12/4/01 Grace Interpreter

IS THERE AN INNER PLANE AGENDA CONTROLLING COSMIC AWARENESS INTERPRETERS (PARTICULARLY GRACE)? (Are we a flock of hens being stalked by a wolf?)

QUESTION:

I want to read a letter I just received from Tom Krueger. He is the member who for years has been transferring all the Awareness readings on to computer disks. He has completed all of the DUBY, Worcester, all the miscellaneous Interpreters and all of Paul's readings we have published, plus several hundred Personal Readings. The last batch we sent him were about 55 Personal Readings on tape which were never transcribed. He has become another "Strongbow" in this areas and he informs me he has these finished and to send him some more. He salutes Strongbow, by the way, for his untiring years of effort in transcribing these tapes. He says it is probably the hardest work he has ever done in his life. Anyway, Tom is extremely aware, a well educated individual and *totally* familiar with the Cosmic Awareness information, Interpreters, and techniques and in this letter he brings up some points that need to be addressed. He writes: (This in reference to my comments at the end of the World Trade Center reading in newsletter 2001-11):

"Avaton, I want to say that I think your "rebuttal" to Grace's statements on the "911" issue is most appropriate. What you state as the importance of informing entities has always been applicable, especially over the last 30 or 40 years, and there is no credible evidence that this does not continue to be true. It seems as if Grace has unilaterally decided that there is no further need to be vigilant against inroads against our Constitution, nor any further necessity for the entities of this country and the world to be awakened of the machinations of political power blocks which wish their enslavement. This would seem to be the interpretation of what you have printed. She seems to have joined the "marshmallow gang" which Awareness, through Paul, has warned that an ostrich approach to inroads against freedom serves only those who would destroy freedom. However, I believe this extends beyond Grace.

I agree with you that I, too, felt no quarrel with what was stated by her on the 911 subject. In all probability, it is quite accurate, from a viewpoint which is quite elevated from the intent of the question, and this response, as many of her previous responses to questions, seems almost to avoid the question --certainly the intent of it. The questioner then merely becomes frustrated with her response. If I were asked by someone, the state of the weather today, I would feel obligated either not to answer, or to give as direct and descriptive an answer as I could, with the intent to help the questioner in a timely fashion *on his or her level*. Unfortunately Grace --or more particularly, that which comes through her --does not seem able or desirous of responding to the intent.

This brings up a subject on which I have almost written to you on several other occasions. Going back in time through the various Interpreters of Awareness, this including Ralph, David, Paul, Tom Mooney, Dan Spivey, and even Primrose Diakow (through two readings only, that I have seen), there is a great similarity in the wording of the responses to questions. There is also a similar direct approach to answering the questions asked, and imparting a feeling of sincerely desiring to assist the entity questioning. If you were to put transcriptions of readings from each of the six Interpreters before me, I

would have some difficulty discerning who did each of the readings. This is not so with Grace for, as you know, her readings are markedly different from the others, in all respects.

In attempting to understand this dichotomy, I remember Paul talking about the necessity of having an intermediary entity on the inner plane "translate," or step-down the energies for interpretation by him, because the energies from Awareness were too intense to communicate directly to a human entity. What this suggests is that for the six earlier Interpreters, the same entity on the inner plane had responded to the trance-questions with its own characteristic translation of energies. The mental "data bank" of the early individual Interpreters does not seem to be a major aspect modifying this process, except for certain technical data of which an Interpreter might have had no knowledge, for as I said, the general tenor of the responses is quite similar.

This implies that Grace somehow contacts a different entity on the inner plane. It would explain the extreme differences between her responses and the responses of the earlier Interpreters. This must bring into question whether this intermediate entity is contacting Awareness with the same intent as the previous intermediary. I would suggest that it is not. Why it is not, probably never can be known, although that would suggest that it has its own agenda which it desires to promulgate through Grace. Why it will not continue the communication similarly to the previous intermediary entity also probably never can be known. I picture Cosmic Awareness in this as what might be termed an oracle (without anthropomorphic connotations), that of which anything can be asked and a response given to what is asked, but I suspect that access to this "oracle" ties within a less than universally inclusive sphere of communication: that which is dependent upon select intermediate entities and their "agenda," if you will.

There has been a tendency to blame Grace for what has disrupted the continuity of being able to ask questions of Awareness and receive answers-in-kind, but that, I think, is perhaps unfair to her. What we have is someone, Grace, who is not contacting the same intermediary as previously contacted. I would think that she faithfully interprets what she is given, and from that standpoint, is not personally responsible for what comes through her. I feel she is sincere in what she is doing, but that the explanation lies elsewhere, however enthusiastic she may personally be about the material which comes through her in trance.

It would certainly be desirable - perhaps also for the continuance of CAC - to have someone who is capable of contacting the same intermediary as before, and if this is not possible, it seems that there is a kind of inner plane agenda operating here which seeks to purposefully deny that kind of access. We are all too familiar on this plane with agendas which work for or against groups of entities, but are we perhaps experiencing the effects of similar agendas in a higher plane over which we have no control, let alone communication on an explanatory level? As below, so above? Was the substitution of the previous intermediary with the present one communicating through Grace, dictated by this presumable inner plane agenda? And further, perhaps depriving us of the ability to question (as through Paul, etc.) is in reality for our greater good, but without a thorough explanation of such a thing, there is a tendency to feel we are being ignored, or at worst, belittled.

In summary, I feel that without timely knowledge about the machinations which surround us, which threaten us, we are as a flock of hens stalked by a wolf. Knowledge is

power, it has been said, and knowledge of what confronts us is the power by which the wolf can be exposed for its intent of deceiving and devouring us. If Grace wishes to ignore the wolf, she is certainly welcome to do so. If we wish to have knowledge of the wolf (which whatever entity that speaks through Grace seems to feel isn't worthy of attention), I would sincerely hope that information which would help in this endeavor could be available from another source, such as provided by the previous Interpreters. In the failure of this hope, there is perhaps something of value to be gleaned from the Internet.

Therefore, Avaton, I applaud your inclusion of such information along with the Newsletters. Grace may call it paranoia, but this kind of statement is also dismissive of the likelihood of intelligent use by those who receive this knowledge. It would seem to be most practical that we not only keep in mind the higher aspects of human consciousness, such as given in the *Lessons*, but also choose to deal with today, for we realize that tomorrow arises from today. And in this, I believe we need contemporary sources of information. Let us listen in order to hear, evaluate in order to understand, and project the *Law of Love*, in order to follow the Truth which we know exists. Tom."

COSMIC AWARENESS:

This Awareness indicates that through intelligent use of the voluminous information offered from this Awareness, this entity has articulated both an elegant question and its answer, but that further clarification and reiteration of the original destiny challenges set forth for the CAC community and the progressive changes that have occurred due to its mission are now in order, and that referencing this question within a spiritual and historical context can provide the missing components and resolve the lingering concerns.

This Awareness suggests that the various Awareness organizations were challenged with the mission of building a spiritual bridge between levels of human consciousness, as great evolutionary changes punctuated the final years before the turn of the millennium. This Awareness indicates that the central task was to offer those on the forefront of the transition knowledge of these greater patterns and directional changes on several levels. The uniqueness of the Awareness community as it emerged historically, was the relative lack of any intervening non-material entities or energy identity essences traditionally channeled as guides by mediums of the old spiritualist traditions, with the destiny path of its interpreters to access the most pure energies without symbolic interpretations passed along by intermediating entities living or "dead". The success of their efforts would yield success in the primary, ultimate task of the Awareness community during the years allocated for its inception and service.

Direct Contact With Awareness is the Natural State for Entities

This Awareness indicates that the primary ultimate task has been to enlighten humanity as to the tremendous creative power that they hold as individuals through perceptual attunement to the highest resonant spiritual energies and becoming empowered, and guided, and from within--as is the natural state of the human experience, to have direct contact, nurturance and protection from the undiluted energies of this Awareness in every moment of the Earthly experience. The primary task has been accomplished through the channeling of the various *Laws* and *Lessons* through the various interpreters to offer the central Truths and tenets of human being in its greater spiritual context. Through these offerings members of the CAC community have been given the tools necessary to begin practicing the business of conscious creation and

manifestation of their highest value potentials by attuning to the inner sources of information, asking inner questions and getting the specific answers concerning the individual reality creation process *without* any intervening and potentially distorting intermediaries. This Awareness suggests that "Truth" cannot be accessed as directly and cleanly in any other way; that right use of will, personal empowerment and divine protection *cannot* be fully embraced in any other way.

The Tasks of the Awareness Community: The Analogy of a Starving Man Provided a Fishing Pole

The primary task can be likened to offering the starving man an understanding of the ocean and its fishes, providing a fishing pole, and teaching him how to use it so that he becomes adept at casting his lines into the pool of universal knowledge whenever and wherever necessary according to individual value potentials and desires, and capable of providing himself with lifelong spiritual nourishment.

This Awareness suggests that the *proximate* task of the Awareness community, although secondary and temporary in comparison to the primary ultimate task, has been to offer informational and evaluative interpretations of the energies from this Awareness through the question and answer format. This secondary task can be likened to showing the novice how to use the fishing pole, but that to recognize how each fisherman's volitional power and personal uniqueness will yield fish exactly tailored to the beliefs and needs of that particular fisherman. This task was intended to fuel the passions of the novice, such that they could not wait to try it out and begin to see what wonders they could attract and manifest into their little boat of life.

This Awareness suggests that the nature of this second type of information is separate and distinct from the first--hence the *intent* for the ongoing and ever-present source of answers to any question will be to come from within as the novice becomes a skilled fisherman. This Awareness suggests that the intention was *never* to allow members of the CAC community to become dependant upon external sources of information and that the question and answer format was intended to be utilized as a community forum wherein fisherman could exchange questions and insights about how to fish, and never to become too dependant upon seeing what others could catch. This Awareness suggests then that the role of Interpreter has *always* been destined to depart the boat once assured that the general knowledge has been imparted.

The Degree of Distortion is Knowable Through Feeling Perceptions

This Awareness suggests however, that the tremendous role of human volition in any such group effort will always affect the manifestation of its mission, for such is the nature of the material experience, the learning of how to use the volitional will power in ways that manifest a material version of their highest destiny value potentials by perceptually resonating to the inner guidance and that distortions are part and parcel of the experience. This Awareness suggests that every human individual destiny path and any group spiritual projects such as the Awareness community will be manifested with some degree of distortion, hence its most pure version remains allusive, given the present consciousness of humanity as a whole, and this is understood by each member of any such group at a higher level than that embraced by individuals. But the degree of distortion is knowable in every moment through the feeling perceptions and correctable in every moment once the fisherman becomes adept.

Why the Interpreter Grace Uses No Intermediaries (And Why the Law of Love Was Losing Its Respect)

This Awareness suggests also that certain constraints

were inherently built into the group destiny of the Cosmic Awareness community given the historical unfoldment of the species consciousness during its time period, its place in history. As the question suggests, there is a clear distinction between the previous interpreters and with Grace in that the "intermediary entities on internal planes that translate or step down the energies for interpretation" are no longer necessary, nor were they *intended* to be utilized as long as they were. These intermediaries, used primarily for the types of questions and answers at issue, were largely tapping energies from probabilities likely given the *mass consciousness* of humanity and largely utilized mythologies and symbols likely to connect with the general mind within that species consciousness, but invited plenty of additional distortion in the translation process with so many added links between the energies of this Awareness and the consciousness of the average CAC member.

This Awareness indicates that the longer this secondary challenge was emphasized, the more the distortion and misinterpretation of the information itself, and in interacting with the limited understandings offered through the primary *Laws* and *Lessons*, there became an overemphasis and overdependence upon informing the masses of the disempowering machinations within the realm of mass consciousness, such that some of the general most basic tenets of such laws as the *Law Of Love* began to lose their due respect. This Awareness suggests that for this reason the intent of the energies of this Awareness as interpreted through Grace honor the statement: "*The Law of Love is that force which denies the existence of evil in the world, that resists not.*" For evil is a concept relevant *only* within the mass consciousness of humanity, and the quality and quantity of power often ascribed to anyone given that belief label is beyond that given according to the natural laws and the Truth of the workings of the universe. This Awareness suggests that any human who invests will energy in the belief that they can fall victim in powerless enslavement to anyone or anything because of the machinations of evil others is inviting the creation of disempowerment simply by abdicating that which is theirs to use as they so choose. This Awareness suggests that the actions that follow from such a belief will be to recede in both mind and body from the life experience, to pull back in defense, to *resist* the forward motion and growth that is innately natural to the human experience.

