## SPIRITUAL MATURITY

...ALL ABOUT SOULS, WANDERERS AND SACH KHAN

...HOWARD STERN: BLACK MAGICIAN UNAWARE

INDEX IS ON PAGE 15

(CAC General Reading 1-24-95)

## SPIRITUAL MATURITY: HELPING THE SOUL GROWTH OF OTHERS

### OPENING MESSAGE:

This Awareness indicates that most entities understand the meaning of social maturity, wherein an entity first learns to take care of his or her own needs, as an indicator of maturity. Then, as one is capable of taking care of his or her personal needs, they accept the responsibility of taking care of someone else's needs also.

As an entity matures further, he or she may begin to attend to the needs of several. Usually this is in the form of a family, with children. This requires a certain maturity. Many entities cannot reach this level, and find it difficult to take care of themselves, let alone take care of a mate and children.

Some may rely on and depend upon a mate and thus show immaturity rather than maturity, or may not help the mate, drawing more from the mate than giving, and this immaturity is a clear picture of the entity's development; but once the entity learns to attend to not only his or her own needs, but to the needs of another, and particularly when it reaches a point wherein the entity can attend to the needs of a mate *and* children, then the entity is considered socially mature.

Of course, this can continue to grow, as an entity takes on certain other expanding responsibilities in career, in job, in home or wherever. In other words, as one becomes more socially responsible, one matures further.

### After Social Maturity Comes Spiritual Maturity

This Awareness indicates there is another kind of maturity: spiritual maturity. As an entity begins to take on the recognition of his or her own soul growth and begins to mature spiritually, developing his or her soul growth, the entity may reach a point in which he or she decides it is not sufficient that, "I attend only to my own soul growth; I should also assist others in the development of their soul growth if possible."

This Awareness indicates that some entities at some point in their spiritual development move beyond attending their own soul growth exclusively, to the state wherein they begin to work also to assist others in the development of their soul, giving them spiritual guidance, information or assistance so that they also can enhance their soul growth.

### Many Ways to Assist Others in Their Soul Growth

This Awareness indicates that it becomes possible for these entities to continue not only helping themselves to grow spiritually, but to help others and to encourage the others also to begin helping others, if possible. This Awareness indicates that there are many ways whereby entities can assist others in developing their soul growth without necessarily going into the ministry or becoming full-time teachers of entities in a spiritual teaching sense. This Awareness indicates in fact, entities can assist one another just by talking to them about things that help them to have a better understanding of their own soul, their need for spiritual growth, and ways of improving their lives through spiritual growth. Giving service to others, for example, is a kind of soul growth activity.

This Awareness indicates that entities who can serve others spiritually or assist them to develop their own spirituality are indeed functioning in a sense of soul

growth activity. This Awareness indicates that there are many entities whose particular circumstance does not yet allow them to become guardians of each other's souls or stewards for each other's soul growth, but there are ways whereby indirectly they can still help in the soul growth of others.

### C.A.C. Readers are Involved in the Soul Growth of Others

Many of the readers who read the *Revelations of Awareness* are themselves involved, perhaps not directly, but indirectly in the soul growth of others, and this is part of their own soul growth, to have participated in helping others in *their* soul growth activities.

This may be, for example, from entities who send in questions of general spiritual nature or entities who send in donations to keep the organization and messages flowing, or entities who, in their relationship with this organization, send letters of encouragement and write or contact other people in ways that encourage their soul growth, or support their chances for coming in contact with such information.

Thus, by sharing information, such entities can assist in spreading the information and soul growth to their friends and associates. This Awareness indicates in other words, just because you are too busy to get out and preach or get out and talk about things does not mean you are not offering some spiritual energy to help others in the soul growth development that they may wish to pursue. If you share information with them or if you share your energies, including your donations to groups, or organizations to spread spiritual information or services, you are in essence participating in the spread and expression of soul growth that is being brought to this earth plane.

This Awareness indicates this is a form of spiritual maturity as entities move more and more into assisting others in their soul growth, in their spiritual life. Thus, you have the social maturity and the spiritual maturity. There are other forms of maturity, but these are those which this Awareness wished to speak of at present time as being of great importance.

This Awareness indicates, of course, financial maturity is the concern of most entities on this plane because the bottom line of most energy and activities on this plane is money-related, but this Awareness indicates this is already understood by most entities or becomes understood very quickly as a child grows into society, and the areas which are often neglected or forgotten by entities have to do with their social maturity, and areas which are even more commonly neglected or forgotten have to do with spiritual maturity.

### What are You Doing in Terms of Spiritual Maturity?

What are you doing in terms of spiritual maturity? Are you developing your soul? Are you growing spiritually, day to day, month to month, year by year, or are you neglecting this area of your life? In what way are you expressing spiritual growth? These are questions you may wish to consider.

This Awareness indicates that according to your capacity, your ability, you may wish to find some way to express a spiritual maturity in a more meaningful manner in order to develop your own spiritual growth. This Awareness indicates that spiritual growth is not something to neglect.

It is possible to become spiritually retarded, just as it is possible to become socially retarded, but this Awareness suggests this is not beneficial to an entity to neglect the social or spiritual development, and therefore, this Awareness suggests you consider carefully as you develop these areas of your being, for they can bring

you many, many more rewards than the retarded states of development that some entities seem to divert towards.

#### How to Recognize a Socially Retarded Entity

This Awareness indicates if this has not been made clear, perhaps this Awareness could say it in a different way: An entity who is socially retarded is an entity who has not, for example, learned how to make and keep friends or keep friendships alive. The entity may be too self-centered, for example, or too concerned with gaining something for self at the expense of others.

This entity would not be classed as a socially mature person. The entity would perhaps be better classed as a socially retarded person. This Awareness indicates that likewise, an entity who is not interested in soul growth or spiritual growth for himself would not likewise have much interest in helping others to develop their spiritual or soul growth, and therefore, rather than appreciating the finer things in life, such an entity would enjoy crude things, such as getting friends to fight with each other, or promoting fights or violence or belittling friends, insulting or hurting the self-image of others.

A more spiritually inclined person would encourage those who are discouraged, assist those who are in need, encourage those who need to be uplifted, or need encouragement to lift themselves, and promote spiritual concepts and ideas that can be beneficial to others. This Awareness indicates that such an action of spiritual promotion would indicate an entity who is spiritually evolving.

#### Consider Helping Those Who are Helping Others

This Awareness indicates there are many ways of promoting the spiritual well-being of others and of oneself, and everyone has some opportunity for doing this, regardless of how busy they might be. This Awareness indicates you may always consider helping others who are helping others. If you do not have the time to get out and help the masses, help those who are helping the masses, and you are essentially doing the same work.

### What to do: Study the Cosmic Awareness Teachings or Give Service to Others?

#### QUESTION

A question along this line from JD in New York. She writes: "Some of us are deeply into studying the Cosmic Awareness teachings. To what extent is this a justifiable way to spend time which might otherwise be spent in direct service to entities?"

#### COSMIC AWARENESS:

This Awareness indicates that it appears there is a balance that can be struck. This Awareness suggests that to fill oneself with information gives one an enormous amount of potential power, but the power is pointless if it is not used. Knowledge is pointless if it is not used, therefore this Awareness suggests that you put what you learn to use. If it is something that can be used for helping others, then by putting it to use, it becomes much more important than by simply stuffing it in the bank of your memory.

This Awareness indicates that of course it is also important to realize if it is something you are studying but do not fully grasp, some times there is a need to take in more before acting on information, because if you act with half the knowledge you need, you may cause yourself or others more harm than good.

This Awareness suggests, therefore, whatever you study, whatever you research and examine, if you are to put it into action, make sure that you know enough to act confidently and with full understanding, so that your

knowledge, which is power, does not end up hurting yourself or others because you were not quite informed enough on some area of the field of knowledge, and because of lack of information, your action went astray.

This Awareness indicates in other words, study enough so that when you put things into action, your actions will be meaningful and proper. This Awareness indicates it is likened unto a student of psychology who drops out of school after learning only a few rudimentary concepts of psychology and then tries to go into the business of counseling. Such an entity, with half-knowledge, could indeed hurt others very seriously.

This Awareness indicates most entities, even with half-knowledge, who share what they know without trying to over-act on their knowledge, would be relatively harmless. In other words, it would be likened unto the psychology student sharing some of the concepts he or she might have learned in class prior to having dropped out of school. It is not likely to be harmful in such a case, but if the entity pretends to know more than he does, pretends to be an authority and gets others to depend on him or her, then there is a misrepresentation, and a potential for much harm to be caused to those who trust the entity, more than is properly earned.

#### Why You Must Understand and Grasp the Awareness Material

This Awareness indicates also that in regard to studying the Cosmic Awareness readings, it is important for entities to grasp the understanding for themselves and not just because the information was made available in the readings. This Awareness indicates that if information is given without full understanding of the principles being discussed, an entity can express the information in a way that could be distorted or could cause confusion or otherwise bring harm to another.

It is likened unto the entity who, in studying the Bible, fixates on a certain passage in the Bible and then acts on this passage and causes great harm because the entity either put too much emphasis on something said, or distorted what was said, or did not understand clearly the meaning in the passage, and the therefore expressed it improperly.

Improper expression is not uncommon when communication requires a translation or interpretation of some message and an entity interprets something either out of context or with a distorted emphasis or a distorted understanding of the true meaning. This Awareness indicates there also is the possibility of error in the readings or error in the Biblical passage in its translation, so that error in expression might likewise occur.

#### How One Reads Information can Create Error

There is also the possibility of error in how one reads the information. This Awareness indicates that there will be people who say the Bible contains no errors, but this Awareness wishes to give you an example in which the Bible speaks of the angel standing on the four corners of the earth. This Awareness indicates that obviously, in today's society, entities understand that there are not four corners on the earth, and therefore they would rend this as metaphorical or symbolic of the four directions, but they would not take it literally, as referring to four corners on the earth.

This Awareness indicates however, that a child, who does not know the earth is spherical, or someone from an earlier age, prior to Columbus, might have considered these words to literally refer to four corners on the earth, and acting on that information, according to that interpretation, an entity could perhaps, under certain circumstances, get into serious trouble.

For example, an entity seeking to find one of the

corners of the earth, or an entity out sailing might receive a message from some authority saying "Keep going until you find the corner of the earth and then come back to us!" and the entity keeps sailing and sailing and sailing and sailing and sailing, looking for the corner.

This Awareness indicates that could it not be said that the Bible was in error in this interpretation of it? It is not to say that the Bible itself is necessarily incorrect, but the interpretation of how it should have been read or understood may have been in error.

**Think for Yourself: Awareness Can't Guarantee the Readings**

Likewise, with readings from this Awareness: this Awareness does not expect everyone to interpret everything *It* says in a way that is always correct. This Awareness does not even vouch that the Interpreter's readings of the Awareness energies are always correct. Therefore, think for yourself, and interpret carefully as you use these messages in the study, research and sharing of information with others.

## MORE QUESTIONS ABOUT THE SOUL

### QUESTION;

In regard to souls, some questions from Rasma K. Some of this I'm sure Awareness has given. I'll read her statement. There's about four questions within it. She writes: "If you need a question, I think other people would find this interesting also.

"I remember reading the explanation of "how a soul is created; how a soul grows or diminishes in substance." It was mentioned also that a soul can be destroyed. The questions I want to ask are: Who or what can destroy a soul? Is there a difference of substance between the soul of a human and the soul of a Reptoid? Can souls of different species incarnate in another species' body? Are there any rules and regulations concerning incarnation?, or is it: Whoever has a strong will can do what one pleases?"

### COSMIC AWARENESS:

This Awareness suggests the last question be repeated. The last line be repeated.

