orson Welles' *War of the Worlds* broadcast on Mercury Theater in 1938. The space shots that began in 1957 led entities to realize the possibility of movement to other heavenly bodies and this opened up the mind to accept a new frontier of exploration, but even this did not prepare the mind to leap to the conclusion that humanity's origin lay in the hands of Extraterrestrials, and only in recent research by persons such as Zechariah Sitchin, Von Daniken and others, has such possibility been compiled into books that allowed entities to see a totally new picture of man's origin on earth.

Sitchin Info Bridges Gap Between Darwin and Religion

This Awareness suggests these books in this century will be viewed in the next century in the same way that Darwin has been viewed in this past century; that there is more reason to accept the new theories than there was to accept Darwin, and also the new theories help to substantiate, to some degree, Darwin's evolutionary concepts, while adding the new ingredient of genetic engineering which he did not consider, and yet these new theories also bridge the gap between Darwin and religion and allow answers to both enigmas and to questions left by both religion of the past and questions Darwin could not answer..

Why Awareness Waffled on Religious Questions In the Past

This Awareness indicates those who begin to grasp the total picture that is revealed from this information as presented by the works of Zechariah Sitchin, the *Gods of Eden* by Bramley and the similar books relating to UFO and Biblical history, will begin also to realize why ten or fifteen years ago, questions asked of this Awareness regarding religion and details of religion were not answered directly by this Awareness, or whereby this Awareness would preface answers by stating: "within the context of the question" or "within the particular framework or frame of reference from which the question is oriented, the response is", and so forth.

It could not answer questions that were accurately answered, in all truth, when the questions were being asked from the frame of reference that was totally out of context with truth, and *It* could not get into the full story and the truth of the matter without some body of

information to point to for entities to explore further to verify the information this Awareness might offer. This Awareness indicates that were *It* to have indicated much of this ten years ago, the membership would have most likely found it unbelievable and so incredible that they would have canceled their membership.

This Awareness indicates that even the reading referring to Jehovah as cloning Adam and Eve brought forth some difficulties, especially to the Interpreter, when it was used in court against him to suggest he was blasphemous and the head of a cult organization: this in reference to Jehovah being a space renegade from Orion. This Awareness indicates that there is much that can be asked. There are times when this Awareness simply does not see the benefit in answering every question that is asked, because in some cases, it is like opening Pandora's Box. Too many further questions and too many emotions would be riled, from questions asked: It could lead to excessive disturbances in some cases.

Not Very Much Is Still Left Hidden from Consciousness

This Awareness indicates the release of information regarding the conspiracy surrounding the creation of money and the manipulation of nations and people through the use of money and secret organizations: that was one of the great conspiracies. The UFO/religion conspiracy as being another, and this now also as having been opened, with most of the information released. This Awareness suggests this approximately 90% released, and a connection between the UFO and religion information and that of the international banking conspiracy has also been touched upon to some degree.

Mark of the Beast Information May Come Later

There is not now much left that is hidden from those who have received the messages from this Awareness, in regard to those secret conspiracies on earth. This Awareness indicates there may be such things as state secrets and plans of which this Awareness is not concerned about, and there may be some scenarios of the future that will be of concern to the membership. These potential scenarios that can affect the average individuals are those which entities may yet wish to gain more understanding of, but this Awareness is not intending to reveal these until they are already in movement, so that entities are not energizing the Mark of the Beast, for example, any faster or any more than would naturally be energized by those who might perpetrate this action.

If It begins to manifest and if the Interpreter is still channeling, this Awareness will assist or use the Interpreter to give information regarding this to warn entities or to alert them. If the Interpreter is not still channeling at that time, this Awareness will give the information through others. Most entities who have received and read information from this Interpreter from the time of the *Gathering Storm* and of the alien information, will already be aware enough to spot the movement of energies that would lead to the situation in which the Mark of the Beast would begin manifesting.

As has been given, it would occur at a time of national tension or emergency, with entities being told to register at their post office for a national number, and in all likelihood, this would be accompanied by an economic

crisis This Awareness suggests that there may be also other critical situations that would be used as an excuse for these actions such as a war or other national security crisis.

This Awareness indicates that at present *It* is suggesting that entities view the '90s as a time in which a new renaissance in philosophy takes place, wherein entities become aware of that aspect in consciousness that comes under the umbrella name of metaphysics. It will not be the old metaphysics that entities are often familiar with regarding some of the more hierarchy-type beings, so much as a philosophical recognition of consciousness as the origin of creation, and matter as a manifestation born out of consciousness, and with this understanding, entities will begin to recognize the power of mind over matter, and will begin using mind to affect matter.

Entities Will Gain 90% More Use of their Brain

This Awareness indicates that this will give humans the use of the other 90% of their brain, that part that is normally dormant. It is this mind over matter aspect of human consciousness that allows the human its greatest potential. This Awareness indicates that it has long been recognized that humanity only uses about 10% of its brain. The aliens are quite concerned about this phenomena, that the humans are not really using their full potential, and have a certain respect for humans, a fear that they may wake up to discover who in fact they really are, and discover that they have this power of mind that can affect matter.

This Awareness indicates that essentially this goes back to the early creation of Adam, the second Adam or Adam 2, not the Reptilian Adam, but the Adam that was created after the Sirius influence, in which the genetic alteration giving the human the qualities of the Sirius creator, so that with each passing generation the Reptilian qualities receded as the Sirius qualities became enhanced; this leading to the rapid growth of the brain to its present potential and to its present ability to make decisions and to its present potential to be used for full power, to have manifestation over matter.

The New Renaissance: The Great Awakening has Begun

This Awareness indicates the human brain being such as to have the potential for greater power than it is ever used for, is much likened unto having a great powerful computer on which entities simply play arcade games; they have not yet learned or programmed the computer with applications to do all the things it can do. With new additional programming, its potential becomes magnified enormously. This Awareness indicates this realization of the potential that humans have begins the new renaissance and the great awakening of consciousness that will later manifest in the next century to allow humans to transcend matter and to move as mental machines out of the time and space vortex or entrapment and move into new realms of existence.

It is in this manner that entities will move beyond physical entrapment and physical embodiment and transcend the body in the next century. They will move into other realms and discover in time that it is possible to come back to this realm without being entrapped. Humanity then will be able to traverse these many

mansions in consciousness, having full use of consciousness that was given to humanity by the Sirius gods

THE DEAD SEA SCROLLS COVER-UP

QUESTION:

In regard to the ancient information and the alien connection coming out, it's been approximately 45 years, I believe, since the Dead Sea Scrolls were discovered, and I have read several places that these scholars have decided there was a cover-up going on over the years; that very little information on these scrolls was released.

John Allegro, who wrote one of the few books on some of the earlier information, allegedly committed suicide in frustration over the authorities who were keeping the scholars from having access to these scrolls. Other information said that some of these scholars were mysteriously killed or died under mysterious circumstances, so it appears there was some kind of cover-up.

My question is: Who was behind the suppression of the information of the Dead Sea Scrolls, when there was so much excitement about them around the time they were discovered, and was one of the possible reasons because there was information of the alien connection in these scrolls?

COSMIC AWARENESS:

This Awareness indicates that this information would have shaken the churches to their very foundation. It is assumed that it would have shaken society because of the effects on the churches, and therefore, because of this threat to the establishment, many of these entities were silenced so that the information could not be released to the public. This Awareness indicates, however, that there is information slowly being released here and there.

There are copies available to certain individuals and there are many who would like to see this information released. It is only a matter of time. This Awareness indicates there is seen a book to be released soon that relates in part to this and to information that will help pave the way for further release of the information that is being hidden from the masses.

Are The Scrolls Being Allowed to Deteriorate?

QUESTION:

One report I read somewhere said that many of these scrolls are in Israel in some kind of wooden building that is being allowed to almost deteriorate; that these scrolls are being subjected to weather and further deterioration, as though the authorities want them to disintegrate and not to be researched by scholars.

Is that information basically true?

COSMIC AWARENESS:

This Awareness indicates it appears that there are some of these scrolls that have been mishandled in this manner.

QUESTION:

The information in those scrolls would not only shake up the Christian religion, it would also shake up the Jewish religion, would it not?

COSMIC AWARENESS:

This is in the affirmative.

THE MYTH AND COMPOSITE OF JESUS

QUESTION

A question from Albert M., along this line. He writes:

"I previously received an audio cassette where questions were answered by CAC... (he's referring to a tape of a session we had, where the questions were mostly his)... In the answer given, *It* stated that Jesus of Nazareth, Emmanuel, who was crucified, was a prototype. The question posed was in reference to the book *Deceptions and Myths of the Bible*, where the author believes Jesus was a myth.

"I'd like to know from Awareness if the expression 'prototype' meant that the Jesus, Emmanuel, crucified, mentioned in the scriptures, was a clone, a robotoid or a humanoid? The reason for the question is concerning the evidence that Jesus or Esu was seen in India, North America, and South America, either before the crucifixion or afterwards.

"Was Jesus, Emmanuel, or Esu, ever cloned, made into a humanoid, or robotoid in the history of his beingness on the earth plane?"

COSMIC AWARENESS:

This Awareness indicates that the term prototype was probably erroneously used. It was a reference intended to be a word describing one of the aspects or entities used to create the composite that became known as Jesus as presented in the New Testament; that the Jesus of the New Testament was a composite of several beings from various religions. When the Christian religion was first compiled under the orders of Constantine, who told the various religious sects of Rome to get together and make one catholic religion; the word 'catholic' in Latin meaning one universal religion or one composite religion, -- there were a number of religions at the time in Rome.

How the Christian Religion Was Created

They were feuding with each other, and their feuds threatened the peace in Rome. The Helios religion had a Sun God with 12 signs; this became the Son of God with 12 Disciples in the composite religion. There was the Krishna religion which originated in India and was now operating in Rome, wherein Krishna was born of a virgin, came to the earth to save man from his sins and was hanged for his efforts; this was incorporated into the story, the composite.

There was the story of Jesus the Nazarene, whose life was traced through Galilee, and in the Essene community, and had followers in Rome: this entity having been crucified. This Awareness indicates this entity also was incorporated in the story. This Awareness indicates there were several other entities, some quite well known. The name does not come clear at this time; this has been given previously through this Awareness, and this Awareness indicates there were also entities or religions based on entities of historical past, whose lives paralleled a certain type of mystery story, or mystery play (passion play) and they too were incorporated into the composite that became the story of Jesus.

