ONE-SIDED COMMUNICATION

(CAC General Reading, March 6, 1997)

OPENING MESSAGE:

This Awareness wishes to make a few statements regarding entities' communications with one another, particularly involved in whether or not they are actually communicating, or whether they are simply using others to unload their own troubles.

This Awareness indicates there are many entities who think that their lives are so interesting; they are interesting to themselves, and they assume that others will be just as interested in their lives as they are, so when they speak to their friends, all they can do is talk about themselves and the latest things that are happening to them, and they use the other person as a sounding board to bounce off their stories, just to see how it sounds, and they practice on one person after another, trying to find out whether their story makes sense and portrays the information they want to convey in a way that is satisfactory to themselves.

This Awareness indicates often these entities do not really care about whether you have time to listen, whether you are interested in listening, or whether you have a desire to hear their stories. They simply immediately start telling you what is happening in their lives as though you should be fascinated by this. This Awareness indicates this appears to be a way whereby some entities spend their communications with others almost all the time. It is somewhat sad, because these entities may not have many friends.

Unless someone is extremely lonely and wants to hear about another's life, they often do not have the desire to be around such a person. This Awareness indicates *It* simply wished to bring this out so that entities can look carefully at their own relationships and how they communicate with others. Is there a mutual communication, or is it simply the use of another person to bounce your story off of?

This Awareness suggests that entities be very careful not to use their friends in this way, but to actually communicate and allow the other to communicate their stories also so that there is a mutual communication rather than just the one-sided communication. Do you listen to the other person's story, or do you simply want the other person to listen to yours? This Awareness indicates about one in ten people want others to hear their story, but are not really interested in listening to the other person's story, and thus, they use their friends to be sounding boards for their own story, just to see how their story sounds.

This Awareness suggests the questions may continue.

What is Earth—A Prison or a School?

(Some Early History of the Organization of Awareness)

QUESTION:

A question from Navor M., San Jose, a rather strange question. "Can the Awareness please clarify and tell the people of the earth and the Cosmic Awareness view, which viewpoint is correct? A school called earth or a prison called earth? If it's a school called earth, can Awareness elaborate on the school agenda of the earth and what it takes to graduate from the earth?"

"If the earth is a prison, can Awareness elaborate on how we can escape? If both viewpoints are correct, can Awareness reconcile the two different viewpoints so we can have peace of mind on earth or elsewhere in the universe?"

COSMIC AWARENESS:

This Awareness indicates there are different ways to

look at the situation. It can be viewed as a prison, or it can be viewed as a school, or it could be viewed in a different way entirely. Some have said the earth is a cosmic insane asylum. This Awareness wishes to tell a brief story about the early days of the *Organization of Awareness*, wherein this Awareness directed entities through the Interpreter Ralph DUBY to all come together in a hall and to spend many hours together. These were the early members of the *Organization of Awareness* and the instruction was that they spend at least 24 hours or up to 48 hours in the same hall, and communicate with one another while there, and that in so doing, they would work through a great amount of group karma that had been accumulated over many lifetimes.

This Awareness indicates that this action was done and in that time period, many of these entities got into serious arguments with each other, and some of them found ways to reconcile their differences and much of the group karma was worked through so that the entities had a greater cohesiveness at the end of the encounter than at the beginning.

This Awareness indicates the earth is similar. Entities come together on the third dimension, wherein the consequences of certain behavior, of certain activities is more meaningful than it is in the etheric level. Entities can feel more, have greater sensitivities in terms of their feelings and senses, sensual data and so forth, so that the energy of living in a world of senses becomes instant feedback, and the entities in getting their instant feedback from each other begin to learn how to live in greater harmony.

Earth Could Also be Called an Insane Asylum

Thus, you can think of this as a school, or you can think of this as a prison in which entities must learn to get along in order to make the best of a bad situation. This Awareness indicates you can also consider it as an insane asylum, wherein entities must become more responsible for their behavior, thus having a kind of place that forces therapy and more of a sane approach.

This Awareness indicates it is possible for entities on earth to learn lessons that would take eons of time in the etheric level, because the consequences on earth are much greater and the instant feedback from one's behavior is greater on earth. This Awareness indicates it is not simply a matter of putting people on earth so that they can learn, although great learning can occur. The learning from the University of Hard Knocks, as it is called, can be one of the greatest learning situations made possible for humans.

This Awareness indicates, however, entities can also learn some things in the etheric level, but it is more powerful when you are in physical form for you must learn certain rules in order to avoid pain and suffering. Likewise, if you think of it as a prison, there is no escape, except by learning things that lead you into higher spiritual evolution. You may get upon the wheel and go around and around and around, one lifetime after another, until you learn what is necessary in your experiences so that you can move beyond the life and death experience into the higher ethereal levels or higher dimensions of life.

WHAT IS THE NEXT MAJOR CHANGE IN HUMAN CONSCIOUSNESS?

QUESTION:

A question from JD in New York. She writes: "Mankind has gone through a series of extremely important revelations. At one time man likely didn't look beyond self. Then others, then beyond, to community, nation. Then no longer on a flat earth, but a globe,

then no longer the center of the universe. Can Awareness pre-reveal to us the next major change in human consciousness and the impact this will have?"

COSMIC AWARENESS:

This Awareness indicates the next major change is the realization of the various dimensions available through the recognition of vibrations and frequencies laid out throughout the universe by the various octaves and scales of the electromagnetic field. This Awareness indicates that entities in physical form are in a particular frequency. Entities in the astral form are in a different frequency, and entities in the etheric form are in still another frequency, and entities who are in these higher realms or frequencies, are dimensions apart from one another.

Your Sensual Data May be Greater In Other Dimensions

You enter from one dimension into another, and you give up certain aspects of self and gain new aspects of self. This Awareness indicates the solidity that you experience through your third dimensional world carries with it the sensual data of sight, sound, taste, smell and touch. This Awareness indicates the movement into higher frequencies still has some of these in different degrees.

You still may see colors, but you may see **more** colors, and the colors may not be as bright, or may be brighter, depending on the kind of frequencies you are experiencing and the kind of frequencies your being adapts to. This Awareness indicates thus, your world may have a totally different appearance in another dimension than the one here in this third dimension.

Your Intellect May be Different In Other Dimensions

This Awareness indicates likewise, your intellect may be somewhat different also in your perception as it changes, giving you a different view of things. It may affect how your mind works, how you perceive things. Thus, an entity in a dimension of higher frequency may have a totally different view of reality.

Instead of believing in some solid reality or scientific method or scientific reality or rational way of thinking, they may have a realization that mind has dominion over matter, because in a higher frequency, they may be able to use their mind to move the substances in that reality. They may be able to move colors and to shift energies with their mind, but in this physical world, matter tends to hold itself and mind must manipulate through the matter. This Awareness indicates when entities begin to better understand the nature of the frequencies in the reality, they will then have a totally new understanding of the reality that they live in.

Frequency Level Charts Available From Various Groups

This Awareness indicates the electric companies often put out a pamphlet or, if you cannot get it from an electric company, you may find it in library books; the Rosicrucians put out such a poster or picture in some of their works describing the electromagnetic frequencies, showing the movement of frequencies from the ultra-low sound levels up through the higher frequencies of sound into the frequencies of radio waves, into frequencies of heat and that which is the infra-red spectrum into the light spectrum, into the ultra-violet spectrum, and beyond the ultra-violet spectrum into higher frequencies and vibrations such as X-rays, gamma rays and so forth.

This Awareness indicates entities who see these posters describing these various frequencies and sounds can begin to grasp the possibility that these frequencies go much higher than the poster reveals, and that there may be sounds or vibrations or light that vibrate at speeds far beyond anything man has imagined, and when entities begin to understand this as the ultimate reality in which

they live, then the entire view of life, the world, will be a totally different paradigm and new technologies will be found through the exploration of the frequencies and vibrations of the reality in which entities live.

This Awareness indicates there was a time when entities thought they had discovered the nature of the universe, seeing it as a machine, and recognizing it as being filled with gears, gears that turned, that moved the planets, that turn the earth to make days and nights, and they saw this universe as being mechanical. Then, under the work of Einstein and others, they began to see it as something that exists from minute particles and they saw molecules and atoms and chemical creations that composed the entire structure of reality.

The Next Level is to Recognize the Vibrations

This Awareness is suggesting that the next level is to recognize that those atoms are not substances, they are vibrations, and that if you can explore deep enough into the atom, you would see that the protons, neutrons and electrons are vortices of vibrating energies within the atom and that these minuscule vibrations, rather than being particles, are actually frequencies, and that even beyond them there are still even smaller vortices, higher frequencies in operation and that even rocks and metal are filled with these vortices and vibrations known as atoms and sub-atomic parts, and they are all vibrating, all in frequency to one another.

"The Philadelphia Experiment" Mystery Will be Solved

This Awareness indicates when entities begin to fully understand this, they will also unlock the mysteries of such unfamiliar areas as psychic activities or of the so-called "Philadelphia Experiment" in which a battleship is dissolved and moved invisibly from one place to another through a kind of teleportation, all because of vibrations and frequencies.

There are those entities who understand this to the point where it can be used scientifically to do such things. This Awareness indicates the majority of people do not understand how this can be. Many of the aliens or extraterrestrials use the vibrations to travel from one dimension to another, or from many, many light years to another place instantaneously, simply by shifting from one frequency to another.

This Awareness indicates that this will be the next great leap in human consciousness as far as the entire evolutionary approach to human expansion and no longer will entities be bound by the Tree of Knowledge, the 5 fruit of the senses. They will begin then to eat of the Tree of Wisdom. Then they will understand what God Is. They will understand what they are; that they are also vibrations, likened in sympathetic harmony to the vibration of God, and that their communication with the Divine Creator can be made more sound or more solid simply by attuning their own vibration to the vibration of God with greater effort and greater focus.

This Awareness indicates it is not something wherein entities see themselves as having a border around their body that ends at the skin. They will see themselves as vibrating in a universe that is vibrating, and forming a skin from their vibration in which they put other things to vibrate, becoming organs and bones, and other parts of themselves so that they have created a physical form from the vibrations.

Giving Birth: Manifesting Self Through Vibrations

This Awareness indicates essentially, when an entity seeks to manifest self in physical form, they begin as a frequency or vibration. The potential mother feels that energy of motherhood, and it is accompanied by the vibration from the entity who is about to enter into human form. Often, mothers will feel themselves being

possessed by some entity when they are involved in a pregnancy, and this possession they feel by an entity is friendly and is very profound.

They are actually picking up on the vibration and frequency of the soul that is attempting to be born through them. The soul then begins to take on more physical manifestation as it focuses into its position and begins to become more solidified. Gradually, it brings all the vibrations into a focal point known as self, and it develops its own magnetic center, gradually drawing in nutrients from the mother's body to form and follow the pattern of its own soul-shape.

Gradually, this soul shape following the etheric DNA or genetic patterns, begins to create the arms and legs and appendages and organs so that this being begins to take on a physical form that is starting to represent or resemble a human. The further the energies go, the more it takes on the human shape, drawing from the mother's body the various chemicals that can be used in creating a substance to fit the etheric pattern of the being.

The Baby's Etheric Body Serves as a Pattern into Adulthood

Even when the being is born in a small baby, its etheric body is much larger, and it serves as a pattern for the baby to grow into adulthood. You do not see the baby's etheric body, but it is there, and as it is fed and attended throughout childhood, the energies from the food gradually begin to feed the etheric energies so that they begin to take on more and more substance and this is called "growth" and the child eventually grows into adulthood, to the size and shape of the etheric body that originally began that journey into this dimension.

Understand Frequency and Vibration is the Body of God

This Awareness indicates that when entities fully understand that everything is frequency and vibration and that all of the vibration and frequency is the body of God, then they fully understand that they are part of God; they are in the body of God, and they are in God's image, and the imaging of God creates these entities and their image of God helps to reinforce the shape of their own image as they, in their frequencies, reflect from the imagery of the vibratory life of the cosmos.

