WHAT IS LOVE?
(And How to Be a True Emissary of Love)

QUESTION:

Over the Internet, we received an email from Sandy Medine entitled "What Is Love?" by Susanna Thorpe-Clark. I'm going to read this and ask Awareness: Is this what Love Is? She writes:

"Just recently I have been dwelling on the subject of love and wondering if I, or indeed anybody else on the planet, actually understands what love is. What set me thinking in this direction was an article by James Twyman in which he related a conversation he had with some psychic (Indigo) children he met during a visit to Bulgaria. These children asked him a question which was "How would you act and what would you do right now if you realized that you were an Emissary of Love?"

I freely admit that this question confounded me and I really had to stop and think about it - and I am still thinking about it several days later. The reason that I am still thinking deeply about this question is because I seem to have forgotten what love really is, and I'm not sure that anybody else remembers either. If we did, then the way we live our life would be completely different wouldn't it?

We Human Beings often throw the word LOVE about in careless abandon. We casually say "I love you" to people we really don't love at all. We may like them very much indeed. In fact we may feel great affection for these people.

But liking somebody and feeling affection for them is not the same as loving them.

So, what is love? It is a very strong and intense emotion that brings tears to the eyes and/or a feeling of great joy. And it can be expressed through compassion, empathy, smiling, laughter, respect, acceptance, allowance, tolerance, sympathy and sensitivity. And there are probably a hundred other words in the English language which would also be appropriate.

Therefore, if I am an Emissary of Love then I would be showing BY EXAMPLE what love is, through the action of the words just listed. But also, at the same time, I would be FEELING the emotion of it. Love would be an attitude of my mind and my heart and it would be on display for ME to see, feel and hear 24 hours a day. It would also be shown in the way I treat myself and therefore, in how I treat every single person that happens to come my way regardless of race, creed, colour, social position, personal wealth or relationship. Love would be showing on my face and be heard in the language I use. And love would lie behind every action I take.

So the difference between liking and loving is in the depth of the emotion that we feel. Also it should be realized that it is quite possible to love somebody and not like them at all. You can love a person for who you know they really are but not like them for the way they are pretending to be.

If I am an Emissary of Love, then surely love should be the easiest emotion for me to demonstrate, yet I often

have great difficulty in doing this because I do not have a "clean" experience from childhood of how love is demonstrated. For instance, I was taught that if I was well behaved and a good child that I would be loved, but if I irritated my parents and was naughty then I was not loveable. Children learn directly from their experiences, and in my experiences I learnt that to freely express who I am was not a good thing to do. And so, with time, I stopped expressing without reservation who I am, and I also stopped loving unconditionally because this was not what anybody around me did.

Many people tell themselves that they really do love everybody freely and unconditionally, but I think that most of us have also forgotten what "unconditional" really means. For unconditional means without obligation, control or condition. Unconditional means accepting automatically and without hesitation or judgment. Unconditional also means showing respect to a person even when one does not agree with what they are saying or doing.

I feel that most of us have learnt to express what we think love should be, rather than express who or what we actually are, which IS love. To my mind what most of us have to re-learn is to fully love ourselves as the child we once were. And when we totally accept ourselves as who we are, and stop feeling guilty and bad about all the things that we are not - then we can finally understand what love really is and begin to FEEL IT and express it unconditionally.

Perhaps then, my answer to the question of "How would you act and what would you do right now if you realized you were an Emissary of Love?" would be to say - I am right now, fully accepting and loving myself as I AM, not as I think I should be. I am allowing the absolute joy and feeling of my love for my Self to govern all my thoughts and actions with every person I meet, so that I may show by example what love really is. And so it is.

My question, again: Is this what love is....?

COSMIC AWARENESS:

This Awareness indicates that this is in the affirmative, an elegant introduction to the remembrance that resides within the core, that of exactly what "love" is. The suggestion that humans no longer remember is most tragically true and many are being moved by the words of children who have not yet forgotten is a most necessary step in the enlightenment process. For far too many have mindscapes so choked with faulty beliefs that the experience and meaning of the word *love* has become so mysterious and elusive. Indeed, in such a situation the misuse of free will has disconnected the conscious mind itself from the unconditional love and guidance offered it by *spirit* through the *body* through its natural communicative process---that of emotional feeling. This Awareness suggests that enlightenment then begins with reconnecting with the language of the heart, and the question "what is love" lies at the heart of understanding how to strive for enlightenment.

Religions all Say Divine Wisdom Comes From Without

This Awareness indicates that each point offered by the questioner is most valid and useful in helping individuals understand what it means to be an "Emissary of Love", with each truth broadening the awareness and leading to a higher level of abstract understanding of life so simple, yet so far removed from the mass consciousness and every day experience of many humans. Although teaching humans to be Emissaries of Love has been the central task of Religion, with each defining and advocating that right, "moral" thoughts and actions as those that spring from Universal Love, but they each state that divine wisdom and guidance comes from *without*, through holy scriptures; coming down from on high from intelligences far removed from the lowly sinful human. They advocate *conditional* love, conditional placement in heaven or hell, if that "Holy" guidance is not followed.

The Central Error Within Mass Consciousness

This Awareness suggests that this one central belief---that guidance *must* come from the outside, that behavior *must* be controlled from the outside, is the central error within mass consciousness, handed down from parent to child, through social structures laws and codes which prevent the human from truly thinking, acting and most importantly *feeling* for themselves. This Awareness suggests that scientists further reinforce this faulty approach by failing to acknowledge the existence of spirit, the *core source* of the feeling of love, that speaks through the language of emotion.

This Awareness suggests that this most tragic error starts incoming humans out on the wrong foot, severing their innate connections to the divinity within all energy and matter. It also robs humanity of an entire layer of sensory information that exists to connect humans with one another, to recognize the innate unity and universal oneness upon which life depends. But despite this tragic error, over the past century humans have become increasingly receptive to the sensory perceptions of spirit and the species can no longer tolerate the pain of disconnection. So what has all this to do with love, one might ask?

The Dual Opposing Forces Everywhere: Yin and Yang

This Awareness suggests that word *love*, at its fundamental core is symbolic of the *positive* electric pole and its *magnetic attractive* force which works together with its opposite, negative pole and magnetically repellant force, to orchestrate the behavioral movement and regulate both the preservation and development of all material identities within the material realm. This is the core energy exchange process through which spiritual potentials become physical actualities, and in humans free will plays a profound role in the optimal enfoldment of the value potentials, and destiny paths. This core electromagnetic mechanics has not been officially recognized due to scientific resistance to the concept of spirit, but it exists and permeates all universes regardless of the ignorance of humanity.

This positive and negative force has been captured in the concept of yin/yang the dual opposing forces that work together to orchestrate cooperative interactions between all material forms wherein chemical identity is preserved while it lives out its optimal developmental course of value fulfillment or self-actualization. Positive yang and negative yin work together, both are right and good, both are necessary fundamental processes that underlie all subconscious behavioral impulses and action tendencies. All these natural motions are right and good and necessary for the balances of the natural environment

and indeed of the universe itself.

Access to Spiritual Emotion is Through Pleasure and Pain

This Awareness suggests that mind of the human being which includes conscious awareness and volitional free will, and indeed the consciousness within all matter itself, can access this spiritual emotion through the feelings of pleasure and pain. Historically, however, the electrical feelings of pleasure and pain and the magnetic approach and the avoid actions they bring have been tragically entangled with religious judgments of "Good" and "Evil". This Awareness suggests this is because feelings are the *only* force that cannot be overcome by ration, so are assumed to be evidence of human flaws or sin, and the hedonistic pursuit of pleasure and avoidance of pain must be controlled by religious guidelines. Even without rigorous religious training, children are taught how and how not to act, to control and not express their feelings from such young ages that many never even awaken to the fact the their feelings *are* the core sensory mechanism which advises them of *exactly* who they are, where their unique value and purpose lies, and what they have come to be. It is the feelings--the *only* evaluative sensory information--that guides the mind in its optimal use of free will.

The Mind's Acceptance or Resistance to Divine Guidance

This Awareness suggests that in human experience the categories of pleasurable and painful feelings offer sensory information about how well the choices of thought and action match the spiritual potentials and guidance offered. It is either the *acceptance* (positive, good feelings, moving toward) or the *resistance* (negative painful feelings, moving away) to the divine guidance offered to the mind. Although the mind can use free will to think and act any way it so chooses, the amount of painful feelings experienced is a direct reflection of the amount of resistance and the gulf between one's spiritual potentials and their material manifestations. The painful feelings are shouting to the mind to protect yourself from the choices in thought and action which elicit such feelings as shame, envy, contempt, guilt, and hate, and to protect yourself from worldly conditions and social conventions that signals such feelings as anger, sadness, fear, and disgust.

Love is All About Reconnecting Mind With Spirit

This Awareness suggests that love and the entire positive emotional pole is about *reconnecting*, recognizing this common unity and common guidance and accepting its wisdom without undue resistance. It is about connecting the mind with the wisdom of body through which the spirit speaks its feelings and motives. Once the person is connected, united, and moving in a growth mode, the universal connection to other humans become apparent and the interactions, the words, and deeds, spring from the right beliefs, perspective and strategies delivered by the positive feelings. To be an emissary of love is to reestablish this spiritual connection, to *first love oneself enough to recognize this divinity within*, this most precious guidance system. To discard beliefs about external authority and righteousness, and trust in deepest faith that disconnection is an illusion and all of its manifestations, and the resistance and pain they elicit, are simply misuses of human free will.

To trust this inner voice is to express each feeling and allow its natural approach or avoid movement to develop the mind in the most divinely desirable directions, toward or away from certain thoughts, ideas, and strategies, toward those that bring such complex pleasures as love, trust, gratitude, devotion, compassion and faith. From the

initial trust, the conscious awareness and creative volition will continuously increase, strengthening the connection between the mind and the energies accessed by this Awareness, delivering a knowingness that transcends any external information offered.

This Knowingness Stronger Than Any Religious Offering

This state of knowingness yields a faith stronger than any religious offering yet resonates with the valid wisdom such traditions have gathered, and promotes a feeling of gratitude and devotion for this gift. It offers the courage, honor and integrity to regret external advice, assumptions and traditional wisdom which carries the resistant, painful pole, which has allowed the inner guidance to be manipulated and polluted with such feelings as guilt or shame over natural attractions and processes, or doubt and mistrust in ones inner goodness or inner guidance, separation from ones divinity within the oneness of All That Is.

This Awareness suggests that the questioner's elegant depiction of what love is can be enhanced by its highest level of abstraction, wherein divine, universal love, captures the greater concepts of connection, the knowingness of the unity and oneness that exists and acceptance of the pure uninterrupted state of electro-magnetic conductance of the spiritual energy which provides vibrational attunement to ever-present guidance information. The enlightenment process is that which reconnects humans with the emotional sense, offering liberation from the faulty choices, assumptions, and tragic misuses of free will that have stifled mass consciousness and the optimal development of the species.

Once the sense is recognized, each thought or action that carries either a positive or negative emotional tone opens an opportunity to find a belief which has been embraced that is of spiritual significance. The sense is asking humans to follow the feeling to the belief underlying it and recognize that it is advancing or preventing optimal experience. Beliefs that resonate with the positive pole, indicate those that have accepted more of the guidance and are right and good for one's optimal destiny and value fulfillment.