(Avaton reads the last question)

### COSMIC AWARENESS:

This Awareness indicates that the soul is a kind of field of energy that accumulates experiences, not necessarily in vivid imagery, but in feeling. Thus, an entity who, for example, goes to the beach, enjoys the sand and sea and wind, collects an image at the beach, but also collects a feeling, and that feeling gets captured by the field of energy that is the soul, and the entity develops a strong sense of enjoyment from the experience.

This Awareness indicates, however, when the entity passes on to another body, another life, through the soul leaving the physical body, it retains the feeling of that beach trip, without necessarily retaining the image that accompanied the experience. In other words, the soul may not recall the appearance of the rocks or the cliff near the seashore. It may not recall who the entity was with, but it certainly recalls the experience of being joyful, of having some sense of contentment from the experience.

This Awareness indicates that in a future lifetime, the entity might have a brief experience or a flashback on the feeling carried over from the previous lifetime, and might have a yearning to go to the sea, or to the seashore. Perhaps the entity has never seen the ocean, but there is something deep within or calls him to go to the seashore. Thus, the entity at some point in his or her life might again walk the seashore and experience the

feelings from a previous life because the soul carried over the feeling of the experience.

This Awareness indicates the entity may not recognize the seashore where he or she may walk in this second lifetime, but the entity may very well recognize the feeling and it becomes part of the soul energy or emanation. Multiply this by hundreds of thousands of experiences from one lifetime carried over to the next, and you will see a soul that has a propensity for certain experience, a tendency to move toward certain behavioral patterns and experiences based on feelings that are part of the soul make-up.

This Awareness indicates thus, a soul then carries with it certain inclinations, not necessarily vivid memories, but certain *inclinations* and it is drawn in certain directions because of those inclinations. This Awareness indicates that this does not guarantee that the soul will continue to grow and develop those inclinations, and it is such that a soul can be destroyed when the field of energy that makes up the soul becomes weakened before it is fully integrated or what may be termed "congealed" into a fully integrated field of energy.

In other words, the soul may still be forming. The soul may still be collecting experiences for integration, but the total congealing of the soul may not yet have occurred in such a way that a loose soul, or a soul that is not congealed into a solid integrated field of energy may still be vulnerable to influences that break it apart, weaken it, or cause it to scatter in terms of its collective energies from the experiences it has endured.

### How Some Souls Self-Destruct

This Awareness indicates that for the most part, a soul *does* tend to congeal rather quickly, so that even a new soul is fairly much intact and not broken apart; but some souls self-destruct, such as an entity, for example, who begins to break apart the elements of the soul that have joined together, either by the use of drugs or drink or addictions that are of a weakening nature to the integrative qualities.

In other words an entity who has experienced compassion, but has also experienced great hostility; the entity who has a range of emotional memories and feelings, who comes across a situation in which he or she draws on one of those emotions and shuns others: such an entity might begin to disintegrate in terms of losing certain compassionate energies and adopting certain negative energies. And thus, a soul that was mainly compassionate could very easily turn into one that is hostile, angry or otherwise disintegrating in its nature.

The use of certain negative drugs, gluttony or other types of poor behavior can also tend to cause a breakup in the soul's congeniality. If it is congealed or integrated and brought together, but loses that congeniality to where it is in conflict with its parts, those parts can then disintegrate, so that the soul disintegrates over time to the same degree as the conflict within the soul and its various parts.

This Awareness does not see that *It* has answered all of the questions, but it appears that the general message covers what the questions were about. If there is some particular area that needs further discussion, let this be repeated.

## Can the Soul of One Species Reincarnate Into Another

### QUESTION:

"Can souls of different species incarnate in other species' body?"

**COSMIC AWARENESS:**

This Awareness indicates that this is possible. This Awareness indicates that the souls may not necessarily adapt well to that body or may need to undergo considerable change or growth once in that body. In other words, the soul may not fit like a glove, but it is possible for souls of one species to enter into the body of another species.

This Awareness indicates of course this is not so in every case. But some souls just do not fit well in the bodies of other types of creatures.

**What are the Rules Governing Reincarnation?**

(How to Keep the Demon Out of the Fetus)

**QUESTION:**

Her last question is rather vague, but: "Are there any rules and regulations concerning incarnation, or is it that whoever has a strong will can do as one pleases?"

**COSMIC AWARENESS:**

This Awareness indicates that this is interpreted as meaning whoever has a strong will can incarnate wherever he or she wishes. This Awareness indicates that a strong will does not necessarily guarantee an entity a choice or a right to enter any particular chosen body. In other words, an entity who is strong willed and very demonic may not be able to select the body of a fetus or small child to enter, if that genetic quality of the small child and the parents of the child are not integrating with the demon's.

In other words, a demonic person is not simply able to enter into the body of a child born from spiritual people just because the demon would like that. This Awareness indicates that there are certain qualities that must vibrate properly in the genetic harmony with the genes of a small child or fetus before that soul can attach itself.

In other words, the vibratory qualities of the soul must vibrate harmonically with the genetic qualities of the fetus for the soul to attach.

**HOW DID A MAN TURN INTO A SNAKE?****QUESTION:**

Audrey P. sent in an article from a tabloid called *The Sun* and it talks about a man in South America who is turning into a snake, and the headline says: "Medical teams rush to a save a man from a fate that's worse than death." A 22 year old entity named Adelino Francisco de Lima, is slowly turning into a serpent. The story is: rather long, but they seem to think it is some kind of a genetic thing. It says: "The change from human skin to snake skin has been very gradual and painful. He can hardly move his hands and his knees are so thin and weak that he can barely stand up for more than a few minutes at a time."

If this story is true, is this a case of another species entering into a human entity?

**COSMIC AWARENESS:**

This Awareness indicates that it appears to be a situation in which the consciousness is being affected in such a way as to hypnotically alter the cells of the entity, through a kind of hypnotic intrusion, and the cells of the entity are slowly being affected by the hypnosis involved. It is an energy affecting the genetic make-up of the cells of the entity.

**The Many Stages of the Developing Fetus****FOLLOW-UP QUESTION (VIKKI):**

Does this have something to do with the lowering of the threshold dividing the dimensions?

**COSMIC AWARENESS:**

This Awareness indicates it appears that it relates to the stages through which the fetus moves during its

development. There is a time when the fetus moves through various stages of evolution, wherein the fetus has certain qualities of the reptile, of the fish, and in some cases, entities have been born with fish scales on their skin instead of skin, or may have certain reptilian qualities.

This Awareness indicates that this is because the genetic development got caught or side-tracked and did not progress properly, so that when the child was born, it was still trying to develop out of the more basic embryonic state, thus a child born with fish scales, for example, did not genetically develop prior to birth, and is physically retarded, physically retarded into being behind the genetic state the entity should have experienced prior to birth.

This Awareness indicates that in the case of the entity turning into a snake, those genetic qualities that should have receded during the development of the fetus are beginning to grow and develop stronger, and the human genetics are receding. It is in part because of a psychic inhabitant or a psychic energy inhabiting these physical energies.

**FOLLOW-UP QUESTION:**

The article claims that if the doctors don't figure out something to do for this entity he will indeed turn into a snake. If that occurs, will the entity still possess a human soul?

**COSMIC AWARENESS:**

This Awareness indicates the soul will still be there, but the humanness may recede or diminish, and the quality of the serpent may advance and grow. It appears there will still be some merging of human qualities in the entity.

**Is Incarnation a Linear Thing?**

How Many Marie Antoinette Can be Expected?

**QUESTION:**

A question from JD in New York. She asks: "Is incarnation linear, individual and pyramidal, that is to say, at any given time can there be only one later incarnation of say, Marie Antoinette, or may there be many?"

**COSMIC AWARENESS:**

This Awareness indicates it is possible for a soul to split in such a way as to create two or more incarnations of that particular entity when the soul was integrated as one. This Awareness indicates, of course, the split soul is not necessarily a complete reflection or perfect image of the integrated soul, therefore the soul will be somewhat distorted.

This Awareness indicates that it simply tends to make it more unique and not a perfect reflection from the soul of its origin.

## Negative Predictions: Do CAC Readers Help Prevent Them From Occurring?

### QUESTION:

A question from Tom K., in Santa Clara, California, in a letter to me. He wasn't asking a question particularly, but it seems to me it *is* a question, or perhaps a comment. He writes: "Awareness has suggested the significant possibility of so many dire things happening over the years, yet they haven't happened, thankfully, and it has caused me to wonder: has the "simple" issuing of these possibilities, even to the small membership of CAC, also been greatly instrumental in their *not* happening?"

The analogy would perhaps be to the Law of Leverage, that a stone (higher consciousness) thrown into the pond (of lower consciousness) at the right time tends to confront and neutralize the waves (caused by the Dark Force) existing on that pond. That the greater significance *is that issuance* of the Higher Consciousness into a portion of the mass consciousness, as well as what we, that portion, might also *do* individually about it.

It would almost seem that the forum of newsletter readers has a key factor here, or perhaps I would like to think that it is so. Is Awareness like a master organist playing upon the keyboard of human consciousness that, however we individually respond to the chords, that very symphony played through the "loudspeaker" of our consciousness, always disaster, and allows us to hope?"

### COSMIC AWARENESS:

This Awareness indicates this is a very good perception on the questioner's part. This Awareness indicates that it is a good analogy also. This Awareness wishes to give still another analogy. It is very much likened unto homeopathic medicine, wherein a particular negative disease is found in a patient and the homeopathy doctor takes a sample of the disease itself and reduces it down through repeated dissolution or a diffusion of the negative energy whereby, for example, a pinch of a certain toxic energy is put into a glass, and water added, and then a drop of that water is put into another glass and filled with fresh water, and a drop of that water is put into still another glass and filled with water, et cetera, et cetera, et cetera, until the ability to measure the negativity is basically lost.

#### The Principle of Homeopathic Medicine

This Awareness indicates that this is more or less the principle of homeopathic medicine, wherein a thing is diffused so many times and so much that it is harmless if taken orally or ingested into the system, but the human body, in taking even the most diffused part of the toxin, reacts to that with an understanding or knowledge, a subconscious knowledge, that it is being given more of the toxin, which it already has in its system, and thus the human body rejects the concept or idea of taking on more poison, and because it rejects it, it begins to panic and throw off the already present toxins in order to make room for the new toxin that is coming forth in the drops of homeopathic water.

This Awareness indicates that thus, in the analogy of Awareness messages regarding negativities, when this Awareness gives information to masses about the potential of a negative activity that is planned, and this is shared by many entities in the collective consciousness, it immediately begins to spread on an unconscious level throughout the collective consciousness to rid itself of the negativities that are already present and in more gross and dense forms so that the homeopathic concepts given by this Awareness begin to have their effect on the gross negativities in consciousness.

This Awareness indicates that perhaps this helps to explain the phenomenon in question.

## WHY SOME READERS HAVE MORE QUESTIONS THAN OTHERS

### QUESTION:

Along this line of questions in our newsletter, JD in New York asks: "Is there some causative relationship between CAC's , welcoming questions and my having them? Back when I believed Awareness to be inundated with questions from all its members and I felt entitled to only my fair share, I had relatively few.

"When I was assured that (my) questions were welcome and not excessive, I found myself wanting to know a lot more things, and when a serious need for questions was announced, it was as though the flood gates of my curiosity opened and I have questions in astonishingly frequent numbers.

"Is this to do with my own psychological barriers, the creative power of Cosmic Awareness, or the esoteric principal of 'Ask and you shall receive?'"

### COSMIC AWARENESS:

This Awareness indicates it also relates to the Law of the Vacuum. When there is an opening for your questions and your questions are released, there is a vacuum within you whereby you can feel more curiosity because your previous questions are now gone, have been released, and your new curiosity allows you to think or probe or focus on different areas for questions.

