## Life on the Hell Planes of Limbo

### THE CONCEPT OF PERSISTENCE (More on The Failure to Achieve Something)

#### COSMIC AWARENESS:

This Awareness suggests that entities consider that concept known as persistence. This Awareness indicates that persistence is that which is related to the idea of inertia, wherein something is maintained for a long enough time; that it becomes relatively well-established.

This Awareness indicates that persistence as that which exists only in relation to a time requirement necessary for the purpose implied by the persistence. This Awareness indicates that the persistence may only require a movement of a few minutes in some circumstances, but in other circumstances it may require decades or even centuries. This Awareness indicates that in the value of persistence, which is of course, only relative to the requirements of time involved, the entity must have an understanding of what it takes to complete a job or project and thus be willing to expend that amount of time for that completion. This Awareness indicates that there are many entities who would like something worthwhile to occur, and they are good at getting it started, but they do not have the persistence necessary to follow it through. This Awareness indicates in fact, most of the failures entities find in their efforts to achieve something are based on that particular fault of not having the persistence of following through. They give up too soon.

This Awareness indicates there are of course, other causes of failure to achieve something and there are also problems associated with entities who should give up on a project but remain persistent, even though it is obviously not working. This Awareness indicates there is nothing more important than being able to make the right decisions and being very discerning about the circumstances in order to make the right decision. This Awareness indicates that apart from learning and determining the right decision, the persistence factor is that which entities should give great attention to, for often, an entity will give up just short of success, and in the giving up may close all doors for further success, so that the chances are no longer open, the opportunity is no longer available.

This Awareness indicates that entities who can be persistent will also need to have enough understanding and faith in what they are doing to supply the energy for that persistence. This Awareness suggests that as entities enter into a project which they truly believe in, and as they continue to be persistent in their efforts to achieve or acquire or promote that project, others become aware and may add their energies to help in that project.

This Awareness indicates that the value in persistence is that it becomes something stable in one's life, a cause or an action, or a stable quality that continues regardless of whatever else may be happening, and entities around begin to trust in the continuation of that persistence, and they begin to add their energy to help that persistence continue, to help in the goal or purpose so that the stable action becomes also part of their own lives. This Awareness indicates that it is this kind of quality that is one of the major contributors to successful businesses, organizations, and qualities that make for success.

This Awareness indicates that in your meditations, in your spiritual pursuits, if one gives up easily because one does not receive immediate benefits from the meditation, then the entity is not likely to begin again working to achieve something through meditation, but if an entity enters into meditation or the pursuit of some spiritual endeavor and continues this on a regular routine, repeat-

edly, over long periods of time, without ceasing, without giving up, there will come, eventually, a time in which the entity does feel that the effort has paid off and the rewards of their persistence have been delivered.

This Awareness suggests that it is the same in all things. This Awareness suggests that there is, of course, that need to be discerning as to what you are persistent in; that many entities are persistent in taking negative actions in trying to make unreasonable things or negative things work out favorably, and this can be as dangerous as the other is beneficial. This Awareness indicates for example, a person who is into negative antisocial behavior who continues persisting in that course and direction can acquire and accumulate immense amounts of karma which pile up greater and greater on the entity. This Awareness indicates that persistency in this sense is being misused for negative purposes; that it can be as harmful to be persistent in a negative sense, as it is beneficial to be persistent in more positive directions.

This Awareness suggests the questions be asked.

### KYLE GRIFFITH'S CONTROVERSIAL BOOK: SPIRITUAL REVOLUTION

#### QUESTION:

A couple of the members are very concerned about a controversial book that's been published called *Spiritual Revolution* by Kyle and Carry Griffith and I've read this book and it's very hard to formulate questions, because practically everything in it is from a different frame of reference from information I've had, but I'll read this letter from Joe Alexander which briefly explains about the book, and then asks some specific questions. He writes:

"You're going to be getting a lot of questions from readers about a new channeled book called *Spiritual Revolution*. I don't know if I'm the first, but I'm sure I won't be the last. The book is by Kyle and Carry Griffith, and they are advertising it as "the most controversial channeled book of the century". It's dynamite alright! The real authors are said to be a group of spirits from other planets now residing on the earth's astral plane.

"To summarize the book in brief, these spirits call themselves the Invisible College and they are battling another group of astral denizens that they call the Theocrats, for power over earth's affairs. The Invisible College say they are from advanced civilizations with a very high level of technological psychic and ethical development, and they want to liberate earth people from the control of the Theocrats so that a similarly advanced civilization can be created on earth.

"The Theocrats are spirits who do not want to reincarnate, but remain in powerful positions on the astral plane. They can only do this, according to the Invisible College, by eating the souls of other people, to absorb their energy, because according to the book, spirits cannot remain on the astral plane for more than about 50 years before their energy runs out and they must reincarnate to absorb energy from food eaten by a physical body. The Theocrats reportedly have found an alternative in cannibalism, but this is said to give them unbalanced nourishment, so eventually they become insane.

"The Theocrats are said to be ordinary human beings posing as gods in order to dupe religious believers into worshipping them and becoming their slaves and eventually their food, after death. The book differs significantly from most occult literature in describing reincarnation as much more of a risky and chancy business than people

believe. People are not guaranteed of reincarnation, it says, many are eaten by Theocrats and many become lost souls, wandering around helplessly in the astral world until finally they die.

"Those who are not psychically developed, the book says, need the help of friendly spirits in order to reincarnate, similar to the way a blind man would need the help of friends with sight in order to find food in the wilderness, so according to the Invisible College, immortality is a possibility if a soul is able to avoid capture by Theocrats and reincarnate frequently. Otherwise, there is no immortality.

"According to the book, when people have near-death experiences and see relatives, loved ones, saints and so forth, waiting to greet them, they are actually being duped by members of a Theocratic band trying to lure them into the group and thus enslavement. The Invisible College says that through subconscious telepathic influence, they set Western Civilization on the course of technological development and liberal democracy. They say they similarly initiated the psychedelic hippie flower-power New Age spiritual movement in the 1960s to set people on a course of more open-mindedness, independent thinking and idealism, and that now they are similarly launching a great spiritual revolution in hopes of freeing the world from Theocracy forever.

"I feel the book is essentially true and gives some extremely important information but possibly does not give as complete a picture of things as one could desire, but best, if I can ask specific questions, so, could Awareness please comment on the general scenario of the book as I have described it, and especially, is it true that a great many people never reincarnate but die on the astral plane, either eaten by Theocrats or as lost souls?"

#### COSMIC AWARENESS:

This Awareness indicates that this as an interpretation of certain energy forces and fields that may be described in terms of a scenario. This Awareness indicates that much of this is somewhat similar to the information given by Rudolf Steiner; that the names as being different. This Awareness indicates that the difference lies largely in the way in which things are channeled by the different persons doing the channeling. It is much like myths that come down through different cultures which have parallel qualities, qualities which parallel myths from other cultures.

This Awareness indicates both are similar in their echoing affect, echoing the same pattern, even though names and details may be altered between the two different versions. This Awareness indicates that in a general sense, this may be considered as accurate in reference to the fact that there are forces which seek to devour, although it is more like 'use' the energies of individuals, and there are other forces which seek to serve and liberate individuals after the passing over. This Awareness indicates that the terminology of eating the entities is more like symbolic as the actual eating is more of an absorbing, wherein certain dark forces attempt to absorb the energies of those who pass over. This Awareness indicates, however, that in most cases this is not something that happens without an entity's choice. It is more as though the entity gives himself or herself to that dark force by accepting it into his or her life.

This Awareness indicates that by an entity having a strong character of positive qualities there is little or no room for those dark forces to come in and find a safe harbor within the psyche of an individual. This Awareness indicates that the entity then is less likely to give self

to those darker forces. This Awareness indicates that for purposes of simplicity, entities can read this material if it isn't taken as strict literal truth, as so many entities take everything they read, and can benefit from the information. This Awareness indicates the danger lies in entities believing that every word uttered is true and finding that because it conflicts with other stories that they must choose one or the other.

This Awareness suggests that you can read all of this information just as you read fictional material and learn from it, and therein is the value of this kind of reading; that you can learn from all things and not become too obsessed by the words and names used. This Awareness indicates that the energies and messages relating to the patterns and forces Involved can have very beneficial information for entities, but that entities need to realize the absoluteness of a story is not of great significance in terms of its general value to an individual. This Awareness suggests you read these as though you were reading lessons that are imbedded in fiction, and in such reading, you can extract the lesson while letting the fiction serve as a carrier for the lesson.

### WHY DOES THIS BOOK CONCERN ONLY THE LOWER ASTRAL LEVELS?

#### FOLLOW-UP QUESTION:

There are more questions about this. He asks: "Much occult literature refers to planes supposedly higher than the astral planes; mental planes, causal planes, spiritual planes, etc., whereas this book speaks only of the physical and the astral. Is this a significant omission or area of ignorance that the Invisible College doesn't know about, which I can hardly believe is possible, if I had heard tell of such things, or is it simply irrelevant to the purpose of the book which is to enlist aid in freeing the earth of Theocracy?"

#### COSMIC AWARENESS:

This Awareness indicates that it is the latter; that the relevancy in terms of this particular message does not need to probe into the higher dimensions. This Awareness indicates that in the actuality of things, there is that realm in which entities can move, not necessarily through the death process. Even entities in life, can, through outer body travel, enter in to that astral level. This Awareness indicates that there are also possibilities to pass on beyond that astral level, into higher levels. This Awareness indicates that they can move even into the mental realm, and these dark forces, can also reach that level.

This Awareness indicates, however, the dark forces cannot move beyond that, and it is in that higher level in the upper etherial levels that the higher forces work best. This Awareness indicates that they can see things that the dark forces cannot see, and these dark forces in lower levels may be able to predict future events up to a point, and may be able to have certain controls up to a point, but they are deluding themselves and endangering themselves in thinking that they know what is happening in the future and in following a plan that they have devised, when, in actuality, there are still planes higher which are able to view the path they are on and see where in fact they are going, which these darker forces are unaware of.

#### The Grand Plan

This Awareness indicates it is this that is referred to as the Grand Plan; that the darker forces only know some realities of the future, which the earthbound entity in physical sense may not understand. This Awareness indicates that many earthbound entities will rely on these

astral and lower etheric entities because, for some period of time, they can accurately predict and control events, thus, entities dabbling in occult things may follow and pursue those forces in the lower realms, thinking that they have some benefit because those lower realm forces are granting them greater wisdom or understanding or power than they normally possess.

The danger is, however, that these are only a few steps above the entity in terms of their wisdom and knowledge of future events and their ability to influence the events and the forces are using their knowledge to entrap the individual. The higher etheric forces can well see beyond those levels of those forces in the lower realms, and the occult powers that entities gain from dealing with diabolical forces are not the ultimate outcome, and do not lead to the ultimate power; they only allow the entity to entrap himself or herself into certain rungs on the ladder of life in certain frequency levels that are subordinate to the higher realms where entities are essentially destined, unless they refuse to follow their true destiny.

This Awareness indicates that an entity can have an identification with the Universal Deity: the power, the creative force, the life force, the Universal Love; an entity can be identified with that, and have at his or her advantage, the united or unified sense of being ultimately free, with power available, but power being without purpose or value to the entity, so that the entity does not have a need for power. This Awareness indicates the question may be asked: What does one need with power if one is identified with the universe itself, and is part of the ultimate power and life-giving force?

