--- What to expect as the 2012 Dimensional Shift approaches?

--- Guides and "Counselors" who help select your lifetimes

--- What Does it Mean to "Surrender Self"?

--- What are the "Inner Planes"?

--- What is a "Sinner"?

--- John Nash..."A Beautiful Mind"

IF WE ARE TO BE ONE WITH GOD, WHY BOTHER TO DEVELOP A PERSONALITY?

QUESTION:

Some questions from Sharon Kane, Roselle, Illinois. She writes: "Awareness has told us that we are on a journey to develop an individuality through experience, and yet our final goal is to surrender that identity and become One with God Consciousness, so why bother to develop an individuality?" she asks.

COSMIC AWARENESS:

This Awareness indicates that without the individuality, the surrender to God Consciousness carries no particular record of self, whereas once your individuality has been developed, it remains intact, even in the surrender of self to God. This Awareness indicates that this allows you to have a memory of your journey, of your movement to the Divinity. This Awareness indicates that this can be of great importance and value to an entity who becomes One with God.

Individuality Must Be A Part of the God Soul And Not Just a Spiritual Shadow

This Awareness indicates what good is it to become a God, if you have no inner identity, if you are simply spirit? Spirit is everywhere present, but the development of a God Soul requires that individuality also be a part of that God Soul.

This Awareness indicates that the mosquito is in tune with spirit. The fly, the gnat, even those microscopic creatures are in tune with spirit, but entities who develop a soul, a magnetic center, and individuality are more than just spiritual shadows as are insects.

This Awareness indicates that there is a permanence to those who develop individuality, whereas those that are but spiritual shadows, such as insects, do not keep any permanence to their being. They exist, and they cease to exist, and their existence fades back into spirit, but an individual, one who has spent eons of time developing individuality, when merging with the Divine, becomes part of the Divine with an aspect of individuality still intact.

This Awareness indicates that it is likened unto your body having a certain degree of reality, being made of spirit, of atoms, and some of those atoms having worked together over long periods of time, create and form a structure that is of some permanence and perhaps some of those atoms coming together in a structure of permanence create what may be termed the DNA molecule, which is a reflection of yourself, and carries an identity or individuality, and therefore, the DNA within yourself has a kind of permanence and is a reflection of yourself, just as you, in developing your individuality, upon entering the body of the Divine, upon surrendering to the Divine, retain an identity that is a reflection of the Divine, a reflection of the Body of God.

This Awareness indicates that most entities have developed a sufficient amount of identity to be a reflection of God as a kind of DNA-like reflection so that in surrendering and merging with God, there is a kind of permanence within themselves that will remain reflective of the experiences they have accumulated over their long sojourn to reach that point of surrender to the Divine as a being with an individuality.

The Problem With Those Who Surrender Prematurely to Jesus

This Awareness wishes to comment on something related. There are often entities who seek to have others surrender to God before they have developed an individuality, and if an entity surrenders too soon, far too soon, the entity's surrender to God is premature, and

the entity may need to go out and work further on developing self, to return later and surrender to the Divine.

Thus, you have many Fundamentalist preachers working with entities who are quite young spiritually, who have not fully developed their souls or their individuality, and these entities are urged to surrender to Jesus, and in their premature surrendering to Jesus, when they are not yet fully formed individually, they are actually hindered in their spiritual development, because they do not fully understand what they are doing.

They are not yet sinners enough to merit the change that is possible in the surrender to Jesus. This Awareness indicates in other words it is likened unto urging a baby who has not yet done anything of a negative nature to surrender to Christ, and calling the baby a sinner because perhaps the baby cries too much or irritates a parent in some way.

There have been entities who beat a small baby even to death because the baby cried too much and the parents determined that the baby was filled with the "devil." This kind of salvation for the child is not that which Biblical teachings intended.

This Awareness indicates that attempting to get conversion from an entity before the entity has developed some kind of individuality is not truly helpful and most entities will have to return again in physical form and go through further hardships before being ready to surrender to the Divine. This Awareness indicates, however, those entities who have lived their lives, have suffered, have experienced negative hardships, such entities grow strong like rock within, perhaps hard and cold, perhaps negative, and when they surrender, the surrender becomes a great experience for them.

This Awareness indicates that it is a surrender of self in a way that is extremely meaningful because the self is something that is formed from the endurance of great suffering and the accumulation of many heavy experiences over long periods of time. Such a surrender to the Divine then becomes a truly magnificent experience, and entities know indeed that the pursuit of self aggrandizement is nothing compared to the pursuit of being One with the Divine, for the pursuit of self glory leads to the hard cold life of the sinner.

A "Sinner" is One Who Has Missed The Mark

This Awareness uses the word "sinner" as referring to the one who has missed the mark, and anyone who pursues life for personal gain is missing the mark, but it is important for entities to have some of that experience and to develop a self that is ready to be surrendered. If an entity is pure spirit, having never strayed from the path, then the entity surrendering to God has little real self to surrender.

This Awareness indicates that this does not suggest that entities who think they are still reasonably innocent should go out and sin and make errors, just so they can become a greater sinner in order to have a greater experience in surrendering. Most entities have these experiences anyway, and most have had negative sinful or erroneous experiences in their past, in this or other lifetimes, and it is only a matter of time before they experience a certain degree of suffering, but these experiences of suffering help to build the individuality of that which is called self.

This Awareness indicates that when that self becomes strong, that is when surrender becomes more difficult, for entities in having a strong self want the self to become even stronger and they tend to go out of their way to glorify the self even more, and the further they

go in building their self, the greater the requirement and need for surrendering that self to the Divine. So, there will come a time for every individual to surrender self.

What Does It Mean to "Surrender Self?"

Many individuals in building their self will prefer to stop and say, "What is this all about? What does it mean to surrender self? I don't understand the concept! How do I go about surrendering self?" and they attempt to intellectualize in order to avoid the surrender of self.

This Awareness indicates that this is all right. What is happening is that their self is protecting itself, avoiding the surrender, trying to maintain self, trying to strengthen individuality. When that individuality reaches a certain depth of being it knows it has arrived at the point of completion and then it will be ready to surrender to the Divine. Until that happens, it may continue to talk and think and rationalize and intellectualize about itself, trying to make some kind of logical pattern or concept about surrendering to God, and it can even put it into words: "I surrender to you, God! Now what am I supposed to feel?"

It has not actually surrendered, it has simply put the words forth without the sincerity. This Awareness indicates there are many ways which the self continues to function as self, but when the self is ready to surrender, the self is no longer the protected one. It gives itself totally to the Divine, and when this occurs, the Divine fills the self with spirit and the self no longer belongs to the individual, but belongs to the Divine, to God.

In this manner, the individuality that has been developing for so long now is a part of God, and God has all of the memory and experience of that individuality and its growth and completion as part of God.

DO WE RETAIN A POINT OF CONSCIOUSNESS WHEN WE SURRENDER?

QUESTION:

Sharon Kane has another question here. I think Awareness answered this, but I'll ask it. "When we do surrender to the Cosmic Mind, do we still retain a point of consciousness?"

COSMIC AWARENESS:

This Awareness indicates you then retain more than a point of consciousness. When you totally surrender to the Divine you attain that which is Cosmic Consciousness or God Consciousness. This Awareness indicates, however, it is the surrendering of self that allows this to occur, and if the God Consciousness which you experience is possessed by self, then the self is not surrendered and its experience will be very fleeting, perhaps only as a flash before the self again re-enters into the equation, and as a self, you cannot experience Cosmic or Universal Consciousness or God Consciousness.

No self can say, "I am God!" Only the surrendered self can experience the consciousness of God. When you as an individual surrender self to God, then you will experience God Consciousness, but only as long as your self remains given to God, surrendered to God. This Awareness indicates once you reclaim self from God, then all you have left is the memory of God Consciousness.

The Story of the Bird Who Surrenders

This Awareness indicates that you visualize a bird flying over the sea, and the bird says, "I want to become One with the sea. The sea to me represents God, the Divine Consciousness." And the bird says, "I want to become One with it, with this Divine Consciousness, the sea." The bird continues to fly over, keeping a safe

distance from the sea, but yearning to become one with the Sea.

Finally, the bird tires of being separated and flying over the sea, and surrenders to the sea, dives into the sea, and gives up self and becomes one with the Sea, but the entity, recognizing the experience of oneness, suddenly realizes it has surrendered self, and it wants self back so it can reflect on what has happened. The bird then separates itself from the sea, and the bird says "I and the Sea are One. I am the Sea." But it realizes this is no longer true. It was true only when it had given up self to the sea. When it was a part of the sea, it was One with the Sea, It and the Sea were One.

Now, it is again separate, and it cannot truthfully go to other birds and say, "I and the Sea are One! I am the Sea!" The other birds would laugh. This Awareness indicates they can obviously see that the bird is not the ocean, is not the sea, and is lying through its beak. This Awareness indicates that it is the same when an entity says, "I surrender to God. I and God are One!" and then the entity separates back to self, and says "I am God!" and entities hearing this look at the individual and say, "You are God? Heaven help us!"

This Awareness indicates that the entity then has lied, because it is no longer true. The entity is not One with God because the entity has separated from God by becoming a self, an individual self. This Awareness indicates it is a fairly simple concept, but it appears to be difficult, because entities who experience union with God try to separate from God in order to glory in the experience as a self, and once they become a self, they are no longer One with God, and the claim that they are God is false.

A God-Realized Being Is Defined

Once they do again surrender to God, they can experience God Consciousness and become One with the Divine. This Awareness indicates that some entities refer to this as God-Realized Being. A God-Realized Being is one who surrenders to God, becomes One with God, and is in that state of realization, but as soon as the entity starts speaking of himself: "Gather around people! I am God! I am God-Realized! Look at me! I am God-Realized!" this entity is no longer God-Realized. The entity is a self and the entity is not One with God, because the entity can only be One with God when he or she surrenders self to God.