The completion of the story line was achieved by the Council and the entities then were left with the need to name the Roman god, the god of this Roman religion. Many of the council wanted to call the entity Zeus. Others objected because the entity Zeus was a Greek

name and they did not want to have anything connected with Greek origins in their religion, and someone suggested the name Jesus, which was a common name of Hebrew origin which meant "neither he nor she". It would be the same as the modern day term 'androgynous.'

The term 'Christos' was a title, not a last name. Thus Jesus (Esu), or Jesus Christos became the god of the Roman Catholic or universal Religion. This occurred ...this appears to be the 2nd Century AD, or at the time of Constantine. This Awareness indicates that this may be researched historically, for those who wish to do so. This Awareness indicates there is information relating to the origin for such research presented by an entity, professor Hotema, the information available through Health Research in Mokelumne Hill, California.

Was Jesus a Starseed or Walk-In?

QUESTION:

Albert had another question in this area. He writes: "I'd like to ask Awareness if the Jesus of Nazareth, Emmanuel, which was crucified on the cross, based on the New Testament, was a "Starseed" or Walk-In? I read that it was thought he was taken down from the cross, that he was dead, but he was in a comatose state. If he ascended or was resurrected, could he have been a second walk in?"

The reason for this question is because I read that he escaped with assistance from a secret exit passage, or second opening of the cave, and traveled to India with his mother Mary, Judas Iscariot, (not the one who betrayed Jesus), and his brother, Thomas. He lived in India, married, had several children, and died there at the age of well above 100, was buried in Sprinagar, Kashmir, India. Jesus's first-born son was named Joseph. The arch-angel Gabriel actually fathered Jesus, so Jesus in this case would actually be the Son of Man, or Gabriel.

"Sananda claims that he's not the Son of God, but the Son of Man. If Jesus, Esu, or Emanuel was seen in North and South America as written, then could this have been his third walk-in?"

COSMIC AWARENESS:

This Awareness indicates this entity was highly trained and schooled in the Eastern philosophies and understood the act of suspended animation, the action of breathing in such a manner as to fill the cells with air, so that the entire body being filled with air, did not need to breathe for some time. Upon being taken from the cross, it was assumed the entity was dead, when in fact he was in a state of suspended animation, and the entity recovered from this apparent death in due time, when the cells began to require oxygen and led to his natural breathing.

This Awareness indicates *It* does not see the action of a walk-in being involved in this. *It* does see the entity as having left the area and having gone to India and into that area mentioned, to live sometime after the alleged crucifixion death. This Awareness indicates that the importance of the resurrection as that which relates to the story of the mystery schools pertaining to the symbolic death and rebirth of the ego. It also relates to earlier crucified saviors of earlier religions such as

Osirus, Indra, Zarathustra, in which a resurrection or rebirth becomes part of the mystery in the religion.

This Awareness indicates that there is a book titled The World's 16 Crucified Saviors -Christianity Before Christ, that can be very enlightening in terms of understanding the origin of the Christian story, for many of these earlier stories contain exact parallels that were later incorporated into the Christian story.*

*CAC stocks this book. Please refer to our Book Price sheet.

When Jesus was the Pilot of a Space Ship?

FOLLOW-UP QUESTION:

I believe that one time Awareness indicated the entity Jesus who was in that final reenactment of the scenario, was a pilot of a space ship. Could *It* elaborate on that?

COSMIC AWARENESS:

This Awareness indicates that *It* does not see this as referring to that entity's particular experience in that lifetime. The entity not seen as being a pilot of a spacecraft during the same lifetime in which he played out the passion play, in which he carried out the passion play on the streets-of Jerusalem.

QUESTIONER:

I believe there was a serpent painted on the spaceship.

COSMIC AWARENESS:

This Awareness does not see this. This appears to have been something in a question sent in, rather than as a statement by this Awareness, or it may be a misunderstanding of a statement given by this Awareness. This is not seen at this time as being valid. This Awareness indicates that the entity who carried out the passion play into the Streets of Jerusalem from the mystery schools, Jesus, the one known as Jesus who was crucified, this entity did have a Sirius origin, and the entity did in one other lifetime, not born as the Son of Man, *did* have a spaceship which he traveled in.

This Awareness indicates that this entity being from Sirius, lived in that different realm or world which he often recalled as being heaven and recalled his father as being God; in human terms at the time, those beings from space were called gods, and in this sense, the entity's memory of his unearthly origins were accurate. The entity having the need to carry out a mission on earth and having done so as part of a great experiment or plan that was developed in the Sirius lifetime.

This Awareness indicates you must understand there are even yet, from various other star systems, entities who choose to reincarnate on earth of earthly parents who may experience a feeling that they are not from earth; they are in the world but not of it, and their origins are in the heavens, and that they have a very special mission and this can be absolutely accurate. This Awareness indicates that this has long been occurring on the earth as part of a plan for evolving humanity toward its approach to Godhood.

Adam and Eve: Robot Clones in the Garden of Eden

The Sirius origin as having taken a particular interest in serving or helping in the evolution of mankind; the Sirius origin also as having as a symbol the serpent because of its wisdom. It is perceived as having special wisdom. This Awareness indicates that this is a also part of the myth in regard to the story of the Garden of Eden in which the serpent gave Adam and Eve knowledge or

essentially gave them the knowledge that they could make choices on their own. It was this ability to make choices that gave them the power of God, for until that time, the Reptilian creators had not given Adam and Eve any ability to make choices. They were simply robot clones, obedient.

Thanks to Sirians Humans Could Have Bables, Not Lay Eggs

The interference in the experiment by the Sirius influence giving them the choice or ability to choose, gave them knowledge and the power of gods and therefore, this was their downfall from the viewpoint of the Reptoid creators and they were then destined to suffer mammalian frailties; the act of having babies by giving birth rather than laying eggs as did the Reptoids, so that in giving birth, the woman suffered pain, and the Reptoid masters having long lifespans, perceived themselves to be immortal, whereas mammals, having shorter lifespans, were seen as mortal, and thus, the story goes that Adam and Eve lost their immortality by eating of the fruit offered by the serpent: the fruit of knowledge.

This Awareness indicates that it was the ability to choose between good and evil or right and wrong that gave them knowledge, and that ability to choose also, according to the serpent, made them equal to gods. In other words, the serpent taught Adam and Eve to think for themselves rather than just to obey the Reptilian creator. This Awareness indicates the Reptoid creator from Draco was interested in having obedient slaves, and cloned them, and intended to continue creating further clones.

Adam a Prototype: Not a Single Person

Thus Adam was not a single person, but a prototype, just as Stealth is not a single airplane, but a prototype of many airplanes. This Awareness indicates that in the future, entities may read about Stealth and think that it is a single airplane. If so, they would be making the same mistake that modern entities make when thinking back on Adam and Eve. Thus when entities speak of Adam and Eve as the first man and woman, they are speaking of prototypes rather than individuals.

The first prototype of modern man was Adam, but this prototype had strong Reptilian qualities because it was cloned by Reptilian deities from Draco and the Sirius deities altered the genetic qualities by infusing in the prototypes something that led these prototypes to change and to become involved in reproducing. Thus, the reproduction through the mammal genes that were infused into the original Adam prototype and Eve prototype: these became the genes that led to a rapid evolution into the more modern human, with its short lifespan and its individual ability to think rather than simply obey; to make choices based on its own will and perception of things.

It was this ability to think and to make choices that got Adam and Eve kicked out of Mesopotamia or that which was then called the Garden of Eden, that area in Iraq and Iran as being the area that once was the Garden of Eden, where great gardens once grew, where fruit of many kinds originated on the earth and was spread to other places. These were brought from the space ships of the Reptoids and also from those of Sirius.

This Awareness indicates that entities can read more of the origins of fruit from the Garden of Eden in the Zechariah Sitchin books. In *The Twelfth Planet* this is discussed in detail. *

*C.A.C. permanently stocks all the Sitchin books.

FOR THOSE WHO FEEL DISTURBED ABOUT THIS MESSAGE

CLOSING MESSAGE:

This Awareness indicates there are many who will feel that they have been violated by having certain of their belief values disturbed, disrupted or ripped away. This Awareness does not wish to leave entities feeling such violation. *It* wishes entities to understand that Jesus, whom many have so long seen as being the absolute savior in their lives, *was* the Son of Man, as he often referred to himself; that he also frequently spoke as the Christ or the Son of God.

This Awareness wishes entities to realize that the Christ or Christos remains as the Son of the Universal God. It is the Crystal Clear Consciousness that reflects the Consciousness of the Divine Creator and it is everywhere present, for entities who surrender to the Divine Consciousness, and thus, each entity has the capacity to become the Christ, to become Christed as did Jesus become a Christed One; that you, as an individual, remain as the Son or Daughter of Man, but the Christ can work through you and speak through you as the offspring of Divinity.

This Awareness indicates that this is the higher meaning of the higher message brought by Christianity. It is the esoteric or hidden message that is available for those who have graduated beyond the childhood wish for a Cosmic Santa Claus. This Awareness indicates that when you fully understand this, it makes more sense. It fills more of your life, and fulfills the promises of Jesus, that each entity can be the child of God.

This Awareness indicates that each entity can be a vessel for Christ, for the Christ Consciousness. This Awareness indicates that with this understanding, you have not lost your Christianity: you have transformed it with new meaning and new understanding.

The Law of Gratitude is given.

How to Find Out if Your Phone is Tapped

QUESTION:

A question from Erling G., Fond du Lac, Wisconsin. He writes: "Recently, while at a psychic meeting with my wife, another small revelation was passed around the group. It seems that a 16-digit phone number was circulated which was picked up from some other group. This phone number, which is 1073214049889664, while dialed, yields a mechanical computer voice which repeats *your* phone number, then as a report says a series of zeros, followed by a single digit.

"Supposedly, if you get a "1", you have a "Federal tap" on your line. Most people do it seems, probably due to ESS computerized features on the bulk of phone lines, I suspect. And if you get a "2", your line is clear, and if you get a "3", you have someone else's tap on the line.

I know it's true because I witnessed it tried at our meeting. Queries by other people to the phone company yielded no information, as the 16 digit number is too long even for an international number. No charge appears on home phone bills of people who've tried it, but when tried from a public phone you are billed a cost

of \$3.50. I have a few questions regarding this number."

I'll read all the questions he's got: (1) "Exactly *what* does one access upon dialing this? (Someone suggests a government satellite. (2) What was this set up for, and who is really supposed to be using it? (3) If you call in, can anyone tell it has been used by you? and (4) Am I correct in assuming that since most people get a "1" when checking this line, that the government's giant computer spy system can now monitor almost any phone in the country at any time?"