Beliefs That Are the Scourges Upon Humanity

Beliefs that resonate with the negative pole--and the social structures that flow from them--are scourges upon humanity that imply resistance to the universal guidance and misuses of volitional free will. Complex pains such as envy, mistrust, doubt, shame, guilt, contempt, arrogance, and hate are all messages from spirit that the mind is holding faulty ideas, beliefs and strategies that should be removed for advances in consciousness to proceed. Basic pains as anger, sadness, disgust, and fear are spiritual signals that the culture, the mind of man has created faulty conditions, rules and social structure that prevents the liberty to follow ones own inner guidance and participate in the cooperative game. Ultimately the yin function of self-preservation becomes enfolded within the yang function of self-development wherein minds and world continue to grow in right directions that resonate with the positive tone of universal oneness.

The True Emissary of Love

This Awareness indicates that a true Emissary of Love chooses thoughts and actions that resonate with the positive electromagnetic pole, that choices and actions toward ones fellow man are of an approach nature, not avoidant unless the moving against motion serves to remove faulty social beliefs and structures, or the moving away motion seeks to find more enlightened communities. An Emissary of Love enfolds all negative emotion within the feeling of compassion, wherein universal acceptance of the potential misuses of free will during the learning

process, within gratitude and love for the potentials within which can never be threatened or lost, sympathetic regret when error occurs, and forgiving acceptance without resistant blame brings urges to help correct it in self, and in the faulty structures of the world.

Universal Love: The True Nature of Human Experience

Universal love is contagious, attractive and self-rewarding. It allows everyone to vibrate with this most pure resonance, the broadest energy bandwidth that defines and attracts one toward the most complete and valuable versions of themselves--and guides every step of the way. This Awareness suggests that such is the true nature of human experience. With enough Emissaries of Love, humanity can recognize that the painful resistance and all the conflict and suffering it promotes, springs not from any evil force, but from misuses of free will, misbeliefs that have severed the most crucial connection--that divinity within ourselves and every other human and indeed every particle or wave of energy--the divinity within and without.

Were the Pyramids Built by Dark Forces?

(March 5, 1997)

QUESTION:

A question from Ben P., Huntsville, Alabama. I might add, this entity is a new member, and he's received a number of back issues which he's in the process of reading, so some of his questions I'm sure are answered in other issues. I'll read his statement. He writes: "I just finished reading Revelations 95-7, issue # 450, and it really rattled my cage.

"Am I to understand by this that the great pyramid of Giza and other pyramids, were built by the Dark Forces from either Mars or Draco? Further, are you intimating that ancient Freemasonry or the ancient Mystery Teachings were developed and given to man by the Dark Forces? I simply must get all of this straightened out in my thinking.

"Does this further indicate that the Jews or Draconians brought these teachings? Are there other 'Revelations' which I have not gotten around to reading which explain all of this? (I'm sure there are) Perhaps the end question in my mind is: Have I been taught by the Dark Forces? You see, I know that I am living in the Light of Christ, or as you put it, in the 'Awareness'. Please help me out of this confusion. Much of the information in issue #450, page 20 is new or different to me," he says.

COSMIC AWARENESS:

This Awareness, not having reference to that reading to which the entity refers, finds it difficult to respond to the question. It is like having a syllogism without a premise. This Awareness indicates however, *It* does not see that the pyramids were built by Dark Forces from some extraterrestrial or demonic origin.

It has indicated that there were extraterrestrials helping in the building of the great pyramids, and *It* has indicated that one such entity was seen as not being in full physical manifestation, but this entity assisting in the construction of the great pyramid was from a higher dimension, who, in his efforts, did not fully manifest in this third dimensional body.

How the Great Pyramid of Giza Was Built

This Awareness indicates that the pyramid of Giza was seen as having been created through the art of levitation; the levitation being developed through certain technologies using the black stone. This appears to be likened unto obsidian, and the stone frequencies of vibrations affecting these stones was from chanting. The chanting and different musical tones or vibrations, was used to create the levitating forces that helped to build the great pyramid.

This Awareness indicates that then, following the construction of the great pyramid, which is older than the others, there was a base built for the next pyramid, and it was left unfinished. The challenge being presented to future generations, which the Pharaohs of the future generations completed by manual or hand-labor, as indicated in the modernized version of how the pyramids were built. This Awareness indicates that this was through the use of stones being rolled with the use of slavery, to finish the newer pyramids.

This Awareness indicates *It* does not see that *It* had indicated Dark Forces being involved in this. This Awareness indicates that likewise, the Mystery Schools as having been created in the ancient cities of Sumer and Akkadia as suggested and described in the works of Zecharia Sitchin in his books on *The 12th Planet* and the further *Earth Chronicles* series.

How Man Was Really Created: The Enlil / Enki Story

This Awareness indicates that the earlier entity, Enlil,

involved in the creation of man in the sense of the upright or modern man; this entity as having a Draconian background, being of a Reptoid type, and Enki, being from Sirius, were in a kind of competition as to how mankind should be developed. Enlil created a modernized version of man, updating this entity from the Neanderthal to the Cro-Magnon, or that which is termed the "Upright Man," to be used for slavery or working the mines and other activities for the Draconian forces, but that the entity Enki came upon the scene later and attempted to create an alteration in the first creation by adding the mammalian brain on top of the reptilian brain of the first prototype.

The Importance of Adding the Mammalian Brain

This Awareness indicates by adding the mammalian type brain above the reptilian brain, this allowed for the possibility of a spiritual evolution to occur, in which mankind could then become capable of thinking and making decisions, of knowing right and wrong. This Awareness indicates that prior to this, the entity would only be programmable in terms of pleasure and pain and controls for the use of a slave could be easily implemented by the Enlil genetically created program.

This Awareness indicates that Enki essentially usurped the creation of Enlil by giving this entity, or this 'model' of human type, the ability to choose, to think. This was recorded in earlier writings from Sumeria and Akkadia, as if it was some kind of diabolical plot by Enki to destroy the creation of Enlil, who fancied himself as a kind of god, and these entities, in these writings, referred to Enki as the "serpent".

The Symbol for Sirius was a Serpent

The symbol for Sirius was a symbol for a serpent. It is that which still is used on their ships. This Awareness indicates that it does not mean that these entities are evil; it simply was a symbol representing wisdom and the life force, and it also symbolizes Fire, or the Kundalini Life Force Energy. It has many different symbolic meanings, but essentially, it was just a symbol, in the same way that an eagle is often used as a symbol for the United States and other countries.

This Awareness indicates that Enki, essentially, was a representative of the more spiritual beings of the galaxy, in that he did not want the creation of slaves on the earth and wanted instead to see these entities have the ability to evolve and become more god-like in their own ways. Thus, in the early writings, which later became incorporated in the Bible, as part of the *Book of Genesis*, it is suggested that the serpent tempted Eve to eat of the fruit of the Tree of Knowledge.

What "Eating of the Fruit of Knowledge" Means

Knowledge is simply the ability to think for oneself, to choose, to make a choice of right or wrong, and this thinking, he said, would give them the Food of the Gods, or make them wise as gods. In other words, by allowing mankind to have that mammalian brain grow on top of the reptilian brain, which is simply a survival brain that runs down the spine of humans, the possibility of thinking, of choice, of right and wrong, of choosing, became part of the human experience, and this was written in the *Book of Genesis* as "eating of the fruit of the Tree of Knowledge," which the entity, the so-called Lucifer, or serpent, said would bring them the ability to be as gods.

Enlil did not want these entities to be able to think. Enlil simply wanted them to obey and gave them certain simple rules of obedience and left them alone, unattended for a brief period. It was during this period of time that Enki and the Sirians, those from Sirius, came upon the

scene and altered the genetic creation of early humanoids, or human types. This Awareness indicates this in reference to the Cro-Magnon type being.

The Reptoids from Draco

This Awareness suggests that at this time, there were no so-called Dark Forces involved in either of these actions; they were simply two different extraterrestrial types. The Enlil types were from Draco. At the time it was called the Dragon Constellation. It was later changed because the map-maker of the heavens at the time, did not have room to write the entire word "Dragon" and simply shortened or abbreviated it to "Draco." Later, this was changed to Draco," the constellation Draco.

This Awareness indicates that the word Draconian comes from Draco, or dragon, and the *Book of Revelation* speaks of the Dragon, and this is a reference to the so-called Reptoids that are now in the UFO lore. This Awareness indicates these entities are partially reptilian in their genetic nature. Their main concern is control, conquering and survival, whereas the Sirian types are concerned about things that have to do with spiritual development.

These entities from Sirius are closer to the True God of the Universe, though the earlier Enlil types rewrote the messages from the historic versions of the early story in Sumer and Akkadia and handed it down through one civilization following another, and the Hebrews got the story as it was handed down, and perceived that the First Creator of human types, Enlil, was the Original God who put man in the Garden of Eden, which, incidentally, is the place known as the Tigris/Euphrates area, now comprised of that country Iraq, Syria and part of Turkey; and also Iran to some extent.

This Awareness indicates that this Hebrew version also translated the ancient writings to read as though Enki, from Sirius, was a negative force and called this the Serpent that tempted Eve. This Awareness indicates of course, these terms were simply symbolic. They were not understood at the time the writings were translated into the Hebrew language and given to the Hebrew priests, which then later put together the *Old Testament* or the *Book of Genesis*. These were taken from ancient civilizations without a full understanding of what was being said.

At the time, the Hebrew priests did not have the information that is now available from cuneiform writings from stones, from the work that has gone into compiling information from Sumeria and the Akkadian civilizations. This has only come to light during this century and the last century, and the assembling of the information to have a deeper realization of what occurred in those early times, those prehistoric times, took considerable amount of archaeological research in which to compile such information.

The entity Zechariah Sitchin, in his *Earth Chronicles*, and particularly the book *The 12th Planet*, has put together much of this information, giving sources for his conclusions and his interpretation of these messages, and reading this entity's work, coupled with a reading of the *Old Testament*, one begins to get a clearer understanding of what the *Old Testament* really is about.

This Awareness indicates It does not see that It indicated that the God of the *Old Testament* was a Dark Force; It simply refers to that brief passage relating to the creation of man in the Garden of Eden, in which there appears to have been a misunderstanding in the interpretation of what the being known as the Serpent was really about, and what the being who created the Adam & Eve prototype humanoids was about.

The Mystery Schools Originated by Extraterrestrials

This Awareness indicates that in regard to the Mystery Schools that followed down from those times, there were, of course, many priests, and the priests themselves had their agenda from extraterrestrials, and much of this information handed down through these various priests, down through the ages into the Mystery Schools, eventually reaching the Templars and the Freemasons. They had their particular agendas being given to them from earlier programming in these Mystery Schools and to some degree, much of this was handed down from Enlil's creation, or influence, and some was brought in through the influence of Enki; but later, the Pleiadians also had an influence in some of these Mystery Schools.

This Awareness indicates this is not so simple, because it spans many, many thousands of years. This Awareness indicates this appears to be approximately between 25 and 50 thousand years in time that these events occurred. Therefore, it is not simply "the evil people were involved in bringing about certain teachings" or "Were these the good or the evil people?" It is not that simple. There were always conflicts between different philosophies which came out of the teachings of different extraterrestrials.

The Hawaiian Kahunas Parallels the Teachings of Christ

This Awareness indicates that if you examine the philosophy that was espoused by the Hawaiian Kahunas, you will find that it parallels the teaching of Christ. The Kahuna was a person who works with wood; in other words, a carpenter. Also, if you look into the Hebrew language, you will see that the Cohena was a carpenter, and a priest, and the Cohena also used similar terms as the Kahuna in espousing that philosophy.

You also will find that working with wood as a carpenter parallels the actions of the Masons or Masonic people. The organization known as Masonry was involved in building; thus you have the Builders. This Awareness indicates likewise, the Berber tribes in Africa used similar terms and similar language in describing their magic. This Awareness indicates that all around the world there appears to have been a code, a secret code among many of the various tribes of people, and this secret code parallels in terminology the teachings of Jesus, the teachings of the Kahunas, the teachings of Masonry and other teachings and philosophies around the world.