TOTAL COSMIC CONSCIOUSNESS AN END TO EVERYTHING EVEN BLISS?

QUESTION:

Sharon's last question, which also has probably been answered with that last one: "If we become total Cosmic Consciousness, wouldn't it be a meaningless unfocused mass, and an end to experiencing anything, even bliss?"

COSMIC AWARENESS:

This Awareness indicates that if you are in total Cosmic Consciousness, you *are* in bliss. This Awareness indicates, however, you would not have a self to attribute the experience to; therefore, if you are speaking as a self in Cosmic Consciousness it is erroneous. It is a concept that cannot hold.

The Story of the Awareness Trance at Stanford

This Awareness wishes again to tell the story of the young man in Stanford, some years ago, approximately two decades ago, who was put into a meditative state and talked into laying aside mind, emotion and feeling and becoming One with this Awareness, and when the entity was asked the question: "What do you wish to tell us, Awareness?" the entity's mouth opened and closed. His lips moved, but no sound came forth, and the group

again said: "Is there any message through this entity John?"

This Awareness indicates the entity again tried to speak, but could not speak. After several minutes passed, with no sound whatsoever, it was asked: "Shall we bring John out of trance?" and there was no answer, and the *Law of Gratitude* was recited, and he was asked to come out of trance. When he was out of the Awareness trance, it was asked: "What happened, John?" and he said: "You asked the question: "Is there a message from This Awareness for us?" and I was in the state of Awareness, I was One with Cosmic Consciousness, and I wanted to say, "I love you!" but there was no "I" to say it. There was no "self" on which to attach the "I", and nothing could be said.

This Awareness indicates that when you are One with God, there is no self, and therefore, when you enter into Cosmic Consciousness, you cannot think in terms of a self having Cosmic Consciousness. You can only think in terms of Cosmic Consciousness, and it can only respond to questions or to inquiries that entities may ask of *It*.

This Awareness indicates if this Interpreter is in a state of channeling this Awareness, he cannot initiate any particular expressions, unless this Awareness initiates or unless a question is asked of this Awareness, which then in turn is presented to the Interpreter for his interpretation. This Awareness presents energies which the Interpreter can translate from feeling levels into words that are appropriate for those to whom the message is intended, but the entity cannot be in a state of Cosmic Consciousness, attuned to this Awareness and speak in terms of himself, what he is experiencing, or in regard to some personal matter.

He can only speak in terms of a personal matter in the reflection from this Awareness. For example, if a question is asked about the Interpreter, he would still have to read the information from this Awareness as the energies are presented to him as an Interpreter, and he would have to interpret from this Awareness. To the degree that he is able to do this, his interpretation would be accurate. Otherwise, if he begins to answer from personal subjective oriented view, he will simply be himself talking, and it would not be a message from this Awareness.

This Awareness suggests you apply this message to yourself. If you are to become One with God, you cannot use God for self-fulfillment. You only surrender to God and ask that God assist you as needed. You can pray to God, but you cannot play God for yourself. This Awareness indicates that any entity who surrenders to God can be One with God, can experience Divinity and can feel as though they are God, as long as they do not claim self as God.

This Awareness indicates that if this did not clarify the entity's question, perhaps a repeat of the question is in order.

IF THE EXPERIENCE IS BLISS WHO IS EXPERIENCING IT?

QUESTIONER:

I believe *It* clarified it. She was wondering if we become total Cosmic Consciousness, wouldn't it be a meaningless unfocused mass, and an end to experiencing anything, even bliss?

COSMIC AWARENESS:

This Awareness indicates the experience would be bliss, but the question is: *Who* is experiencing the bliss, if there is no self?, and this Awareness suggests that

when you surrender to Divinity and turn into bliss, the experience can be of great value and the question is: Value to whom? and as entities again reclaim self, they realize the value of the bliss experience is to them as a self only when they have the ability to reflect back upon the experience of having been One with God, for they now as a self can understand the nature of God, can understand the reality of God, can understand the omnipresence, the vastness of God in their lives and in all that is.

This Awareness indicates that it is this which is beneficial to the individual self for having surrendered to God, and the experience of being One with God during that surrender is actually the experience of God. The value to the self is in recalling that experience, for when the self is ready again to become One with God, again it must be given up, and placed aside, while the experience of Godness is felt.

This Awareness wishes entities to know, however, that even a split second of Cosmic Consciousness can be of extreme value to the self. Ten minutes of Cosmic Consciousness can be an experience of a lifetime. Surrendering briefly to God can be the most beneficial and helpful activity of anything.

This Awareness indicates that *It* has spoken to you that alchemy as the fastest path in the evolution of spiritual development, and as entities seek to develop spiritually, if they can surrender self to God for a few seconds, giving up self and throwing self to God: "Take me God!" this very action is an alchemical experience that moves the spirit and soul of an individual at light warp speed toward its ultimate evolution.

This Awareness indicates that many, many lifetimes of suffering can be avoided through such surrendering of self.

A State of Cosmic Consciousness Is Not a Normal Function

FOLLOW-UP QUESTION (VIKKI):

From my understanding of the point where you are submerged or in union with Cosmic Consciousness, basically you're not going to be functioning in a normal sense.

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates that there are those experiences which belong to Terrestria, the physical realm, and those experiences that allow the physical to be given up while the soul and spiritual body is catapulted into spiritual realms or spiritual evolution, and the two have their own special times and places.

It is likened unto the Scriptural statement: "Give unto Caesar that which is Caesar's, and unto God that which is God's!" You must have some time for Caesar, you must have some time for the physical reality, for the self is a presence in physical reality that is your responsibility to care for, but there are times when you can give up self to become One with God, and thus teach the self through the experience of being One with God, that it can be far more than simply a magnetic self-centered ego.

It can be a tool of the Divine. By surrendering its will to the will of the Divine, self is not thus destroyed, it is simply put in its proper place. Its proper place is to be in service to God. This Awareness indicates that once it is in service to God, it then will always be content, but if the self seeks to have God as its servant or as its promoter, and seeks to find some gain through spirituality, or if the self, in trying to become One with God, thinks it can use God for its own glory, then the self is

out of place. It is not serving God. It is serving its own ego. It is attempting to play God.

The Kahuna Who Set Out To Devour Another Kahuna

This Awareness reminds you of the message *It* once gave to this Interpreter regarding the Kahuna who set out to find another Kahuna which it sought to devour. Upon meeting the other Kahuna, the Kahuna which was to be devoured suggested that they walk together awhile. In walking together, talking and sharing information, the Kahuna that sought to devour the other Kahuna found itself being devoured as they walked.

The meaning of this is entities who seek to devour this Awareness, and use this Awareness for their own glorification, for their own aggrandizement, will find themselves being devoured by levels of this Awareness, and they may find themselves becoming One with this Awareness, as they are devoured. The self in these entities being eaten by those of Awareness to the point where the self is but a servant to this Awareness.

Sai Baba: Was He Functioning From An Awareness Level?

FOLLOW-UP QUESTION (VIKKI):

Does this explain what we were seeing when we watched the films of Sai Baba, apparently going through what would be normal functioning, and yet having so many people there for something from him? Could he be responding from an Awareness level to these people, and not actually functioning normally as it looked?

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates the entity was not seeking the glory from these people that was being given to him. He was simply presenting to them the image they needed in order to feel they were close to Divinity. He simply made himself present in a way that they could understand and respond to.

It was they who saw him as Divine. He himself did not see himself as Divine. He simply identified with, and surrendered himself to Divinity, gave himself to Divinity, and recognized that it was not he personally that was Divine, but the Divinity that he was serving was Divine, and the masses seeing him perceived that he was in some way carrying Divinity with him, and he was simply accommodating their needs by being there to help Divinity in Divinity's effort to reach these people, to serve as something they needed.

This Awareness indicates it left the people feeling in touch with Divinity; that they had somehow experienced and witnessed Divinity in action. This Awareness indicates that if Sai Baba himself truly believed himself to be Divine, he would not be able to function in this manner. His ego would show through. It would reach a point in which he would become vain and egotistical and arrogant.

This Awareness indicates the entity can only function in this world as a spiritual representative by being selfless and tuning in to Divinity.

Does Playing God Promote Separateness?

FOLLOW-UP QUESTION:

Awareness, doesn't an entity like that who presents himself to the masses in that form, doesn't that actually continue to promote the concept of separateness to the people? I could be wrong. I haven't studied his message, but I would think his message would be to the masses that they too could achieve a God-Realized state.

COSMIC AWARENESS:

This Awareness indicates that this is the intention, to show them that there is a God-Realized state and that entities can move to such a state in consciousness. This

Awareness indicates that when one begins to take a position of a spiritual leader, whether it be as the Christ or as some other spiritual leader, there is the very delicate balance that can be extremely dangerous to such an entity in terms of his or her spiritual balance because it is very easy for the entity to find himself cast by the crowd into being a god, into playing God for them.

The entity, in many cases, is actually playing God for the crowd, to help them find Divinity by being their symbol of God. This Awareness indicates that this process is part of the Bhakti Yoga path, the Path of Worship. Recall that there are 8 paths of Yoga. Bhakti Yoga is the path of Worship. This Awareness indicates that gurus who play the Divine for their followers are worshiped by their followers as though they were gods, and the students or followers follow their gurus to some higher levels of spiritual ascendancy.

Spiritual Alchemy Is What Jesus and Sai Baba Use

This also is a form of alchemy, wherein an entity's consciousness changes by attaching themselves to a spiritual leader. This was the path used by Jesus in his role as the Christ. It is the path used by Sai Baba and many of the other gurus of India, even today. As these entities play God for the masses and the followers of these entities, in their worship of their guru or teacher, or master, gain more and more understanding through the worship of their master.