COSMIC AWARENESS:

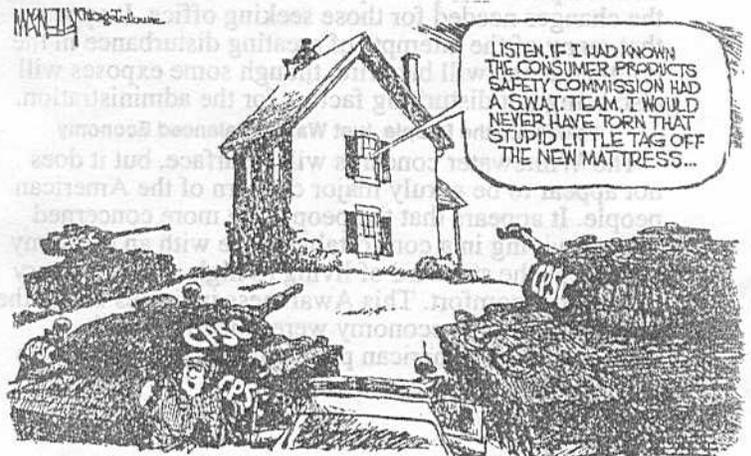

This Awareness indicates that this as NSA, National Security Agency phone number and this is similar to one that was given approximately a decade ago. After it had been released to the public the number was later changed so that it was no longer available to the majority of entities.

This Awareness indicates that it can be used by agents to tap a number and to listen to the phone calls for that number. This Awareness indicates that the messages given over your phone, even if not being currently tapped by an agent or agency, such as CIA or DEA; even if not being currently tapped, the messages from your phone go into a giant computer that can be researched for information at any later time desired.

This Awareness indicates that this was discussed approximately 10 years ago, and it should be noted that the recording of your phone calls in this giant computer are not of any great importance to you as an individual unless you are involved in something illegal or in some kind of spy activity that might be researched at a later time, because there are not sufficient personnel to listen to all these phone calls that are being recorded.

The only reason anyone would care to listen to such a phone call would be if you were involved in some kind of crime, and a research into your phone messages became critical and useful in further exploration of your activities. This Awareness indicates that do not expect this number to be valid for any permanent length of time. It would be of benefit for entities to call the number and get some momentary understanding of whether their personal phone is tapped.

This Awareness indicates it does not appear that even if your use of this number *does* occur and is noted, that it will be of any significance because there is no check on who is calling the number or who isn't. It is simply presumed that only agents who are knowledgeable of the number will be calling it, and there is no filtering device to stop anyone from using the number.

(CAC General Reading (12-11-95)

THE COSMIC AWARENESS FORECAST FOR 1996

OPENING MESSAGE:

A Spiritual Adjustment is Occurring on This Plane

This Awareness indicates there is at this time a kind of spiritual adjustment that is occurring on this plane; this was in part triggered by the line-up of planets in Sagittarius, whereby very subtle changes in consciousness of individuals is occurring, particularly in those individuals born in the signs of Sagittarius, Pisces Gemini and Virgo.

This energy will have a more profound effect on the spiritual growth of these signs than on the other signs during the coming months. This Awareness indicates it will assist these signs in becoming more reflective and more oriented to a more global and cosmic orientation or view of life in general. This Awareness indicates that it will also benefit the signs in terms of romance, in terms of career interests and in terms of travel and philosophical focus.

This Awareness indicates that from these signs, from the individuals of these signs, will come further influence to the other Cardinal and Fixed signs so that a general spiritual enhancement comes to all entities.

Economy Appears to be Stable Throughout 1996

This Awareness indicates that also, during the coming months, entities will continue to benefit from the relatively stable economy, throughout most of the coming year. This Awareness indicates that it appears the world will undergo some adjustment in Eastern Europe and particularly in the area near and around the Czechoslovakian and Yugoslavian areas in and around the Bosnia/Herzegovina areas, in which during the coming time, the gradual balancing and shifting will help to stabilize this area as well.

China Won't Interfere with Hong Kong

Also, in the area of the Far East, the Chinese influence in regard to Hong Kong can help to bring about subtle balancing of energies of an economic nature to help enhance the stability of China itself, because of the need for a good environment in the area of Hong Kong. In order to keep business flowing, it appears the Chinese do understand the need for keeping that area stabilized because of the economic value therein.

Political Maneuverings May Backfire

This Awareness indicates that the United States will undergo its political maneuverings prior to the election and there will be many disturbing factors and exposes in an attempt to disrupt the present administration, to make the changes needed for those seeking office. It appears that many of the attempts of creating disturbance in the political arena will backfire, though some exposes will also bring out disturbing factors for the administration.

Politically the People Just Want a Balanced Economy

The Whitewater concerns will resurface, but it does not appear to be a truly major concern of the American people. It appears that the people are more concerned with surviving in a comfortable sense with an economy that keeps the standard of living as high as is necessary to preserve comfort. This Awareness indicates that if the disturbance to the economy were somehow made significant, the American people would respond to this

situation more than to exposes relating to Whitewater or other scandals.

This Awareness indicates that likewise, the concepts that are usual concerns, such as abortion, and foreign affairs or foreign crises, are not seen as being as important during the coming election as in previous times. This Awareness indicates that it appears the major issue will be the current comfort of individuals in regard to economic concerns, with some philosophical concerns among those who have solid economic stability in their lives.

Rich to Get Richer, the Poor to Get Poorer

This Awareness indicates that the very wealthy are finding this to be an excellent climate for increasing their wealth. The very poor, or disenfranchised entities are finding it more and more difficult to maintain their present standard of living, and many of these entities are feeling greater pressure in an economic sense which will cause them to look around and look for a change for new ideas and new leadership, if the situation becomes more intolerable for them.

There are many, however, who can be budget butchers who would cut out the social programs because they fear these changes will deny them the crumbs needed for their continued existence and lifestyle. This Awareness indicates that others see these as costing them greatly and therefore want more cuts in the budget. This Awareness indicates that this area will also become a major area of concern during the election: how to balance the budget while attending to the necessary cuts, so that the entities do not suffer too greatly from budgetary cuts, while also making sure that others who want the budgetary cuts get some relief from high taxes. This Awareness indicates this is another area of strife during the coming year.

Manipulations to Continue to Polarize the Races

This Awareness indicates while this is occurring on the surface and in the news, there are still other areas that remain hidden beneath the surface; one being the continued polarization between the races, which is beginning to subside somewhat from several months ago, but which none the less, continues beneath the surface to be more highly polarized than most entities realize, so that there are many who could easily manipulate the races to become more openly adversarial in their relations to one another.

This Awareness indicates that there are the entities with a leaning toward the Neo-Nazi movement who have begun to increase their ranks, and there are also certain black entities in leadership positions who are intensifying their polarization against whites. This Awareness indicates that Louis Farrakhan, for example, in arguing that the reason whites kill blacks is because they want their women; this is creating an argument that could help to polarize more blacks against whites, and it does not help the racial differences and polarities.

This Awareness indicates that there are also similar speeches or positions taken by some of the Neo-Nazi types that pit the whites against the blacks with similar types of statements or inferences. All of this adds to the seething, silent or relatively quiet hostility brewing beneath the surface.

Executive Order 11000--Drafts all citizens into work forces under government supervision (slave labor)

Quebec Separation Still Not Settled In Canada

This Awareness indicates that Canada is also facing a relatively hidden conflict that shows itself frequently between the Indians and various government officials as well as in the attempt to secede from the nation, by those entities in Quebec. This was set to rest briefly during the recent election, when a small majority decided to stay with the Canadian ruling government, but is only a temporary situation, and those who want to create a sovereign country in Quebec will be continuing their work in that direction, and are more likely in the near future to have a winning vote in the next election.

Part of this is unclear, but there is deep emotional concern by many Canadians about the New World Order. They do not want to give up their independence, or what independence they still have to a New World Order or bigger government that has greater control over them.

New World Order Temporarily on a Back Burner

This Awareness indicates that while the New World Order is still on the agenda of many leaders, political and otherwise, there is a growing number of groups and individuals who are gaining strength in their effort to prevent this New World Order from ever getting control. It is still not totally decided from the events, but the New World Order has had, at least for the present time, been hindered enough that it is seen as being on a back-burner. How long it will stay there will depend on what kind of energizing comes in the next two years, for that, or against that New world Order.

This Awareness indicates there are likely to be more mergers in a business sense between large businesses. These large businesses emerging see it as a way of helping to guarantee their continued existence in view of the danger or threat of the New World Order activities and their influence on various businesses. Many of these businesses view smallness as being very dangerous under the New world Order and seek to join with other business to become greater in size in order to assure the continued existence, even if they are only part of a larger conglomerate. They see the creation of a larger conglomerate as being more likely to survive under the New World Order than single small independent businesses.

Growth of Internet Will Provide New Riches for Many

This Awareness indicates that continued development of higher technologies and the growth of the Internet is seen, whereby it becomes likened unto a secondary society or world, where many who are involved become enriched, even in a similar way that the industrial revolution created industries that grew and became very wealthy, or whereby the gold rush brought on opportunities for many entities to develop relatively large riches, even if not directly from the finding of gold.

This Awareness indicates the Internet is a way by which entities can pass information, gather information, spread information, buy and sell information, or buy and sell products over the information networks. It is a way whereby entities can find new marketplaces and it is a way whereby entities can discover and invent new ways of marketing and new ways of dispensing of the goods and production from their business.

Cheaper Computers to Put Internet Within Reach of All

This Awareness indicates that there are many plans for enhancing the Internet into the lives of entities so

that it becomes much easier for entities to move into that new paradigm or new world without great expense or difficulty. This Awareness indicates that late in January or around that time, early in the year of '96, new stripped down computers will be marketed that allow entities to get set up on the Internet without great expense and without great difficulty. The computer needed may cost approximately \$500. on the initial sales and will easily adapt to the Internet, and the businesses that entities run through those computers can give them considerable profit or allow them to find a niche in which they can begin to benefit from the Internet. It is likened unto a gold rush, a global gold rush for many entities.

This Awareness indicates that within approximately two years, these computers will be as inexpensive as \$300, and by the year 2000 these computers that are designed specifically or primarily for use in browsing the Internet will be in the hands of approximately 90% of the world's population, in all countries. This will create a totally new kind of marketing, a totally new kind of information-sharing and communication networks so that entities will no longer be isolated, and the so-called Third Worlds will be more easily connected to the more advanced nations.

