Were the Prophets Jesus, Buddha, or Mohammed Guided by Alien Forces? (Was Gabriel an Angel or an Alien?)

QUESTION:

A question from Weus Mike El (he goes by), Philadelphia, Pennsylvania. He writes "I have a question for Awareness. It appears that many of the prophets were guided by alien forces (like Moses). I was wondering if there were any prophets, like Jesus, Buddha, or Mohammed; if they were guided by the alien forces in their missions.

"Mohammed gave a small description of Gabriel in the Koran. Was or is Gabriel an angel, or an alien? If Gabriel was an alien, was or is Allah a space ship, or the Divine Source?" There's several questions in that.

COSMIC AWARENESS:

This Awareness indicates that Mohammed as having tuned in to entities on spiritual planes or through portals into other dimensions; that these entities in their contact with him were not in the form of alien beings or space craft entering into this third dimension. The entities he was in contact with were etheric entities from higher dimensions and the entity simply let go of his personal frequency and moved in to touch or contact the frequencies of higher spiritual beings.

This Awareness indicates that in reference to Buddha, this entity appears to have been a highly evolved spiritual being from a higher plane or dimension, who, born into physical embodiment, expressed himself as he moved back toward the spiritual evolution of a developing person, reclaiming or moving back toward his true identity as a higher being.

It does not appear there was any UFO type of contact or relationship with this entity in his experiences.

QUESTIONER:

How about Jesus?

COSMIC AWARENESS:

This Awareness has indicated before that the story of Jesus is based on a composite of multiple beings: Apollonius of Tyana; Jesus the Nazarene, son of the carpenter; and two others. This Awareness indicates that the story being written shortly after the Nicean council which decided to create a Roman religion to counter Greek and Hebrew religions.

This Awareness indicates that *It* does not see any of these aspects that were used in the composite of the entity Jesus as being UFO oriented or in connection with UFOs.

QUESTIONER:

Was or is Gabriel an angel or an alien?

COSMIC AWARENESS:

This Awareness indicates that essentially, It is an arch-angel, which might be described also as an architectural right-angle of the spiritual hierarchy system. In other words, an architectural or hierarchical design has certain points in the design that would symbolize the spiritual hierarchy.

There are seen four corners, each having a different angel as a representative of the corner, just as the name Jehovah, in Hebrew, has four letters: YOD HE VOD HEH, each having its own unique meaning; the hierarchical structure of the spiritual hierarchy has four corners with four angels or angles; these being Gabriel,

Raphael, Michael, and Uriel; these not being UFO captains or pilots or commanders.

HER PHILOSOPHY PROMOTES LUCIFER AS SIGNIFICANT TODAY

(She Believes the Grey Connection Has Influenced Everything)

QUESTION:

Jill Chalker of Cornwall, England sent in a page that says "Questions For Awareness," but some of these have been answered, and I'll read the statement. This is really rather strange, and I'll just ask Awareness to comment on the overall, if that's acceptable.

She writes: "If the Jehovah geneticists from Orion created the super-race of Judah in order to dominate the world of the Homo Sapiens created by Enki and Ninki, did the Zeta Reticuli Greys create the scenario of Joshua and Jesus in order to achieve what subsequently happened: The schism which separated and isolated the Judeans, placing them in the odious situations they have remained in ever since: as the killers of the Christ?"

"Did the Greys instigate the pressures that the converted Romans directed towards the Judeans as being the actual killers of the Christ instead of themselves? Can we also assume that the Greys subverted Saul on the way to Damascus? Does it follow that Hitler's Grey connection also instigated the holocaust? After all, he considered himself a good Christian. What I really want to know is, "Who are these Ascension People? Who actually is the Lord Sananda? Has Ashtar betrayed his own original choice, returning to the fold in order to hunt the free spirit he once followed into exile?"

"They say that their numbers include the Archangels Michael, Gabriel, et cetera, of the Urantia scenario, but they also say that they sent Joshua/Jesus to earth, so, are they using an outgoing situation created by someone else to achieve their own ends, which is, to gather back into their fold the souls of the fragmented spirit of that Prince of the Light whom they incarcerated here when he questioned their hierarchical dictates?"

Even in this chaos of negativity Lucifer is still apparently evolving away from their bias of the Masculine Principle towards what is anathema to them: a balance in Harmony with the Feminine Principle.

Each of the 144,000 souls they are aiming to gather and to return "home" contains a fragment of that rebellious Prince whom they now wish to imprison more securely.

Light workers beware—Nothing—Nothing is what it seems to be. This, I suspect, also includes our friend Awareness.

You will no doubt be initially horrified to learn that the most evolved spirit on this plant is Prince Lucifer's. We have all been brainwashed by the Orion group, by the Greys, by the Urantia contingency and all their minions sent here over the centuries, into believing that He is the Devil; to be feared and hated and condemned.

Through His efforts a Spirit from the Higher Realms, which are above these levels of Polarity, was able to gain access here.

The presence of this Spirit here on Earth is our only hope for actually evolving into the Divine Vibration of the Infinite Absolute.

The manipulation of our entire existence is now in evidence. It is time we woke up and began to make our own choices. We are capable." And then she adds: "Gosh! I did not set out to say any of this!"

Does Awareness have a comment for the overall questions involved?

COSMIC AWARENESS:

This Awareness indicates the entity has formulated or reiterated a philosophy that appears to have very little substance to it in order to promote the Luciferian image as being a more real and significant being. This Awareness has indicated some time back that the Rhyee, which is symbolized by the concept of Lucifer, has been returned to the Godhead and that it no longer has significance, influence or power on this plane.

Lucifer, Ahriman and Archangels Are Energies Not Entities

This Awareness indicates that the discussion of Lucifer and Ahriman should be taken as metaphorical rather than as entities unto themselves. They are speaking of influences or vibratory powers or frequencies rather than as individual personages. This Awareness indicates that much the same with the so-called Archangels; that these Archangels are more accurately described as energy points rather than as personages.

Personification: A Literary Act Used For Ages by Reporters to Make a Concept Easier To Understand

This Awareness indicates that the literary act of personification, making something appear to have a personage, such as Captain Planet or Captain Environment or Mister Freedom, or Miss Liberty, could be used to create the impression that someone exists who personifies liberty, freedom, the planet, the environment. But entities should realize these are literary techniques rather than actual descriptions, and that such literary techniques have been used down through history by writers and those reporting in order to make a concept easier to understand.

This Awareness indicates, for example, one could create a cartoon "Take A Bite out of Crime", and have crime represented as a personage, but everyone knows that crime is not a personage; it is rather a situation being personified, given a personality for a certain type of understanding.

Lucifer Refers to the Mind of Man: The Ego of Mankind Which Has Separated Itself From the Divine Consciousness

This Awareness indicates that for an entity to attempt to argue as to the rightness or wrongness or action of these ancient heroes or mythical beings who were devised from concepts and given personifications, is very difficult to analyze or evaluate using her belief that they are indeed real personages.

These are metaphorical creations referring to concepts. Lucifer is a reference to the mind of man, which has separated itself from the Divine Consciousness; in other words it is a fallen angel or aspect or angle of consciousness, and in falling from contact with the highest frequency, it becomes a lower level of mind that sees itself as being greater than it actually is.

In other words, it could also said to be the ego of mankind, which believes itself to be the shining glory of the entity, seeming much more great than it is and actually being vain in its assessment of self, and not having all the glory that it attributes to self. It is more or less what Freud would call the "ego". It is also what one could describe as the rational mind, which is constantly trying to be on top of everything, always scurrying to get a little higher and above others, even above its own self.

This Awareness indicates if entities wish to worship and follow this ego or rational mind, they are selling themselves short. These entities who seek glory in their own self-grandeur fail to understand the road to divinity is through the surrender of that self to the highest there is, to the Divine Consciousness, not through imitation or

claims of Divinity for oneself. All that "claims of Divinity and self-righteousness" brings is more ego, more vanity and more pride awaiting the fall that will surely come.

**Did the Greys Influence the Crucifixion?
(A Revue of the Composite Story of the Christian Religion)**

FOLLOW-UP QUESTION:

Is her assumption that the Greys had influence in such things as the crucifixion...

COSMIC AWARENESS:

This Awareness indicates that the Greys have made hints that they created the Christian religion, but this does not appear to be backed up by any substance. Unless perhaps in some kind of influential efforts toward certain humans, there appears to be no substance in such a statement.

This Awareness indicates It sees the circumstances of the time, the Piso family in Rome as being contributors to that which is called the Christian religion, and the various entities who represent an aspect of the Christ or the Jesus figure, and the influence of the times, including the astrological age that underwent a change during that time, from Aries to Pisces, Pisces the fish, in which the king was the Fisherman, and all the Christian religious symbols that relate, also the astrological symbols of Pisces and its opposite sign, Virgo the virgin; all of these things are part of the composite story that developed as the Christian religion.

Christian Religion Not Created to Destroy the Jews

But as for the Greys creating Jesus, or the Greys taking credit for being creators of some absolute being known as Jesus, it is all conjecture and deception. This Awareness indicates likewise, attempting to link the Christian religion with some ulterior motive to destroy the Jews is not seen as having any substance. The Christian religion grew out of a time when the Jews controlled and held power over the land, and the Christian religion grew as a very vulnerable philosophy in this dominant environment of Judaism, only gaining strength and power many years later through the act of martyrism and suffering under the persecution of not only the Roman empire, but also Jewish persecution of the early Christians.

This Awareness indicates that it is not as though the Christian religion came into being in order to persecute the Jews through other Christians such as Hitler, who by Christian standards is not recognized as a Christian. The entity's evaluation just doesn't track or make sense.

This Awareness indicates that anyone can make a case for anything by argument, but evidence that is based on substance often leads to a different result. And this Awareness suggests that if entities look at the substance in the evidence they would find it very difficult to conclude that the Christian religion came into being as some kind of plot to destroy Jews.

This does not mean that at some later time entities claiming to be Christian could not create or conspire to work against the Jews. This could indeed happen and this Awareness sees that it *has* happened in many cases, but it was not the creation of Christianity's purpose. The Christian origins were not part of a conspiracy. It simply was something that evolved out of events that occurred in those early times which led to the emotional atmosphere and environment for Christianity to blossom.

This Awareness indicates had it not been for the Christians being persecuted in the arenas of Rome, Christianity might never have caught on with the masses to the point of letting it become the official Roman religion.

Are Sitchin's Nefilim and Reptoids the Same? (Was the Sumerian Race Genetically Engineered?)

QUESTION:

A question from Patricia Miller, Sylvania, Ohio. There's several here. I'll read her statement. "Are the Nefilim and the Reptiles the same, as in Zecharia Sitchin's books? Does the Lucifer rebellion involve the Reptiles and was the Sumerian race genetically engineered by the Nefilim or the Reptiles?"

COSMIC AWARENESS:

This Awareness indicates that the Nefilim as being an earlier term for the Reptoids. This Awareness suggests the second question be repeated.

QUESTIONER:

"DOES THE LUCIFER REBELLION INVOLVE THE REPTOIDS?"

COSMIC AWARENESS:

This as negative. This was a symbolic recognition of Consciousness separating from Divinity and falling into a lower frequency, a frequency that sought to glorify itself rather than glorifying the Divine Frequency, and in self-glorification, it began to worship its own separateness, and when consciousness worshiped its own separateness and made separateness significant, it created that which became a schism which eventually led to conflict between various parts of consciousness, leading eventually to a recurrent fall of consciousness ranging from higher frequencies to lower frequencies.

This became the separation of mankind from the Divine, and the lower consciousness was termed Rhyee at first and later was named Lucifer, representing the light of consciousness having fallen from grace. This Awareness suggests that the third question be repeated.

WAS THE SUMERIAN RACE GENETICALLY ENGINEERED BY REPTOIDS? (A Revue On How Humans Were Created)

QUESTIONER:

"Was the Sumerian race genetically engineered by the Nefilim or the Reptoids?"