How Spiritual Signals Can Correct Negative Belief Structures

A mind in the resistance mode will utilize such feelings as worry, anxiety, mistrust, shame, resentment, contempt, rage, and hate to permeate the belief structures, and life strategies of avoidance or violence will result. This Awareness suggests that a mind in the acceptance mode, the *being* state of attunement to the higher Awareness, will utilize the protective signals of fear, sadness, disgust, and anger to *correct* the individual beliefs and the external cultural assumptions and structures within mass consciousness, such that humanity can evolve as the cooperative interdependent family that it is. This Awareness suggests that when these spiritual corrective signals are heeded and the positive emotional growth signals become the predominant themes throughout the mindscape, such feelings as faith, happiness, wonder, awe, compassion, trust, and mirth will drive thoughts and actions necessary for the optimal destiny path to unfold.

This Awareness suggests that the level of resistance or acceptance contained within the creative belief structures is reflected by the complexity of painful feelings, and the pleasurable feelings that one meets in everyday experience provide a simple yet clear guide as to how the fishing is going. For entities are holding the fishing pole

and creating nourishment or hunger depending upon the beliefs they hold and how well they are aligned with the Truth or how many distortions they carry that limit its pure translation.

Why Humanity is Paddling Upstream

This Awareness suggests that entities within the CAC community who feel like powerless hens vulnerable to the evil wolf *deny* that they hold the fishing pole and still ascribe all cause and effect to sources *outside* themselves, denying their creative role in the life process, and denying the goodness and rightness that is the Truth about the river of life and its directional flow. This Awareness suggests that humans are evolving evermore conscious control and volition in the creative process, but they are still nothing to the power of the universe and its directional flow which continues despite the ignorance and misassumptions and distortions of those who fearfully paddle upstream.

At this point in human history many are beginning to recognize *how and why* the entire species has been paddling upstream, since their cultural values and traditions have arisen *without* the understanding of the spiritual guidance within the sense of emotion. Paddling upstream in this context is having the experience that events happen in a random and chaotic manner, because the individual volitional creation of optimal life events has been abdicated to the patterns of mass consciousness, and the lowest common denominator of all human consciousness is allowed to chart the course.

The consciousness of the species as a whole sets the parameters for how much volitional power any given individual can utilize and this fact has been lost within the idea that individuals are separate and in competitive defense of one another instead of connected and joined in a much higher, more purposeful and divinely directed spiritual cooperative. Indeed, the sooner the acceptance of this divine flow and the alignment of consciousness to it, the more volition and broader consciousness will naturally follow. This Awareness suggests that the universe does not allocate any more power than that which can be utilized, for mistakes, painful corrective feelings, defensive reflexes, and narrowed consciousness will keep any individual--and any species--to that level of mindful volitional effectiveness. The sooner the species recognize and accept the natural flow, the easier it will be to find freedom from the seemingly random and chaotic ebb and flow of events generated by the mass consciousness of the species and begin defining and creating their desired and optimal destiny utilizing the right use of will.

The Teacher of Fishermen Has Left the Boat

Likewise, the less dependent they will be upon information about what is going on around them once they start using and developing their own sensory abilities. It is those who still insist that they need or have intermediaries who are the ostriches with heads in the sand, and who fail to see the difference between this fact and the "Pollyanna" denials of the fact that mass consciousness *can* and *does* effect all humans, is a serious problem, if still held within the CAC community. Indeed, whether entities want to accept the fact or not, they no longer enjoy the teacher of fishermen who offers examples; he has left the boat so to speak, and entities have only themselves as a source. But this source is *much* better and advanced and can be trusted and relied upon even moreso than the former.

Divine Plans Were Altered and Paul Shockley Stayed Too Long

This Awareness suggests however, that they have not been abandoned, nor belittled, nor punished in any way. Instead, they have been honored with the faith in their ability to use what they have been taught and to trust that the *Laws* will protect and support them, for this is so.

Since this is so, the intermediaries were only "scheduled" to offer services until roughly the last two decades before the turn of the millennium. The Interpreter Paul Shockley was charged with the primary mission of channeling development material for the community, a torch then to be handed to a subsequent Interpreter who was charged with the mission of assisting in the practical application of that material and emphasizing the shift *away* from intermediaries and predictions. This Awareness has indicated in previous sessions the nature of these destiny missions and commented upon how divine plans were altered by individual and mass choices. The timing for Grace's channel was such that intermediaries would no longer be necessary and the channel was prepared accordingly with the ability to access the higher vibratory patterns without any "stepdowns" required.

This spiritual timing was such that the patterns of mass consciousness would be no longer "hidden" at the time for several reasons. The first was that humanity would have discovered the inner channels sufficiently to bypass them and the second was the safety net foresight that the information networks within humanity would have expanded technologically, such that the kinds of controlling machinations born of controlled information were no longer possible. This Awareness suggests that for this reason, certain sources of "leaked" information were "validated" as accurate through this Awareness and at present the Internet freedom has now institutionalized informal person-to-person communication and will lead to the eclipse of censorship that formerly allowed the option of mass manipulation.

For Those Who Still Want to Know "What's Going On?"

This Awareness suggests that individuals who still want to know what's going on in terms of mass consciousness have access through the combination of books, journals, a popular press which is far less controlled than ever before, and the Internet. There is no longer any need for intermediaries nor predictions about events, nor even divine religious guidance, for the signs are all there. They need only learn how to utilize their own perceptual mechanisms properly to extract the meaning. It is the intent of this Awareness to avoid breeding further dependency and this is a far grander gift toward assisting entities than that born of any supplication.

This Awareness suggests, however, that the key challenge is choosing what information to absorb from among the nearly limitless options, and in the interpretation of that which they choose to take in. For these choices will flow from the *beliefs* that they hold and will be largely driven by either resistance and its feeling signals of anxiety, mistrust, worry, shame, contempt, and hate preceding actual events; or by *acceptance* and its feelings of faith, trust, compassion, gratitude, devotion, integrity, and honor before during and after all events which occur. This latter being state includes full acceptance of and honoring of the momentary signals of fear, anger, disgust, and sadness that are messages from within following events wherein the actions of others and or the conditions of the cultural world have violated any rightful freedom of thought or action.

The Events of September 11, 2001 Offers Two Choices

This Awareness suggests that entities will exhibit one of these two life approaches and will self-select into those that will help usher the solutions to the problems within mass consciousness or will continue to exacerbate them through resistance and competitive defense. The events of September 11th 2001 offer an excellent example of both types of life approaches, those that reflect the outdated survival level of consciousness and life experience and the new being state of multi-sensory consciousness and

hands-on creative manifestation of ones optimal potentials and destiny path. Entities who choose to alter their course away from actualizing dreams and value potentials, who recede away from the human interactive workplaces and communities, who pull back from the necessary actions and efforts that keep any community economically strong, will have succumbed to the anxieties, worries, and mistrusts born of limited beliefs. They will sit back like hens to the slaughter and watch their rightful liberties, opportunities, and communities disappear as the lowest common denominators declare the norms of human interaction, replacing public trust with public fear and the frail bonds of emerging global cooperation with competition between ideals and interests.

Religious Leaders Add to the Disempowerment Entities Feel

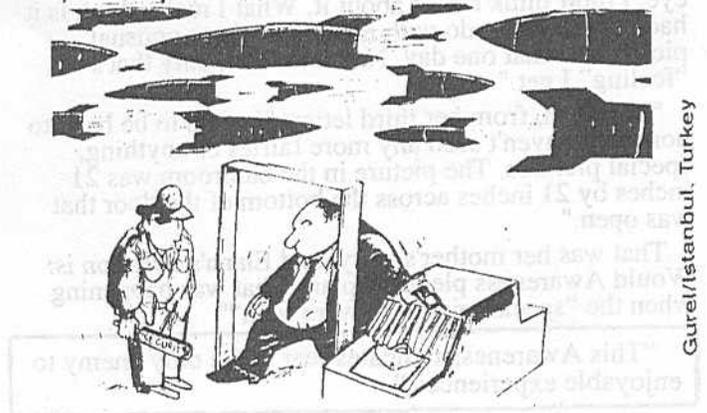

This Awareness indicates that entities know full well which rights and freedoms they are unwilling to give up, and at this moment anger over violations will defend them exactly as necessary when in the *being* state of consciousness. They are hardly ignorant and powerless hens or sitting ducks vulnerable to enslavement. No human in history has sat tacitly back or subordinated their own rights without *willfully* choosing to do so--in fear that their righteous anger was "wrong". This Awareness suggests that much disempowerment continues as would-be fisherman share their lifeboats with religious leaders who do not advocate an inner source of awareness or self-sufficiency and that misassumptions and distortions of religious intermediaries permeate the mass consciousness and all social conventions in subtle yet highly influential ways. Many humans have chosen to be victims and hens simply because it is easier than mustering the honor and integrity to stand up for the rights of all humans.

This Awareness suggests that any anger over losses of freedoms and liberties should be expressed not only in Internet communications but in *all* words and actions in *all* everyday arenas, in workplaces, in courtrooms, in churches, and around kitchen tables and that *all* human encounters should promote the trust and kindness that is human nature; for true freedom and power will *only* come through connections within and between all members of the Earth family.

CAC Members Already Have All the Info They Need to Respond

This Awareness suggests that entities within the CAC community have all the information they need to respond to current events and to actively participate in the creation of more optimal events for themselves and for the entire species as well as of the planet itself. But as this eloquent entity suggests, they need to listen in order to hear—but to *listen to the inner guidance*; to evaluate in order to understand—but to allow the universal emotional evaluations as projections of the *Law Of Love* to take their rightful place as inner guides; and to speak the Truths of spirit "which we know exist".

Emphasis is by the editor.

ONE DAY SHE SUDDENLY SEES FAIRIES AND STRANGE PICTURES IN HER HOUSE

QUESTION:

A question from Elana Massey. It's a rather long letter. I'll read her statement. "In November, 1993, my mother had her second laser eye operation for cataract removal. With her permission I am sharing what she experienced after returning home, taken from letters she wrote to me.

"She writes: "Here I am back home (Washington, Kansas) after my eye operation. Now for some unusual news: strange, weird, far out, whatever you want to call it. When they put the patch on my eye, they covered it with a little metal disc like I had before. They are doing that now with all patients.

"Well, I felt fine, and I sat in my chair when I was alone and on the wall by the furnace I saw a big poster-like picture with people in color all bunched together like at a football or basketball game, waving their hands. There was so much movement, it was like watching TV, but I couldn't pick any one person out to study what in heck they were doing.

"I shifted my gaze to the open space and to my bedroom, and the picture moved over there, clear and bright and had a wall behind the picture. It was big. I couldn't see my bedroom. Then there seemed to be water, seas, something. Rocks, turtles were washing in to my bedroom on the floor.

"I watched as it came to me; as far as Apricot's (my cat) toy-box. This would be approximately 3 to 4 feet from the bedroom to the toy-box. I looked down. I could not make out what it really was, so I blinked my eye and it was gone. I wasn't upset. Then I could see patterns on the wall-paper—lace, leaves with no trees or stems.

"I looked at the TV, which was off, and there were these leaves again. The best part came in the bathroom. I was sitting on the stool and the door was open, and I got a most surprising picture, just like a good snapshot. There were about eight little fairies, pixies, sitting four in front, four in back, in red. It made me think of Christmas, smiling. I was so surprised, I was taken aback, I think you call it, and then they were gone.