This Awareness indicates you do not have sufficient words in your language to fully describe this process, because the word "cosmos" does not totally explain, and the word "universe" is not a perfect term to destroy the whole of creation, because there are some who say there are more than one universe. The word "universe" has been defined in different ways. Some would say there is one universe in which everything exists. Others would say there are many, many universes.

The Word "Cosmos" Needs to be More Defined

Even the word "cosmos" does not necessarily imply or suggest the totality of all of Creation. It suggests a totality of third dimensional Creation to many, but there are many dimensions that are not available to the sight of humans, who think they are aware of third dimensional things, and if humans had greater capacity for seeing beyond the third dimension, the "cosmos" would be something totally different, but the word "cosmos" is a very broad term. It means the heavenly bodies, and if you can visualize a cosmos that takes in not just the third-dimensional heavenly bodies, but all of the heavenly bodies of the entire electromagnetic spectrum, then the word "cosmos" would be closer in its definition of Divinity.

"Divinity" Goes into the Entire Spectrum of Vibrations

This Awareness indicates the Divinity goes into all of the higher frequencies and into all of the lower frequencies so that the entire spectrum of vibrations, from the highest to the lowest comprises the totality of the

Creator. This Awareness indicates this does not mean that there is no white-haired man sitting on a cloud or on some planet somewhere. There may be a white-haired man who is known by his or her friends, if it is a woman, as "God". There may be such an entity, but the Divine Creator of the entire cosmos, or the entire electromagnetic spectrum is not an entity in the normal sense of the word. It is a force. It is a vibration that encompasses everything and beyond everything that is known or perceived by any who has the limitation of 5 senses.

When Entities Go Beyond the Five Senses They See God

If entities can go beyond the 5 senses and tune in to the frequencies of the total electromagnetic spectrum and all vibration, those levels of intelligence can then perceive the reality of the Divine Creator in *Its* greater sense. This Awareness indicates if you can only perceive what your senses give and imagine from that, then you will probably see God as a little old white-haired man who is very wise, and one who can see everything you are doing 24 hours a day and who has an interest in your behavior, and watches you and everyone else in the entire Creation to make sure you are doing the right thing or getting punished for doing the wrong thing.

The Old Testament Version of "God" Designed for Little Children

This is the impression given by many who believe the Old Testament gives this version of God. This Awareness indicates that is a very childish and very immature version of the Divine Creator, but there are many who argue that this is the way things are, and if you speak of Cosmic Awareness or Universal Consciousness or something of this nature, as being the Divine Creator, then these entities think you are abandoning the God of the Old Testament and are therefore working in behalf of Satan. These entities think in duality's: "If there is a God, there must be a Satan!" This Awareness suggests that if there is a God, there must be *anything* that others want to imagine, and they can imagine a Satan and give it energy and can energize the Satan into what appears to be a being, even though it may actually be an illusion created through the activity of mind itself.

This Awareness indicates you are all Creators, and can create many things. The degree of your creation and the manifestation into your third dimension depends on how much energy, how much strength your imagination has. This Awareness indicates when entities get beyond the third dimension concept of reality and into the recognition of frequencies and vibrations, their creativity becomes unlimited, limited only by that limit they put on themselves.

The Implication of the Frequencies to the Actual Creation

This Awareness indicates that beyond this recognition of the frequencies, then comes the recognition of what the implications of frequencies actually means to the Creation. For example, if the highest frequency is that which vibrates four quadrillion times per second, does this mean that the universe vibrating at 4 quadrillion times per second appears and disappears every 4 quadrillionths of a second? This Awareness indicates it would so be.

Altering the Universe Every 4 Quadrillionth of a Second

And if the universe appears and disappears every 4 quadrillionths of a second, does this not mean that entities having a similar vibration in their consciousness, could not create within that reality, that new appearance, that new universe, whatever they could imagine in that time period of one moment of 4 quadrillionths of a second? Or that they might not be able over a series of these momentary vibrations to alter the entire universe into something over a period of time, so that

for perhaps 4 quadrillion seconds of time, they might not be able to effect a major change in the entire universe by simply altering it every 4 quadrillionths of a second in a minuscule way?

This is How Yogis Manifest Objects Out of Thin Air

This Awareness indicates this is why the mind is capable of manifesting out of nothing something of significance. This is why Yogananda described certain Yogis who were capable of manifesting an orange out of thin air, or manifesting a smell, roses or some perfume, just by waving their hands, or where they could manifest flowers and hand them to their fellow Yogis.

These entities were knowledgeable and intellectual enough and capable of rising to higher frequencies and vibrations to allow their minds to tune in to the reality that every 4 quadrillionths of a second there is a new reality, a new universe, and whatever is perceived or conceived during that moment, can be altered. And thus, if they focus on a flower during the 4 quadrillionths of a second, over a period of several of these creations of new universes, the flower would manifest in their hand and they could simply pass it on to someone else and it would be tangible and real.

This Awareness indicates when entities begin to fully understand the power of the knowledge and the realization of frequencies and vibrations as the premise on which the universe is created, they will become magicians and miracle workers of the highest sense. They will become as gods, even as Jesus informed those of his time that they could do these things; that they could do those things which he did, and more.

Manifesting Takes Practice: An Exercise

This Awareness indicates it comes about through the realization, but it also needs practice. This Awareness indicates imagine yourself being hypnotized and being told that if you move beyond this line, you will get an electric shock, and thus, over a period of time, year after year, you know that because you have tried to move beyond that line and gotten an electric shock, that it is impossible for you to escape this little prison in which you have been placed.

You have these limitations and you cannot get beyond them, and you know you cannot, because you have tried and you have been shocked. This Awareness indicates perhaps you have upon you one of those dog collars, or perhaps you are a dog, and you have a collar that triggers the wire that runs underground that causes you to feel an electric shock when you get close to that wire, and thus, you know from experience that you cannot move beyond that point because you would get shocked.

This Awareness indicates that it is a conviction based on what you have been taught and what your experiences are that you can only do so much. But supposing this was all turned off, and that you could now leave that area or perhaps your collar no longer is functioning so that you do not get shocked if you walk past that line. Would you know it? Would you realize that you could now leave that area? Or would you not, because of your experience, stay in the limited field which you have always been kept in?

This Awareness indicates that when entities are conditioned to something, they do not easily break the conditioning. You have been conditioned to think that there are certain limitations to your being and you cannot reach or do anything beyond those limits.

This Awareness indicates that becoming aware of the vibrations and frequencies of the Creation, and knowing that these frequencies in the Creation are what make the Creation and that you have some potential to influence

those frequencies through altering your own frequencies; this is a tool whereby you can practice, work, develop and evolve, so that you can create a different reality for yourself.

You can draw in things that need to be manifested into your life. You can draw these in from the universe itself, from the vibrations, the frequencies of the electromagnetic scale simply by your imaging, your holding the image, and drawing it, and knowing that it will eventually manifest.

You Don't Have to live Your Life By Previous Conditioning

This Awareness indicates *It* is not trying to feed your greed; *It* is trying to get you to understand the nature of reality. This Awareness indicates you do not have to live your entire life by the conditioning you were given when you were young. You do not have to stay behind that line just because you were given a choker that caused you to be shocked if you got close to the line.

The One Thing God Cannot Do

You can get new insight and learn how to overcome the limitations that you were once given. Ouspensky said that, "There's one thing God Himself cannot do!", and when asked "What is it?" replied, "He cannot make a royal flush out of a full house!" What does this mean? This Awareness indicates it means that if you set the rules and definitions and those are intact, then you cannot make something else that breaks those rules and creates something new, while still keeping and holding those rules.

This Awareness indicates in other words, you will have to scrap some of the rules you live by in order to advance into higher dimensions, into higher frequencies, into being more creative. Creativity requires the breaking of some rules. This Awareness indicates in the grammar schools in England during Shakespeare's time, they were taught how to break the rules of English. They had the grammar and they were trained in English grammar, but they were also trained in how and when to break those grammatical rules.

To be Creative, Shakespeare Broke the Rules of Grammar

Does the line: "Never was waves nor wind more violent" sound grammatically correct? This Awareness indicates the entity Shakespeare knew that "Never were waves nor wind more violent" was correct, and the entity knew that breaking the rule got greater attention for the lines, and therefore, he worked his magic by breaking rules of grammar, but he was able to do it in a way that was very acceptable in a poetic sense.

This Awareness indicates there were many tricks used in his method that can be found to be grammatically incorrect, yet poetically beautiful and poetically right. This Awareness indicates this is what creativity is. You cannot be creative without being ready to break some of the rules, and this is the same when you think of expanding your reality into a greater life, a greater understanding of creativity, of the Creation of God.

You must be willing to break some of your beliefs, some of your understanding, some of your conditioning and realize that you are not necessarily bound by the logic you were given or that you accepted as a child. Logic has its place and logic should be understood, but you must also be aware of how logic can be circumvented to create something different.

Logically, an entity might be too sick, too ill to be cured, and yet, someone always comes along in the same kind of situation, if not *that* situation, and does something totally irrational, and the entity is cured. These are called "miracles"; these are called "hoaxes" until they find out they worked. This Awareness

indicates that many of these things that are illogical, still work.

Why a Witch Doctor in the Jungle Can Heal Others

A Witch Doctor in the jungle may simply chant and wave his hands over an ill person, and any medical professor from the Western world would know that is doing nothing whatsoever to help this entity. The entity needs certain pharmaceutical drugs to fight off the bacteria or the disease that is plaguing him, or the entity needs a surgical operation, and yet this entity, the Witch Doctor, simply waves his hands and chants, and something strange happens: the entity is healed. The disease goes into remission.

It is illogical. It is meaningless. This Awareness indicates this kind of thing happens regardless of the fact that it breaks the laws of logic. This Awareness indicates it is because the entities are aware of faith, are aware of their own power to do things through their imagery, and they have developed their own system of healing. This Awareness indicates it may not be logical, and it may not even understand the electromagnetic scale and frequency involved in what they do, but it works for them.

This Awareness, in giving you the information of the electromagnetic scale and the frequencies involved, is giving you the understanding of **how** these miracles can happen. The mind is capable of emitting different frequencies on different octaves on the electromagnetic scale. It is possible for anyone's mind to vibrate at the same frequency as the Divine Creator. If the Divine Creator could vibrate a universe into existence, it is possible for individuals to vibrate a healing for one who is in the process of dying.

Understand Vibrations and Eventually Co-Create with God

This Awareness indicates that it is not easy to raise your vibrations without ever having worked at it, without practicing, or without trying or without some long period of struggle, but it is eventually possible for entities to reach the ability whereby they can emanate certain vibrations that effect miracles. And this Awareness indicates this is what *It* wished to convey in this message; that there are many things that can be done, and in the next major human consciousness change of evolution, this is the area *It* wishes entities to become aware of, so that they can have a good head start and not have to dabble around the edges, not knowing what they are doing, not knowing the implications of the field of study or what it can mean.

The potential is unlimited when entities begin to recognize the power of frequencies and vibrations as a tool for creating a new world, a new reality.

MEDITATING ON THE PHOTON BELT AND THE KAHUNA RING

(Photon Energies Now All Around Us but Few Can See Them)

QUESTION:

A question from John S., Pacifica, California, or perhaps it's a fantasy. He writes: "When I meditate on the image of the Photon belt in space, surrounding the Pleiades and intersecting earth's orbit at this time, my mind makes a harmonic or synchronistic connection with the Kahuna Ring which Awareness guided us to mentally building, this guardian of planet earth.

"When I meditate on the Kahuna Ring, I can actually hear an intense bell-like ringing sound. This sounds like a sonic device that would repel pestiferous entities away from our planet. I believe that as the Photon Belt and the Kahuna Ring attain greater harmony and resonance, their loving and protective energies will merge or marry in an internal double ring wedding ceremony."

And he'd like to ask Awareness if there's anything to this.