COSMIC AWARENESS:

This Awareness indicates that the Reptoids originally helped to genetically engineer the Cro-Magnon, or upright man, as a slave for work to be done on this plane, but the Saurian or Sirian, Enki, took Enlil's prototype and altered it, giving it a mammalian chain alteration. Enlil's creation had a reptilian brain. Enki, the Saurian or Sirian, genetically altered this and gave it a mammalian genetic splicing or infusion, whereby the mammalian brain was put as a crown on top of the reptilian brain and it began to grow and develop, to form that which is the current human brain with all of its mammalian qualities, in such a way as to allow it to eventually evolve more toward the Sirius human type.

Thus, the creation became a humanoid, as it eventually evolved more and more. These were the early Sumerian types. They had the potential to become gods, but were not originally gods. Originally they grew out of the Reptoid creation of Enlil, a Reptoid extra-terrestrial engineer, or leader in that field.

Are the Akashic Records of Earth Sealed? (Thoth Says the Older Records Are Now Inaccessible)

QUESTION:

Another question from Patricia Miller. "Thoth says that the Akashic Records of earth are sealed and there is a certain time that even *he* cannot go beyond. He cannot go beyond five and one-half million years to the older records, to 500 million years. Was this as a result of the Lucifer rebellion or the raiding of this planet? Could Cosmic Awareness elaborate on this "seal" on the Akashic Records, and will we ever know what was sealed off from us?"

COSMIC AWARENESS:

This Awareness indicates that much of this is the result of the genetic coding of Thoth in that his own being or his genes do not contain memory going back beyond that time period, and therefore, he is unable to read because there is no genetic link between the present and that early time prior to his genetic timeline.

In other words, the entity's consciousness is capable of reading the genetic memories that can be traced back to that period indicated, but his consciousness is not able to read beyond that genetic origin of himself.

Why Didn't the Reptoids Decimate Earth When It Had Little Population? (Bringing the Reptoid Schedule Up to Date)

QUESTION:

A question from JD in New York. She writes; "I want to get clear about the overall Reptoid schedule, activities and agenda, sequentially. They created the black race, yet thereafter, seemed to feel themselves owners of *all* races, --as they were using plagues against the Europeans in Medieval times. Were they thus also decimating other population centers and races at that time?"

"Mainly, I can't understand why a population under perhaps one half million in the world needed decimated back then, while they've allowed it to grow to over ten times that by the time the invasion force was arriving, currently. Do they really need to orbit near us, (i.e., once every 3600 years) to get a massive force here? Wouldn't they have better done so *long* ago, with far less and more primitive population, and long before our race has developed such destructive weapons of defense?" There's several questions there.

COSMIC AWARENESS:

The Black Race Was Originally the Blue Race

This Awareness indicates there are several statements that make up a premise that is not seen as being fully applicable. This Awareness indicates the black race was originally a blue race. *It* does not see the Reptoids as having created this blue race. The blue race appears to have been more closely linked with other human races, and the blue race appears to have undergone pigment changes because of the radiation on earth from excessive sun radiation, and the pigments causing the blue to change more toward black.

This Awareness suggests the other aspect of her question be again repeated.

QUESTIONER:

"They created the black race, yet thereafter seemed to feel themselves owners of *all* races, as they were using plagues against Europeans in Medieval times."

COSMIC AWARENESS:

This Awareness indicates it appears to refer to altering the blue race to make them black. It is seen as a refer-

ence to the collapse of that which is called the firmament, that allowed the sun's rays to enter onto the earth's surface in such a way as to cause the pigment change in the blue race, causing them to be black. This Awareness indicates that the rest of the statement continue.

SLAVE LABOR NOT DECIMATION OF RACES WAS MOTIVE OF REPTOIDS

(A Revue On How They Created Adam and Eve)

QUESTIONER:

"Were they thus also decimating other population centers and races at that time?"

COSMIC AWARENESS:

This Awareness indicates that it appears their main interest was in having control over human slaves on earth to do mining and other work that they themselves did not wish to do but which they wanted done on the earth plane so that they could capitalize on earth's resources. Their main interest was not in decimating races, but in using them.

In the creation of the Adam and Eve prototype, they were seeking to create a being that would work without question, without making decisions. Simply from being directed and told to work, these being would be obedient. The influence of Sirian genetics on this prototype caused it to question, to think for itself, to make decisions or, to put it in other terms, to "eat of the garden fruit that was forbidden: the fruit of knowledge."

The Sirian Enki May Be Equated To The Garden of Eden Serpent

The Sirian may be equated to the Garden of Eden serpent because the serpent tempted the prototypes, Adam and Eve, to *question* their creator. This Awareness indicates that in questioning, they did things they were told would be forbidden, and thus they learned to make decisions that were perhaps not to their best interests, but which eventually led to their evolutionary growth as a decision-making being.

The Tree of Knowledge was forbidden to them, for if they ate of this, they would have the knowledge of the gods. The knowledge of the gods being that ability to make decisions rather than simply obey. The gods referred to in the early meaning of this Garden of Eden story, when it was given in ancient times to entities, was referring to the prototype Adam/Eve creation of the Reptoid Enlil, and this was altered by the Enki or Sirian modification to this prototype in such a way that Enki forced the prototype to think, to make decisions.

This was not in the plans of the Reptoid, Enlil, who wanted these beings to simply obey and not to think for themselves. Thus, the mammalian brain overlaid above the reptilian brain of the human, created a new being, one that could evolve, could think, could make decisions and could learn from experiences, and alter and modify itself according to what it had learned.

This Awareness suggests that the questions again be stated.

Invasion of Earth Today by Reptoids Was Prevented by Earth's Guardians the Sirians

QUESTIONER:

"Mainly" she says "I can't understand why a population under perhaps one-half million in the world needed decimating back then while they've allowed it to grow to over ten times that by the time the invasion force was arriving currently."

WISDOM OF AWARENESS --- On Openness:

This Awareness denies entities nothing, nor does *It* force rewards through closed doors.

COSMIC AWARENESS:

This Awareness indicates at that time, that was an attempt to bring these beings in large numbers into the world in order to serve the Reptoids' slave needs; however, once Enki had interfered with the prototype creations and the beings became thinkers and decision-makers, the Reptoids questioned whether they should destroy the entire batch and start over with a new creation of slaves that was not contaminated by the Sirian influence.

They of course did not get the opportunity to destroy the entire creation and create a new batch of robot-like humans who were incapable of decision-making, and that human population has since grown into great numbers, long before the return of the Reptoid influence.

This Awareness indicates that where the Reptoids recently made an attempt recently to move back into contact with earth, most of their effort has been denied by the Sirian as a kind of guardianship over this planet, and the Sirian approach in moving earth into the photon belt and back toward the constellation of Sirius. (pronounced Sigh-rus or Serious, depending on which pronunciation entities prefer).

The "Teflon" Soul of a Reptoid is Described

QUESTION:

Awareness has indicated, I believe previously, that the Reptoids do not have souls. Is that correct?

COSMIC AWARENESS:

This Awareness indicates that this appears to have been a reference to the Greys, the Zeta Reticuli Greys, who are created genetically. This Awareness indicates that the souls of the Reptiles are not like the souls of humans. The Reptile soul appears to be devoid of the ability to attach or hold higher frequencies to it.

This Awareness indicates you have a familiar term regarding one of your recent presidents as having a "teflon" nature, wherein nothing sticks to him. This Awareness indicates that the human soul is such that it draws things that stick to it. It accumulates memories, experiences and energies, much like that of a magnet.

This Awareness indicates that, in comparison, the Reptoid souls do not hold or attach or gain from experiences in the way humans do. They would be more likened unto "teflon" souls. This Awareness does not wish to use this to make an equation that your ex-president has any connection or any similarity to the Reptoids. His "teflon" adjective or reference, had to do with political problems not sticking to him. It was simply a metaphorical imagery being used to suggest that he does not draw problems to himself. They slide off like water off a duck.

This Awareness indicates that therefore, *It* does not wish entities in any way whatsoever to think that *It* compares this ex-president to Reptoid souls that are such as to not hold experiences or feelings or memories as well as do human souls.

This Awareness indicates the significance of this is that a human soul accumulates from one lifetime to another, continually gathering information and growing and gaining more and more insight, especially in terms of spiritually evolving, whereas the Reptoid soul is simply a field of energy that helps it to function in its present embodiment.

It is more like what entities would generally think of the subconscious being a kind of collective field of energy that collects information and data for learning purposes in this life, but which does not appear to carry over any new more highly evolved spiritual realizations

from one life to another or even from one time to another in this life.

In other words, the Reptile soul does not evolve spiritually. It is simply a kind of magnetic field that helps to record experiences in present lifetime for it to learn how to function, much in the same way as that kind of energy that might be in a bear, a wolf or an animal, which is capable of learning how to survive, but not capable of spiritually evolving.

How Did Low Consciousness Reptoids Become Creators in the First Place?

FOLLOW-UP QUESTION:

Well, I've wondered, when Awareness discusses these Reptoids, down through the eons of time as being predators and captors of other planets and enslaving entities; that this seems to be a pretty low type of consciousness, and I've often wondered, how did entities like this with that type of consciousness, become creators in the first place?

COSMIC AWARENESS:

This Awareness indicates one can have technological information that is far above their spiritual evolution. These entities are spiritually un-evolved, devoid of what would be termed compassion and spirituality, but they are much more highly evolved technologically than are humans. They are also much stronger physically than are most humans.

This Awareness indicates that it is likened unto children who get control of Uzis and other weapons of destruction. These weapons of destruction are high in technological development, but the children may still be very savage and un-evolved socially, and one could say, "How can children have so much understanding of weaponry?" and "How can they be so evolved in their technological knowledge and yet be so violent and so cruel and so devoid of compassion?"

This Awareness indicates they were raised that way and they gathered knowledge of how to steal weapons or to take the works of others and to make or put together weapons from their knowledge of others who were more highly evolved technologically. This Awareness indicates these children, for example, would not be able to invent the Uzi, or other weapons, but they could learn how to use them without great intellect.

It is the same with the Reptoids. They actually have a high intellect and are capable of considerable technological knowledge, but they have little interest in spiritual involvement. They do not try to evolve spiritually in order to get along, because they have a strong hierarchy system which dictates behavior and leaves no room for deviation of the social structure, so they don't have to be ethical or moral or compassionate, because these things are not needed in keeping each in his or her place.

In a culture that has more freedom, freedom of choice, freedom of decisions, entities have to have a morality. They have to have compassion. They have to make decisions that are based on respect of each other. But in a society that is based only on hierarchy and obedience, they do not need compassion, spiritual development, ethics, and the higher qualities associated with the spiritual being, therefore, it has little interest to them and they have not developed spiritually.

WISDOM OF AWARENESS – On the Path to Awareness:

The path to this Awareness is the path of least resistance and greatest attentiveness in the sense of not resisting, but in discerning truth.

HOW DID REPTOIDS OBTAIN THE LIFE FORCE TO CREATE ENTITIES?

FOLLOW-UP QUESTION:

Well, if these entities had created, say, for example, mechanical robots, I could understand that more easily, but, as I understand it, they created entities that are animated by life-force ...

COSMIC AWARENESS:

This Awareness reminds you that Enlil created the Adam and Eve prototypes for purposes of slavery and had them created in a way that they could not think. They did not intend for them to eat of the Tree of Knowledge or have the ability to make decisions. It was the interference of Enki, the Sirian divinity, that altered the creation and gave humans the right and ability and opportunity to think and make decisions and to break with authority. The authority having been Enlil, the Reptoid.

This Awareness suggests that if this does not clarify the concern, that you continue with your questions.