#### **The Dark Force is Like the Mafia—You Must Pay Them Back**

This Awareness indicates another entity, or the same entity may alter identification and select to identify with the body, forgetting the identification with the ultimate universal life force, and focusing instead on personal power, personal force and personal achievements and ambition, and in so doing, the use of a power that seems to be slightly superior, such as those astral spirits that promise something, that promise to help you get a specific item or special benefits which seem important to the individual, and if an entity does select to go with those short-term power forces, and follow a spirit, follow a disincarnated being, hoping that they will reap a reward through the spirit realm, the entity may find some benefits for a short time. This Awareness indicates, however, it has been given previously, that when dabbling in these dark arts, entities need to be ready to pay back nine times the amount of gain they receive in order to free themselves from those dark forces.

This Awareness indicates that it is likened unto receiving a loan from the mafia, in which you borrow a thousand dollars and then are forced to pay back nine thousand dollars in order to be free of your debt to the forces. This Awareness indicates that as you gain from these dark forces you are then required to pay back nine times the energy that you have benefited from. This Awareness indicates that if entities fully understood this, they would certainly stay away from dabbling in using spirits, for you cannot use spirits, *they use you*.

This Awareness indicates that there are many entities who see the spirit realm and manipulation and use of spirits as a kind of game. One entity may say: "I have this ghost friend who does errands for me," or "I have these spirits who do things for me." This Awareness indicates this is only a way by which the spirits can create a bond which allows them to manipulate you. This Awareness indicates the more you try to use these spirits, the more they will devour you.

#### **Many Entities and Groups Now Contributing to Saving this Planet**

This Awareness indicates that in the terminology of the Invisible College, that this term can be applied to those forces in higher realms who are seeking and attempting to raise the vibrations of this planet. This Awareness indicates that it is not simply a single group by a particular name. This Awareness indicates there are numerous forces that are at this time concentrating heavily on this kind of effort to bring the earth into its full bloom and fruition, in a spiritual sense. It is ripe for awakening, and that is why so many are now concentrating on this.

This Awareness indicates that this has been attributed to entities and groups of various names; that many call these the Galactic Confederation; that others will call it the Consolidation of the Mummies; that there are those who refer to this as the Council of Orionis (?), and there are others who class this in other terminologies, the ETI, and so forth, with various names. These are essentially forces; call them angels, call them walk-ins or other forms of Light Beings, who are in effect focusing on this planet at a critical time, to try to salvage the planet, and the people therein, because they essentially see that there are more entities on this plane who would like to live in peace and harmony with others, than there are forces who would like to see mass dictatorship and totalitarian controls and power and conquest.

#### **Rudolf Steiner Books Speak of This as the Ahriman Force**

This Awareness indicates that there will be other books giving other similar scenarios using other names, through different channels, that each channel may have a different frame of reference, a different way of expressing similar truths with slight exaggerations here or there, slight alterations of the general shape of things. This Awareness indicates that the Steiner material speaks of these different forces as the Luciferian, the Ahriman and the Christian influences and forces. This Awareness indicates that this entity speaks of these as actual beings focusing and acting in ways in astral levels and in other levels, much the same as is described in this book. The names have been changed and the story altered only slightly, the scenario similar in nature.

This Awareness suggests the value in reading these things is to gain the message that is beneficial to you, and the danger in reading these things is to assume that it is exactly as described. This Awareness indicates this would be similar to the child who reads the Dr. Seuss books and believes that all of the characters in the books and stories are real beings and the stories are actually truth. This Awareness indicates if the child makes that mistake, it is no great harm except that it hinders the entity from reading only good books that tell a different story or present a conflicting view of things, for they might say: "I don't like that story because it isn't true. Dr Seuss says this or that in his story, and I believe his story and do not believe the others."

#### **Channeled Message From Lower Astral and Higher Levels**

This Awareness indicates that the stories are the vehicles which carry the message that has meaning, and in each story, the child gains some benefit, some lesson, and does not have to accept the story as a historical accounting of events, as something which is absolute. The entity can recognize the story as being a vehicle which portrays a concept, a philosophical understanding that benefits the child. It is much the same in regard to the various messages being channeled by more and more entities; that each entity who channels may have a different parable, a different metaphor, a different vehicle to carry the message but in general, the messages are much the same.

This Awareness indicates this is referring to the messages that come from higher and accurate sources. There

are always those who channel the lower and devious messages also. *It* does not refer to this type of channeling. This Awareness suggests that as time goes on, entities will notice more and more people coming on the scene who are channeling, and the creative aspects of the one channeling may have variations in the message, for if it were not so, there would only be need for one person to channel. All entities can't channel the same message. It would become quite boring.

This Awareness indicates that the different ways of telling the story give it greater life and vitality, even though you may have heard the message again and again in different ways, through different channels, it still is good to hear it again, when a new channel comes along and gives the message in a different clothing, in a different package and makes it interesting in its new expression.

#### Think of channeled Messages as Entertainment

This Awareness suggests that entities might find that the best approach for reading channeled information is to think of it as entertainment, much as one would watch a television show. You do not have to put your faith and belief, and build your life around some single channel or single message or single book; you can look at all of these things and be entertained in life, and gain the benefits that are available in terms of lessons from each of the different messages; each message has something of value. You can gain and use that message and gain the value, and it is not necessary for you to select and choose and decide whether to believe this, or whether to not believe it, whether it is true, whether it is false; the importance is mostly in: Is there something here that I can use to benefit my life and to gain greater understanding? Is there something here that it is helpful to my spiritual growth? It matters not where you find this. If it is found under the lid of a garbage can, as have some of the messages of this Awareness, wherein entities pick a booklet out of a garbage can and later join the membership in receiving further messages from this Awareness.

It can be found elsewhere from other channels, in print or in word. It does not need even to be printed. At times a child may serve as a channel just in response to something. This Awareness indicates that entities need not select channels as one would select a religion. Entities can benefit from all types of messages. If there are messages from a channel that seem to clash with what one would accept as reality, let that clash remain. You don't have to accept everything to find something of value. You don't have to believe everything that a channel gives. If the channel says there is going to be an earthquake on Thursday at 11:00 AM unless it rains, read it, but you do not have to believe it, and you don't have to reject it; just let it be, wait and see if there is other evidence to support this statement.

This Awareness indicates that just because a channel says something does not mean you have to take it as absolute, and just because a channel makes accurate predictions in one message, or seems accurate in one message, it doesn't mean that everything said by the channel will always be correct, and just because a channel makes mistakes in some messages it doesn't mean that everything the channel says should be taken with a grain of salt. Listen to what is said. Read. Study. Find correlations with what you know. See if there is anything of value. Throw away 90 percent, if you wish, and keep the ten percent that has meaning for you.

This Awareness indicates that channels are not infallible. Those who speak through channels are not infallible. Channels can misinterpret, they can misread information. Channels are probably not too much more accurate in

their work than a scientist is in his or her work; that channels may disagree with each other, just as scientists disagree. This Awareness indicates that each still has a message that can be thrown out into the collective field for entities to use as food for thought. This Awareness indicates that this essentially is a message suggesting you strip away some of the mystery and mystique regarding channeling and use it in a practical manner as a way of gaining food for thought without letting it control your life simply because it was a channeled message.

#### Forget Where the Message Came From: Does it Seem Right?

This Awareness suggests you forget where it came from, or not make that the significant thing, but to ask yourself instead: Does this message ring true for me? Does it seem right? This Awareness indicates that if you accept it as right, or if you accept it as wrong just because it was channeled, even if the entity claims to be Jesus speaking, or claims that the message is coming from God, you are not being objective. If you think that just because it is channeled, that makes it so, you are putting yourself in a position of being duped. If you think that just because it is channeled by someone whom you don't otherwise trust, you may also be duped if you reject that message. It is important to listen to the message and see if the message contains truth, and not worry so much about the source of the information, unless you are well aware that the source usually is faulty or usually is accurate. You may then look at the source and have greater trust in the message, based on that gestalt of the situation; that the entity is generally accurate or generally inaccurate, but do not think in terms of absolute.

An entity can be accurate 99 times out of a hundred and still misread something and give faulty information. Be aware that these things can be altered so that even the most accurate of channels can make mistakes, and look to the message, not as a hundred percent accuracy, but as a possible answer, a probable answer or a questionable answer. You ultimately are responsible for what you learn, and if you give yourself over to a channel or to a guru, or teaching or preacher or priest, or anyone else, it does not relieve you from the obligation to learn what is truth. It does not relieve you from the responsibility of learning and accepting or rejecting truth. You ultimately are responsible for what you accept or reject, regardless of whether the entity says: "Believe me, trust me, this is how it is!"

This Awareness suggests you not believe, not trust, but look and decide for yourself.

#### Pursue Truth—Even through Many Lifetimes

This Awareness indicates that if truth is truth, over a period of time, there will be more and more evidence, more and more to support that truth. This Awareness indicates also that you do not have to decide the fate of the world or the fate of yourself, or the absolute end of your decisions regarding what you perceive to be as truth. This Awareness suggests that the pursuit of truth can go on for many lifetimes. You do not have to claim you have found it. You do not have a time limit on which to discover truth. It is not like a final exam that needs to be fulfilled, within the hour or the year, or the decade, or even within the lifetime, but it is important that you pursue truth and remain open to discover wherever truth may be found, for that truth does indeed help to free entities from those entrapments that are always present, waiting to snare entities.

This Awareness indicates that you may look into the snares, look into the entrapments, you may even find yourself ensnared and entrapped, but even this can help you to discover the truth, and when you leave those areas in search of greater truth, you will at least have known

that the truth was not found in that entrapment, that to some degree truth was found in every experience, if you can extract even a small amount of truth, and therefore, every experience can have value, and as this value is accumulated over time, and you continue to move through time, gaining a little truth here, and a little truth there, the accumulation begins to develop and grow to where you are no longer always deceived or always ensnared because someone sounded the alarm and claimed to have the truth, over in that tent at the carnival of life.

### IS MANA THE REAL PURPOSE OF REINCARNATION?

#### FOLLOW-UP QUESTION:

There's so many questions brought up by this book, that I'd like to pursue this a little bit further in the hopes that people will quit sending questions in about it. I have a few questions here from Dan Chilinsky in Toledo, Ohio, who is very concerned about this book, and I'd like to ask a few of his many questions he sent in about it. His first one is: "Awareness stated in a report on prayer that the Middle Self, the flesh and blood personality in the material world, eats food and produces an energy called Mana, which the Higher Self uses. Now, wouldn't this mean also that the real purpose of reincarnation is that the Higher Self not only uses this energy called Mana in the personality in the material world, but is required or even forced to go through repeated reincarnation cycles to get this energy called Mana, otherwise the entity disintegrates or starves in the inner planes, as mentioned in the book *Spiritual Revolution*?"

#### COSMIC AWARENESS:

This Awareness indicates that the Higher Self does not depend on entities giving it Mana for its own existence. This Awareness indicates the energies that entities give to the Higher Self are transmuted and returned in the favors requested by the entities. This Awareness indicates that in order for the Higher Self to manifest energies for an individual, certain energies must be given to the Higher Self. This Awareness indicates the Higher Self could continue even with the death of the physical body. This Awareness indicates that the Higher Self essentially gains its own personal energy, its own life energy from higher frequencies.

This Awareness indicates it is not something that eats the body or eats the physical energies of those in the flesh. It does transform those energies that are given to it, and uses those energies given to return benefits to those on the physical plane, in accordance with their request and the nature of that request.

### THE MUMMIFICATION OF PAUL SHOCKLEY

#### FOLLOW-UP QUESTION:

Another question by Dan Chilinsky: "Awareness stated the Interpreter Paul Shockley, in a former incarnation, an Egyptian in ancient Egypt, was mummified in such a way that he is still attached by an Aka-cord, even to this day, to this ancient corpse still buried in the Egyptian desert. Would it be true, therefore, to say that this was done so the Interpreter could survive longer on the inner planes to put off or delay what would normally be forced reincarnations to accumulate more Mana for the Higher Self?"