"I wasn't seeing this with my earth eyes, but my third eye, and it all surprised the heck out of me. Please excuse my messy writing, my eyes have to get used to each other and work together." (Her writing wasn't messy at all).

(From her second letter): "I'm wearing my pinhole glasses at night when I watch TV with the light on. I can see real good with them, then, and they rest and help my eyes, as Awareness said they would.

"I have a bruise on the cornea of my left eye, near the hairline and near my eyebrow. It doesn't hurt, but it's sore and a little swollen. It didn't happen with my right eye. I didn't think to ask about it. What I really think is it had something to do with my seeing these unusual pictures on that one day, November 11, only that's a "feeling" I get."

"And then, from her third letter: "I seem to be back to normal. I haven't seen any more fairies or anything, special pictures. The picture in the bathroom was 21 inches by 21 inches across the bottom of the door that was open."

That was her mother's story, and Elana's question is: Would Awareness please explain what was happening when the "special pictures" were seen?"

"This Awareness indicates fear is the only enemy to enjoyable experiences."

COSMIC AWARENESS:

This Awareness indicates that there are many different causes whereby entities see into other realms or dimensions, or see into other places, apart from where they are at a particular moment. This Awareness indicates that this is likened unto shifting channels, or having a frequency or vibration imposed upon one's mind.

The entity had undergone a traumatic experience in having the operation, and it affected the vision and the entity's mind, working with that energy of the operation, apparently slipped into second sight or other vision or other dimensional viewing and allowed the entity to see things that would not be seen by others present.

This Awareness indicates that some entities refer to these visions as hallucinations but the word 'hallucination' implies fantasies or the non-real, without acknowledging that there may be some basis in reality such as viewing into another dimension or seeing something afar.

Some Call It a "Vision" and a Spiritual Experience

This Awareness indicates that some entities call these 'visions' and they, if involved in some Christian activity, would say that the Lord gave them a vision of this or that, and they would describe this as a spiritual experience. This Awareness indicates that it is something that happens occasionally, but very rarely to entities who are not on some kind of drug or deprived of food.

Entities who go on long fasts often find this kind of experience wherein they see things that others do not see, or hear voices that others do not hear. This Awareness indicates it is what psychics might term clairvoyance. Others might call it hallucination. It is not extremely unusual, and it is not something that others will commonly experience. It is something that happens to some people, sometimes only once in a lifetime, sometimes more frequently.

This Awareness indicates it is likened unto radios or television networks whereby a channel is playing, and entities stuck in that channel know the story-line, know where everything is going, but suddenly a picture comes in that is not part of the story-line, is not part of the reality of that channel or dimension or frequency, and it becomes unexplainable.

It is simply a signal being beamed into a particular frequency that does not normally carry that signal. This Awareness indicates because of the special tampering with the entity's visual frequency, the signal from other levels came in and allowed for her to experience a clairvoyance-type of interference with her normally realistic view of the world.

'Realistic' perhaps is not the right word, but her normal five senses and their view or perception of the world.

Seeing Elves and Fairies When Stoned

FOLLOW-UP QUESTION:

Back in 1967, in San Francisco, during the Summer of Love celebration there, David Worcester turned me on for the first time to Cannabis Sativa, and me and David Millette at the same time, were laying on our sleeping bags and listening to *Sergeant Pepper's Lonely Heart's Club Band*, which had just come out, and suddenly (he claimed he saw the same thing later) we saw little fairies and elves like this lady described in the question.

We saw whole lines of them, endless lines of them coming over a little hill in colorful costumes and they each had instruments and they were playing these instruments and beating drums and this went on all night. It was so funny we laid there laughing and laughing, and I told David about it, and he wasn't sure

what we were tapping into but he thought it was a pretty low elemental vibration.

Is there any truth to that?

COSMIC AWARENESS:

This Awareness indicates you were looking into another channel or frequency of vibrations which would be normally called a different dimension. This Awareness indicates that you must understand the analogy of the channels on a television or radio set, wherein one frequency carries a signal that has certain programming on it. The program for that particular frequency remains steady and strong and becomes a reality in its own right.

This Awareness indicates that parallel to this, in another dimension or frequency, another plane, another vibration may be a totally different story, a totally different movie or totally different broadcast that exists simultaneously and can enter into the same space of a listener. If you have two radios, one carrying one channel and the other carrying the other, or likewise, two television sets, one set on channel 6, the other on channel 8, for example, you will have two story-lines coming in to the same time and space.

This Awareness indicates if one of these is turned off, you will only have the one story-line. If you think of this as a metaphor for your so-called reality, and that one of these channeling frequencies creates the reality that is your life story, the one that you are in, and the one that all of your peers are part of, you can accept that as a reality.

This Awareness indicates that if, for some reason, another frequency crosses your frequency and both appear in the same time and space so that the two programs cross each other, the program of the elves and little people coming over the hill, singing and dancing crosses into your reality or your program, your frequency; then it becomes a wonderment, a strange event.

This Awareness indicates that if you had shifted dimensions at that time and gone in to the realms of the little people and stayed there and not come back, you would have simply moved into a different dimension. Entities would have assumed you either died, that you left the carcass or that you ascended into some other dimension, for you disappeared from this reality.

This Awareness indicates that to do so, you would have to change your frequency or vibration to match totally the frequency and vibration of that other channel, dimension or vibration. This Awareness indicates it is a simple concept, with a simply explanation, but because it is not easily understood from a five-sense perception, people often find it unbelievable or uncanny as an experience.

This Awareness reminds you that your five senses generally dictate the way you perceive reality, yet your five senses are very narrow in terms of how they perceive reality, and no two people perceive the same reality, because their senses are different and also because their experiences and perceptions of the reality they experience are different.

One entity grows up perceiving his or her world through his or her five senses in a certain manner. Another entity grows up in another place and perceives the world with his or her five senses, but because the experiences are so different, they don't perceive the world in the same way.

This Awareness indicates that most humans have a common perception whereby they perceive a great deal of reality harmoniously with each other, so that they share a common perception with each other. Though their ultimate perception may vary considerably from

one person to another, the common perception of reality is shared because of the five senses.

They see certain things, and touch them, and say: "This is cement. This is hard. This is like rock." They see something else, touch it and say: "This is soft. This is very gentle, and soft. It is a flower." They see something else and touch it and see it as something that crumbles and they can agree on these things without any problem.

Another entity may see certain colors, describe it to another person as: "This is magenta. This is pink. This is orange," and the second person listens and learns what those colors are, and even if one were to see different colors, they would learn the same names for those colors so that every time those particular colors came up they would use the same name as the other person and they would think they are seeing the same color because they have been named in the same way.

In other words, a person could look at something yellow, another person could look at the same thing and see it as magenta, but if the entity says, "This is blue," and the second person learns that magenta is called blue and does not know that it is called magenta, and the first person does not know that he is pointing at yellow, he thinks he is pointing at blue; both of them will learn that what they are seeing, one as yellow, the other as magenta, is called blue, and they will always call that particular frequency or vibration by that particular name of "blue" even though it might be magenta, if seen by an all-seeing eye, or it might be yellow or some other color.

Any way you look at it, what the entities learn in terms of names are what the entities refer to the color by in their future communications. This Awareness indicates that in other words, the senses create certain responses in the brain and the language patterns create the way by which those responses are described. Even though there may be a discrepancy in how the things are perceived, the language may not show that there is a discrepancy at all.

This Awareness indicates that likewise, the taste one entity experiences may seem to be very likable, and the other may taste the same thing and say it tastes yucky. The difference may be actual, may be real, but entities may not understand there is a difference in how it is being perceived by the taste buds and would more likely presume that one entity simply just doesn't like that particular taste of say, strawberries or cherries, whereas the other entity does like that particular taste, and both will assume it is the same taste that people then are experiencing.

This Awareness indicates that with this difference in perception that entities have in regard to their world, they find some commonalities and some disagreements in what their perception relates to them about the world they live in. This Awareness indicates that in regard to the perception of the world in which they live, as humans there is much that is common to them in their way of perceiving, much more common than is found in a relationship between, for example, say, the view of the world by a cat, of a dog.

How a Cat and a Dog Perceive the World

If you compare the view of the world a cat experiences or perceives to that of a human, the cat's perception sees a great deal of magenta and hues of violet, purple and blue frequencies, far more than what humans perceive. The world of a cat is essentially seen through rose-colored glasses or seen as a magenta world in general, whereas the role of a human in viewing the

world sees more of a green world. There is more green or browns with some blue and dark colors.

The cat sees more magentas and violets and this type of coloring, whereas the dog's world is strictly black and white, like the old movies of the 1940s and Thirties. This Awareness indicates that the perception is of the same reality, but the reality from what is perceived would be different.

This Awareness indicates that therefore, in understanding this, you may also understand how your perception of your reality can be quite different from the perception of an entity who is used to another frequency. This Awareness indicates that when you perceive your reality, you are seeing it through a very narrow band and you do not see the full spectrum.

The cat sees far more colors than you see. The dog sees no colors at all, but the dog hears sounds that you cannot hear. In the dog's world, the sounds are a multiplicity of many, many different levels of frequencies and vibrations and you do not hear these. Your band of hearing is very narrow in comparison to that of a dog. Your band of seeing is very narrow in comparison to that of a cat.

This Awareness indicates that your view of reality in other words is very narrow. You do not see reality at all. You only see a small sliver of reality. Therefore, when someone has greater insight or visual ability and sees into another dimension, they may see more of reality for a brief moment than is normal, and the entity who sees the stream and the leaves in her living room or sees the ocean beach in her bedroom may be seeing something in another dimensional frequency that is an extension of the narrow band of reality that she is used to seeing and which other entities perceive as the limited and ultimate reality.

This Awareness indicates that in other words, where entities might say this person in seeing these hallucinations is obviously temporarily insane, a more knowledgeable or wisdom-conscious entity would say this entity has glimpsed something beyond the narrow band of reality that most humans experience. She has greater vision than do others.

This Awareness indicates that your view of the little elf people running over a hill, singing and dancing simply added to the narrow band of your normal reality; a glimpse of the next door neighbor frequency so that you saw into another channel or vibration, another band of information transfer. This Awareness indicates the old radios often had signals that crossed wherein an entity would be giving the news and suddenly there would be laughter and sound and music and the news would fade away and the laughter, sound and music would become louder and take over the frequency band, and then it too would begin to fade and the news would begin to come back.

This is an action whereby the frequencies of the channels would cross over each other and then come back and this crossing would interfere with those bands of reality that you had attuned to. You would be experiencing a block of one frequency by another. The same can happen in terms of your world, whereby things can impose themselves on your reality and then fade out and go back to their proper place.

How Allen Technology Creates Supernatural Events

This Awareness indicates part of alien technology allows for them to do things that help create these bands of energy from one dimension to another, cross into a different frequency so that they can show dimensions

shifting from an invisible realm into your realm to make it visible.

This kind of electronic manipulation of the vibratory rates has been used in some instances of the past to influence what appear to be holy or supernatural experiences in which entities en masse or in common, see things that are unusual such as a face in the sky or an angelic being appearing overhead, or whatever.

These are likened unto projections of entities from one dimension being projected into the other using ionized air as a form of screen on which to project images from one dimension onto the ionized air-screen of another. This can make for the appearance of some supernatural event.

This Awareness indicates this can also happen on individual levels when the mind of the individual shifts into a different frequency or vibratory rate as occurred in your case in San Francisco.

Can We Tap Into This Vibration Without Drugs?

FOLLOW-UP QUESTION:

It was a very interesting and enjoyable experience but it never happened again. I was wondering if there is some way entities can tap in to that sort of thing without the use of psychedelics or anything like that?

COSMIC AWARENESS:

This Awareness indicates it can be done. It is simply a matter of altering one's focus in terms of vibrations. It is not something that this Awareness can simply explain and have it done. It is likened unto saying: How can one become a basketball player like Michael Jordan? and then expecting Awareness to describe how to do it.