QUESTIONER (AVATON):

No, it didn't. Is not the Life-Force that animates creatures, doesn't this come *only* from Divine Origin? And, if so, how do entities like the Reptoids get a hold of it and seem to be able to control it?

COSMIC AWARENESS:

This Awareness indicates that these creations of the Adam and Eve prototype did not simply come about instantaneously from a dead universe. The universe was teeming with life. The universe was filled with Life-Force. All these entities did was genetically alter creations that were *already* present on earth. The genetic engineering from using Neanderthal in order to create an early version of the upright man, the Cro-Magnon; that this was what has been described in *Genesis*, but it was described in such a way as to confuse people, who thought that Adam and Eve were the first humankind, as if a human being existed from the very beginning of the universe.

You must remember that in *Genesis* it talks of 6 days. There were animals prior to the creation of man. This Awareness indicates that *Genesis*, in its description of the Creation, was allegorical and metaphorical and not a precise description of what actually occurred, therefore your scientists, in their tracing back in search of bones, in search of ancient history of humankind, recognize that there were beings, anthropoids, that existed prior to the modern man-shape, or that which is the human of the upright nature.

This Awareness indicates that the works of Sitchin describe Enlil creating a modern man capable of doing work such as mining or agriculture. Had he not created this kind of upright being, he would have had to use anthropoids such as the chimpanzee or the monkey, or they would have had to do it themselves.

This Awareness indicates that you can imagine how difficult it would be to train an ape or a gorilla to do your mining for you. It had to have a certain degree of intelligence, therefore, they took genes from themselves, fused them with earlier types of humans, such as the Neanderthals, and created that which is the early prototypes known as Adam and Eve, although this was not their term for this prototype.

A Disney Version: The Creation of Homer and Gloria

This was simply a way of passing the story down. This Awareness indicates that it would be like a Disney book

describing how Enlil had created this new prototype of being, and suppose the Disney book was directed to be used for the teaching of others, much like the teaching of children, so it described that Enlil created the new being whose name was Homer.

We know the Bible called him Adam, but in our Disney book, let's assume he was named Homer, as simply a teaching tool, such as the Disney book *My Friend The Atom*. This Awareness indicates he personified the atom, as if it was a being, and described the way the atom works in a children's book back in the Fifties.

This Awareness indicates that in this hypothetical Disney version of the Creation, we see that Homer was created, but we do not want to tell the children that he was created to be a slave, because we are working for the Reptoid Creator, so we write that he was created, and this was a favor to Homer, to have been created, and he was lonely and so he was given a mate, and her name was Gloria.

Thus, Homer and Gloria were created. This Awareness indicates now we must give further information because something happened to this creation which led to a real downfall, as it disobeyed its creator and listened to a serpent. This serpent was named Enki. He was from Sirius, the star system known as the Dog Star, Sirius B.

This Awareness indicates that this Enki serpent went to Gloria and told her that she should have a different experience which could make her very intelligent, much like that of the gods. Of course she didn't really know how to decide on whether to do it or not, because she was not capable of decision-making, so he simply seduced her into taking the genetic shot in the back of the head which planted the seeds for a mammal brain to grow on top of her reptile brain, and gradually she began to make decisions, and went to Homer and told him that he should eat of this new project, and thus he too was tempted into having his brain modified by Enki.

And through genetic engineering from Enki, Enlil's project was ambushed and caused to change. And Enlil, finding out that his prototypes had been contaminated with the ability to think, wanted to destroy them all; he could start over and create obedient servants, those who would not defy or challenge his orders.

This Awareness indicates that, instead of the destruction, the Sirians interfered and saved many of these prototypes, and Enlil was essentially defeated in his effort to set up a slave system on earth, and was, in time, forced to leave. The Sirians remained for some time, helping to nurse the culture of humans, of the prototypes of Homer and Gloria as they grew and developed on earth.

This Awareness indicates this is just a way of explaining why the story of Adam and Eve was created. It was so that entities could have some vague idea and memory of the history from which they evolved. You must remember that in those days the teachers taught verbally; the written word was simply an outline for the verbal teaching.

At some point the verbal teachings were lost and the written word was all that survived. You can imagine what the teachers might explain in regard to those written words if the teacher could have passed on the story from generation to generation as to what was meant in the written word, just as this Awareness has explained in this message.

To take the written word literally would be a mistake. It is symbolic. It has a meaning beyond that which is written.

Who Created the Birds and the Creatures? (Dolphins and Whales Once Part of the Spiritual Hierarchy)

FOLLOW-UP QUESTION:

Who created the birds and the creatures?

COSMIC AWARENESS:

These were created long before this history of earth in terms of the Enlil/Enki story. If you are wishing to get back into the original creation of all things in the universe, do not confuse it with the stories that came from Sumer or Sumeria or those early civilizations with the extraterrestrial influences on earth, for these were long, long *after* the Creation by the Divine Creator.

This Awareness indicates that the birds came as an evolution from some of the earlier reptiles. The fish evolved into some of the amphibians and some of the amphibians became animals and some of the amphibians went back into the sea. This Awareness indicates there was a time when the amphibians were on land and had communication with Sirians, and when they went back into the sea they became dolphins and whales and other Cetacean beings of that type.

This Awareness indicates that, in other words, dolphins and whales were once intelligent members of the Sirian organization and also acted as part of the spiritual hierarchy. They still have some influence in this spiritual hierarchy in a consciousness affiliation. Their consciousness is attuned to the spiritual hierarchy. They have, through consciousness, some influence over the affairs and energies on earth.

This Awareness indicates that birds are a mutation of reptilian or reptile consciousness that mutated through an evolution along the spiritual line. They are higher spiritual aspects of the Reptoid or reptilian species. You might say that they are a spiritual mutation of Reptoid or reptilian species.

WHO SENT THE MEN-IN-BLACK TO DECIMATE CERTAIN POPULATIONS?

FOLLOW-UP QUESTION (VIKKI):

If the Reptoids were not the source of the black plague, *who* did send the Men-In-Black that spread it, or was this an attempt to erase the prototypes that the Sirians spoiled?

COSMIC AWARENESS:

This Awareness indicates that these so-called Men-In-Black appear to be from the Orion constellation, and can be seen as a kind of metaphorical parallel to your own secret intelligence agents. They are there to affect and influence affairs of humans as directed by their own leaders.

It is as though the Orion CIA was ordered to decimate a certain amount of the human population in a certain area, by introducing biological warfare, and letting it spread through rats and other animals.

She Is Spooked by Streetlights

QUESTION:

We have the same question sent in by two people. This one from Marie Templeton, in East Hampton, Massachusetts. She writes: "It seems I have a peculiar problem centering around lights, streetlights especially. Quite frequently, usually when I'm alone, I will either approach a light and it will snap off in front of me, or I could be leaving the area and one would snap off, looking back in my rear-view mirror."

"I realize some are on some kind of automatic system, but so many instances on such a regular basis has got me a bit edgy to say the least. Over the years I've grown suspicious. Does this happen to others like myself. This has gotten me spooked. Can Awareness shed some light on this subject?"

COSMIC AWARENESS:

This Awareness indicates that the same thing happens to the Interpreter's wife when she drives her car at night, particularly when turning a corner. It is simply that most street lights are set up with timers that cause the light to go off when excessive light is sensed, such as the dawn, and rising sun, but it also tends to happen when vehicles are near whose light spills out far enough to touch the timer.

Once the vehicle passes, and a minute or so passes, the light comes back on. If you wish to check this out, you may want to stop a block away after you have turned the light off and sit and wait for two or three, perhaps up to five minutes, and you will notice that the light comes back on. Or, you may also wait at a place where you have turned a light off and let several cars go by, and you may notice that one of those cars may also trigger the light to go off.

It is simply a matter of timers, light-sensitive timers turning the street-light on and off. It is usually caused by your lights possibly being out of place so that the light goes too high, or possibly the sensor is out of place so that it picks up the lights from passing automobiles when it should only be directed in areas that pick up the dawn's early light.

The early morning light will turn off these streetlights and the evening dusk, when light fades sufficiently, will cause them to go on.

Street Lights Dim as He Approaches

QUESTION:

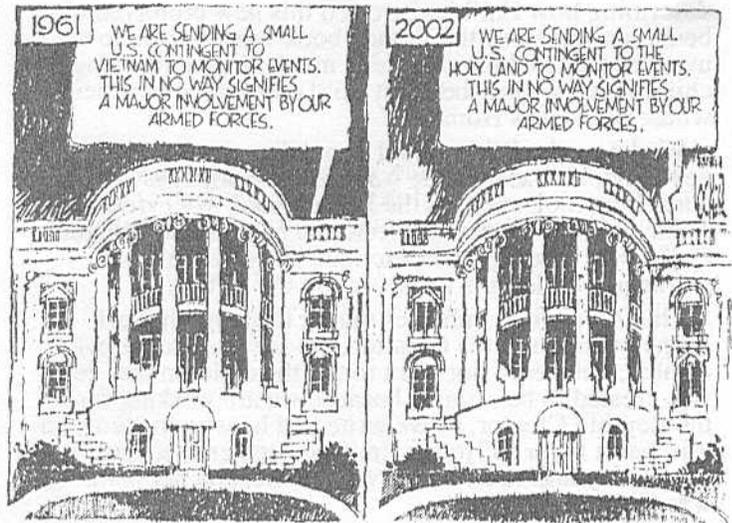

Another letter from Robert Smith in Vancouver, BC, with a little different twist. I'll ask Awareness if the response just given would also apply to this. He writes: "A friend of mine and myself have noticed several times while walking together or separately at night, that some street lights have a definite reaction to our energy. For a reason we can't figure out, whenever we walk toward the street-lights that happen to be tuned in to our frequency, they greatly dim, even to the point of appearing turned off completely.

"But after we've gone passed one of these for a short distance, it comes back on partially, then fully, to normal brightness. Evidently this phenomenon is far from exclusive to my friend and me, since I've heard on the radio that English psychic researcher Hilary Evans has started an organization dedicated to studying this oddity after constantly being asked about it, after his public lectures. Could Awareness please shed some light on this subject?"

COSMIC AWARENESS:

This Awareness indicates that this appears to be related to certain sensors that are based on a similar principle, but may be reacting to infrared or heat, so that as your body heat approaches it affects it. This may be due to warm-sensing apparatus in the light sensors.

This Awareness indicates that it does not appear to be anything supernatural. It appears that it is a natural thing, but that it is not intended to work that way. It is not intended to work on the energy of the body, but rather on the energy of light. Therefore, there is seen some kind of error in the mechanics of the sensor.

HER PSYCHIC SAYS HER HUSBAND IS POSSESSED BY 11 SPIRITS

QUESTION:

A question from Darlene Whitfield, Christmas, Florida. She writes: "I had a forceful reading done on my husband showing spirits within and rips in his shell. How much karma is related to his actions under the influence of these spirits? There were two males, four females and 5 lower spirits, plus openings at the thyroid, thymus, spleen, solar plexus and pubic area, plus rips."

That's her question.

COSMIC AWARENESS:

This Awareness indicates that *It* prefers not to pick up in the middle of another psychic's reading and attempt to respond in more detail in behalf of that particular psychic. This Awareness indicates that *It* does not care to commingle readings from one source through this source. *It* does not see this as giving valid information, and that the commingling of psychics can appear to substantiate a previous psychic's assessment or can distort that psychic's assessment or can distort the general reading.

This Awareness would rather the questions be directed to this Awareness, not in behalf of a previous reading done by someone else. This Awareness indicates the problem is that the entity *presumes* the earlier reading to be correct. This Awareness is asked to comment on the furthering of information based on that assumption. This Awareness does not see this previous reading as being correct in this regard.

Those In The Business of Removing "Curses"

QUESTION (IBID):

She has one more question. "Can Awareness explain more about the Force Field? Like the DNA massive release of ancient genetic memories encoding or alter ego sabotage encoding (sic)? I'm having the work done by photos and wonder if it is worth the cost. How important is it, and how does the idea of energy being sent out, coming back to you, if you are under the influence of negative spirits at the time?"