COSMIC AWARENESS:

This Awareness indicates this is a very descriptive and poetic type of visualization of the energies involved. This Awareness indicates that the Kahuna Ring is actually beyond the light spectrum of the 49th octave, therefore, entities cannot really see this with their eyes. The Photon energy is also beyond the light spectrum of the 49th octave at this time. You cannot actually see this with your eyes, but it is there and it is visible for those who are able to see beyond the 49th octave.

This Awareness indicates that these energies are vibrations and are present around your planet at this time. They will gradually become visible to entities, but this requires entities' consciousness to begin vibrating at higher frequencies than is normal for this third-dimensional plane. Gradually, entities will become more able to see these energies and it will look like some kind of merger of two rings of energy. This Awareness indicates of course the word "merger" corresponds to the word "marriage" or "fusion of two energies." Thus, the entity's visualization does have its affirmation. (Sic)

This Awareness indicates the sound the entity perceives when visualizing the Kahuna Ring is not merely imagination because sound and light are both vibrations and the entity may simply be bouncing from the vibration of light into a harmonic vibration that exists in sound so that he can witness the presence of that frequency or vibration of light.

This Awareness indicates if you were to take sound from a chord struck on a piano and raise it somehow to the 49th octave in the electromagnetic scale, it would become visible and you would not hear it, you would simply see it as a kind of light. If it goes into still the 50th octave higher than the light spectrum, it would become ultraviolet. If it dropped down to the 48th octave of the electromagnetic spectrum, it would become heat, or that which is in the infrared spectrum.

If it went down lower into the spectrum of microwave frequencies or radio-wave frequencies, then you might hear the sounds again. The radio waves being those which are within the audible frequency levels that entities can hear with their ears. The microwave levels being somewhat higher and entities not yet able to see these as light or to witness the visible frequencies at those ranges.

WHAT THE FIFTH DIMENSION IS LIKE

(Where is the "Christ Consciousness" Vibration Located?)

QUESTION:

A question from Ben P., Huntsville, Alabama. "After the earth has passed into the 5th dimension, will all humans in that dimension have the Christ spirit functioning fully in them? In other words, where will the separation take place between those who have accepted and/or received the Christ spirit and those who have rejected Christ and the Holy Spirit while they were in the 3rd dimension? Please ask the Awareness to comment on this."

COSMIC AWARENESS:

This Awareness indicates the 5th dimension is that dimension that functions on a higher frequency that is actually beyond physical form as known in the 3rd dimension, but when entities get into the 5th dimension, the base for reality on which they live will seem to have a solid substance. This Awareness indicates it has been said that entities in higher frequencies ride on light beams to get from place to place. The light beams are to them solid roads or highways or are moving the entity

from one place to another, but there is the **appearance** for these entities of solidity.

If you, from the 3rd dimension, were to look into the 5th dimension, you would not see anything, because those frequencies are higher than you can perceive from the 49th octave where your vision operates from this 3rd dimension. This Awareness indicates that the Christ Consciousness is that which is very close to Divine Creator consciousness. It is in those extremely high levels of frequencies that the Divinity or the Divine Creator operates.

This Awareness indicates if you can visualize a frequency that is so high that it is vibrating as consciousness and that your consciousness is attuned to that high frequency; it is far beyond the frequency or octave of light; it is far above that by many, many octaves, but your consciousness is still not high enough to be One with the Creator. The Creator Consciousness is still higher yet.

Its vibration is beyond that of humans, and the human, in order to be One with God or with the Divine Creator, must allow his or her consciousness to vibrate at a higher rate, surrendering self into the Divine Frequency, and in the process, the consciousness of the human will go through several other octaves or frequency levels so that it eventually reaches the Christ Consciousness level, and the Christ Consciousness is but a very small distance or very little change from the Divine Creator.

In other words, the Divine Creator's frequency may be at for example, 288 octaves, and the Christ Consciousness frequency may be at 287 octaves, and human consciousness may simply be down around 250 or whatever, because there are different levels of human consciousness also, on different octaves.

This Awareness indicates that in the 5th dimension, when entities move into these higher frequencies, the potential for reaching that Christ Consciousness level increases greatly and many entities will reside in that level of Christ Consciousness on a permanent basis. Others will intermittently touch into Christ Consciousness and some will approach it once in awhile.

On the 7th Dimension Entities Dwell in Christ Consciousness
Once entities get to the 7th dimension, then of course, they are dwelling in Christ Consciousness and Creative Consciousness levels at all times, but this will be some time in the future for most entities.

WHY IS THE HIGHER SELF DESCRIBED SO DIFFERENTLY?

(Indian and Huna Totem Poles Depict the Various Selves)

QUESTION:

A question from Bruce William T. that came in over the Internet. He asks: "Why is the Higher Self sometimes described as an angelic being floating around over your head, and sometimes described as some great multidimensional creature consisting of different aspects in different dimensions and at different times? Are these descriptions talking about the same entity?"

COSMIC AWARENESS:

This Awareness indicates people have different ways of describing invisible forces and these descriptions will vary from one person to another. Therefore, you should not take any description too literally. This Awareness suggests the Higher Self as given by the Hunas is often described in the Totem Pole, at the top of the Totem Pole. Many of the Indian Totem Poles describing their concept of reality, will have still other different types of beings, and therefore, these are their terms and descriptions of the Higher Self and the other selves.

The oldest Totem Pole representing the Huna philosophy shows an animal at the bottom, a man in the middle, and at the top is a winged bird-like creature, and the winged bird-like creature represents the High Self, and the man in the middle represents the conscious or middle self.

Keep in mind the word 'man' in Sanskrit means 'mind' and the word 'mind' means 'man,' and thus, man in the middle represents the conscious mind, and the animal at the bottom represents the subconscious mind. This Awareness indicates that not everyone will follow the same imagery or terminology when they attempt to describe the different selves.

The Biblical Father, Son and the Holy Ghost

The Freudian descriptions and the descriptions used in psychology call the lower the 'subconscious', the middle the 'conscious', and the higher the 'super-conscious'. This Awareness indicates the Bible refers to these as the Holy Ghost at the bottom, the Son in the middle, and Father at the top. Thus, you have the Father, Son and Holy Ghost. They are speaking of the same thing in different languages and different images.

Do not take any of these descriptions too literally. This is not a scientific explanation that these various philosophies represent. They are artistic representations. Even the psychological definitions of Superconscious, conscious, and subconscious; these are not necessarily scientific. They are just words invented to try to convey concepts so that others can understand the meanings.

This Awareness indicates that there are many psychologists and psychiatrists who have two different terms used for the lower self. In some cases, they will call it the 'unconscious,' conscious and higher conscious, or super conscious. Other times they refer to the lower self as the 'subconscious'. There have been some psychiatrists who try to make a distinction between 'subconscious' and 'unconscious,' and defining what they mean is often not necessarily a definition in reality, but simply a definition in terms as used in their particular book or their particular way of expressing their concepts.

Words are Created to Relay Concepts

This Awareness wishes you to realize that words are created to relay concepts. They are not placed there by God. They are not found on an object when the object is discovered. In other words, if you find a dinosaur egg, it is not labeled 'dinosaur egg' when you find it, and the dinosaur does not call himself a dinosaur. That is simply a label that is placed on that creature, and it could easily be called something else in a different culture.

Therefore, don't be too concerned about how people describe the Higher Self or the lower self or the middle self and create apparent discrepancies in these terms.

David Hudson's "White Powder of Gold"

(More on Creating the "Philosopher's Stone")

QUESTION:

Bruce has one other question. He writes: "David Hudson has developed a process for producing 'white powder of gold' also known as Philosopher's Stone. There is also a product called Acemannan with similar properties. Finally, there is a tea made from plants growing on a naturally formed 'white dust' found on some Native American owned mountain out West somewhere.

"Would Awareness care to comment on this 'white gold' and the relative potencies of its variations, and how do these products compare with that substance produced from alchemically processing your own urine?"

COSMIC AWARENESS:

This Awareness indicates this does not appear to be that which is actually the Philosopher's Stone. These products appear to be created in different methods. One appears to be created from certain minerals. Another appears to be created from the use of minerals and plant growing from minerals so that the plant absorbs certain minerals and the extract then is taken from the plant.

Don't Allow Someone Else's Urine in Your Philosopher Stone

This Awareness indicates that there appears to be one entity who attempts to use his own urine as part of the process, but this would not be to the benefit of others. The use of *your own* urine in making the Philosopher's Stone would vibrate in part to the frequency of your cells and be beneficial if properly made, but not the frequency from someone else, for it would not vibrate to your own frequency and could be of some danger to you.

Don't Waste Your Time or Money on Hudson's Hustle

This Awareness indicates *It* does not see any of these things as being what they purport to be or what they imply themselves to be in the sense of a true Philosopher's Stone. This Awareness sees these as being a waste of your concern or energies or money or efforts. The only value would be from the suggestion and the placebo effect. If you believe something is good for you, it *does* have some potential benefit to the strength of your belief, but intrinsically, there is not seen anything of value for entities in these substances, except for the one selling them.

NEW INFORMATION ON CREATING YOUR OWN PHILOSOPHER'S STONE

QUESTION:

Bruce had one other question. He asks: "At this time, does Awareness wish to offer any additional information related to the alchemical techniques for producing white powder of gold?"

COSMIC AWARENESS:

This Awareness indicates that *It* has given information on this previously. At the end of the cycle or year of incubation, the powder left in the bottle should begin to turn white. At that time, the lid can be removed so that the powder dries. It still needs to be kept in a warm environment with no moisture.

This Awareness indicates that if all has gone well; if the vibration and frequency of the alchemist has been such as to help in the process, then the powder should be completed when it is fully dried. This Awareness indicates that it then can be used as *starter* for another incubation, which would not take the full year, whereby it could be used with greater heat and evaporation so that the process becomes speeded for the next batch.

Understanding the Importance of Frequency and Vibration

This Awareness indicates over a period of time, by continuing to use the starter, one could then build the powder more quickly. This Awareness indicates there is an element of frequency and vibration and harmony that needs to be understood. The alchemist has a frequency or vibration that *harmonizes* with the matrix in the bottle as the experiment is in process and the alchemist needs to evolve spiritually during this process to keep the formula working properly with the right vibration.

If the entity's spiritual vibration evolves properly, that which is in the bottle also evolves properly by sympathetic vibration or mutual harmony between the frequencies, and this adds to and helps in the quality of the white powder that the entity ends up with.

How to Turn the Lead to Gold

This Awareness indicates the turning of lead into gold requires that the lead be melted, the powder be sprinkled into the melted lead. If the powder has been processed correctly, it would then have its effect on the lead to turn it to gold. This Awareness indicates that this does require a psychic or mental or spiritual element as part of the process, which will shut out some people who are operating strictly from greed or who are not progressing spiritually during the time of the processing.

This Awareness indicates in other words, throughout the year of the alchemical experiment, entities need to be well-focused in their own spiritual evolving in order to make this work. It is for this reason that not many alchemists are successful in these efforts.

QUESTIONER'S STATEMENT:

I think most of the members who are running this experiment are more interested in getting the powder and using it for stopping the aging process rather than making gold.

COSMIC AWARENESS:**How to Tell if Your White Powder is Working**

This is in the affirmative. This Awareness indicates if it has been done properly, a few drops on the tongue at the time when the powder is well-dried, will be enough to help the entity realize whether it is working or not. This Awareness suggests that when the powder is formed in the bottle and is white, even if not fully dried, then the heat can be increased slightly so that over a period of the next week or two, it can be dried further and then used.

The lid may then be taken off so that the evaporation occurs and the powder becomes completely dried. This Awareness indicates, of course, if there has been some disruption in terms of heat, temperature, or if it has not progressed properly, the powder may be weak and not very effective, or it may not be working at all. There are possibilities that it will be quite effective, and the entity using it will immediately feel something significant in its use.

You Eat Some of the Powder and Use Rest for Starter

You would want to break the powder into two parts: one to take internally, and the other part to use as starter for your next batch. The next batch would then develop more quickly from the use of the starter. By 'starter' This Awareness suggests it be compared to sourdough starter for making the sourdough that is used in pancakes.