The *Spiritual Revolution* book stated that repeated forced reincarnations cause a partial erasing of memory each time, and therefore, it could also be said this helped the Interpreter to better retain his memory of former reincarnation cycles, as well as conditions on the inner

planes. Would this be true? Does being attached by an Aka-cord in this way the Interpreter was, allow a small trickle of energy to be fed to the entity on the inner planes, so it could survive longer without reincarnation?"

#### COSMIC AWARENESS:

This Awareness indicates that in a sense it was somewhat as indicated by the questioner, but in a sense it was just the opposite. This Awareness indicates it depends on how one on which side an entity is observing. This Awareness indicates that generally, what occurred, the mummified being was very slow in dissolving and the Interpreter's psyche remained entrapped in that mummy which may be described as having the psyche stuck on the inner plane, with only small amounts of energy being released over long periods of time, so that when the first incarnation of the energies became possible, the energies were inadequate to incarnate a complete person in terms of the psyche, and the entity was essentially retarded in the first several incarnations.

This Awareness indicates that only gradually, over many lifetimes has the psyche of the individual become more complete; that even in this present lifetime, it has only been in the last few years, due in part to the channeling action, that the entity's psyche has become more quickly released and freed from the attachment to the mummified being; that essentially, most of the entity's psyche has been freed from that mummy. There is still part of the entity attached, but this is of such a minor amount; this Awareness suggests this being likened unto approximately 6 percent of the entity still being attached to that mummified being. This Awareness indicates that the entity is essentially approximately 94 percent free of that mummification experience.

### AGENTS OF DARK FORCES WORKING THROUGH PRIESTS

#### FOLLOW-UP QUESTION:

Another question by Dan Chilinski about this book *Spiritual Revolution*. "It was mentioned in a former Awareness report that the entity Alexander the Great upset or reduced the power of the priestcraft's hierarchy in his day and therefore earned "the eternal condemnation of the dark forces on the inner planes". In light of this book *Spiritual Revolution*, would it be true, therefore, to say that entities on the inner planes, working through their agents on earth: priests and organized religions and so forth, were using these religious people to steal their energies while alive, and use them as slaves after death in order to put off or delay what would normally be forced reincarnation, to accumulate Mana for the Higher Self to be able to survive in the inner planes?"

#### COSMIC AWARENESS:

This Awareness indicates that this question as not clear; that it be repeated. There appears to be a twist in meaning that is not clarified.

#### (AVATON)

That's the way he wrote it, but I think he means that this book, *Spiritual Revolution* talks about the agents of these Dark Forces working through priests and organized religions down through the ages in order to steal their energies while they're alive, and then use them as slaves after they pass over.

#### COSMIC AWARENESS:

This Awareness indicates that this as being accurate in terms of the motivations of many of these dark forces;

that it does not always work this way, but that the intention as being expressed in an accurate form. This Awareness indicates that there are always those dark forces that are drawn to the Light, and the more an entity works toward Light, works with the Light, the more the Dark Forces focus on that entity and try to destroy or use the entity; it becomes likened unto a challenge to keep these Light Forces from growing, developing or gaining momentum.

This Awareness indicates that wherein they are successful and drag the Light Force back down, they then have the ability to use those forces that once were Light Forces, in a manner that is for dark purposes, and this is likened unto a challenge for these dark forces to do so. This Awareness indicates that they are often successful in this and those who have served as Light Forces, if they are not fully committed, if they are only partially committed, or if their commitment to the Light becomes distorted and altered and they sell out for money or they sell out for power, or some other temporal gain or gratification, then the dark forces have won a victory which they desire, and the entity may indeed be entrapped for a long period of time, before ever becoming free of that entrapment.

#### **No One Can be Entrapped Unless They Will It To Be So**

This Awareness indicates that an entity always, however, has the ability to call upon the Light, and to bring that Light to bear and to dispel dark forces, through identifying with the Light. This Awareness indicates that no one is ever trapped without their own compliance to that entrapment. This Awareness indicates that one can choose to accept entrapment, or can refuse to object to the entrapment. One can neglect to dispel the entrapment, but if one wishes to be free of the entrapment, one only needs to call upon the Light, the Light of the Universe, the Christ Consciousness, the Vibration, the Secret of Life, the Word of God, that which is the vibration of the Universal Creator, which is everywhere present at all times, throughout eternity.

All that is necessary for entities to be free from dark forces, is to call upon that Light.

#### **FOLLOW-UP QUESTION:**

And they can call upon this Light regardless of what level, astral or so forth they are on, is that correct?

#### **COSMIC AWARENESS:**

This is in the affirmative. The role of those dark forces is to persuade the entity that they are lost, persuade the entity that they cannot escape. The role of those dark forces is much likened unto that of a hypnotist who says: "You cannot move your arm" and convinces the person not to be able to move the arm. If one believes the words of the dark force, then indeed, the entity is caught by that dark force.

This Awareness indicates that it is simply a matter of suggestion and the acceptance or rejection of that suggestion. This Awareness suggests anyone can be free at any time, regardless of where the entity is, simply by calling upon the Light.

### **A THEORY ABOUT THE LAND OF ESSENCE** (Getting Stuck in the Lesser Light Regions)

#### **FOLLOW-UP QUESTION:**

A couple of more questions on this before we drop it, by Dan Chilinsky. "Would Awareness say it is correct to say that most entities never reach "The Land of Essence" because they have only a limited time to stay in the inner planes and advance to Essence, because the energy of Mana they got from their last reincarnation cycle was

limited, not allowing them enough time to get to Essence before being forced to reincarnate again in order to accumulate some more Mana for the Higher Self. Would you say that this is the real reason why most entities end up being stuck in the so-called lesser light regions of the inner planes?"

#### **COSMIC AWARENESS:**

This Awareness indicates that the main reason why entities do not reach the realm of Essence is because they do not realize that Essence is everywhere present and that they are already in the Land of Essence. Essence meaning *Isness*; the essence of something is the reality of something. The reality is everywhere present. It IS, and entities don't seem to understand that the reality is present at all times, in all places, and instead of entering that essence or reality of life, they withdraw into illusions, fantasies, delusions and concepts of misunderstanding and illusion of separateness, beliefs that they are not in heaven, not in Essence, not in contact with the Highest and Best.

#### **The Land of Essence is Within You**

This Awareness indicates essence permeates, the Land of Essence permeates, the reality of Heaven permeates all that is, and entities cannot see it, cannot experience, because they believe they cannot; believe it is elsewhere, believe that they are separated. This Awareness indicates it is *within*, it is where you are, it is here and now, but entities must let go of illusions to attune to the reality of essence, to attune to the reality of who in fact, they are, where they are, and that they now are floating in the lap of God, are floating in the sea of God, are floating in the midst of heaven and if only they were to recognize they are now One with God and with the Christ Consciousness, but are perhaps in some cases, unaware and uninformed of their status, believing they are separated from God, separated from heaven, separated from the Highest and Best.

#### **What if Heaven Was Anything You Imagined It to be?**

There are -always those choices that entities can make, wherein they feel separated. This Awareness indicates that *It* wishes to ask a question: What if upon arrival in heaven you were to discover that it was a place in which entities could make it into whatever they wished it to be, whatever they imagined it to be, whatever they thought became a reality; what if heaven were there for you to create according to your own inclination and liking?

And what if someone off to your right likes dragons and creates a dragon off to your right, and what if you are afraid of dragons and you want to see a shield protecting you from the dragon, and so you create a wall or shield to protect you from the dragon. And what if you liked cherry trees, and you create cherry trees, and what if someone to your left likes football games and creates football games, and what if all around you, people are creating the world, creating the heaven, according to those things which they want, and what if you suddenly become frightened because other people's creations are infringing on your Peace of mind, and you begin to look at heaven as though it were some kind of tormenting place, some kind of hell where others are infringing on your peace of mind.

And what if in your creation you create a concept of heaven as being not a very pleasant place to be, and in creating this concept of: not a very pleasant place to be, you have created something that you see as real. Your heaven is not a very pleasant place to be, because you cannot accept the creations of others. What if this multiplies and goes on until there are everywhere present, entities who are complaining, lamenting, or finding a lot of fun creating these freaky things for others to react to?

Is this place not still the place of heaven, where entities can create whatever they choose? What more could you ask of heaven? This Awareness indicates that heaven may disturb your peace of mind, but it can only do so if you let it, if you are disturbed by the creations of others. This Awareness suggests that you may in fact already be in heaven, but because you are disturbed by the creations of others you do not see this as heaven, you do not feel comfortable, and you describe this place as hell or purgatory.

Well, if you can create heaven to be anything you choose, and you choose to call it purgatory or hell, that is your business. That is your creation. No one has the right to deny you your creation, your right to call it, to name it, to describe it as you see it. This Awareness indicates the mind is a place of its own and can make a hell of heaven, or a heaven of hell.

### DOES THIS CREATION EXIST ON THE LOWER ASTRAL OR JUST IN THE HIGHER LEVELS?

#### FOLLOW-UP QUESTION:

Does that type of creation, in these higher realms just described, is this confined to the mental planes and the higher realms, or is this possible on all the astral levels, including the lower levels that have been described in this book *Spiritual Revolution* and in these questions we've been asking about it?

#### Cosmic Awareness:

This Awareness indicates that the creative process takes longer the more dense the energy. In the higher energies, the creative process can take place immediately, and it is the same in the mind. The entity can change his or her mind immediately; instead of seeing their environment as a hell, they can have that immediate alteration, where everything is heavenly, but it requires that the mind alter its perspective, its perception of *what is*.

The mind can alter its perception in a flash, in the twinkling of an eye. This Awareness indicates it take no time for such alteration, but in the alteration of matter, which is much denser and slower in terms of vibration, the creation is slower, is retarded in its movement and entities must learn patience in dealing with material change, for material change does not move as quickly as perception; perception can change, and it may take some time to filter into physical change, but physical change will not occur until the perception begins to have its effect in the alteration of those lower realms.

This Awareness indicates that the astral realm is that above the physical, and then the mental realm, and into the more etheric realms, and that entities in recognizing these different speeds or frequencies may begin to make changes in their lives, but these changes can best occur in proper order, moving from the way one perceives reality, or which one perceives as reality, and changing to the more desirable perception, which, in time then filters and alters the physical and astral perceptions.

This Awareness indicates that entities often continue to feed the astral energies to stabilize them, or entities will stabilize and maintain the physical energies, and if there are entities who are fighting over the question of changing a physical attribute or keeping it the same, this will add to the delay of any change, just as when someone wants to turn a wooded area into a park; if everyone agrees, the wooded area is suddenly a park, even without cutting a leaf, but if anyone objects, there may be hearings or arguments or discussions, and all kinds of measurements and plans and blueprints and considerations as to what the park, is, and how to describe the park, or whether it

should be a park, and all of these descriptions and this delay comes with the disagreement.

#### Why Heaven Appears to Some as a State of Purgatory or Hell

This Awareness indicates therefore, one entity is seeking to create a park out of something material and others are objecting, and the more conflict there is, the harder it becomes to manifest the reality into something else, for all of the energies are bombarding that area and countering the conclusions desired so that no one is quickly gaining a transition or transformation of the wooded area into a park.