The word "China," for example, is Cahina. The Huns were Hunas in their original philosophies. This Awareness indicates the word "One" is related to Huna. It simple means the Law of One or the One of All, and it is a reference to the unity of everything.

This Awareness indicates in South America, there was a tribe whose witch doctor was called the Zuni, and the Zuni used similar terminologies in their philosophy of magic. This Awareness indicates that they had a circle with a cross in it which was called the Kahune, "Ka" meaning four, and "0" for the circle, being the "Hune" or unified, or universal symbol. The circle with the four cross, the Kahune, and in the Hebrew language, the 4 was Yod He Vod Heh, or the word that later was translated as Yahweh. This Awareness indicates Yahweh of course, being another form of the word Jehovah.

This Awareness indicates all around the world these words keep appearing in form, in picture, in diagram or in activities. This Awareness has not indicated that these were of the Dark Force. It is simply a reflection of the fact that there was a unified religion behind all of these various cultures that evolved in different parts of the world.

This Awareness indicates that there are also similar connections to many of the American Indian tribes. There

is the Arehuna (?) Indians in the southwestern part of the United States, and the Arehuna being the Witch Doctor or Medicine Man of the group was one who helped in the healing process.

This Awareness indicates that if you take the words "Huna," "Arehuna," "Kahuna," "Cahina," "Zuni," "Huns" or even the word "Guinea" like in the term "New Guinea," "Kahina" used by the Berbers in north Africa, and "Cohena" in the Hebrew language, and also there was the term "Kohen" that is found; the Kohen being a term from Southeast Asia, and the name Cohen as evolving from the "Cohena" of the Hebrew, and from the Egyptian, there was the "Ka". The Ka in the Egyptian philosophy as related to the 4 or four divisions of their version of the body.

The Significance of the Books of Max Freedom Long

This Awareness indicates that all of these things tied together the remnants of an ancient philosophy or religion, and the entity Jesus brought much of this religion back. In some of his statements he parallels in his teaching much of what is found in the Hawaiian Kahuna philosophy. The entity Max Freedom long made 40 years of study from the Hawaiian language and broke down the code words and found many of the solutions tying the Christians and Kahuna philosophy together.

This Awareness indicates this entity's books *What Jesus Taught in Secret*, and *The Huna Code in Religion* can be very helpful for entities wishing to follow through on more of this understanding, and how miracles are effected. This Awareness indicates having to do with the three parts of the human body: the three persons which correspond with the Father, Son and Holy Ghost; you have in the Huna philosophy, the High Self, the Middle Self, and the Low Self.

The Father, Son and the Holy Ghost

The Low Self, of course, corresponding to the subconscious; the Middle Self to the conscious, and the High Self to the Superconscious or the God Self, and if you apply this to the teachings of Jesus, you have the Father, Son and the Holy Ghost. This Awareness indicates this entity, being a carpenter, or a priest, Kahena, or in the Hawaiian language a "Kahuna" you see the many connections involved.

This Awareness indicates much of this was also channeled through the Mystery Schools so that it was not simply a matter of some Dark Force operating through these schools. There were many forms of Light Energy coming through these schools as well, and through the Masons. There were, of course, some misdirections, but the Masonic movement began as an attempt to keep a watch on the churches and on the governments of the world, so that the priests could not violate the sacredness of the human souls, or the sacredness of the great teachings of Divinity.

The Masons Create Revolutions and Fight the Priestcraft

They were set up as a watch-group, but in some ways became corrupted in different times and misused by governments. This Awareness indicates they were responsible for the overthrow of the French during the French Revolution. Often, the Masons create revolutions from inside a country to overthrow the priestcraft. The priestcraft is not always necessarily a religious body.

The priestcraft can also be tyrannical kings or tyrannical leaders of a country and the Masons are often involved in that internal revolution that starts within a country, whereas the Catholic Church is often involved in the exportation of war into other countries; this being through that which is known as the Knights of Malta, and those entities involved in that which today is the Fascist

movement.

This Awareness indicates that *It* has addressed this question from many sides and is getting far off from the center of the question, and does not wish to depart into the Outer Limits on this question. Therefore, this Awareness suggests that this is sufficient, unless there is some area of the question that needs some further discussion.

WHAT IS THAT CHANTING COMING FROM BENEATH THE SPHINX?

QUESTION:

No, not this question. But since we got into this area of the pyramids and so on, we have a few questions here from other entities. First a question from Norman D., Boca Raton, FL. He says "On the Art Bell Show, he said a friend of his who works at the L.A. Times was recently in touch with a person who was at a meeting for the opening of the Sphinx, and the guards who have been stationed at the opening of the Sphinx are frightened because of chanting coming up from a chamber below.

"Also, there is a blue light that has been said to emit from the opening, turning people back, much like a force field. Is this a true story?" he asks.

COSMIC AWARENESS:

This Awareness has mentioned previously about a group of entities who held great power, who were residing beneath the Sphinx. These being extraterrestrials, having an influence on humanity, as a kind of negative force, but that these entities had been neutralized by other extraterrestrial Light Forces, so that their power was no longer effective.

This Awareness indicates there may yet be some remnants of these entities in that area. It is a possibility, but this Awareness does not see this as necessarily correct or true and does not see any negative threat from this energy at this time. This Awareness indicates there may yet be some harmless or relatively harmless entities entrapped there, or it may simply be devices that were left as these entities were neutralized or taken from that area.

Dangerous Extraterrestrial Devices Lie Beneath the Sphinx

This Awareness indicates there also are ancient extraterrestrial devices beneath the Sphinx that do need to be handled with great care and with great apprehension and understanding so that those entering are not endangered by these devices. Some appear to be communicative devices which may be the source of the chanting. In other words, these may simply be chants from some other system being broadcast to this place, or there may be devices of a technological nature that could be used for power or warfare or destruction or for other more beneficial purposes.

But this Awareness **does** suggest that these entities entering in this area **do** need to be careful, for the material and devices are not commonly recognizable or recognizable to most people of the earth. This Awareness indicates it appears there is beneath the Sphinx, in that chamber also a hall that passes through underground to the Great Pyramid, and records would be found on the way; this being that which the Cayce readings referred to as the Hall of Records. This may yet be discovered, as this area is further explored.

WAS SOUND THE KEY TO LEVITATION?

QUESTION:

Lenore M., Edison, N.J., has a question. Her first one, I'll read it. Awareness has covered this. She writes: "It seems that ancient Egypt is just one big unfathomable mystery. Recent shows on TV tried to duplicate the Egyptian pyramid-building and obelisk-carving and

raising, but what was only accomplished by this in my mind is how naive modern-day man is in ancient technology.

"The teams put forth a noble, but pathetic effort. Apparently the Egyptians were absolutely unfazed by projects which required moving staggering tonnage about of rock and granite. It is inconceivable that brute force was used. Was sound used?" she asks.

COSMIC AWARENESS:

This is in the affirmative. Sound is the key to levitation. Vibration is the key to levitation. Vibration is the key to neutralizing gravity.

What Source of Light Inside Pyramids?

QUESTION:

Also, what source of light did Egyptians use when digging in the bowels of the earth? I just can't picture an ancient Egyptian wearing a hard-hat, miner's helmet and steel-toed shoes!"

COSMIC AWARENESS:

This Awareness indicates the light as that which came from certain chemicals that can be painted on walls. This is a mineral; the name is not clear at this time. It has been mentioned in previous readings. This Awareness indicates it is a mineral that when painted on walls, creates a light that has no central force or central spot, but it lightens up the area.

This Awareness sees only one letter in the name; this letter being "A". It does not see the other letters at this time. It appears to be approximately 5 or 6 letters long, describing this mineral which was used by the ancient Egyptians for lighting underground areas.

It has also been used in this manner by other civilizations underground. This Awareness indicates *It* simply does not see the word at this time.

Why the 4 Million Mummified Ibis (The Purpose of Mummification is Explained)

QUESTION:

And she goes on: "And what about those 4 million plus ibis mummies, all carefully preserved in miles and miles of underground shafts? Why so many? Wouldn't a few hundred thousand have been enough? And what purpose did this serve and what effect upon consciousness did it have?"

COSMIC AWARENESS:

This Awareness indicates the mummification program was a form of early computerization. It is likened unto each of these mummies holding consciousness and emitting the consciousness very, very slowly, in increments, over long periods of time. This Awareness indicates this is likened unto, if you can imagine, transistors in a great schematic diagram on the earth emitting information into the atmosphere through the vibrations that these entities were programmed with at the time of their mummification.

This Awareness indicates as the body decays over time, which you all realize is extremely slow, because of the mummification process, the information held by each mummy is gradually slowly released to affect mankind's consciousness of the collective consciousness of humanity on earth over the great periods of time that followed from the time of the mummification's.

If you think of these entities as likened unto transistors in a computer chip, you get a reasonable concept of what this mystery Egypt was doing in terms of trying to speed up the evolution of humanity on earth. This Awareness indicates that it had a negative effect on the entity's souls who were mummified, in that they could not free themselves from the mummy during this time period, and

because they could not free themselves, they would reincarnate in future bodies, but remain retarded throughout many incarnations.

How the Interpreter Paul Shockley Tuned Into His Mummy

This Awareness indicates that it has given information on this as it applied to the Interpreter of this message, for this entity was also mummified and had numerous lifetimes following in which he was retarded and it was only during this lifetime today, in the last decade, that the entity began to tune into his mummy and release himself from the effects of the mummy. This was partly due to his going to California to a Rosicrucian museum and standing before a mummy in the museum, tuning into that mummy and having surges of memory coming into his consciousness, in which he saw all of the things that applied to him in his own mummification.

Later, the entity met another person who recalled how she had been a priest in Egypt and had injected him with a certain substance and mummified him. It was from this experience that the entity began to tune in and realize that the symbol he held in his consciousness was the symbol of the onion, and that the onion was made layer upon layer, and that as these layers opened up, certain knowledge from his programming in Egypt would be released into consciousness.

Don't Let Them Mummify Your Body—Get Cremated!

This Awareness indicates it was from this that he began to understand the purpose and nature of the Egyptian mummification process. It is not something that entities should encourage further in these times. There have been discussions about some organization that is seeking to mummify entities so that their bodies can be preserved after death into the future. This Awareness would not advise entities to do this. It would be far better that they be cremated so that their spirits can be totally free, and they can have all of their soul resources in their next life.

This Awareness indicates it took considerable time for this Interpreter to regain the parts of his soul that had been strung out over many lifetimes in the reincarnations of the mummy and the entity mummified in Egypt, and therefore, this entity understands also how the mummification program of ancient Egypt was effected and why, and how it is not good for those who are involved in being mummified, even if it may have been helpful to some others.

Why an Invention Can Manifest in More Than One Place

This Awareness indicates this also explains why often a technology or invention can be created simultaneously in different parts of the earth, because some mummy has opened and released information into the collective consciousness of humanity, and different people may happen to tune in to that information and get an idea, and thus work on that idea and develop in two different ways, the same invention.

WHY WERE 4 MILLION IBIS MUMMIFIED?

(Awareness Takes Us on an Astrological Trip Through the Ages)

FOLLOW-UP QUESTION:

In the question she mentioned four million plus Ibis mummies, all carefully preserved in miles and miles of underground shafts. These are birds, are they not?

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative. This Awareness indicates that these Ibis mummies also were recognized as special beings by the Egyptians. It was believed that they carried a certain type of spiritual power, and in this mummification process that the release of this power over long periods of time would serve to protect the earth from foreign or extraterrestrial invaders.