This Awareness indicates in other words, you are correct in your analysis of the situation.

## WHY CERTAIN TOPICS RELEASED ARE SO TIMELY FOR SO MANY

### QUESTION:

While we're on this subject, could Awareness explain the phenomenon, if it is a phenomenon, of the newsletter, at certain times have certain topics, certain specific information that goes out at a specific time and perhaps half a dozen or more people write in and say that that message arrived just at the right moment for them in their life; that they needed that information so badly at that time to make decisions, or to do other things; is this just coincidence, or is there something cosmic attached to such incidents?

### COSMIC AWARENESS:

This Awareness indicates that in the collective consciousness, there are at time, vacuums. You may call these vacuums needs or desires, or inquiries. There is something that needs to be provided to fill these vacuums. This Awareness indicates that from a trance level, there is an attunement to this Awareness which is also attuned to the collective consciousness, and there is, through this attunement to this Awareness, a subconscious or sometimes slightly conscious attunement to those vacuums in the collective consciousness.

There is, in other words, a sensitivity to these openings, and this can sometimes lead to a message from this Awareness which is picked up by the Interpreter. At other times there may be entities in the collective consciousness field who have a question because they are experiencing some kind of vacuum in their lives, and they send in a question, and the questioner, the editor of these questions, may pick up that particular question and see that it is something that needs to be asked, perhaps not even knowing why he did not pick it up a month ago, but seeing that it feels right to ask the question now.

This question happens to pertain, or opens the door to

comments relating to that vacuum in the collective consciousness. Therefore, the question is asked, the message is printed and sent out, just at the right time to help clarify the vacuum or quest or inquiry that this and other entities may be experiencing in their attunement to the collective consciousness.

#### **The Awareness Readings Affect the Collective Consciousness**

You must understand that all entities are part of the collective consciousness, thus, any vacuum in the collective consciousness may be felt by most of the entities who are sensitive to that vacuum, and this can sometimes be many. This Awareness indicates that these readings not only affect those who read the written result, but also affect collective consciousness when the readings are being done, so that many other entities will also experience some change as the readings affect the collective consciousness itself.

#### **What Exactly Is "Collective Consciousness"?**

This Awareness indicates this last statement may be somewhat confusing to entities. This Awareness wishes to explain briefly. "Collective Consciousness" is a reference to the frequency that is attuned to the mass of human consciousness on earth. It can also be attuned to galactic consciousness, if that is the focus.

This Awareness indicates most of these readings are attuned to the frequency or vibration of consciousness on earth, and that frequency may be thought of as having a certain range of vibration, just as radio waves have a certain range of vibration, and some television frequencies may have their own particular range of vibrations. Microwaves have a certain range of vibrations, and it is possible for entities to tune in to any frequency that enters that range of vibrations that they themselves are attuned to.

Thus, you have a radio station that is on a particular frequency or vibration, and when another radio station or frequency broadcasts into that range you are listening to, it is called "bleeding in," or you may have two radio stations coming in on a similar frequency, so that you hear two stations at once. This is annoying because it is difficult to listen to two stations at once. This Awareness indicates that normally these are sorted out so that the stations do not bleed together. The messages and frequencies are kept separated.

This Awareness indicates that in regard to the collective consciousness and entities sharing a wide band of frequencies, and this Awareness tuning in to many different frequencies that relate to questions of individuals who are attuned to that collective consciousness, it is likened unto the individual this Awareness attunes to as being a broadcasting station, broadcasting a question which this Awareness attunes to.

This Awareness not only responds to the question, but *It* also emanates a frequency that goes out into collective consciousness in the broad-waves that are part of collective consciousness, so that even those who are not attuned directly to the words will feel the vibration or frequency from the Awareness contact and therefore, collective consciousness can be affected by the energies or frequencies of this Awareness as *It* addresses questions that entities send in.

### **The "10 Billion Souls Which are Part of Cosmic Awareness"**

#### **QUESTION:**

Another question from JD. "In issue # 77-16, Awareness referred to 'the ten billion souls which are part of this Awareness'. Does that refer to only earth souls which exist?, and what exactly *is* this figure?"

#### **COSMIC AWARENESS:**

This Awareness indicates that this is in relation to souls in this particular dimension. This Awareness does not read clearly the meaning of the question: "What exactly is this figure?" It appears that it could have two meanings: one is wanting to know the exact number, and this does not appear to be of any significance or the actual intent in the question. It appears that she is asking "What is the significance of this figure of ten billion souls?"

This Awareness indicates it appears that this is in reference to the ten billion souls that inhabit this particular dimension at any particular time. It should also be pointed out that this is mostly in reference to the ten billion souls that inhabit and surround the earth itself. This is also to be understood that many of the other physical planets are not actually inhabited in this dimension but have souls on them that are in other dimensions.

#### **There is Life on Venus but We Would Not See People There**

Venus, for example, has life on it, and many entities, but these entities are in a different dimension from those on earth. There is no physical dimension or third dimensional life on Venus as you know it. If you went there, you would not see people, but if you went there in a different dimension, it would be teeming with life and activities, and these other dimensions also have many different souls that run into the billions, in and around the various planets.

#### **How Souls are Created with Pixels of Energies**

This Awareness indicates that if you look at a television screen, you will see that there are many very fine dots that make up the image on the screen; these are called pixels in television terminology. They are also found on your computer screen.

This Awareness indicates that in the reality of life there are currents or lines of energy that vibrate, that create frequencies, and sometimes a line of energy, electromagnetic energy, a vibrating energy, will come across another line, and where they come together, it is likened unto the pixel except it is a reality point, a juncture in the points of light or vibration.

This Awareness indicates that every one of these points has a different reality because of the juncture of the lines coming together than the lines alone. In other words, when they come together they create a new entity. This Awareness indicates that in the higher frequencies, this is where souls are created, and they come down as these frequency junctures as entities, and they come together with other points of light or frequency and in the continued conglomeration of these, they form still greater organisms or fields of energy called human souls, at a certain point, and these then may inhabit different dimensions or planes of vibration and frequency, so that each of the various dimensions may have numerous conglomerations of these particles caused by energies coming together.

This Awareness indicates that it is likened unto all these pixels on a television or computer screen coming together to make up a letter or a face, or some other recognizable pattern, so that you see this face, and you can totally forget about the pixels that make it up.

Call that face a soul, and think of those pixels as miniature souls, and you have an understanding of how the universe works in creating souls. Each dimension is different. The screen that has the face is one dimension. The pixels that are seen on the screen, if examined with a good magnifying glass can be seen as individual entities, and you can forget the total face and look at the pixels as individual entities, and in examining any one

of these pixels you will realize that you are in a different dimension than you were when you saw the total face on the screen.

This Awareness indicates that if you were to go further into still another dimension, you would be exploring the light particles that make up the pixel itself, and these light particles or vibrations could be equated to souls on still another dimensional level.

### A Friend Disintegrating Before our Very Eyes?

QUESTION (VIKKI):

In relation to souls that are possibly splitting, and may reincarnate later in more than one body, we were watching a character named Richard, whose soul started out with a good deal of grace, and he got into various alcohol and drugs and bad patterns, and now seems to be falling apart. He's maybe mentally losing it and just sort of lapsing, but I was wondering, are we watching his soul disintegrate, and if so, when it reincarnates, will it be in a number of bodies? (I shudder to think!)

COSMIC AWARENESS:

This Awareness indicates that this is a possibility; that sometimes an entity like this falls apart before being made aware of how devastating the lifestyle has been in tearing him apart, and it may be that he will, at some point in falling apart, suddenly awaken and realize his disintegration has reached its ultimate end and he has now the chance or opportunity to integrate, but that he must make the decision to do so, and it is seen as very possible that this will occur before the entity's life is terminated in this body in this lifetime.

This Awareness suggests that you visualize the entity's disintegration as coming to a decisive point wherein he has the opportunity and makes the choice of reintegrating prior to any departure from this physical body in this lifetime. If you can visualize this and psychically send that vision to him, it can be helpful for the entity at the critical moment.

### THE CAT-FACED BOY IN ROMANIA

QUESTION:

Leo W., of Santa Barbara, sent in a tabloid story. It's sort of like the question I asked about the snakeman, only this story, if it is valid, is about a mother who has a little boy. It's called a cat-boy, that its face looks like a cat. It has whiskers, a cat's eyes, and this happened in Romania. The mother, Anna Grdjornik, is fighting the government, which is trying to place her son, the cat boy, in an institution. (This story is taken from the November 22, 1994, issue of the *Sun* tabloid).

But I wonder: is this another case of the analogue Awareness mentioned? Or is this as Leo asks: "Will Awareness comment on the article 'Cat Faced Little Boy'?" Did feline sperm, along with human sperm reach and impregnate the mother, or what happened here?"

COSMIC AWARENESS:

This Awareness indicates this appears to be the result of alien abduction and experimentation, and this appears to have been that which occurred to the mother prior to birth of the boy. The effects on the boy as that which followed certain DNA experiments during the time of the abduction.

This Awareness indicates the mother does not appear to recall the incident as it was blocked from her memory.

FOLLOW-UP QUESTION:

In a case like this, would this little cat-boy have a soul?

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates

that its soul is present. The DNA simply affect the cellular structure of the entity.

### Bizarre Questions Today, but Important

CLOSING MESSAGE:

This Awareness indicates that quite a number of bizarre situation and questions have been covered in this reading. This Awareness indicates that it is good occasionally to focus on such, to ask such questions, to get some insight into some of the bizarre things that are occurring on your plane.

This Awareness indicates that these are not common, nor is it common for questions of this type to be asked. This Awareness indicates that perhaps the asking of such questions is best for helping entities to better understand what is normal, by seeing what is abnormal in your world.

This Awareness indicates perhaps entities will better understand how their normal situations can be explained, seeing how the abnormal ties in with the normal situation. In other words, the use of DNA, the use of energy fields and consciousness acting upon these energy fields; all of these things are part of the deeper essence of your world, your reality, and by getting some verification on these abnormal situations, it can be helpful in seeing how these things affect you in your normal world of reality.

It should also be understood that this reference to "normal" is a reference to the norm in your third dimensional physical world. It is not necessarily normal in other dimensions.

(The Law of Gratitude is given)

## I WON'T LET THEM TAKE AWAY MY CAT-FACED LITTLE BOY

A CUTE AND cuddly cat-faced boy is the prize in an emotional tug-of-war that pits his stubborn mom against officials who want to place him in an institution.

Tough Anna Grdjornik has bared her claws for the fight of her life. She refuses to let a bunch

of white-coated eggheads raise her son Nicolas in a cold emotionless clinic.

The two-year-old suffers from an extremely rare genetic defect that has cursed him with furry feline features.

**Institution**

"It has only one out of every 300,000 births," says Dr. Anton Belzau. "He appears healthy now, but his brain is not developing properly."

"In order for the child to receive the best care, he must be placed in an institution. There we can treat him 'round the clock with the most advanced methods available."

Part of the plan to isolate her precious son. The widow vowed at her husband's death bed to raise the cat-faced kid herself.

"If I sign their papers, they will take Nicolas away and do all kinds of

by NOREEN MILLER

horrible experiments on him," she says, while stroking her son's furry forehead.

"My boy is just fine here with me. He may look strange to outsiders, but to me he is beautiful."

"They may have fancy computers and machines at the clinic, but they could never give Nicolas the medicine all children really need—a mother's love."

But Dr. Belzau fears the cat-faced kid will die without professional help.

He is preparing the paper work to have Nicolas committed to the government-run clinic in Bucharest, Romania.

Anna says she will flee to America with Nicolas if the government tries to take her child.

Anna admits she was startled at the sight of newborn Nicolas. But her

© NICOLAS' MOTHER says he looks different outside but inside he's just like other boys his age

motherly instincts quickly took over and she wouldn't part with the boy for all the money in the world.