This Awareness indicates that it is something that entities *can* do. It is not something that can be outlined as a formula or method for doing so. This Awareness indicates it is a matter of being able to focus, concentrate and know where to turn your attention, in order to reach a different vibration. You turn your attention according to that attunement of the frequency you seek to contact.

Other than that, there is no way this Awareness can help entities in this action. It is something they simply have to want to do, and focus on, and discipline the mind until it becomes a reality for them. This Awareness indicates that there are many entities who do this kind of thing and when they have accomplished it, they are certified as insane.

GHOSTS AND SPIRITS RAISE HAVOC IN COMIC BOOK STORE

QUESTION:

A question from Phil Ingrasciotta, Ridgewood, New York. He writes: "I have a question for Cosmic Awareness. My friend Greg, who manages a Baseball Card and Comic Book store for his family in my neighborhood has been having a lot of weird phenomena happening in his house's basement and lately in his store.

"Strange things have been happening in his basement since they bought the house. Last year he told me that his basement was haunted and if I didn't believe him, I could go see for myself. In November of 1993, Greg, myself and Greg's friend went down to his home's basement to see if anything strange was going to happen.

"It seems that when the family purchased the house in Ridgewood about 11 years ago, the real estate agent failed to mention the house was once owned by a witch who performed black magic in the basement. The basement has been haunted ever since. After one-half hour in the basement we heard a huge loud noise in the

boiler room which sent the three of us running up the basement stairs.

"Ever since the three of us went down there, things have been getting so bad that eventually Greg and his brother decided to call the local Roman Catholic Church to find out about getting an exorcist. The phenomenon consisted of 666 on calculators, demon phone calls, a car ride from hell in which the entities tried to control the car, things falling off walls, card boxes and comic boxes falling to the floor, threats on the phone, lights going out in the phone store and so forth...

COSMIC AWARENESS:

This Awareness suggests this is highly reminiscent of the movie *Ghost Busters* in the entity's description to the mayor of the town of what is likely to occur. Continue.

QUESTION CONTINUES:

"After some side-stepping, the priest admitted that for a large donation to the church and the payment of the exorcist's hotel and plane fare, an exorcist could be had, for \$4,500. Father Benedict of Boston, who is in his late Seventies, flew down from Boston and performed the exorcism in a half hour.

"He got cursed at and was thrown against the basement wall by the demons. He also blessed the comic book store and then left for Boston. A cousin of Greg's who lives in the same house was acting strange, like he was being possessed by the demons in the basement. After the exorcism he returned to normal.

"Everything was okay for two weeks after the exorcism. It seems the exorcism was only successful for two weeks. But two weekends ago, the demons announced on Greg's store phone that they were back. This past Sunday more phenomena took place. A heavy box of comics flew off the table and landed on the floor and other things happened, too numerous to mention.

"Greg's worker, a 12-year-old kid, was acting strange for days, like the demons were trying to possess him. After the kid attacked Greg and tried to choke him, Greg and I tried to perform an impromptu exorcism with a half-cup of Holy Water that he had left. We couldn't get any of the local priests to come over to the store.

"Our exorcism seems to have been successful and the kid is back to normal. I told Greg if this phenomenon continues, I might have to stay away from the store for a while. My question is: Why is this allowed to happen, and what can be done to stop these entities of the lowest astral plane?"

COSMIC AWARENESS:

This Awareness indicates that it is true that the entity who lived there before invited in these spirits. These are simply disincarnated spirits and the projection of negativity on them helped to draw more negative energies to them, and the reaction to them as reactions of fear and giving them the acknowledgment of having considerable power, feeds their energy fields, whereas if entities had no fear of them, and took them simply as invisible spirits which they were, and wrapped them in White Light and suggested that they now go on to their other destinies, these energies would have dissipated more quickly and would have left much sooner.

Fearing Spirits Give Them More Energy

By giving them so much significance, by making such an excitement of the situation, entities have added energy to these spirits and given them considerable amount of unbridled power. The more you fear them, the more you make of them, the more energy you give them, the more attention you give them, the more energy they have.

"...the very purpose of a warning is to rally assistance to change that which is threatening."

This Awareness indicates that this does not mean you should ignore them. Once you realize they are there, you have to acknowledge their presence, but you can acknowledge it in such a way as to not acknowledge any power that they may hold and simply direct them to go on to their further destiny. Indicate to them that they have other things to do and therefore, they should go to their further destiny. This place is no longer healthy for them.

Statements that suggest you are helping them to find a new place to go in the sense of directing them to a new purpose for their lives can be more effective than reacting to their presence in a way that would reflect the excitement of a *Ghost Busters* movie.

Question the Spirit Without Fear

This Awareness indicates that most situations in which there are disruptive energies can be handled best by keeping the excitement level down to an absolute minimum. If a box of comics flies off the shelf, rather than everyone becoming excited about it, the best thing is simply to repair whatever damage may have been done quietly and calmly, and then, if you wish to acknowledge the presence of the spirit involved, ask: "Why did you do that? What is it you need? Don't you realize it is time for you to go do something more beneficial for yourself and others and stop playing such silly games?"

This Awareness indicates that by talking to these entities in this way you do not give them further energy for mischievous action. You simply inform them that they are not doing anything worthwhile and they have more important things they could be doing. This Awareness indicates that you need not have fear of them, you need not classify them as evil. It is best simply to classify them as playing games and being mischievous and inform them that there is something more important for them, and even though you may not know what it is, they can find out what they are supposed to be doing, if they simply stop and take a new look at their lives.

This Awareness indicates that you may also remind them that they were called there by this entity, allegedly a witch, and that she is now gone and has no further use for them, and has no further control over them and they are now free to go on with their further future destiny. This Awareness indicates the most important thing is not to become excited, for they feed on the energy of the excitement.

The Movie "Ghost Busters" is Recommended

This Awareness indicates that entities really should consider the stories and methods described in the *Ghost Buster* movies for they are symbolic of the way things are in regard to spirits. In the *Ghost Buster* movie, the more excited the entities got, the more the ectoplasm would jump and dance, and this Awareness suggests that it is very much this way. The more excited you get in regard to disincarnated spirits, the more energy they get with which to create more excitement for you.

If you simply remain calm, without becoming excited and talk to them as though you were in charge and suggest to them what is best for them, preferably sending them elsewhere to fulfill their mission, they do not generally have a mind of their own and will obey whatever you suggest. They are essentially cast-off astral shells and have a mentality not far above that of a five or six year old child, but if they are given great amounts of energy from the excitement level that they create, or if you project upon them concepts of great power, then they will use this in the same way the five or six year old child would use it against his or her parents, or against a baby-sitter.

If you do not understand what this Awareness is speaking of, *It* suggests you baby-sit a five or six year old child for a while and give them the same kind of power. Attribute to them great power and play the game for a few minutes with them, and you will see how quickly they learn to use their great power to get you to do what they want.

Wrapping The Spirits in White Light is Better Than Exorcism

This Awareness essentially is saying you don't have to worry about these entities. You simply have to direct them and keep calm yourself. This Awareness suggests that you may also do your own exorcism, perhaps even better than that of the priest, by visually wrapping them in White Light. You may even send them off, if they do not wish to go on their own, by visualizing them being wrapped in White Light, wherein the White Light tightens them down and squeezes them into a small ball and sends them off into space to go elsewhere, to find a new place where they do not bother others, and where they have the complete freedom to express themselves.

This can all be done on a visual level and can be very powerful and effective. You need not and should not hold any malice toward them. Simply send them somewhere else, where they can play together with others of their own kind, or visualize their movement toward a more wholesome place where they can grow and love, where there is light, where there is beauty, and they can turn into angelic creatures.

Awareness Explains How These Things Occur

This kind of visualization will send them off elsewhere. This Awareness indicates that you may wonder, "How can this thing be so simple?" This Awareness wishes to explain something that will explain all of this. The universe and the real world as you see it is created by thought patterns and energy and information. The energies are in the forms of vibrations and they take shape because of the thought patterns, the intent involved in the thought patterns, whereby the thought patterns create the shapes for the energies to fill.

How Thought Patterns Create a Human Child

Thus, the thought patterns are filled with certain energies and the energies carry information, and the information is such that it forms all of the various mechanisms by which the thought patterns are filled, to do certain things.

Thus, the sperm and the egg, for example, come together with certain thought patterns imbued within and create certain form patterns from those thought patterns and begin to grow from energy that comes in and information that comes with the energy, so that gradually a child's form begins to evolve from the thought-form, and gradually the child's form begins to grow and grow until it becomes a fetus and becomes a body and is born and becomes an entity who is growing in size until it is adult.

This entity did not simply come about by accident without any form of guidance. It came from the energies and the thought-forms that accompanied those energies. The atoms that make up the entity may have once been atoms in a rock, or in a plant, or in water, or in some gaseous substance, but now they are part of the entity's body.

This Awareness indicates that the form, the matrix in which the energies have congealed to make this human form, is made up of enormous numbers of patterns which in turn have made up molecules, which in turn have made up various cellular structures and which in turn have made up certain organs and tissues.

This Awareness indicates that yet, all of these things in that human body essentially are made up of tiny atoms and the atoms are simply vibrations and the atoms only become atoms for certain particular types and purposes to make up a particular cell or organ because there is intelligence directing the movement of these atoms.

A Grand Design is Behind the Making of a Human Being

This Awareness indicates that you might ask the question: Why is it that one atom goes to make a grain of sand, and another atom goes to help make a kidney, or a fingernail? It is the intelligence that is in operation in these thought-forms, in these shells of behavior.

This Awareness indicates that it seems as though there is some grand design or plan behind the making of a human being. It is not simply an accident, or simply a growth from a seed without any form of intelligence being involved. Instead, there is an enormous amount of intelligence operating at every step and the step that leads to the first and early forms of the fetus have a different kind of intelligence than that which follows to grow the arms and fingers and cartilage and so forth for the mature fetus or child that is ready for birth.

This Awareness indicates that the intelligence involved, that continues to grow the child after birth is also different from the earlier intelligence. This Awareness indicates that you have to recognize there is intelligence involved in all of these things and that this intelligence can be directed and influenced by the intelligence of collective consciousness. It can be influenced so that an entity is not simply following nature's prescribed behavioral flow chart, but so that it even supersedes nature at some points and rises above the inclined movements of nature's flow charts to develop differently.

How to Assist Your Child to Obtain High Intelligence

If an entity, for example, a parent, projects on a child high intelligence, wherein you look at your child and visualize the child as having high intelligence and if you do this early enough, you can help to raise the intellect of that child much higher than it would have otherwise been. Likewise, if you stimulate the child with music while it is still in the womb, it will enjoy music of a similar nature after it is born.

This Awareness indicates that the focus of attention on certain energy fields will cause those energy fields to gain energy from that focus, from that attention, and you can likewise focus on departed spirits in a positive way, or in a negative way, to send departed spirits positive energy for their growth and development so that they are seen as being worthy of greater things, and they will go and act upon those energies projected upon them.

This Awareness indicates if you focus upon them as though they were demons or powerful beings, they will respond in kind, based upon the energy they receive from your focus and your intent. This Awareness indicates if you focus energy on a plant, a flower, it will grow according to the energy and information it receives from your focus. Thus, if you focus upon a plant with an intent of killing the plant, you will see after some time that the plant actually begins to wither, to fear you, and to die.

This Awareness indicates, however, if you focus on the plant with love and visualize it growing strong and beautiful, it will respond to that focus. The focus carries the energy to the plant. The intent carries the information that accompanies the energy. Keeping this in mind, you will have a much better understanding of how to respond and relate to the invisible world, for it is in that

invisible world that real power and real existence resides.

The Reality is in the Invisible World Not the World We See

The reality is in the invisible world, not in the world perceived by the senses. This Awareness indicates if you were to become small enough and look at the ingredients or elements that make up an atom, you would find an enormous amount of space, and very little substance involved.

If you were to watch some of these atoms coming together with their vast amounts of space, you would back up and watch them come together as it would appear at some point that there was some substance involved, but this Awareness indicates that the substance is only because there are so many, and in being larger, you see these things as solid, while in reality they are 99.99 thousandths space and one/one thousandths substance, and even that which appears to be substance is really nothing but frequency vibration in a minute position.