This Awareness indicates it was believed that these mummified Ibis creatures could create a kind of shield or aura around the earth, giving it protection to grow. It was a kind of shield to hold a time period, wherein things were safe, likened unto a period of incubation for society in general.

The Significance of the Point on the Great Pyramid

This Awareness indicates that the pyramids also were seed symbols representing the seeds of civilization, the hierarchy systems, but you will note that the great pyramid does not have a point. The point on the great pyramid was long ago removed. This point would represent a hierarchy king or one in power, and this being removed means that it cannot become a hierarchy system on earth that is held by a single powerful group or entity.

This Awareness indicates that those who pursue power will only find that they reach a point where they can go no higher and there is only one way to go, and that is down. This Awareness indicates some of this information was presented through the symbolism of the pyramid as a message to the subconscious minds of entities in future humanity, and some of the information was presented through the mummification and the placement of entities in their mummies in the various positionings for this purpose.

This Awareness indicates that the use of the birds; the birds being that which symbolizes the spiritual or high-flying ideals and expressions; these representing the highest frequencies; these birds being that which help to release certain changes in frequency throughout the biosphere of the earth. As these birds begin to decay, the frequencies will rise around the earth in its aura, in its biosphere.

This was all part of a plan to speed up evolution on earth because the entities at the time realized that the cycles of the ages went around and around and around, rising and falling and rising and falling without ever getting off the wheel, or getting away from the falling cycles, but the action of these mummified beings sending out the higher frequencies that came from the Age of Leo and Virgo could affect the nature of the evolution of civilizations so that at some point, humanity could actually escape the cycles and rise into a higher cycle, into another dimension, beyond the 3rd dimensional stage.

This Awareness indicates in these cycles of ages, the movement of consciousness rises at certain signs or certain stages, and then falls and the energies in the falling stage become more condensed, while in the higher stages, become more radiant. In the more radiant stages entities are more loving, they are more aware, they are more outgoing and they are much more expanded in their consciousness.

Those who find themselves entering into the falling stages or falling energies in the cycles, find that the energy and their awareness becomes more condensed, till it reaches a very self-centered survival type of focus. The focus on self makes it so that they have a difficult time in loving others. Rather they will use them for self-purposes.

This Awareness indicates that the Piscean Age was the lowest level in its beginning of the cycle. It was the lowest level of consciousness in the entire wheel of ages and it is now beginning to pass beyond the Piscean Age into the Aquarian Age and the energies are radiating and entities are becoming more focused on things outside of self, on others, and on the world in general.

"The Summer of Consciousness"

When these energies reach the higher stages, which might equate to what occurs in your yearly cycle, the

"summer of consciousness," this being many thousands of years from now, then entities will understand the whole of creation, the entirety of the universe and its Creator and the creation of all things. When these begin to fall, as occurred in the Virgo Age, where things began to drop, then entities begin to lose their understanding of the universal energies and they begin to lose their sense of unity or Oneness with the Divine Consciousness and they become less aware.

Gradually, the further falling in the ages as entities move from, for example, the Age of Virgo into the Age of Leo, into the Age of Cancer, Gemini, Taurus, Aries, and again to Pisces; this becomes the level of consciousness wherein it is the lowest on the cycle, and entities have very little understanding.

Wars Will be Less Common in Age of Aquarius

It was during the Age of Pisces that the Christ was brought to earth to help bring humanity back more quickly into a greater movement toward higher spiritual essences. This Awareness indicates it was not sufficient however, to prevent wars or to prevent greed and the self-centeredness which many entities experienced, and thus, there were great wars during the Age of Pisces.

This Awareness indicates it is likely that wars will become much more unusual and uncommon in the Age of Aquarius, for entities will become more expansive in their radiance and in their touching of others in the sense of their spiritual empathy and understanding and compassion. They will reach out to others with greater compassion, for their energies are more radiant and not so self-centered or focused on self.

Keep in mind these ages are over 2000 years each, therefore, there is still a great distance to go before entities reach the Age of Leo again, or Virgo. The Earth Ages go counter-clockwise. The clock moves clockwise to record the passage of the signs throughout the day. The months go clockwise, and the ages go counter-clockwise.

You move from the Age of Gemini, which was the time of the Tigris/Euphrates' early advent of humans, as commonly known as modern man or upright man, or the Cro-Magnon types, and from the Gemini Age you move further backward or counter-clockwise to the Age of Taurus, which was the time of the early Egyptian period and late Atlantis period.

Mithra—the Mother of Present Religions

It was the time in which Egypt thrived and that which was known as the Golden Calf was part of the religion. Bull-fighting was symbolic of the slaying of the Age of Taurus. The end of the Age being the bull-fighting era, and that early religion known as Mithra, which was the mother of the present religions, symbolized by the slaying of the bull.

The next Age was the Age of David, or of the Ram, the Lamb, and that which is Aries, the Age of Aries. Opposite was the Libra, or the Covenant, and the Ten Commandments from God. The Age opposite always ruling the Age you are in. Thus, the Age of Taurus had Scorpio as its opposite and this was the sign of death and mummification.

The Age of Aries had as its opposite, Libra, the law, the balance, the harmony, and the covenant, the agreements, the contracts between God and man. The Age of Pisces, the Fisher King, is the Age of the Christ, and its opposite, the Virgin, Virgo, the virgin priest, the actions of the book-keepers, the analyzers. It was a time in which the Piscean Age was ruled by the priests, by the book-keepers, by the record keepers, and in the Piscean Age there was water. It is a water sign, and there was much discovery of new worlds across the seas.

This Awareness indicates entering into the Age of Aquarius, which is an Air sign, and which pertains to service, pouring water for others, giving service to others; it is a time when social concerns become enhanced. Its opposite sign is Leo, and Leo is a sign that rules children, sports, gambling and packaging and marketing and show business and presentations and demonstrations: all of these things are part of the ruling factor over the Aquarian Age.

This Awareness indicates that you continue moving backwards counter-clockwise around the Zodiac, and you eventually come back to Leo which is the Sun, and which is the source of the highest understanding, the clearest of the signs, whereby entities are One with God, where they become so highly evolved that they have the understanding of the entire universe and its creation and of the Creator Itself.

This Awareness indicates it is also during the Age of Virgo that the analysis of all of this becomes clear. The Age of Aquarius is still quite some distance from full understanding, but there will be much social understanding and realizations that entities can perceive during the Age of Aquarius. There is to be much scientific discovery, much technology. There will not be quite as much compassion as entities would like.

Aquarius is a sign in which entities are said to be cold. They do not hold well in marriage. Most Aquarius marriages do not last a lifetime. Although there can be other factors that help to make their marriages last, there is a certain kind of cold intellect that hinders the deep attachments that some of the other signs develop. Therefore, your social lives during the Aquarian Age may not be as permanent as they were in the Piscean Age.

The Karma for Humanity Will Come From the Sign of Leo

Devotion and loyalty may not be quite as strong, although the sign of Leo deals with loyalty, and it does rule the Aquarian Age, and therefore, entities have that karmic need to develop greater loyalty during the Aquarian Age, and they have the opportunity to develop that. It is a karmic thing, for the sign opposite is also the sign of karma.

Thus, the karma for humanity will come from the sign of Leo, and the expressions that entities feel will come from the sign of Aquarius. This Awareness indicates the self-undoing will come from the sign of Pisces, which entities will find is not radiating strongly in their lives unless they cling to old ways. This Awareness indicates It has covered more information than the question sought and perhaps has answered or covered enough information for this question, unless there is something further that needs discussion.

Why Did Pharaohs Fixate on Eternal Life?

QUESTION:

Yes, that covered it pretty well. She has other questions, however. But I had a question about these Pharaohs of ancient Egypt. Why the fixation on gaining eternal life, embalming, mummification, and this making sure that their name wouldn't die, for example, by building huge statues, obelisks, pyramids. Were they ET's without souls? Or how spiritually advanced were they? It doesn't sound like they were very advanced spiritually if they did all these things?"

COSMIC AWARENESS:

This Awareness indicates these entities believed that the accomplishments they presented on earth in their name had to do with the essence of their being, and that by taking, for example, boats and supplies and goods into the tomb with them, they would rise in the next world with all of those things intact. It was an attempt to bring

their worldly fame, name, honor and glory into the realm beyond death.

This Awareness indicates these entities sought immortality through material means. The material wealth and technology they had available at the time were for them their only way of finding immortality. If you look carefully in the Bible, you will see that the name of God, the name of Jesus are the great and important focus of entities, and the preservation of their name was seen as of absolute urgency.

Why the High Value of a Name?

"You do not take the name of the Lord in vain!" and it was this worship of the name that meant the worship of the Lord. This Awareness indicates what is the reason behind such high value of a name? It was because the name symbolized the essence of the person. If you look at it in a logical sense, you will see clearly, your name symbolizes your entire being. It is not a reality to your entire being. You could be named anything and still be yourself, but you are named "such and such" and it symbolizes you.

The Egyptians Were the Very First to Mention the Soul (or Ka)

The ancient Egyptians thought that in preserving the name, they could preserve themselves or preserve the individuals that existed under that name. This Awareness indicates in ancient writings you will never find a reference to the soul, until you reach the Egyptian cultures. The ancient Egyptians were the first to give the soul any mention, and this of course was referring to that which they called the "Ka."

This Awareness indicates that prior to that there are no cultures that speak of the soul, and the ancient Egyptians were trying to preserve the soul through mummification, through the fixations of the name, through holding the name, through holding properties, through holding statues and so forth, of the entities. This was their way of trying to make sure the soul survived.

This Awareness indicates that this was a pursuit of immortality in the only ways they knew of. In today's world, entities do not necessarily have the same kind of fixation on their name. Many entities want to change their name. They will take on a false name, a nickname, or change their name to something they like better. They see themselves as themselves, not as their name, whereas in earlier cultures, the name was sacred, for it symbolized the entity, and if you did not approve of someone's name, it was worthy of a battle.

The person whose name was misused or violated, could become extremely angry and a battle could ensue. This Awareness indicates even up into the early part of this century, entities often held a great pride in their name, saying that "I give my word. My name is as good as gold!" and they would honor their word because it was associated with their name, and they did not want their name tarnished with some dishonorable deed.

Today, many entities will try to escape their deeds by changing their name. In some cases, entities just don't like themselves well, and they change their name, thinking it will make them a different person, one who is more acceptable and more likable.

The Pharaoh Akhnaton: What was his Mission?

QUESTION:

Another question from Lenore M. She asks: "What about Akhnaton? What planet did he really come from? And what was his mission here, and is it complete? I just can't take it when "authorities" and "experts" say Akhnaton obviously had a medical problem. It was very clear to me he was not of this earth. Why was he inter-

ested in our speck of dust, the earth? Were genetic experiments of some kind going on?" she asks.

COSMIC AWARENESS:

This Awareness indicates that this entity was one of the entities mentioned previously during the building of the pyramids. The entity was in a different lifetime then, however, it was not the same body. The entity appears to have been from Sirius and helped to construct the pyramids and also later became a Pharaoh. Akhnaton is the one who introduced the concept of One God.

The idea of One God was quite unique at the time. He saw that all these many gods that entities worshipped created considerable amount of conflict among the people in Egypt, and that there should only be one god. It was the same reasoning that later was used in Rome, when Constantine recognized that all the religions of Rome were fighting each other and it could easily flare up into civil war in Rome, and thus ordered all of the religious leaders from the various groups to come together in a conclave, or one big meeting and compromise, until they found a single religion that would satisfy all of their premises and needs for their religion.