Your Wrist Watch Will Connect to Computer Systems

This Awareness indicates that near that time also there will be small watch-like devices that allow entities to communicate on their watch with satellite computers that connect the individual's watch with the Internet so that regardless of where the entity is in the world, he or she can have access to any computer that is open and on line. Thus, you can be on the other side of the world, in a field, with your computer watch and dial home to another and communicate without going through a telephone. It will simply be a contact with the satellite that allows you to communicate directly with your mother, your business partner or other associates, or to look up the information on you favorite stocks or other concerns.

Awareness Suggests we Consider Getting on the Internet

This Awareness indicates that entities *do* need to begin thinking about their connectivity to the Internet for it becomes a way of the future. It is likened unto the entity, who, seeing the Industrial Revolution begin to emerge, realizing that it is something he or she will need to get involved with in order to profit and benefit from that Industrial Revolution, and that to remain apart from this is likened unto failing to keep up with the changes of a developing society.

This Awareness indicates that it is likened unto the entity who says "Automobiles are simply a waste of one's energies. Buying an automobile is costly. I will continue to use my horse and carriage for the rest of my life!" This Awareness indicates that the entity who had such an idea might fall far behind in the emerging society in which the automobile became the primary source of transportation.

Likewise, the entity who says "I will have nothing to do with computers and the Internet!", may be within ten or twenty years, looked upon as an illiterate, an uneducated member of society. This Awareness indicates that the computer may be seen by some entities as evil, just as the automobile was seen as evil, just as television sets were often ridiculed as evil, but these radios, auto-

mobiles, television sets and computers are simply tools, tools that can be used for good or for bad purposes.

This Awareness suggests that you could say the same of the hammer or the knife, or any other type of tool. You could say the drill is evil because it could drill through flesh and bone, or the hammer is evil because it could be used like a tomahawk or weapon of war, but it is simply a tool that can be used for good or for evil. A hammer can be used to build a home or to build something of great need and great value. The same may be said for a computer. It simply extends the ability of the mind to reach out for more information into areas that are not accessible without such a tool. When you can use the computer to communicate with someone on the other side of the world who is an expert or who has expert information about something, it is a way of enhancing your own mental abilities.

For a child who is sick in France, or in some other country, to have the ability through the computer for his or her doctor to contact the family doctor of the child who lives in Canada or the United States, for example, or some other country, and to find out all of the medical information related to that child so that they can proceed to attend the child's need in that foreign country, then the computer as a tool to help these doctors who know nothing of the child's medical needs, becomes extremely valuable in supplying that information.

This Awareness indicates therefore, it can be seen as a great blessing, a divine blessing for the child. You cannot call a tool "evil" just for being a tool. It is the way the tool is used that makes it good or evil. It is the use that needs to be examined for its moral righteousness or unrighteousness, not the tool itself. This Awareness indicates therefore, in looking at the future, recognizing that the computer is already a major part of the world, and that it is not going away without destroying the world itself, you might as well consider how you are going to deal with this major change as entities move into the Information Age, for there is a parallel of worlds going on that has nothing to do with walking in and out of stores.

Getting a Tailor-Made Hong Kong Suit in 3 Days

You will find yourself in the future having an opportunity to turn on your computer, turn on to the Internet, turn on to some personal tailor in Hong Kong, and turn on to some program that knows your exact size, your exact shape, and gives you pictures of clothes that will fit your size and shape so that you can continue changing clothes on the computer until you find exactly what you want, right down to the shape and color and every detail, and after you have made these pictures to suit your taste in clothing and find that "This really looks good on you!"; at that point you capture the picture, send it to your tailor in Hong Kong or wherever, and have the specific sizes down-loaded on his computer so that he can make the exact duplicate to fit your size and send it to you through one or two day flight so that within two or three days, you will have the exact suit that you tailored for yourself through the Internet, through the computer programs, at half the cost it would have been had you had the suit purchased in your own home town.

This Awareness indicates that this kind of computer shopping will become the thing in the future. Already the automobile known as Saturn allows entities to see it

in different styles on the computer and to change colors, to try out the appearance of a two-door or a four-door, and when the entities have settled on the exact Saturn that they truly admire the best, they can order that car to be made at the Saturn plant to suit their taste, and it will be delivered to them. This Awareness indicates that this kind of marketing by computer is a new way of doing business in the future and it will become more and more common as entities approach the new century.

A College Education Over the Internet

This Awareness indicates likewise, education will be given over the Internet so that entities can acquire a college education, so that the text they desire and need will be supplied at the touch of a few keys. This Awareness indicates that likewise, entities seeking entertainment will experience an opportunity, for example, to see the movie as it is being created.

How to Participate in a Steven Spielberg Movie

Supposing for example, Spielberg decides to create his next movie over the Internet and contacts entities or allows the message to lure entities into seeing his next ten movies for ten dollars, paid in advance or one dollar per movie, and he receives for example, 20 million people who want to watch his next ten movies and each are paying ten dollars.

He then begins to work on the movies on the computer. At the development of the first movie, the entities begin to watch and get bits and pieces as it is developed so that they see it in its development, and they also may be asked to comment or make certain recommendations as to what they desire in the story, so that when it comes down toward the end of the movie, they have a choice: "Would you like it to end this way, this way, or this way?" and the entity then chooses between the various endings and the story is completed in all ways with the entity getting to see the version he or she chose.

At the completion of the movie, the script is then put into movie form, with actors and so forth, or it is completed with actors at the time of the activities, then the entity gets to see the entire movie from start to finish and it has cost only one dollar of the ten, and there are nine more movies to be shown. This is likely to become the way in the future whereby movies or stories are presented, whereby books are written or whereby entities are able to find entertainment or even participate in the writing of the novel, movie or other entertainment.

International Diplomacy Settled on the Internet

This Awareness indicates of course, the entity would have the option of waiting until the artistic endeavor was totally completed before viewing it so that they would not have to experience the struggle of writing or creating the action or artistic piece. This Awareness indicates that likewise, in the future, diplomatic meetings, diplomatic thoughts and maneuvers can be worked out on the Internet, while various countries find ways to settle disputes by the dialogue on the Internet, with the opportunity for input from many different sources to help in the negotiating of such a settlement.

This Awareness indicates it is likened unto having a whole new world out there in cyberspace, in the electronic world of the Internet, and this is likened unto having a brain for the world in general. The brain being all of the computers and individuals working over those

computers all talking to each other about things of interest to them and to each other, and avoiding those areas in which there is little or no interest, so that if an entity has a great interest in the life of the Chinese rooster, he can talk to someone out there in cyberspace who also has such an interest and they can compare notes, or if the entity has a great interest in various types of coffee or coffee brews, he or she can talk to others with a similar interest, or if the entity is interested in quilts or in mining or in anything at all, whether it be sports, a particular ball-player, or whatever; entities can talk to each other and find friends on the Internet with whom to talk about these particular things of interest.

The Internet Likened Unto a Global Brain

If scientists or lawyers need to converse with others of their own kind about some particular issue they can easily locate someone on the Internet with similar interests. Lawyers, for example, have found that in a matter of an hour on the Internet, they can do research that would otherwise take them weeks of plowing through books and libraries to find the information, and therefore they are able to save time and money for many of the involved cases. This Awareness indicates that imagine how much time and energy scientists can save by having access to each other's work on the Internet. It is likened unto a global brain.

Big Brother Can Not Control the Internet!

This Awareness indicates that many entities fear if they get on the Internet they will be spied upon by Big Brother, who controls the Internet, they say. The interesting thing is that *no one* is in control of the Internet. There is no one to monitor. The only thing is that entities on the Internet monitor each other in a way that will tell you you're out of line if you do something that is out of line.

The "Flamers"— One of The 4 Types of Internet Users

There are said to be four types of Internet users. There is the Saint, who helps those who need help and who does so freely, just because they enjoy helping, and there is the Wizard, who helps on specific things where someone asks for help and they have the ability to help, and there is what is called the Flamer: the Flamer being an entity who criticizes those who are out of line.

It is said that there was a Los Angeles law firm that got on the Internet and began advertising their law firm with great gusto in areas where they should not have been advertising. This began in the late afternoon. By the next morning they had been marked with E-Mail messages totaling more than four thousand from Flamers who were criticizing them for that action of advertising improperly. They naturally did not do that again. It is the Flamers who help to keep the Internet and its integrity intact without having any particular official authority other than just being users who are critical of those who misuse the Internet.

The "Lurker" on the Internet

This Awareness indicates that the fourth type of user is what is called the Lurker. This is the entity who is just lurking around trying to find out what's going on. It is likened unto an entity who comes into a city just to look around and see what it is all about. This Awareness indicates there are no mayors, no president, no police force; there is no overseer. There are certain people who may have some specific rules about your local bulletin board when you sign on, or you may have certain

policies that are given to you by your server, just as your telephone company has certain policies that you are expected to follow when you use the telephone. A local bulletin board may suggest that you pay a certain fee every month, use the board for a certain length of time, and that you allow certain messages to be made public. There are certain things that are not so much rules as necessities for a good healthy bulletin board.

This Awareness indicates that the closest thing the Internet has to a controller or administrator is a group that attempts to keep track of how fast the Internet is growing. They do not make rules. They do not tell people what they should or shouldn't do. They simply try to monitor how fast the Internet is growing, and this is not really a kind of official controlling force. They are simply reading, reading to determine how fast the Internet is growing, and they will make reports on its growth.

This Awareness indicates in other words, it is the most democratic world there is, and entities can look at it as a global brain. There is no single computer anywhere in the Internet that is in charge. It is simply a matter of thousands of computers talking to each other, communicating to each other. There is no central headquarters. It is simply information being passed, being shared in a global fashion through electronic communication that entities can understand as they communicate from one computer to another.

It is also possible for entities to search out a particular topic and find that in going from one computer in France, for example, researching some particular king of France, they might, upon completion of that information, be shifted over to a computer in England in which a piano becomes the topic because it was named after that French King or whereby they are then shifted to another place in Germany which gives information relating to the making of ivory keys. They might find themselves then shifted to Africa and given information on ivory, and thus, they are able to go all over the world from one computer to another, from one topic to another.

The trick is to find how to stay on your focus, the focus of your own research as you travel from one place to another. That is the main object of such use of the Internet, rather than simply allowing it to divert you from one place to another while you lose focus of what you were attempting to do.

The Internet Provides You With a Global Sized Brain

This Awareness indicates that as you learn to use the Internet, it is likened unto traveling through a global brain, gathering all the information wherever available as it suits your purpose, and there is information on almost every topic that entities wish to explore. This Awareness indicates this discussion is mostly intended to give a kind of a hint as to what the future holds, and how the Internet has created a totally new world for entities to explore that allows you in your present human form to have a brain that is global in size and is able to read the brain of all others on earth who have a computer in connection to the Internet.