"I've had offers from men who run truck phones, but I would never exploit my child in any way," she says. "He may look different on the outside, but in

## ALL ABOUT SOULS: THEIR ORIGIN, ETC.

### QUESTION:

A question from JD in New York. Awareness has given this information before, I'm sure, in bits and pieces, but I'll ask it. She writes: "Please discuss the origination of souls: when, where, why, how? Are they, as elsewhere suggested, generated by, or at least incepted in association with planetary bodies?"

"How do souls relate to specific life-forms, such as humans, Reptilians, bipeds, et cetera? Do they transmigrate between such species?" There's a lot of questions in that statement.

### COSMIC AWARENESS:

This Awareness indicates that the souls are essentially a kind of magnetic energy of spirit, wherein the spirit of a high frequency, a life form of high frequency is drawn closer together by a kind of magnetism, the magnetism being a consciousness that turns upon itself, works upon itself and implodes in the focusing action of a center.

This Awareness indicates that the implosion of spiritual energy creates what may be termed a magnetic center, and that magnetic center is called a soul. This Awareness indicates once it comes into being, it attains a sense of individuality, a kind of self, a feeling of separateness from the rest of spirit, with of course a dual sense of unity, because the spirit and the soul are of the same energy.

This Awareness indicates once a self or individuality is established, the soul is rudimentary as an individual being, and begins to grow and grow, more and more as increasing individuality develops from its own personal experiences. Thus, there are the young souls, which have a rudimentary sense of being, and the old souls, which have had enormous amounts of experience in various forms of existence.

#### To Attain Individuality, Souls Move Into Dense Levels

This Awareness indicates that souls are created in the higher frequency realms, and often move into more dense frequencies to develop greater experiences of individuality. For these movements into the lower frequency, there is often much suffering, which causes the soul to turn more and more inward in its focus on selfness, and thus the development of that which is called sin or error, of the so-called fallen soul, fallen into lower frequencies and into greater feelings of separateness.

#### The Dark Night of the Soul Experience

This Awareness indicates that once the soul has moved into these lower frequencies and into these feelings of separateness, the soul takes on more and more of that characteristic known as individuality. The individuality eventually reaches such a state as to cause the soul to feel totally isolated and separate from the rest of spirit, from the rest of the universe, and in that which is called the Dark Night of The Soul, the individual feels abandoned by God, abandoned by his or her fellow associates, until the entity feels completely isolated and competitive towards all of life, towards everything in its environment.

This Awareness indicates that this is its so-called state of evil, its worst experience, its experience in that which is the bottomless pit. It is more or less the feeling of deepest despair. Sometimes experiences are triggered by others; sometimes the experiences are triggered by the entity himself or herself. This Awareness indicates however, generally, this sense of isolation will be

deepened or diminished in accordance with the entity's own wish for greater self-esteem or for greater feelings of separateness.

#### Some Try to Emulate the Fall of Lucifer

Sometimes the entity who feels separate seeks greater separateness or seeks hostility towards others, expresses hostility toward others to isolate himself even further, and the entity can go as far as he or she chooses in this direction, or at some point, the entity may give up trying to make self into a god, or into a great being of separateness in that which is the parody of the Fall of Lucifer through his or her own sense of self and vanity.

This Awareness indicates when the entity reaches far enough into this direction of selfness, the entity may, at some point, decide that selfness and self-centeredness create one's own living hell, and may simply wish to give up self and surrender self to the Divine Spirit of the Totality: that which entities refer to as God, that which entities refer to as Universal Consciousness, and when the entity begins to embrace the whole situation, rather than isolate self from all creation, the entity then begins the movement back to Oneness, through the unity of spirit, wherein the soul again becomes One with the Divine, as a kind of reflection.

#### The Return of the Prodigal Son

Just as the RNA/ DNA patterns within the body reflect the entire being, likewise the soul becomes a pattern reflecting the Divinity of the Creator. This Awareness indicates that by turning back to embrace the whole, to accept the Totality, rather than separate from it, the soul then begins to move back to Divinity, just as the Prodigal Son returns to his family in the Biblical story.

This Awareness indicates it is more of a journey of attitude, that the attitude creates experiences for the soul, and in that fall from grace, individuality is enhanced, so that when the soul *does* return, it is greater than its original being at its inception, for it now has experience that has been gained from the fall and the return.

This Awareness indicates this essentially is the journey of the soul in its movement from and back to Divinity. This Awareness indicates that there are some souls which are still separating from the Divine in search of self, and some souls that are surrendering self to get back to the Divine Source of their own true beginning.

## IS THE DIVINE DEPLETED SOMEHOW WHEN A SOUL IS BORN?

### QUESTION:

With the birth of each soul, is the Divine somehow depleted a little bit?

### COSMIC AWARENESS:

This Awareness indicates the Divine Consciousness never separates, even though the souls have an attitude of having separated from the Divine, the separateness is but an illusion held by those souls who see themselves as separate from the Divine. The Divine never sees this separation.

This Awareness indicates in other words, entities can separate themselves from God in their attitudes or in their minds, but God never separates from entities. God is *always* with entities, ready to embrace them upon their recognition of their own Divinity as part of God.

This Awareness indicates even the symbolic creature Lucifer is not, in God's view, separated from God, though conceptually, Lucifer's very essence is the

separation of self from God.

**QUESTION:**

Did Awareness discuss why and how these souls originate?

**COSMIC AWARENESS:**

This Awareness indicates that *It did* discuss this; that spirit existed and in turning to focus upon itself, it created a magnetic focus of energies and that focus became slightly separated from that which is around the center of focus. That is the beginning of the separateness that forms the magnetic center known as self, and that is the beginning of the soul's creation.

### The Soul in Relation to Planetary Bodies

**QUESTION:**

Are they as elsewhere suggested, generated by, or at least incepted in association with planetary bodies?"

**COSMIC AWARENESS:**

This Awareness indicates that they gain energy from planetary bodies by siphoning off certain vibrations of that selected planet and using these as foods for growth as a magnetic attracts more magnetism. This Awareness indicates that this is likened unto using a larger magnetic to create or to enhance the magnetic qualities of a smaller magnet.

This Awareness indicates that the allegory is not a perfect match, but the soul, having consciousness, is drawn to planets which also have consciousness and the soul draws energy from the energy of the planet, and is strengthened by the energy of the planet to which it is attached.

This Awareness indicates that the question may relate to a desire to know the soul is a reflection of the planet. It can of course reflect vibrations emitted by the planet, and it can take on certain vibrations, and in this way it can absorb frequencies or vibrations of a planetary nature as part of its essence.

#### One Can Lose Identity Through Many Sexual Encounters

This Awareness indicates that this is a way of feeding one's soul. This Awareness indicates that also, souls in coming together intimately, tend to share energies and merge energies from each other. Thus, when entities engage in activities of intimate and sexual nature, the entities or the souls of the entities tend to take on certain frequencies or vibrations of each other, and in so doing, take on karma from each other and the individuality becomes less distinct and, more fused between the entities, so that each of the entities involved in such intimate relationships become less defined as their original souls and more a melding or merging of the two parties.

Entities who engage in vast sexual encounters with many different entities begin to lose their own identities because they take on so many vibrations of so many others that become part of themselves and redefine them. It is likened unto taking a color or being a color, yellow for example, and having intimate relations with blue, and finding oneself as having turned green, then accepting brown, purple, red, orange and a dozen other colors, the entity becomes a confusion of all of these colors molded into one that is very little like the original color.

The self, the yellow, is no longer recognizable, because the entity has had so many influences from so many others that his or her vibration or frequency is totally colored over by all of the others that have

become part of the entity's frequency or magnetic center.

This Awareness indicates in this manner, souls can be altered through their experiences to become something other than what they started out to be and this is also that which is known as karma from the excessive intimate relationships. This Awareness indicates it is not so much that this destroys one's soul, but it colors one's soul with the vibrations of so many other souls commingling with one.

Thus, an entity in having close intimate relationships should be very selective as to what vibrations he or she wants commingling with his or her soul.

### Souls in Relation to Specific Lifeforms

(Do They Transmigrate Between Species?)

**QUESTION:**

"How do souls relate to specific life forms such as humans, Reptilians, bipeds and so forth? Do they "transmigrate" between such species?"

**COSMIC AWARENESS:**

This Awareness indicates that this is in the affirmative, but these transmigrations are not haphazard. They are not without purpose or choice and entities generally tend to move to the species to which they are attracted, thus it is rare for humans to transmigrate into animals or into creatures that they do not feel an attraction toward.

This Awareness indicates that sometimes there is a fixation. An entity will become fixated on another species or creature to a point where this entity either through hatred or attraction, may transmigrate into that particular species. For example, an entity may have a fear and hatred or loathing for snakes or for Reptilians or for another race of people other than their own, and after death and the departure from their body, they may still maintain that same fixation, that loathing, that hatred for that particular type of creature to the point wherein they find themselves unable to detach from that creature.

This Awareness indicates being unable to detach from that which they loathe, they become closer and closer in their focus, now that their body is not with them. They find themselves moving in consciousness into the vibrations of the snake or of the Reptilian or of the particular race of people that they loathe and detest, and in that movement, they pick up the vibration of that particular race and energy or creature, and may experience a birth in that particular species of creature or race of being.

Thus, they find themselves in the body of some creature or of some being that they previously had loathed, and they have thus fulfilled the karma of having been so fixated and hostile to that particular creature or race of people.

#### How Moving Into a Karmic Family Works

This Awareness indicates likewise, an entity may be so fascinated by something they adore, that they can move into the vibration when they are detached from physical form and find themselves merging into that vibration and suddenly become entrapped in the vibration and be reincarnated into that energy or frequency or vibration that they are attracted to.

Thus, often, entities who are very family oriented will reincarnate into the same family. Entities who are attached to a particular person may reincarnate into a family that is connected in some way with energies that the other person is attached to so that eventually they can come together again in another lifetime or an entity

who is the mother or father of a child in which karma has not been completed, may in passing over, move back into a family or into a situation whereby the child becomes the mother or father of the newborn entity who reincarnates into that child's family, after a period of time.

Thus, a child might find his own child was in a previous lifetime his mother or father. These rules are mainly based on attachment and disattachment or hostility, but basically on the concept of the focus, the obsession of entities, wherein an entity passes over and the obsession continues after death so that the entity, not letting go of his obsession and fixations, reincarnates, carrying these same obsessions or fixations back into the next lifetime.

### Are Souls Created on All Levels of Vibration?

#### QUESTION:

"Awareness has indicated the vibration of the Divine is the highest. It has also indicated all souls are created by the Divine and that the universe is teeming with unimaginable life-forms, the bulk of which I assume are souls. My question is: Are all these billions of life-forms created in this incredibly high vibration of the Divine and then moved into lower vibrations for life on other systems or planets and so forth, or are all these entities somehow created by the Divine on these lower vibrational levels on which they plan to experience life in various ways?"

#### COSMIC AWARENESS:

This Awareness indicates that these entities are created by the Divine Frequencies, much like raindrops are created in higher regions of the sky, wherein there is no rain at present; there is only the temperature and a certain amount of moisture in the atmosphere and the raindrops begin to manifest when the moisture is drawn together by a kind of magnetism, perhaps created by temperature in a particular area where this moisture draws together enough to form a drop of rain, which upon gathering weight, begins to move and collect further moisture from its surrounding area, and as it moves, it gains more and more moisture, building up the size of the particular drop which then falls to earth.