Once Again: How Christianity Came Into Being

Thus, the followers of the Nazarene, the Krishnas, the Sun Worshipers: the Helios and the 12 signs which were introduced in the Universal Religion of Rome as the son and the 12 disciples. The carpenter religion of Jesus the Nazarene was brought into this matrix. The Krishna religion from India, wherein the entity was born of a virgin, came into the world to save man's souls, and was crucified for his efforts; all of these three major religions and others in Rome were brought into this conclave and sat down to work out a single religion.

This Awareness indicates they named the protagonist or hero of the religion "Zeus." When others in Rome found out they were using the name "Zeus" as their religion, they were infuriated because Zeus was a Greek god, and they wanted nothing to do with the Greek religions. Therefore, they had to go back together and seek some kind of name that would satisfy the Roman people. The name eventually was decided "Yahsoos". (sp).

"Yahsoos" was a word that meant "Neither He Nor She;" It was neutral--neither male nor female. This Awareness indicates Yahsoos became the entity who was the hero of this newly formed composite religion. The word 'catholic' in Roman language meant "Universal"; thus, it was the Holy Roman Universal Church that was formed, or in modern terms, it is the Holy Roman Catholic Church.

In Those Days "Christ" was a Title, Like "Dr."

This Awareness indicates that this formation of a composite religion was the beginning of the Christian religion. The term "Christ" was a title, just as "Dr." is a title now. An entity who was a Christ was a spiritually evolved person of great prestige. One who was Christed, was one who was crowned in spiritual glory. The word "Christ" did not originate with Jesus, nor was it his last name.

The term "Jesus" was chosen as the protagonist of the new religion, and even in those days it was not "Jesus" in the original creation of the religion. "Jesus" is the Greek form of "Yahsoos" "Yahsoos" was the Roman form of the word, and thus, it was "Yahsoos the Christos". "Yahsoos the Christos" was the term used for the protagonist of that religion.

The stories that came from this new Roman religion, which was a composite to satisfy all of the various religions of Rome were written long after the crucifixion

of the Nazarene, and in fact, the Nazarene went in a different way, but the story of the crucifixion, which came from the Krishna philosophy of India was incorporated, and the crucifixion was incorporated into the story and the Piso family in Rome at the time were assigned different books to write, some time after this Council of Nicaea; the Nicacan Council, in which this religion was comprised or composed by these various church leaders, and this was long after the supposed crucifixion of this entity in the story.

By having the entity crucified some 50 years before the first book of the New Testament was written, it was easier to convince entities that it was true, because in those days, entities did not live more than 50 years. The lifespan was much shorter, and there would be no one around to verify or to contradict the story.

The Piso Family in Italy Wrote the New Testament

This Awareness indicates the Piso family divided up different stories of this New Testament. One would write the Book of Mark, another the Book of Luke, and so forth: the Book of John and the Book of Matthew; and each of these books would then be incorporated into the New Testament. This Awareness indicates that this essentially became the religion for the Piscean Age, and the symbol for the religion was the cross and the fish, the fish being the symbol for the age, and the cross being the symbol for the religion.

The God of the Piscean Age was the Fisher King

The Lamb of God being slain on the cross symbolized the end of the Aries Age, the Ram. This Awareness indicates that the King or God of Piscean Age was a Fisher King; he was an entity who was a fisherman who walked upon the water. In other words, he conquered his emotions; water symbolizing emotions. He was able to have compassion without yielding to the more base emotions. To walk upon the storm meant that he was able to control his emotions and not be hindered by storming emotions.

This Awareness indicates there is a great number of symbolic messages in these stories, but most entities take everything literally, and those who do, get the child version of the Biblical stories, the version intended for children. You will recall that Jesus spoke of "Those who have an ear to hear, let them hear the message" that he had to give. This Awareness indicates that he recognized that most entities would not hear the true messages, but there would still be some levels of information available to entities so that they could get a good understanding of the more shallow meanings in his teachings.

When Jesus Spoke of "Sowing Seeds

When he spoke for example, of "a man who sowed seeds on the ground and some of the seeds fell in rocky places and did not grow; other seeds fell in fertile ground and grew," this entity was speaking of the subconscious; planting concepts or seeds in the subconscious where they could grow, or where they would die, depending on whether the subconscious was prepared to receive that information.

The Hawaiians Recognized Jesus as the Greatest of all Kahunas

This Awareness indicates this is pure Huna. Huna philosophy describes this completely, and it was part of the teaching of this God of the Piscean Age. There are many things that entities could learn by studying the book The Huna Code in Religion, by Max Freedom Long. This Awareness indicates when you read it, think in terms of the Christian religion, for the entity Jesus as symbolized in this message or in this religious work, is, and was recognized by the Hawaiians in the last century, when they first were introduced to the Bible teachings. They

saw him as the greatest Kahuna that ever lived, because for them, it was a familiar story relating to their own philosophy, and they understood his teachings as being very clear.

This Awareness indicates it is only fair that entities who are familiar with the Christian teachings should also look at the Hawaiian philosophy as given in their language, and interpreted and analyzed by the entity Max Freedom Long in his books *The Secret Science Behind Miracles*, and *The Huna Code in Religions*.

This Awareness indicates these are available through the CAC library or book sales.

WHAT WAS NEFERTITI REALLY LIKE?

QUESTION:

One last question from Lenore M. She writes: "What was Nefertiti really like? The legendary beauty and wife of Akhnaton and mother of his 6 children, including, yes, the boy King, King Tut. Quite an illustrious family! Why this family, more than any other that has captured the modern mind? Is their story over, or is there a legacy yet to be discovered, ennobled, or activated?"

COSMIC AWARENESS:

This Awareness indicates one reason these entities have captured the modern mind is because so many replicas of their appearance is available. The King Tut treasures for example, are enormous in comparison to that legacy left by others. Nefertiti is clearly shown in her great beauty, and Akhnaton is seen as the man who created the concept of One God, which had not yet been espoused in human history.

This Awareness indicates that these are indeed reasons for the great attention to this family.

FOLLOW-UP QUESTION:

Is their story over, or is there a legacy yet to be discovered?

COSMIC AWARENESS:

This Awareness indicates it is very likely that more information about these entities will eventually come out, but essentially, without making up some entertainment for entities, there is not a great fantasy story or fantastic story to add to what is already known about these entities. Perhaps the entity wishes to have a movie made relating to these entities so there can be more speculation and more substance to them, but this Awareness indicates the bones of information are there. If you want more meat on the bones, that can be put in through your own channeling and imagination, but as far as any new bone structures to add to this story; what more can be given?

This Awareness indicates *It* does not see that there were any great affairs or wars or any major unusual vacations or experiences these entities endured. *It* does not see them as time travelers in the sense of something traumatic or adventurous; it simply appears that they are, or were, as reported. Of course, these entities have had other lives before and after these experiences, but these were the more notable expressions for these entities.

DON'T GET FIXATED ON ANCIENT EGYPT—IT'S DANGEROUS

CLOSING MESSAGE:

This Awareness suggests that entities not become too fixated on ancient Egypt, because they can be pulled back into the mysteries, and the mysteries themselves can be harmful if entities get locked into or dwell on these mysteries. The interest in the constructions; the Sphinx for example, the pyramids; this can be beneficial, but this Awareness indicates that getting into the fixation on Egypt can cause entities to feel too identified with the

hierarchy systems and the self-importance that develops when entities begin to think that they may have had a life in Egypt. There's nothing wrong with discovering one has had a life in Egypt, but if one seeks some kind of self-importance for their Egyptian life, it can hinder their further spiritual growth.

Read the Books of Max Freedom Long

This Awareness would suggest rather that you read the works of Max Freedom Long, get better understanding of the basic principles behind the religions of the world as explained in *The Huna Code in Religion*, and from the messages this Awareness has just given, and you will then recognize that the mysteries of Egypt are not that deep, are not that revealing; that *The Huna Code in Religion* can reveal more clarity in these mysteries and take away from the confusion and mystery of Egypt, for this information revealed by Max Freedom Long helps to explain not only the miracles of Jesus, but also the nature of one's own being and how one can be more complete as a Triune Self.

The conscious, subconscious and Superconscious can work together for the benefit of one's total being, and can help one to understand the mysteries of the *New Testament*, of the teachings of the Christ as portrayed in the *New Testament*. It can also help entities to better understand those things of Egypt.

THE COVER PHOTO

Your faithful Correspondence Secretary, Vikki T. has just two TV shows she watches: "Buffy the Vampire Slayer" and "Smallville"-the story of Superman's youth. Every Tuesday night she stops work, drags out her old recliner, stretches out by the furnace, relaxes and watches the show. But never alone. Soon comes her two cats, Wilber and Abigail (who has just presented her with 5 kittens, and always her loving 70 pound hound "The Bear" who seems to believe he's a lap dog and climbs aboard.

Excerpt from CAC Reading 6-7-20-92 Paul Shockley Interpreter

PONDER SAYS EXPECT SOMETHING BACK WHEN YOU GIVE

(She Says the Key to Wealth is Tithing)

QUESTION:

A question from Jerry Korkos in New York City. He writes: "I have bought the three book by Catherine Ponders that CAC offers: *Dynamic Laws Of Prosperity*; *Prosperity Secrets of The Ages*; and *Secrets Of Unlimited Prosperity*.

"In these books, Ponders says that the key to wealth is tithing and expecting to receive what you have given to return to you many times over. She also states that achieving the correct state of mind is important as well, but tithing and expecting to get something back for what you have given is the main object of her books.

"My question to Awareness is: If we give, expecting to get something back, does this not take away something from the process of giving, or is it truly a Universal Law, as Ponders claims, that allows us to get, when we give? Please elaborate on this matter."

COSMIC AWARENESS:

This Awareness indicates that there is a law involved in this. It is the *Law Of The Vacuum*; that when something is given, you have created a vacuum which demands replacement. This Awareness indicates that by giving something away from that which you hold dear, you create an opening by which you feel you deserve something in return and you have the emptiness of vacuum whereby the something can be brought in to fill that void.

This Awareness indicates that it is for you to describe in a reasonable way what you think the void should be filled with. You do not need to take garbage in return to fill the void which perhaps was emptied of treasure. You can describe/define what you will allow in the void of your life, and you may be particular as to what comes in to fill that void.

This Awareness suggests you think of it as: "I'm getting rid of this to make room for something I desire more." It does not have to relate entirely to money. It can relate to other things of precious value to you. This Awareness indicates that other attitudes in the consciousness of an individual can also have an effect in describing what comes in.

If an entity gives something precious away and feels resentful or feels cheated or feels a need to complain, then the entity has in some way already filled the void with bitterness, anxiety or negativity and may not receive back the full benefits that could be available to him or her, if he or she had a more positive attitude about it.

This Awareness indicates in some situations, rather than having equal gift returned for energy given, the

entity might receive an opportunity for a bigger gift and will need to be ready to act on the opportunity.

ISN'T PONDER'S SUGGESTION CONTRARY TO THE "LAW OF GRATITUDE?"

(Resentment When CAC Charges For the Newsletter)

FOLLOW-UP QUESTION:

This line where he says: "Ponders advocates conditioning the mind to expect something in return"... isn't this contrary to the *Law of Gratitude*?

COSMIC AWARENESS:

This Awareness indicates that it is contrary to the admonition of some teachings that suggest you cast your bread upon the water and let it go, not knowing whether anything will be returned or not; this is an admonition of the true gift of the consciousness involved in the true gift.

This Awareness indicates that when a gift is given with strings attached it often is given with a responsibility tied to the receiver of the gift. She is not advocating that you tie a string to your gift, forcing the recipient of the gift to be responsible for fulfilling the expectations you hold. She is simply saying that you give the gift and expect to be rewarded for doing so. The expectation has much to do with programming your subconscious to expect something to be returned.