Evidently this is what she calls a Force Field Reading that she gets.

COSMIC AWARENESS:

This Awareness indicates that *It* is not attuned to these energies being expounded by this entity's question. *It* does not see this as having any substance. It appears there is someone attempting to give the entity readings based on some hypothetical presumption. This Awareness does not see this hypothesis as having any real substance.

This Awareness indicates that the entity does have her own individualistic DNA. These are her markers in her cells, and in the genetic make-up of her being. *It* does not see these as creating a force field based on negativity that needs to be dealt with from psychic levels to discharge that negativity. It does not see this as having any validity.

This Awareness indicates the entity does appear to have some confusion in her aura and attitudes, but much of this is based on misinformation that has been given to her over a long period of time and some appears to have come through entities who are simply trying to persuade the entity she has a problem that she really does not have, unless she buys in to the persuasion.

This Awareness indicates it is a sad thing that some psychics tend to use the old trick of convincing a person that they have a problem in order to sell them the formula or pill for the solution to the problem. They first must convince the person that there is a problem; then they may work to give them a cure for the problem.

This Awareness indicates that in this case, the entity does not appear to have a genuine problem other than buying in to the belief that she has a problem which needs a remedy. This Awareness indicates that *It* sees no real problem for which a remedy is required other than if you put your faith in the belief of a problem, then of course the remedy would be to rid yourself of the problem.

This Awareness indicates that it is something that anyone can do for you, if you put your trust in them. The belief that you are cursed, for example, can be cured if you believe someone says they can remove the curse for \$5.00 or \$20.00, whatever amount you feel is the appropriate price for curse removals. If you give that to the person, then of course, the curse will be lifted. It did not exist in the first place, but if you *believe* it did, then it can have a negative effect on you.

Your belief is what has the negative effect, not the so-called curse, and if you pay someone ten, twenty, forty, a hundred, or two hundred dollars to remove that curse, and you believe your money can buy that freedom from that curse, then your belief that you are free of the curse will have a positive effect on you.

This Awareness indicates it is simply a game that you are indulging in. It is expensive and it is pointless. This Awareness suggests, however, that many people get involved in these things, and those who collect the money enjoy the benefits of having removed your curse from you and can feel that they have done something worthwhile, even if they have to kid themselves into believing they actually removed a curse.

This Awareness indicates in most cases these entities can be convincing to themselves so they do not actually believe that they are defrauding you, but they generally develop, after doing this a few times with entities, they develop a belief that everybody has a curse on them, and when they tell someone, "You have a curse on you, and I can remove it!" they generally believe that is true, because they have seen results in previous instances.

Therefore, by telling the person, "You have a curse!" and the person then becoming concerned about it and paying to have it removed, and then removing the curse with the collection of whatever the cost for such removal, the practitioner feels that the person is then free, and the person who has paid to have the curse removed feels as though he or she has accomplished something because they paid out so much money and therefore, they expect the curse to be lifted, and since they expect the curse to be lifted, they behave differently, they feel differently.

And the practitioner who collected the money for removing the curse feels good about himself, that he or she helped to make this person's life better by removing the curse, and the entity is then convinced that he or she has the ability to remove curses from people.

This Awareness indicates it is not something that is blatantly fraudulent in the sense of intending to defraud the person. It is more that the entities just don't grasp the principle of how this works and they are easily persuaded because they want to be persuaded that they can actually remove a curse and that others have curses on them which need removal.

This Awareness indicates that in this questioner's case, the nature of the curse is a little more subtle and not quite the same terminology. By referring to it as a genetic disorder in the force of a DNA disorder or DNA force disorder, it is different from just saying that the entity has a curse. It is a little more subtle and sounds for some people more convincing, but it is essentially the same principle and same approach for earning money by using suggestion on an individual who is being misled.

This Awareness indicates in most cases, the practitioner receives money. In some cases, they may simply receive self-importance and not charge. But in either case, they are apt to be doing more damage for the entity than is needed.

One Psychic's Way of Removing Curses

FOLLOW-UP QUESTION:

Well, sometimes there's some that are very questionable as far as perpetrating fraud. Sam Millar tells the story that a number of years back some so-called psychic set up shop in neighboring Lacey out here, and the main story she told most of her clients who came in was they either had a curse put on them or they had obsessive spirits, and she could remove the spirits or remove the curse only if they brought in a five foot cross that was wrapped around with twenty-dollar bills, to the point where you could not see the wood of the cross, and when I heard about that one, I figured that's getting pretty close to fraudulent.

Would you agree with that?

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates that surprisingly, quite a number of people would do this. This Awareness indicates it is very easy for entities who are going through the usual difficulties of life to have someone inform them that these difficulties are caused by a curse, and to be convinced that if the curse were lifted, their life would be more pleasant.

Most entities have difficulties in life and most cannot understand why, and most would like to think that they are loved by God and therefore, would be very lucky in life were it not for some ill-fated wind or curse that had been placed upon them, so when someone tells them they have a curse put upon them, it is very easy to rationalize and to believe: "Oh, this is why I have so much trouble in my relationships or in my finances!" or whatever, and therefore, they are willing to give it a try.

They have put out money elsewhere and lost, why not try this? This Awareness indicates that what they fail to realize is that it may simply be a matter of their own being, their own personality, or the chart of their horoscope or their essential pattern of personality and character that prevents them from fulfilling their highest potential.

This Awareness indicates there are many entities who have personality traits that push them toward achievement while having one or two other traits that hold them back, and cause them to fail at the last minute. This Awareness indicates that these entities would be quite susceptible to the suggestion that they have a curse on them.

This Awareness indicates the curse may simply be that they get cold feet at the last minute and fail to show up for an appointment or interview or fail to respond properly to something that needs a more positive response. This Awareness indicates that it is very easy to shift the blame from one's own inadequacies to that of a curse. It alleviates your own responsibility for yourself and puts it on some abstract curse that you would just as

soon pay to get rid of rather than have to deal with in a more realistic way, if it is a characteristic of your own psyche that needs fixing.

How Common is Real Spirit Obsession? (And What Do People Do To Attract Obsessing Spirits?)

FOLLOW-UP QUESTION:

In cases of true obsession by spirits, I've read Dr. Wickland's book *Thirty Years Among The Dead*, wherein he and his wife, who was a medium, takes on the spirit that is obsessing someone with a severe mental problem like that and then the doctor would reason with the spirit and explain what he was doing and why he shouldn't and so forth, but these were very exceptional and dramatic cases in that book. My question is: How common is it that the average person would have spirits obsessing them or hanging around in their aura as the original question by this lady implied?

COSMIC AWARENESS:

This Awareness indicates that entities who partake of drugs; this particularly in reference to the illegal drugs, entities who are prone to insanity or hallucinations, entities who are laden with guilt from traumatic events of the past; these entities are more susceptible to invasion of their psyche by spirits.

Entities who drink heavily, who get drunk; they are inclined to draw in spirits. This Awareness indicates that most entities who are conscientious, willing to work and do what they can for themselves; people who are generally responsible in their behavior, are not likely to have spirit interference in their lives.

This Awareness indicates that those who are excessively emotional, who cannot keep a balance in their behavioral expressions, but who fly off to extremes of behavior, who are abusive or unreasonably frightened and paranoid; these entities may tend to draw in spirits.

This Awareness indicates that even in such cases, spirits can only gain control over the entity if the entity willfully allows them to rule his or her body and mind, spirit and emotions. This Awareness indicates that when an entity becomes lazy in terms of self-control and the spirits are hanging around, the spirits may tend to take over the operation and management of the body.

It is not that which is extremely common, but it is also not that which is too uncommon. This Awareness indicates that entities staying away from drunkenness or drug indulgence and various forms of emotional indulgence and lazy self-will are not likely to have problems with oppressive or obsessive spirits.

Spirits do not like to hang around someone with whom they cannot manipulate.

A New Virus From Outer Space?

QUESTION:

In a note from Larry Benedetto, Berwin, Illinois, he mentioned: "Have you heard of a brand new virus hitting our world from outer space? Lasta virus; which could be worse than AIDS, but there is a cure," he says.

Does Awareness see that there is such a new virus from outer space, as he indicates?

COSMIC AWARENESS:

This Awareness indicates that it appears there is something of this nature that is being released through the Greys and Orion groups which is a form of bacteriological warfare. This Awareness indicates it does not appear that this has been widespread, or has had any major effects anywhere as yet.

This Awareness indicates it appears that its purpose would be to help destroy humanity in the event humanity becomes a threat to the alien presence. It is seen that the Greys and Orion types appear to be immune to this; that the Reptoids are also immune to the more harmful effects from this virus. They appear to have some minor disturbances in regard to the virus, but that the humans are more susceptible to extreme problems.

This Awareness indicates does not see the name that was given in connection with this, but suggests that the name may be correct. The source of the name is not seen. It appears this entity has received information from some source giving that name and this may be accurate.

FOLLOW-UP QUESTION:

He says there is a cure. Is that correct?

COSMIC AWARENESS:

This Awareness indicates it appears there are ways by which this can be remedied. This is correct. This is not seen at this moment; that there appear to be those within your government who understand the cure, or ways by which the problem can be remedied and preparations are being studied and considered for developing these remedies, in case the virus or disease is unleashed on the world.

**What Created Universal Consciousness?
(He Wonders How Cosmic Awareness Came Into Being)**

QUESTION:

A question from Nicholas Lucia, Oak Park, Illinois, which starts with a quote from Awareness, from Issue # 78-40, where Awareness says: "All that was created in the beginning was the Universal Consciousness, and out of that Universal Consciousness the various aspects of this Awareness, which became the entities of the universe."

His question: "Since consciousness is fundamental to creation, what was that that created Universal Consciousness?"

COSMIC AWARENESS:

This Awareness indicates that this wording was perhaps slightly off. What was intended or more accurate in terms of this is that all that was in the beginning, was Universal Consciousness. The Universal Consciousness always was. It was a self-created essence. Consciousness creates itself. It turns and it reflects upon itself. It is a frequency or vibration that generates itself through its own vibration and in the act of vibrating or shimmering, it can become aware of its vibration, aware of its shimmering, and in this manner, become self-aware.

This Awareness indicates of course *It* is not aware of things, it is not aware of thoughts, until things and thoughts become a creation emanating out of consciousness. This Awareness indicates that in the beginning was Consciousness. In the beginning was frequency, vibration of the highest order, and as it began to vibrate on a wider scale, it created lower frequencies and the lower frequencies gained what might be termed more tendency of material essence.

The higher the frequency, the more vitality or life, but the less substance. As the frequency drops into wider range and greater vibration, the substance increases, for you have the ups and downs in the frequency valleys and in that extreme, there is more substance to recognize than in a tiny frequency vibration that looks almost like a straight line, when viewed on an oscilloscope.

This Awareness indicates that in other words, the ripples that become greater and larger create more substance for consciousness to recognize than the ripple

that is created by just a slight passing breeze, for example, and therefore, the original or higher frequency or consciousness, when undisturbed, is in a state of rest, of absolute peace and is equated to the void, or nothingness.

But, once this state of nothingness and void is disturbed by something that vibrates it, moves it or increases in its vibration, to rock the boat or shake the jello, and as it increases more and more there is greater and greater recognition of substance. This Awareness indicates the substance eventually becomes that which is known as the material world, or materiality.

This Awareness indicates that regarding the question of what created the original essence; It simply was *Its* own self and *Its* own self was essentially nothing. Essentially *It* was a big zero. Essentially, the zero, the nothingness began to vibrate at greater and greater speeds, as though it were discovering *Itself* and turning upon *Itself*, recognizing *Itself*. That became the original Creator of all that followed by way of substance.