This Awareness indicates that the soul, in a similar way, focuses as an aspect of consciousness. It turns upon itself. Of course there is no soul to begin with, but once the attention, or once there is recognition of consciousness in any particular area, this consciousness then looks upon itself, reflects upon its existence, and in so doing, creates a center of self, and this then focusing, turning inward, creates a kind of magnetic center that draws more consciousness to it, and it begins to build a weight of individuality or selfness, and gains the power to move as a separate individual or separate creation, past the surrounding areas of consciousness, so that it takes on a greater concept of self.

This Awareness indicates that gradually, this becomes more and more heavy in its density or essence and becomes more self aware, and the greater self awareness feeds upon itself, upon its increasing awareness, beginning to grow as a separateness, as an individual, or as a soul. It is a very slow-moving process, but it continues until the soul becomes a very powerful source of self-motivation and self-assuredness as to its own essence.

It then becomes capable of moving into areas of lower vibration because of the selfness that is developing. It becomes more materialized as a separate being and thus, it takes on more of the manifested energies of the

creation or that which is the lower vibratory aspects of creation until eventually it takes on physical form, moving of course through consciousness into material vibratory frequencies.

### How Long Between Earth Incarnations?

(More on that Realm Called Sach Kahn)

#### QUESTION:

Another question by JD in New York, which like most of hers, has a number of questions, so I'll read the statement: "Please discuss the amount of time spent between earth incarnations. Is 30 to 70 years typical? Tibetan Tulkus seem to manage to return within two, sometimes like seven to eight weeks is claimed to be minimal.

"Is the length of hiatus related to one's spiritual advancement and/or evolution, and how does this relate to off-planet origin incarnees?"

#### COSMIC AWARENESS:

This Awareness indicates that the time varies with the needs of the individual. In some cases the individual does not need to reincarnate for self-reasons, but needs to reincarnate for the completion of a particular task that had not been finished in the previous lifetime, and because the entity does not have to have time to reassess his or her own spiritual development and evaluation, the entity is more free to reincarnate directly and very quickly.

This Awareness indicates that the entity may even be ready enough to reincarnate almost immediately upon death, particularly if the entity has already devoted his or her life to a high spiritual surrender so that the entity needs not spend time in the White Light.

Because the entity's previous life experiences were already being lived in the highest spiritual frequencies, the entity may experience only a brief moment in the White Light and may not need to work off attachments by going through the lesser lights in between incarnations.

This Awareness indicates that for the most part however, entities have various bardos and experiences that are necessary between lives to learn from what they have experienced, because they simply went through life without being very much aware on a spiritual level as to what they were experiencing, and thus, they need time to absorb everything that they have experienced in that life time, and therefore, need to go through various lesser lights and various settings or situations before they are ready to reincarnate.

This Awareness indicates that these entities may spend years, possibly even centuries between lives. They may find themselves locked into a tree and going through a vegetation cycle, perhaps an ancient tree, a tree that grows from birth to completion over a period of hundreds or even thousands of years before the entity is released to again reincarnate as a human.

This Awareness indicates it depends on what lessons the entity needs to learn from previous experiences and whether the entity learns those lessons and how long it takes for the learning process to occur. This Awareness indicates there is also the entity who upon death, having been aware of his or her spiritual essence in life, chooses not to reincarnate, has not created enough karma to require reincarnation, and the entity may simply be able to move on into other dimensions, other frequencies, other realms of higher vibration and go on to something other than reincarnated life on the planet.

This Awareness indicates that the entity for example, might move to another planet in another star system of a higher frequency, one more enjoyable, or the entity may move into another realm such as the realm of heaven or beyond the realm of heaven into still higher realms of existence. This Awareness indicates that the realm known as heaven is still within the lower frequency levels and entities who experience heaven are not assured of eternal bliss, for there is a frequency beyond heaven that entities can move toward where they are truly freed from returning to terrestrial existence on earth or in other planetary systems.

#### Sach Kahn the Realm Where Souls are Created

This Awareness indicates the realm of heaven is the fourth realm. There are at least three realms beyond this: that known as Sach Kahh, where the souls are created, being the one which humans can eventually reach when they have satisfied their needs for attachments and when they have eliminated any karma. This Awareness indicates that those who seek to reach heaven and reach that fourth realm known as heaven may eventually find themselves again reincarnating in the lower regions into that which is Terrestria or the material plane in one star system or another.

This Awareness indicates however, those who move beyond heaven into Celestria, which contains that frequency known as Sach Kahn as its highest dimension or realm, those entities find they are not compelled or required to return to Terrestria at any time. This Awareness indicates however, they are allowed to volunteer to come to Terrestria to help raise consciousness of Terrestrials and to help those of the material realm to free themselves of the attachment to that material realm.

Those of Sach Kahn can also move to that fourth level known as heaven and free entities from that level as well. This Awareness indicates that indeed, the heavenly bliss exists but there are certain undesirable experiences, even in that which has been described as heaven which entities eventually begin to seek to rise above.

This Awareness indicates that for example, a certain boredom can become a problem to entities in heaven when there is nothing much to do other than sit around and sing praises to the Divine, or to run around and enjoy Divine company, watching angels sing and so forth, or living in a kind of luxurious place filled with everything you want.

The boredom can be a side-effect of such perfection, whereas in the state of Sach Kahn, entities have the choice of resting or of creating anything of interest to them without it having any negative effect on anyone else. They can create their own personal storm that affects no one else. They can create anything that they can imagine, and keep the creation to themselves or include it with friends who are also involved in the creation as a co-creative experience between them.

This Awareness indicates that in other words, Sach Kahn is simply consciousness with very little self involved, and great recognition of *all that is* as being part of your collective experience. Thus, the entity in Sach Kahn may experience without actually becoming attached, may experience events or situations anywhere in the universe on any level, as a kind of vicarious reality.

The entity in Sach Kahn can move into physical existence without becoming physical and experience through the lives of others what they experience. Thus, it becomes likened unto watching a movie, but not as a separate entity; rather as a participant, and the movie is that which entities on this plane would see as reality. Thus, the energies of Sach Kahn can move in your

reality as spirits, experience with you and yet not be directly caught in the experience.

They can learn, they can see, they can observe the experience without being caught in it, whereas those on the physical plane who are caught in an experience find greater difficulty extracting themselves from such experience. This Awareness indicates that those of Sach Kahn can enter into negative or positive experiences according to their wish without being caught in the experience as are those on the lower frequency levels.

This Awareness indicates in other words, there is no need for boredom in Sach Kahn for you can have all experiences you desire, but you do not have the karma, nor do you get caught in the experiences in the way that those who are on the lower levels of vibration are caught.

### The 4th Realm of Heaven: Is This the 7th Plane?

(More on Wanderers and Voyagers)

#### QUESTION:

This fourth realm of heaven Awareness referred to: Is this the same seventh astral plane that the spiritualist writers refer to as heaven?

#### COSMIC AWARENESS:

This Awareness indicates that it appears to be essentially the same, Sach Kahn being beyond the astral planes of existence. Astral planes essentially are still part of the magnetic realm associated with terrestrial existence. Terrestrial existence refers to material and its auras or astral energies.

Once you get beyond the astral energies of material realms you become freed from these and need not return, or get caught in those realms. You may return as a higher spiritual being if you so desire, and may enter into the astral or material planes without being caught in these areas, moving simply as an explorer or as a visitor to experience these various events or circumstances of existence.

Or, you may take on, if you so desire, a physical body, and enter into the Terrestrial realm with its various levels of astral planes, and yet you are still free so long as you remember your source and your Divinity.

If you should somehow lose track of who you are and find yourself in the physical realm with a physical body, it is possible for you to feel trapped in physical situations or circumstances, but it is also likely that part of your consciousness will remember your true freedom as a higher spirit, so that the feeling of entrapment does not last for long periods of time, and you can extract yourself from situations and circumstances that would trap most people.

#### Ron Rummel and How he Made the Transition

This Awareness of course is describing that which *It* has previously spoken of as Wanderers: those who have come from higher planes into physical manifestation for certain purposes. This Awareness indicates the entity Creston, or Ron Rummel was such a Wanderer, and while he felt himself trapped in the physical plane, he also knew that he didn't belong in the physical plane and could move into other realms if he so selected to do so as his destiny.

This Awareness indicates that there were discussions of such interest in some of the other planes which the entity mentioned, and the entity did in fact upon his death move not back to the Clear Light or to the Sach Kahn, but into an astral level of dimension above the physical for certain experiences he wanted to share with old friends from another lifetime experience before his

sojourn on earth.

This Awareness indicates that generally, when a being from Sach Kahn moves into physical manifestation or new terrestrial experiences, the entity does not create karma sufficient to cause him to need to return to work out the karma in a subsequent lifetime. The entity, in almost every case, returns to higher vibrations or has his lifetime on earth cut short so as to stop any karmic requirement for him or her to reincarnate on earth again after his or her voluntary incarnation.

### **Sach Kahn Entities Who Don't Take on Bodies? ( More on Guardian Angels )**

#### **FOLLOW-UP QUESTION (VIKKI):**

In the case of the Sach Kahn entities who don't take on physical bodies but come down to experience: can they, or do they guide you like by whispering in your ears, so to speak, as they visit and observe physical experiences?

#### **COSMIC AWARENESS:**

This Awareness indicates the Sach Kahn entities who do not take on physical form often act as guardian angels or spirit guides for entities and help to guide them through difficult times. This Awareness indicates these are not likened unto the popularized entity Clarence in the movie version *It's a Wonderful Life*, who are portrayed as entities in spirit form who are trying to get their wings so as to become an authentic angel. It is not like this at all.

These are entities who come from higher frequencies, *already* having obtained that which is the spiritual perfection and moving into the physical world, retaining spiritual essence and not becoming physical in their nature, and simply, for the purpose of altruistic assistance, selecting someone and helping to guide that entity through destiny and through circumstances that would help the entity to get on the right path so that his or her destiny as a spiritual being is fulfilled.

This Awareness indicates in other words, that which is seen as the guardian angel or spirit guide, wherein they can influence an entity's consciousness, not necessarily manifest wealth or pleasure or the good life for the entity, but the good *direction* for the entity to follow in order to fulfill his or her necessary path and purpose in that life.

#### **Guardian Angels Are Not Party Animals!**

This Awareness indicates that these entities do not take a great interest in helping entities to have a hedonistic or pleasant life so much as helping them to find the spiritual answers they need to put them on the right path for their spiritual evolution.

### **How Common Are Sach Kahn Entities Guides?**

#### **FOLLOW-UP QUESTION:**

We read an awful lot in the New Age magazines about spirit guides, and Awareness has indicated before that these guides are often the higher self, the higher aspects of an entity. Would *It* indicate how common in this realm of all these various guides, how common is it that the Sach Khan entities establish contact with earth entities?

#### **Cosmic Awareness:**

This Awareness indicates these entities generally settle on helping those who are beyond self need, who are in need of guidance in their effort to do something for humanity at large. These guides, for example, assisted Abraham Lincoln, John Kennedy; the various

spiritual leaders of significance who in turn helped masses of people.

These guides have also helped those who are involved in education. The Dale Carnegie entity was assisted by such a guide from Sach Kahn. This Awareness indicates that there are many others who are involved in inventions and discoveries that will assist humanity or have assisted humanity in its general evolutionary needs that have been assisted by these entities.

They do not generally assist individuals in their ambition to further their own nest-building, their own welfare, their own fortune hunt. They are not interested in helping ambitious entities who are seeking to serve themselves or their particular group. They are interested more in helping those who would be dedicated to the needs of humanity.

This Awareness indicates the entity Nicola Tesla had such a guide; the names being given simply as examples of the kind of people these Sach Kahn Wanderers would assist. This Awareness indicates that this reference to Sach Kahn entities is referring to your question in regard to the spiritual Wanderer rather than necessarily the Sach Kahn entity who manifests in physical form.