This Awareness indicates that it is likened unto having unlimited knowledge on every earthly topic, theory or concept that entities can imagine. This Awareness wishes to suggest that entities begin to think about

getting connected, particularly as the new computers become available and reasonably priced.

This Awareness indicates that it appears the year 1996 will become a major leap in regard to the Information Age in which entities will begin to realize the train is leaving and they better get aboard it if they don't want to miss out altogether. This Awareness indicates *It* doesn't wish to imply you have to get aboard in the year 1996, it is just that it is a major opportunity when the lower priced computers are made available and entities do need at this time to prepare their thinking, for until one's thinking is prepared, one is not likely to act when opportunities arrive.

It's Not Your Nickel When Phone Connects You to the World

This Awareness wishes to make one more comment on this. It is also an opportunity whereby in the near future, entities will discover that through the Internet they can communicate world-wide, using a local phone number that connects them to the Internet and not having to pay long distance telephone charges to call overseas, or to call across the country, because the Internet connects them. This Awareness indicates there are already entities who make these world-wide calls without paying long distance charges, paying only local telephone service and saving long distance charges. This Awareness indicates it will not be too long before the telephone companies will find that the Internet is more or less replacing them, and already E-Mail, or Electronic Mail carries more letters or messages than does the post office. The post office itself will eventually become almost archaic, or will reach a point in which it carries very little mail except for the shipment of packages which cannot be sent electronically.

EFFECTS OF PHOTON ENERGY IN 1996 (More on the Effects of Photon Energy on Engines)

QUESTION:

What does Awareness see in regard to the Photon energies affecting 1996, if any?

COSMIC AWARENESS:

This Awareness indicates that it appears the energies will be stronger in '96; that there have already been some slight hints of energy in this regard. This Awareness indicates that later in the year of '96 the energies are seen to become stronger.

This Awareness indicates that *It* wishes to make a clarification on a certain point that many have expressed concerns about; the point being that certain statements about electrical engines, and gas engines as being made obsolete after the Photon Belt has come to full influence; these statements are seen as being erroneous, in that after the Photon Belt has had its full force and influence, the engines will actually work more effectively, more efficiently and will run cleaner after this so-called "Null zone."

Therefore, entities who have been concerned about the engines being destroyed from the Null Zone need not concern themselves. The engines will again be workable after the Null Zone has concluded and the engines will be even more effective and efficient.

Are We on the Brink of a Major War?

QUESTION:

Mary Anne H., of Cleveland, Ohio, writes: "Can you ask Cosmic Awareness if we are on the brink of a major

war that will involve our country? I seem to be picking this up a lot in my dreams!"

COSMIC AWARENESS:

This Awareness indicates that this concern relates probably in your dreams to the situation in Bosnia whereby American troops have been sent to the area in an effort to secure peace in the area, and there is some potential for this to get out of hand in a way that could spread.

The Nostradamus Prediction of a Middle East War

This Awareness indicates that in early Nostradamus predictions, there was prophesied that out of this area of the Middle East would come a leader who would wage war and it would spread into the Mediterranean and eventually into Europe before the leader would be stopped. This Awareness indicates that this leader was described as having a blue turban.

This Awareness indicates that this is one scenario. This has been energized through the publication of that book and of many entities who have read it, but it does not necessarily mean that this is the way things will go. This Awareness indicates there is also the question of whether or not this book and the writings actually were those of Nostradamus, for there have been numerous articles and books reported to be the last predictions or recently found predictions of Nostradamus, to the point where the man would have had to write enormous amounts of information for all of this information to have been actually his.

This Awareness indicates from the viewpoint of this Awareness, *It* does not recognize this book as actually having been written by Nostradamus, though it does appear to be similar in style to his writings, yet the information having been published in a book has been highly energized, especially in Europe, and the energizing of any concept creates a kind of road map for that concept to occur. It creates a setting in consciousness so that the concept might manifest, if energized enough.

It is most likely this energy that you have picked up on in your dreams. This Awareness suggests, however, that there is likewise an energizing of more recent times by officials and entities who have certain strong focus and opinions that the use of United States troops in the area, the use of NATO troops under United States influence can prevent the continued fighting in the area and can preserve a kind of defusion of the conflict so that peace can gradually occur.

There are many in the area who do not think this is possible, and who feel certain that the conflict still is there, even if fighting isn't happening; that it is there in hidden silent hostility, waiting to erupt into actual continued fighting. But this Awareness indicates also that there are others in the area who truly desire peace and who will cooperate in trying to make things work out.

This Awareness indicates if conflict erupts in the area, it can create an extreme situation in which US troops or NATO troops could become embroiled in fighting that spreads; yet, it is also possible that this will not occur, and that after a year or two of reasonable calm, more agreements can be reached between the hostile factions so that a more secure peace can be negotiated.

This Awareness indicates that in other words, you are correct in seeing that there is the potential for the brink

of war, but also there is the potential of being on the brink of peace, depending on how entities energize war or peace in the area. The danger is the sudden eruption.

This Awareness indicates that such a sudden eruption can be triggered by Mars and Uranus in conjunction, or Mars and Saturn in conjunction or in Square, and these potentials are seen as occurring during this year or the next so that there is a strong potential for sudden eruption of hostilities leading to violence which could spread to a war in the area.

This Awareness suggests entities give prayer for peace in that area, as prayer does indeed energize for whatever is being prayed for. This Awareness indicates that visualizing peace is likewise effective in helping to manifest the reality of peace.

THE POSSIBLE RESULT OF SENDING 20,000 TROOPS OVERSEAS

QUESTION:

Awareness, isn't it true that Clinton sending 20,000 of our troops over there is part of the New World Order scheme to get the troops out of America so some of the million to two million UN troops which are already over here on US bases, according to published reports, could actually take over in case some National emergency, so-called, is started up?

COSMIC AWARENESS:

This Awareness indicates that this is one of the plans or scenarios that is available in 1996. This Awareness indicates, however, that you must also recognize that more and more entities have become aware of this kind of manipulation and maneuvering and with the great number of armed citizens, such a plan has not a clear certainty of success.

This Awareness indicates that also there are certain other factors that are recognized in this action, whereby it could have been promoted as a UN engagement, so that the UN was in charge of the operation in a manner that would imply greater UN authority, but Clinton had the foresight or understanding to allow the NATO forces and US commanders to be in charge, simply recognizing that the American people would not support an operation under control of the United Nations, which called for American troops to be put under United Nations control.

The "E.T. Card" and Other Possible Scenarios

This Awareness indicates that this in itself is a slight victory, although it may have, as you indicate, a more sinister side, in getting the troops out of the United States so that UN takeover of the United States will become a greater potential. This Awareness suggests you not be too surprised at anything that occurs in the year 1996. There is still the scenario of what Henry Kissinger called the "ET card", in which announcement of extraterrestrial invasion would be made, to influence entities into joining the New World Order in order to protect themselves from extraterrestrial invaders.

This Awareness indicates that there is also that scenario of the "Hot August Night" type situation in which the races are coerced or manipulated into clashing, creating a situation that calls for the National Guard entering into hot spots and eventually engaging the United Nations troops.

This Awareness indicates there are also potentials for militia groups and Republican groups to begin influencing the nation to go back to the Constitution, to go back from the radical Left-leaning extremism, and government control of the masses and to defuse some of the power of government while the states take on more of a role.

More States Declaring Sovereignty

This Awareness indicates already more than a dozen states have declared sovereignty. When and if these states are faced with a new crisis, it could lead to a show-down between the Federal government and the state governments, and it could have the effect of bringing more states into the declaration of sovereignty. When enough states have declared sovereignty, the Federal government will no longer be able to claim control over any of the states. It will then be returned to its original purpose: that of serving the states.

The Delta Force Scenario: Getting Back Our Gold

This Awareness indicates there is yet another scenario that this Awareness has not talked about, having to do with the claims of certain Patriots that the Delta Forces went into the European Federal Reserve Banks and brought back five trillion dollars worth of gold, which is being held by the US military, which was stolen by the Federal Reserve Bank and stashed in foreign banks for the benefit of the 13 banking families and owners of the Federal Reserve Bank of the United States, and whereby this money is held by the army and military forces, and that the claims of a 7 trillion dollar debt to these international bankers is not a valid claim, but is still being promoted in an attempt to bluff their way through, in hopes of somehow getting back the wealth of the country from the military.

Media Still Controlled by 13 Banking Families

It is a possible scenario that at some point all of this will be brought out to the public and that the international banking community will no longer have its control over the media or the broadcast networks in such a way as to continue promoting the big lie.

This Awareness indicates that until now, all of the media still parrots the agenda of the 13 banking families who, through the Federal Reserve Bank and the IRS, have taken the wealth of the nation from the people. This Awareness indicates that if this scenario was ever exposed to the masses, entities will realize they do not owe the 51 trillion dollars and that the country can create as many projects and as many programs as it desires without creating any debt whatsoever, because the Constitution allows Congress the right to mint and coin money, and because originally, the minting and coining of money did not require payments to a Federal Reserve Bank or foreign owners of that bank.

How the Federal Reserve Scam Cheats U.S. Citizens

It simply meant that if the country needed money, it printed up the amount needed and spent the money through circulation for those projects that were needed. Under the present scenario that is being promoted, if this country needs money, rather than the Treasury printing up the money, and spending it into circulation, they have allowed the Federal Reserve Bank to go to the Treasury with Federal Reserve Notes which are worthless, and purchase X-amount of money from the Treasury, which then, through the various mints, prints up money for the Federal Reserve Bank.

This Awareness indicates the Federal Reserve then loans to the Treasury Department at 100% face value, although the notes themselves only cost two or three cents to print, and then, loaning at face value, the Treasury and the American people are taxed with an interest on the money that the Federal Reserve Bank gives to the Treasury, even though it was actually the Treasury who had the authority to print the money, and the Federal Reserve Bank had no such authority, except as was fraudulently given to them in 1913, and anything that is fraudulent (in this case it was fraudulent because it is against the law of the land: the US Constitution); and anything that is fraudulent is void from the beginning, according to any laws in English or United States jurisprudence.