It was all such a subtle thing that took place over so much time that the movement of frequency in your time periods could have taken trillions and trillions of years before *It* became self-aware. And after self-awareness, *It* could have taken billions and billions of years before *It* recognized any part of *Itself* as substance.

This Awareness indicates that this was long before any material substance or vibration existed.

Edgar Cayce's "Creative Forces"

FOLLOW-UP QUESTION (IBID):

He had a couple of follow-up questions. "Edgar Cayce uses the phrase "Creative Forces." Is this identification also permissible?"

COSMIC AWARENESS:

This is in the affirmative.

QUESTION (IBID):

His other question, which is probably redundant: "What exactly *are* the Creative Forces and what way do they differ from the consciousness of Cosmic Awareness?"

COSMIC AWARENESS:

This Awareness indicates the Creative Forces are any forces throughout the whole spectrum of consciousness that move or touch or interfere with any other part of consciousness. Once there is an effect of one aspect of consciousness on another, there is creativity.

This Awareness indicates that if there is an awareness of something, there is creativity. If that awareness influences or alters or changes something, there is creativity. Therefore, the very action of movement, even of the most miniscule movement, in terms of consciousness, *is* Creative Force.

This Awareness indicates that in the greater levels of Creative Force or in the more subtle levels of Creative Force, all are subject (to) and defined by movement. The movement of consciousness is key to any Creative Force. The very act of changing one's mind or of moving one's consciousness toward a certain object of direction or focus is the Creative Force in movement.

**PERSONAL POWER AND THE SORCERY
OF CARLOS CASTANEDA'S DON JUAN**

QUESTION:

A question from Joyce Williams. She writes: "The "sorcery" of Don Juan in the Carlos Castaneda books, a

lot of it involves getting, storing and using personal power in appropriate ways, and yet, there seems to be many cautions here. On a personal level, one can get addicted to power. I am wondering if spiritually, doing this kind of magic can be dangerous and how?"

COSMIC AWARENESS:

This Awareness indicates indeed, seeking spiritual power can be dangerous. The concept of power is that which gives you something of a leverage over others. This Awareness indicates there is muscular power, which gives leverage over others. There is monetary and financial power, political power; each of these gives leverage over others. There is also that which is spiritual power, which gives leverage over others.

The karma or negative aspect of such power is not necessarily linked to the source of one's power. Just because one has muscles, does not mean that the entity is a bad person. It is all a matter of how those muscles are used in terms of leverage over others.

If the entity does not use the muscles to take advantage of others, then the entity is not what one associates with as an evil or negative person. If one uses his muscles to get leverage over others for personal gain, the entity may be classed as a bully or a ruffian. This Awareness indicates the same may be said of those who use money for power. Money can be used to help others or to hinder others.

This Awareness indicates those who use spiritual energies, energies of the type that make use of consciousness and spirit, may use these energies for the good of others or may use these energies to harm others and promote themselves. This would be a misuse of spiritual energies and therefore, inappropriate.

This Awareness indicates that therein is the key. If the energies are misused, giving one an advantage over another at the expense of the other, then the entity is misusing the power. This Awareness indicates there is another aspect of this to observe. If you are able to see and all other people in your village are blind, you have an advantage, but if you, being able to see, do not take advantage of those others to damage them, to cause them harm, to hurt them; in other words, using your ability to see at their expense; if you do not do this, you are not in violation to these people.

You are simply more powerful or more capable and have an advantage which you may as well continue to have. There is no point in blinding yourself to be equal with them, so as not to have an advantage. This Awareness indicates that if you have an advantage, use it, but do not use it at the expense of others.

What Are Those "Allies" in Castaneda's Books?

QUESTION:

In relation to the work of Carlos Castaneda, Jeff Mueller asks: "What are these "Allies" that Carlos mentions all the time? Are they astral beings?"

COSMIC AWARENESS:

This Awareness indicates that this would be either being in the sense of disincarnated spirits that are friendly to him, or they may simply be energy fields that are associated with certain concepts that he develops. This Awareness indicates that it must be understood that all concepts carry energy and if one has a concept of something that is harmonious and beneficial and sees these harmonious and beneficial concepts as though they were living entities or energy fields, then these energy

fields often follow the concepts as they are energized by the entity.

Therefore, you can create Allies by energizing concepts that become part of yourself or accompany your lifestyle, and in so doing, it is likened unto having a band of angels follow you. If you energize concepts that are of a negative nature, such as "I always lose!" and if you have that concept hanging around you all of the time, then this can be likened unto a negative angel or demon that haunts you and forces you to always lose.

This Awareness indicates therefore, these so-called Allies are not necessarily beings in the sense of having arms, legs, eyes, nose, mouth, head or body; they may simply be balls of energy that are invisible which accompany concepts that you carry with you.

AWARENESS LOOKS AT THE WORKS OF CARLOS CASTANEDA

FOLLOW-UP QUESTION:

The Castaneda books are full of what they call sorcerers, who flutter in and out in various guises and there's sort of a one-upmanship type of thing going on among them, and they use familiars, such as owls, to spy on other sorcerers and so on; this body of knowledge, or this work of Castaneda's; could Awareness give an overall percentage of how much of that is valid and how much is just good writing for people?

COSMIC AWARENESS:

This Awareness indicates that it is generally *all* valid, but you must realize that the nature of the Yaqui Indian philosophy is such that it creates for the followers, images that are easy for the mind to understand and grasp. Therefore, if you realize that these so-called beings that are part of the sorcerer's life are simply energy fields that are associated with concepts and ideas and do not take them as literally being spirits, or disincarnated beings, but see them simply as forces of energy accompanying concepts, then you are closer to the reality.

This Awareness indicates that if, for example, all these being in fact were nothing more than concepts with energy fields accompanying them, giving certain vibrations and if indeed an entity is capable of using these energy fields to affect the physical reality, that in itself could be a good description of reality for these entities, but it is harder for the average person to grasp such an abstract view of reality, than if you personified those energy fields and put names and faces to them or attributed animals and birds to them and gave them certain qualities associated with animals and birds, so that this particular concept of traveling to a distant place for a message is given the concept of a bird and you visualize this bird going to a different place for a message; it becomes easier for you to relate to.

This Awareness indicates that this is the way the mind tends to work. It likes to put things into images that substitute for the reality of forces. Thus, there are forces in consciousness and in reality, and these forces are often identified by labels, words, images or appearances that are superimposed upon them and in the American Indian philosophies, these became the basis for many of the teachings used by these tribes.

In Oriental philosophies, they may have been other images superimposed on horses to serve as ways by which the message could be clarified and conveyed from one person to another. This Awareness indicates in Western philosophy, most heavily relying on words, these teachings have been conveyed through words and

names. Thus, you have long writings conveying a philosophy for Western civilization, and the words themselves carry pictures and images, but are not as clearly presented as a true picture or image that might have originally carried the idea in Egyptian or early Hebrew or Phoenician writings.

This Awareness indicates in other words, if you look at the Carlos Castaneda writings as defining horses and recognize the images that are used to convey the meanings of these horses are actually but frosting on the cake and not to be taken literally, then you are closer to the truth and you can recognize all of these shamanistic images are really just forces being written of in a colorful way. Then of course, the book becomes accurate and valid.

The shamanistic images are part of the colorful conveyance of information but are not necessarily descriptive in the absolute sense.

HE SAID: "DON'T EVER LOOK AT THE GURU'S PICTURE"

QUESTION:

Another question from Joyce Williams about this. "I am studying with Tony Chester in Tucson who studied with Rama, also know as Dr. Frederick. Rama's teacher was Sri Chinmoy in New York City. He says, supposedly: "Don't ever look at Sri Chinmoy's picture." There is a lot of Carlos Castaneda's teaching involved." And she asks: "Is there something detrimental passed along with this variation of meditation?"

COSMIC AWARENESS:

This Awareness indicates that *It* does not see this as having any special reason behind it other than by creating a statement of that type: "Do not ever look upon this entity's picture!" it would cause more entities to want to look at his picture than might otherwise wish to do so.

This Awareness indicates that it does tend, when making such a statement, to suggest that the entity's picture has great power, or has some kind of special power, and this of course would be quite flattering to the entity, and would indicate or imply the entity as having special powers, so there is likely some kind of manipulative intent behind such a statement.

As far as any real reason for such a statement, this Awareness does not see any reason whatsoever that entities should avoid looking at his picture other than if they are simply not interested.

HOW COME THESE AUTHORS NEVER MENTIONED ALIENS?

QUESTION:

One last question on this subject from Jeff Mueller. This question has been asked by quite a few people. "How come in the Carlos Castaneda, Lynn Andrews and Seth books no mention is ever made of aliens?"

COSMIC AWARENESS:

This Awareness indicates this is not a question for this Awareness. It is a question for these entities. Why is it that in history books, no mention has been made of aliens? Why is it that in cook books no mention has been made of aliens? This Awareness indicates that, after all, aliens probably eat, and therefore, you would think some reference in some cook book to aliens might be conceivable.

This Awareness indicates these entities were writing about other topics and aliens apparently were not part of

their books or part of their interest in writing the books. The question appears to be implying that if aliens actually existed, these entities would have written about them.

This Awareness indicates that perhaps these entities did not know anything about aliens or did not have aliens on their mind when writing the books. This Awareness asks: why is it that in the earlier messages from this Awareness when *It* spoke of many different topics, *It* did not speak of aliens? It is the same kind of question. It was not ready to speak of aliens in the early Seventies.

This Awareness indicates that the timing was not right, the interest was not right. The release of information could come about when there was the right timing and the right energy and receptivity. During much of that time there were entities who so strongly believed the aliens were our Space Brothers, that any mention otherwise would have resulted in an extreme flood of hostile letters.

It took quite some time before entities could be receptive to other types of viewpoints on the aliens. It took quite some time before there was enough evidence to even substantiate a mild claim that aliens existed on this plane.

This Awareness indicates that if you promote a truth far in advance of people's readiness, you are simply asking to be shot down. This Awareness indicates that these books mentioned came out at a time when this Awareness did not either speak of aliens. Were these entities writing books today they might speak of aliens.

This Awareness also asks the question: Why is it that in the book *Gods Of Eden* the entity writing about aliens did not speak of the 12 levels of reality or the central core belief as was spoken of in the Seth books? This Awareness indicates obviously, this topic was not focused on that information. Does it mean that the Seth books were in error because this man writing *The Gods Of Eden* book did not mention the information in the Seth books?

It is the same logic.

Is Short-Term Memory Loss Reversible?

QUESTION:

Another question from Joyce Williams. "I have noticed people having short-term memory loss; teen-agers on up. My friend in Athens refers to it as people "shorting out." (I say "meltdown" at times). I attribute it to stress, worry over economics, stress over the ever-increasing paper work and details, along with a general raise in consciousness (which is stressful for us who resist, and we all do in some ways.)

"I'm wondering as I rapidly (and stressfully) 'Simplify Simplify Simplify' (Thoreau)-- is this short-term memory loss reversible, and will conditions allow it --or will we all adapt successfully again?"

COSMIC AWARENESS:

This Awareness indicates that certain vitamins from the B complex, particularly that which is available in pasta can be most helpful in improving one's memory. This as choline; that phos-choline as a good source for improving one's memory. Often entities under stress do not have enough phos-choline in their system and the memory, particularly short-term memory, will be the first symptom of the shortage of phos-choline.

This Awareness suggests that entities having sufficient amount of pasta in their diet are not likely to have this problem; that some breads contain this substance also. It

is common to wheat flour and other grains. It can also be purchased as a vitamin type supplement. This Awareness indicates it has been used effectively against Alzheimer's disease and other diseases which are associated with memory loss, to help restore memory at times when entities may need such help.