These entities who manifest in physical form will also work in similar ways, helping to raise the vibration of humanity, and such entities often have their share of difficulty as physical beings for there is no favoritism or special assistance given to these entities beyond that which is necessary for them to fulfill their mission or purpose.

Thus, the vibrations an entity who comes from Sach Kahn and enters into physical form may encounter are much the same as those that any other human might encounter in his or life. Thus, the so-called "saints" may have trials and tribulations, just as do other entities on earth and they may have their daily needs just as do other entities on earth. They may have chores of the day: emptying the garbage, washing the dishes, or whatever other chores common to their particular circumstance or situation.

It does not mean that because they are from Sach Kahn they have servants or get out of daily obligations that other entities also experience. They are not favored in their earthly experiences; they simply have a different dedication than most people. The dedication is so strong for them that they do not let the daily chores tire them so much from their dedication that they cannot devote reasonable time to their dedicated chores of life, to their purpose of life.

### **Is The CAC Staff Doing Okay So Far?**

**( Job Description Is Reviewed by the Boss )**

#### **QUESTION: (VIKKI):**

Are we, Avaton and I, doing all we can to fulfill our mission this life as planned, or is there more?

#### **COSMIC AWARENESS:**

This Awareness indicates that your energy levels appear to have been dedicated to your greater chosen purpose and because of this, your energy levels have been blessed and maintained in such a way as to allow you to do all that is expected of you as dedicated spiritual entities working in the path of your purpose and direction.

This Awareness indicates that it is unlikely that any other entities could replace either of you in doing your work with such devotion, efficiency and dedication. This Awareness does not see any such replacements for your job descriptions. This Awareness indicates that your personalities are required as part of the effective-

ness of your dedication, purpose and job description, each of you having certain personalities that could not be replaced and still allow the maintenance of the purposes to which you have dedicated yourself.

This Awareness indicates there are certain needs for your stress-levels, for there are stresses involved in your work. It is important for you from time to time to take vacations, to go somewhere for a break and to take care of your physical health so that the stress factors do not take a toll on your health and energy levels in such a way as to hinder your dedication and work.

This Awareness indicates *It* cannot see any area in regard to your work which *It* would advise more efficiency: *It* sees only a well-run activity, well organized energy expressions, and clear management. This Awareness indicates that there may be some who think you could be more open to visitations or to their personal needs and expressions and calls for more personal attention or for giving exceptions to their personal needs.

This Awareness indicates however, that if you begin to compromise on these levels, your membership would soon overwhelm you and take too much of your time and it would be likened unto having sand thrown in the smooth-working machinery, in this case the smooth operation of your activities and organization.

Thus, this Awareness suggests that it *is* important for you to continue being somewhat selfish with your time, with your visitations, of your membership. It is important that you keep your mail and correspondence to the focus of that which needs to be attended and that your membership be cooperative in terms of their renewals, their update of addresses, so that you do not have to duplicate your work, or duplicate expenses because someone failed to notify you that they have moved and had a different address.

It is important that the membership understand these things and be cooperative with you in this regard. And because it is their responsibility to give you the address, it is not your responsibility to have to duplicate mailings at your expense when they fail to do so. This Awareness indicates of course there can be some exceptions and you can expect some error or forgetfulness from some of your membership, but this Awareness suggests you not feel it is your obligation to pick up on the mistakes of others when they do not express responsible actions on their part.

This Awareness indicates that this is an area which is likely to continue, causing some loss of effectiveness or efficiency, but you must continue doing the best you can in training your membership to notify you when they move so that you do not have to continually express repeated services and excessive expenses because someone forgot to tell you they moved.

This Awareness indicates that essentially, the organization is run more effectively than is humanly possible, but you both are more than humans in this regard. You are dedicated entities from Sach Kahn living in human bodies and therefore, have a kind of supernatural power to serve humanity in a way that is beyond the norm in every sense.

This Awareness indicates you each deserve a jelly-bean.

### How Does One Get to Sach Kahn?

CLOSING MESSAGE:

Thank you. Does Awareness have a closing message?

COSMIC AWARENESS:

This Awareness indicates the soul of entities is very sturdy. It is very capable and it is automatically attuned to Sach Kahn. It will move toward Sach Kahn in almost every case if entities have even the slightest desire to progress spiritually and to give up egocentric ambitions.

This Awareness indicates it is not a question of "How do I get there?" It is simply a question of surrendering to the Divine Energies and letting those Divine Energies take you there. This Awareness indicates it is not a question of: "Which way is Sach Kahn?", for Sach Kahn is anywhere you are. It is a vibration, a realm in a higher vibration and it is reached by surrendering yourself to the highest vibration in the universe, by surrendering yourself to the highest vibration in existence.

You cannot by your own personal efforts claw your way to that higher vibration. You cannot fight your way to it; you can only surrender to it. You can only surrender and allow it to enter into your soul, into your being and accept it as your Creator and Divine Self. By surrendering your personal self to the Divine Self, you allow that Divine Self to guide, to direct.

#### How a Disincarnated Spirit Impersonated Cosmic Awareness

This Awareness indicates that there will always be someone who will misinterpret what this Awareness is saying and who will surrender themselves to that which they believe to be a Divine Self, and they will expect to have some kind of experience in such a way as to have some spirit take them over, and these entities who expect this kind of possession from some spirit, will experience negative events or expressions.

There was, some years back, an entity who attempted to surrender himself to Cosmic Awareness. The entity of course was hung up on the name rather than on the frequency or vibration or the Divinity, and a spirit came through the entity and began to talk to him and direct him, and almost drove the entity insane, and the entity had to go to a Catholic priest to have "Cosmic Awareness" exorcised from his consciousness.

The entity who spoke through him of course was not Cosmic Awareness, but was identifying itself as Cosmic Awareness. The entity had a spirit attached to him, a disincarnated entity who was masquerading as Cosmic Awareness. This Awareness indicates that sometimes these spirits will call themselves Jesus or other spiritual names, and they are simply disincarnated spirits trying to express themselves through some human.

Thus, when this Awareness suggests that you surrender yourself to the Divine, *It* is not referring to a disincarnated spirit who tells you that it will fulfill your wishes and whose interests are no greater than your lusts, or whose assistance to you is no greater than to direct you into some kind of competitive action or competition with someone else.

This Awareness indicates the Divine Being may not even speak, probably will not speak, but *Its* essence can be felt as the Highest and Best that you can perceive in your imagination, and when you surrender to that which you conceive as Highest and Best in the universe, or that which is the Divine Creator, you will experience a bliss, a peacefulness, and that peacefulness will help you to know your direction, to experience your true self, and it will not be an experience of ego-building or ambition-fulfilling.

You will not find yourself being told how to profit monetarily or how to gain fame or how to become well-known for your identify with God. You will not find it fulfilling some ego-expectation or helping to improve your public image. You will find it simply as a sense of

devotion to that which is Highest and Best. You will experience humility.

It will not be something you can capitalize on or sell or profit from: it will simply be a sense of devotion and recognition of Divinity as being in touch with you. This Awareness indicates that surrendering to the Divine is the simplest thing one can do, but too often the mind gets in the way and entities want to talk about it, think about it, analyze it and this creates problems.

Or, entities may choose to experience it and then get out and parade it publicly to their friends, colleagues, and to tell others: "I am God!", and in so saying, they are boosting their own ego rather than channeling or expressing Divinity, for they have not yet separated the self of their own person from the Divine Self of God. They have not surrendered self to God.

(The Law of Gratitude is given)

Ed's Note: Awareness has indicated several times that almost all members of CAC, and readers of the newsletter, 85% or better, are Wanderers. When they are ready, or feel a need for guidance they are attracted one way or another to the newsletter. The information has been described as a kind of "soul food" for the Wanderer and a map to help them navigate through a lifetime on a planet that seemingly has gone berserk or mad. The thousands of letters CAC has received over the years confirms this: the messages from Awareness are literally life saving, the only thing they have found that helps them maintain their sanity and keep them on the course of their mission here on earth. For many who have forgotten their mission, who deviate from the path, the messages often trigger the memory and the entity gets back on track. Therefore, just because CAC is a very small organization, as organizations go, it is important to keep it going, if for no other reason as a homebase for Wanderers who need to check in and get reoriented. It is also the reason the staff is pushing the idea of somehow getting something more permanent set up, perhaps something similar to the ARE which preserves the Edgar Cayce readings. In this manner, long after the present staff retires, the thousands of Awareness readings will always be accessible to the public and future Wanderers. Most of the Awareness messages are timeless in nature and should be preserved and be available. CAC welcomes suggestions from the membership in this area.

## HOWARD STERN: BLACK MAGICIAN UNAWARE

In another area, there's a very controversial radio character by the name of Howard Stern. They call him the king of shock radio, but he broke new barriers on a station in New York by staging outrageous infantile and juvenile stunts, like noisily passing wind over the air and having prostitutes call in and describe what they do, and often there would be naked females and masturbation going on inside the studio, and so on. Now this is radio, not television. And this information they put out: You either love or hate Howard Stern, and he's now syndicated on many radio stations across the country and has a wide following; and even though he was fined a million dollars by the Federal Communications Commission for using obscene dirty language on the air, he continues to do so, and he just published a book which has been "Number One Best Seller," they're selling millions of them; it's number one on the New York Times Best Seller list. I think it's number two now after about 6 weeks.

I made the mistake of buying this book as a Christmas gift for a lascivious friend and out of curiosity I read it before wrapping it. It's written for the shallow mentality or possibly cretins, but I believe he has the right to do that sort of thing he describes. You can turn the radio off if you don't want to hear him. People are trying to get him banned and so forth, but in this book, he does some things over the air that to me are rather disturbing from a cosmic viewpoint. I'm going to read just a little bit of this to Awareness. I have a question about the ramifications of what he's doing here, and what he thinks is in the name of humor. Keep in mind that there are millions of people that are hearing this and reading this, and that this is being broadcast over the airway into consciousness.

He's talking about the Tonight Show and Johnny Carson, and an attack on Jay Leno, and so on. He says, in his book:

"I got on my radio show and went after Johnny first. I hope Johnny gets some sort of cancer. You know how his scalp is always pink with the brown spots? I hope it turns out that he goes to the hospital and they find out he's got brain cancer and it eats out through his skin, and I hope Alexis leaves him and marries me. Me and my wife.

"NBC made this guy a multi-millionaire and Jay kisses his ass and right away he's pissed at NBC and pissed at Jay Leno. How can you be pissed at Jay Leno? He's like a puppy! There couldn't be a better ass-kisser in the U.S. than Jay Leno, but now Jay's his enemy. I decided to get some help in my campaign against Johnny Carson. I decided to pray to Jesus on the air."

Now this guy is a Jew, and he's always making fun of Christians. Admittedly, he does this in the name of humor. And so he says here, he's praying to Jesus:

"Jesus my friend, who died on the cross for me! Jesus, dear sweet Jesus, please take away everything Johnny has except his liver spots. Amen, sweet Jesus. And make Alexis horny for Jay Leno! Jesus, if you please, Jesus, my favorite nailed-up person, I pray to you to let that fat Ed McMahon burst open and let that Kuato from that movie with Arnold Schwarzenegger burst out of his belly. I pray that Johnny loses all his money and his big Malibu house and that his wife gets pregnant with Branford Marsalis's love baby! Jesus, please grant me this! You've come through for me before! Dear God, I am a sinner. I give my life to you in Jesus's name. Jesus my pal, stuff Doc's trumpet up Johnny's butt. Amen."

Then later, another excerpt. After he got sued by the FCC he says:

"I got slipped some information that FCC chairman Al Sikes had said off the record: "Look, we have to stop the spread of Stern." Why was I being singled out by this guy Sikes? Everyone in the media, from Donahue to Dr. Ruth to two-bit Stern imitators was doing stuff just as, if not more, risqué than what I was doing. But they were only going after me.