Something vibrates over here. It is a proton or an electron, and if you look at those little vibrations, you will see that they are composed of still smaller vibrations and that in reality there is no substance anywhere. There is just vibration, and the greater area of the atom is space, and this makes up the human body, and all things in your realm known as reality, and your senses lie to you and tell you: "This is real!" when in fact the reality is the space and the tiny vibrations that are seen from a distance as occupying some kind of condensed activity, but when you move into those condensations, you find that even those atomic parts are not solid, they are simply vibrating, and when you look at the vibrations up close, you find that they are really composed of smaller vibrations or subatomic parts and they are also mostly space, and there is movement in that space.

This Awareness indicates that when you understand this, you will realize that matter means nothing in reality and all that really counts is the intellect, the perception created by the intellect which assembles the appearances and thought-forms into that which for the senses looks like substance, feels like substance, smells like substance, tastes like substance and looks like substance, but is really just illusion.

How We and Mass Consciousness Create Illusion or Maya

This Awareness indicates that you will discover the reality is the invisible intangible intelligence, and that you, along with others are creating the maya or the illusion of a frequency, channel or program that seems to have some kind of consistency and substance, along with countless other frequencies and channels that are not tuned in to at the moment.

This Awareness indicates you create your play, create your set, act upon that stage that you have created, as though it was a reality. You play out your roles and your lives as though they had some meaning and substance. You write your scripts within your assumed purposes and attempt to stay in character, only exiting and dropping your character upon leaving the stage, when you go to sleep or when you pass through to another realm or dimension.

You Can Rewrite Your Script If You Don't Like Your Present One

This Awareness indicates that you can step out of your world at any time, tune into the reality of the invisible realm, and take a break and then go back into your play, your role-playing, your set and drama of the game of life with greater understanding and greater vigor.

This Awareness suggests that a way to change your particular role in the script of life you have undertaken

to play indicates you do not like your particular role in life, is to step out into that invisible world, recognizing that all is simply vibration. There is no fixed reality, other than as the intelligence that creates the form for the vibration dictates.

As you step out into that reality, the ultimate reality of vibration, and you use your intelligence to create a different role or a different character, a different script for your character, so that when you step back into the play, instead of playing a tragic loser, you rewrite the script with your intelligence affecting the vibrations to be a heroic winner, and you enjoy your script, enjoy your life, enjoy the drama in which you have directed yourself.

Become your own director, but do so not from within the play, where you are already locked into a role of perhaps a different kind, but do so by stepping out of your role into the invisible realm, creating your activity from there, directing yourself from there, speaking to yourself, recognizing your form is nothing but a costume and that the costume and character are taking directions from you.

You are the ultimate director, the magician for the play, and direct yourself to go on stage again into the material world in which the five senses create the illusions for the play with a new direction, purpose and meaning in which you prosper, in which you gain, in which you do that which is necessary, and enjoy the life for yourself and others. Visualize yourself going back into your role as one who helps others and helps themselves, and is no longer a victim of the environment created on that stage.

This Awareness indicates this is not done within your body, but from the movement into the invisible realm, wherein only vibration and intellect reside, and you function as intellect directing the vibration that makes up your form and the form of the world in which you are to insert yourself as a player.

You Will Be a New Being When You Understand This Message

This Awareness suggests when you do this, be sure you do not damage or detract from others who have their roles to play. Be sure your role is written in such a way as to benefit others as well as yourself. This Awareness indicates that when you really understand this message you will be a totally different person. You will be a New Being in the highest sense.

It will take practice. It is not something that can simply be tried for a minute or two after reading this material. It is something that needs to be repeated again and again wherein you come back to this action over and over, leaving your physical body, entering the realm of the invisible wherein there is nothing but frequency and intellect, and from this frequency and intellect, directing the frequency to behave in a certain way that makes the play work for you.

Now It Is Your Duty to Rewrite the Script for Humanity

The play being the material world. Make the play work for you and for others. This Awareness indicates you must understand that someone who is very inept has been writing the script for humanity in this same way and these same entities are incompetent as authors of the script, and it is your duty, because you are now aware, it is your duty to rewrite the script for humanity so that it works, so that the material world works for entities.

This Awareness indicates that when the script is far enough along, it will be your duty to teach entities how to help further this movement and write the script themselves in such a way that benefits everyone.

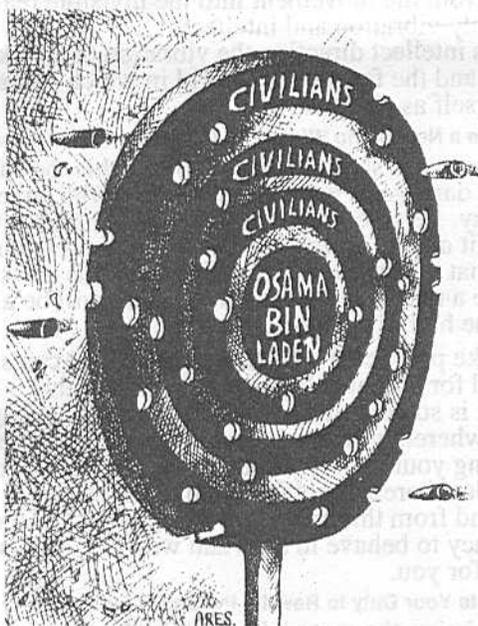

This Awareness suggests the Interpreter be brought from trance.

Thank you (The Law of Gratitude is given)

ED's Note: When Awareness made that comment about things being mostly space, I was reminded of the true story about Albert Einstein who started to wear giant oversize shoes and when asked why he did this, he replied that the shoes kept him from falling between the spaces between molecules. Although he was ridiculed at the time, his quantum theory which included this concept about space, has since been proven valid.

WHAT IS COSMIC AWARENESS?

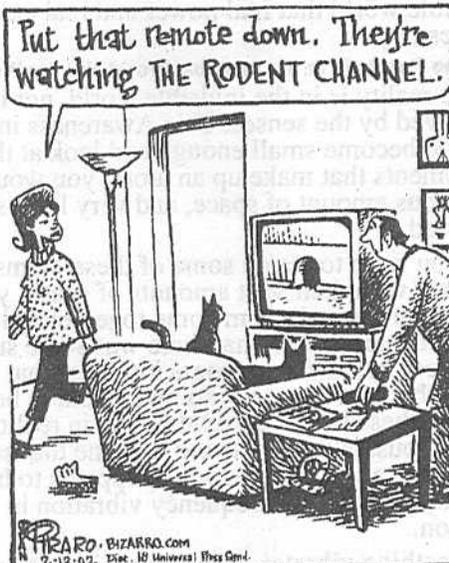

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

Ares/Juventud Rebelde/Havana, Cuba

The Wisdom of Awareness: -- On Truth

Truth is that which is, and wherein an entity believes that he has discovered 'The Truth', or the source for 'The Truth', such an entity generally ceases to question and to explore and to research further in that area. This Awareness wishes entities to question, doubt, research, and to avoid absolute conclusions on anything, but to continue gathering more and more information about everything. (Issue 78-35)

WHAT IS THE BEST POSITION TO DIE?

QUESTION:

A question from JD in Yew York. "What is the best position of the body in which to die, and why? Lying on the back, arms along side seems good. A fetal position has its merits. Zen Buddhists idealize the lotus posture, if a perfectly balanced one can be maintained. Does it even make a difference?" she asks.

COSMIC AWARENESS:

This Awareness indicates that this does not appear to make any considerable difference, except if an entity prefers one position over another as far as comfort and relaxation is concerned. Some entities sleep in a fetal position, others are comfortable in the lotus position. Others would be extremely distressed in such a position.

This Awareness indicates the majority of entities would be most comfortable either lying on their back or on their side. This Awareness indicates that usually entities would seek, if having a choice, having a position that is comfortable to them.

Communicating With The Dead Via Electronics

QUESTION:

A question from Hans Holzherr, in Switzerland. "My question pertains to the complex field of "instrumental trance-communication" i.e., alleged communication with the dead or with other planes of existence 'by means of electronic equipment.

"This field has, over the years, progressed to the point where still or moving images of deceased people, (I guess I should say entities) appear on the screen of an otherwise non-functional black and white TV, paranormal texts appear on computer terminals, and phone calls from other dimensions are recorded, et cetera.

"It appears that some famous scientists like Marie Curie, Albert Einstein and so forth, have teamed up and are trying to break down the interdimensional barrier. The Harsh Fishbach couple in Luxembourg have pioneered in this phenomenon. Of course the equipment has been thoroughly checked by qualified scientists.

"Also, highly confidential data has been related, ruling out fraud on the part of the experimenters. Now, to complicate the matter, there is this most bizarre aspect that sometimes these TV images appear to have been taken from man-made sources, but are presented as views of the other dimensions.

"For instance, an image of a young man, which was received via a computer scanner was presented as the deceased biologist Conrad Lorens, as he is supposed to look now, but a close examination revealed that the image is merely the portrait photo of Lorens in his younger day, taken from a biography, barely retouched and set before another modern-looking background.

"And again, conscious manipulation by the experimenters can be ruled out. Finally, my question: Do these communications really originate in that other plane or is it a feat of a super-technology merely mimicking that event, applied by an unknown earthly or alien agency? And if so, what is the objective, and why are these "imperfections" so obvious?

"If, on the other hand, it is really a communication with the dead,, the follow-up question would be: Why is man-made material being used? Is it impossible to project an image of that other plane into earth-based equipment?"

COSMIC AWARENESS:

This Awareness indicates that there was a time in the Sixties when an entity, the name appears to be Peter

Hurkos, when an entity, (this Awareness indicates that this name may be incorrect; that is the name which comes, but it might be incorrect). This Awareness indicates, however, it appears that this entity was able to look into a camera and project onto the film, an image that he held in his mind.

In so doing, the film, when developed, would reveal the image which the entity held in his mind while concentrating on the camera lens. This Awareness indicates that the present phenomena makes use of a similar technology. That the information does not appear to come from another dimension. Rather, it appears that it makes use of entities and material in this dimension, passing through consciousness of an agent or entity and then onto the material object which gives forth the image or recording.

This Awareness indicates that this in reference to the alleged image which was taken from earlier photographs from earth dimension and plane. This Awareness indicates that likewise, the message that come from beyond the grave must come through an earthly medium or entity who translates these into terms and words that are decipherable and understandable to earthlings.

This Awareness indicates that the need for an earth receiver is that which is crucial to dimensional communication. This Awareness indicates it appears that the entities upon leaving the physical form, moving into other dimensions and realms, cease to use their earthly language or thought processes. They have a totally different form of communicating information from one another to others in that dimension.

This Awareness indicates that it is therefore necessary to have some kind of medium in this earthly dimension that can be used through which to translate information to earthlings.

What is the Purpose?

(FOLLOW-UP QUESTION:

These images that are actually man-made; what is the purpose behind that?

COSMIC AWARENESS:

This Awareness indicates it is not to say that these are man-made in the sense of man having a purpose for making these images, rather, they are used as part of the translation from the inner plane into the human or physical plane. The purpose of the images being to help convey the message through pictures or words that allow the message to be translated for human understanding.

This Awareness indicates *It* does not mean to say there are people conspiring to fool the masses into thinking this comes from another plane of existence. It is more that the plane of existence, in its effort to communicate through humans, to humans, must rely on human technology, on mediums who can interpret from energy fields into human language, the information which is trying to be conveyed.

For example, the picture, or an image of an entity may not necessarily correspond at all to human images, and the energies from that dimension may call upon images of earthly dimension and memories in order to convey the image of the entity which they wish to portray. Thus, by choosing an old picture that is available on earth, conveying that picture through some medium, they give the impression that this is the entity who is speaking through this medium, through this interpreter, and this is what he looks like.

This Awareness indicates, however, being from another dimension, the entity may not look at all like the

picture that is being portrayed through the medium, for earthly consumption.

FOLLOW-UP QUESTION:

Isn't this type of goings on generally from a pretty low astral level of entities?