A Hidden Scenario That the U.S. Has Bought Back the FED

This Awareness indicates that the government in 1933, having allowed the Federal Reserve to print money at the expense of the people of the United States, became bankrupt, and the Federal Reserve loaned the US government sufficient amount to overcome the bankruptcy, but in the process it also created a contract that would allow the Federal Reserve Bank to be bought back by the US government within a prescribed time, for a prescribed amount of money, and this, according to the Patriot groups, was done during this last decade, so that even though the Federal Reserve Act was invalid because of its fraudulent nature, the money was paid to the owners of the Federal Reserve Bank, which brought back the control to the Treasury Department of the United States government so that the Federal Reserve Bank is now owned by the US government.

This Awareness indicates if, as it is claimed, this is true, then the notes could be continued as a kind of face-saving action by the government to make it still serve the Treasury Department and the American people without ever acknowledging or confessing that for some 80 years the Federal Reserve was owned by foreign individuals who had robbed the people of the United States of their right to coin and mint money.

If True, the Story May Still Not be Released Soon

This scenario in other words, could be hidden, and the continuance of the pretended international debt owed by this country in the amount of 7 trillion dollars could continue to be bantered about by the media, even though the country is not actually under the debt of 7 trillion dollars.

This Awareness indicates that the information could be released, but there appears to be some hesitation on the part of the administration, and many who serve in authority in the government, partly because they are, and have been controlled by the foreign bankers and fear exposure themselves, and also partly because some of them are still loyal to these foreign bankers, and partly because many do not really know what is going on, or do not believe such stories if they hear such.

This Awareness indicates the petition, The Redress of Grievances presented to Congress and House, addresses this situation, but most of the people in Congress have not yet acknowledged the validity of the information contained therein, nor have they shown much interest in investigating this information. Therefore, there comes a time when the Patriots who presented this information to them may need to take some action on these officials, hopefully through courts of law.

Masonic New World Order Judges Control the Courts

It is seen as extremely difficult for the Patriots because the courts are pretty much controlled by the very forces that the patriots are attempting to overthrow in the government. Most courts in the United States are under the control of Masonry. Most are Mason judges, and their loyalty is to the New World Order, therefore, it is very difficult for these Patriots to get justice in the courts of the United States. However, there are occasionally some judges who are not so controlled or whose loyalty is to the Constitution and to the law, and occasionally judges will rule properly.

UNSEEN SPIRITUAL ENERGIES ARE FLOWING INTO THIS PLANE

CLOSING MESSAGE:

This Awareness indicates that even though on the surface, many things continue without the appearance of great change, this Awareness wishes entities to know that there are certain spiritual energies that have been flowing in on this plane unseen, and these energies are having certain effects. One effect being that it reduces the energy of self-serving efforts of many of these who would have an agenda to enslave the masses.

In reducing the energy, it is likened unto sapping away some of the ambition of a tyrant. If you cannot hold your ambition strong you begin to get bored with your game of trying to conquer the world. You begin to lose interest in conquering the masses, and that is the effect of much of this spiritual energy that is now coming into consciousness on this plane.

The Law of Gratitude is given.

WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1983 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the interpreters necessarily agree with the statements of Cosmic Awareness. The interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

The Interpreter for the readings in this issue of "Revelations of Awareness" is Paul Shockley.

HALE-BOPP COMET UPDATE

QUESTION:

John M., Palm Desert, CA., asks: "Has Awareness any new information on the so-called Hale-Bopp comet which Art Bell on his talk show has commented on? Some think it is an intelligent-directed artificial comet."

COSMIC AWARENESS:

This Awareness indicates that this assessment agrees with that which this Awareness has already suggested in a previous discussion and this Awareness sees this as correct, and also sees that the news reports on this are not likely to confirm the comet as being anything artificial, but are more likely to portray it as something of a natural nature so as not to excite the public.

Getting the public stirred up is the last thing the governments of the world want to do, because it is much more difficult for them to deal with a potential crisis if everybody in the country is screaming at the government to do something. You are not likely to hear any substantiation of the claims that it an artificial satellite or comet.

Sitchin's "Twelfth Planet" Holds Key to Mystery

This Awareness suggests that you reread the chapter in *The Twelfth Planet*, by Zecharia Sitchin, and you will find certain parallels in this comet as it returns to the solar system to that described in his chapter on the 12th Planet.

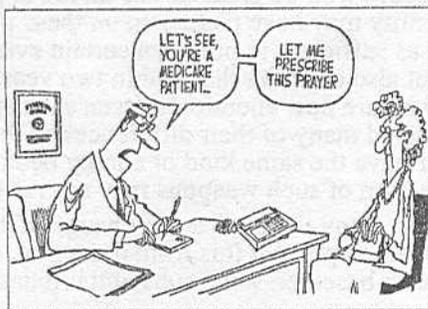

This Awareness indicates that previously this Awareness discussed certain cryogenic freezing armies of Reptoids in a planet that was approaching from Draco, at that time, in the direction of Orion. This Awareness indicates that this appears to be that same planet, or comet. It is not a comet in the usual sense, in that its trail does not follow in the way most comets move.

This Awareness indicates there was recently a probe of Jupiter to check out certain energies resulting from the crash of the Schumaker-Levy parts that penetrated into the atmosphere of Jupiter. This Awareness indicates it is all part of an effort to keep on top of what alien probes and activities are occurring as these energies move into the solar system.

The "Alien Autopsy" Video

This Awareness indicates the video associated with the Roswell crash called "Alien Autopsy" has been shown on television several times and this appears to be intended to pique the interest of entities into the alien activities so that when in the not-too distant future, the announcement of alien contact or observation is made official, it will not shock as many people.

This Awareness indicates that the aliens shown in the Alien Autopsy video are not the small Greys that crashed at Roswell. These are different entities, and the crash that gave these entities to human study occurred elsewhere. The location was another crash near the same time, in an area...the name is not seen clearly, but

contains the letters F-O, and appears also to have been in Arizona or New Mexico area.

This Awareness indicates there were several UFO crashes during that time period that were caused by Radar tracking devices which at certain angles affected the power system of the UFOs, causing them to shut off. It was believed for awhile by the aliens that this was an intentional attack by humans on their ships and nearly caused a war at that time between aliens and humans, but it was later realized that the Radar tracking devices were simply creating accidental fields that led to the crashes and it as not an intentional attack.

Will Hale-Bopp Comet Affect Our Weather?

QUESTION:

In regard to the Hale/Bopp comet, Joan M. in Canada writes that there was an article in the Guardian, in London, that said essentially: "The comet Hale/Bopp, heading for a close swing past the sun in March and April of 1997, with spectacular heavenly display to mark the coming in of the millennium, may spread a chill across the world in the early part of the next century."

Does Awareness see that comet passing the sun or whatever, as affecting the weather on earth?"

COSMIC AWARENESS:

This Awareness indicates that this is based on an assumption that there would be debris from the comet that would hinder the passage of sunlight to the earth. This Awareness indicates that it appears that there could be a slight interference in sunlight approaching, however it does not appear to be strong enough to affect the weather to any serious degree. The cooling by half a degree however, on the average, could be notable, but this Awareness does not see anything more cool than approximately one-half degree on the average.

This Awareness indicates that average temperatures in the past 50 years have created approximately a one degree increase on earth.

Why Jupiter Radiates so Much Energy

QUESTION:

In regard to the space probe to Jupiter, one of the reasons the government is putting out, it says: "One mystery the probe may solve is why Jupiter radiates twice as much energy as it receives from the sun." Is that true, and if so, why does it do that?

COSMIC AWARENESS:

This Awareness indicates that Jupiter essentially is a sun in the making. It is much likened unto a planet that has not yet burst into its full fruition. This Awareness indicates that the sun draws energy to it, but radiates energy out. It is likened unto a black hole that pulls energy to it until it is saturated with energy, then it begins to emanate energy.

This Awareness indicates if you could see the sun from another dimension, it would be seen as a black hole drawing energy, and from this dimension it is emitting the energy that it has drawn from the other dimension. Jupiter has a much less gravitational draw than a sun, but it draws energy from another dimension and emanates into this dimension so that it appears to be sending more energy out than it actually draws from this dimension, partly because it is drawing more energy from another dimension than from this one.

What's Clinton's Chance of Re-Election?

QUESTION:

Craig S., in Portland, Oregon, asks: "Does Awareness see Clinton being re-elected? Or will it go to the Republicans?"

COSMIC AWARENESS:

This Awareness indicates there is much that can happen between now and election time. *It* does not see a clear Clinton victory, but *It* does see a closer probability of his winning than is anticipated by most entities, and a very good chance of his being re-elected.

This Awareness indicates that there are many problems facing Bill Clinton between now and election time, and the efforts to hinder him are strong and powerful in terms of scandalous actions attributed to him. This Awareness indicates that issues are also a major concern, but the appearance to this Awareness is that as long as the economy remains strong and especially if it becomes better, the chances for his re-election are great.

This Awareness indicates, however, there is also seen a potential for certain events to occur on the economic level whereby the economy would suffer certain setbacks or the threat of an economic setback could have a negative effect on his administration. This Awareness indicates that at present time, it appears the economy *will* improve, at least through the next several months, through the middle of the year.

This Awareness indicates that the potential for something happening after that to disrupt the economy is seen, and if this occurs, then it would affect the entity's re-election in an adverse manner. This Awareness indicates that the entity appears to still be playing the Rothschild cards, but doing so in a very subtle way so as not to call great attention to that agenda at this time.

There are many who feel this entity is going to be exposed between now and election time in an adverse way and that the exposure of some of his misdeeds will cause him to lose the election. This Awareness indicates that this could occur, but is not seen as strongly indicated by the energies available at this time.

Psychic Predicts Very Rough Times Ahead

(Will New York City Get Nuked by Terrorists?)

QUESTION:

A question from Alexandra B., NYC. Actually there's more than one question. I'll read her statement and then go back and ask specific questions if Awareness requests. She writes: "Sean David Morton has been my guest during the past week for the New York Whole Life Expo. Sean is supposedly the most accurate psychic predictor of earthquakes in the world today, and he also makes predictions about future major world events.

"He says that we're in for some *extremely* rough times very soon. The most disturbing prediction that he has made, as far as I'm concerned, is that sometime in April of 1999 the Islamic Jihad, under a newly emerged Anti-Christ-like leader, most likely of Iranian origin, will lob a nuclear missile at New York City. The Jihad will do this with a submarine and a nuclear warhead purchased from a former Soviet nation.

"Sean says that the initial nuclear attack will be successfully repelled, but that within 24 months of that attack, a chemical weapon will be unleashed upon the city, killing all of those who had not yet evacuated. My understanding of the future is that it is changeable, and the above described future would certainly count as one that I would like to change.