This Awareness indicates this is commonly used in the Huna healing techniques, wherein a practitioner of Huna will tell the person seeking help that they must give up something of value in order to get their prayer answered. This Awareness indicates that it is essentially the same; that they could tell the person: "Give up something of value and expect your prayer to be answered."

This Awareness indicates that it is just a different way of saying the same thing. In this case, they are saying that you give up your tithe and expect it to be returned. In the Huna prayer they are generally saying: "You must create a sense of worthiness to have your prayer answered." Therefore, if you want your prayer answered, you should give up something to feel worthy of this blessing.

Why Tithing is Important

This Awareness indicates that the tithe to churches is what has allowed the spiritual messages and teachings to survive from generation to generation on this earth. It is to a church what taxes are to a nation. You can imagine the quandary a nation would have if it was decided by the people of the nation that they would no longer pay any taxes and would no longer give support to the nation.

This Awareness indicates that for an organization to function without any significant support is tantamount to telling the organization: "We want what you can give us, but we don't want to give anything for it." Indeed, there have been some entities who have essentially written such letters to CAC. They become angry that spiritual information should cost anything, as if it had no value and should not require any support.

Where do they think the funds come from that allows the spiritual organization to provide the messages to them? This Awareness indicates that in these days, it is very difficult for spiritual organizations and churches to survive, unless they use some kind of unusual gimmick or have vast donations that are turned over strictly to raising more funds, such as using donations to buy time on television or advertisement.

This Awareness indicates that some of this may be the fallout from television evangelists who have, in some

cases, misused funds that were donated, but to punish small organizations who have essentially been using their own money to supplement the organizational finances and expecting the officers of the organizations to fund their own organization is like asking someone to "Start a church for me and pay for everything, and I'll read your material."

This Awareness indicates there is a strange attitude in the land in these times, and it may be spelling doom for spiritual organizations in the coming years if this does not change. This Awareness indicates in times past, entities would often need to spend enormous sums of money to go into foreign lands to seek a teacher, to receive messages of a nature similar to those which entities receive here through this organization for pennies per issue.

This Awareness indicates that yet, there are many who resent the few dollars per year that are asked to help promote the newsletter, and yet they would still spend money they have saved for sports events, theatrical events, for traveling to other places, to attend a seminar, to receive information that may be far less meaningful to them in their lives, or to have a good time on the town for an evening or two.

It is very easy for entities to spend thirty or fifty dollars having a night on the town, and yet they resent spending thirty dollars for a year of information that can last throughout their lifetime. This Awareness indicates that the information they even acknowledge is priceless, while still feeling a resentment at offering payment for it.

This Awareness indicates it is something that is beyond the comprehension of this Awareness; one of those rare things.

QUESTIONER (AVATON):

Yes, some have said it's so priceless that there's no way they could pay what it's worth, and therefore, they won't pay anything. There's a certain consciousness we've noticed over the years about spiritual information. There's certain people; I don't know where they got the idea; perhaps because maybe Awareness has said the information has been given freely and shall be freely given; but there's a certain consciousness that believes that spiritual information should be available to everybody and they shouldn't have to pay for it.

COSMIC AWARENESS:

This Awareness indicates this may be so, but the printing costs are not free, even to the organization, nor are the mailing costs, nor is the cost of putting the mailing together, and the transcription of the message, the taping of the message; all of this requires individual work, labor, effort and cost.

You cannot expect the post office to cooperate in sending these messages out freely through their mail system which they regulate under a commercial activity. You cannot expect the printers to print the information freely. Given freely simply means that it is given without holding it up to enormous prices that are exceeding that which is a reasonable cost for delivery.

This Awareness suggests that many entities who feel this way should take it upon themselves to start a newsletter and distribute it freely and see how long they can continue that service to see what it feels like and how practical it is, how possible it is for them to feel their same attitude when the shoe is on their own foot, when the responsibility is theirs.

This Awareness indicates that the amount of information being given in terms of pages per year is far in excess of the cost charged by this organization. The information essentially is being given free, but the cost of giving, or presenting the information, of putting it on paper, is something else.

This Awareness indicates if you were to somehow commission the Interpreter to do these readings for you in an attitude of giving freely, which is not really his responsibility, but if you could talk the Interpreter into giving these readings freely, you would still have to pay for some way of being there to hear the message or getting the message to yourself so that you could read or hear what is said.

There is a cost in transferring information. This Awareness indicates that the concept of giving freely means that this Awareness gives it freely. *It* does not ask you to sacrifice your lives for it. *It* does not ask you to give up your lifestyle, to abide by certain codes of ethics. *It* does not tell you you must obey this Awareness. *It* does not tell you you must abide by certain directives or orders or commandments that this Awareness gives.

It does not take from you. *It* gives freely. This Awareness indicates that those who work and put their time and energies into helping to manifest the messages from this Awareness deserve to be paid. They do not take pay in this organization for their labor. They simply charge enough to make sure that the organization can continue its work.

This Awareness indicates the Interpreter is paid for giving these readings, and the money that is given to the Interpreter goes to support his church which he founded, and the expense therein. This Awareness indicates that even if these entities charged by the hour for their time and effort, it would still be a bargain for you and you still would be receiving from this Awareness spiritual information given freely.

This Awareness indicates that there are even some entities who have tried to get these messages given to them freely so that they could put it into a course, a study course; they sought to have this Awareness give messages that could go into a study course for which they could charge from their members, and when the discussion came to what they would pay for these messages that they were going to charge for, they exploded with surprise: "You mean, you're going to charge for this kind of information? How can you think of charging for spiritual information?" But that is exactly what they planned to do with the information, once they got it.

This Awareness indicates it is true: People have a strange double standard when it comes to spiritual information. They believe they have a right to the information and that it should be given freely, and yet they don't want anyone who helps gather that information to have any control over it, or to charge for it, but they themselves don't know how to get the information, and if they could get it freely from their own channels, they would want to charge for it. So what is going on here?

This Awareness indicates that if an entity wishes to attune to this Awareness and get information free of charge, this Awareness will give the information freely, but in most cases, a message such as this will invite entities to contact the Interpreter or those at *Cosmic Awareness Communications* with questions: "Okay! Awareness said I could get information through my own channel freely. Now it's up to you to show me how!";

and thus, they seek, through others' energies again, to get something for nothing.

This Awareness indicates there is no something for nothing. Everything requires that you give something to get something, and why should it be otherwise?

JESUS WENT TO MYSTERY SCHOOLS: DID PAUL SHOCKLEY?

(Strange Logic About Channeling the Awareness Force)

QUESTION:

Jerry Korkos has another question. "Awareness has stated that *It* was channeled by Jesus. Awareness has also stated that Jesus was not born knowing the truths he taught. He had to go to mystery schools to learn these truths, even though he channeled Awareness.

"How come Paul Shockley did not have to go to these mystery schools to be able to speak these same truths? Did Awareness act through Jesus in a different way? Please explain."

COSMIC AWARENESS:

This Awareness indicates that the entity is distorting and putting words in the mouth of this Awareness. This Awareness indicates *It* is the *energy* that spoke through many avatars in the past. *It* did not require Jesus to go to mystery schools. The fact that the entity went to mystery schools enhanced his capacity to be a clear and open channel for the Christ Consciousness.

This Awareness indicates the entity who is serving as an Interpreter also went through certain training through the Development Classes and through training from the previous Interpreter, David Worchester and his assistant Vern Christianson who helped the entity enter in to an Awareness trance for the first time.

It was several years later before this entity, the Interpreter, became able to channel with words, to channel messages. This Awareness indicates that the Universal Consciousness, or Awareness, is not confined to an exclusive club of individuals. This Awareness indicates that *any* individual, any child, any artist, any person who is open enough can come in contact with this Awareness and can express information that is learned from that contact.

This Awareness indicates that there are some benefits to being familiar with certain aspects of the readings. There are benefits in being directed along certain lines such as the Development Classes. There are benefits in having oneself guided into a trance state so that messages can be delivered.

This Awareness indicates that there are a number of people who have in Development Classes and otherwise, who have touched into the Cosmic Awareness levels. There are not a great number who could put their experiences into words, or who found it comfortable or who, in putting into words what they were experiencing could easily remain.

When the Interpreter Helped Develop Other "Interpreters"

Many found that when they began to speak, they were jerked from the Cosmic Awareness consciousness and back into their personal body. This Awareness indicates that it is not easy to train entities to remain in the Cosmic Awareness state while speaking. The Interpreter has attempted to help entities do this on a number of occasions. One such occasion created a channel who began, within two weeks after the Interpreter had invested considerable time in helping her to learn to speak while still in trance, within two weeks the entity was giving readings denouncing the Interpreter that had

helped her, and saying that he was phony and that she was the true Interpreter for this Awareness.

This Awareness indicates that on other occasions, the Interpreter helped others to enter into trance and to learn to speak while in the trance, and found that these entities also soon began to give messages that were not clear and truly linked to this Awareness. The entities began to give frightening scenarios and earth-shaking messages that were designed simply for attention and ego powers. They built up a certain following based on the frightful messages they were giving, predicting earthquakes and destruction in a matter of weeks or days, and it was simply for the attention that the entity sought in the new role of channel.

This Awareness indicates that it has not worked out well for the Interpreter to try to help entities become channels for this Awareness. It has generally been very difficult for those who have consulted the channels which the Interpreter has helped to launch. This Awareness indicates that it is not a matter of going to a secret school. It is a matter of the total composite and makeup of an entity as to whether the entity is suitable or ready to be a channel for this Awareness.

This Awareness indicates that almost anyone could be helped to become attuned to this Awareness, but not very many could be directed and trained to be good Interpreters.

Does Cosmic Awareness Have Emotions?

(How About Attachments?)

QUESTION:

A question from Nicholas Lucia. He writes: "In issue #85-13, I quote: "This Awareness does not have emotion." This is, I assume, a figurative expression denying negative emotions, for does not Awareness send love to all, abhors cruelty and likes "grapes, moon and sunshine"? These are emotions."

COSMIC AWARENESS:

This Awareness indicates the concept of emotion is that which is associated with attachment, attachment to that which is desire or attachment to that which is abhorred or feared. This Awareness indicates these attachments create emotions. In order for entities to contact this Awareness, it is necessary that they place aside mind, emotion and feeling.

Mind is that which is belief or concepts and ideas. Set these aside long enough to let the Awareness concepts and ideas be presented in place of their own concepts, ideas and beliefs. They must also place aside emotion, or attachments. This Awareness has attachments in the sense of that which is on a universal level. *It* has the capacity to move into a state of awareness with attachment, or aware of attachment, and therefore, *It* can move into levels of consciousness of emotions.

The Six Levels of Consciousness

It can move into that which is the 6th level of consciousness. This Awareness would explain this more in detail. Mind is the first level. It is the focal point and correlates with the mineral level, and the mineral level is made up of focal points which are called matter.

The attachments that entities feel are emotions and that is the second level of consciousness. Emotion as the second level, is made up of attachment and correlates to the vegetable kingdom, because vegetation is almost always attached to something.

Feeling correlates to the animal kingdom and is the third level of awareness. The feeling level is that which reacts to those occurrences around the entity, much in

the way that an animal reacts to events in the animal kingdom.

The fourth level is the level of awareness. It is beyond mind, emotion and feeling, and is a pure state of consciousness. It has no attachments. It has no mind involved, and it has no feeling level involved. It is that state of consciousness that is akin to the catatonic state. It is a pure openness.

Entities can move to this level, this fourth level, and experience pure consciousness.

The fifth level is that where the pure consciousness moves in and takes up feeling. It is conscious of feeling, but is not attached to it. It simply examines it and holds it. It can put it down as easily as it picks it up. It knows there are things that are happening around, but it also knows that it needs not be caught by these feelings or controlled or influenced by feelings.