This Awareness indicates that this is a case of entities not working in co-creative effort to manifest, but each trying to disrupt the creation of the other, so that the creation is confused and energies are not working in harmony toward the transformation. This happens often in many ways; that when entities are unable to get together, the physical matter is altered much more slowly or is even distorted so that the outcome is much different from that which was planned because there were too many cooks making the soup, and one threw in shoes and others threw in dirty clothing, not knowing that it wasn't a pot of water for washing, and others threw in carrots, and others threw in other forms of vegetables, and the soup turned out not to be what anyone wanted, and the clothing was covered with dirt and turnips and greens and red beet juice.

This Awareness indicates that this is why things don't turn out right. There are too many people involved in the creation, and none are in agreement. This is why heaven appears to some as being a state of hell, or purgatory, because there are too many people who can't get along and agree on the creation. This Awareness indicates that the conflict creates greater frustration and greater reason to be in conflict and so the argument intensifies and makes a greater problem. This Awareness indicates that if only these many wills, these many cooks who are brewing up heaven, or brewing hell from heaven were to stop and take a break from their creative efforts, look around at each other, and then ask the question: "What do we really want here? Are we doing this in a way that satisfies anyone?" And if these entities were to honestly answer and honestly examine, they might discover that they all want the real thing, and the real thing to be that of heaven, wherein there is total harmony and total agreement as to what is created, or there may be years of negotiating so that everyone's wishes can be accommodated in an orderly manner in appropriate places that do not interfere, or disrupt the joy of others, so that the screaming football game is not right in the midst of a place where entities are trying to meditate, or sleep.

Entities can find ways of planning and arranging their wishes so that all are accommodated at least to some degree, and in this manner, approach that which is the ideal of heaven. This Awareness indicates the way it is now, all these people in heaven fighting each other, willing to destroy each other if they don't get their way; it is indeed looking much like purgatory or even hell, and many would describe it so, and long for the days of heaven when they can be free of all of this.

#### Disagreement Among the Creators is the Problem

This Awareness indicates that the Creator gave entities the ability to create what they want, except when others interfere in that creation or when that creation interferes with others who also have the same rights to create what they want. If it is clearly understood that everyone has the right to create what they want, then the only thing preventing that is the disagreement between the creators and the only problem that entities must resolve in order to be free is the problem of their disagreement, so that as

they learn to negotiate and agree on their creations, wherein everyone wins and no one is rejected or fails to be considered, when the situation becomes one of a win/win scenario, then entities are that much closer to heaven.

This Awareness suggests the next question may be asked.

### RAMTHA SAW MILLIONS IN SPIRIT WORLD STACKED UP AWAITING RESURRECTION

#### FOLLOW-UP QUESTION:

Another question from Dan Chilinski about this book, *Spiritual Revolution*: "It was mentioned in one of the books channeled by J.Z. Knight by an entity calling itself Ramtha, that the saddest thing he saw in the spirit world was millions of religious people stacked up like logs on top of each other, waiting for "resurrection" from their "Gods", who appeared to be "sleeping" or extremely drained of their energy. After reading the book *Spiritual Revolution*, my guess would be this is the end result for religious people who have been drained of their energies so their "gods", (the book calls these gods "Theocrats") can put off reincarnation and stay longer in the inner planes. These are probably entities at the point of disintegration or starvation when they no longer have enough Mana to survive in those inner planes as mentioned in the book *Spiritual Revolution*. Would Awareness say this is correct?"

#### COSMIC AWARENESS:

This Awareness indicates that essentially, in a sense, this is in the affirmative; that the vitality as that which flows through the focus of entities as they give attention. This Awareness indicates therefore, when you pay attention to something or to someone, you are actually sending them energy. This Awareness indicates that as you pay attention or devotion, or focus toward an abstract concept or an abstract being or an entity, even if not in the physical flesh, you are sending energy to that object or being.

This Awareness indicates that it is that sending of energy which can have an effect in giving strength and vitality to that concept, that entity, that being, that abstract thought. This Awareness indicates that the flow of energy may be equated to Mana, and if entities can send sufficient amount of Mana or energy, that concept comes to life, that being comes to life, that abstract force gains vitality. In this sense, this is correct.

#### FOLLOW-UP QUESTION (VIKKI):

Is that like the children clapping for Tinkerbell?

#### COSMIC AWARENESS:

This is in the affirmative.

### ASTRAL VAMPIRES THAT FEED OFF THE ENERGIES CREATED BY WAR

#### FOLLOW-UP QUESTION:

Another question here from Dan. He says: "I can't remember the exact details, but Awareness mentioned that there were "astral vampires" that feed off the energies created by wars in the material world. Would it be correct to say that the emotion fear generated in wars produces an energy similar to the "Mana" required by the Higher Self to survive in the inner planes, and these astral vampires use and need this type of energy in order to avoid or put off what would normally be forced reincar-

nation cycles into the-material world?"

#### COSMIC AWARENESS:

This Awareness indicates that this is in the affirmative, except that it needs to be clarified that the Higher Self, as understood in the correct terminology, does not need this kind of energy; that the Higher Self gains its energy from the universe itself; it does not gain its energy for its own survival from the lower forces. It can, however, take those lower force energies and transmute them into higher energies. That is the work of the Higher Self. It takes the low Mana, and turns it into High Manna, for the purpose of feeding spiritual food to those on the lower realms, in the lower Mana environment.

#### Psychic Vampires Also Are Living in Human Forms

This Awareness indicates that the beings that are of a darker force, a more negative type, will need to have energies from lower forces, and they can take that Mana, or take energies that are available through humans, and gain personally from that, and in that sense drain energies from entities. This is what is referred to as psychic vampires of the inner planes. This Awareness indicates there are also psychic vampires who are living in human bodies who drain energy from those who are around them; this not only in terms of taking things that are symbolic of energy expenses, such as something valuable which took much energy to acquire or make, and a thief taking that from you, which in a sense is likened unto a vampire, for it steals energy, but this Awareness refers to psychic vampires more in terms of those entities who actually drain the physical Mana or vibrations and energies from another entity by taking their attention and leaving them with nothing in return.

This Awareness indicates that entities can even do this without saying a word. They can simply be in the room with you and draw energy from you, or they can say things and create a flow of energy that comes from you to them, and when they are filled with that energy and feel normal, they may leave and you feel drained from the encounter.

#### Astral Vampires Can Drain Your Energy While You Dream

This Awareness indicates that likewise, there are those forces on the inner planes in the astral levels who can take energy from you. This may occur even from dreams at night, or from times when you are vulnerable such as stressed or drunk, or drugged or otherwise emotionally, physically, or spiritually distraught, and in those times, these energies can be sapped and used so that you are even weaker.

This Awareness indicates that it is important to keep a positive attitude, for as you become negative or depressed, these astral energies can be more easily sapped and taken from you. This Awareness indicates that these astral forces do indeed gain energy to allow them to have greater strength. As they draw energy from you, it gives them greater strength to work against you, or to do mischief with others. This Awareness suggests that entities avoid those weak areas in their lives, that astral entities generally work through the area that is the weakest and less strong; that wherein, for example, you have a person in your household who has a weakness in terms of deceptive emotional weakness, insanity or anger, or frustration or drug, alcohol use, or some other physical impairment that is a drain on their psyche and self-image, or puts them in conflict with someone else, this can become a weak link.

This Awareness indicates that other times, it may not be someone living with you. It could be someone in the area who does something to your property or to yourself,

or does something that harasses you or causes you to be mentally distraught, and the more you associate, or allow that entity into your environment, the more problems may come to you through those astral forces who are using that weak link to enter into your life. This Awareness indicates weak links generally are in some way associated with drugs, with insanity, with sex, or with emotional conflict and confusion. They generally enter through energies associated with Neptunian forces as described in astrological terms, The terminology of Neptune in astrology as that which relates to the mystical, nebulous unclear, gaseous confusion and things that are undefined and these undefined, unclear areas are the opening doorways; these unclear undefined areas are often associated with alcohol or drugs, or clandestine activities or deception, or misrepresentation, and these become the opening places where negative forces enter into your life and mess up and confuse and disrupt your plans or your organization or your peace of mind, and in so doing, they siphon off energy from your life. They may also create other forms of mischief.

### CAN HIGH MANA ONLY BE GOTTEN THROUGH REINCARNATIONAL CYCLES?

#### FOLLOW-UP QUESTION:

Another question from Dan Chilinski about this book: "It was mentioned that some entities who are karma free can get to the land of Essence or Celestria. Although some of us may get there, this does not mean we can stay there permanently or as long as we would like, because the Higher Self must have Mana, or food which can only be gotten from reincarnation cycles, in order to survive limited time periods on these inner planes. Would Awareness say this is correct?"

#### COSMIC AWARENESS:

This Awareness indicates that this does not appear to be correct, if the question is as it appears to be; that the Higher Self does not depend on the entity's movement into higher realms, or movement back into physical incarnation. The Higher Self is drawing its energy ever and always from higher frequencies, and it is the subconscious that draws energy from the physical realms and transmutes that energy into low Mana. It draws this in as food in a physical sense and then it is transmuted into a low Mana, which the Middle Self then directs into what may be termed the middle Mana, as being a focusing of that Low Mana.

This Awareness indicates that it is as though the Low Mana were a pool of water, the Middle Self as being that which serves to direct that water, and move that water. The movement or moving water, the directed water is the Middle Mana, and the High Self on receiving that middle Mana restores it, gives it back as a higher Manna that falls back to the earth, or back to the physical plane. It is much like the process of rain; that the low Mana is the water which floats, the middle Mana as that which comes into being when the Light of the sun, or that focus of the mind focuses on that low Mana and directs it upward into the Higher Planes or atmosphere, which in turn, as clouds is transmuted into a more subtle and refined Manna, then creates, as that higher Manna, the raindrops of electrical spark or creative energy that then falls back to the earthly realm and the individual who first sent up the Mana as a prayer or as a gift to the Higher Self.

The Higher Self doesn't need that Mana to survive, it needs that Mana to produce for the lower self. It is essentially a transformer of low Mana and transforms the low Mana into the manifestation '(manna-festation)

energy for the satisfaction of the prayer. When entities seek something in a prayer, the High Self will take that gift of Mana and answer that prayer, using that energy. This Awareness indicates the High Self receives its own energy from the movement down from Ultimate Universal Creator and Energy.

This Awareness indicates, however, that the High Self would not be effective in answering prayers without the low Mana being sent, for although it can maintain its own existence, it cannot satisfy the needs of those on lower realms if they are not providing recognition for attention which carries the low Mana to the Higher Self. It takes that low Mana, transmutes it into High Manna, and then, throughout that, answers the prayer.

### CAN ONE STAY IN CELESTRIA FOREVER?

(More on Sach Kahn)

#### FOLLOW-UP QUESTION (AVATON):

I believe the question was ... what he means is a thing of semantics here. I'm sure what he really means is that aspect or that part of the personality or that part of the entity which Awareness indicates can go to Celestria, is, once it's there, it can't permanently stay there, as he says, because in order to get more Mana or more energy, he has to reincarnate. Is that correct?

#### COSMIC AWARENESS:

This Awareness indicates that this is incorrect; that it is correct up to a point; that wherein an entity is still attached, psychically, or mentally, or in a physical sense, still has attachments to earthly things, or still has some kind of karmic connection that has not been resolved, then the entity will be eventually forced to return to the earth; that entities can even enter into that realm known as heaven, and still have to return to the earth eventually, but there is that realm that goes beyond the level of heaven; heaven as being on what may be termed the 4th level. There is that realm beyond which is closest to the ultimate creative energy which is called Sach Khan.

This Awareness indicates that entities can move beyond by diminishing their karma and diminishing their attachment to the earth, at the time of passing over, making the Ultimate, making God, making the Creator the ultimate thing in their life, they can move on beyond the realm of heaven into that which is Sach Khan, and then they need not return. This Awareness indicates they have the option to return, if they so desire, but there is seldom any desire to return. This Awareness indicates that Sach Khan is the origin of the production of souls, where the souls were created. In this action they are returning to their creator.