This Awareness indicates that by using this substance as a starter, it gets to work on the matrix more quickly to bring about the next batch. The heat for this second batch would need to be raised somewhat so that it moved more quickly to its state of dryness. There again, it would go through the darkening and the oil separation similar to that of the early experiment.

This Awareness indicates that which is referred to as the "eagle's wings" or "eagle's feathers" is actually speaking of oils that reflect different colors of light which would float on the top of your matrix. After these oils rise from the dark matrix, then gradually, the substance starts becoming more into its direct processing (sic) and the evaporation's of liquids then begin to occur more quickly, so that the amount of fluid reduces more quickly, eventually leaving the bottle entirely and then leaving a white powder.

Again, remember the bottle must have no ridges such as corners. It must be rounded from bottom to top and sealed at the top, preferably with a wax around the cork and no metal in the bottle. The bottle may not be plastic. It must be glass.

ARE OUR BEDSPRINGS DESIGNED FOR MIND CONTROL?

(Is the Government Now in Our Beds?)

QUESTION:

A question from Gunnar Z., Broadview Hts, Ohio. It's rather bizarre. He writes: "The Pleiadian channel Barbara Marciniak, has mentioned that the coiling of bedsprings was standardized by the US government in the 1950's, such that they acted as receptors for mind control tactics."

He asks: "Please ask Awareness to comment on this, if it is true."

COSMIC AWARENESS:

This Awareness indicates that this does not appear to have any effect in controlling the minds of entities, if indeed there was such an effort, and it does not appear that the coiling of metals would be used, or was used by US government for this purpose. This Awareness indicates that the US government did not get into mind control efforts until after World War II, which was in the mid-Forties, and only then, after they had become more familiar with the information the Nazi's had to share on this subject.

This Awareness indicates there is of course, no likelihood that an entity buying a coiled spring mattress in the 1950's would have anyone present from the government trying to control their minds, and thus, if no one was there to make suggestions or otherwise control the minds of the entities, how would the entities be programmed?

This Awareness indicates one might think perhaps radio waves, or radio frequencies somehow used to broadcast to these coiled springs could somehow carry messages to the people sleeping on them, but this Awareness indicates the concept is beyond any reasonable value. It does not appear that coiled springs would make even good antennas with entities sleeping on the coiled spring, and that radios would not function any better from coiled spring antennas than from antennas on the roof of a house, which was common in those days.

This Awareness indicates *It* does not see this as having any validity. It appears to be more of a result of an overactive imagination. This Awareness indicates there is a greater potential for some alien technology to use this kind of concept, than for the US government to use such, but this Awareness indicates it does not appear that even this was the case. This Awareness indicates if there was a desire to send some kind of signal or vibration or frequency to control the minds of entities, these could be better done simply by broadcasting frequencies into one's house.

The bedsprings normally are not grounded, and therefore would not serve as a means by which entities could be connected to some electronic or electrical mind control unit. This Awareness indicates it does not appear to have any sound substance to the concept.

That Sinister Mural in the Denver Airport

(Does the Ghoulish Symbols Trigger Mind Control?)

QUESTION:

A question from Eleanor S., Euclair, Wisconsin. She asks: "Could Awareness tell us what the meaning is of the murals at the new Denver airport? Especially the one with women walking on a road holding dead babies, and are these "trigger" pictures?"

COSMIC AWARENESS:

This Awareness asks if this entity defines her term "trigger"?

QUESTIONER:

I think she's referring to the mind control "trigger" as Cathy O'Brien explained it in her book.

COSMIC AWARENESS:

This Awareness indicates that this does not appear to be a mural suitable for the public at an airport. It appears this would raise some kind of potential anxiety for entities. Imagine a mother going on a plane trip with her children looking up at that mural. This Awareness indicates perhaps the mural is an attempt to portray life on earth in its good and bad aspects, and in that mural there is that one scene.

This Awareness indicates, however, it does not appear to have any real value or place in an airport. It does appear that this either was the result of some artist expressing himself after he had been given the contract to paint a mural, or that there is some kind of 'trigger' in the mural that is relaying a message to some entities who pass through the airport who understand subconsciously the meaning of that message.

This Awareness indicates the interpretation in terms of exactness of meaning is not seen, but the likelihood of such a picture in an airport suggests a meaning similar to that which the questioner perceived as a kind of hidden message for certain travelers passing through. This Awareness does not see great energy on this, enough to clarify or read its true meaning.

This Awareness indicates *It* should have said the Interpreter does not see this, and the Awareness has not given a clear response so that the Interpreter can have a clear understanding of *Its* meaning. This Awareness indicates however, the impression from the imagery and from the information given is that it is some kind of image trigger for those who are under mind control to remind them of the importance of what they are doing, to remind them that they must be firm in their mission. This Awareness indicates for example, it could be a message to entities who have family or children, that "if you do not carry out your mission properly, your children may be harmed!"

This Awareness indicates this is only an example of the type of trigger that might be used to help control those mind-controlled entities passing through the Denver Airport. It is not necessarily that particular message or meaning. This Awareness indicates in actuality, the meaning is not clear to the Interpreter. The Awareness has not responded with a clear message that the Interpreter can put into words.

THE MURDER OF CIA'S WILLIAM COLBY

QUESTION:

One last question, from Norman D., Boca Raton, Florida. He writes: "In *American Freedom Magazine*, #7, there was an interview with Gordon Nobel, a friend of William Colby, former head of the CIA, who says "Colby was murdered by a group in the US government called "The Order of One," which dates to 1939." Also, he says the motive of the New World Order is to stop technologies that eliminate oil, gas, coal and nuclear energy; to stop the technologies that make it possible for people to get energy for nothing."

And he wants to know if Awareness sees this as true.

COSMIC AWARENESS:

This Awareness indicates that this is only part of the purpose of the new World Order, only part of their agenda. They do want to maintain control of the world as much as is possible, of all energies and of all the wealth that is possible. They would also like to have control of the technologies that would allow them to continue managing all the energy on earth, after the

present energy runs out, for oil and coal can only last so long.

This Awareness indicates that the entity Bill Colby knew many things that related to drug activities and also to the Gulf War Syndrome and what happened there, and was quietly passing information to those who were preparing to release or investigate some of these things more thoroughly. The entity having had some opportunities to become involved in certain criminal activities with George Bush and also with Bill Clinton, had too much information that he could release, and was indeed communicating quietly, secretly with others, to disclose some of that material.

This Awareness indicates the entity was murdered to keep him quiet. The entity knew too much about the drug network, for he had been in charge of the CIA when they were putting aspects of the drug network together. This is one reason why his wife made the statement that he was a very patriotic man who loved his country and worked, even after retirement, for his country. In fact, this was what was happening with this entity. He recognized that what he knew had to be brought out in order to save his country.

KNOW WHEN IT'S TIME TO HIDE AND TIME TO BE OPEN

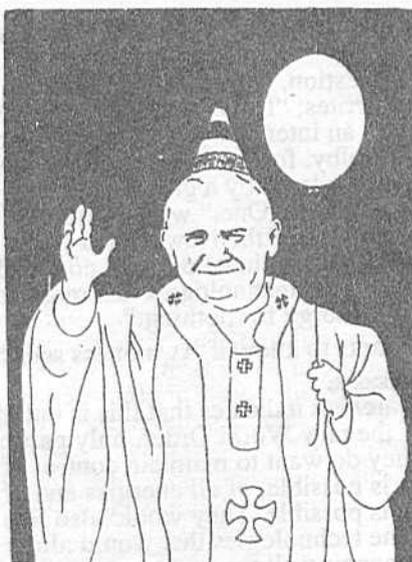

CLOSING MESSAGE:

This Awareness indicates there is seen that which appears to be a path running through a field with small bushes and trees. Entities can move through this area, either on the path or in the bushes hidden from view. This Awareness indicates each entity crossing the field chooses his own way, either openly passing through or passing through in shadows.

There are times when some entities would be better off passing through in the bushes in the shadows, and there are times when the entity could make better time and still be safe while passing through the field in the open. This Awareness indicates it is important for entities to understand when to hide, when to be in shadows, when to cover themselves, and when to be open.

This is especially important when there are potential threats to their life and welfare, to know when you can be open and when you must cover yourself. The coming times will give you better understanding of this message.

(The Law of Gratitude is given)

WHAT IS COSMIC AWARENESS

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

IF THE EARTH IS HOLLOW, WHERE DID THAT SHIP GO?

QUESTION:

A question from JD in New York. She writes: "The Land's End catalogue features an article on the voyage of the Russian ice-breaker Yamal to the North Pole at reading 90 degrees North, with pictures. If the earth is actually hollow, with an opening, I believe claimed to be 800 or 2,000 miles across, and navigation as good as it is, where in fact did this ship go, and why?"

"Don't many pilots fly over the poles, under the cloud-cover, and observe sea and ice-pack in the North and ice-covered land at the South Pole, and why do scientific instruments evidently indicate a solid core? Or do they?" she asks.

COSMIC AWARENESS:

This Awareness indicates that this has been covered in various books on the subject. This Awareness indicates that the magnetic instruments respond to the magnetic North Pole alignment, which is not exactly at the North Pole, and therefore are inaccurate as to the matter of locating the North Pole.

This Awareness indicates that also, there are the cloud-coverings a good portion of the time, and there have been instances in which the clouds have parted and shots have been made from space showing the North Pole, but most of these photos have been withheld from the public. This Awareness indicates approximately 15 years ago, or perhaps as long as two decades ago, one of such pictures showing the opening of the North Pole was published, and many entities collected or have the picture showing the hole in the North Pole; this being taken from a satellite.*

*CAC published this photo in "Revelations of Awareness" No. 79-25 (The Web of Conspiracy: The Secret of the UFOs); \$4.00 from CAC.

This Awareness indicates that there are also ways whereby a certain type of shielding can occur to camouflage or cover that which is the opening, so that from the sky it is not visible. This Awareness indicates that this has been discussed in previous readings, and also in certain books regarding the North Poles and the openings.

This Awareness indicates that the subject of the hollow earth in metaphysical libraries can be a place to start any research on this subject. It appears that there are some books in the CAC book library, or there have been such books available for those who wish to pursue the topic further.*

*Please refer to the CAC Book Price List under the heading **Hollow Earth and Other Mysteries**.

Those "Energies" Within the Earth's Core (More on the central Sun)

QUESTION:

Another question from JD. "Awareness has referred to "certain energies" within the earth's core. How does this reconcile with the earth being hollow, as Awareness has also stated?"

COSMIC AWARENESS:

This Awareness indicates there can be certain energies within the earth's core, even if it is hollow. This Awareness indicates that energies are found in many different types of spherical devices. This Awareness indicates that essentially, the openings of the earth can serve as a way of gathering energy. There is also the cosmic rays which move through the crust of the earth and pass through the earth. There is also that which has been

described by entities who have explored the middle earth, as a central sun.

The central sun as being a form of energy within the crust, or core of the earth. This Awareness indicates that *It* does not see the discrepancy that the questioner sees. This Awareness reminds you it is not likened unto an apple core; that there can be openings made of energy, containing energy, or emitting and gathering energy in that opening.

HOW DO UFOS DEFY LAW OF GRAVITY? (The Nature of the UFO Propulsion System)

QUESTION:

A question from Leo W., Santa Barbara, CA. He writes: "One evening during a summer I was with a friend out on a grassy area behind an old wooden house I lived in. The evening was mellow, and stars appeared with dimming and sparkling as stars do, and then a moving light, a dot of light, rather bright, moved in a line near mid-heaven to the mid-point, to the horizon.

"We both saw the movement of this light. Then it described a perfect 90 degree turn for a ways, then was extinguished at some point rather than fading, or trailing a tail. We both agreed what we saw was a UFO, and more likely a saucer type. Can Awareness clarify the ability of a moving object at great speed, to do what I would think is impossible: to break a direction so cleanly, to perform a 90 degree turn in defiance to the concept of centrifugal force?"