The 6th Level Picks Up Attachments of Emotion

The 6th level is that of awareness of emotion, wherein the awareness, the pure consciousness can pick up attachments, hold these attachments, examine these attachments, be aware of attachments, understand and know and express these attachments of emotion.

Thus, one can, with a level of awareness, express emotion without being caught by the emotion, without being controlled by the emotion, without being manipulated or influenced by the emotion. It is like one who can put on a jacket, knowing full well that the jacket is not part of himself, and that he can take it off as easily as he put it on.

Many entities involved in the second level, the level of emotion, find it impossible to take off these emotions, but in the awareness level of emotion, the entity can put on or take off the emotion, the attachment, without any problem.

This Awareness indicates the 5th level is the level known as awareness of feeling, and here the entity can respond to that which is occurring around him, can react. But the reaction is with an awareness, and not because the events or environment stirred his or her feelings to the point of demanding reaction.

The entity can also totally avoid response. This is the 5th level. The 6th level is awareness of emotion, and the 7th level being awareness of mind. The awareness of mind level in the 7th level of awareness is that in which awareness simply watches the mind, lets it engage itself in thought, belief and ideas, and simply watches; it does not judge. It does not condemn. It does not think about the mind thinking, for any thought about the mind thinking is still a level of thought.

It is simply observant of the mind as it thinks, as it believes or as it focuses. This 7th level, wherein consciousness watches the mind as it does its things as that which liberates the entity from being caught by the mind, identified with the mind, or from feeling, controlled by the mind.

Looking at the Mind on the 7th Level

Too many entities think that they are their minds. That whatever the mind thinks IS them, and the entity who is in this 7th level of consciousness looks at the mind and recognizes that it does something separately on its own and can observe the mind with a kind of detachment and this level of awareness that watches the mind is much like the woman who watches her washing machine and does not feel it is part of her.

The washing machine does what it does, and she is aware of its doing, and she can examine what it does and

understand what it does without having to get in and join in what it does.

This Awareness indicates that if an entity starts to think about what the mind is doing, the entity has joined and is part of the mind and becomes tied up with mind, but if the entity simply *observes* the mind and its doing, it gradually brings the mind into a state of poise so that it does not thrash around needlessly and instead begins to work with greater poise and harmony.

The 8th Level of Consciousness: Cosmic Awareness

This Awareness indicates of course the 8th level is that which oversees all of these. It is a higher state of awareness that serves as a kind of Higher Self or Christ Consciousness that engages all of these levels under an umbrella of Cosmic Consciousness, of Christ Consciousness or Cosmic Awareness Consciousness so that the entity can move through mundane situations and remain attuned to these higher levels of consciousness.

This Awareness indicates that if this has not clarified the entity's question, that the question be repeated for further clarification.

QUESTIONER:

I think *It* answered the question. The original question had an invalid premise to begin with.

The "Energies" Mentioned by Awareness (How Awareness Answers Your Questions)

QUESTION:

A question from ... oh. This entity does have another question. He writes: "From a reading: 'Energies are not strong, are not seen.' What kind of energies must be given to Awareness before *It* can comment on a subject, and why is Awareness not able to create this energy itself or obtain it from the Akashic Record?"

COSMIC AWARENESS:

This Awareness indicates that the voice you hear is coming from the Interpreter. This Awareness gives energies that are presented from the questions asked. If the questions are poorly designed or have not been energized properly, if there is little energy on the question, this Awareness does not reflect this or magnify these energies for the Interpreter to read.

This Awareness suggests that the questioner assumes that this Awareness is some kind of dynamic Greek God who has the capacity to take something and change it, to enhance energies and so forth. The Awareness is what *It* calls *Itself*. *It* is Awareness. *It* is an Awareness of the energy that is presented in the question, and if the energy in the question has not been energized clearly or strongly, that is what the Interpreter gets to work with.

If the Interpreter cannot see the energies strongly or clearly, then the message is not strong and clear; the message can be confusing. This Awareness asks you to better understand this by the following: If someone were to walk up to you on the street and ask you: "What do you think of things?", would you be able to answer that question clearly and precisely, or would you not be confused, wondering what is meant by the question?

What is meant by the word "things?" And what does this entity mean when he asks you: "What do you think of things?" This Awareness indicates that supposing another entity walked up to you thereafter and asked: "What did you think of the game last night? I saw you there and I know you were watching. So what did you think of it?"

Now you can answer more clearly and precisely because you know what the question is asking. You have some frame of reference. But the entity who asks: "What

do you think of things?", gave you very little to understand in terms of his true meaning.

How the Subject of UFOs Was Energized

This Awareness indicates that often, it is necessary for energies to wait and to settle on something whereby questions can be asked about something and very little information or energy is seen. This Awareness indicates that entities were asking questions about UFOs as early as the mid-70's and this Awareness did not give much information. And entities continued to persist in questions about UFOs over long periods of time.

All of these questions helped to energize the energy needed for later releasing information on UFOs. It was not until the 90's that information on UFOs became really clear and energies became strong, whereby the Interpreter could read these messages on UFOs. This Awareness indicates that it is simply a situation that energies are read, or seen or perceived, and interpreted by the Interpreter.

This Awareness helps the Interpreter to interpret these energies. If the energies aren't there, the Interpreter cannot interpret, even with the presence of this Awareness. This Awareness wishes you to understand. *It* is not a humanoid type of entity sitting in another dimension with the Interpreter, talking over your questions and giving the Interpreter an answer.

Cosmic Awareness Defines Itself as An Invisible Force

This would be a kind of mythical fantasy or personification that children might like to understand or might comprehend, but it is not the way things are. *It* is an invisible force known as Awareness. *It* can be Cosmic in nature, or *It* can be focused on a question of a more mundane nature, and when focused on a mundane question, *It* is not actually experiencing Cosmic proportions.

When *Its* focus changes, *It* may experience Cosmic proportions and put the mundane question into Cosmic proportions. This Awareness indicates that if this has not clarified the issue or question, that it may be subject for further questioning.

When the Readers Energize Their Questions

QUESTIONER:

I was wondering that if the questions that the readers send in; I know that some of them are just dashed off the top of their heads. Others they have set down and thought them out carefully and written them out in long-hand. If Awareness, when *It* talks of energizing, if the person who sends in a question sits down and thinks about it, and mulls over it and then writes it out as succinctly as possible, does *It* tap into the energy at that level, or does the energy just come from the energizers here, who energize and read the questions?

COSMIC AWARENESS:

This Awareness indicates it is a combination. The entities who ask the question; if they energize the question before sending it, help to give the question a certain amount of energy. If the question is of a type that has not been energized by the mass of consciousness, in other words, if it is a question about something that is generally unknown in the mass of consciousness, it may require more energizing.

Usually, if a question is something that is in the news or the mass of consciousness is aware of, there is usually sufficient energy to supply an answer without further energizing. This Awareness indicates that for example, if an entity sends in a question about something that is not known in the rest of consciousness; for example, the entity may have a pet dog and want to know something

about this pet dog; this is not something that is commonly available in the mass of consciousness, therefore, there has been very little energy put on it other than that of the questioner.

Thus, it may require that the energizers in the room also focus on this question to help energize it. In some cases, even that may not be enough, and this Awareness will suggest that the question be re-asked at a later time when more energy is available.

Sometimes, the Interpreter may be low on energy and need to re-energize before being able to answer that question. This Awareness indicates it is cumbersome not to have sufficient energy to answer every question on call through this method of trance reading, but it does have certain advantages, and therefore, you simply have to live within the parameters of the situation or forget the whole thing, and find answers elsewhere.

Does Awareness Experience Boredom?

FOLLOW-UP QUESTION:

Does Awareness ever experience boredom from the endless questioning?

COSMIC AWARENESS:

This Awareness indicates *It* does not normally experience boredom. *It* sometimes experiences that which may be akin to your term 'exasperation', wherein someone is seeking to get a particular answer from this Awareness and this Awareness does not see that answer as being appropriate and the entity's question keeps coming back in different forms in an effort to get the answer they want and this sometimes is akin to that which you call a feeling of exasperation.

When such a feeling becomes too strong, it hinders the trance level and causes the Interpreter and this Awareness to separate somewhat. It helps to break the alignment of the two. Thus, a trance could be interrupted from such efforts to get an answer that is not in the will of this Awareness.

His Prayers and Meditations Did Not Prevent the Gulf War: Is Hope all We Have Left?

QUESTION:

A question from Will Berlinghof, a member in England. I'll read his letter, because the question might be clearer. He writes: "Dear Vicki, Avaton and Paul. Greetings from England. Well, it's that time of year again, time to pay my dues. Unfortunately, I'm going to have to drop my subscription to family level, \$52.00; as I'm a little strapped for cash. My money order reflects this but I have included an extra \$23 to cover postage. When, and if, I can, I will send some extra contributions to the 'The Cause', as I still believe wholeheartedly that C.A.C. is the best organization around and fully deserves my support. I'll just have to see what the year brings.

"A lot has happened since last I wrote. The War in the Middle East has come and gone and it certainly was an exercise in futility. Over here there was wide popular support for the Allies and very little understanding or appreciation for the real reasons behind it all. Perhaps the biggest irony of the war as far as Britain was concerned was the killing of 9 of the British Forces by 'friendly fire', namely an American tank buster plane which destroyed 2 British A.P.C.'s. The irony was that only 15 Brits were killed in the ground war! It's a good thing the war didn't carry on much longer, who knows how many would have been killed by 'friendly fire!'"

On the whole I found the whole thing utterly frustrating and soul destroying. I did send White Light to the region, leaders and Kahuna Ring, all without much results it would seem. It's times like these that we, beings seeking Awareness and Understanding, are most pressed in our beliefs. I know that I was. Is insanity really still the only way in this world? Do we have no effect on the course of events? Are we doomed to be sacrificial puppets to corrupt leaders and causes the world over? I hope not. This leads me to a question for Awareness. I know that Awareness states that we *do* have an effect with our meditations for Peace. But in times like these, despite all our efforts and attempts, does Awareness have any suggestions or insight of what to do when things still go wrong? I know that at the core of it all one must still have faith that one had an effect.

"Is faith then, what it's all about? Faith that, despite all, things will still work out for the best. This is perhaps a pressing question at this time especially in regard to the alien presence and their plans. If we are demoralized due to our apparent lack of success in regards our own world situation, specifically, in this case, the Gulf War, how do we keep up morale for the far greater crisis of an alien invasion? I would appreciate any comments Awareness may have on this manner. Thank you."

COSMIC AWARENESS:

This Awareness indicates that this is likened unto the voice crying in the wilderness; that there is always the minority and that entities who are the minority always feel they are not being heard. This Awareness indicates that the minority is often out in the lead and others have not yet arrived. This Awareness suggests that your meditations in regard to the war may not have gone unheard or unheeded; that were it not for your meditations, you have no way of knowing how many others might have been killed or how much longer the war might have gone on.

This Awareness indicates that you are making judgments that your meditations were not working because the war occurred. This Awareness indicates that this may

simply be a part of your own ego problem, as is the case of many who felt that their peace marches and efforts should have been able to stop the war and felt themselves stripped of power or even psychologically raped because they could not stop it. This Awareness indicates that it is the belief that many have that they have more power than they actually do have, and many who think that they have more power and control over their lives, or who want to be able to control their lives, do not like to admit that their power is limited.

This Awareness indicates that there are many who were extremely distraught that they could not stop the war from occurring, when they were so intent and trying so hard. This Awareness indicates that in part, it was almost inevitable because of the overpowering force promoting the war. This Awareness indicates that to stop a war takes more than one or two people trying. It may take more than several thousand trying, and if the majority wants the war, even a hundred thousand or several millions could not stop the war from occurring.