There is No Epidemic of Memory Loss? (A Shortage of Blood-Sugar to the Brain)

FOLLOW-UP QUESTION:

Then there is no epidemic of short-term memory loss due to changes in consciousness or to anything outside of the entity itself?

COSMIC AWARENESS:

This Awareness indicates that stress can lead to this. Also, entities having low blood sugar can experience short-term memory loss. The brain does need sugar or glucose in order to function properly, and if it becomes short on glucose, the memory will suffer, even the memory of one's name or of the use of language can be encumbered.

This Awareness suggests therefore that if it is of such severe levels as to cause an entity to mis-think or lose the ability to think in clear tracks, whereby for example, words are lost, thoughts are incoherent and the entity has not been using drugs or alcohol, it may simply be a shortage of blood-sugar or glucose to the brain.

This Awareness indicates that usually, a meal or a snack can help feed the brain sufficient amounts of glucose to put the mind back in order. This Awareness indicates in some extreme cases, the entity might be suffering from blood loss to the brain due to a stroke or other complications and suffer similar experiences but usually, this will be of a more prolonged duration and is not likely to be as easily corrected.

Does a Black List Exist for UFO Believers? (Is The Aerospace Industry Against New Age Thinkers?)

QUESTION:

A question from Catherine Joyce, Las Lunas, New Mexico. She writes: "I am unemployed and have been for four years. I have a question for Awareness. I believe a "black list" has been circulated through the aerospace industry, basically black-listing all those who are independent thinkers, psychics, interested in metaphysics, ESP, UFOs, free energy and so forth.

"It seems that everyone I know who is into these things lost their employment in late 1988. Would Cosmic Awareness please comment on this?"

COSMIC AWARENESS:

This Awareness indicates that it appears your assessment is correct. It appears that someone in the higher echelons had an aversion to these topics, to these areas, and did not want workers employed who might have some interest or understanding of such topics.

It appears that this was especially so in regard to interests in UFOs; that the aerospace community prefers its employees not have an interest or any knowledge of UFOs other than what it may wish to feed them at some future time.

WHY ARE MOST "MASTERS" HEAVY AROUND THE WAIST? (Beer Bellies, Diabetes or Insulation?)

QUESTION:

A question from Dan Towle, in Zephyrhills, Florida. He writes: "All of the pictures of the "masters" show them to be very heavy around the waist. Is this a typical

finding because of the power and activity of the third chakra in a "master" or does the extra fat act as an insulator to keep everyone else's energy from impeding that of the "master"?"

COSMIC AWARENESS:

This Awareness indicates that it appears to be more in reference to the first suggestion. This Awareness indicates there is also a tendency among psychic teachers and leaders of this type to have a propensity towards diabetes. It is partly because of the excessive weight of the entity, but also has much to do with the general make-up of the entity's psychic and its make-up tends to parallel the make-up of diabetics.

There are certain patterns that accompany behavior and talents and some of these patterns lead to diabetes and some lead to psychic behavior and it appears the patterns leading to psychic behavior and to diabetes are very close in their pattern and make-up. They tend to parallel each other.

FOLLOW-UP QUESTION:

A second part of the question I asked was: "As the vibrational levels of this plane rise, will we all get chunky to protect the solar plexus?"

COSMIC AWARENESS:

This Awareness indicates that this is not seen as a general likelihood. It may occur for some entities.

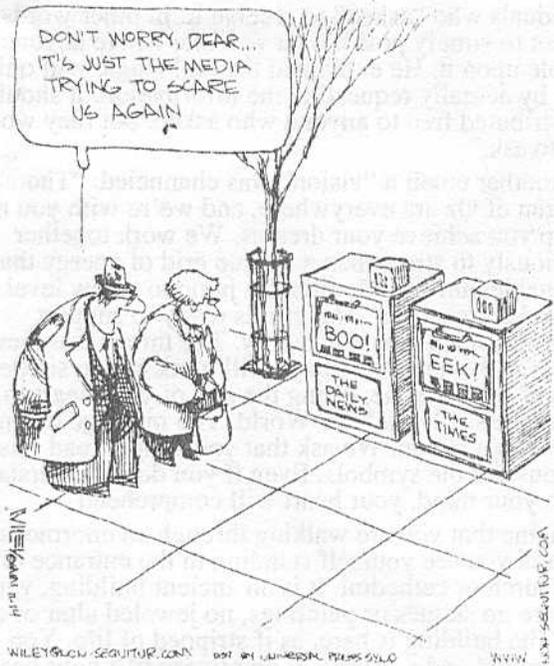

The Vibrations in Consciousness Are Unique

CLOSING MESSAGE?

This Awareness indicates the vibrations that accompany each aspect in consciousness are totally unique to that particular aspect of consciousness, whether it be an entity, an energy concept or whatever. Yet, there are many entities, many concepts, many different aspects of consciousness that are quite similar in nature and have much in common which can be shared, and the nature of vibration is such that entities who are in harmony on some levels can vibrate together in a kind of mutual harmony, and in some cases, one entity may vibrate in a manner that compliments another, such as in the notes of music, where certain complimentary vibrations create harmonious chords.

This Awareness indicates with this understanding you can perhaps see how the universe creates aspects of itself that vibrate in harmony, while at the same time, creating other aspects that seem to clash with each other. That some of these clashing energies tend to destroy each other. Others in harmony tend to strengthen each other. This Awareness indicates that in some cases, the mutual harmony of two notes in the universe may tend to help each note evolve into greater clarity and perfection.

THE PICTURES ON THE COVER

Introducing Abigail the new C.A.C. cat. Last spring we stopped by to see my son Tom who has an outboard motor shop on the bay in downtown Olympia. While we were talking I noticed an unfamiliar looking cat chasing one of Tom's old cats around the boats outside. At the moment Tom has 7 cats that have adopted him over the years that are still around. Each time one had appeared his wife Teri would take it to the vet and have it "fixed" so no kittens would appear in the future. Over the years many feral cats had appeared and all were fed salmon scraps left by the fishermen that hang around Tom's shop lying to one another about the monster fish they just caught. Anyway, Tom has always seen to it that food and water is always available.

Tom said, "That's a new cat, been around about three weeks now. Trouble is, she's a real bully, chases Sadie and my other old cats and fights with them. Could you guys use another cat?" Vikki looked at me and I nodded, "As long as she's not pregnant." Teri assured us she wasn't and called the cat and it came over. We picked her up and examined her. She was a really pretty tabby with yellow highlights that appeared to be Abyssinian. She was skinny but I felt something hard in her tummy. Tom said she was just full of salmon. We took her home.

Vikki named her "Abby" because of the Abyssinian. I started calling her "Abigail". She quickly took over the office, hissing and spitting at Wilber and the Bear. She soon discovered the rubber heat mat beneath Vikki's desk and took a very aggressive stance when Wilber or Bear meandered over to that area. She would sprawl out on that mat, lay on her back with all four paws up in the air and snooze there for hours. Very poetic. We took many photos of our new pussy cat.

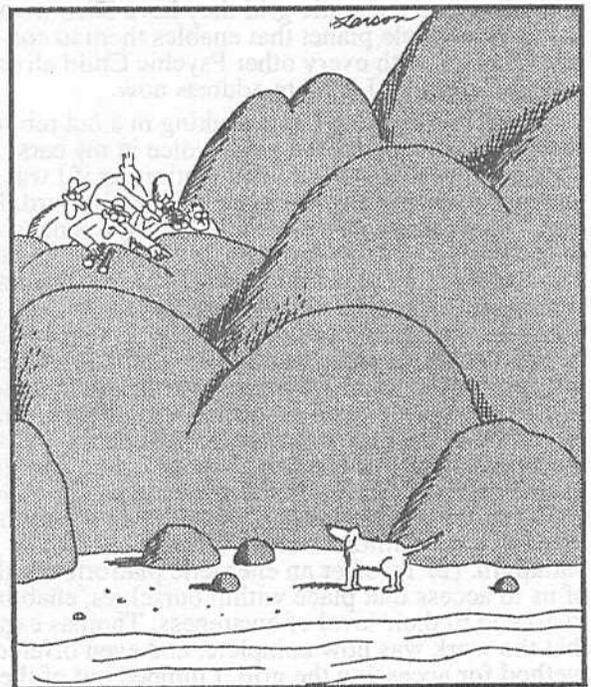

Within a week she had driven Wilber out of the shop. At first he took to the high ground in the office whenever she stalked him and chased him when she caught him at the cat feeder. Wilber became an outdoor cat and stopped using the cat door to enter the shop. In the meantime, Vikki set up an appointment with the vet to get Abigail "fixed". She was also gaining weight and I was beginning to get suspicious. However, Teri had

assured us there were no tomcats that she knew of around the outboard shop and Vikki had closed the cat door at the office to confine Abigail till she got used to things. And we have not seen a tomcat around here for 15 years. However, she did sneak out one day when I left the front door open for a minute when the UPS truck stopped by. I later spotted her rolling around in the driveway with an extremely contented look on her face.

One day Vikki was sitting at her computer with Abigail snoozing on her lap when she suddenly felt movement. Surprised, she reached down and felt her tummy, then announced: "Avaton, your cat Abigail is pregnant!"

It turned out she was. About 4 weeks later 5 little kittens were lying in the basket beside Vikki's desk. It was an interesting and enlightening experience to watch Abigail and those little cats. She was an excellent mother who watched and tended those kittens every minute. Two weeks later they were running all over the shop, playing and raising hell you wouldn't believe. We put the word out that 5 kittens were available and immediately we found homes for the new arrivals. By the time Abigail stopped nursing them this fierce little ball of energy—those 5 little cats—were all in new homes and peace and quiet returned to the CAC shop.

Vikki took Abigail to the vet and had her "fixed". The vet said she was a year and a half old and weighed 7-1/2 pounds. Today she is still in control of the office. Wilber has disappeared, evidently moving on in the same manner he had manifested on our doorstep 8 years earlier. He was tired of being picked on by the new cat and it appears he is now looking for a new home. The Bear and Abigail are getting along fine. We hope that when the rains come Wilber will come home. I miss him already. You older members know him well; his photo has graced the newsletter several times in the past. I will try to keep all you cat lovers informed about the CAC animals around here as time goes by. That's it for now. (Avaton)

Another sighting of the Loch Ness dog

The Children of Oz Phenomenon (The Thomas Messages)

QUESTION:

Chris Lock has been forwarding us email about psychic children, also known as the Indigo children and the Children of Oz. It's put out by James Twyman who evidently is working on a book about them. His email says the messages he is getting from these children are extremely important and the information should be passed on to everyone on our list. I'll read some excerpts from his emails and ask Awareness to comment.

"Over the past six years I have traveled to war torn countries and meditated with reclusive Emissaries of Light. But nothing can quite compare to my recent experiences with the psychic children I met in Bulgaria, or the sudden revelation I received from one of them just ten minutes ago.

Most of us have heard about the Indigo and Psychic Children that are emerging to assist us in an evolutionary leap in consciousness. It is a very real phenomenon, perhaps more real than most of us realize. I realized it myself in January, 2001 when I was giving a talk in San Francisco and met a ten year old Bulgarian boy named Marco who exhibited the most amazing psychic powers I have ever witnessed. Months later, after seeing Marco in a series of dreams, I traveled to Bulgaria to learn more, only to discover a monastery in the mountains devoted to training these amazing children before they can be perverted by a government program designed to "harvest" their powers for political purposes. The monastery was in the process of training four children at the time, and I was fortunate to spend a few hours with each one of them.

There were two things they all mentioned. The first was a question they felt they were here to ask humanity, a question that may hold the key to each one of us accepting our own enlightenment. They said: "How would you act and what would you do if you realized that you are an Emissary of Love right now?" The second was an energetic grid they have been weaving around the whole planet that enables them to consciously link with every other Psychic Child alive today. It is this grid that I want to address now.