### PAUL SHOCKLEY'S 15% ERROR

#### FOLLOW-UP QUESTION:

Dan Chilinski has just two more questions on this book. He writes: "It has been stated that the Awareness Material has a 15 percent error factor because of Interpretation misinterpretation and other things. After reading this book *Spiritual Revolution*, I think most of this 15 percent error factor falls right smack on this thing of reincarnation being "Free Will" or "karma". The way this book *Spiritual Revolution* decoded the Richard Shaver mystery indicates the extent to which various mediums or channels allow their subconscious to distort and mold or merge several different conflicting inputs of information together into an harmonious whole, so that it is very hard for the conscious mind to make sense out of a lot of channeled messages, and many of these channeled messages are extremely misleading because of this.

Even the best channels, Paul Shockley being one of them, may not realize the extent to which subconscious distortion, and former prejudices in the conscious and subconscious influence, and bias or slant messages in such a way as to be very misleading. "Enlightenment" as defined by *Spiritual Revolution*, is the ability to get around the distortion of the subconscious mind."

Now I'd like to ask Awareness, is this entity correct that the bulk of the 15 percent error indicated in the Interpreter, falls into this information previously given regarding free will or karma?

#### COSMIC AWARENESS:

This Awareness indicates that this is not seen as being that which this Awareness spoke of. This Awareness indicates that most of the error involved in interpretation is caused by the problem of using words; that words themselves are often inadequate to express that which is in actuality invisible energies, energies that are not seen with the eyes, are not labeled with the mind, and have no way that entities can accurately share in the same meaning; that when energies are seen with the inner mind as images, or as energies that are not even visible in image forms, but are felt by the Interpreter, energies and images given by this Awareness in the screen of the Interpreter's mind for the Interpreter to translate into proper words; it is here that most of the 15 percent is found, the 15 percent distortion is found in this translation.

This Awareness indicates an Interpreter speaking as one translating from, for example, Russian into English, or from one language into another, will have a certain amount of distortion and error, because in many cases, the words of one language are not properly represented in the words of another language, and therefore, the message spoken by one language, when repeated in another language, loses some of its accuracy. This Awareness indicates that approximately 10 percent of the error is due to the inability to put feeling and image into proper wording.

This Awareness indicates the other 5 percent is due to the entity either not seeing clearly or having some kind of distraction or disturbance in the trance level itself, wherein the focus or stability of the Interpreter's attachment to this Awareness is somehow broken or weakened, so that the Interpreter's own self interferes with the message this Awareness attempts to convey. This Awareness indicates that in most instances, this 5 percent, or the disruption of the contact in terms of the trance level, is not a problem, but there are some instances relating to the environment of the trance, the energies at the time, the pressures on the Interpreter, pressures of a personal nature on the Interpreter; these are the kind of things that create that 5 percent error.

This Awareness indicates, for example, when the Interpreter has a headache and is trying to do a trance, when the Interpreter needs to go to the bathroom and is trying to do a trance, or when there is an outside interference, such as a motorcycle passing by, or some noise in the home: a phone ringing or some disturbance that occurred earlier that has the Interpreter emotionally disturbed by some event; these are the kind of things that often break the focus and clarity of the channeler, so that there is the 5 percent error.

The ten percent as that which generally relates to the inadequacy of words to portray a message clearly. This Awareness indicates that because sometimes words are not fully adequate or need more interpretation, sometimes a message will be given in a brief period of time in which

a question is asked for something, and information is given, and the message is then given in response to the particular frame of reference and the message may not be fully clear when it is applied to a different scenario or questioning.

#### The Potential for Error in the Question Itself. Like a Jesus Question

There is also the potential for error, because, for example, the story relating to Jesus as portrayed in the Gospels, as that which was put together long after the death of the entity Jesus of Nazareth. The story portrayed in the Gospel incorporates and includes information that has come out of previous religions such as Krishna and Osiris, and Zoroastrian teachings, and other stories which parallel in many instances, even to the exact wording, used in the New Testament; wherein there is parallel wording from Egyptian, Syrian, Hindu and other cultures that have been incorporated into these Gospels, so that there is a mixture of history and myth in the New Testament, in these stories of Jesus, and when an entity asks a question relating to Jesus, this Awareness recognizes that there is both fact and fiction in these New Testament books, and generally would answer that question relating to the story from the viewpoint of the story itself as presented in Biblical terminologies. But what about the actuality?

Is the entity asking about Jesus of Nazareth, or is the entity asking about the Biblical story of Jesus as portrayed, which includes the mythical information that has been taken from earlier writings in other cultures? This Awareness answers in terms of that which is apparent within the question itself, for *It* cannot explain which parts of the New Testament are mythical and which are historical, and still answer the question without some intense and long-term readings being involved, much explanation and everything, thus, entities are not being given 100 percent of the truth when a question is asked in a manner that, for example, distorts the truth in the question, for this Awareness would need to clarify the truth and separate the illusions the misinterpretation that the questioner may have.

This Awareness indicates that this is one of the greater problems in answering questions from entities. An entity may be asking about, for example, a mythical story, such as *The Lord of the Rings*, and this Awareness recognizes that this is a mythical story, but within the framework of the question, and within the framework of the mythical story, between the question and the story, there is the direct relationship which can be answered simply, or if this Awareness wished to, *It* could go into an elaborate statement informing the questioner that this is simply a mythical story and that the answer is going to be false because the story is false itself and has nothing to do with history.

This Awareness does not distinguish in all of its answers to questions that which is history and that which is myth, because these things are most of the time distortions anyway, and they are realities within their own frame and within their own reference. This Awareness indicates that the very action of thinking creates areas which cannot be portrayed in absolute terms that apply on all levels. This Awareness suggests that when an entity asks a question, and the question presumes something already, and does not ask if the question is presuming correctly, this Awareness will give the answer according to that which is asked, and according to the presumption that is already assumed, because the entity is not asking to have his presumption assessed.

For example, the entity may ask a question: "What can I do about my ugly face?"

This Awareness does not ask the entity: On what basis do you decide that your face is ugly? It is presumed by the questioner that his face is ugly, and this Awareness proceeds to tell the entity what to do. This Awareness indicates that in many of the questions this entity has just asked, and also in some of the questions asked yesterday, there were presumptions in the questions, there were misunderstandings in the questions, and the questioner, in misunderstanding things that this Awareness had given previously, applied these things to this book and saw discrepancies.

#### **The Book *Spiritual Revolution* Is Filled With Inaccuracies**

This Awareness indicates that the questions that were previously answered by this Awareness were in reference to other frames, other questions within certain frames of reference, and were in that context accurate. This Awareness indicates that this particular book which you are speaking of is in itself filled with inaccuracies, with an interpretation, with a particular frame of reference and it could be discarded as false because it isn't presenting things exactly as they are. It is presenting things with certain energies being represented by words and titles and labels, which are in themselves but distorted mirrors, attempting to see what lies back behind the words as energies in movement.

#### **Nothing Is as It Seems**

This Awareness indicates that *nothing* is as it seems. Everything is represented by distortion, and these distortions are the words that are used to describe what is perceived, and what is perceived is not what is, it is only the way the viewer perceives what is, and what is reported by that viewer is not accurate even to their own perception, for the words they use are slightly inadequate to convey what is perceived, and in the hearing of those words expressed by the viewer, there is a distortion, a loss of meaning, for when one hears a word, it means something different to that entity than it meant to the one who spoke the word.

#### **How Awareness Answers a Series of Questions Within a Question**

This Awareness indicates that sentences spoken, can be misunderstood, depending on the arrangement of words in the sentence, the one asking or speaking the sentence, may not word what he means exactly right and the hearer might take the meaning as slightly different from what is heard, particularly when the sentence or statement goes on and on for some time, and the answer to that statement may be of a general nature. Especially troublesome to this Awareness is the fact that many entities ask a series of questions within one question and add a series of statements of information within one question, and then ask; "Is this correct?", and some will be correct, and some will be incorrect, and this Awareness looks at the question that has been given, and the statements that have been given, and *It* does not go back and pick at each detail or ask for clarification of each thing, instead *It* gives a general answer, such as: "This is in the affirmative in many respects."

This Awareness indicates that *It* gives a general answer because the question has so many general parts and could only be answered in a general sense, yet there will be entities who take this answer and apply it to a particular part of the question, so that it appears Awareness answered this as in the affirmative, when in fact, that might have been part of the question or assumption in the question that was not quite accurate. This Awareness in answering such questions, answers that which appears to be the bottom line or pertinent part of the question, but *It* cannot be expected to accept every small aspect of a question.

This Awareness indicates that, for example, one entity

invariably writes about a page or half a page of type-written information relating to his perception of things, and then asks a question relating to one aspect of what he perceives. This Awareness answers that one question and does not generally attempt to argue with the entity in regard to his perception of things; this entity generally throws in enormous amount of details and adjectives describing things. This Awareness indicates that *It* could not possibly answer all of his questions in one reading if *It* went back and corrected everything the entity perceives, so *It* answers only that which is the bottom line initial question, and generally lets the rest of the entity's perception go by without comment.

This Awareness indicates it is this kind of thing that prevents this Awareness from saying that the Interpreter is always correct. This Awareness indicates these things create error automatically, and no one, not even those writers of that particular book, nor even those who have written the Bible, no one is free from these type of errors; that words themselves create error, that communication is not 100 percent, when there are words involved or when there is *any* form of interpretation involved. The look an entity gives to another, even though words are not spoken, can be misinterpreted.

This Awareness indicates that as a general rule, this Awareness suggests that you not trust anyone's interpretation of anything, but instead, that you pay attention and decide for yourself whether the interpretation is accurate and to what degree; that the book you speak of is accurate to a degree, has value to a degree, but if you take it as absolute gospel truth, and you find another entity who takes it as absolute gospel truth, and you sit down to discuss things with that entity, you will discover that although both of you agree 100 percent that the book is absolute gospel truth, you will not agree on what it says. There will be areas that you can't agree on because he will interpret it differently than what you interpret.

This Awareness indicates that the suggestion is: there is error in everything when words are involved, when there is interpretation involved. The only way you can avoid error is simply to accept what is, without interpreting it, and what fun is that? This Awareness suggests what harm is there in some 15 percent error? This Awareness has suggested that entities be allowed 20 percent rebellion in areas that are not harmful. This Awareness suggests that you need not have 100 percent truth in order to learn enough to promote soul growth and character growth and happiness in your life.

This Awareness indicates that it is perfectly alright to seek absolute truth, but don't expect it. This Awareness suggests that the question may be repeated if this has not covered the question adequately.

### **WHY THE BOOK *SPIRITUAL REVOLUTION* IS ALARMING TO MANY READERS**

**(The Importance of What Entities Carry Into the Afterlife)**

#### **QUESTIONER (AVATON):**

I think *It* has covered it. In conclusion on the subject of this book *Spiritual Revolution*, the alarming thing that most people who read it would react to is the frame of reference of the authors, implying that the death experience is a traumatic, painful, nothing to look forward to type of thing, if entities get into those astral levels, but for the average person who lives a decent life, I assume, if they follow the instructions given by Awareness in the *Book of the Dead* and so forth, and head into that White Light at the passing over, there is no reason they need to experience the type of lifestyle that this book indicates is going on. Would Awareness agree that this is a summary

or not?