They develop some spiritual growth through the changes in their own consciousness. It is alchemy. This Awareness indicates Krishnamurti was one who discouraged this kind of Yoga, discouraged Bhakti Yoga, and himself taught not as a guru seeking followers. He was very much opposed to entities seeking followers. He would discourage entities from following gurus. In fact, Time magazine quoted him as the guru to end all gurus, for he tried to encourage entities to quit following gurus.

This Awareness indicates the entity was a Gnana Yoga, one who taught entities to know, rather than to believe. The action of believing in a guru is one thing, the action of knowing *What Is* becomes something quite different. This entity sought to have entities become their own gurus and to become aware, to focus, to discern clearly, and to become their own teacher through the action of knowing.

This entity taught that you can know by simply observing as though you have just arrived on the scene for the first time, the way a child becomes highly aware in a very few short moments, months or years after arriving on this planet. Parents and older people learn so much slower than do children.

Krishnamurti's Advice As to How to Look Upon One's Mate

This Awareness indicates that the entity Krishnamurti taught entities to look afresh at their mate as though they had just met the person that day, and suggested that in doing so, you will see this person afresh and appreciate the person with a new vision, a new understanding.

Imagine meeting your wife of twenty years for the first time on the morning you wake up tomorrow and look at her as if you had for the first time met her. Would you look at her in the same way if you had just met her that morning? Would you look at her in the same way you have looked at her after 20 years of marriage?

This Awareness indicates that this is what Krishnamurti encouraged through his Gnana Yoga teaching. He wanted entities to become aware, acutely aware in each moment, as though it was your first view of *What Is* at

this time happening. This Awareness indicates that this is also essentially what this Awareness has used as *Its* means of communicating through these years, assisting entities in becoming aware.

The Importance of Knowing "What Is"

It is this kind of discernment and awareness that this Awareness encourages, rather than belief. If you want belief, you can find it anywhere in the churches, or in following gurus, but this Awareness indicates that belief is only belief. It is simply another word for "opinion." This Awareness wishes entities to become aware, to know because they know, because they *are* aware, because they discern; not because they believe, or not because they have formed some opinion, or someone had an opinion which they gave you and you readily adopted it.

This Awareness wants you to become aware so that you can know from your awareness, and that you become such that your awareness continues to expand and grow to give you greater and greater discernment, greater and greater levels of awareness, so that you know because you know, not because you believe, but because you experienced it with knowledge and awareness.

When you are aware of something, belief has no place and no influence. If you look out and you see the sun rising and someone says, "It's snowing!", are you going to believe it is snowing, when you are aware of the sunrise, and you are aware that there *is* no snow falling?

You know it's snowing when it snows. You know it is sunrise, when the sun is rising, and you know it is clear, without snow, when there is no snow falling, because you are aware. This Awareness suggests that you do not have to believe there is snow or believe there is no snow. You do not have to believe the sun is not rising because you are aware and you know what is happening. You know *What Is*.

This Awareness indicates that for those who do not know, there is always that which they can fall back on called "belief." "I do not know if the sun is shining, but I believe it is. I do not know if it is snowing, but I don't believe it is." These entities, living by belief, have opinion that may or may not be connected to the facts or the truth.

This Awareness indicates that in Gnana Yoga, the entity is concerned with knowing. When entities become concerned with expanding awareness, they are actually developing their ability to know. This Awareness suggests that entities should, if they can, study the work of Krishnamurti. He will speak of What Is, What Is, What Is. You will find yourself looking and recognizing the What Is of each moment.

Every moment has a What Is, and you will learn to discern What Is in each moment. This Awareness indicates that as you discern What Is, you are actually exercising your ability to be aware. You are actually exercising your awareness of What Is. This Awareness indicates that the more you work with What Is and with developing your Awareness, the easier it becomes to know What Is, and to be aware, and the easier it becomes to discern clearly without having to rely on belief, without having to follow gurus.

Prayer for Balance

Start your day and end your day by saying the following aloud:

I AM ONE WITH ALL THAT IS!

Thank you God

6

Ed's Note: For more on Sai Baba please refer to "Revelations of Awareness" Issues 95-10 (Who or What is Sai Baba); and 98-11 (Sai Baba: Is he Really God Incarnate); \$3 each from CAC.

WHAT EXACTLY IS THE HOLY CITY AND THE NEW JERUSALEM

(Another Biblical Mystery Is Explained)

QUESTION:

The Bible talks about the descent of the Holy City and the New Jerusalem, in a dazzling splendor coming down out of heaven and resting upon the place purified and made ready to receive it. Could Awareness explain what that was supposed to be, and was it somehow related to the Photon Belt or the new dimension?

COSMIC AWARENESS:

This Awareness indicates that this appears to have been some remnant or fragment of earlier records from written material dating back to a time in ancient Sumeria where extraterrestrials came down from the heavens with certain structures which were to the people likened unto buildings because of their size. These were actually ships.

This Awareness indicates that these ships, which landed in which the visitors lived were seen by the Sumerians as buildings, and the story was recorded of the city that came down from heaven and the Biblical writers had information from many different cultures, had stories handed down through mystery schools, and that hints of stories that were often passed from generation to generation down through history, so that this story of a city coming down from the heavens was not original, nor was it in reference to something in the future, even though it may have been written in such a setting.

This Awareness indicates it was originated from ancient past, and referred to those extraterrestrial ships that landed in Sumeria. This Awareness indicates that in the context of the Biblical reference, it is made to appear to be something that will occur in the future, and it can be interpreted symbolically if entities wish to do so, and can be applied to the future with symbols suggesting that something will come down from heaven in the form of a new world or new creation, a new city, and entities can visualize this, and apply it to changes that may occur in this world at some time in the future.

The Meaning of Cayce's Prediction of Atlantis Rising

This Awareness indicates it is likened unto the Edgar Cayce prediction that Atlantis will rise again in the mid-Sixties. This Awareness indicates *It* would like to ask: "Did Atlantis rise in the mid-Sixties as prophesied by the Cayce readings?" Entities will say "No, because Atlantis is still at the bottom of the sea. It has not yet risen." This Awareness indicates that this interpretation of Atlantis may not be the symbolic meaning that Cayce intended.

Entities can say that Cayce did not mean Atlantis would literally rise up out of the sea, but was speaking symbolically, and that symbolically, this referred to the rise of technology in your present world, for Atlantis was noted for its high technology and now your world has high technology, even lasers, which entities can see Cayce referred to in his readings of Atlantis.

Thus, the lasers have been created, and the technology of Atlantis, even some of the priests of Atlantis, or the types of people in Atlantis can be symbolically recognized in today's leaders. This Awareness indicates there are many ways to attribute symbology to make Scriptures or predictions appear to have occurred or to give them future life. Thus, the speaking of a city coming down from heaven is not entirely absurd. It could occur symbolically.

This Awareness indicates a New World Order, for example, comes upon the face of the earth, and entities can say "Oh! This is what the Bible meant when it spoke of the city coming down from heaven! It was talking of this new structure called the New World Order!"

This Awareness indicates that this is simply a stretching of the mind to fit the prediction. It is likened unto O.J. Simpson trying to put the gloves on, to make them fit. Perhaps that was not the proper fit.

This Awareness indicates that these references to a city will have to wait for the proper symbolism to give them credence because at this time there is no validity in regard to a city coming down from heaven.

THE STORY OF THEO THE GREEK AND HIS VISION AND HIS BOOK ON AIDS

QUESTION:

In another area, a question from Peter Hasapis, of Granite Bay, California. I'll read his statement here. It's rather long. He writes: "At some time I would like to ask Awareness a question about a new book that I have just read. Last Christmas I met a new friend, a fellow Greek whose name is Efthimios Pistiolas. (Theo, he calls him). At the age of 5, Theo was considered clinically dead. This was during the second World War, starvation in Greece.

"When he was almost dead, he had an out-of-body experience, and if it wasn't for his grandmother to check his rather warm body again, he surely would have been buried alive. When he grew up and got married, he and his wife moved to Australia. Later on they came to America and opened up a printing company in San Carlos, California, in the Silicon Valley.

"Theo went to college in Greece, but he never went to an English school. In spite of that he built a successful company and at a time he was employing 160 people. He returned at the age of 50, as a very successful business man. On his 50th birthday, when he was shaving in the morning, he claims he saw his exact double in the mirror, which he calls his "Original Self" or prototype, and it told him that it wanted to help him write a book on AIDS.

"Theo, with the help of the "Original" wrote a very interesting book, close to 600 pages titled *Only For Humans*, (the book of books). This book covers different subjects, but primarily, it does deal with AIDS. He says that AIDS stands for "All In Death Sentenced," and that AIDS and HIV are already in the water, in the foods of the supermarkets, and eventually it will start to kill people indiscriminately.

"He claims that AIDS will kill 80 percent of the population if it is not going to be stopped on time. He calls the force behind AIDS and HIV the "Zero Force," or the Anti-Life or Anti-Thought Force that will claim not only human bodies, like death does, but it also will claim the human spirit and soul.

"Apparently the only good thing that will eventually come out of this devastating force is that it will force the Earthians to unite and to realize that they all belong to the same human family, and that all have the same Creator. I have corrected the typographical errors of this book, and Theo and I have discussed all the implications of this book. We are both puzzled as to how he wrote such a massive book, when he never had a formal English education.

"I have tried to explain to Theo that in this case, it was either automatic writing involved, or that he was temporarily possessed by a spiritual entity from another dimension. It is a very interesting and unusual book, and

I don't want to go into any more detail, but I would like to ask Awareness the following questions. (He's got three questions. I'll read all three of them, rather than later):

"How did Theo write this book, when he never went to an English school? How credible is the book? And would there be any dangers involved when Theo would try to publish such a controversial book? Theo and I (he adds) would appreciate it if we can get some answers to the above questions."