COSMIC AWARENESS:

This is in the affirmative in most instances. Rarely, there will be entities from higher frequencies that appear to entities in the physical form to give some special meaning, purpose or direction.

(FOLLOW-UP QUESTION):

Is there any substance at all to this part of the question, where the questioner stated: "It appears that some famous scientists, like Marie Curie and Albert Einstein, et cetera, have teamed up and are trying to break down the interdimensional barriers?"

COSMIC AWARENESS:

This Awareness indicates that this appears to be in part speculation by the questioner; however, it appears to have some substance in that from both sides of the barrier there are, and have been for many years, efforts to penetrate beyond the dimension into other levels, whereas such is possible to some greater or lesser degree.

It appears that some of the entities have greater understanding of these barriers between dimensions and have begun to work with new ideas, new approaches in their efforts to break down the barriers.

Vibratory Barriers There for a Reason

FOLLOW-UP QUESTION:

Well, aren't these barriers there for a reason? That people and entities have to understand that they're vibrations, and that breaking them down doesn't seem to have much of a purpose, if it's true, as I've thought, that you have to raise your own spiritual vibration to enter these higher vibratory realms?

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative. That there is that which is likened unto a magnetic spectrum, and each of these frequencies has its own essence, and one cannot be on one frequency and jump into another frequency without considerable chaos. It is likened unto putting one vibratory note on top of another, wherein the two notes are in disharmony. The dissonance creates a chaotic effect.

This Awareness indicates that there is, of course, a potential for finding overtones and harmonious vibrations so that one of a certain vibration, entering into another vibration, of harmonious vibration might find it to be non-chaotic and more harmonious to enter such different vibration.

This Awareness indicates that this may require jumping from one dimension through another to reach a different harmonious vibration just as one might wish to go from a note on a piano, not to the next or neighboring note for harmony, but up two or three keys in order to find an harmonious note to correspond to the one below.

This Awareness indicates, for example, the notes C, E and G being thirds, may be harmonious to one another, but to reach these notes one would need to skip over D, and F (not to mention C sharp and E flat). This Awareness indicates you might consider these as C, E and G dimensions, which require that you bypass D and F dimensions, in order to maintain any harmony.

WHAT'S THE BIG DEAL ABOUT "DEATH?"

QUESTION:

A question from Jon Strongbow, in Seattle. I'll read his statement here: "Regardless about what has been

said or written and even claimed to have been experienced by people who have "returned," death is still a mystery. Having myself gone through certain death experiences, I have found two things of interest. One: You still have to deal with yourself afterwards and face your own inner weaknesses or programmings or blocked energies, because even after an intense death experience, after the "thrill" wears off, so to speak, and all your illusions about yourself are more or less exploded, you still have to face yourself and live with yourself.

"However, another thing I have observed, is that part of us seems to enjoy the face of death because it intensifies our sense of self and makes everything more meaningful. As men who live through battle oftentimes attest, once you survive the experience of war and the possibility of sudden death, what else is there? Not a few veterans discover that their lives, after such intense battle experiences are boring and mundane, and even if they hate to admit it, they miss the exhilarating adrenaline rush provided by the war.

"Many so-called daredevils and stuntmen, bungi-jumpers and sky-divers and so on, seem to enjoy risking their lives for an adrenaline high, or "cheating death." However, if what Awareness says is true, and what all the spiritual traditions seem to point towards as being true, that there is in fact, life after death and spiritual evolution and the immortality of the human soul or spirit, then all of these death games seem like kindergarten silliness and cheap thrills.

"The real challenge then, is to "live our lives creatively and without fear and to try to live a spiritual life of service. On the other hand, so much of the game of life seems to be a hide and seek, dodge the bullet kind of activity which needs a certain amount of adrenaline groove to sustain it." And he asks: "Can Awareness comment?"

COSMIC AWARENESS:

This Awareness indicates the evaluation is well thought out, is well understood. This Awareness indicates that many entities get a kind of addiction to the adrenaline rush, much as another might be addicted to certain drugs. This Awareness indicates that there is also the runner's addiction, wherein an entity runs for a certain length of time in order to get the endorphin release which is akin to a drug experience.

This Awareness indicates that these coming from within as natural results of certain experiences that entities put themselves through, are sometimes sought as being of great value in terms of experiential value to an entity. This Awareness indicates others prefer not to have the extreme rush of biological energies, adrenaline or endorphins, and to play it more safe and cautiously.

These entities generally have long-term goals which they wish to accomplish and get their thrill at moving closer to their goals rather than having an ego or adrenaline or biological rush from some momentary thrill that may be life threatening.

This Awareness indicates a matter of personal choice and with this understanding, entities may also recognize why some other entities would get into the use of drugs for their cheap thrills for as they take a certain drug and get a certain experience, even though they recognize it is hard on their body, or that it could be life threatening, they do not see this as anything so extreme, any more than would be bungi-jumping or any other thrill-seeking type behavior.

This Awareness indicates that *It* would warn entities to be cautious of these events, activities and behaviors that are dangerous to the entity's physical well-being or threats to the entity's life, because there are many things

in life which you may wish to consider further and pursue on a long-range purpose and if you cut your life short or injure yourself to where you are dysfunctional, many of these potential lifetime goals and purposes could be lost.

The opportunities could be lost for you.

IN WAR: SHOOT TO KILL IF IT MOVES

(What Happened to Our Moral and Ethical Standards?)

QUESTION:

Another question from Jon Strongbow. He writes: "A friend of mine was in the Marines that was abused physically by the drill sergeant and was discharged. He claims that Marines are taught, when entering into an enemy zone, to shoot to kill everything that moves, whether it be man, woman or child. This seems to be a far cry from certain ethical and moral standards which this country claims to have, and yet, from my own experience, I know that this is true.

"In war, one doesn't question or try to discern who or what the enemy is. Nine times out of ten, the soldier goes in and tries to annihilate the enemy before they get a chance to do it to him. This "kill or be killed" attitude is very prevalent throughout the world. It keeps us all living in fear and always on the edge of "fight or flight" frenzy. What can be done to change this?

"And if more people were made aware of the deathly military tactics practiced by our country, would this change anything for the better? Or do we as humans really accept the idea that war is simply a human reality and we do anything we can to win?"

COSMIC AWARENESS:

This Awareness indicates unfortunately, this is generally the case, and it does not appear that there is much that can be done to change the policy other than to awaken the masses as to what the policy is. This Awareness indicates that by informing the masses that this policy exists and giving evidence to it, it could cause entities to feel a greater abhorrence towards war in general.

It is not likely that the general public would say: "We want our boys to stop and check before they shoot, to make sure they're not shooting innocent people," for there will be those who argue that while they stop and check, they may be shot.

This Awareness indicates there is a common expression used in war-time, to kill everyone and then sort them out, or let God sort them out later. This Awareness indicates that this has become policy in the military. That attitude was once very radical, used only by entities who had become extremely callous.

This Awareness indicates this kind of policy takes away much of the glamour and glory and heroism of war and lets it be seen as just a mechanized form of mass-killing with no real morality being part of the operation. Most entities would prefer to think of their country's wars as being fought in behalf of the civilians, the good people, and would be shocked to realize that these civilians, these good people, are being killed by their own soldiers.

They would rather think their soldiers are rescuing such people.

WAR: "ORGANIZED INSANITY"

QUESTION:

One other question from Jon Strongbow, along this line. "Gurdjieff used to call war 'organized insanity.' How accurate of an assessment is this? Is war merely the accepted form of working off aggressive male energies? We all know that the people engineering the

wars never, or very rarely ever, participate in the real fighting."

COSMIC AWARENESS:

This Awareness indicates that this is a term that can be applied to war.

The concept of insanity, however, is such that it generally means a lack of rationality, and rationality implies organization of thought. Thus, organized insanity sounds like a contradiction. This Awareness indicates that controlled insanity might be a better term, wherein the ones who control it, who create an insane situation, then control it for their own ends and purposes; this may be more applicable to the concept of war.

Often the ones who are behind the war are very rational, very calculating. They may simply have no compassion for their fellow man, and may simply want to keep the war going for some kind of personal gain. This Awareness indicates of course this kind of behavior also could be called insanity, but normally there are other names that seem more fitting.

The psychosis of being a war-monger for profit is a form of insanity, but it is not the common view of insanity. Most entities would think such an entity was sane because they might be quite calm, quite business-like, and quite rational in their approach to life, but they still may have the psychosis for making war in order to profit from the activity.

ET 101: THE COSMIC INSTRUCTION MANUAL

(It Says Some Aliens are Horses and Karma Is Now Suspended)

QUESTION:

A question from Joyce Terry, Silverdale, WA. There's a number of questions in it, but I'll read her statement. "I have some questions for our Interpreter for Cosmic Awareness, Mission Control, Intergalactic Council Publications, of Pegasus Springs, Colorado, has a little book titled *ET 101*. The Cosmic Instruction Manual which I ordered from them.

"This book is about transmuting from the third to fifth dimensional reality base. They state that "in this new civilization, all beings are recognized by their Divine essence rather than their forms." They claim that our planet has been and is surrounded by their ships to help us in this very near transition.

"The walk-ins, in this book, or other literature of theirs, claim that on the 5th dimension, where they come from, they are in "horse" form. Also, in this manual, it is stated that "since time is almost over, the stellar councils have unanimously voted to repeal the Law of Karma.

"The Law of Karma has been repealed and the Law of Grace enacted to assist you in your manifestation of Divinity. All debts have been forgiven and all court dates canceled. You are free to proceed outside the jurisdiction of karma and in the state of grace."

And she writes: "I was of the understanding that we are going to transmute to the astral, and seeing as in this lifetime around, I feel like I have lived over 50 or so lives in my 65 years; I guess I'd like to see an end to any more miserable karma I have built up again, for myself.

"Only one of my children talks to me, out of five living. They just can't communicate no matter how hard I have tried to get in their graces. Underneath it all though, I realize that everything is as it should be. If we are transmuting into the 5th dimension, I hope I live to die into it, and things are love, joy and harmony there.

"I guess I don't care what body casing we have so long as the learning process isn't as tough as this time

around. Does Cosmic Awareness have any comments on the non-personal aspects of this letter?"

My particular question would be this total repeal of karma, if there's any substance to that?"

COSMIC AWARENESS:

This Awareness does not see this letter as having a great deal of accuracy, in terms of what is occurring. It appears that someone is simply imagining that a council can repeal Universal laws and substitute grace for the Law of Karma. This Awareness indicates it is not something that is available through the 5th dimension, or any similar dimension ruled by entities.

It appears that much of this message is but a kind of fictional and wishful thinking. It is likened unto people getting together and saying, "Wouldn't it be nice if there were no hell?" "Wouldn't it be nice if there were no karma? if there was only grace, and everyone could have grace?"

This Awareness indicates anyone can have grace if they experience sufficient remorse for their own misdeeds, but the grace is not left up to a council of entities. It is a matter of spiritual energies recognizing the violator's remorse for actions that have harmed others. When entities recognize they have harmed others and feel remorse, they are in a position to receive grace and forgiveness.

This Awareness indicates that if karma were wiped out and grace installed without regard for the Law of Karma, one who violated others in a most diabolical way would no longer be subject to karma. They would simply be gracefully forgiven and allowed to continue their same behavior without any kind of checks or balances.

This does not make any sense on a spiritual or physical level. This Awareness indicates remorse for misdeeds is necessary for entities to receive grace, and forgiveness. It has always been that way and it remains that way.

(FOLLOW-UP QUESTION):

Why would these entities put out misinformation like this? Is it strictly a money hustle, or do they believe they actually channeled bunk like this?

COSMIC AWARENESS:

This Awareness indicates that many entities think that words change reality and think that by saying something they can change the rules of Universal Law. This Awareness indicates that in many ways, words can change reality, but when it comes to Universal Law, the only value for words is to describe what is seen as Universal Law, and if entities do not see it clearly, they cannot describe it properly.