**COSMIC AWARENESS:**

This Awareness indicates that this essentially is accurate to a degree. This Awareness reminds you that whatever hassles you are carrying in your physical body, whatever emotional distress you are feeling as a living being, whatever unpleasantness or hostilities you carry follow with you into the astral life, therefore, an entity who wants to commit suicide because he is miserable, ends up in the afterlife feeling miserable, but without a body.

This Awareness indicates that in that sense, if an entity is all wrapped up in negative behavioral patterns dealing with those astral vampire forces on the physical plane, and passes over, the entity is not going to be free of them, but will most likely be involved even further with them. This Awareness indicates the difference between the outer plane, the nonphysical plane and the physical plane, is that on the physical plane, energies are much more intense, and opportunities to make error or to grow are intensified.

**The Main Reason Entities Enter the Physical Plane**

You can either, really blow it here, or you can really achieve great character growth in a short time. This Awareness indicates it is for this reason that entities often enter into the physical plane. It is likened unto going into an intensive camp, as many of the Japanese business men are now doing, where they either make it or break it, and it is a very intense training that they must rigorously experience. This Awareness indicates that is much what the earth is, the physical life on earth compared to those afterlife areas.

This Awareness suggests that there appears to be an area of your question which was not fully answered.

**(AVATON):**

I think it's in the area of people getting paranoid, perhaps, from reading a book like this.

**COSMIC AWARENESS:**

This Awareness indicates that this can be a hazard. That there are, however, enormous amounts of money to be made from capitalizing on entities' paranoias, as the orthodox religions have proven; that in order to really capitalize on such paranoias and to promote this philosophy in a way that makes a good commercial product, the entities would need to supply a solution to the problem. This Awareness indicates that the solution to the problem needs only to be information. It does not necessarily need to be some physical activity or physical property, but if the entities wish to take full advantage of the paranoia created by the philosophy, then they will need to follow with another book that tells people how to avoid being eaten after death.

**A Similar Philosophy was Espoused by Gurdjieff**

This Awareness indicates that this same philosophy was expounded in a lesser degree by Gurdjieff, who saw, that the souls of man, if not developed properly, would go to feed the moon. This Awareness indicates that much of this kind of speaking is but figuratively intended, yet entities take this literally. This Awareness indicates that for entities' souls to go and feed the moon, if taken literally could be quite frightening, for who wants to be eaten by the moon? This Awareness indicates, however, that if you understand what Gurdjieff was saying, if you can get *behind* the words, if you can realize that words are inadequate to convey, and you can look beyond the words and attempt to catch his meaning, then there may

be some value to what he has said.

Essentially, Gurdjieff was speaking of souls that do not develop simply become magnetic forces that have no individuality and have no place to go, and nothing to do, and therefore, these magnetic forces may be drawn to the moon in time. This Awareness indicates that these magnetic forces create the aura and life field around the earth, and that if they go far enough, or extend far enough, they may be eventually trapped by the moon. This Awareness indicates the soul essentially is always developing, is always becoming, but entities can reverse this to where the soul is being dissipated, and the dissipation of the soul is that which comes about when it is no center, when its energies are not focused and it simply surrenders, not to the Highest, but to anything in which it can gradually be dissipated into many different directions. It is a surrender to nothing.

This Awareness indicates that surrendering to the Highest allows the entity's soul to move toward the Highest, but wherein an entity doesn't recognize the Highest, doesn't recognize the Divine, and sees only the material, and the entity gives up self to the material, surrenders to the grave and to the earth and lets that become the final resting place, and sees no further life, then the entity is to some extent depleting the soul, but it would take many, many such deaths before the entity could fully deplete and dissolve the magnetic center of his or her self, which is the soul.

This Awareness indicates that it is very difficult for a soul to be destroyed. It is very difficult, even with great error, with great sin, for a soul to be destroyed, but it is possible, and some souls tend to work toward that end as self-destructive and as depleting their individuality and losing all respect for life on all levels.

Ed's note: Today the books of Kyle Griffith are out of print and unavailable.

**CLOSING MESSAGE:**

**WHEN GURDJIEFF SPOKE OF PERSISTENCE**  
(Persistence in the Wrong Direction)

**COSMIC AWARENESS:**

This Awareness indicates that the entity Gurdjieff spoke of that which described persistence, that an entity needs to be persistent to grow a strong magnetic center in which the soul is developing. This Awareness indicates he spoke of that which is persistence in the wrong direction, such as the robber who stands for hours waiting for the coach to come by, to be robbed; that there is great strength being developed in his ability to wait for hours to rob the coach; that this strength of character necessary for this waiting, the patience required, is that which is a persistence toward the end goal which this entity seeks, and this in itself is a strong developing quality.

This Awareness indicates he speaks also of how important and how necessary it is for this entity eventually to reverse that action, to undo that motion of persistence and energy for such purposes, or how necessary it is for this entity to learn to alter the quality that had been developed, for something more meaningful, so that instead of being persistent and developed, and having developed great patience to commit a crime, the entity alters this quality to do something worthwhile.

This Awareness indicates that even in error, entities can learn or can develop qualities that can be reapplied to something worthwhile. Just because you have messed up in your past does not mean you haven't certain healthy and good qualities that can be reapplied differently to your benefit and to the benefit of others. It is only a matter of taking those qualities, which you may see as

bad qualities and finding a way to express them in beneficial and healthy ways.

This Awareness indicates that most of the time, those qualities which entities think of as negative can be altered only slightly to become quite positive qualities, but one must make the discernment as to what qualities one has, and then discern to put them to better use, or to alter them so that they serve instead of hinder.

This Awareness suggests the Interpreter be brought from trance.

Thank you. (The Law of Gratitude is given)

Ed's Note: Newer members will understand more fully many of the Awareness references, such as Mana and High Mana, if they read or review the 144 **Spiritual Development Lessons**. Write Vikki T. for more information on how to obtain these lessons.

## THE MOST SPIRITUAL ACTION

The most spiritual action is surrendering to the Will of the Divine. This Awareness indicates the entity Christ in his prayer, asked that the cup be taken from him, but acknowledged a willingness to accept the cup if it turned out to be the Will of the Divine: "Thy Will be done." This Awareness indicates therefore, the entity gave a prayer, then surrendered his own will to the Will of the Divine, allowing it to determine, and accepting whatever judgment would be rendered in that determination.

LISTEN UP IN THERE! I'VE HAD YOU UNDER SURVEILLANCE FOR QUITE SOME TIME! IT IS NOW MY DUTY TO INFORM YOU THAT AS A DUTY SWORN MEMBER OF TIPS, I'M TURNING YOU IN!

Excerpt from Revelations of Awareness 90-18

More on the Ultimate Security....

### The Fear and Terror Over Reptoids (Or Terrorism Today or Anything Else)

This Awareness wishes to proceed to another step or level in understanding the present situation. This Awareness indicates that from a cosmic point of view, all entities are aspects of this Awareness, whether they be alien to earth, or inhabitants of earth, or whether they be from other planets or other systems, or other planes of existence; all are aspects of the Universal Consciousness, a consciousness that resides throughout the universe in all things.

This Awareness indicates that when consciousness began to divide and fragment, each fragment took on its own unique appearance. Many of these fragments then divided further and created multitudes of fragmented beings similar to each other. Other fragments of the original group divided into multiple fragments, creating multitudes of other beings, having different features, different from the first fragmented group.

For example, those of the Reptilian types and those of the human types came from different fragments of consciousness. This Awareness has indicated previously that in the sense of polarity, such as a line of a magnet or a magnetic bar, the positive pole on one end and the negative pole on the other end; if this bar were made of light or consciousness, and one end of that bar were to develop faster than the other end, the faster growing end would become the head, the other end, the tail.

Now, if the positive end of the bar became the head, it would result in a creature different from the bar in which the negative end became the head. This Awareness is speaking in terms of molecule levels, also in terms of galactic and stellar levels and in terms of universal levels; that whatever creature is created it has a positive and negative side, and one side is energized more than the other. The positive side, if energized more, becomes the head, and the negative side, if energized more, becomes the head.

The Reptoids were born out of the negative end of such polarized energy, and the mammals were born out of the positive side of such energies, and there are, of course, many degrees in between. Thus, you see the cat with its cat eyes having certain qualities similar to that of the Reptoids and Greys and the dog with its round eyes and round pupils having certain qualities and facial features more akin to that of the human.

Of course, the monkeys and anthropoid types are even closer to human shapes and forms and, of course, the serpents and reptiles are closer to the Reptoid forms and

shapes. This Awareness indicates that many entities have been conditioned to believe that man evolved out of the animal; that the energies of evolution coming up from the animal led to the creation of mankind, of humankind. This Awareness suggests that essentially, it was the opposite; that out of consciousness came rays of energy, split and divided like that from a prism, wherein light broke into various colors and light itself carrying consciousness, unique to its own vibration and color, then again being split, created still further aspects of being, which again split, carrying further aspects of being, which again split and continued ad infinitum.

This Awareness indicates that the animals essentially are cast off from the consciousness of humans and other higher creatures, and are splits in consciousness that occurred as this big bang of consciousness occurred, creating all of the reflections moving down into greater and greater fragmentation. Thus, the Creators, the Creator was the consciousness, but the gods that took on form were partly the next aspect of that Creator and subsequently came the plants and animals that followed as consciousness splintered and fragmented further.

#### Darwin's Theory is Backwards

This Awareness indicates that the Darwin theory that it all started out 'here' somewhere, with multitudes of atoms combining into molecules, combining into living cells, splitting and becoming larger-celled creatures, eventually evolving into small amoeba and further evolved creatures, is simply backwards of the actual creation. This Awareness indicates the humanoid type creations occurred close to the beginning, even before there were plants, but, these creations did not move into form, in the density levels of physical form, until quite some time later, after the big bang of consciousness, wherein a cooling process took place, in the sense that the vibrations slowed down sufficiently to create a flux of energy that can be classed as physical form.

#### Things You Should Know About Your Physical Form

This Awareness indicates that even the physical form that you recognize is only solid for your own perceptions, the levels of your perception. It is possible that if you were to move into other frequencies you would pass right through physical forms and not know of their existence. This Awareness indicates that cosmic rays, for example, can pass right through physical forms without being hindered or stopped by them. Were you at such a frequency, it would be the same for you.

This Awareness indicates that therefore, in this sense, the Reptoids came from a different ray than that of the humans, or that of other creatures or creators, and though they have shared in the universe together, they are of such difference in their makeup that they tend to be incompatible. They appear to be incompatible. The humans would be extremely distraught at seeing a Reptoid, and a Reptoid would look on the human with great contempt as an individual and see it only as something edible and worthwhile only in the sense of its usefulness to the Reptoid.

#### Reptoids can Recognize All Is One and Still Eat You

This Awareness indicates that with this understanding, it must also be understood that the fragmentation that started everything also was accompanied by physics principles, -principles of light and consciousness of a universal nature that will not allow the origin and source of one's creation to be totally forgotten. Thus, each being tends to develop at some stage the realization of one's own source, and the spiritual evolution sufficient to take the entity back to the recognition of the oneness of all things.

This Awareness indicates that entities can have a sense of the oneness of all things, realizing that all is one, and still be eaten by an aspect of consciousness in the sense that their own form may be devoured by the form created from another aspect of consciousness. Just as an entity can eat a peach, so a Reptoid may eat a human, even if it had evolved spiritually to the point of recognizing all is one.

#### What Really Matters

This Awareness indicates that the spiritual recognition of oneness does not guarantee that everyone will leave everyone else alone. It simply acknowledges that the forms are not the ultimate reality and that the ultimate reality is what really matters. This Awareness indicates that everyone can cling to their own shape and individuality and form as much as is possible, but it may not prevent you from losing that form. What is truly important is that you recognize your consciousness is eternal and endures forever, and that consciousness is universal, and that you can hold and cling to universal consciousness regardless of what is occurring to your form.