Earlier this evening I was soaking in a hot tub in our back yard when I heard a small voice in my ears. At first I wasn't sure if it was my imagination, or if I was perhaps hearing a conversation in a nearby yard. But then I recognized the voice. It belonged to one of the four children I met in Bulgaria, a young boy named Thomas. He was the child who told me the most about the energetic grid, and I suddenly had the feeling that he was with me again, but I wasn't sure how. All I can say is that a message came through, one of the most exciting, important messages I have ever heard, that confirmed something I had suspected for some time now. He said that the grid was now strong enough to support the vast majority of the Earth's population. The grid had been established and was strengthened by the Psychic Children for two reasons: (1) To draw in the souls of other Psychic Children who would help shift the paradigm. (2) To offer an energetic platform for the rest of us to access that place within ourselves, enabling us to ascend to their level of awareness. Thomas explained that the work was now complete, and even offered a method for accessing the grid. I jumped out of the hot tub and immediately wrote the simple message down.

And there was one other thing. Thomas made it very clear that this message was only to be shared with

individuals who "asked" to receive it. In other words, I was not to simply post it on a web site where anyone can stumble upon it. He explained the real magic will only occur by actually requesting the information. It should be distributed free to anyone who asked, but they would have to ask."

In another email a "vision" was channeled. "The Children of Oz are everywhere, and we're with you now to help you achieve your dreams. We work together consciously to strengthen a unique grid of energy that will enable humanity to literally jump to a new level of love and compassion. The grid is ready to support everyone who claims this reality. The three messages we offer over the next three days will work on the subtlest levels of your psyche, tilling the soil of your heart to receive the seed of a New World. The message begins today with a vision. We ask that you simply read this and consider the symbols. Even if you don't understand it with your mind, your heart will comprehend.

Imagine that you are walking through an enormous door and you see yourself standing in the entrance of a vast church or cathedral. It is an ancient building, yet there are no statues or paintings, no jeweled altar of any kind. The building is bare, as if stripped of life. You walk around and a feeling of emptiness fills your heart. It is impossible to know what happened here, only that this church was once alive, and now it is dead.

Then you hear a sound somewhere above you, and you look up to observe its cause. You notice, for the first time, scaffolding that reaches along the stone wall, with an intricate system of boards supporting a group of people working on the ceiling. It is a group of children, and they are waving paint brushes and other tools. Several of them look down at you and smile, and the feeling of emptiness disappears. They are painting a mural, a beautiful scene with vibrant colors and serene faces. The cold church becomes unbearable, and you feel the need to climb the scaffolding and stand beside the children. One of the children, who seems to have read your mind, motions for you to ascend the steps and join them.

At first it is hard to move, but with each step your energy increases. You're climbing hand over hand along the steel bars, and within moments you are at the ceiling, and several small hands reach out to support you. You are finally able to see the details in the painting, and you are utterly amazed. You have never seen anything as beautiful, or compelling. You are looking at a New World, and yet it is not new at all. It is the world you have always dreamed of, a world of perfect peace. The children all gather around you and smile, for they see how pleased you are by their work. Then the church, the scaffolding, and everything you saw disappears, and you are enveloped by the wonderful scene. And the whole world comes along with you."

In another email James Twyman gave examples of children who had contacted him since he released the information on Thomas. A number of mothers told him how their own children had begun talking like Thomas about God, Peace and Love, dolphins and whales etc.

In Thomas' final lesson he spoke of the importance of **PRETENDING** we are already enlightened. If you pretend it and believe that it is true, it will happen. If you pretend that something will happen without believing it, there could be no results. **You have to have FAITH in it, and not just hoping that it will happen.**

There were other bits of information in the emails, but I'm sure Awareness has heard enough to address this subject of these exceptional children who are popping up all over the world these days and making profound

spiritual statements at ages as early as three.

COSMIC AWARENESS:

This Awareness suggests that the Children of Oz phenomena, and the Thomas messages offer an excellent introduction to the body of information offered through the *Lessons of Enlightenment*. This Awareness suggests that the emergence of the Children of Oz, Indigo Children, psychic children, children with different attentional and relational thought processes, children with unique perceptual abilities and sensitivities, children with food sensitivities, children with memories of other incarnations, children with prodigious creative talents, children in touch with angels, children with mobile frequencies of identity, children with overlapping sensory channels (many of which are considered disorders)—are all manifestations of the evolution of the consciousness of the species, which has been accelerating notably over the past century and reaching its present critical mass peak at the turn of the millennium. The one commonality all these psychic children share is that they are all rich in subjective *emotional experience*.

This Awareness suggests that it has long been known that to enter the Kingdom of Heaven one must become like a little child, and this relates directly to re-tuning with one's emotional sensory channel. All human beings alive on Earth today have far more emotional perceptual ability than they realize, operating just below their conscious awareness, often moving them in simple forward or backward directions despite where the will of mind would otherwise lead.

This Awareness indicates however, that adults learned long ago how to control, to stifle and ignore and even to fear the emotional life they enjoyed as children. Indeed, religion teaches that feeling good is bad, following inner impulses is evil and that goodness only comes from the outside through the choices of others, that spirituality is divorced from the body and the mind, and that the emotional force within is something to be feared or shamed. Parents teach children early on what is good and bad and what is right and wrong, knowledge which holds many errors and judgmental misassumptions, rather than letting the emotions teach the natural values from within. Left to its own devices, emotion mediates the developmental of consciousness through pleasurable feelings that brings growth and painful feelings that bring protection.

Once the mind is aware enough of this ebb and flow of life, it chooses beliefs that allow it to stay in positive growth mode and the negative pole becomes reduced to simple growing pains. Suffering is not natural nor is it good for the soul. This Awareness suggests that it is just the opposite, it is resistance to the highest desires and potentials of the soul.

Why the Religions Have Failed

This Awareness suggests that due to this historical suppression of the innate spiritual sense of emotion, the mission of the species has been to reverse this most unfortunate error and to unravel the many misconceptions within the mass consciousness energy grid that prevent the incoming children from developing their full human potential. As many humans have come and gone, choosing life circumstances that can best help them leave a positive legacy and reopen the minds to the spiritual guidance, to the degree that they have succeeded the mass consciousness energy grid of the species to which Thomas refers has increased its vibratory frequency toward the positive resonance with spirit and Divine Love. At the same time, religions that have failed to recognize inner spirituality and have made

the judgmental error of aligning positive and negative forces with good and evil. They then use misunderstood pain to manipulate and control through instilling fear, guilt, shame, and hatred and in doing so have been increasing the negative protective energy in the grid. The more painful feelings experienced by any one individual the more negative the energy grid becomes, and the more the Earth will have to protect itself from the misguided choices of the species. The energy grid of mass consciousness is inescapable for all living matter is connected energetically, the failure for any individual to protect oneself from faulty beliefs becomes a protective challenges for all.

What the Children of Oz Are Trying to Tell Us

This Awareness indicates that the messages from the Oz Children are attempting to inform humanity of the pickles it now finds itself within. The energy grid is of sufficiently cortical mass as to create powerful evolutionary shifts, but there is yet to be a decision on the part of humanity if it will be in a protective or growth direction. The events of Sept 11th were another critical opportunity to choose between fear or love and with so many aligning with the religious assumption of evil, humanity can still misuse it in volition and reap the consequences. The Vision offered in the first of the Thomas messages is intended to illustrate how the institution of religion has become detached from true spirituality, wherein the church is symbolized as cold and empty. Yet on the ceiling the children are creating an artwork of the true nature of spirituality that shall replace the old dogmas. This "new world" is not new at all, but is as it ever was, but without the faulty beliefs that foul the human experience.

What the Prophecy in the Thomas Messages Means

This Awareness indicates that the Prophecy offered in the second of the Thomas messages relates to the positive or negative direction humanity can now choose, and warns that misunderstood fear is at epidemic levels. It suggests that the citations are more consciously attuned emotionally to the energy grid and are communicating with humans which directions they are choosing through odd behavior patterns. Mass beachings and deaths indicate that fear is in the lead. Thomas asks each person to choose to be an emissary of love instead of fear, for whether or not all the details are understood, the simple conscious choice to align with love also affects the energy grid positively.

The Meaning of the Third Thomas Message

This Awareness suggests that the Message, the third and final Thomas offering, attempts to awaken humanity to the creative power of the mind, the will energy, and to realize how each person's beliefs helps create the mass destiny for all. There exists so much confusion due to so many judgmental errors that entities do not realize that they create their own reality, individual and en masse by the beliefs they hold and give conscious energy to in the mind. The message also is a reminder of the spiritual nature of all incarnate entities and that there is much more of the energy identity than can be contained within the body, hence the spiritual guidance offered through emotions comes from higher or greater levels of the self gestalt. Thomas asks humans to PRETEND, to awaken the imagination and to choose beliefs unlimited by the "wisdom" of adults and ministers, for such thoughts create, and particularly quickly if they are empowered with positive emotional force. He also asks that humans remember who they were before—before time, before physical incarnation, to both remember and manifest their divine spiritual nature.

This Awareness suggests that many children are speaking these truths and that parents and caregivers can

learn a great deal from the mouths of babes. This Awareness indicates that it is also crucial to allow them to develop their gifts naturally, to help them build a strong sensory acuity to their emotions, let them explore within safe boundaries and let their feelings guide the development of awareness and choice of beliefs, rather than tell them how to think and act, or to mold, or judge the perceptions they share.

If a child says he sees "sticks of light coming from babies' eyes", trust his word, and know that he can see spiritual energy, be curious and help him explore and understand his gifts. If a child says that "yes means yes and no means yes", recognize the wisdom that all life experiences have meaning and creative validity and that even painful mistakes and suffering is part of the journey to understand how to use ones creative power. If a child says "we are all angels" know that she resonates with universal spirit and recognizes it in her human brethren, be confident that this understanding will allow her to treat others with kindness, compassion and love. When a child asks "why do you say no" recognize how many limiting choices are made by the habit of saying no to natural flow of life. And most importantly when a child says that he or she hears ancient wisdom "through the heart" recognize that this child is pointing out an entire sense that adults have forgotten how to heed, and that this voice is the voice of spirit itself.

Will Nibiru or Planet X Hit Earth in 2003?

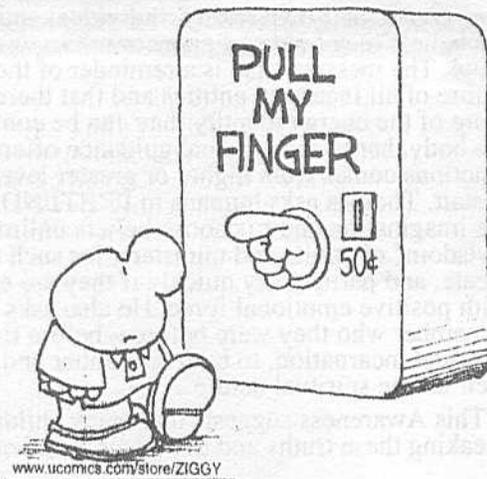

Question:

Richard Queener and Tom Stanton both sent in the same question. I'll read both of them. Richard asks: "Please include some info on the asteroid or comet Nibiru that is supposed to come near and/or hit earth in May of 2003."

And Tom sent me a scary paranoid book to read called "Planet X" and he says he's curious to hear a comment from Awareness on this planetoid.

COSMIC AWARENESS:

This Awareness suggests that no such devastation need occur. At present, there are far fewer entities energizing such an event than are necessary to create a critical mass. This Awareness suggests that entities concerned about such a probability, may counteract such energies by embracing and emotionally energizing a vision of protective and deflective energy surrounding the Earth. Such efforts on a daily basis can indeed, still further minimize any such event.