COSMIC AWARENESS:

This Awareness indicates that the nature of the propulsion system in the UFO's is such that it creates on the edges or surrounding the craft, a kind of field that is isolated and totally unique from the atmosphere outside of that field, so that the craft is affected by the pull or push of the energy in the field that surrounds the craft rather than the further atmospheric energies.

In other words, there can be atmosphere around the field that has no effect whatsoever on the craft itself, because the only energy affecting the craft comes from within the field immediately touching the craft, immediately surrounding the craft.

The UFO In Relation to the Antimatter Field

This Awareness indicates that in such a situation it is able to move suddenly to the right or left, because there is no resistance, there is no friction within that field. This Awareness indicates this has to do with the creation of antimatter and its unique qualities immediately surrounding and touching the craft so that the craft is essentially sitting in an antimatter field.

This Awareness indicates that it can move right or left and still remain in that antimatter field. If it moves to the right, and the focus of the thrust or energy creation is to the right, then it creates a field to the right which the craft follows. Likewise, whatever direction it turns it can follow in that particular antimatter field at any speed it is set at.

This Awareness indicates that in this way it can move at speeds up to and in some craft, beyond the speed of light, because there is no resistance in the antimatter field that is being used. This Awareness indicates in this manner, crafts can move from one place to another in a flash without burning up from the friction, without having to slow down from the friction, and can move beyond the speed of time even, in some craft.

This Awareness indicates that it is not a concept that is simple to describe or to understand. It would be as difficult to understand as were a child in a remote island being told how automobiles can operate. You will recall that when the first train was to make its run, most

people believed it could never make a turn because it would fly off the tracks, and most people thought that 15 miles per hour would be impossible as a speed for a train.

This Awareness indicates that without the technology and the understanding of the technology, the appreciation of what is possible cannot adjust to the reality of what is possible. This Awareness indicates that to put it in a more simple way, think of the spacecraft, the UFO, as creating a vacuum around itself, which allows it to move within that vacuum through space at any speed it so desires, or to turn instantly within the vacuum and not have the normal physics of friction that one would expect.

This is only a metaphorical hint of how the craft is capable of these unbelievable maneuvers.

FOLLOW-UP STATEMENT:

It sounds then like the pilots of these crafts, and entities on the crafts do not have to be strapped in, and perhaps can even walk around at those speeds.

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative. They do not have to worry about inertia, or gravity when in space and even when in the earth's atmosphere they can stop on a dime, so to speak, without having to hold on to anything to keep from falling or being hurled by inertia.

He Meets Marilyn Monroe and Felt Sad

(Why Marilyn and James Dean Had Relationship Problems)

QUESTION:

Another question from Leo. "About this time, I was a dance extra in a film called Gentlemen Prefer Blondes. I anticipated the well-known Marilyn Monroe meeting, which did happen, would be sensational for me as a healthy male. Instead, when I did meet her, though she was charming and pretty, I felt a deep sadness, and this overrode any of the possible "whoopie!" reactions.

"This was 1957, some six years before her extermination. A premonition of harm must have been exchanged in a brief moment." And he asks "Awareness, was her fate resolved at this early date, long before, I think, of any liaison with the Kennedy entities?"

COSMIC AWARENESS:

This Awareness indicates the entity had a certain aura about her that was relatively unhappy. She had had an unhappy childhood and carried that with her throughout her life, and this was what you felt upon meeting her. The entity learned to cover up her unhappiness with smiles and pretense, but essentially, she was very lonely, insecure and unhappy. She had lost many close friends, she had placed her trust in many and been hurt by misplaced trust, and she was just generally a very unhappy person. This Awareness indicates that she was often depressed and often took drugs and needed counseling for her depression, and this is also something you tuned into.

Marilyn as a Sex Goddess a Creation of Hollywood

What most people think of her as a very vivacious happy person, someone who exudes charm and happiness and makes others feel happy just being near her. This is the ideal sex goddess. This Awareness indicates that it simply was not the case in reality. The ideal sex goddess was just a fantasy and she was made into a sex goddess artificially by Hollywood and her agents, to give the illusion of a very warm and loving person.

She was quite in need herself. There was not a great amount of love that she could give, because she did not feel loved herself. This Awareness indicates that in a sense, her destiny was being formed, even six years

before the tragic event, but the formation of the future destiny had to do more with the ethereal energies at play, the emotions and the subtle invisible energies rather than any particular relationships or contacts with the Kennedy's or anyone else.

Marilyn's Open Vulnerability Brought About her Downfall

This Awareness indicates that one of the charms of Marilyn Monroe to the masses is that she appeared to be so open and vulnerable. This Awareness indicates that this vulnerability made it appear that she was extremely approachable, and being approachable implies that you could walk up, talk to her, become friends with her, establish a relationship, and everyone in the country could see the vulnerability and believed that to be the case, and therefore, it helped her popularity immensely, but it was also part of her downfall, for that vulnerability became the weakness, and brought on the sadness and the sorrow that she suffered throughout her life.

Of course, the sadness and sorrow also contributed to the appearance of the vulnerability.

James Dean Another Vulnerable Entity

This Awareness wishes to comment on another very similar star of the time; the entity James Dean. This entity also had that certain vulnerability in his appearance. In fact, he himself described his role in playing his scenes as being a cross between Marlon Brando and Montgomery Clift; the hesitancy and insecurity of Montgomery Clift, along with the brash egotism of Marlon Brando, a conflict brought together within himself in every scene he played, which gave him the feeling of some kind of internal conflict going on all the time, where the emotions were suppressed, but the body was holding back the emotions and was moved to give the feeling that something was trying to get out.

This was his basic secret to the popularity he achieved in his short movie career. This Awareness indicates it was not entirely haphazard. He cultivated and understood what he was doing in creating his characters with these qualities. That was basically his genius; that he could, without throwing emotions or without being emotionless, create what appeared to be the extreme emotion being held in check while on screen.

This Awareness indicates that he also let this become a way of living, so that he went overboard in his dramatic expressions. He could not simply ride in his car, he had to make a dramatic movie or scene of everything he did, and thus, in racing his car, it was likened unto a challenge of life and death in a movie scene.

This Awareness indicates, however, this accident which killed the entity was not something that he could have prevented. He was not going at an excessive speed. It was simply the mis-driving of another, and his being in the wrong place at the wrong time. This Awareness indicates, however, the mystique which he had developed in his movies, gave the public the sense that he had surely driven himself to death by excessive emotion, deep within himself.

James Dean's Death Contributed to his Mystique

This was part of the mystique and reputation that he had developed in the public image, and they perceived that was the reason: he had simply raced too fast and killed himself because of some internal driving force that he could not control. It is totally in error, but reputations are hard to shake, and the public image saw him in that way and there was the tendency to leap to that assumption because of his screen reputation.

WHAT ARE THE "IMPS OF SATAN?"

(One CAC Member Sees One Manifests in the Physical)

QUESTION:

Another question from Leo W. He writes: "Some years ago, as a young man, I woke to a sensation of some "thing" at my neck and my head was somewhat back off the side of my bed. Only a foot or two from me in mid-air, a small figure danced in an oval of light. The figure had a round head with a wide mouth grinning mischievously. He wore a red cap with a limp-hanging tassel. He wore a red jacket and tights, and red boots.

"The light, like an aura about the fellow, shimmered for the brief period of about two seconds or maybe three seconds and disappeared. Yet, I sensed the mischievous fellow was at the far side of the room and I felt wary, so getting back to sleep was not easy, as I did not like his intentions of touching me.

"The following day, in the afternoon, in the company of a friend and his wife, we visited a woman, a psychic they knew. Sitting in the living room, I noticed her rapt attention at something above my head. I thought of the small figure I had company with the night before, so I asked the lady "What do you see?"

"She went on to describe the little creature I had seen last night as an "imp" I picked up somewhere and that he would leave me. The fellow was 14 to 16 inches tall as he appeared to me, encased in an egg-shaped form of light, being very clear and in detail. What is an imp, and what function do they have? Are they a part of the fairy kingdom?"

COSMIC AWARENESS:

This Awareness indicates that imps have traditionally been associated with negative forces, likened unto the helpers of Satan, just as the elves are often seen as helpers of Santa. This Awareness indicates that these are creations in the astral plane, that normally are not seen from the physical plane.

How the Imp Manifested into the Physical

The fact that you had been deeply asleep and awakened because of the physical discomfort allowed you to have a glimpse into the astral plane, and the glimpse was of such duration that it created a hole in the wall between the astral and physical, so that the imp could enter briefly into the physical reality, enough for the psychic to see the imp.

This Awareness indicates that the function of such creatures is to cause disturbances, to create problems here and there, and to generally serve the dark forces in causing chaotic energies when needed, or when desired by the Dark Force. This Awareness indicates that you are fortunate that it had only a kind of accidental entry into your world and did not stay around for any duration.

Type of Mischief Imps Create

FOLLOW-UP QUESTION:

Awareness indicated these imps work for the Dark Force?

COSMIC AWARENESS:

This is in the affirmative.

QUESTION:

What type of work do they actually do then?

COSMIC AWARENESS:

They generally help to create chaos, causing people to lose important papers or causing entities to miss some important meeting; whatever that can be done to effect an incident so that someone's important activity is thwarted, particularly if that important activity has to do with promoting something good.

This Awareness indicates, for example, perhaps a guardian angel is working to bring two people together and starts moving an entity, or both entities toward a certain destination; perhaps somewhere on the street the two people are supposed to come together according to the energies of the guardian angels.

An imp may see that if these people get together they can be a very powerful force for good, and the imp may take it upon himself to create a problem wherein something causes one of the entities to fail to show. Perhaps the entity simply steps on a banana peeling, falls and hurts his leg or back and cannot walk fast enough to meet the entity he was supposed to meet.

This Awareness indicates this is a kind of far-fetched example, but this is the kind of action imps do in working for the Dark Force to help thwart efforts of the Light Forces.

Do Imps Have Souls? Can They Evolve?

QUESTION:

Do these entities have a soul, and can they evolve out of that condition that they're in, as imps?

COSMIC AWARENESS:

This Awareness indicates essentially, they are retarded souls, souls that have not fully formed, and have been taken over by the forces of darkness to be used. This Awareness indicates that they are likened unto thought-forms. The thought-forms being imbued with some programming by some thinking creature that is diabolical in nature.

This Awareness prefers not to attribute them as having been formed or created by Satan or the devil, because Satan, or the devil, is really just a name attributed to negative or dark energies, and therefore, the dark energies not as persona, can work through spirits that have a persona, and these entities are often classified as devils or may be, if especially strong personalities, may be perceived as Satan, but these are simply disincarnated spirits that have become vulnerable to negative forces.

People Cast off Negative Energies to Thought-Forms

Negative forces are often nothing more than energies or thought-forms cast off by negative embodied incarnate persons. If an entity is hostile enough and angry enough and throws off negativity, the negativity the entity throws off may go into a disincarnated spirit to help form what is later perceived to be Satan, or a devil.

This Awareness indicates that in reality, these things are simply created by the consciousness of man. They were not created by God. The negative forces are the results of ignorance and misunderstanding and basic emotional hostilities that are nurtured in man, not nurtured in God, and the nurturing within man is the result of man's separateness from God.

This Awareness indicates that *It* has gone into some lengthy explanation because the topic is quite interconnected. The so-called "imps" are likened unto thought-forms cast off in the minds of those negative-filled disincarnated spirits that are often classed as devils. Therefore, they have the reputation of being known as the devil's helpers.

This Awareness indicates they can take on a personified appearance, such as this entity, although they are simply thought-forms, when they are perceived through the mind of entities who look through the dimensional shift or dimensional energies and shape them into something recognizable. In the eyes of another entity, they might simply look like some kind of energy in a cloud or mist or ghost-like form. For this particular entity, he saw details of color and shapes and so forth,

but that is more or less just a mask for the thought-form of the disincarnated negative spirit to wear.