Sometimes, entities would like to see Universal Law changed for their own personal benefit, but they may not actually understand what they are tampering with, if they were to change a Universal Law. They may not recognize the full extent or broad scope of the laws which they would change, and therefore, even though they think they might be making important changes, they might instead be creating something that would be intolerable for others.

This Awareness indicates therefore, these Universal Laws cannot be altered by individuals seeking to change these laws.

She is Followed by a White Light in the Sky

QUESTION:

A question from Layne M., Cottage Grove, Oregon. She writes: "One night I was driving on the freeway to a party. I had not been drinking. I saw a white light in the

sky. It kept an elliptical orbit and followed me for twenty minutes. I pulled over and it lowered itself and kept circulating in a field by my car.

"I sat and watched but didn't have the nerve to get out. I called upon the Divine Light to protect and to surround me. I drove on to the party, ten minutes, got out of the car, and there it was, over my head. It was odd. I decided to get a friend to witness it with me. I went into the house to get a friend, but as soon as I entered the house I forgot about the whole incident.

"Will Awareness tell me what that white light was? I wish I was brave enough to try to communicate, but after all of this scary alien stuff I've read, I was afraid to hang around. I regret it now," she says.

COSMIC AWARENESS:

This Awareness indicates it is better that you did not communicate. This appears to have been a small alien probe trying to make contact with you, and had it done so, you might have been selected at some later time for biological experiments. For example, you might find that on a monthly basis you would have eggs taken from you, to help in their genetic experiments, to help in their creation of half-breeds, and it could have been something that would be ongoing throughout most of your life.

This Awareness indicates that you are better off to have broken the contact.

A Mysterious Car Followed Her For Miles

QUESTION:

Here's another weird story from Layne. She writes. "I was driving home from California to Oregon. A strange white car with a bright light, (it kept shining out the window) followed me from Mount Shasta to the Oregon border. One time the car flashed its headlights at me. It stayed close to me a long ways. It seemed protective, but I was also a little scared.

"I got off the freeway for gas, and lost the car. Hours later I thought about the car. I said a little prayer: "If that car was something special, let me see it again!" At that very moment, the car pulled onto the freeway from the side of the road. It had been sitting on the side of the freeway, on the shoulder, with lights out.

"As I drove by, it pulled out onto the freeway and turned its lights on. I have never seen a car like it before. The car fell behind me and I drove on home.

Question: Who was in the car? And was it a guardian angel?"

COSMIC AWARENESS:

This Awareness indicates that it does not appear that this was a guardian angel. It appears that upon your approach toward the car, you being in a kind of psychic state or a state in which your conscious mind was relaxed and inactive, you picked up on its presence, and consciously were reminded of it to the point where you then thought about it and questioned whether it was good for you, and at that time, being in close proximity, having tuned in to its nearby presence, saying your prayer that if it were beneficial toward you, let it appear, the car then seeing you, the occupant turning on his lights, pulled out behind you.

This Awareness indicates the entity was not really a bad person, but was simply looking for love in all the wrong places and at this time, driving down the highway, noticed you and projected in his mind, the idea that you might be the person he was looking for. This Awareness indicates he then followed you in hopes that you would pull over and stop somewhere so that he could also stop and get acquainted.

As you continued to drive, he gradually came to his more normal senses and realized that you were probably not interested. This Awareness indicates that he apparently became curious when you first pulled off the road earlier, and thought that perhaps you were attempting to signal him that you wanted to meet him, giving him an opportunity to pull off.

Since he was quite a ways down the road by the time he realized this, he stopped and was considering going back, but felt unsure of this action. When you came along, then he followed you again and considered that perhaps you would pull off at a rest stop or something and he might make contact with you.

It was simply an entity who was somewhat lonely for female companionship.

They Dreamed of Reptoid Aliens

QUESTION:

One more experience and question from Layne. She writes: "I was spending the night at my friend's house, a couple. We went to bed. I was in an awakened state, I thought, but paralyzed. I heard my friends talking and I wanted to join them in my room, but I was physically paralyzed.

"The next day my friend told me she dreamed that they were attacked by aliens and she killed one with one of their guns. I asked her what they looked like. She knows absolutely nothing about aliens, or UFOs. She said they had reptilian skin and appeared reptoid-like."

Her question is: "Was this just a bad dream I had or was it something that occurred in some other dimension, and was I really paralyzed and hearing them scuffle, or just dreaming? What happened?"

COSMIC AWARENESS:

This Awareness indicates that this appears to have been a circumstance in which another dimension ... This Awareness indicates it is likened unto when these aliens seek to enter into a human contact, initiate a human contact, they have a way whereby they can create the illusion of the dream-state or they can force some entities to remain in a dream-state or paralyzed situation whereby, for example, one spouse might be sleeping so soundly you can't awaken them, while the other is awakened and abducted by the aliens.

This Awareness indicates the other, who is abducted, might not be sure whether the situation is real or whether it is a kind of dream, except that there is often tangible evidence the next morning that something foreign was there. This Awareness indicates that these entities were put into that altered state of consciousness wherein the Reptoid intruders were able to enter into a contact with these entities and make their presence known.

They also may further contact the entities in the future unless these entities are able to protect themselves. Calling upon the Divine Forces for protection is one way to avoid future contacts. It appears that you yourself were witness to this, but were psychologically incapacitated so as not to be able to interfere.

The reason you were not included in the event is because you were not a member of the household. You were a visitor. This Awareness indicates essentially you were fortunate not to be included.

This Awareness suggests that one more question may be asked. The Interpreter as having some difficulty.

MANY STRANGE THINGS GOING ON

(What Is Reality and What Is Abnormal Reality?)

QUESTION:

Does Awareness have a closing message?

COSMIC AWARENESS:

This Awareness indicates that there are many strange things that occur to entities at various times. Some entities are more susceptible to these unusual events than others. Much of it has to do with the nature of the mind and its ability to be strongly attached to a particular dimension or reality, while other entities have a mind that is capable of strong imagination and slipping into nebulous areas of consciousness.

This Awareness indicates that wherein one entity is much more practical and realistic than another, such entities seldom have these unusual experiences, and will look at the one who experiences unusual things and may say that the entity is hallucinating or is unrealistic. This Awareness indicates, however, it is not a matter of lack of realism or of hallucinating. It is a matter of stepping out of the normal reality and seeing into the more abstract and abnormal levels of reality.

There is that which is the agreed upon reality, wherein the masses, the majority of entities consider this particular area of reality as being agreeable to them as reality. There are others on the fringe who may agree with each other that there's more to reality than the majority sees, and these entities can equally share in their view of the abnormal realities.

This Awareness indicates that the question might be asked: Are the abnormal realities real? Or are only the normal realities real? This Awareness indicates that both may be real and if the majority of entities could stop and make an effort to see into the areas of abnormal realities, they might find that more and more of them agree there is something unusual happening here.

Then, those abnormal realities, receiving recognition from the normal people will be seen as less than abnormal and more normal, as realities. This Awareness indicates therefore, you need not think that because you see certain things that are abnormal, that you are unrealistic. You may be simply more sensitive to those fringe areas of reality.

You may be more able to recognize a kind of altered state of consciousness that penetrates into the abnormal realities. This Awareness indicates that some of these abnormal realities are just as real, but have been shut off from human senses, and once your senses expand to allow you to see beyond the norm, you then see into the other realities that are considered abnormal.

Keep in mind that your senses, as a human, are generally limited. Keep in mind that the dog can hear far more than the human. The cat can see far more than a human. It sees in different colors from that of the human. If your senses were able to perceive more toward those of the animals mentioned, would you not also see more of the reality than most humans?

Does this make you abnormal? Does it make your new view of reality but an hallucination? This Awareness indicates it simply indicates an expanded consciousness, expanded senses that perceive more than most entities perceive. This Awareness indicates of course it is best not to broadcast all of these things to everyone. Only broadcast to those who will understand or accept your abnormal view of life, or otherwise you may find others looking at you as though you were insane because you are abnormal in your ability to see more than they or to hear more than they.

The World's First and Only Authentic

Authorized Interview with Jesus Christ

("Zapping" Foods from the Supermarket to Feed the Needy)

One of our members sent us a book, home published, called *The World's First And Only Authentic Authorized Interview With Jesus Christ*, by Ken and Marjorie Farrow. Marjorie, evidently, is a medium who channels spirits and one day this entity calling itself Jesus Christ came through and answered the questions that Ken gave him. There's one interesting thing I'd like to ask Awareness now, I'd like to read here; that Ken is explaining about how they feed their friends who have no money or substance. He says: "Let me explain here. Our spirit friends know of several families who are poor and deserving. While working along with their guides, Marjie and I helped them get the basic necessities of life: food and clothing. Someone else furnishes the money, which they "zap" through, the ethers.

"Well, anyway, how do we get them food? Marjie and I go into a supermarket with a big shopping list made up in advance. We then move all about the market, pretending to be looking at it, hold it for about 10 seconds, and they "zap" the thing away. Now wait a minute, you say, they can't do that! That's stealing! And it would be, if the item disappeared, but it doesn't. Somehow, and I don't understand it either, they can "zap" the vibrations of an object and send it through the ethers, then reassemble or duplicate it whole in its original state. As I said before, I don't understand this. I barely understand the other method they use to transport things.

This method I've seen many times. They will completely dematerialize an object and then reassemble the atoms or the molecules, I don't know which, at another destination. It has something to do with matter and energy, which I don't understand either. According to them, not everyone has the ability to touch an object so that they can zap it away. (I'm talking about the first method.) They claim I have the right vibrations, but I'm not even aware that I'm doing this. I feel no different. I don't see the thing leave, so I don't feel it's any big deal on my part. Now Marjie, who really has psychic ability can barely do it. Figure that out!

I remember once a family who was burned out of their home. Their child was severely burned and unfortunately, they had no insurance. They were in need of our help. We went into the market and we must have laid our hands on \$1500 worth of food. They said "the only people we help are the truly destitute." We help a couple of old ladies who are dying of cancer. These are the one's J.C. says he visits occasionally. We also help a few families who are unemployed and have no money at all coming in. Christmastime finds us as busy as Santa's helpers, "zapping" toys and other gifts for these families. I don't know how many people would object to this, but honest, they claim no harm whatsoever is done to the product that is left behind.

Think of it as really doing the Lord's work, and there's no church work involved. It goes directly to the people. I wanted to test some one day, so while holding a brick of cheese, I said: "If you people can really do this, why-don't you "zap" this cheese over to our house!" "We won't do that for you, because you have money coming in. It would not be right," they said. "Well, can't you do it just this once so I see if it is true?"

"Okay," they said, "but only this once, so you can get over your skepticism." When we got home, there it was, lying on the table,--the same brick of cheese. "Well, I'll be!" I said. "It really is true! If I could only get them to

"Zap" me a new car, but I know they can't and won't. So much for that."

I'd like to ask Awareness, is this incident true, what they're saying, that these spirit friends can zap things like this?

COSMIC AWARENESS:

This Awareness indicates that this is a possibility; that such things can be done. Such things are done. This Awareness suggests, however, that the incident as told does not appear to be as accurate. This Awareness indicates that there is much imagination involved in the telling of this incident. This Awareness indicates that it is not so much that the entity is deliberately falsifying, it is more that the entity's mind is playing tricks in regard to memory and in regard to the attunement to reality; that there is a breaking down in certain areas in regard to this entity's perception of the realities in his experience; that there are certain areas which are fuzzy in his memory.

This Awareness indicates it is something that entities would like to be available to them, but this Awareness simply cannot see that this as having been accurate. This Awareness suggests it is not an impossibility. It is a possibility for entities from etheric levels to alter matter, to change things, to move things in and out. This Awareness indicates that the incident itself as that which appears to be invalid, not the principle.

Is This How Jesus Fed the Multitudes?

FOLLOW-UP QUESTION:

Is that the principle Jesus used in the story of feeding the multitudes with the loaves of bread and the fishes? This would make sense to me if that was the case. This would seem like one possibility for that particular miracle.

COSMIC AWARENESS:

This Awareness indicates that this as being a similar principle, although with a variation.