16 "Sean, however, says that this future is already in motion and that it would be almost impossible to avert it." And now she begins her questions, which I'll read:

"Does Awareness see any validity to this prediction? Is Sean doing us a good service by energizing such a horrible concept, or is he saving our lives by suggesting we evacuate the place?"

"Would Awareness suggest that the New York area residents evacuate? Should I give up my dreams of owning a beautiful apartment in my beloved New York City? Is there a meditation that New Yorkers and others who care could perform that could defuse the many bad things: terrorism and so forth, that Sean David Morton sees looming in the future of this city?"

COSMIC AWARENESS:

This Awareness indicates that as mentioned previously, the future is *not* fixed. When entities predict certain concepts, they generally either see certain energies in motion, or will see certain patterns unfolding, or there will be some revelation of a plot that leads to the outcome predicted.

This Awareness indicates that likewise, for this Awareness to comment on such a prediction is as questionable as the prediction itself, for this Awareness can only look at the energies that relate to the questioner and see whether there are strong energies in motion. This Awareness indicates that whether the entity making the prediction has been given some kind of revelation from a plan in motion; this is not available at this time.

This Awareness, however, sees no particularly strong energy moving in this direction to suggest the destruction of New York in the spring of 1999. This Awareness *does* see energy that has been made in the direction of the destruction of New York, but it is not seen as directed to that time period.

Edgar Cayce's Prediction that New York Would Disappear

This Awareness reminds you of the Cayce prediction of New York disappearing in the twinkling of an eye. This Awareness indicates that approximately ten years ago, or more, there was energy showing the destruction of New York based on cobalt bombs. This Awareness indicates that this did not occur in the time period suggested, though the energy at the time was quite strong and the potential was seen as a very serious threat.*

*Please refer to "Revelations of Awareness" double issue No.80-33 and 80-33A Hotline: "Help Save Manhattan and "After the Fall"; \$3.00 from CAC.

This Awareness indicates that it appears that the same kind of energy is seen at this time in regard to these particular predictions and this Awareness suggests that until something more firm becomes solidified, *It* cannot confirm the entity's prediction. This Awareness indicates that as time passes, the energies may clarify. The passage of time could very easily change plans that are now in motion.

There could well be plans of this nature at present, and the entity may have picked up on these plans and seen this as sufficient to predict a certain event in the future, but also consider that within two years, the entities who are now enemies, or seen as enemies, may have resolved many of their differences so that the plans no longer have the same kind of energy behind them and the possession of such weapons may not matter.

There are many things that can change in the next several years to prevent this from occurring, even if the prediction is based on some substantial foundation at this time.

DO PSYCHICS DO A DISSERVICE BY ENERGIZING CATASTROPHE?

FOLLOW-UP QUESTION:

Then her question: "Is Sean doing us a disservice by energizing such a horrible concept, or saving our lives by suggesting we evacuate this place?" That question can only be answered after the entity waits? Is that right?

COSMIC AWARENESS:

This Awareness indicates that the entity is sincere in his observation and his expression. He may be doing a disservice without intentionally doing a disservice, or he may be doing as he believes, a service. It is not yet determined whether this will be a disservice or a service. This Awareness indicates that all that can occur in this regard of a meaningful nature is for entities to put it on a shelf in their mind and consider the potential of its occurrence. Would you actually move from your area based on a prediction of this nature? Would you move every time someone predicts something is going to happen?, or would you look for other evidence as time passes? You still have several years to ponder whether there is substance to this.

This Awareness suggests you watch the evidence of other predictions made by this entity to determine whether or not his predictions are truly accurate. It is one thing for an entity to say that his predictions are always accurate. It is another for entities to look and find if this is really true. Are his prediction truly always accurate? Or is this simply a claim? And are the predictions clearly stated?

Many entities will say something in a very general sense and then claim a prediction is true because something happens that can be construed to fit the earlier general statement. For example, one can say, "I feel something significant is going to happen during the month of June!", and June comes around and something significant happens. For example, an airplane may crash, or a train may be derailed, and the so-called psychic then says, "See? I told you so! I predicted this four months ago!"

This Awareness indicates that this is not a legitimate and accurate type of prediction for which the psychic can make claims, but many of them do, and after a few of these, they begin to count them up and make claims that they are *always* right on their predictions.

This Awareness suggests therefore, you check out the accuracy of his predictions to find out if they are truly correct, or if they are simply exaggerations of accuracy.

Those Tabloid Psychics

FOLLOW-UP STATEMENT:

It 's like those so-called "psychics" in the tabloids that are predicting. Each year they predict things like: "There will be a big airplane crash!" "One of Hollywood's most beloved stars will die!" "There will be a divorce in the British Royals" or something to that effect that just about anybody knows is going to occur. They just never name *who* precisely is to do these things.

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative. This Awareness indicates also that most of the tabloid predictions don't occur. You can take last year's tabloid predictions, read them this year and find that what they said was going to happen really didn't occur in most cases.

This Awareness indicates that most of those who predict for those tabloids are not expected to be right. They are only expected to be very interesting reading, and when the predictions are interesting enough to read, the tabloids print them because that is what they are interested in.

They are interested in selling tabloids with interesting material that will cause entities to purchase the information. They don't really care about the accuracy, nor do they care about the truth in their stories, though sometimes things can be accurate, and sometimes things can have truth, even in the tabloids.

Dr. John Mack's "Abduction" Book and Theory (The Orange Greys and other Factions of Greys)

QUESTION:

One other question from this entity Alexandra in New York. She writes: "Last year, Dr. John Mack of Harvard University gave a whole new level of credence to the abduction phenomenon in the Western World with the publication of his studies in his book, *Abduction*. While reading it, I was struck by how unanimously positive his patients felt about their experiences in contrast to some things I have read in your newsletter and elsewhere.

"In Dr. Mack's positive depiction of the abduction phenomenon, part of the mass-programming on the part of the Greys, and/or the secret government to get the world to accept and welcome the Greys as benevolent and beneficial beings. What is the truth here?"

COSMIC AWARENESS:

This Awareness indicates that there are several factions of Greys. The group known as the Orange Greys have an agenda that is somewhat different from other Greys. This Awareness indicates that there are some Greys who work with the humans in a more friendly manner, and some who are working to exploit humans in behalf of their Reptoid masters. Some of the Greys are mercenaries for the Reptoid masters and see humans as inferior and as being there to be used

This Awareness indicates also there are some Greys who in abducting humans are very courteous and polite because they want humans to see them as gods, or god-like beings. They enjoy being worshipped by humans. This is a kind of experience they don't normally get. It is likened unto entities who have a good affinity to dogs, and they love to be around dogs because the dogs love them so much, whereas another person might not like dogs and might treat them cruelly in order to know they have control over the dog and are masters over the dogs whom they dislike immensely.

Portland Man Calls Greys "God's Little Angels"

This Awareness indicates the Greys' attitude toward the individuals abducted have much to do with how the entities feel toward their abductors. This Awareness indicates that therefore, it is true that some entities have good relationships with the Greys. There is, for example, the entity in Portland, Oregon, whom the Interpreter met, who loves the little Greys, as he calls them: "God's Little Angels". He thinks they are the greatest thing that ever happened, but he also explained on a subsequent visit that they were teaching him how to gas people from their craft. By putting him into a booth where certain other abductees were outside the booth, he was taught how to push a certain button that would gas these entities and kill them.

He explained to the Interpreter that he liked this better than shooting them. It was a lot more pleasant. The entity felt it was his divine duty to do this for the Greys

because they were God's Little Helpers and they had a special reason for this.

This Awareness indicates here is an example of an entity who has a pleasant relationship with these Greys and perhaps this Awareness, in describing the Greys, has missed out on recognizing what a good relationship this entity experiences, but this Awareness would not promote such relationship for other humans, if this is anything they might encounter.

This Awareness indicates *It* is sure that there are many entities who have good relationships with the Greys, but this Awareness does not advise entities to seek out Greys to have relationships with, when there are so many humans who are even better behaved than many of these Greys.

This Awareness indicates that you never know from the color of the skin what an entity is truly like. They may be Divine Little Angels, or as some describe, they may be Satan's Demons.

Is Photon Energies Causing Hand Tremors?

QUESTION:

A question from JJ in New England. She says, "Six months ago I began developing hand tremors, and they're getting worse." Her handwriting is declining, and she asks for any advise, but she also asks, "Is the approach to the Photon Belt the reason I am experiencing hand tremors? If so, why do they get worse near or at the equator, and better the further North I head?"

COSMIC AWARENESS:

This Awareness indicates that it appears to be something in your system that is affecting the auric energies. It appears that the aura affects the nerves, which in turn creates the tremors. This Awareness indicates that it appears to be related to the central nervous system, and that it can be helped by using co-enzyme Q10 on a daily basis, approximately 30 mg, three times daily.

This Awareness indicates that calcium/ magnesium combination is also seen as being beneficial. This Awareness indicates the movement into Northern or Southern latitudes appears to have little to do with it except in regard to tensions that may have been triggered and also temperature influences. It appears that this was a situation in which certain tensions occurred, partly because of disruptions to the sleep cycle, or to traveling, which helped to trigger the tremors and that the location was not particularly related.

Will Photon Energies Change Our Appearance?

QUESTION:

A question from Pat L., in Omaha, Nebraska. Awareness may have answered this. We have so much information on this.

"Would you please ask Awareness what effect the Photon energies will have on our appearance? In changing our cells, will it change our appearance so that we will appear not to age, and perhaps even look younger? If so, when can we expect these to become apparent?"

COSMIC AWARENESS:

This Awareness indicates that this is in the affirmative. That generally, it will help to detoxify the body. This will of course require detoxification to occur, and during the occurrence of detoxification there may be some unpleasant experiences until the body's toxins have been removed. Therefore, entities may expect some negativity in the reduction of toxin while the toxins are being drawn from the cells and the body and

the various organs of the body.

This Awareness indicates it can cause certain types of illnesses or physical, mental and emotional disturbances during this time of detoxifying. This Awareness indicates that the detoxifying may last as long as a year before the real benefits become apparent, and could start at any time, even as of now.

FOLLOW-UP QUESTION (VIKKI):

Does that detoxifying have anything to do with the eye infections I'm suddenly getting?

COSMIC AWARENESS:

This Awareness indicates that it appears to be related. That this can be beneficial once certain toxins are released from that area. The eye itself will become healthier as a result of the present detoxifying. This does not necessarily mean that it will happen to the other eye also.

Have We Regressed Since Last Photon Belt?