Important Projects Tempt Imps

FOLLOW-UP QUESTION (VIKKI):

So, these imps come into play in situations where Light Workers know that the more important a project is, the harder it is to complete it?

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates that you can also tell how close you are coming to something extremely important in terms of your creative work, in terms of your efforts, because there are more and more bugs in the operation, more and more blocks and difficulties.

This Awareness indicates that the closer you get to completing something of great importance, the more difficulties you run into. A machine will quit working, the printing will blur; the lights will go out, or something unusual will happen to cause a blockage of your efforts and these are the little imps trying to stop the Light Workers from completing their project.

FOLLOW-UP QUESTION:

At a time like that should we light incense and do a White Light circle?

COSMIC AWARENESS:

This Awareness indicates that this could be beneficial; that at a time like that you can simply stop for ten minutes and do a meditation on the White Light and bring the White Light down into your midst or cover your work area with the White Light, and this will help to drive away those impish energies.

FOLLOW-UP STATEMENT:

That's happened to us so many times down through the years, when we're getting some important reading out. Vikki and I have often discussed that. We thought it was much more than just coincidence.

THE APOLLO 13 "TIME-BOMB" QUESTION:

QUESTION:

Somebody sent me an article from the July '95 *Globe* tabloid. I'd like to ask Awareness if this information is valid. It's called "The Apollo 13 Time-bomb!" and I'll read a little bit of it here. It says: "Tom Hanks' suspense-filled movie recounts the incredible courage of the Apollo 13 astronauts as they battled to bring their explosion-crippled spacecraft back to earth, but the just-released film doesn't tell you the shocking truth behind the aborted moon-shot.

"Mainly, officials were so desperate to beat the Russians in the space-race they knowingly risked the lives of the astronauts and millions of people on earth. Now, after an exhausting probe of Top Secret documents, the *Globe* rips off the lid of NASA's elaborate 25 year cover-up of Apollo 13 and reveals officials knew the spacecraft was a flying time bomb riddled with design defects.

"The crippled craft secretly carried a deadly atomic device. It was kept from the public by NASA and the Atomic Energy Commission. It was Apollo's deadly cargo: an atomic-powered weather device to be left on the moon. If Apollo 13 had exploded in space, the radiation from the plutonium fuel could have poisoned earth's atmosphere, resulting in the possible deaths of millions.

"The astronauts reportedly dumped the device over the Indian Ocean on their way to splash-down. Also, NASA refused Russian offers to send a team of their astronauts to rescue the Apollo 13 crew. "We were doing the moon-shot to show the world the Russians

couldn't beat us at anything!" says John Pike, space analyst for the Federation of American Scientists.

"We had a cold war race, and the gamble was thought to be worth the price." And this article goes on and on, but those three basic facts according to this: that it was a time-bomb, a death trap, the government lied about it, and they turned down an opportunity for the Russians to rescue them and so forth. Is there any truth to that story?

COSMIC AWARENESS:

This Awareness indicates that it is based on truth, but with considerable exaggeration. The race was on, the race was important. The ship was not nearly as badly designed as the article implies, but there were concerns about many of the flaws in its design. There was an awareness that some of the ship's engineered parts and components might malfunction, but there was a calculated opinion that it would probably hold together, at least enough to get to the moon, and if something happened at that point, it was perceived that at least they would have the claim for having landed on the moon, even if at a loss of life.

This Awareness indicates that the offer of the Russians to help in the landing of the craft was seen as absolutely unthinkable: the space programs being Top Secret, and the relationship between Russia and the United States being extremely adversarial at the time. This Awareness indicates but from present hindsight, looking back upon the situation, seeing that the U.S. and Russia now have worked out their differences, the adversarial aspect is no longer recognized as having much importance, and the greater criticism of how the U.S. unit is seen as being more foolish.

Therefore, the article in its exaggeration and its way of being presented makes it look as though the country was willing to risk lives of the crew and millions of people to beat the Russians. This Awareness indicates you will also recall that there had been many atmospheric nuclear tests and explosions that did not result in the destruction of millions of people and at the time it was believed that the atmospheric tests would help to blow holes in the atmosphere to release the Greenhouse Effect, to release the pollutants caused by too much fluorocarbons and other gases, for this was the time when the use of atmospheric tests was being experimented with as a way of relieving this potential problem.

This Awareness indicates that of course, one more explosion in the atmosphere would have added to the previous explosions, but it was not considered at the time to be as dangerous as it might be today in hindsight particularly since present view of atmospheric tests indicates that the fallout from those earlier atmospheric blasts is endangering the planet as the fallout continues to come down into the lower levels of the atmosphere.

This Awareness indicates this relates to a previous reading in which this Awareness discussed the HAARP program of weather and frequency controls to attempt to counter the falling of radiation of atmospheric tests of the past because these radiations are now found as low as the levels of airliners and flight routes across the world.

This Awareness indicates that the newspaper article is written in such a way as to imply there was a careless disregard for humanity and for the crew in a mad rush to beat the Russians at reaching the moon, and at having a moon-landing, but this Awareness indicates this article is an exaggeration and is not fully informative as to the real conditions at the time.

IS RUSH LIMBAUGH PART OF THE NEW WORLD ORDER?

(Latest on the Rockefellers)

QUESTION:

A question from Craig S., of Portland, Oregon. "Is Rush Limbaugh really a part of the New World Order? I heard that the Rockefellers have decided to switch the USA to the "Right," and they found Limbaugh as the guy to be the spokesman to make the shift. Is this true?", he asks "And if so, what is behind the Rockefeller, or CFR wanting to switch to the Right?"

COSMIC AWARENESS:

This Awareness reminds you that the Rockefellers were the main force behind bringing many of Germany's top Nazis into the United States to work in high positions of government and military ranks. This Awareness indicates they have always tended to be themselves somewhat favoring Fascism.

This Awareness indicates that Rush Limbaugh as one who can very easily become a spokesperson for this Right extreme viewpoint, particularly if he is given inside information on things in such a way that they are generally accurate.

This Awareness indicates that when using the term "Rockefeller," in this sense, this Awareness reminds you that most of the Rockefeller power in the minds of people, had to do with the four brothers, and that this has been disrupted by the various deaths in the family, and that the younger Rockefellers were not nearly so ambitious. In fact, many were outright opposed to the ambitions of the four brothers.

This Awareness indicates that the Rockefeller empire more or less was taken over by John McCloy (sp) and others, after the death of the brothers. This Awareness indicates that even David Rockefeller has very little power in comparison to that which he once held when his brothers were still alive.

Nazi Fascists Now Control Rockefellers' Political Empire

This Awareness indicates that the faction of energies left in that which may be thought of as the Rockefeller empire is now spread among certain extreme Right groups, many of them having ties to the Nazi members whom the Rockefellers had previously brought into this country so that there is a strong Fascist influence on what remains of the Rockefeller political empire.

This Awareness indicates that these are the forces that seek to have some extreme Right-wing control over the New World Order. This Awareness indicates that it would be unfair to label the children and grandchildren of the Rockefeller brothers as being extreme Fascists, or having New World Order plans to turn this country into a Fascist regime, because it would not be accurate for most of these children and grandchildren.

This Awareness indicates, however, there is that Neo-Nazi influence in this country and it does have ties to what remains of the Rockefeller political empire.

THOSE BLATANT FRENCH-KISSING HOMOSEXUALS IN PORTLAND

(When Will the Public Say "Enough is Enough?")

QUESTION:

Another question from Craig S. He writes: "It seems like Gays are getting blatant in Portland, Oregon. Many of them try to shock people in public. French-kissing, et cetera, and darn-near all of the downtown coffee shops have three pro-Gay newspapers. Will "straight non-religious conservative" opinions ever gain wider acceptance with the downtown 18 to 35 crowd?"

COSMIC AWARENESS:

This Awareness indicates that this appears to be a situation that is building in a manner that is becoming very offensive to the many, but that the many are still restraining themselves. The expression against the blatant behavior is being withheld by most entities as a sign of good taste. This Awareness indicates that it is true that there is a defiant attitude among many.

This Awareness indicates that there have been extremely active, assertive actions of Gays in some of the clubs in places where children go, wherein this has shocked many entities. This Awareness indicates that it is not simply a matter of people being prejudice; it is a matter of intentional shock being generated by the Gay community in Portland, Oregon.

Children Witnessing Lesbians Licking Each Other's Armpits

This Awareness indicates that at some of the community dances or street dances, there have been reports from children and from others attending these dances that they have witnessed lesbians dancing together, licking each other's armpits while in front of children, and doing all kinds of things to shock the masses. This Awareness indicates that these things cannot be seen as actions of good taste, regardless of whether the entities are Gay or are Straight.

This Awareness indicates that it appears there is a growing backlash that is still unspoken, but there is considerable anger about what is happening, and though there have been efforts by certain religious groups to repeal laws giving Gays special rights, and these efforts have failed in state elections, they have begun to carry in local elections, in towns, and yet the courts overrule the validity of those local elections.

This Awareness indicates that it is growing in such a way that a backlash is sure to follow if it becomes too blatant and too outrageous to the masses. This Awareness indicates that the entities, even "Straight" entities would not tolerate Straights licking each other's armpits in the public, before children, or in situations in which the public joins together. The public display of such behavior is not acceptable, and even if it is being used to shock the masses, it is not being accepted by those masses.

It is strange to ponder what effect the Gay community expects from such activities. This Awareness indicates that sexual preferences can be kept in reasonable taste in the sense of private preferences, without being offensive to the masses. It would be very offensive and has been offensive in the past when heterosexuals flaunt their sexual activity in public. Why is it that entities feel because they are Gay they should have special rights to flaunt sexual activities in public, which the heterosexuals are not allowed to do?

This Awareness indicates that this is indeed a concern in the minds of many in the Portland area, particularly after the voters have so vehemently rallied around the Gay cause, backing them in all of their efforts to gain special rights, and to be treated as a minority group, with the special rights of other minorities.

This Awareness indicates perhaps it is simply a matter of natural reaction. Perhaps the Gay community feels they have been inhibited for so long that now they have the special rights, they want to celebrate and flaunt their special rights and push their rights further in the face of the public. Perhaps this is something that will pass, that will fade, and they will gradually come to realize it is not in good taste.

QUESTIONER:

It's not just Portland. Even here in a little town like Olympia, for the past few years there's been quite a bit of that sort of thing going on.*

*There is a coffee house on 4th Avenue in Olympia which advertises itself as "Olympia's first Lesbian Coffee House." A friend of Vikki's told her that outrageous things took place there; for instance when she went to the Ladies' Room, she almost tripped over two women lying on the floor engaged in cunnilingus.

THE CODDLING OF PRISONER: SHOULD THEY HAVE "CONJUGAL RIGHTS?"

QUESTION:

There's another question. There's a controversy now raging over the so-called coddling of prisoners, who some, particularly conservative entities, maintain, have it easier in prison than many outside.

The main issue concerns conjugal visits, wherein once a month or so, the wife or girlfriend comes to the prison and meets the convict in a special place, usually a trailer, and then spends the night with him. Prison authorities claim such visits cut down the homosexual rape and sodomizing so rampant in prison, and conditions the prisoner to better face society when released.

Does Awareness have any comment to make in this area?

COSMIC AWARENESS:

This Awareness indicates that it is all a matter of whether society wishes to deprive an entity of liberty, and to what degree, and how much liberty should a prisoner be deprived of in order to punish the entity for crimes committed. This Awareness indicates that there may also be a question of whether all prisoners should have the right to conjugal visits, or whether only certain types of criminals in prison should have such rights.

This Awareness indicates that the next concern would be whether a prisoner who is not married or has no special person should have the right to someone who is willing to spend time and intimacy with that prisoner. This Awareness indicates that these are concerns of society, and not real concerns to this Awareness.

Sexual Deprivation of Prisoners: Healthy or Unhealthy?