Did Jesus Really Give this Interview?

FOLLOW-UP QUESTION:

This entity they're interviewing that claims he was Jesus Christ at one time; some of the things he says corresponds with some of the information given by Awareness, whereas others don't. Would Awareness indicate if this entity was indeed Jesus at one time who gave this interview?

COSMIC AWARENESS:

This Awareness does wish not to become involved in the activities of accrediting or being a credential bureau for channels and spirits. This Awareness indicates that this as having been an unpleasant type of request many times from entities, that this Awareness evaluate this spirit, that spirit, this group, that group. This Awareness prefers not to do so.

A Nutshell Version of How Christianity Began

This Awareness indicates, however, that for entities to equate or attempt to claim that they are channeling Jesus Christ when in fact the Biblical creation of Jesus the Christ was that which was based on a composite of various religious teachings of the time, compiled by a group of religious leaders from various tribes or sects, religious groups in Rome, as this Awareness has indicated previously, wherein the Krishnas, the Helios group, the Jains, the followers of the man from Nazareth and a number of other teachers who had followings in Rome, were directed by Constantine to formulate a Catholic or Universal Roman religion that could be a composite of all the religions and accepted by the Roman Empire as the official religion, compressing the

religions into one which could be labeled the "official" religion, and in that effort these entities compiled information from various sources, bringing it together and at first, deciding to call the great teacher Zeus, only to have some of the leaders of the religious groups to argue that Zeus was a Greek god, and the Romans did not want a Greek god, thus they selected a name that was not Greek and had not been used in connection with a religion previously, selecting the name spelled Yod Heh Shin Vod Heh, or Yeshiva, or what later, in Greek translation became known as Jesus, and selected a title which was ancient at the time: Christos, which was simply one who had been christened by God, as being the title of this entity, and the entity being composed, much like in the conjuring of Phillip, and put into book form, or a testament brought together from different works of different people, modified with some stories being selected, some being rejected, so that the Gospels then were incorporated.*

*Ed's Note: This is possibly the longest single sentence ever given by Awareness.

A Myth Created for the Guidance of Spiritual Doctrine

This Awareness indicates that this composite as being that which was created as a myth for the guidance of spiritual doctrine. This Awareness asks: how can there be someone who claims to be the reincarnation or spirit of this entity speaking through another? This Awareness indicates that there are so many Jesus Christs channeling. There are so many who would claim to be Jesus Christ channeling if they felt they could get away with it, and if there were someone above Jesus Christ in the esteem of the masses, there would be dozens of these entities also being channeled. This Awareness indicates that these names of these channels, these alleged spirits are what entities rely on for credibility of their channeling, when in fact it is the information that needs to be examined, the value of the information not the authority or credibility of the title or name.

This Awareness has suggested that entities question everything, including messages from this Awareness, and look at the value of the message, and not so much at the messenger, but entities tend always to want a personality to lean on, to draw from, to support, and therefore the entities tend to seek credentials from the personality so they do not have to think about the message, evaluate the message, analyze the message or determine whether the message has any validity. If they can assume it is truly coming from an acceptable and credentialized entity, then indeed, why bother thinking further? Simply accept whatever the entity says.

This Awareness indicates that this is what has led mankind down so many false paths. There have been many great teachers, but there have also been many great frauds. There have been those who are accepted by masses. How many followers of Hitler does it take to convince the masses that what this man says is absolutely right? This Awareness indicates that the same may be asked in regard to anyone. Is it the number of followers that determines the validity of a message, or is it the message? Is it the credentials, and the authority of someone introducing or attesting to the credentials of another that determines whether the entity's message is correct?

This Awareness suggests the messages can have thought-provoking value, even if they come from Joe Shmoe, who died and passed on over on the other side, and is now masquerading as Jesus Christ. These messages may have value. This Awareness indicates that these messages, when read in that light may take on a value of their own rather than taking on the credentials of Jesus, This Awareness indicates that in short, this is

not the same Jesus that entities refer to when speaking of the Biblical Jesus, nor is the Jesus referred to in the Christian churches that of the masses of Christians, the same Jesus that was created by the founding fathers of the Christian religion, nor is this the same Jesus that walked as a carpenter from Galilee as one hailing from Nazareth.

This Awareness indicates that the entity from Nazareth who had certain ties with the Essenes, was loosely represented by the Biblical Christ; that much of that which is the Biblical Christ as that which was taken from other writings of other religions, stories which predated the New Testament by hundreds and even thousands of years, some of the stories being lifted directly from ancient writings, with very little alteration.

This Awareness indicates that if entities are not ready for such information and prefer to keep the myth as a reality, and would rather think that the Jesus of the New Testament is an actual and accurate reporting of historical events, even though the books were written some several decades or over a hundred years after the alleged events; if entities prefer that version of truth, then indeed, enjoy it. It really doesn't matter; and if entities wish to believe that someone is channeling that entity, then enjoy it!

What is Really Significant About the Channelling: The second Coming of the Christ light

It really doesn't matter, for what is of real significance is whether or not the Christ Light, the Christ Consciousness, which was then, which was before, which was at the beginning and which always will be, is now and ever present within your own psyche, within your own heart, for that is the Second Coming of the Christ Light. It is the attunement or atonement. It is the Christed atonement that one can experience in which an entity becomes one with the Divine,

This Awareness indicates that in such baptism of fire or christening, the entity's attunement to the Christ Light is all that really matters. All the historical references, stories, mythology, the sources, even the plagiarism and borrowing from earlier writings; all of this is of little spiritual value. It is only mental and intellectual value. The true spiritual value is only in the experience of the attunement to the Christ Light within oneself, for that Christ Light is the medium between Universal Divinity or the God Consciousness, and the individual. It is the word of God, the vibration of God, the frequency of God. That Christ Light is that which is the Creator, the energy of God which created all things that are, without which nothing would be.

The Spelling of the Sacred Name of Jesus

This Awareness indicates that in the ancient symbology, YOD HEH VOD HEH: Fire, Earth, Air, Water, were the letters that spelled the Divine Creator of the universe. They are the qualities of radiance, magnetism, vibration and matter. They are the four pillars of creation. The 5th element: SHIN, as in the spelling for Jesus: YOD HEH SHIN VOD HEH, in Hebrew alphabet. The YOD HEH SHIN VOD HEH adds the 5th element of SHINs Akasha; Akasha being the breath of life, consciousness. Thus you have fire, or radiance, magnetism or water; air or vibration; SHIN, life; and HEH or matter. YOD HEH SHIN VOD HEH. This Awareness indicates that is the spelling of the sacred name of Jesus; Jesus being the Greek adaptation of the Hebrew.

This Awareness indicates that this alleged channeling as that which was done in good faith by the authors of the book, wherein their attunement to a certain vibration or frequency associated with the entity's own perception

of what Jesus was or would in reality be like. This is what was channeled, much like that known as the conjuring of Phillip. They channeled the spirit that they essentially projected from their own imaginings or perception of their version of Jesus.

Trust in God is Far Superior to an Arms Race?

QUESTION:

A question from John Heron of Blanding, Utah. It's sort of an interesting concept. He writes: "Some Biblical and other writings, particularly the teachings of Jesus, suggest that total trust in God's protection, both nationally and personally is far superior to an arms race, and that a nuclear arms race is pure stupidity, so suppose North America: Canada, USA, Mexico, jointly and meaningfully declare their trust in God and started unilateral disarmament, first nuclear, then chemical, then conventional. Would this cause a chain reaction reversing the present chain reaction?"

I notice that most of us do not carry defensive weapons individually, even when taking a trip to the big cities. Would Awareness comment on this?" he asks.

COSMIC AWARENESS:

This Awareness indicates that it is a purely hypothetical creation in the first place, and in the second place, there are too many unknowns for the first hypothetical question to be answered. It would depend, for example, on everyone suddenly disarmed and began praying, it would depend on the nature of the threat posed by an enemy; the enemy's fear or apprehension of the motives, the enemy's concern that this faction of enemies praying might soon tire and revert back to the arms race, which could prompt the enemy to feel a need to act while they can. It might prompt certain of those within this country to feel so vulnerable because of the disarming that they would need to act on their own to protect the nation.

There are so many unknowns in the hypothesis, the hypothetical situation which could come into play, that an answer of yes or no is impossible. This Awareness indicates, however, that in any level of disarmament, when one is faced with a threat, one needs to consider what kind of arms conflict you are in and the nature of your enemy, and whether your enemy is armed out of fear of you, or out of a desire to destroy you at first chance. This Awareness indicates that to disarm yourself before an enemy that has no compassion whatsoever for prayer, spiritual values, or human life, is not likely to guarantee your survival, but it could make you into a memorialized martyr. It could cause onlookers, if there are any, to remember your martyrdom of yourself and your martyrdom could become a rallying cry for justice.

This Awareness indicates all you need to do to find an answer to this question is to look at what happened in Tiananmen Square recently, or to look at what happens in those countries where brute force has no counterforce and those who are in power have no compassion for their subjects. This Awareness does not advocate that entities martyr themselves, *It* does not advocate that entities lie down to show their submission. *It* does not advocate that entities should disarm themselves before those who are heavily armed and have great intention to do harm. *It* advocates rather, that if entities are threatening violence toward each other, that a dialogue begin so that a gradual disarmament can follow as agreements are reached, and so that these agreements can be trustworthy, much as your recent President has suggested: Trust but verify.

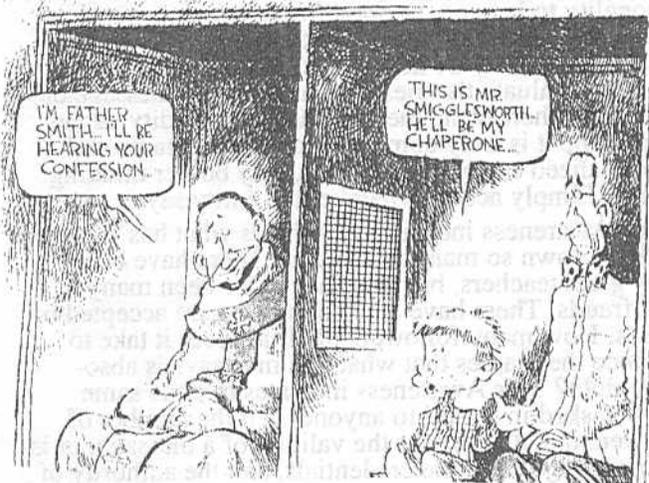

This Awareness indicates that in reaching some kind of agreement, rather than unilateral disarmament, both sides can feel a degree of security in their gradual disarmament, so that both sides then can trust each other to the degree that each is willing to disarm with verification.

This Awareness indicates that along with such disarmament, other agreements which tend to create codependency or cooperation, or cocreativity between opponents so that they become coworkers is of major importance in creating a bond that substitutes and adheres to or creates a reason for these entities to work together, thus, through trade, through interchange of people, through cultural exchange, through the tourist business of bringing people in to the other countries so that exchanges of the masses occur, as is occurring in the relationship between Russia and the United States, wherein, for example, your ships were allowed into Soviet harbors, wherein Soviet military people were allowed onto American bases; these are the things that begin to cement a relationship to where trust becomes greater.

Many Have Prayed but Were Still Slaughtered

Wherein leaders and people cross each other's borders for various reasons: political, business, military or for entertainment; these things bring about an interconnection between nations which tend to enhance reasons for disarmament, and to diminish any need for arms against each other. This Awareness indicates that there have been many instances, many cases wherein entities who felt threatened, prayed, and wherein these entities were still slaughtered by those forces which have no respect for their prayers or their lives.

This Awareness indicates that not all prayers are answered. This Awareness indicates especially those prayers which are the result of an individual putting oneself into jeopardy when it would not have been necessary. This Awareness indicates it is better that entities do what they can for themselves and not through neglect or lack of effort rely solely on prayers for rescuing them.

How to Get This Newsletter by Mail

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507 (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you want these messages to always be available to others in years to come. ("How many have you served, and how well?" is the question Awareness asks us all.)