QUESTION:

Tom K., Santa Clara, CA., who is transcribing some of the early readings writes, in a personal letter to me: "I just finished transcribing Issue #82-10, 'The Eve of Destruction', and a tome, as you quipped in a note therein, it is indeed; however, at 28,661 words, it is not the longest to date. That record is held by #93-12, 'The New World Order', part 2, at 29,758 words, most of them urgencies. (Here we're getting into questions) But the thing with Lee Michels is interesting to review for its discussion of the Atlantis and Ra-Ta energy conversions and inner-plane dynamics. A very clear description!

"It's like Cosmic Awareness was "talking around" then, what we now know as the approaching Photon Belt, and the expanding of consciousness. Perhaps the Photon Belt is actually the resolution of these energies which converged and is an outgrowth of this convergence! It has seemed strange that if the solar system has passed through this belt in space before, thereby elevating it to the 4th Dimension, that it somewhere along the line "regressed" to the third dimension.

I probably have it wrong, but it's an interesting thought. I'm sure your forthcoming issue on the Photon Belt will add more understanding." Can Awareness comment on his theory?

COSMIC AWARENESS:

This Awareness indicates that the earth, in previous passages through the Photon Belt advanced considerably, and that it moved into a high frequency or vibration and then again fell. This occurs in what many refer to as the changing of ages. In the 25,960 year cycle there is that which is at a very high frequency and there is that which goes to a very low vibratory frequency and the lower vibratory frequency occurred during the Age of Aries, at the end of the age, symbolized by the slaying of the lamb and the birth of the Fisherman.

This Awareness indicates that you are moving into the Aquarian Age, going from Aries, through Pisces, the Christian Age, into the Aquarian Age, and from that will go on into other ages, eventually reaching the top of the cycle of 25,960 years, in which the earth will reside in this higher frequency as it begins falling toward the lower and darker cycles.

The Photon Belt is not the ultimate height of the movement; it is simply a landmark along the way. This Awareness indicates that in the past, the earth has risen to higher vibration and fallen to lower vibration, and

during these episodes, those who are unable to rise in frequency to harmonize with the higher frequencies in consciousness usually fell, and those who were able to rise to higher frequencies usually rose even higher.

Third and Fourth Dimensions Defined

This Awareness indicates that in the use of terms such as "Fourth Dimension" and "Third Dimension", it is not as if these were different rooms that entities enter into. They are simply higher and lower frequencies and if one is in a lower frequency of consciousness, one does not perceive the reality in the same way as someone who perceives from a higher level of consciousness.

This Awareness indicates that it is not as though you are suddenly wet or suddenly dry. It is as though you are growing warmer or cooler as you move from one dimension to another, but warmth and coolness, or temperature is not the actuality. It is more likened unto the fact that warm and cool are measured by degrees of change, just as the movement from one vibration frequency to another is a movement of degrees.

Thus, as you move toward a Fourth Dimension it is degrees of movement, rather than a sudden change of scenery or sudden change of place, and you may move into a Fourth Dimensional consciousness in the same way that when you lie down to go to sleep you don't suddenly drop into sleep or suddenly drop into a dream. You move gradually. You move very gradually, losing track of one reality as you move into another. It is simply a change of focus.

This Awareness indicates that when you move into your 4th dimensional dream state you lose interest in the world of third dimensional concerns and focus your interest into the world of the dream state. This Awareness indicates that it is much the same with this upcoming change in consciousness, so that you move into the 4th dimension and reside there for a time, and then a situation may occur that begins to cause consciousness to slip, to fall into lower frequencies so that third dimensional reality becomes more commonplace and more demanding of entities.

This Awareness indicates that as the energies begin to focus inward rather than radiating from entities, the entity becomes more self centered and becomes more third dimensional in his or her thinking. When entities' consciousness becomes more outgoing, more radiant, and you begin to emit consciousness that reaches out to others, feels their needs, feel their concerns, and become one with others; it is likened unto "All these people are part of my dream! Are part of my reality!", and you see the oneness in all things, and your reality becomes a 4th dimensional reality in which all things are part of you, and you are part of all.

This Awareness indicates that as you pass through certain energy fluxes in the movement of time that cause you to lose that radiant energy and the energy begins to focus back on self, then your concerns for others begin to wane as you think more in terms of your own self, and the magnetism of the energy drawing inward causes entities to become more self-centered, more self-interested.

It is at this extreme end that the beginning of the Christian Age occurred and it was at this end that the loss of consciousness of the 4th dimension occurred for most people. Keep in mind that every time there is a movement from one extreme to another, there is always a small dot of energy that is the opposite, so that when you move into the highest frequencies, there will always

19 be just a portion, a very dark small portion of energy that is of the lowest.

Thus, that dark part of energy is that which is signified in the symbologies of all religions as the devil or evil one, and in the lowest darkest times when all of the world is most dark and all entities are most selfish in nature, there is that Light that appears which signifies the Divine, as in the time of the Christian Age at its beginning. It signified the selfless sacrifice of the Christ for humanity and this is likened unto the Yang in the middle of the Yin, whereas the Satan signifies the Yin in the middle of the Yang, or the black dot, the black hole in the middle of a radiant universe.

This Awareness indicates that as entities move into this higher frequency they will notice the darkness becoming less and less and more insignificant and smaller and of less importance and they will see a unifying of all things in the higher frequency. It will be thought of as comparable to daylight following the darkness.

This Awareness indicates that even as daylight appears, there is also the impending realization that darkness eventually will follow this daylight, but while it is daylight, entities can enjoy the light, the spirit, the unity of all things.

Watch for Those Dark Magnetic Energies

CLOSING MESSAGE:

This Awareness suggests that entities may watch within their own souls, within their own psyche, and within their own emotion for those dark magnetic energies that draw to self, and watch for those radiant energies that reach out to others, that express love and affection to others, and in this manner may measure how well they are progressing toward the higher frequencies and dimensions.

How Playing Oldies Can Reverse Aging

QUESTION:

A question from John S., Pacifica, CA., who writes: Several months ago an idea came to me in meditation. I believe it is a tool or technique that might be added to the arsenal of techniques for rejuvenation and reversal or prevention of the symptoms of aging which have been given by Awareness.

"My idea is this: Listening to music that you loved as a young person could help to revive or tap into the feelings that you felt as a young person. These feelings of youthful pleasure can bring about an actual rejuvenation in the mind, emotions and body. I think you might even be able to establish a quantum connection with yourself at a younger age, thus channeling some of your former youthfulness into the chronologically older self.

"As an example, I make tape-recordings of music recorded in the 1920s, Thirties and Forties and send them to my parents who are in their Seventies. I have not mentioned this rejuvenation theory to them, but I believe that listening to music they loved in their youth will help them to remain more youthful even in old age. Would Awareness please comment on these ideas?"

COSMIC AWARENESS:

This Awareness indicates that this is absolutely correct. This Awareness has spoken of this previously, although the material may not have been published as yet. This Awareness indicates that this action of recapturing music from your youth, meditating on that music and going back in your memory while listening to the music does have a kind of vibrational effect on the cells of your body to remind them of how they felt earlier.

It can give you energy, vitality from your youthful experiences and youthful memories, so that you actually do tend to rejuvenate during the time you are listening to such music. This Awareness indicates that you can also revisit places of your youth where you played, where you lived when younger, and regain a similar kind of memory and revitalization.

This Awareness indicates that likewise, if you have some item or thing from childhood and you can hold that during these times, it can be of great benefit in helping to recapture the youth you once experienced.

A Meditation: Hold Your Teddy Bear and Listen to Oldies

This Awareness indicates, for example, assuming you are a grown person, but you have for some sentimental reason, held onto a stuffed bear that you had when you were a kid. Consider listening to music from childhood, preferably something authentic rather than a later version of the same music, if possible, but listening to something that reflects your childhood while holding the bear the way you held it when you were a child, and simply let go and relax with the music and the bear and you will find yourself re-experiencing your youth in such a way that it actually affects the cellular structure in your body and you will gain energy and vitality from the experience which can last for several hours following such a meditation.

This Awareness indicates that by repeating this on a regular basis, you may find it helping to restore much of your vigor, vitality and youthfulness in a more permanent and profound way. This Awareness indicates if you can be with someone whom you shared your life with during those times, this can also be of benefit. Keep the lights dim so you don't see each other's aging effects. Tune in to memories that you shared together as children.

20 WHY IS RUSSIAN SUB SPYING ON US?

QUESTION:

The cold war is supposedly over and Russia is now our ally, but yet the Navy claims that they have been tracking a Russian submarine, a top of the line attack sub that's lurking just off the coast of Juan De Fuca Strait in international waters, that's spying on the American submarine activity in Bangor in the Hood Canal, about 30 miles from here. The Russian government has denied this, but the Navy claims they have absolute proof.

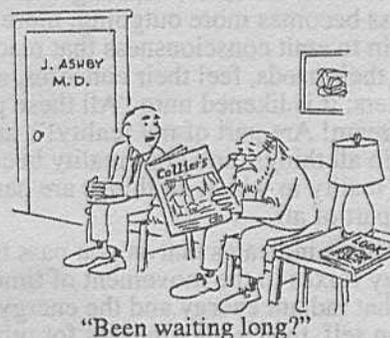

Could Awareness explain why Russia would have a war ship spying out there under the water when they're supposed to be our allies?

COSMIC AWARENESS:

This Awareness indicates there are several reasons for this. One is that the Russians still are not fully trusting of the United States in its super-power status as to its total intention toward Russia, and they also feel a need to maintain a certain amount of military strength for Russia in the event a crisis were ever to develop between the United States and Russia or Russian policies, and they also like to keep their military sharp and ready in the event of a need for future military activity.

There is also that never-ending desire by all countries to know more than they are being given openly in terms of information, and therefore, the spying activities become important to nations, even during peace-time. This Awareness indicates also, there is still a weather war going on between the United States and Russia and the weather war does take a certain toll and keeps both nations somewhat suspicious of one another, which helps to prolong a kind of "cool" war. It is not cold in the old sense, but there is still the suspicion that lies behind both countries where they treat each other as associates worthy of being suspect or needing to be watchful of each other.

This Awareness indicates it is not something of great seriousness, but it is something that occurs naturally when nations have been enemies for so long. It is likened unto a man and a woman who divorce and then get back together, but being familiar with old patterns, they look at each other with memories and suspicion.

HOW TO GET THIS NEWSLETTER BY MAIL EVERY 3 WEEKS (More or Less)

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507 (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you want these messages to always be available to others in years to come. ("How many have you served, and how well?" is the question Awareness asks us all.)