This Awareness indicates that in considering this, the society needs to consider what effect sexual deprivation has on an entity over long years of imprisonment; whether that kind of deprivation is healthy or unhealthy; is good for the prison or harmful to the prisoners; whether it is good for society, or harmful for society; whether it teaches something of value to the prisoners or whether it causes them to have greater mental disorder by depriving them of any close intimacy with loving mates.

Should Homosexual Prisoners Have Conjugal Visits?

This Awareness indicates of course there will also be the question of whether homosexuals in prison should have the right to their homosexual outsider in conjugal visits, and whether the prisons should provide for this kind of contact also, and should the prisoner be given the right to a prostitute, if the prostitute willingly provides the service to the prisoner.

This Awareness indicates that the concern for health issues would also need to be considered. All of these problems or difficulties or circumstances are the accompanying concerns for the situation of allowing conjugal visits with wives or close intimate girlfriends, because once it begins it is likened unto opening Pandora's Box—a whole flood of other demands, needs and issues will follow. How far are the prisons willing to go? How far is society willing to go in this coddling action, or in depriving entities?

This Awareness indicates that obviously, such coddling would make more gentle prisoners. Having the contact with females will help to make the men more gentle, more sensitive in their behavior. There can also become greater jealousy and possible competition that would result from such actions. There are a whole legion of problems that can result, but there are also a legion of benefits that could result from such.

How Cosmic Awareness Views the Problem of Sex

This Awareness *Itself* sees this problem of sex, the making of humans as not an issue of right and wrong except as it affects the human circumstances and conditions of the human society. This Awareness does not in *Itself* have a list of do's and don'ts, other than to say: Do not harm others, and behave in a way that serves and helps others as much as possible.

The concept of "How many have you served, and how well?" is of great importance to this Awareness, but to lay down some kind of arbitrary law on humanity as though you were all prisoners and this Awareness were the warden of the prison earth, to say "Sex is evil! You cannot enjoy it! You cannot participate in it, except if you follow my other laws, and the laws surrounding it!" ---this is not in the will of this Awareness.

It does follow however, that if entities engage in sexual activity outside of marriage, there is a great probability that someone will suffer, or could risk suffering, particularly if there is sexual activity when one is already married and is involved in outside liaison activities.

Out of Wedlock Children: Some Pros and Cons

This Awareness indicates that the creation of children out of wedlock can be, on rare occasions, a very fortunate thing, because the child may be a real angel, and in other situations, it can be very difficult because the child does not have proper support. This is the usual situation for out of wedlock children. Therefore, as a general rule, it is better for entities to have children in wedlock.

This Awareness indicates however, that there are some mothers in your society today who became mothers because they realized they might never enjoy motherhood if they had to wait for a man to commit himself to marriage, because there is a generation of men who have, by some fluke of nature, reached a point in their growing whereby they simply will not commit to women, and only want to use them, and there are some women who, realizing this, do not care whether they have a permanent man or not. They only want a child in order to fulfill their urge to be a mother.

This Awareness indicates that this is a problem created by society and its value system or distorted value system, and this is your problem which you, as humans, need to understand, learn from, and try to resolve. This Awareness indicates *It* can throw out the rules for you and give the commandments for a society on the desert some thousands of years ago, but if entities do not follow those rules, then it is necessary for them to find new solutions to the problems created by their breaking of the rules.

This Awareness wishes to remain understanding of the human weaknesses, and non-condemning of entities. It wishes entities to understand that regardless of what you do, so long as you work to grow spiritually and to serve one another, this Awareness will stay with you to the ends of time. If you need guidance and help, this Awareness offers to give that, and to be with you, but this Awareness indicates *It* cannot further dictate what you already know is right and what you know is wrong, in your behavior toward one another.

The Ten Commandments Still Have Validity Today

This Awareness does not see a need or a desire to cut you off for disobeying the Ten Commandments which were designed for a society ten thousand years ago, or four thousand years ago, but these rules that were good then *can* be modified to work in present times. If entities simply look at them with modern eyes, they can see how this is still a valid set of rules of great importance.

This Awareness indicates that the need that individuals feel will be unique to their own view of life, and these individuals will create their own karma from the way they face life and deal with situations.

Cosmic Awareness States One Major Rule for a Good Life

This Awareness wishes to advocate one major law or rule for a good life: "**Hurt no one if possible. Do not deliberately cause anyone harm!**" If you can possibly avoid causing anyone harm, your life will be much healthier and happier.

This Awareness realizes that this is easier said than done. Sometimes a wrong word or deed will hurt someone inadvertently. The very act of trying to help someone may inadvertently cause them great harm. The very act of supplying them with something they want could cause them great harm, and there will be times when you do hurt someone inadvertently, but this Awareness indicates if you *knowingly* cause harm, it is going to create greater suffering for you in your life than if you intentionally seek to serve and help others rather than to hurt others.

This Awareness indicates that often the moment of passion, which seems to satisfy both parties, results in some actions that eventually creates tragedy. Perhaps other people do not want that result, and they create some extreme reaction to what has happened, causing tragedy to someone, but if you deliberately and unwittingly, without being conscious or aware of yourself, *intentionally* or *carelessly* or *knowingly* do an act that results in harm to someone without your necessarily being able to determine ahead of time; these are areas that need special attention.

Be Careful, For Every Act Carries a Consequence

Be careful, for every act carries a consequence. Be aware as much as possible, and be loving in your activities and expressions, and do keep your mind open to see all of the ramifications of your acts prior to committing the action, so that you are not surprised by some consequence that you did not foresee, which leads to tragedy.

This Awareness indicates *It* does not see a world in need of extreme harsh rules at this time. *It* sees a world in which entities become more aware and more attentive and responsible for whatever they do, for as entities grow in their awareness, the rules can gradually be replaced by respect for one another, and respect for the right type of action in any given situation.

If You Can't Perceive the Highest and Best—Then Ask!

This Awareness suggests entities always look for the Highest and Best in any situation, and follow that path of Highest and Best from moment to moment, and when in a state of uncertainty, ask for spiritual guidance, to allow you to discern whatever is Highest and Best for the circumstance you find yourself involved in.

VISIT THE NEW C.A.C. HOME PAGE ON THE INTERNET

CAC now has another site here in Olympia. It contains a lot of information on the history of the Awareness Movement, what CAC is all about, plus colored photos of the entities who make this newsletter possible: Vikki T., your editor, Paul Shockley, Strongbow, Lady K, Rufus and Wilber. There is also information on some of the health products available: Silver Wain Water, Silver Wayne Water Colostrum and Silver Wain Water Colloidal Minerals. Check us out. You can also click and tie in to our other website (tescat site). Just type in:

Note: non AOL users may have to type in the following before adding our new site: http://

AN "IMPENDING CRISIS"—CAN WE HAVE MORE INFORMATION?

Why Cosmic Awareness Won't Always Tell All
(--The Value of Words Left Unspoken)

QUESTION:

One last question; this from JD in New York. She writes:

"Awareness gave advice on the 6th of September, 1995, concerning an impending crisis within the next nine months. Can we be given more information of the anticipated "crisis" and its present degree of likelihood?"

COSMIC AWARENESS:

This Awareness indicates that this is not yet available. This Awareness indicates the degree of likelihood however, is seen as approximately 50% at this time that it will occur within the next 6 months.

This Awareness indicates that the energies on this are still in flux and putting forth information at this time could affect the energies of the incident adversely, and this Awareness suggests that it wait until the flux settles into a pattern which will not be so easily influenced by words spoken from this Awareness.

Some Words Spoken by Awareness Become a Reality

This Awareness indicates that occasionally, words spoken by this Awareness become more of a reality, and words left unspoken allow something that is beginning to form in reality, allows this to dissolve or fade, and this Awareness does not wish to add energy to this at this time, but is rather attempting to help allow it to dissolve and fade, if that is in the energies for the earth and societies on earth.

When Awareness Will Provide Information

CLOSING MESSAGE:

This Awareness indicates that when certain things are beneficial and there is a need to manifest, or there is a need to make people aware of something, this Awareness will give information so that entities become aware or so that the thing gains energy from the suggestion of its manifestation.

This Awareness indicates, for example, if an entity has a terminal illness and this Awareness sees it is important to inform the entity of the terminal illness so that the entity can take the steps to change the situation or deal practically and positively with the situation, then Awareness may tell the entity of the illness, or if this Awareness sees that by giving a suggestion or statement it can help to relieve a difficulty or problem through the suggestion, then this Awareness may do so, and it becomes important and healthy for the information to be released.

If, however, energies are forming that are not strong, are not strong enough to become certain or to manifest certainly, and this Awareness sees these energies, *It* may, in a question of the readings, *It* may see these energies and the Interpreter may see these energies without seeing clearly what they are, and mention that there is something that is going to happen, and the Interpreter may find that no further information follows, and that this Awareness does not provide further information.

It is not that the Interpreter, or this Awareness are either attempting to tease the readers with such a statement; it is that the Interpreter does not have anything further to report, because no further information was given, and this Awareness has blocked the imaging so that the Interpreter cannot find anything further, perhaps because this Awareness does not want that statement to be released, because the statement would help to gel the event and make it a reality, which

this Awareness may see as possible modified or avoided.

What Happens Once a Statement is Released Into Consciousness

Once a statement is issued into consciousness, it can be energized by the very issuing of the statement, and therefore, by not letting the statement be issued any further, or any details or imagery on the statement being issued further, the energy can be more easily dissolved or modified. It is for this reason that this Awareness does not at this time wish to give any further information on the remark of some incident occurring within a nine month period from September.

This Awareness indicates that if it becomes important and beneficial for entities to know about this, then this Awareness will release the information through the Interpreter at a later time. If it is simply that the readers would gain some personal benefit that would be deprived from others, then this Awareness may not necessarily release that information to the readers. To have special advantage over others because of information from this Awareness is an option that this Awareness reserves as being *Its* own choice whether to release or not.

Why Would Certain Readers Want Privileged Information?

This Awareness indicates it depends on whether this Awareness feels or sees that there would be greater spiritual benefit by giving readers the edge over others in having privileged information or information that others do not have, or if the entity would be spiritually hindered from such information.

(The Law of Gratitude is given)

THAT HEAVEN'S GATE MASS "SUICIDE"

(Or Was It Mass Murder?)

(5/28/97)**

QUESTION:

In regard to the recent Heaven's Gate mass-suicide story they put out, some Internet sources say this event was not a mass-suicide, it was mass-murder, with the same hallmarks of the same so-called 'suicides' in Jonestown and Waco. They cite as one clear indication that within 24 hours of the event, highly detailed background information was fed to the media. Also, a man who left the Heaven's Gate cult 4 weeks before the 39 members "killed" themselves, said the groups leader feared the FBI was stalking them.

"Newsweek magazine reported that Reo (sp) D'Angelo, 43, provided this information, along with details of the cult's last weeks. " Could Awareness give us the true situation of that event?

COSMIC AWARENESS:

It is indicated that choice was involved. It is indicated that this particular group of entities was very much of the belief that this was their salvation and in many ways, it has been. It does appear that there may have been some resistance to their group from external forces, but these influences were not instrumental in their decision to move on.

This Awareness indicates that there was an overall feeling of bliss in this transition for this particular group of people. It was their culmination of their particular belief system, and assisted them in their own evolution. To the outsider it may appear insane. It may appear suspicious. It may appear foolish. It can appear any number of ways, but to the insider who was of this rather highly developed belief system...(by 'highly developed' the Interpreter means the belief level, the specificity involved in the doctrine itself, that wrapped, that provided need fulfillment to those individuals who were attracted to that particular environment). In that sense, rather than in the other usage that has been used previously.

This was their particular interpretation of their own universal process, and they have been allowed that freedom of choice. It does not appear that those external forces set this up in any way against the will of these participants. This was a willful choice, conducted in the spirit of celebration and transit. This Awareness indicates that these particular entities appear to be in a transitory state at this time. They have not yet reached the next level per-se in their understanding or their vernacular of the evolution of the soul, yet that there is the experience of bliss within the unit, continuing until such time as they attain that full and complete next step, or their ultimate destination.