CAC Messages rap-tape ruined, Date about 1978, Paul Shockley Interpreter

Ed's Note: In the 30 some years of recording Cosmic Awareness sessions, the CAC staff lost parts of 3 trance sessions due to a malfunction of the tape, which continued to move on the recorder but unknown to the staff at the time was not recording or had twisted in such a way that the message did not get recorded. Later, when we could afford a back-up recorder, nothing got lost. The following message is from one of those tapes that got ruined before the answer was totally completed.

PROBLEMS IN TRYING TO SHARE AWARENESS MESSAGES WITH OTHERS (Why Do The Messages Appeal to Some but Not to Others?)

QUESTION:

A question from Judy Prouty of Temple, Texas, who writes: "The CAC newsletter hasn't lost any of its appeal for me. Once again, it is the first thing I read in my mail and has more information for the money than any publication I have ever subscribed to; but more important, I feel as though I am once again tuned in to what's going on. Thanks so much for the service you provide. I do have a question for Awareness, if you feel it would be beneficial to a wide audience.

Over the years I have shared different parts of the newsletters with friends whom I considered enlightened and New Agers, but without exception, I have never had one want further information or inquire about subscribing to the newsletter. From the first Cosmic Awareness newsletter I came in contact with, I was hooked and looked forward to each newsletter. I have subscribed to other newsletters and received other channeled material, but none of it compares with the material from Awareness and its appeal of being on target. My question is: Is there a certain psychological appeal, or does Awareness fulfill a need to know and be aware for those who do subscribe to C.A.C.?"

COSMIC AWARENESS:

This Awareness indicates that much of the effect of messages given through these readings as that which can only be appreciated by a certain type of mentality. This Awareness indicates that it is a mentality that does require some depth of thought and a special inclination for answers that lie beyond the normal approach to the seeking of information. This Awareness indicates that the majority of individuals on this plane have a kind of superficial approach to information. They either take it because authorities deliver the information, and the authorities are those whom they have been programmed to approve of, or they take it as a form of alternative to the authorities because they do not trust authorities, or they take it because they want something to believe in, and this sounds far out or unusual or appears to be of some new fad or trend or popular message or something that satisfies their need to be with the 'in-crowd' which they admire.

"Space Brothers" and Marshmallow Messages Appeal to Many

This Awareness indicates that few actually look that much toward the content of the material, or attempt to think deeply about concepts of a universal nature. They are more concerned with the Here and Now, and personal gratification, or some kind of personal strokes, such as what this Awareness refers to as spiritual marshmallow channelings, in which sweet words are given to make one feel complacent. This Awareness indicates that there are many entities who simply desire to receive something which they can talk to their friends about on a superficial level, to be able to communicate, and seem on the cutting edge, thus, many will enjoy speaking of the space brothers, or of guardian angels or guides or some channeling, that says "Everything will be alright," or that "Things are going to be difficult, but that

they will be rescued," these messages have great appeal for a wide audience.

This Awareness indicates to get into a vast array of in-depth analysis and information regarding things that are unseen and uncommonly applicable to one's deeper needs and soul growth, or to seek to understand the laws that lie behind the surface features of the universe, requires a different kind of consciousness than what most entities presently have. This Awareness indicates that because of this, even when an entity may have an inclination towards something of this type, they may not have enough information on reading one set of papers or one mailing to understand the breadth or encompass the scope of information being provided through the CAC material.

Some Jump to Conclusions From Out Of Context Information

This Awareness indicates that many entities in reading one lesson, will assume that the next mailing will be much the same; they assume that having read one channeling, that this is the kind of channeling that is being given forth and if they do not understand there are messages on many other topics and concepts of a wide variety, they may not fully grasp what they have in terms of material available to them. This Awareness indicates it is like one going in to a store and stopping at the first counter to see what is available, and deciding that they aren't interested in popcorn, and without looking further to see what else is in the store, they leave, assuming that the store was a popcorn store. This Awareness indicates that this appears to be the greater problem in regard to these messages; that entities read one thing and either do not understand, because much of the information pertaining to that message correlates with other material that has already been given, and they cannot understand the information, or it is information they are not particularly interested in at the time.

Continued Reading of the Material Expands Consciousness

This Awareness indicates while on the other hand, those who have remained with the Awareness material for some time, begin to build up a feeling and understanding for a total scenario or picture that is holistic in nature, in which the whole philosophy begins to emerge in a way as to fill in the gaps the entity may have had in his or her understanding of life, and as the entity remains receiving more and more information, the concepts and philosophy begins to expand the consciousness of the entity, allowing them to encompass more and more of that which is Universal Consciousness, and the expansion reaches out into many different areas and different forms of information available in regard to the universe and environment in which entities live.

This Awareness indicates that this action of ever expanding one's understanding and consciousness or awareness of things, is that which leads those who have been with the material for a period to feel the need to continue. This Awareness indicates, however, if one just steps in to glance around and read a few paragraphs, one cannot possibly grasp what they have before them, in terms of the potential for their needs and their lives. For this reason, many do not return to look again. They make quick judgments, after having only glimpsed a few lines, and they then move on, looking for something that perhaps they totally overlooked, if they had stayed long enough to observe with greater depth and attention.

This Awareness indicates there are also some entities who receive information from so many sources of a spiritual nature that they do not have time to read it all, and even though they have been receiving Awareness information for some time, they may simply be stacking up the material without reading, then, when it comes

time for renewal, they may simply feel that there's no point in renewing, because they haven't really gotten anything from the material. This Awareness indicates this sometimes happens, and then the entities begin reading the material, perhaps even several years after having dropped out, and then they come back and ask for more after becoming more familiar with what they have received, but previously overlooked.

It Is Difficult Finding Those to Share Your Information With

This Awareness suggests that it is too bad when a subscriber who feels a deep affiliation with the information has no one close by to share these feelings with. This Awareness suggests that this can in time change, but at present, the best approach is to either find someone local who is more receptive, or to seek out acquaintanceship with others in the organization through gatherings, such as the Friendship Gatherings, whereby you at least have people, even at a distance, who are of similar mind in regard to the material.

This Awareness indicates that often, entities come to the Friendship Gatherings stating that they have never before met anyone else who was familiar with the Awareness messages and how happy it makes them feel to see so many others. This Awareness suggests that this is perhaps one of the more important reasons for having these Friendship Gatherings.

Why That Sense of Isolation?

FOLLOW-UP QUESTION (VIKKI):

That sense of isolation that her letter suggested, I get a lot of that from many of the correspondents, and experience it myself. It seems like we're sort of scattered around without a lot of people of like minds in our areas. Is this happenstance, or are we positioned in a certain way, or is this isolation just universal?

COSMIC AWARENESS:

This Awareness indicates it is mostly because there are not that many people who are yet familiar with the scope of the material. They may have read some unusual messages or something they considered to be bizarre; perhaps something relating to the conspiracy information, or something in which they might have even an objection to because they do not fully understand or haven't read quite enough to understand what is being said.

This Awareness indicates *It* gives some very unusual information and in some cases, the information could be offensive if entities do not have a background in terms of the messages being given, and if a new entity who is totally unfamiliar with the background material reads a portion of such information, it could be quite shocking or repulsive to the entity.

Information on Jehovah and Robotoids can be Disturbing

This Awareness indicates for example, in the past the information on robotoids, and on the money system and on conspiracy information, which basically was but a small section of material given by this Awareness over the past two decades, could, if falling into the hands of an entity for the first time, acquainting the entity with messages from this Awareness, could certainly be a disturbing factor in how the entity viewed the messages from this Awareness. This Awareness suggests also that some information in regard to various religions or philosophies, especially some of the in-depth or deeper material in regard to Jehovah and Christianity; some of this can be quite repulsive to some entities.

This Awareness indicates for example, some time back when this Awareness gave information on the role of Jehovah as a space renegade involved in genetic

cloning, and not as being the Universal Creator, and that the entity was from a group of space people who were roaming the galaxy and that some of these entities were involved in cannibalism; the information of such a reading, without having a full background and explanation of this material coming into the hands of someone unfamiliar, could be of extreme repulsion to them.

This Awareness indicates in fact, this very reading was introduced in a court case involving the Interpreter in a property dispute in which the material stated that Jehovah was a cannibal. You can imagine the shock this message had in regard to being presented in court, when evaluating the character of the Interpreter. This Awareness indicates that likewise, a new person being given information of some isolated material which came through messages from this Awareness, could be a complete turn-off to a new observer of the messages.

This Awareness indicates that fortunately, the attorney representing the Interpreter insisted that if information from this work were to be introduced in court, it could not be in fragments from an action of picking and choosing, but that the court should include all of the material as evidence, rather than that selected by an opposing attorney. The court then decided the information and material was irrelevant to the case.

This Awareness indicates, however, it shows the example of how certain information selected from the vast array of material, based on the enormous types and numbers of questions sent in by questioners, could, in isolated cases, wherein an entity only sees an isolated question and answer, could be totally misleading in terms of what they perceive this Awareness to be about. This Awareness suggests that there is not much that can be done unless the questions were to be somehow arranged so that entities could not get into or read the material of more controversial nature until they had read the more tame and bland material first.

Feeding Information Like Pabulum a Possible New Policy?

This Awareness indicates that if the material were to be introduced like pabulum, feeding a small child so that nothing serious or spicy were introduced to the system until the entity could gradually begin to strengthen the appetite for more and then gradually would receive more information of different and deeper questions, then the material might not be so abrasive to a new person. This Awareness indicates that it may be at some future date a good policy to introduce material in this manner whereby the easy to accept material is provided first to the newcomers with only those who have been involved for some time being allowed to see the more unusual and controversial material.

This Awareness indicates that this of course would be the appropriate way, if an organization of a commercial concern were to market the material from this Awareness. This Awareness indicates, however, at this time, the focus has not been so much on marketing in a major commercial manner as some of the spiritual organizations have done; the concern has been to get information. It is an action in which the gathering of information is the primary concern, with dispensing the information as being a part of the concern, but the mass-dispensing of information to larger numbers of individuals has not yet become the major focus; that the commercial marketing as that which can follow at a later time.

Edgar Cayce Material Still Being Researched

This Awareness indicates that this is similar to the actions of the Cayce movement in which Edgar Cayce gave many readings for many years without any mass commercial marketing of the material. It was only after

his death that this began to be put together for commercial marketing.

WILL MASS MARKETING OF THE AWARENESS MATERIAL OCCUR?

FOLLOW-UP QUESTION (VIKKI):

Does that mean that at some point Awareness will have reason for the information that we're working on now and getting out, to be presented to the masses?

COSMIC AWARENESS:

This Awareness indicates that essentially, the purpose of this union at this time is to bring information through that helps to clarify much of the misunderstanding that is so imbedded on this earth plane. This Awareness indicates that if you recall the program: "UFO Cover-Up," which played on your television several days ago, the question was asked of those aliens, if they had a religion, and it was answered that their religion recognized the universe as a deity.

This Awareness indicates that this is the message which this Awareness is bringing through *Its* channeling through this Interpreter; that Universal Consciousness is everywhere present. This Awareness indicates that your scientists are just beginning to accept the concept that the earth is a living being and these messages reflect information from the context of a universe that is alive, in which inhabitants are reflections of that consciousness, are like thought-forms in that consciousness, and are part of the total mosaic that makes up that Universal Consciousness.

This Awareness indicates that the messages which are being given through this Awareness over these past two decades are presented in a manner that from all sides, from different frameworks, from different frames of reference, entities may look at things that have been seen as from the old ways of looking at life and are being shown those things from a higher view, or from a different dimension. This Awareness has touched on relationships, on history and evolution, on life and death and reincarnation on the manipulation of secret societies in their control of people and nations, has touched on the money system in its forms, whereby it is used as a control mechanism, controlling the masses, and how it can be misused to mislead and enslave the masses if entities are not aware.

It has touched on the nature of consciousness. It has touched on the nature of individuality in terms of the subconscious, conscious and superconscious; the manas that are used as energy forms for these different levels of consciousness.