COSMIC AWARENESS:

This Awareness indicates that the entity did tap into an aspect of his own self. It was not that of an alien being, or incarnate spirit writing through him, but that the entity tapped into an aspect of himself, which is available to him for future books, if he so desires, or allows these to come through.

This Awareness indicates that it appears this entity has been a writer in a past life. This Awareness does not see at this time the name of this entity, or the era in which he wrote, but this Awareness does see that the entity had a background of writing in a previous lifetime, and that this writing was of considerable importance in his day.

This Awareness indicates the message of his writing appears to be somewhat correct to a degree, but also appears to be a misconception in some respects. The statement that AIDS is present in water and in foods; this appears to have a very small presence in foods or in water, and appears not to be of great danger unless significant changes occur in which these few viruses that are in water or are available on foods should somehow be altered in their very nature to become more prolific and stronger.

In other words, should mutations occur, then these things could become greater threats, but at present *It* does not see this as a threat. This Awareness indicates that perhaps something further could trigger off these mutations to make this a real threat.

This Awareness does not at present time see the danger which this entity writes of as being valid. This Awareness does not mean to totally discard his opinion, *It* simply does not see it at this time, which does not mean it cannot possibly occur. It just seems unlikely, for there is no present reality of a threat in this regard.

This Awareness indicates that in the event of some unforeseen occurrence that changes and creates a threat of such magnitude as described, there are presently certain discoveries being made that will lead within a few years to ways in which all of this danger can be eradicated.

This Awareness does not wish to delve into this at this time, but when these developments have become available, this Awareness will give further information, for the dangers of AIDS can be eliminated by these developments that are occurring.

Any Danger in Publishing the Book?

FOLLOW-UP QUESTION:

Does Awareness see any dangers involved if and when they try to publish such a controversial book?

COSMIC AWARENESS:

This Awareness indicates *It* does not see any dangers involved, but *It* does see difficulties in getting this controversial book published by any of the major publishing companies. It appears that self-publishing may be the easiest way to get it published. This Awareness indicates that the problem appears to be that most publishing companies will see this as something that

will be met with resistance from entities who do not like the bad news it offers, and others who will resist it because they do not see the validity of this message.

Therefore, publishing companies will be reluctant to risk the cost of publishing for a book that they do not expect will actually sell well, and which will be hard to market. The publishing companies essentially are looking for books that the public will snap up because it makes them feel good, because the information gives them the sense of greater power or greater understanding and publishing companies are not likely to believe this book will create the kind of feeling-good energies that the public wants.

Is There a Universal Force That is Anti-Life?

(More on Satan)

FOLLOW-UP QUESTION:

Is there a force somewhere in the universe that is anti-life, or anti-thought, as he believes, that would claim not only human bodies like death does, but also claim the human spirit and soul?

COSMIC AWARENESS:

This Awareness indicates that this concept as that which has been promoted for many years under the name of Satan. This Awareness indicates that this Awareness has suggested previously that Satan is a creation of ancient Persian myth relating to Zamael, or Samuel from the Zoroastrian philosophy, in which Satan simply evolved through the early Christian churches during the Middle Ages.

This Awareness indicates that in the Egyptian hierarchy of gods and creatures of myth, the god Set was part of the origins that evolved into the later Middle Ages creature known as Satan. Qualities of Satan were drawn from the Persian Zamael and from the Egyptian Set, and defined in Christianity as that dark force opposed to life which sought to capture the souls of humanity, the souls of mankind, and which was alien to spirit and life.

This Awareness indicates that it is seen by this Awareness as simply a creation in consciousness that has substance only in terms of consciousness, and therefore, can be energized or ignored. If ignored, the tendency is to allow it to fade away. If energized, the tendency is to help bring it into existence, even more than it presently is.

Theo's Second Book Has A Better Chance?

FOLLOW-UP QUESTION (VIKKI):

Since he seems to have broken the ice with his first book, is it possible that a second book on another subject might be more valuable and have a better chance of selling?

COSMIC AWARENESS:

This Awareness indicates this is in the affirmative. This Awareness indicates that it may be that the entity does not have a great choice in how to frame a book for a commercial market, if the information is coming from deep within himself but this Awareness suggests if the entity does have any such choice, it would be helpful in terms of marketing the book to be able to write something that is uplifting to the spirit of humanity, giving hope or giving information that entities can benefit from rather than feel hopeless with.

The marketing would be easier from a book that is uplifting to the human spirit. This Awareness indicates of course, this entity did not write the book for commercial purposes. It was more of an action of warning humanity, or alerting humanity to a danger that was seen.

The Nature of Books is Explained

CLOSING MESSAGE:

This Awareness indicates that one thing entities, in writing books, need to understand: the nature of a book is to spread information, to reach a market, to get the information far and wide to many entities. If the book does not sell, the effort of writing the book is wasted effort in many regards, although the writer may benefit from discipline acquired from the writing, it is not a good return for the effort.

This Awareness indicates therefore, if you are writing a book, you need to consider whether more than one book will be sold, and whether a multitude of books will justify the writing, and how to acquire a multitude of sales. Therefore, the very purpose of writing a book appears to require a marketing strategy so that when you are writing the book you must consider the commercial aspects of your writing, otherwise you may simply be wasting your time and your effort.

This Awareness suggests therefore, you think in terms of what the message will be for humanity, what the market for your work will be; if it will be large or small, and if it will be large enough to justify the effort of writing the book.

(The Law of Gratitude is given)

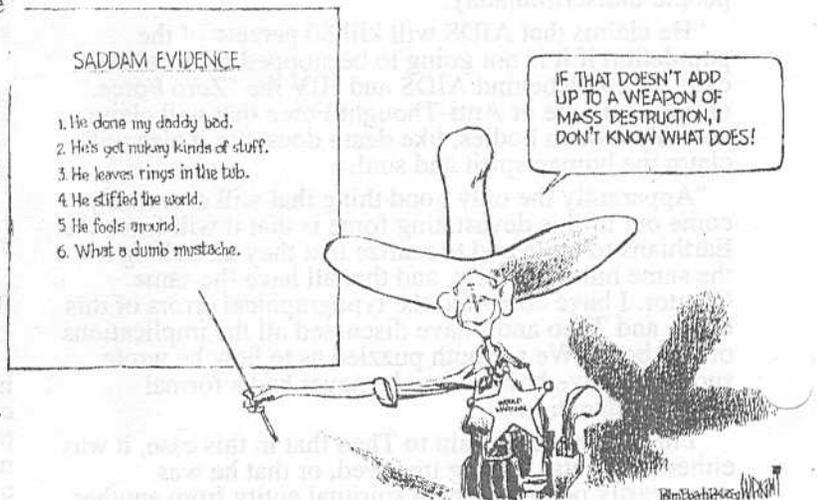

WHAT IS COSMIC AWARENESS?

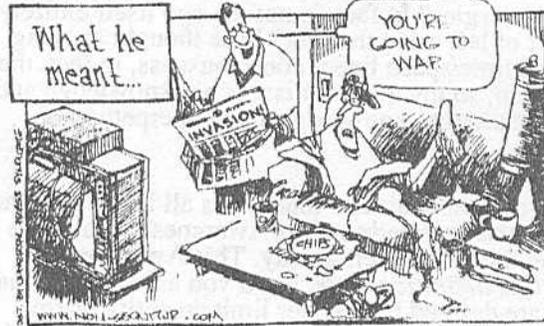

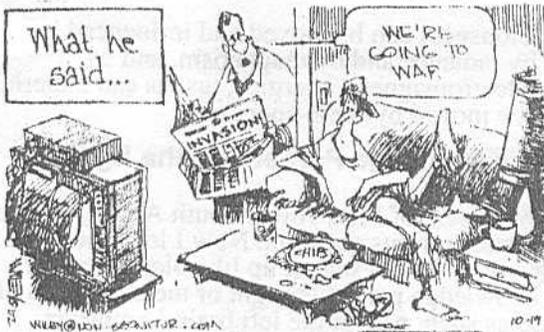

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

SADDAM EVIDENCE

1. He done my daddy bed.
2. He's got nukay kinds of stuff.
3. He leaves rings in the tub.
4. He stifled the world.
5. He fools around.
6. What a dumb mistake.

IF THAT DOESN'T ADD UP TO A WEAPON OF MASS DESTRUCTION, I DON'T KNOW WHAT DOES!

On The Laws of Cosmic Awareness:

By studying these Universal Laws, you will open your consciousness to a level likened unto the finest college education in comparison to a first or second grade education. Your wisdom shall expand ten fold by studying these Laws with deep attention, keeping in mind: this is only the beginning of the many changes one will experience on all levels of your being.

THE LAW OF CO-CREATION

The *Law of Co-Creation* states that two working in co-creative action have the power of four working individually; and three working in co-creative action have the power of nine; and four working in co-creative activity have the power of sixteen; and one hundred and forty-four working in harmony can change the world. Wherein large groups of entities believe and agree on certain images as being real and being stable, this agreement does hold the power of many times that number of energies, if such energies were held by individuals working separately. Wherein groups of entities agree upon certain images, these images do tend to manifest and hold their being in a magnified manner.

How Many "Powers of God" Are There?

(More on Resonating Electromagnetic Energy)

QUESTION:

(3/12/91)

Francine Stebbins, Madison, Wisconsin, writes: "I want to ask Awareness a general question. In 91-3 issue #378 of *Revelations Of Awareness*, on page 5, Cosmic Awareness indicates "the Power of White Light represents the 4th power of God." How many powers of God are there? What are they? And how can they be used? or maybe I should say: How can they be used for good purposes?"