This Awareness suggests you not belittle yourself because you do not have the control over your life that you would like to have, or because you do not have the power, even through spiritual means that you would hope to have. This Awareness suggests that you be more realistic and recognize that your voice *was* expressed. It *was* heard, even if it was not heard over the roar of the crowd, even if it was drowned out except to a few near you.

A Small Voice Crying in the Wilderness Starts the Change (Remember How Just a Few Helped End the Vietnam War)

This Awareness indicates it is always the case that when consciousness changes, it does not change suddenly, with the majority suddenly changing the consciousness to go a different way. It changes very gradually, with a small voice crying in the wilderness, joined by another and another, and another, until those small voices become louder and more clear, so that eventually they are heard by many more who join in with the chorus.

You will recall that the Vietnam war began with only a small group of protesters, a very small number protesting, and that small number gradually became more vocal and more louder, especially after they were oppressed and opposed by government forces. The Kent State incident and the outspokenness of Senator Wayne Morse and Mark Hatfield began to give more credence to the voices.

The beatings at the Chicago convention; these things began to turn the public against those who would oppress the vocal groups of war protesters, but it was the Pentagon Papers and the release of the Pentagon Papers that really turned around the heads of people to get them to realize they had been sucked into a war that was not justly presented to them, and that they had been deceived.

This Awareness indicates that people tend always to follow their leaders and to trust their leaders, and it is only when entities begin to find out that their leaders have deceived them that they in en masse begin to turn against their leaders. This Awareness indicates that people tend, as flocks of sheep, to follow the victor, and that those who can bring quick victory have great followings. This is not something that you need to blame yourself for, or feel that you have failed in some way. It is something that needs to be recognized.

You did your part. You could not stop a war. Who could? This Awareness indicates that you did your best. This Awareness suggests that there are others who in their own way also tried to stop the war. There were even those on the front lines who did what they could to stop the war, in the way they had left available to them.

This Awareness indicates that at some stages, great movements initiated by those in power begin a flood of energies that become overwhelming which entities cannot stop. That is the nature of power; that those who hold those positions have great leverage. You were not given the kind of power to stop a war. You were given the kind of power to make your voice heard as an individual, one among many.

You expressed your feelings and your opinions, one among many. This Awareness indicates that you were true to yourself, and for that you were courageous and did what you felt you had to do. You should feel quite good about your action, and not feel belittled because you could not stop the war. You were not ever given the power to stop the war.

CAN YOUR ASTROLOGICAL SIGN KILL YOU? (Are Gemini's Really More Suicidal?)

QUESTION (AVATON):

There's a little article in one of the tabloids I'd like to check out and find if this information is valid. It says: "A Top Horoscope Writer Makes A Shocking Discovery: that your astrological sign can kill you. A famous Laguna Beach astrologer has just completed an exhaustive study of horoscope signs and found that certain signs are more suicidal prone than others. "We were able to study over a thousand suicide cases from all over the world," says this man Fickling who has authored 16 books on astrology.

"One quarter of the suicides we studied were Gemini or Cancer people. A person on the cusp between these two signs should be extremely wary of emotional let-downs. Another sign to be cautious with is the extremely sensitive Leo. You should never push the Leo or make too many demands. They break easily. Fickling's studies revealed that the 1220 suicides were divided among the astrological signs as follows: Gemini, 157; Cancer, 151; Leo, 126; Pisces, 119; Aquarius, 112; Sagittarius, 106; Aries, 97; Virgo, 88; Scorpio, 79; Taurus, 65; Capricorn, 61; Libra, 59.

"Not even great movie stars are immune to the influence of the stars," he said, "Marilyn Monroe, Judy Garland, Errol Flynn were all self-destructive, and they were all Geminis. I was worried when I worked with Marilyn on the set of the *Misfits* about her complicated depression. She was using too many pills and mixing them with alcohol. She was warned, but it's nearly impossible to change a Gemini's thinking once it has become isolated and dangerously morbid. Actor Freddy Prinze was on the cusp of Gemini and Cancer and wound up in violent self-destruction."

Would Awareness please comment on that article?

COSMIC AWARENESS:

This Awareness indicates that there is a correlation in regard to the cases which this entity studied and that in general, the correlation is significant. This Awareness suggests, however, that it is not as a total accuracy; that more case studies would reveal different combinations although the generalities might remain significantly similar. This Awareness indicates that this is not necessarily an accurate portrayal for the signs themselves however, as each of these signs is influenced by patterns that develop during certain periods. For example, there are planetary aspects or collections of aspects in relation to a particular sign that develop over a period of time which would influence that sign.

This Awareness indicates for example, the collection of Uranus, Saturn, and Neptune in Sagittarius for a long duration, or in Capricorn for a long duration, or in Scorpio for a long duration, would have an influence on the other signs in such a manner that as they move from one of these areas to another, such as these planets moving from Scorpio into Sagittarius, or into Capricorn; the effects on the signs would be different, depending on where that collection of planets might be, and therefore, at certain periods of time, the suicidal rate for one sign might increase, whereas when these planets move to other positions in the zodiacs the suicidal rates for other signs might increase, and the first sign might decrease.

This Awareness indicates in other words, you cannot go by one aspect alone. You cannot assume that the sun sign is divorced from the positions of planets in other signs, therefore, if you are to do this type of research, these suicidal statistics must be taken at random over long periods of time, wherein the planets are not bunched in certain areas for long durations so that you have a base that is representative of aspects of a wide variety. This Awareness indicates in other words, if one chose suicidal persons out of the last century, out of the early part of the century, out of the mid-part of this century, on a periodic basis, such as every 50 years, or every 30 years, one would receive a different set of statistics than if one chose suicides from the past 20 years, for example, or the past 10 years, or even the past 30 years.

This Awareness indicates there are other aspects at work besides just the sun-sign influence. This Awareness suggests therefore, to have a more accurate sampling, if one were to take a thousand suicides, with half of these coming from this century, and half from the last century, and spreading these 500 suicides evenly throughout this century, so that the birthdays were selected, a certain number out of each decade, with those numbers totalling 500, such as, for examples 50 from each decade, and 50 from each decade of the previous century, creating a total of 1,000, then one would have a proper composite or base from which to make more accurate statistical readings, for these various astrological influences would then be better balanced than if one were to choose astrological influences that affect entities who were born, for example, between 1940 and 1960, for those entities born within that period, might be more inclined to suicide because of the placement of other planets during that time period so that the Geminis or the Cancer types might in fact be being influenced by something other than their own sun sign, might be influenced by the placement of other planets in relation to the sun.

HOW COME THE CAC EDITOR HAS NEVER COMMITTED SUICIDE?

FOLLOW-UP STATEMENT: (AVATON)

I was particularly interested in this article because the one they claim is the most dangerous is Gemini, and particularly a person on the cusp between these two signs—Gemini and Cancer—which is *exactly* where I am, (June 20th) but I've never, as far as I can recall, gone through any kind of depression or feeling of suicide, so evidently it doesn't apply to everybody.

COSMIC AWARENESS:

This Awareness indicates there are other aspects at work; that were certain other elements in your chart different from what they are, there might be the kind of mentality, feeling and moodiness that would incline one toward suicide. This Awareness indicates that your particular chart, as with many others born in this time

period, does not contain those other ingredients or aspects with other signs and planet placements which would incline you in this direction. The danger with statistics given in this nature is that they, like many other things, carry a suggestive influence, and for you, this suggestive influence can be dismissed easily, but for a young person of ten to twelve years of age reading such information, it might cause the entity to become concerned, worried, perhaps obsessed with the fear of suicide, and then eventually, with the extreme obsession, a suicide.

How to Throw Off the influence of Suggestion

This Awareness indicates that this can be dangerous for some entities who are affected by suggestions, to have this kind of information presented. It is best when you receive information that is of a negative nature in terms of some statistical information, that you look at this as a kind of challenge, saying: "Well, I may be in the category, but it doesn't include me" and you may that way throw off the influence of suggestion. It is better to do this than to become concerned.

This Awareness indicates, for example, occasionally there are other indicators printed in these tabloids which allegedly tell you how long you will live. One, for example, defining the size of your feet as an indicator of your life-span. Another, stating that your sign shows how long you will live; this not related to suicide. None of these things is fixed or as being certain. These are just statistical gatherings, and the means by which entities gather statistics is not always accurate or fully representative. For one to stake much credit in such statistics, a large sample needs to be taken. The sample needs to be free of any other unrecognized influences that might be present.

For example, if the statistics were taken from a particular class of people in a certain area, it could well be that the size of footprints of these people fits within certain categories in a manner that does not necessarily represent their life span, but represents the number of entities having certain footprint sizes, and if such entities having certain footprint sizes outnumber others with different footprint sizes, it may be that their lifespan, because of greater deaths among the population with greater number of average footprints is read as implying that people with average footprints die more often or more of them die at early ages than those with other sized footprints. When in fact it is simply that there are more entities with the smaller or larger footprints, and therefore, the effect of the greater number causes the appearance of more early deaths.

Social Indicators Must Also be Recognized

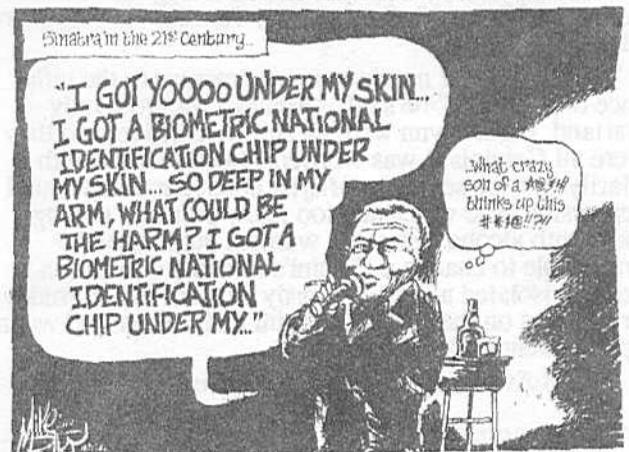

This Awareness indicates that likewise, there can be social indicators that are not recognized within a sampling. For example, entities living in a society in which there is a demand for physical labor and smaller people are unable to hold up under the rigors of such labor, these people may not live as long as those who are taller and therefore, one might presume that because the entity is taller and also bigger and stronger, they might presume that small people don't live as long as large people, if they do not know all of the facts as to why these entities died at earlier ages. This Awareness indicates therefore, you cannot always put too much credence in statistics without first investigating the total situation as to why certain phenomena occurred.

This Awareness indicates that in general however, the phenomena and the statistics are worth considering as having a certain amount of validity, but to extrapolate and presume that because one thousand people fit into this classification and these statistic patterns, that all of humanity will fit into that same statistic pattern; this is overreaching and it may be totally in error when speaking in terms of all people, for one thousand samples is very small in comparison to 5 billion persons on earth.

WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the interpreters necessarily agree with the statements of Cosmic Awareness. The interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

—HOW TO GET THIS NEWSLETTER BY MAIL— EVERY 4 WEEKS! (More or Less)

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will all be asked at the Passing Over).

MEMBERSHIPS AVAILABLE (Honor System!)

- INDIVIDUAL: \$42 per year or \$12 quarterly
- FAMILY: \$52 per year or \$20 quarterly
- CONTRIBUTING: \$77 per year or \$25 quarterly
- SPONSORING: \$144 per year or \$40 per quarter
- BENEFACTOR: \$500 per year or \$150 per quarter
- PATRON: \$1000 per year or \$250 per quarter
- ANGEL: \$5000 per year or \$1500 per quarter
- LIMITED INCOME: \$30 PER YEAR OR \$9.00 QUARTERLY