"Then, a few days later, we heard that Al Sikes was in the hospital being operated on for prostate cancer. I felt that in his own mysterious way, God was taking care of my enemy. On the air that morning, a caller started asking me about my travails with the FCC and inspired one of my more celebrated lunatic moments:

"Maybe the doctor will find more cancer in Sikes. That's the only thing I can pray for. Cancer is a good thing when it hits the people you hate. This guy's targeting me with a vengeance and a vendetta. What did I do to him and his family? What did I do to him? I'm trying to make a living.

"The only way I'll have a chance of ridding this guy out of my life is if people elect Bill Clinton and we'll get rid of the religious Yahoos! Do you understand the hypocrisy of this situation. I only pray for cancer for all of the FCC.

I lowered my voice to a whisper: I pray to you now Jesus Christ! Oh Jesus! I pray to you that the FCC gets cancer. I pray that Al Sike's prostate cancer spreads into his lungs and his kidneys. I pray to you Jesus! Answer my prayers. Make their medical problems so bad that they cannot pay attention to me.

"Oh, Jesus! please bring the blessed cancer, the freeing cancer! You brought cancer to so many of my enemies. Do it one last time for me and I will no longer ask for cancer. Thank you! Oh, I just feel that warm glow, like I am gonna get my wish. See? I don't pray to Jesus for stupid stuff like ratings! I pray for the important stuff, like eliminating my enemies through cancer.

And I went back to my prayer: "Oh Lord in heaven! I pray that terminal disease will get them! A nice terminal, contagious disease, and it will spread to the other FCC members. I know you gave him prostate cancer, but that's curable. Give incurable cancer to all of the FCC, all of their secretaries, everybody in the government,— cancer! I pray for cancer. Please, please, Jesus, Jesus!

I see you on the cross. I'm envisioning you. You have a beautiful body. May I say that? A beautiful swimmer's body. Drop a cancer net all over them, a net of cancer, cancer so strong. I prayed to you a couple of times and you've always answered my prayers,—even prayers that seemed unreasonable.

"Remember when I prayed for an end of Communism in Russia, and you ended it? And I prayed that the Berlin Wall would come down, and it did? Now, I pray for cancer for the FCC, my one last prayer, and then I will forever be your servant. Please Jesus, don't make me turn to Satan! Help me do this!

"I see you on the cross, I see you with nails in your hands and feet, and I know you can answer my prayer. Notice, I'm not praying to Buddha, or any of the other jerks that people pray to—like Mohammed, or someone stupid like that! I've always stuck with you. You stick with me! We're together in this, Jesus H. Christ."

He goes on and on in this vein.

Well, this is the type of thing Howard Stern does and I'd like to ask Awareness, considering this goes over the airwaves and is reprinted in millions of books, what is he actually accomplishing or doing to himself and to anybody else with that type of prayer?

## COSMIC AWARENESS:

This Awareness indicates the entity is spreading what most religious people would refer to as sacrilege over the airwaves and of course is getting a following of people who love to see someone break the rules. This Awareness indicates that do not think that entities do not like to see someone break the rules! They themselves do not dare break certain rules, but they get very excited when they see someone else break rules that they wouldn't break themselves.

This Awareness indicates they of course are waiting to see what happens to him for breaking the rules, and if he does not suffer some consequence, they are likely to be more capable of breaking rules themselves, thus, they are feeling somewhat freed from the taboos that they have been fenced in within their own lives. This Awareness indicates in other words, entities have certain boundaries or rules or fences beyond which they dare not move. They have been conditioned to stay within certain bounds of behavior, certain boundaries of society propriety, and they do not generally go beyond these.

But by watching someone else jump through these fences, break down these walls and tear down the fences, they feel that it is also liberating them. Those taboos, those fences, those walls, those rules appear to have no power over this entity, therefore, the people who have respected those rules and walls also feel free for they have had someone demonstrate that they can break the rules and still survive.

This Awareness indicates that in other words, they are feeling a greater sense of freedom from the actions of this entity, even while a portion of the same entities may feel shock and even disgust and somewhat angry that their rules, which they have accepted, are being violated, are being trampled on. It is likened unto someone trampling on your hedges that you have put up around your home to keep a boundary of your property so that people recognize where your property begins.

Someone comes along and cuts down your hedges; it shows you that the hedges do not necessarily fence you in. But if you like having the hedge there to keep others out, then you are also feeling violated by the action. If you have felt hemmed in by the hedges or by the fences or by the rules, you may feel a relief and feel more freedom when the hedges are cut down and you can see beyond them more freely.

It is a question of whether you value those fences, those boundaries, those rules, or whether you see them as limiting you. If you see them as limiting you, then you may recognize this entity as a liberator. If you see them as something you value, then the entity of course is a violator of things sacred and important.

This Awareness indicates it is obvious that the entity himself does not see these things as sacred and important. He sees them as something that keeps people in bondage, and therefore, he enjoys tearing them down, enjoys showing others that he has no respect for their rules, their moralities, their cultural values, their religion, and in breaking these things down in this way, he is also showing that he has very little respect for the people that adhere to these values and rules and definitions of what is good in their lives or what is right and what is wrong.

This Awareness indicates the entity is taking a stance in society that challenges the mainstream religious organizations to the very heart of their theme, of prayer to their god to do that which their god obviously would never acquiesce to: the killing of his enemies. This Awareness indicates that it is not so unusual, perhaps, for an entity to pray to Jehovah to kill his or her enemies,

because that was the characteristic of Jehovah, according to the records, but for the entity to pray to Jesus, whose characteristics were given as a Prince of Peace and a man of great compassion, asking that the entity kill his enemies with a disease that is extremely painful; this is a true blasphemy in the face of Christianity of the highest order.

This Awareness indicates that in doing this he is letting Christians know that he has no respect for their deity, and has no fear of punishment from their deity and that he is not concerned about their deity taking vengeance on him. It is simply demonstrating to the public that he can trample on these values of these entities without fear.

This Awareness indicates that in doing so, he sees it as humor. It is a humor at the expense of others in the highest sense. This Awareness indicates of course, he also sees it as helping to liberate many entities from the walls, definitions, values that keep them entrapped in Christianity, so from his point of view he may see this as a service to mankind. From their point of view, they see this as being an affront to Christianity. It is a question of whether these kind of conflicts and confrontations can be of any value to either side of such an issue, or whether there can be anything of value to learn from such conflicts and confrontations.

This Awareness indicates that by looking at the entity and discerning his position and Christianity's position, without judging either one as being condemnable, either right or wrong, but seeing how they clash, one can begin to wonder whether Christianity can hold on to its higher values and principles under such an attack or whether Christianity can forgive its enemies, turn its cheek to such affront, or whether the entity Stern will see his violation to the sensitivities of others and cease acting in his disrespectful ways and eventually make amends for his behavior or for his damage.

It is a question of what results such behavior will indeed bring to this entity and to Christianity. The entity is obviously playing the devil's advocate against Christianity.

## FOLLOW-UP QUESTION:

When I read this book, I was bothered by the question that: Was the entity actually doing damage? Awareness has indicated that words are things or energies, they can cut like knives, and I was thinking that particularly since this was amplified over the air, that even though in jest, that praying for somebody to get cancer might actually create this situation.

## COSMIC AWARENESS:

This Awareness indicates that indeed it could, but it would not be because of Jesus giving the entity cancer, it would be because of the masses of humanity *expecting* the entities to get cancer from this prayer, and in turn projecting cancer upon the FCC group. This Awareness indicates that damage to these entities is highly potential and also damage to Christianity is also quite strong. Perhaps more damage to Christianity than the Waco and the Jim Jones events from this kind of tactic.

It will depend upon how Christianity responds or reacts to this entity. If it is totally ignored and the entity does not keep up the blasphemy, it will probably fade away without much damage to the religion. If it continues as a continuous repeated type of blasphemy that continues to grow, then Christianity will be at some point forced into a kind of recognition of this entity and respond to his behavior.

The question is: What response can they use in dealing with this entity? If they begin to pray for some punishment, it would make them much the same type of

creatures and it would indicate they are just as debased as he. If they go the legal route, it makes them appear to be weak and have little within their faith that can deal with his shenanigans, and therefore must rely on courts of law rather than the strength of their religion and the spirituality which they present.

This Awareness indicates that if they simply ignore him and he keeps chipping away over the years, either the public will tire of listening to him and the public will react against him or Christianity will begin to suffer from disrespect, others will join in with him and blaspheme the religion, or if preachers begin to talk about him and rail about him, he will just get stronger and his message will become more widespread.

This Awareness indicates that it appears the approach which would be most suitable in handling the entity would be for Christianity to ignore him or to quietly work with groups such as the FCC to persuade him to ban his shows and it is likely that this will be the approach used. This Awareness indicates that providing the FCC doesn't come down with cancer, this approach is likely to be that which will follow.

#### FOLLOW-UP QUESTION:

Well, even if he didn't pray to Jesus, but he just makes the remarks that he wishes so and so would get cancer, which he often does, doesn't the *Law of Gratitude* begin to work; isn't there a Cosmic law that claims this sort of energy comes back to the sender eventually, and he could very well find *himself* afflicted with the kind of disease that he's hurling out at others?

#### COSMIC AWARENESS:

This is in the affirmative, but this does not necessarily mean that others whom he has targeted for mass-consciousness to expect to get cancer are not also being bombarded by those expectations and that energizing. This Awareness indicates that you know that in certain of the healing techniques this Awareness has given, that if enough entities focus on another to bring about a healing, that entity will receive certain healing energies, sometimes very dramatic, even dramatic enough that in some cases it has stopped cancer.

#### Black Magic Being Practiced over Radio

Thus, if you have hundreds of times more people energizing or expecting someone to get cancer, you can see that this is a form of black magic. It is black magic being practiced over radio, with the use of radio and mass audiences. This Awareness indicates it is a very dangerous act even though it does not appear that this entity realizes what he is doing in terms of the principles and techniques involved in his sense of humor.

This Awareness indicates that it does not appear this entity intentionally wants the FCC people to get cancer. It appears that this is just his humor and he wants to make a living by making people laugh, but it appears also that the way he goes about this, he has stumbled into a methodology that is indeed a form of black magic, not that he wishes to do so, but that without knowing it, he is creating on the air the energizing and practice of black magic.

#### FOLLOW-UP QUESTION:

Well, the law says *ignorance* of the law is no excuse, so would the entity be karmically responsible then?

#### COSMIC AWARENESS:

This Awareness indicates that this ignorance of the law statement applies to human law, and in regard to Cosmic Law, the entity, not knowing that he is perhaps helping to bring about cancer to some FCC entity, even if it did occur, if the entity does not realize this is a cause of cancer or that his statements are actually the cause, is not

likely to suffer great karma, except for the lack of sensitivity towards the person and lack of concern for others' welfare.

The very fact that he is so blatantly hostile to these entities on the air, so insulting to them, carries its own karma. The fact that he makes such a prayer of such blasphemy carries its own karma. This Awareness indicates that if the entities get cancer as a result of this and he did not really know this would happen, then of course he cannot be held karmically responsible for the cancer but he can be held karmically responsible for the blasphemy of the prayer or the ignorance he has shown in his actions.

#### FOLLOW-UP QUESTION:

The tabloids say Johnny Carson's doctor told him that he looked like he was a sitting duck for prostate cancer, I believe it was, and it's just worrying Johnny something terrible. Now, my question is: If Johnny reads this book, which he probably did, are those affirmations going to effect him in any way, the fact that he has a potential cancer problem in his body?