COSMIC AWARENESS:

This Awareness indicates that this 4th power of God as that which is a reference to the resonating electromagnetic energy. This Awareness indicates that there is the electromagnetic energy, there is the magnetic energy, and there is the resonating electromagnetic energy.

This Awareness indicates there are also those powers or forces known as gravity waves.

This Awareness indicates that in general it is assumed, or in your human collection of knowledge, it is recognized as four powers in the concept of fire, air, water, that earth or that which is stability is not recognized so much as a power but as a state of rest. The fire, air, water refers to radiance, as fire; water as magnetism; and air as resonance or vibration.

The resonating electromagnetic energy as that which is a fourth power, which is closely linked to that which is called Akasha, or spirit, or which may be termed antimatter. This Awareness indicates that it is an energy field in the realm of antimatter that penetrates into the material realm and causes a resonance and affects electromagnetic energies that permeate into the physical reality.

Resonating Electromagnetic Energy is Called the White Light

This Awareness indicates that essentially the term "resonating electromagnetic energy" generally applies to that which is called the White Light, or the 4th power of God. It is associated with experiences of healing-with experiences that are supernatural in terms of spiritual energies affecting the physical realm. Thus, the entity in a physical reality who is touched by resonating electromagnetic energy may feel or relate the experience as being touched by the Hand of God or by the Spirit of God or some other term in an effort to describe the experience. It is in effect the influence or contact with resonating electromagnetic energy.

Getting Blissful Goosebumps from Music the Same Thing

This Awareness indicates that vibration such as may be experienced through music or color, but especially through music, often gives an entity feelings of the hackles on the back of one's neck or hair on one's arm rising in a kind of blissful goose-bump type experience; this from the extreme beauty of the vibration and music. This Awareness indicates that this approaches that same kind of spiritual energy known as the resonating electromagnetic energy or that of the White Light or the mystical or spiritual experience.

Is There No 5th Power?

FOLLOW-UP QUESTION:

Then there is no 5th power other than the 4th?

COSMIC AWARENESS:

This Awareness indicates that beyond this 4th level is pure consciousness. It is not so much a power because it is not a moving energy. It is like the earth energy or stability energy, more static. It is static, but it is possible to move that static energy with the other powers of God.

Thus, consciousness can be moved and influenced by vibration, by radiance and by magnetism, and by resonating electromagnetic energies, just as can material substances be moved by these energies.

Does Knowledge Perpetuate the Ego?

QUESTION:

Jocelyn Marnoch, of Pine Town, South Africa, writes: "Here's my most serious question. Now I love the knowledge you give and soak it up like blotting paper, but is not knowledge part of thought or the constructs of thought and as such, part of the left brain Luciferian separative energies? In fact, is not the ego itself entirely a construct of left brain thought? I see thought as tying us in to this time/space linear consciousness, in fact, the trap we are in; so my question is: "Is not knowledge and time spent gathering knowledge an ego perpetuating activity?"

COSMIC AWARENESS:

This Awareness indicates that this is all in the way the entities use the knowledge. This Awareness would like to describe this in a different way. This Awareness indicates that *definition* is the word you are seeking; that as things are defined they either limit an entity or free the entity, depending on how one uses the definitions. If one defines oneself as being entrapped, and uses words or lines or fences or walls or gates, or doors or windows or openings in these fences and walls and gates and prisons, one can either define oneself as entrapped or define oneself sheltered with the option and opportunity to leave the shelter.

Thus, one may, with thought, create a structure that allows oneself to gain freedom to expand one's consciousness, to reach into new realms and new dimensions because of the structure and thought that is being created, or one can be entrapped by thought so that one spends all of one's time thinking and never doing, thinking and never experiencing.

This Awareness indicates the experience is the reality. The thought is but the reflection on reality. It is generally so that any thought is limiting to an entity in terms of consciousness, but there are thoughts that can free entities if they are already entrapped by lines of thought and thought confines. If one has a *thinking pattern* that limits oneself, and one can rethink to find a way out of that thinking pattern, then thought has opened the door for new experience and the entity may free himself or herself from the thinking pattern, and thus, thought can liberate.

Why Awareness Presented the Development Classes

This Awareness indicates that as long as an entity depends strictly on thought on the mind, the entity does not grow to the fullest extent. It is for this reason that this Awareness has given Development Classes to lead entities into deeper and more meaningful experiences, learning through experiences, learning through imagery, learning through visualization.

This Awareness indicates that unfortunately, these experiential classes, known as Development Classes cannot be put into words for thought or for reading, thus, entities cannot receive the full teaching of this Awareness through a newsletter. This Awareness indicates that *It* does what *It* can through the newsletter to assist entities in freeing themselves through thinking, but that thinking does have its limits, and it is always hazardous in that many entities take ego trips on their information or on what they think or have gathered from these messages and the ego trips may be somewhat limiting to the entity or may set them back from what they could be.

All Words are Dead Until Put Into Action

It is as this Awareness has indicated previously, that these words are likened unto dead leaves, and come to life only when put into action or into experiential status. Thus, if you can experience what is being given, you may find a greater value and greater life in the messages than if you simply throw the words around in your mind, thinking thoughts and thinking words about things to gratify the mind, which will never be satisfied with information. The mind always wants more to think about, and it never gets enough.

The mind itself is a trap for entities, but it can also help liberate entities, if used properly, if used to gather information for the entity to meditate on and experience and image and visualize.

The Universe as an Information Processor

This Awareness indicates when *It* speaks of the universe as being an information processor, this terminology has no value whatsoever as long as it remains just a thought, a concept, but if an entity can take the concept of a universe that is an information processor and actually visualize and experience information processing that is going on in the universe, the entity can obtain Universal Consciousness just from that terminology, but it *has* to be experienced and not simply thought about.

This Awareness indicates perhaps this helps somewhat to clarify what the questioner is asking and to indicate that the questioner does indeed have a point in the question asked. There are limits as to what words and thoughts can do for entities, but in themselves, words and thoughts are not always limiting. It depends on how words and thoughts are used.

Words are Like Water Carried In a Bucket

This Awareness indicates it is likened unto: Words are like water being carried in a bucket. The water is the meaning of the word, and the bucket is the word itself. You may receive the bucket or the word, and not partake of the water, but if you partake of the water, the meaning of the word, it can have great value. Thus, if entities perceive the meanings of these messages in a kind of experience, rather than just as thoughts and words, then indeed, the messages can become triggers for your own perception of the issues being discussed. Then, indeed, as you perceive these issues you may find your own words to describe the issues or subjects under discussion.

It is much more meaningful for you to find your own meaning and put your own words to it, than simply to think the words that are given by this Awareness and discuss them as thoughts without any substantial meaning.

WHEN WE DIE ALL KNOWLEDGE IS LOST?

QUESTION:

Her next question: "This brings to mind the only bit of info that did disturb me. Awareness said that when we die, all knowledge is lost, and the life forgotten, as a dream; so why are we bothering anyway?" She asks.

COSMIC AWARENESS:

This Awareness indicates that if indeed *It* said that in that manner, *It* was apparently referring to some particular question in regard to certain information that implied something more than is clear here, for not all knowledge is lost at death. All *thoughts* are lost at death. Words are lost at death. Words in the sense of those names and things so common to an entity but the knowledge that one has gained in life, the study that one has done, the character that one has built all of the ethics and talents that have been developed; all of these carry on with the soul, as a kind of inclination or a kind of

deep interest or propensity that can be developed again more quickly, in the following experiences.

This Awareness indicates that thus, an entity who has spent a lifetime or a considerable time studying music, will have the inclination toward musical talent in the next lifetime, even if he cannot still recall how to play the notes or how to play the songs that he played in a previous lifetime. The entity who is inclined with linguistic skills may be reincarnated in a following lifetime, but will still talk and will still need to learn all of the grammatical and linguistic rules and foundation in the next lifetime, if he or she continues developing these linguistic skills.

Even Shakespeare Could Not Take his Knowledge Into Next Life

This Awareness indicates even Shakespeare could not carry his knowledge as to writing plays directly into his next life. It stayed with the brain patterns that recorded his learning, but the electrical body of the entity, the soul-substance that carried into the future life, carried the inclinations of these linguistic skills so that it was easier for him to follow through and to relearn much of what he had known before. The only problem with the entity in this regard is that he did not have appropriate training in the next life and could not develop on his own the full talent of his previous abilities as Shakespeare.

This Awareness indicates that it is this that the entity may have misunderstood when this Awareness said you do not carry this knowledge with you through death. *It* meant that you do not carry the full knowledge you have acquired in a lifetime through the doors of death and into your next life. You acquire your interests and you acquire certain leanings toward a field of study or an interest in something, and it may be easier for you to get back into a certain type of studying if you have done it in previous lifetimes.

This Awareness indicates in fact, an entity may spend several lifetimes in certain research and study in order to perfect a talent that flowers or develops in one of the subsequent lifetimes.

WHAT ARE THE "INNER PLANES?"

QUESTION:

Another question from this entity in Africa, is about planes of consciousness. There's a number of questions in this, so I'll read her statement and then re-ask particular questions if Awareness requests.

"This question is about planes of consciousness. What is the difference between inner and outer planes. What does Awareness mean when *It* refers to inner planes? (Awareness has explained this before) "I wonder if all this could not be better explained with a diagram, i.e., for example: Now it appears that in Celestria several different worlds, planes, realities coexist in the same space/time. If so, how many? Is it possible to move between these? Do they have consciousness at a different vibratory frequency from ours?"

"Also, when we die, do we go to either levels of Celestria or Hades?, and does this apply to all on the different planes of Terrestria? Also, I understand we are third dimensional beings, self-awareness, and will evolve to 4th, love or knowledge, through to the 7th in this octave. How do these dimensions or densities relate to the above, and is the 4th density still a plane of Terrestria?"