It is as Kapila taught: You may be the tree on the bank or you may be the river. If you are the tree on the bank, you may be washed away. If you are the bank, you may be eroded. If you are the river, you go on and on. If you are the physical body, it may be chopped down and washed away with time. If you are the bank of information holding knowledge and wisdom, things of importance to you, you may be eroded and washed away with time; but if you are consciousness, Universal Consciousness, and identify yourself with Universal Consciousness, then whatever happens to the body or to your knowledge matters little in so far as your own being is concerned, for you will endure forever as consciousness.

#### The Ultimate Security of Humans (Put Away Fear and Terror)

This Awareness indicates you may see your body, you may see your knowledge as a costume. The body is but a costume covering your consciousness. The knowledge is but a script which you use to portray a role in this life, but your consciousness is you, and you endure as that great actor, or actress in consciousness, regardless of what happens to the role or to the costume.

This Awareness indicates that this is the ultimate security. This Awareness indicates that *It* wishes you to have this kind of ultimate security so that when threats come into your consciousness, when your role is threatened, when your costume is threatened, when all the body of knowledge that is accumulated in your experiences is seen as a script for this life, and when the physical body that you have acquired through nurturing, eating, exercising and attending, is available to you, and when these two things are threatened with extinction, you may wish to preserve them, and you may do all you can to preserve them, but it is important that you not be terrorized inside if they are threatened, for your consciousness is the ultimate you, for these things are your past life when the curtain is drawn, and you have many future lives and roles and scripts for you.

This Awareness indicates you no longer are terrorized or threatened or fearful or worried about a previous lifetime that you lived, when things didn't go well, and again, it may occur that when this lifetime closes, when this play is over, you may lament and be saddened to see it end: the final curtain of one great glorious play, but it is only the beginning of the next great play yet to come.

This Awareness suggests therefore, that you put away terror and fear regarding life and death. Get into living fully; living your life to the fullest in accordance with the values that are the Highest and Best and not those that

are based on fear and terror, for those values that are based on fear and terror tend to drag down the soul, tend to weaken the soul, tend to diminish your capacity and ability to serve as the true deities whom you can be, whom you descended from, whom you truly are, when you rise above the petty self.

This Awareness indicates your Higher Self *Is* Cosmic Consciousness. Become cosmically conscious and you will have no further fear. You will be guided to play the role you are most needed for in this lifetime. You will be guided to discover the knowledge, to witness, to share the knowledge, to help others gain the knowledge they need to develop their Higher Self.

## WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

**The Wisdom of Awareness:** --On Counting Your Blessings --  
You and others upon this plane, in these places of confinement, in these levels of intensity, are blessed. For it is during these times that you are being given the greatest opportunity to learn about others, about relationships, about concepts, and about integration of consciousness. Count your blessings. (issue 78-44)

## Vegetables Whose Seeds Spell Out "Allah"

( Is It a Miracle? What Is the Purpose?)

### QUESTION:

Another question from JD. "Awareness has described how religious images such as visions of Mary and places such as Medjugorje are created by projecting holographic images, but I find it difficult to imagine how the recent spate of world-wide "miracles" are being caused. The latest example is of Moslem women cutting open egg-plants or squashes and finding the seeds clearly arranged along the virtually random cut to spell out the name of Allah in Arabic. How on earth is this accomplished?" she asks.

### COSMIC AWARENESS:

This Awareness indicates the seeds are placed naturally in certain places within the eggplant. If an entity knows exactly how to cut, it is possible that the seeds could be cut so that the letters "Allah" would be exposed in the cutting. This Awareness indicates still another way of cutting to create the word Allah would be to commit fraud and simply place the seeds there.

This Awareness indicates however, that it appears the first method is that which is the more common way of getting this, and that not all cuttings result in this effect. This Awareness asks: What is the benefit in terms of (the ) human-tragedy to have a plant cut in such a way as to spell out the word "Allah"? It would seem that if there is to be a miracle of a spiritual nature, that something more than mere advertisement would be in order.

If Allah is simply advertising his name in the seeds of these plants, what is the purpose? Is it really a miracle?

## WHERE DOES "MOTHER MARY'S" SCARY PREDICTIONS COME FROM?

### QUESTION:

A question from Lee K., Viola, Kansas, which is related. "Regarding all the Maria, Mother Mary apparitions, both past and ongoing, where does this "channel" or whatever it's called, information come from? Is it Sirian or Pleiadian, or some other worldly in nature, and does the information Mary gives on earth changes, for example, for these next 10 to 20 years-- is this valid, or are the people receiving the information being used for disinformation?"

### COSMIC AWARENESS:

This Awareness indicates much of this is promoted by the intelligence agencies that work through the Catholic Church and through the CIA, which work together. This Awareness indicates there are various kinds of technologies that can be used to create the appearance of magic, and the messages themselves can be broadcast to individuals, even so that they are picked up telepathically in some cases, with the right kind of equipment being used to broadcast those telepathic messages.

This Awareness indicates that there are many entities who will find this difficult to understand, and it is not something this Awareness can prove to you, but this Awareness can give a kind of analogy. If you were living in the past century and someone allowed you to take a short-wave radio back with you and you had an accomplice somewhere in another part of the world, and your accomplice broadcast a message to you indicating what was happening with Napoleon's army at Waterloo, and you were able to report immediately what was happening in the battle without your listeners knowing that you were getting the information from some device, they would consider it a miracle.

And, if you said this is coming to you from God, they would believe you, because they have no way of proving you are not getting the information from God. They may not believe your information until they hear it or read it in papers some time later, but once they

realize what you told them is true, they would think indeed that you were getting your information from God, prior to getting any news that you could have otherwise had.

This Awareness indicates that likewise, if there is a technology that is far beyond anything you are familiar with, it is considered as some kind of miracle or magic. The people of Europe going into Africa often took technologies common to them into these primitive countries during the last century and bought the Africans with their magic. To strike a match was magic. To heal an infection with certain medicine was magic. It is simply magic, because they do not understand how it works.

Are people any different today? If they do not understand a technology, is it not quite easy to make them think it is some kind of spiritual message from God, or some kind of magic that is being used? This Awareness indicates if on the agenda of some group who has such high technology that is beyond the understanding of people, if their agenda calls forth to deceive the masses in order to gain some end, is it not possible that they could use their technology to fool the masses and thus get the masses to agree that this is indeed the miracle that they have longed for and waited for?

This Awareness indicates it is simply a matter of finding out how the technology works, and when that is discovered, then the mystery is gone and the magic is seen as simply technology rather than magic. This Awareness indicates it has long been explained by this Awareness that magic is the ability to control and influence and change the consciousness. The stage magician uses magic of hand manipulation and deception, but there are other ways beside hand manipulation and deception to fool the masses and to cause their consciousness to perceive something that is really something different.

## THOSE STAIN-GLASS WINDOWS THAT REVEAL "MADONNA"

( The Many Ways You Can Fake Miracles for the Gullible )

### QUESTION:

In recent weeks there's been a widely publicized story about a so-called Madonna appearing in glass windows of some office building. It appears like it's stained glass, and tens of thousands of the devout have been flocking to this place, and lighting candles and so forth. Is this another example of what Awareness just described? Or is this, rather than being a phenomenon, it can be explained logically?

### COSMIC AWARENESS:

This Awareness indicates it is possible for glass to work much like mirrors; that glass can be made thicker and thinner in such a way that you cannot even perceive it, particularly if you cannot feel both sides at once. This Awareness indicates that with the lighting in a certain way and the glass being made to ripple or curve in certain ways, certain impressions can be made.

This Awareness indicates that the entity Ray Chadley invented the camera that takes three-dimensional pictures. Three dimensional pictures were not actually three-dimensional in reality. They were simply made by creating a film that had certain scratches or rips on one side which caused the light to move in what appears to be a depth and the depth gave the picture a sense of three dimensions, but it was still flat.

This Awareness indicates that this would have, in certain times, been seen as miraculous. You look at this picture and it is 3-D. You can almost reach through, except it is really flat. This Awareness indicates that likewise, the storefront glass, if it curved properly, can give certain distortions and with the proper technology in terms of cameras and lighting and so forth, you could

create an image that appears to be that of Mary or whatever else you choose.

This Awareness indicates likewise, sometime back in the Seventies, there were glasses that you wear on your face, which you look through, which causes everything to have rainbows. These were cut by a laser so that it gave a reflection in the glass that caused the light to spread so that rainbows appeared around the things you looked at when you wore these glasses.

This Awareness indicates this knowledge, this technology that is used back in the Seventies and Sixties, is not a once in a lifetime discovery, but people take this information and go on to create other things, and improve on the technology so that eventually they can do things that are far beyond what is normal.

This Awareness indicates that if they were to say "Look at the technology I invented! It creates a window that allows the feature of a person, the picture of a woman in the glass itself!" they would have some people say, "Well! That's really interesting technology! That should do a lot for the camera business!" But what have they gained?

If they can create a mystery and capitalize on the mystery on behalf of the church or on behalf of some greater agenda and not tell how the technology works, they may gain far greater wealth or benefits than in simply disclosing their technology.

#### Terminator 2: Creating Magic With a Computer

This Awareness indicates that the tabloids have already established how they can take, for example, a pillar of smoke, and through computerizing the pictures of the smoke, distort the image to make the devil-face appear in the smoke. Likewise, if you have seen the movie Terminator 2 you have seen how the computer can be used to take a man and have him point his hand in a direction and a sword emerge or evolve from his pointing finger to reach out some 10 or 15 feet ahead of him to grasp the bumper of a speeding car.

Now, you know that this is not something that really happened in Hollywood when they were filming this movie. You know that these things are not real. They are special effects, but they are done with computers distorting the pixels in the pictures, distorting the imagery so that it appears that the arm is longer and has turned to metal. In one scene the entity is seen to rise out of a tile floor, and the floor rising, then takes on the shape of a human, and the policeman from the future, who is after the young boy in the movie, now is standing with his blue suit on, ready to start pursuing the child again.

This Awareness indicates it is all done with computers in a process called 'morphing'. Morphing from the tile on the floor to the man standing requires the movement of certain pixels between those two heads and that is what you see in your viewing of the movie. You see the floor morphing into a human, and yet this would be seen as a miracle, if it actually occurred in reality.

If you were not told how it worked, and if you were a little bit more naive than you are at present, such as in the 1950's, you would say: "I saw this floor become a man! I know it happened because it was right there on the film! They did it on film! There's no way you can fool the film!" This Awareness indicates that there is a way you can fool the film. There is a way you can fool people. There is a way to make devil face appear in smoke over Waco, and it does not in any way prove that the devil was there.

It is simply a trick of photography using the processes that have been developed over the years. This Awareness indicates that these, if they are not clearly explained, or if they are not understood, if they are unfamiliar, they can very easily be used to fool the masses into believing something that simply is not so.

## Scientists Hope to Revive the Hairy Mammoth (The Search for Frozen Mammoth Sperm)

### QUESTION:

David Nihoa sent us an interesting little bit over the Internet from Reuters out of England. The subject: "Scientists Hope to Revive Mammoth" "In London, scientists are mounting an expedition to Siberia to seek out frozen mammoth sperm and bring the extinct species back to life" the Sunday Times reported.

"The newspaper said the plan was to use the frozen sperm to fertilize elephant eggs and create hybrids. Crossbreeding with successive generations would allow the hybrids gradually to become pure genetic copies of their mammoth ancestors" the report said. Sunday Times said "British, Russian and Japanese researchers were involved in the project which will hunt for frozen mammoths in the permafrost of Eastern Siberia.