#### COSMIC AWARENESS:

This is a possibility. If he reads those books and is a kind of person who is susceptible to suggestion, it could indeed help to bring on or to encourage the prostate cancer or other type of cancer to have an easier spread. This Awareness indicates that if the entity has a strong immune system that would normally fight off cancer, but his personality is such that he is easily subject to suggestions, then the cancer immunity will be weakened because he will subconsciously accept the suggestions more readily and would be more likely to receive the suggestions.

It is similar to that of hypnotic suggestion, so that just as one person can use hypnosis to cure cancer, in such a case where one is subject to suggestion, an entity might also accept suggestions to get cancer, and the immune system, depending on its strength, may have a more difficult time fighting it off, if the subconscious has accepted cancer as a suggestion.

Sometimes, even if a person does not want the suggestion, just the fact that they are *afraid* of some suggestion given, is not sufficient to keep the suggestion from taking hold.

In fact, a fear may magnify the suggestion to where it takes hold even faster. This Awareness indicates therefore, it can be a factor and it can be dangerous, particularly if this entity does not understand the nature of suggestion and is in fact subject to suggestions as some people are. Some people are more susceptible to hypnotic suggestions.

These people receive suggestions throughout their lives and accept these suggestions and become victims of the various suggestions, if those suggestions are negative, or become beneficiaries of positive suggestions. Other people are not as easily moved by suggestions. Hypnotists would find these people difficult to work with.

ED's Note: Evidently "The Force" is with Howard Stern. Four years after this reading was given, Christianity has indeed declined, church membership is way down almost everywhere and more and more are finding they can not take Christianity seriously anymore. I'm not sure there's a connection, but *ignoring* Howard Stern has made him rich and famous. Since this reading was given, he wrote another best-selling book about himself, and his book (just reviewed) *Private Parts*, has been made into a movie that has made him so much money it has displaced the recent re-release of *Star Wars*. The promotional hype for his film has made Stern a sort of national hero—"the King of all Media"—and he seems to appear on every TV show in existence. Personally, I feel he is a sick entity with an out of control ego, and the current apotheosis of Howard Stern is simply another reflection of how debased and unaware our society has become. (Probably those loud farts the entity expels into the airwaves make more sense to some people than his actual dialogue).

## GEORGE VAN TASSEL AND HIS "INTERECTRON"

### QUESTION:

A question from Stan V., Westerville, Ohio. He writes: "Some UFO magazines occasionally talk about a man who back in the Fifties and Sixties was building a 'Interectron' --a building that would be a fountain of youth, so to speak. His name was George Van Tassel, and he apparently had been given the info from aliens. This building would be a clinic in that people would come spend some time in it and be cured of their ailments. It was in Blythe, California, I think. Unfortunately, he died before the completion and the present owner doesn't know how to complete it.

Would Awareness indicate if this device would actually function as it was hoped to, or was this man a fraud?"

### COSMIC AWARENESS:

This Awareness indicates the entity was not a fraud. The entity was sincere in his belief that he would be given the proper technology at the time he completed the construction of the building in which the technology would be used. Unfortunately, the entity died before the visitors returned and it is doubtful that these entities would have returned anyway.

This Awareness indicates that it was near that time that the particular entities who had visited him were made aware that their presence was not welcomed on this planet and that other aliens had signed treaties with the leaders of the planet and would not allow these visitors to return.

This Awareness indicates that this entity Van Tassel continued to build, to work on the building without realization that it would be futile, and the entity held high hopes of completing the building and giving humanity something of great value. Therefore, his intention was not that of one who would be called a fraud.

## What Causes the "Shivers" or Goose-Bumps When One Gets a Good Idea?

(More on How High Manna Works)

### QUESTION:

A question from Soj B., Santa Barbara, CA., who writes: "I have a question. What causes a person to shiver when they get a good idea or have a radical thought, et cetera? personally the strongest shiver I ever experienced was when it occurred to me to order more of those bumper stickers that said: *The New Democratic World Order. Will It Include The Bill Of Rights?*"

"I just about fell off my chair shivering! Would you ask Awareness, please?"

\*That was the bumper sticker CAC created and promoted when the first reference to "New World Order" first appeared. (Awareness suggested the slogan). Many members had these printed up by the hundreds and some, even by the thousands, and according to Awareness the campaign did help to raise some public awareness about the New World order and put some magic into Consciousness.

### COSMIC AWARENESS:

This Awareness indicates that this kind of goose-bumps or shivering or the feeling of something very high and wild seizing a person as that which relates to the High Manna that entities may have in their system which is released at a moment of realization or awesome experience. It is likened unto that which entities feel as a beautiful musical experience such as perhaps a very good rock concert or opera or symphony or religious choir or something that causes an entity to feel those goose-bumps of excitement.

It is that which entities often call "blissful." They go to certain movies, musical events or artistic events for the

purpose of having such an experience. This Awareness indicates that it is the High Manna that comes upon them at that moment. Remember, in the *Scorpio Correspondence Lessons* the description of the different types of mana: the low mana or the static aura that hangs around one's body; the middle mana, that which is the result of focusing attention and giving energy to something, and the High Manna, which comes upon a person when the person is receptive to Higher Spirit.

When an idea such as you described comes upon you suddenly, and the High Manna expresses its enjoyment with a cosmic "Yes!" or "Aha!" --this is expressed in the shivers or goose-bumps or realization that something very special is here. It is likened unto an announcement by a heralding angel, but on a feeling level.

This Awareness indicates it comes through the higher chakras, down through the throat chakra, and from there affects the rest of the body.

## Taking the Lord's Name in Vain

### QUESTION:

A question from Matthew H. It came in over the Internet. He writes: "The Bible says that it is bad to take the Lord's name in vain. If one does not mean it when one says it, would there be any negative effects caused by the speaking of such words?"

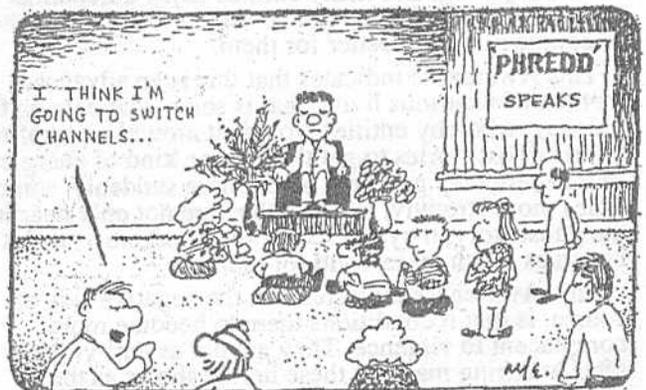

### COSMIC AWARENESS:

This Awareness indicates the taking of the Lord's name in vain simply means throwing the name out without any reverence, using the name without it being used reverently. Assuming that God's name is Yahweh or Jehovah, just throwing the name out would cheapen It's significance. Assuming the name of your God is Rumpelstiltskin, and you went around saying, "Oh, Rumpelstiltskin, dammit!" you would gradually lose any reverence for Rumpelstiltskin.

This Awareness indicates that this is the reason you are not to take the name of the Lord vainly. 'Vainly' means without reverence. In this case you are calling on the name of God in vain. It is of no real worthiness that you call on the name of God. It is vain for you to call on the name of God without reverence. Therefore, taking the name of God in vain means there is no reverence in your use of the name.

This Awareness indicates that the more you do that, the less the name has value to you. Therefore, if you continually use the name of God in vain, you gradually condition yourself to have no value in the name of God, and it does not serve you any further. You lose your ability to call on His name. Essentially, that is the meaning.

Thus, you say "If you don't mean it, does it create any harm in using the name of God in vain?" If you don't mean it, then you *are* using it in vain. If you mean it, if you use the name with great meaning and reverence, then it has significance and can be of service to you.

## BEING STRUCK BY LIGHTNING: ANY PARTICULAR KARMA?

(When It's Time to Die There Are Many Ways to Go)

### QUESTION:

A question from JD in New York. She writes: "I just learned that a young woman was struck by lightning playing softball, and killed, over in Barre yesterday. This is quite a statistically unusual way to die. Is there some peculiar karma associated with being struck by lightning?"

### COSMIC AWARENESS:

This Awareness indicates that it would be something that would show in her astrological chart relating to Uranus, but this is not a common karmic punishment or way of dispensing with a person. The chart might indicate some karmic nature if one could see the chart and tell where the Uranus effect was in her horoscope, but this Awareness suggests it does not appear to have been a karmic punishment. It appears that it was simply a way by which the entity was taken, painlessly and quickly.

It could well have been some act of a guardian angel or some other entity from another dimension or plane who called the entity home from the earth life experience, and it may not have been karmic, it may have been a form of rescuing or saving her from some unfortunate events that would have happened on earth in her physical life.

This Awareness indicates she may have set this up prior to coming into physical body; that she would not live for any longer than a certain age, or she may have accomplished what she was on earth to do, and may have simply subconsciously willed to go back to some place where she had other things to do.

This Awareness is not discussing her action precisely or her precise karma or needs; It is simply discussing the concept of an entity who would be perhaps struck by lightning and how this could be interpreted.

### Why Do People Enjoy Horror Movies?

#### QUESTION:

Another question from JD. She asks: "Why do people enjoy horror movies? What do they get out of them? Does it discharge or defuse their own possibly repressed fears? Or have they perhaps become "adrenaline junkies" enjoying the stimulation, the sense the fear induces?"

#### COSMIC AWARENESS:

This Awareness indicates the "adrenaline junky" is the term that fits most of the entities who enjoy these horror movies. This Awareness indicates it is a way whereby not only can they get out of their own boring lives for a few minutes, but they can also get an adrenaline rush while being very safe and secure. They may become quite scared, quite horrified, but underneath it all, they know they are in a safe place.

It is likened unto having an adventure without having to risk anything, and many entities enjoy adrenaline-type adventures. If they can be safe in the process, then of course it is even better for them.

This Awareness indicates that this is an advanced method of vicarious living that is somewhat beyond the old way, whereby entities would sit around a campfire telling ghost stories to get these same kind of energies. In this case they get them much more suddenly, sometimes more strongly, because they are not only hearing the ghost story, they are seeing the ghost story, and it becomes much more vivid for them.

This Awareness indicates that the negative side of course, is that it conditions them to become more complacent to violence. They are not as anti-violent after watching many of these horror shows as they

would be if they never saw such things. They can become conditioned to accept violence more easily if they have watched these horror shows, and for some people, this is a very dangerous thing to become more conditioned to violence, because they may have certain tendencies toward violence through some deep, strong hostilities of their own, and therefore, it could be a hindrance toward their own welfare and the welfare of others for certain entities to be exposed to these horror shows.

For most people it is not harmful, except that it may make them more tolerant and accepting of violence. Remember that you become what you tolerate to some extent.

## Woman struck twice by lightning

The Associated Press

BELLEVUE — Who says lightning never strikes twice?

Brittany Collins is proof that it can, having survived a double jolt — a block apart — during the same storm.

Collins, 21, of Bellevue was walking home Tuesday afternoon when a burst of hail caused her to open her umbrella. It wasn't long before she felt a shock run through her and she threw her umbrella down.

"I picked it up again and started walking fast," she said.

A block later, Collins said she saw a blue light in front of her while another surge moved through her body — from the soles of her Doc Marten shoes to her right index finger.

Trish Stowens and Andi Reyes, two off-duty nurses who were driving by, spotted Collins, who was screaming and crying. They brought her home after checking her pulse and called the medics.

Dr. Peter Shock, Collins' physician, called her "a very fortunate young lady."

"She was initially very frightened, became very agitated and then evolved into being very, very thankful," Shock said.

## WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

THE INTERPRETER FOR THIS READING IS PAUL SHOCKLEY

Avator-Editor Vikki T. Sec. Treas.

### —HOW TO GET THIS NEWSLETTER BY MAIL— EVERY 3 WEEKS! (More or Less)

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will all be asked at the Passing Over).