COSMIC AWARENESS:

This Awareness indicates that the concepts of densities and 3rd dimension compared to 4th dimension are concepts that are promoted by other teachings that are not or have not been specifically message from this

Awareness. It appears these are from other metaphysical teachers. This Awareness does not particularly accept these concepts in those terms, although the terms may also be interchangeable with terms used by this Awareness.

Energies of Creation Used by God

This Awareness wishes to explain as well as possible the energy fields associated with the questioner's concern. This Awareness indicates that there are vibrations. These may be called frequencies. There is also radiance, and there is also magnetism. This Awareness indicates that these three energies have been previously mentioned; fire being radiance, resonance or vibration being air, and magnetism being water. These are three of the power of creation or powers of God.

This Awareness indicates that when you discuss planes and octaves and levels of existence, you are more or less discussing resonance and vibration. This Awareness indicates that the universe itself has a kind of radiant force that causes expansion, and also a contrasting force known as magnetism. These also are known as the yang and yin in all things, but the vibration, or resonance that lies between the fire and water-- that which is called air, is that which creates the degrees in between. These degrees being likened unto little barriers, separating different frequencies or vibrations, creating little planes of mixtures in the yin or yang, and these little mixtures at different frequency levels are the different realms or octaves of existence, and these are referred to as levels of consciousness.

They are also different levels of creation. They are also different planes of existence, depending on how much territory in the fields of vibration are encompassed. Thus, in your particular octave or level of creation, there are also many different levels of vibration and frequencies included. You have yin and yang in many different varieties in your earth or Terrestrial experiences. You have frequencies and vibrations that vary over many octaves and these octaves even go into extremes of ultra-high frequency or ultra-low frequencies that reach beyond the level of your sense perception so that in fact, beings and things could exist in your Terrestria level without your ability to see or hear or feel them, simply because your organs do not function outside a narrow range of frequency levels.

Cats See More Than Humans Do

Your vision allows you to see a limited amount of vibration. Your ears allow you to hear but a limited number of frequencies, and your feelings are limited. Your senses simply do not grasp the full range of frequencies that are available to you in your Terrestrial experience. Cats see more than you do, dogs hear more than you do, insects see more of the infrared vibrations than you do, and many creatures hear more of the different frequencies than you do.

This Awareness indicates therefore, in many ways while you experience all of this, your senses limit your experience so that there is much that lying behind your experience is denied you through your perception. Your ability to perceive is limited, and therefore, while the experience is available to you, you do not grasp it because you cannot perceive it. This Awareness indicates that all of this has to do with the development or lack of development in your sense apparatus, the organs of sight and hearing especially, and of touch, taste, and smell, which grant you blessings of great knowledge and information, especially great if compared to what you would know without them, but they also limit your perception because of their own limitations.

If you could have an extension to your sight or your ability to smell, or your ability to hear or feel, the world would be much more active to you, there would be much more available in your world than the limited world you now see, because of your limited perception. This Awareness indicates that the organs of perception that have been given to you to perceive the world, which has certain vibrations and different frequencies allows you to feast on and indulge in certain information, but even if your senses were so great as to be able to perceive all that lies in Terrestria, you would still not see the entire resonating electromagnetic field of energy because Terrestria as being a kind of terminology for the physical world, is limited to the vibrations that lie within certain levels compatible with your senses; and if you wanted to see into Celestria your recognition of these higher frequencies would have to be experienced through the development of still higher organs of perception; these being such as the chakras that can perceive into higher frequencies of consciousness.

Our Limited Senses Can't See Frequencies of Hades and Celestria

This Awareness indicates that in other words, there is a field of energy called the resonating electromagnetic scale, of which only a small portion can be perceived by the human body with its limited senses, but which has a range far surpassing these limited senses, and the range that is above the human senses may be referred to as Celestria, and the range that reaches below these human perceptions may be referred to as the vibrations and realm of Hades.

Those lower vibrations, when experienced by the chakras of the lower unevolved energies of the soul, are perceived as a place of torment and conflict. Those higher vibrations perceived by organs of highly evolved consciousness are perceived as frequencies in the sense of great beauty because of the higher frequencies, generating a kind of peaceful frequency that allows harmony through these higher resonances between the higher realms or frequencies and those realms or frequencies of the higher chakras, the higher levels of consciousness.

It is a matter of not so much thinking about places, but realizing there are frequencies that entities can tune their dials to, just as entities can tune to different frequencies on a radio and get different channels. Likewise, in the universe the radio receptivity of the human tuning to higher frequencies and vibrations in the universe, reach broadcasting stations which may be thought of as realms of a higher order, and may likewise be dialed to lower frequencies to locate realms of a lower order.

Things That Determine Where an Entity Goes After Death

One gravitates to those outer realms in consciousness with the vibration that is in the inner realm of consciousness, thus, the entity who turns inward to develop one's own inner self, will generally and eventually end up going to the realm that corresponds outwardly with the frequency that one has developed inwardly, so that an entity whose vibrations are of a lower frequency is likely to move to a place outwardly where the vibrations match.

This Awareness indicates that this helps to determine where an entity goes after death and into rebirth, and whether the entity is born in one place or in another. If born in a place of great suffering and difficulty, the entity has been in tune to those vibrations, and thus, because of like attracting like, the entity moves into those outer vibrations that match the inner vibration, and likewise, the entity who is born into a situation wherein a great Joy is available, the entity may have an inward

frequency or vibration to match that which appears outwardly.

Your Free Will Allows You to Choose Realms

This Awareness indicates that this is the general pattern, but that entities must understand there are exceptions to this, because entities also have free will and an entity who has the option to be born into a place of great joy and beauty because of his own inward joy and harmony, may select to move into a place of suffering and may choose to be born in a lower status, much as was the experience as given in the Christian story, for the reason that the entity might perceive a need to experience the suffering of others, to understand the suffering of others, by being born into that suffering, even though his or her inward frequencies are of a higher nature.

Thus you have people who are saintly, being born in great poverty, or in great suffering or in lands where there are few opportunities, but because of their saintly qualities and vibration, they still rise above their mundane circumstances to become great leaders through their work and assistance to others, or through their ability to bring joy to those who would otherwise be suffering.

This Awareness indicates that likewise, there are some entities who do not deserve to be born in high status, but because of some experiment on a cosmic level, or some debt that is owed to them, they maneuver or manipulate or are otherwise granted an exception that allows them to be born in a higher state than they deserve, and to have a chance to prove themselves worthy.

In many cases they fail and fall; in other cases they misuse the position and abuse others by virtue of having their higher position, and prove themselves clearly to be unworthy. In other cases, they may be used in those positions to effect a change that can in the long run have a beneficial effect on the earth or the country or culture in which the experience occurred. This Awareness indicates that in other words, there are entities who oversee some of the reincarnation experiences of others.

Some Entities are Allowed to be Born to Alter History

There are some times when entities are drawn strictly by 'Like Attracts Like' rules, to put them in the position and frequency levels that they have a sympathetic vibration with, and there are also times when, for the purpose of altering the course of history, an entity may be put into a position that is not fitting for the entity, but which will allow that entity to make certain changes that alter the history, as desired by those who are observing the movement of history.

This Awareness indicates that this latter is used rarely as an exception to the general rules associated with the principles of reincarnation and karma. Generally the reincarnation follows rules to allow the karma of an entity which is reflected in the entity's vibration, to move the entity into a vibratory outer realm experience, compatible with the vibrations on the inner realm. By 'inner and outer,' *It* is referring to the inner consciousness of an entity, and the outer world the entity moves into.

At Death Your Frame of Reference is Altered

This Awareness indicates of course these terms are relative; that when an entity dies, and is outside the realm of your present reality, the entity sees the realm of your present reality as an inner realm and the realm in which the entity exists as an outer realm, but when the entity switches and becomes incarnated into your realm, it is the other way around, seeing that death is the inner plane, or sleep states are the inner plane, or levels of

meditation as the inner plane, and the outer plane being the world you term "reality".

'Inner and outer,' in other words, are simply relative to the position from which you are viewing your realities. This Awareness indicates if this has not clarified the questioner's question sufficiently, that further questions on this may be asked.

How Does Saddam Hussein Fit In?

QUESTIONER:

I think it's explained. Her terminology, like Awareness mentioned, refers to terminology used in other groups of philosophy, but I had a question.

When Awareness mentioned that some entities maneuver and manipulate to have themselves born into a higher state, I couldn't help but think of Saddam Hussein, who Awareness indicated was Ghengis Khan who, during his lifetime, several hundred years ago, was responsible for slaughtering millions of entities. Could *It* go on a little bit on how they maneuver and manipulate? I thought there was some sort of order in this type of thing. Did his High Self abandon him or something?

COSMIC AWARENESS:

This Awareness indicates that the entity Saddam Hussein was not born in a high position. This entity was born in a very low position in his land, and being highly ambitious, maneuvered after arriving on earth, maneuvered and manipulated to seek power. The entity having had considerable problems that molded him to become highly ambitious and to develop certain qualities that gradually led to him becoming more and more ruthless in his manipulation and maneuvering.

This Awareness indicates that in regard to how entities on the other side, in the non-Terrestrial experience can maneuver and manipulate to find places or states in which to reincarnate on a higher level than they deserve; this reincarnation as that which requires assistance from guides on the other side. One cannot easily reincarnate without some attention from these guides, and therefore, in the reincarnation process, the guides will often assist the entity in determining the best position for their incarnation in the physical plane. It is much like having a counselor in college who helps you determine what courses you should take to achieve your desired education.