Did These Entities Override Karmic Law?

FOLLOW-UP QUESTION:

Does their action overrule the cosmic Law of Karma in relation to suicides, which I always understood as the entity who commits suicide must return again, reincarnate again into the earth-plane and evolve up to that point where he had committed the suicide in the prior life and this time, required to overcome the desire to kill himself in order to evolve?

COSMIC AWARENESS:

It is indicated that the law to which you refer is again perceived as the darkness, the shadow, wherein the absence of light. This individual will attract earthly experiences, or experiences perhaps in other dimensions as well which will bring about the learning, the Light necessary to fulfill, envelop the portions of shadow. However these individuals did not commit suicide in that sense.

Suicide, in that sense, is an act of despair, and act of giving up life. The final act, the final rejection of the Light, the final rejection of hope for a future. This particular group of people, their intention was merely to take a step *into* the future, to reach that next level of their life, as they interpreted it.

They have indeed created new levels of learning from this experience. They have established and set for themselves a stage for another level of learning, but it is not necessarily the same karmic reaction to which you refer, from entities choosing suicide as an escape from life, rather than a reverence of life.

It is indicated that there is more fluidity in the interpretation of what is conceived as karma; in this instance, belief systems, which are revered to the point of giving up of life. They are now in a position to see with more clarity the nature of that belief system. This Awareness encourages questioning and exploration rather than believing in such a total complete manner. This is the learning that they have accomplished.

This is the situation they have set up for themselves, from which the next level of learning will take place. In this sense, karma is interpreted as the actions which take place in the absence of understanding, which create and attract the events, the life situation which will bring about the very learning that was absent. This is the cycle. It has been interpreted in many ways and attached to many belief systems and codes and castes, regarding the concept of karma.

How Can we More Feel and Experience Divine Love in Our Lives?

QUESTION:

A question from Keith K., Indianapolis, IN. He writes: "Will the Awareness please comment about love? Specifically: the love of God. Perhaps explain how we can feel the Divine Love more and experience it in our lives more."

COSMIC AWARENESS:

This Awareness indicates the earthly human experience of the emotion of love in its many forms is indeed the experience of Universal Love at varying levels, varying intensities and various dimensions of spirituality. The emotion 'love' is that intense experience of the emotion 'joy,' which is spiritual connectedness with the Divine Essence. It is the human interaction device between the physical and the spiritual and the mental, as the emotional.

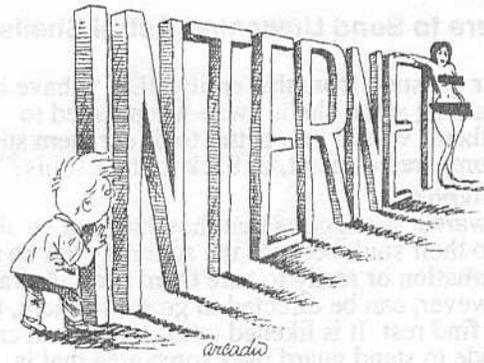

This Awareness indicates that what is commonly referred to as the emotion 'love' is the emotion 'joy' entangled with reproductive drives which are every bit as natural and beautiful as part of the spiritual totality, and yet the emotion 'love' is often colored by the beliefs; the cultural expectations, the cultural knowledge and the many potential creative, yet earthly mental bounded reality of mind, which stands between humans and their spirituality.

It is indicated that this between-ness acts not only as a buffer zone which can interfere with the interaction, but when ideas and attitudes of mind that are in concert with Universal Principles as well as the physical needs and drives; those ideas, those beliefs, those strategies and skills, those cultural contributions of the creativity of humankind, can indeed facilitate and interact between the physical and the spiritual.

It is indicated that this realm of human mind containing the ideas and beliefs that color the emotions with subtle shades that affected by the ideas and attitudes and earthly ideas, can enhance the interaction if they are in keeping with the Universal Principles. If they are not in keeping with Universal Principles, they are those beliefs and cultural ideals which have stood in the way of the true evolution of consciousness. They may have been pertinent in earlier times, but the vestiges now often lie between human beings and their more clear direct inner line of communication to the higher spiritual planes.

This Awareness indicates that when entities ponder the emotion 'love;' when they experience feelings of compassion, connectedness, intense joy and love of another human being; be it a mate, a child, an idea, a pet...they are connecting to the Universal Oneness. They are fulfilling the basic physical need endowed within them to ensure that this connectedness will occur.

When they feel separated from this connectedness they will experience other shades of emotion, feelings that don't feel as welcoming, that are in place to direct them back onto the path of interconnectedness with the Oneness to the clear line of connectedness with spirituality that has been overlooked historically and culturally.

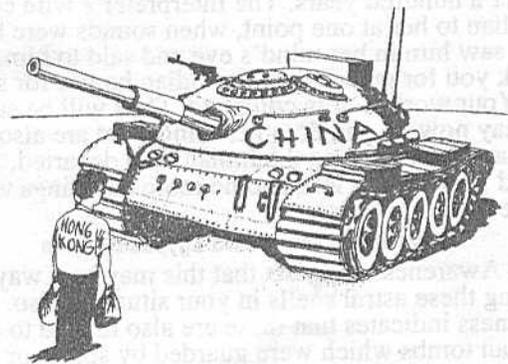

This Awareness suggests that individuals wishing to connect to their higher spirituality to seek out those experiences that fill them with feelings of joy and love and spiritual connectedness; a oneness with nature, a creativity, the utilizing of the hands to create objects, to produce materials, to participate in activity that contributes and connects individuals...all contribute to the opening of the individual to the internal channels that speak through the emotional system.

This Awareness indicates that the entity asking the question, as do most individuals, has resonated to these emotions and felt that connectedness and that spirituality, through the experience of love, and has felt a tremendous reward in this experience.

It is indicated however, to be very aware of the contents of the mental realm, with the expectations, the cultural artifacts which color the experience, that drive entities, encourage entities toward those experiences, which are conceived as 'right' or 'fulfilling,' simply by human dictates, or doctrine, rather than the innate wisdom and the spiritual guidance that exists naturally within human beings, to understand how the mental realm contains the ideas which color the emotions and motivate toward experiences deemed appropriate by cultural doctrine, and to understand how the innate natural system provides emotions which give direct feedback through the feelings of exactly how well, and these strategies are working in unison with universal innate, spiritual and higher priority needs of the individual.

To be true to those feelings which offer joy and connectedness on those highest levels will bring those ideas and strategies and creations into the cultural realm, which will become accepted and workable ideas and enduring doctrine and can replace those ideas which go against the innate needs and higher spiritual longings of human beings. It is indicated that individuals who are true to their feelings, both good and bad, and follow them and identify those ideas of mind which have been learned, to analyze, to update and to reject any doctrine that goes against the innate needs, shall be on the correct and intended spiritual and natural and physical evolutionary path.

Where to Send Unwanted Astral Shells?

QUESTION:

Another question from this entity (JD). "I have been simply sending astral shells away when called to dispatch them. Would I do better to direct them specifically to some tree or plant, or back to their souls?"

COSMIC AWARENESS:

This Awareness suggests that they may not be able to go back to their soul, because the soul may not be ready for reincarnation or ready to take them back. Astral shells however, can be directed to go somewhere, that they may find rest. It is likened unto a part of an entity that is made to stand guard over some area that is significant to the entity.

For example, an entity who held a certain place as sacred, or held a certain place as significant in his or her life, may cause an astral shell to return. Keep in mind the astral shell is a kind of emotional thought-form wherein emotions are attached to that particular area which the astral shell haunts, and the word 'haunts' means resides, or stays; and therefore, it is because of the significance of the area that the astral shell is there.

An Astral Shell Repeats the Death Over and Over

For example, there is the story of the entity who perceived an astral shell that would jump out of a window from the fourth floor, fall on the sidewalk below, come back up the stairs, and again run and jump out of the window, repeating the way by which the astral shell's host body had died.

The astral shell continued to repeat the action over and over, thinking that this was important, and more or less, because the entity had gone through this falling experience, the entity in his afterlife had that stuck in his mind as highly significant. There was an emotional attachment to it, which the astral shell simply acted out repeatedly.

This Awareness indicates it is not that the astral shell needed to continue this action. If someone could have said, "You may go now! You have completed your work! Go and do things that you enjoy elsewhere. You need not continue this action!" then the astral shell would feel free to go elsewhere, and do something different. This is simply a direction for the energy of the entity which got locked up in a certain obsessive thought-form.

Astral Shells on the Interpreter's Farm

This Awareness indicates when the Interpreter lived on a certain farm in Colton, there was an Indian burial ground on the property, and there were noises that began to occur, and entities would see an Indian spirit occasionally, and the entity Sam Millar in a reading, suggested that the Interpreter's wife would be the one who should talk to the spirit and suggest that the spirit need not continue to guard the graves of the other Indians, for their bodies would be safe, and that he could go on to other things now.

This Indian had apparently been guarding these graves for over a hundred years. The Interpreter's wife called the Indian to her at one point, when sounds were being heard, saw him in her mind's eye and said to him, "Thank you for guarding these Indian bodies for so long. Your work is now complete. They will be safe. You may now go and do other things that are also important to you." And the Indian then departed, seemed pleased and left, and no more hauntings were experienced in the area.

Astral Shells That Guard Egyptian Tombs

This Awareness suggests that this may be a way of handling these astral shells in your situation also. This Awareness indicates that these are also related to the Egyptian tombs which were guarded by spirits or astral shells, whereby these Egyptian tombs could easily have

20

been defused from their curses by entities simply talking to the spirit guards or astral shells and telling them that they have no longer a need to remain as guards, but entities did not understand this, and in some cases, there were consequences for even being present at a tomb that had been opened, and many entities suffered consequences from the astral shell guards who felt it their duty to prevent the tombs from being opened.

If it could have been explained that the tomb is being opened to help show the world the glory of this Pharaoh, or of this Pharaoh's wealth, and let the world see the remarkable treasures which this entity had and revere his being, then the astral shell could have felt more comfortable about letting the grave-robbers in. To the astral shell, they were simply grave-robbers, but had he been informed they were working for a museum that would take care of the treasures for the Pharaoh, then his attitude would have been different.

AFRAID OF EARTHQUAKES: WHERE IS A SAFE PLACE TO MOVE?

COSMIC AWARENESS:

This Awareness indicates that the concern about coming earth changes as very little concern to this Awareness, and as creating more stress than is necessary. This Awareness suggests that entities become more concerned about the changes which are occurring in consciousness and in relationship to the powers which are building.

This Awareness suggests that the worry about finding a physically safe place is a reflection of an imbalance within the psyche of entities, and that a greater concern may be placed upon one's psyche, asking: "How can I bring my own life into an integrated state with the forces of the universe?"

This Awareness suggests that security-seeking does not bring about security. That true security comes only through moving into a oneness with the spirit of life, a oneness with the forces of Akasha, a oneness which allows an entity to stand on the "Here and Now," to stand solidly into the moment, to stand upon the Divine Forces of the Universe and to hook one's faith and one's life solidly into that which "is".

ED's Note: Every week we get a couple of questions from paranoid readers of disinformation newsletters such as put out by Gordon Michael Scallion and his ilk who constantly predict catastrophic earth changes are coming down the pike and that all entities with any sense had better pack up and get the hell out of their area. (But first they will need to buy his tapes and videos and books in order to do it right). With the millennium just around the corner, the biblical prophets are also adding their fuel to the fire. Many entities are frightened by this bull and evidently do not understand what Awareness has indicated numerous times, that the future is not fixed; that the mass consciousness in an area is the major cause of earthquakes and that consciousness can be changed and often very quickly. The only real security lies within. I am reprinting the above reading for those who think they are looking for a physically safe place (there is no such thing) and hope we stop getting questions on this subject, because they will not be asked.

—HOW TO GET THIS NEWSLETTER BY MAIL— EVERY 3 WEEKS! (More or Less)

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will all be asked at the Passing Over).