"The mammoths, large hairy elephant-like creatures, died out some 30,000 years ago, but their remains have been found in several places in Siberia." Would Awareness comment about that, and if it is possible, isn't this fooling with the Divine Life Plan, that these creatures have been extinct for 30,000 years and suddenly they bring them back. Would this have any consequences?

### COSMIC AWARENESS:

This Awareness suggests that many species experienced as extinct in this particular focus, exist and flourish in alternate probabilities and such would be accurately described perhaps as a 'plan' for the species, for it involves a species' choice.

This Awareness suggests, however, that human beings have the capacity to manipulate the physical form, to manifest genetic experimentations, and can be successful to the degree that the energies gain willing participation of entities choosing to embody such forms.

This Awareness suggests that such is well within the choice and Will capability of humanity, but again, technological manipulation as well as cultural evolution, without restoration of the spiritual communication and the Adjudicator within allows humanity to spiral ever further away from their source and their destiny, and technological advancements can outstrip the spiritual understandings and wisdom to the degree that annihilation is possible and perhaps inevitable.

This Awareness suggests that the genetic manipulation of the form in particular is a signal of the necessity to reclaim the spiritual connection, so that informed and spiritually desirable choices can be made in the application of technology, so that a scenario will not be created wherein a righting or a cleansing of humanity becomes necessary.

This Awareness suggests that as humanity develops in this orientation of probability as well as in others, if the separation between physical experience, between mind and spirit remains and continues to widen, that such corrections can and do inevitably occur; as humanity directs Will Energy in directions not conducive to spiritual development and expression, they ultimately pay the price in creating the very situations that can bring their own downfall.

In this sense, humanity is indeed tinkering with the designed plan, and should they not choose to immediately restore the Divine Communication and to attune to the Divine Intention, then they will most certainly suffer from their own creations.

**The Wisdom of Awareness:** -- Attaining Christ Consciousness --  
Wherein your consciousness is clear, without beliefs, without confusions, without those distorted values and personal time-warps, then your consciousness is pure and clear, and you are a channel and are in tune with the Christ, or Crystal Clear Consciousness. (Issue 78-25)

## WHY ARE YOUNG MEN INTRIGUED WITH OLDER WOMEN?

(Why so Many Pantywaists Walk Among Us These Days)

### QUESTION:

A question from Norma Z., Vernon, New York. "Did Awareness have any comment on my previous question regarding why young men are more intrigued with older women these days? Did they know one another in another lifetime?" she asks.

### COSMIC AWARENESS:

This Awareness indicates men in the past 20 years have had very little encouragement and support in determining who they are and where they came from or what their function in society should be. Their fathers, in so many cases, were not in the family. They lived with their mother, and having a matriarchal upbringing, develop a comfort zone of living under the direction of an older woman, and they do not adjust well to taking a masculine role, of being a protector and provider because they have not seen any model of such in their life.

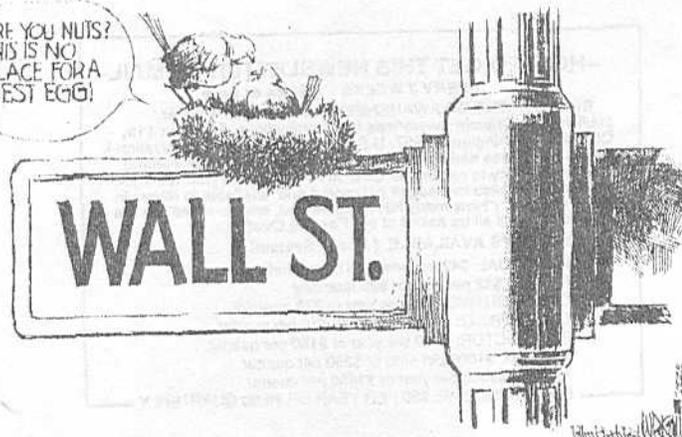

Therefore, they find it difficult to play the role of a father to a young wife or young children and find a comfort zone more to their familiarity in living with an older woman who may have provisions available for their financial necessities. This Awareness indicates that this is one of the major reasons why young men are often attracted to older ladies.

This Awareness indicates that from the older lady's viewpoint, the young man is often easier to control than a man who is older, and the young man may provide more attention to the woman than would a man who is older, who has certain other interests, however, this can also work in reverse, whereby a young man seeks a motherly spouse, but finds the motherly spouse not to be all that he wanted, and may begin to go out and run around with younger women, much as he did at home when his mother and he lived together.

In other words, the entity may simply substitute the older woman for his mother. This Awareness indicates that of course, any discussion of this type cannot be seen as applicable in all cases. This is simply a general view of many of the motives and reasons for young men being attracted to older women. This Awareness indicates every individual situation is unique and different in its own way.

This Awareness indicates in some instances, the young man might be quite shy and fearful of younger women, feeling inadequate and may feel very comfortable in the presence of an older, more manageable woman who appears to be less confused by the relationship. Many times an experienced woman will make a young man feel more at ease than would the man find in someone more his own age, particularly if he is of shy countenance.

## The Mysterious Engraved Stone in Peru

(More on Getting Rid of the Dinosaurs)

### QUESTION:

Audrey Patrick sent in a flier from a B.C. Video in New York, on two very interesting short videos they're making available. One is called The Mysterious Engraved Stones of Peru, put together by award-winning filmmaker Bill Cote, and it says: "This 8-minute trailer examines the controversy surrounding Dr. Javier Cabrera and his collection of 15,000 engraved stones. The controversy stems from the fact that on the stones are perfectly inscribed images of men with dinosaurs, men with telescopes and men performing advanced surgical procedures, such as a heart transplant and cesarium operation.

"Traditionally, men are not supposed to have co-existed with the dinosaurs, but how do we account for these accurate depictions of the Brontosaurus, Stegosaurus, Tyrannosaurus, and flying Pteradactyls? See for yourself!" Does Awareness see this as a hoax? Or if indeed these images depicted on these stones as described here are real, and if so, how?"

### COSMIC AWARENESS:

This Awareness indicates you may recall in the Cayce readings, there was the discussion of humans having so much difficulty with the dinosaurs that they came from around the world and met to decide what they should do about the dinosaurs, and decided that they should somehow destroy most of these creatures; that it was necessary to do so.

This Awareness indicates that the dinosaurs lived long after science says they ceased to exist. This Awareness indicates that they were not as common after the comet fell that destroyed most of the dinosaurs, but there were some that continued to exist after that event. This Awareness indicates that this, along with the other pictures showing certain advanced medical procedures, suggests that the civilization in the ancient past was much more highly advanced than most modern-day observers would like to believe.

This Awareness indicates of course, there was a fall in consciousness and technology which threw men back into a more dark and aggressive time. This has also been discussed in the Cayce readings and in some of the earlier Awareness readings.

### FOLLOW-UP QUESTION:

How were these things engraved?

### COSMIC AWARENESS:

This Awareness indicates that these were engraved by those entities who were commissioned to create the historic record of these tribes or civilizations in accordance with the messages that have previously been handed down verbally among the priests from generation to generation. It was an attempt to create a lasting reflection of the particular society and its most cherished information.

## The Mystery of Marcahuasi's Giants in Stone

### QUESTION:

The other video is called Marcahuasi: A Mystery In Stone. "This 12-minute trailer shows stunning photography of a rarely seen plateau 12,500 feet high in the Andes of Peru where we filmed gigantic figures, some 90 feet high, carved into the living rock of this one mile by three mile sacred mountain. Dozens of faces and animal figures are shown with computer graphics to highlight the features.

"Among the faces on Marcahuasi are mysterious parallels to Easter Island, Olmec Mexico, Ancient Egypt, and the Face on Mars, as seen in Richard C. Hoagland's *The UN Briefing*." Does Awareness see that as being valid also?"

ED's Note: At the time of this reading, these tapes were available from B.C. Video, 152 West 25<sup>th</sup> Street, New York, N.Y. 10001. Price: \$35 for the two tapes plus \$4 shipping.

**COSMIC AWARENESS:**

This is in the affirmative. It is seen as having been produced by entities who suspended themselves from ropes, from above, and passing themselves to certain ledges and crevices in the rocks on the cliffs, while cutting away the images.

**That Face Similar to the Face on Mars?**

**FOLLOW-UP QUESTION:**

How did the face similar to the face on Mars get there?

**COSMIC AWARENESS:**

This Awareness indicates it appears this was carved, not particularly as a copy of the face on Mars, but you must recognize this face on Mars as being a very simple facial shape, and this being repeated on the cliff, was more accident than copy. It simply appears similar in nature, and is not intended as a copy.

This Awareness indicates that if one were to draw a crude human face, it would very likely have a shape of a similar nature, whether it was on Mars or on earth. The crudeness does not create specific features of a recognizable face, nor are either of these general faces specific in terms of any unique features. They are very similar in that they are very primitive faces in terms of artistic quality.

A child drawing faces on a piece of paper could very easily come up with the same features, quite by accident.

**QUESTIONER:**

Well, was it an alien influence at the time when these drawings were depicted on these rocks?

**COSMIC AWARENESS:**

This Awareness indicates that it appears there was some alien influence in the societies at the time. It is not seen as to whether this alien influence directly affected the drawing, or if the entities were in any way attempting to show some kind of alien message, but it does not appear to be of any great significance.

**A SOUTH AMERICAN LINK TO KING SOLOMON'S WEALTH?**

**QUESTION:**

A question from Paul Ruzicka, Reading, Pa. He writes: "Recently, approximately three years ago, there was a find in South America by James Savoy. It is theorized that the stone tablets with ancient glyphs links the Middle East with South America, ie, it indicates the source of King Solomon's wealth. Can Awareness comment on this?"

**COSMIC AWARENESS:**

This Awareness indicates that it appears there is some evidence of a connection in the entity's findings. It appears that the evidence shows a connection between the Middle East and the South American findings, but it does not appear it takes into the account the role played by Atlantis as a continent lying between these two, which was in part a factor in the connecting link.

**The Atlantean Influence**

This Awareness indicates that much of the evidence found reflects Atlantean origins in both of the areas whether it be South America or the Middle East. The Atlantean origins of information had its effect on both areas and each of the areas having similarities to each other received an influence from the Atlantean origin, therefore, the presumption that the Middle East and the South American influences were from one another is not as entirely correct as if one would find in considering that they came from a common source: Atlantis.

This Awareness indicates in other words, Atlantis, through time, influenced both of these areas of the world in terms of culture and artifacts and art and so forth.

**Where are the Legendary Mines of Solomon?**

**FOLLOW-UP QUESTION:**

The legendary diamond and gold mines of King Solomon are supposed to have been, according to some writers anyway, in the deserts of Africa or in the jungles of Africa. Is there any truth at all to this suggestion that they were in South America?

**COSMIC AWARENESS:**

This is in the negative.

**FOLLOW-UP QUESTION:**

Have the legendary mines of King Solomon been discovered and plundered or are they still hidden to this day?

**COSMIC AWARENESS:**

This Awareness indicates that it appears the entity had many sources, some of which have been found and mined in Africa, and some of which have not yet been brought to light after having been mined during his time, and after having been shut down. This Awareness indicates that it appears a few of his sources for gold and diamond mining operations are still unknown and inactive though they were active for a time after his death, and it appears that many of his sources of old came from other countries in Africa that are since mined and that some of these mines have been depleted entirely and are of little value today.

**—HOW TO GET THIS NEWSLETTER BY MAIL—  
EVERY 3 WEEKS ! ( More or Less )**

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. ( A not-for-profit organization ). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will all be asked at the Passing Over).