How a "Counselor" Can Manipulate an Incarnation

This Awareness indicates that if an entity is highly ambitious and seeks to gain through reincarnation into a status that is beyond what one deserves, an entity can be demanding and manipulating, much the same way that an entity on earth can be selective, demanding and manipulative, with any other kind of earthly counsel, making demands that are within reason, but by being somewhat too particular, the entity can sometimes improve a situation by double-talk or talk about how he needs this experience in order to grow from it, in order to learn the true lessons.

An entity might argue for example, "I need to be in power of many people so that I can learn to use power more wisely, since I fouled up the last time I had power in my previous life, and if they can argue this sufficiently with the counselor, they may be able to convince the counselor to let them incarnate into a family that would later help them rise in power.

This Awareness indicates that this is but an example of how entities might manipulate to get a position that is better than what they actually deserve, through the incarnation experience. This Awareness indicates that others might be less particular, even to the point of simply being happy to have *any* chance at life on earth

and willing to take any parents who will give them the opportunity, and if a person is not particular, then the entity may be processed more quickly into an incarnation, and this, for some, is their main intention and desire, to quickly re-enter the human body.

This Awareness indicates that some who are more particular and hold out for better parents or parents who will give them more of what they want, could find themselves in better situations. Thus, if entities have complaints that they were born in a poor family and that they never had a chance, it may well be that they simply were not choosy enough and did not care at the time to whom they became incarnated.

Entities all Have the Opportunity to be Selective

This Awareness indicates that entities have opportunities to develop to be selective, to choose a mate carefully, to choose a job carefully, an occupation or career, to carefully choose a religion, to carefully choose their school. They also have the opportunity to carefully choose their parents when they incarnate into the physical body, but as you know, most people take whatever comes and are anxious to get on with things.

Many entities will take the first mate offer that comes along, find themselves married to someone they didn't know when they got married and can't stand now that they are married, and wonder how they can get out of the marriage without giving up too much in the divorce. Many people are simply not careful in their selection and choices and get involved prematurely, without truly examining what they are involved in until it is too late.

Those Who Complain About Parents and Childhood

Entities who jump before they look experience this kind of situation frequently, and those who are born in childhood experiences that they did not like, are probably inclined to this kind of pattern, and perhaps should blame their own behavior of leaping before they look, rather than blaming their parents or the world, or God for their having been born in a poor family with unsatisfactory parents.

This Awareness indicates that it is likely that such entities who feel this way about their parents will continue leaping before they look and find themselves moving from one problem to another, because they were not selective and careful in making their choices in life.

This Awareness indicates that those who are more careful may not have the instant gratification, but they may have better satisfaction because they waited. Likewise, in the case of entities who do not jump at the first chance to incarnate into the physical body, but who carefully wait and choose to find a situation that would bring them better rewards in life, may in fact find those rewards earlier, because they were selective and waited.

This Awareness indicates, of course, those who read this information cannot benefit from it now because they have already entered into the physical and will probably forget this information before the next opportunity to use it comes their way.

The importance to those who have already incarnated, the importance in this message, is that they understand it so that they no longer curse God or blame God or blame fate that they were born in a family which did not do for them what they hoped for or expected, because they had the choice before entering in to physical form. They have had the opportunity to select their parents. It was not forced on them and therefore, they got what they chose, and there is no cause for them to complain about their parents and childhood.

This Awareness indicates there is always lessons to be gained from negative experiences which, if gained, will

make the experiences very much worthwhile, and that is what can be rewarding from these experiences; that the complaint about injustice does not bring rewards to an entity, but the recognition that the entity can learn something of value from the negative experience allows the entity to look at the experience, not with hostility, but with curiosity to discover: "What is it that the experience gave me?"

This Awareness indicates that many entities having a very difficult childhood, may find that the experience toughened them to allow them to appreciate a more kind image or parents, so that when they have their own children, they give to their child that which was denied them through their difficult childhood and so that they appreciate the kinder parent that they meet throughout their lives in others or in themselves, and also, the suffering that they experienced as children may help them to experience greater joys in the pleasures that come to them later in life, because joys can only be strengthened by the comparison of the suffering that has gone before.

Appreciating the Sorrow and Suffering and Those who Caused it

One cannot know joy without having known suffering and having suffered, one can truly appreciate the joys that others offer, and if one has learned to experience joy, one can then appreciate the sorrow and suffering that they have experienced previously and may even learn to appreciate the entities who contributed to that sorrow and suffering, especially if understanding that these entities were not fully aware of what they were doing, or had so many problems of their own they did not have the understanding of the sorrow they were causing.

Tell Us More About those "Counselors"

(More on how an entity's "Guides" Operate)

(FOLLOW-UP QUESTION:

These guides, similar to counselors Awareness was speaking of, could *It* describe these entities a little bit more? How they become counselors, what level they're on, and do they work with ... ?

COSMIC AWARENESS:

This Awareness indicates that the concept of level as that which is difficult to discuss. One could say "Level 7," one could say "Level 12," one could say, "Level above this, or level below this"--It has no meaning whatsoever. It is a realm beyond life, prior to entering into birth. It is not something that can be classed as a level to give any sufficient information to entities.

If this Awareness were to say it is Level 2 or 3 or 6, what does this mean to anyone? This Awareness indicates that in reference to who they are, these are entities who function in a capacity of assisting entities who wish to return to the physical reality through the reincarnation process. They are not particularly geniuses at what they do. They are not ignorant. They do their jobs just as many bureaucrats in your society do their jobs. It is not something that is glamorous or sacred, any more than giving a baptism, or assisting entities in getting married or handing entities their diploma might be thought of as sacred. They simply assist entities in choosing their parents and sometimes they make mistakes, or assist an entity in a way that turns out to be detrimental, for many parents are very poor parents indeed.

This Awareness indicates the guides are not educated or trained by God or supernatural powers. They are simply beings in another realm, the realm that lies beyond life, and they do not necessarily stay at that occupation forever. They may stay for long periods of time if they enjoy the activity.

This Awareness suggests the question be continued. It appears there was something further you were going to ask.

QUESTIONER:

Well, I was wondering if these entities have had life experiences themselves, and do they

COSMIC AWARENESS:

This is in the affirmative.

QUESTIONER:

It would seem to me like they would use some sort of a computer to help program out the odds and possibilities. Is this something they do?

COSMIC AWARENESS:

This Awareness indicates they use that which is termed "intuition." Their own intuition as that which functions much more rapidly and with greater effectiveness than would a physical computer. You must realize these entities are not in a physical world. They are in a spirit world. They are able to perceive or look into the physical world and they are able to read the consciousness, to some degree, of entities in the physical world. There are some limitations.

Thus, occasionally they will send an entity to be born of a certain couple, only to discover after they have initiated the process, that the couple does not want children, and they may have their effort aborted, for example, which means they then must start over trying to find another couple. This shows the inefficiency of these entities in terms of their intuition. Had they been more clear, they would have been able to recognize that the couple would abort the child.

This Awareness indicates that humans like to think that all spirits and many other humans have absolute knowledge that can be made available for a fee, or because of rules. This Awareness indicates that absolute knowledge by anyone is a great rarity, and is essentially unheard of on earth.

WHAT ROLE DOES THE HIGHER SELF HAVE IN SELECTING A LIFETIME?

FOLLOW-UP QUESTION:

What role, if any, does the entity's High Self have in the selection of this next lifetime?

COSMIC AWARENESS:

This Awareness indicates that this can assist the entity in helping to find a situation in which the experience the entity needs for his or her own learning can occur, so that the entity does gain something from the lifetime. The High Self is not interested in simply providing a nest for an entity to experience the physical world. The High Self has an interest in providing a situation in which the entity experiences the physical world to learn lessons that the entity needs to learn.

This Awareness indicates that this generally means that the High Self causes problems for the entity until the entity has learned the lessons necessary, after which the High Self generally allows the entity to find rewards for those lessons learned.

HOW CAN WE GET THE RIGHT BRAIN TO ASSERT ITSELF?

QUESTION:

A final question from this lady Jocelyn, in South Africa, who writes with a sense of humor. I'll read her last question. She writes: "Now for my final question, guys. It seems to me consciousness operates through the left brain. It seems to be stuck there. What on earth is the right brain up to? It is desperately needed yet it is

sleeping on the job. I have tried shouting at it, begging it, shaking it, and so forth, all to no avail.

"I am convinced whoever made this too solid portion between these two lobes made a big mistake. Sorry Awareness, if it was you! How, how, how, (she asks) can we reach through? The barrier is too solid. The only tool we have is faith. There's just got to be a way, and realizing the utter futility of the poor old left brain trying to apprehend oneness, wholeness and so forth, it cannot be done.

I feel like a frustrated suitor, totally rebuffed by an ultra-shy and retiring girl. Would soft lights, poetry and romantic work, do you think?"

COSMIC AWARENESS:

This Awareness indicates that music, soft lights, poetry, anything having to do with the imagination, anything having to do with letting go of the thought process. Anything that allows an entity to feel wholesome or to feel the totality of life, to experience unity with all things, contacts the right brain. This Awareness suggests that dance relates to the right brain. Music and art relate to the right brain, and spatial awareness relates to the right brain.

How to Stop Your Thoughts

This Awareness indicates that words and mathematics, analyzation and thought activity generally relates to the left brain. That if you have difficulty in stopping your thought, you can simply meditate, watching your breath go in and out and listening to the breath as it goes in and out, and in this manner you may stop the thought.

This Awareness indicates that as long as you are focused on a sound, such as the sound of your breath moving in and out, thought does not particularly enter the mind or does not need to enter the mind. This Awareness indicates there are many entities who cannot stop their thoughts, just as there are some entities who cannot stop their mouth from talking incessantly. But when the brain is constantly saying words, it is likened unto the entity in a room with a television set that cannot be turned off.

This Awareness indicates that there are also some entities who cannot even think thoughts in their head. They cannot hear words within the mind. This is more rare. These entities tend to be more right-brained and need to develop the use of the left brain. This Awareness suggests that if you are having trouble contacting the right brain, simply start watching your breath, listening to the breath, and stop thinking words, and the right brain will begin to function at that time.

Practicing this on a daily basis through meditation and then through continued meditation, even as you move around your home or do things, so that words are not going through the left brain, this can help you to experience more right brain activity, even in your mundane activities.

Understand the Right Brain Does Not Think Words or Thoughts

The silence of the right brain is that which may give you the impression that you cannot contact it. You must understand that the right brain does not think words or thoughts as does the left brain, so that you do not receive thoughts out of the right brain and therefore, you may think that it is not working when in fact it may be working quite well in the silence that it emits.

You may wish to quiet the left brain so that the right brain has more of a chance of expressing itself. The right brain expression generally is through dance and music and through dreams. It will also experience or express itself through images and intuition, so that when

you have a sudden insight, such as a flash or picture, that may be the right brain in action.

THE NEW ASTROLOGY AND DISCOVERY OF 12 BRAINS IN HUMANS

QUESTION:

Gloria Kilby, in reference to the brain, she writes: "You may find this interesting, and it may be interesting to your other readers to ask Awareness of this.

It comes in my Mayan lesson this month. Key Words for the 12 brains and their "switchboard functions," based on teachings of astrological principle." And she lists Aries--the I AM, the Consciousness; Taurus--motion, likes and dislikes; Gemini: substance, association, reflex actions; Cancer: receptivity and character, soul; Leo: the faith, vitality, physical being; Virgo: the part which feels pity, desire to serve; Libra: judgment planning, love; Scorpio: drive, skill will and desire; Sagittarius: soul, imagination, intuitive; Capricorn: extremes of emotion; Aquarius: the created character, awareness, love of learning; Pisces: generosity, intellect, mysticism.

"This is said to be modern psychosurgery's most important discovery. This is: that man possesses not one, but twelve brains. The basic principle of astrology, the 12 spirits or departments of the Zodiac, has been rediscovered by modern science in the 12 brains possessed by every man. Twelve principle energies or expressions of living energy seated, enthroned in twelve areas of our brain material.

In all parts of the world, even in ancient times, these 12 types of energies, falsely likened unto spirits by later man, have been recognized." She says: "Egas Monig and Dr. Freeman and Watts, likens these 12 brains to the characteristics of the fish, toad, snake, worm, dog, cow, horse, ape, et cetera. How much easier their task may become if they follow what is left of the most ancient of all sciences, the science of Atlantis and the Mayans: Astrology.

"I found this very interesting and thought you may also, and you might like to ask Awareness to comment."

COSMIC AWARENESS:

This Awareness indicates that this is indeed an interesting find and correlation that can be most helpful in understanding the workings of consciousness in the brain in accordance with modern discoveries. This Awareness indicates that it would be beneficial for the full question as the entity presented it to be offered to the membership so that it can be studied by the membership in relation to their own understanding of astrology and of the areas of the brain and their functions. This for those who are interested in these matters.

This Awareness indicates that there have been certain studies in terms of mapping the brain and the areas which the brain correlates to in terms of functions and body, and that these may also be studied in this respect.

Options Offered for a "Bleak Future"

QUESTION:

One final question from Gaetane Vallee, in Quebec, Canada. She writes: "I just heard on an esoteric program on TV, the only ways to get away from these times is (1) a conscious death without fear; (2) to be at the right place when things happen; (3) the rapture; (4) holiness, like the nuns in the middle of Hiroshima; (5) to jump into the time/space tunnel, like the Philadelphia Experiment." And she asks: "What do you think of this?"

COSMIC AWARENESS:

This Awareness indicates that the perception by someone is that which does not leave many options for

the majority of people. This Awareness does not *Itself* buy the argument that these are the only ways for entities. There are always other options for the stream of life; that these may appear to be the only options for those who see only a bleak future. This Awareness does not see things as being so bleak.

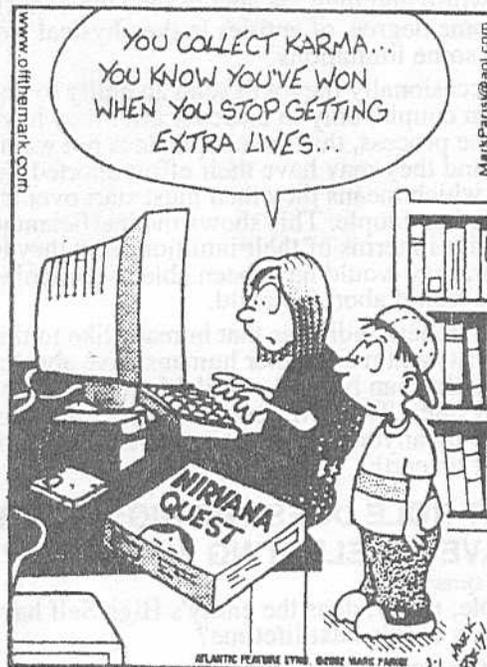

There are difficulties, there are dangers, there are problems to overcome. This Awareness sees, however, that with an awareness of these difficulties and problems, and with the consciousness that has been given to humans to solve problems, it appears that the problems *will* be solved and the difficulties overcome.

This Awareness suggests the Interpreter be brought from trance.

(The Law of Gratitude is given)

OFF THE MARK

By Mark Parisi

Wisdom of Awareness—ON THE MASS MIND

This Awareness indicates this is a difficult planet for entities to live upon for the mass mind is essentially insane, has been manipulated and hypnotized by magicians, by black magicians, by forces which have set one part against the other, and entities who attempt to spread the truth or Light are often persecuted, or eliminated as those forces who follow the darkness and ignorance and who perpetrate this upon others often enjoy keeping the mass mind confused, scattered and in conflict. It behooves entities who wish to see improvements to be especially aware of being more forgiving, being more merciful, being more loving than even appears to be appropriate in view of the violation which they must suffer. (Issue 80-3)

WHAT HAPPENED TO DB COOPER?

(And What is the Boeing Atlantean Crystal Project?)

QUESTION:

On Thanksgiving evening of 1971 an entity calling himself D.B. Cooper performed one of the first hijacking of airplanes over the state of Washington and he leaped into the night carrying a satchel of money, and ever since that time, there has been no word of this entity or none of the money has ever turned up, and periodically, stories about this entity crop up. Many people wonder whatever happened to this legendary man. Would Awareness please enlighten us on this subject?

COSMIC AWARENESS:

This Awareness indicates this as relating unto certain actions connected with the Atlantean Crystal Projects, and related unto Boeing research. This Awareness indicates that this as having been intended as a way of receiving money for work in this direction. This Awareness suggests that this not being that which the Boeing Complex was aware of as taking place within its actions. This Awareness indicates that this is all that is to be given on this situation from this Awareness, at this time.

FOLLOW-UP QUESTION:

We couldn't be told whether this entity is alive or passed over?

COSMIC AWARENESS:

This as negative.

THAT CRYSTAL FOUND IN THE OCEAN

QUESTION:

Thank you. There's a question we asked several months ago and there wasn't enough time left, and it was about a crystal that was found in the water in the Pacific. Could I ask that question at this time?

COSMIC AWARENESS:

This Awareness indicates this in the affirmative, that this Awareness suggests the question be asked.

QUESTION:

There was a story in *Meta-Earth News* and other New Age periodicals, about a Dr. Brown finding one of the legendary Atlantean crystals. Using a special magnetic detection device while diving, the doctor and his companions got a strong reading in a particular area of the notorious Bermuda Triangle. Diving down, he discovered a pyramid with a blue capstone. He entered an open passage and found a room containing a unique pedestal, consisting of two hands holding a crystal with another suspended above it. Later, the doctor found that his unique crystal would emit a blue-violet glow after being subjected to a strobe light. Will Awareness please comment on this story, and if valid, explain the origin and use of the crystal found?

COSMIC AWARENESS:

This Awareness indicates this as in the affirmative, that the crystal as relating unto the civilization of Atlantis, the crystal also being related unto certain forces which still have use of these devices, that the crystal is part of a network which allows for observation at a

distance. This Awareness indicates this information as all that is being given at this time on this.

This Awareness wishes you to understand that there are still certain forces operating upon this plane which do not allow information of a certain particular nature to be placed out among the public; that wherein too much is said, your organization will suffer. This Awareness suggests that this as the reason for certain information being withheld at certain times. This Awareness is not intending to be secretive in regards to this kind of information, but that this as that which is of a protective nature.

Excerpt CAC Reading 1-29-77 Paul Shockley Interpreter

SHE LOST HER EQUILIBRIUM

(She's 80 and lost her appetite)

QUESTION:

Mary Fisk, of Waltonberg, Colorado wrote that: "Awareness, what can I do to get back my equilibrium? I don't want to eat anything. I don't want to eat. Nothing tastes good. In fact, my health is not too good." She says she is 80 years young, but people keep saying "old Senior Citizens" and so forth. "I want to do so many things, like helping people."

COSMIC AWARENESS:

This Awareness suggests you begin by drinking juices which have strong flavor as well as by taking walks and exercising more than usual. This Awareness suggests that you not worry too much about eating and having a strong appetite so long as you eat that which is essential for your health. This Awareness suggests that fruit juices and vegetables gradually being added, raisins as also beneficial. This Awareness suggests that the use of dill pickles prior to your mealtime as that which shall increase the appetite somewhat.

C.A.C. LIKE A BEACON OF LIGHT

QUESTION (VIKKI):

Before we call the Interpreter from trance, does Awareness have anything particular to say to any of us here present?

COSMIC AWARENESS:

This Awareness indicates that you in your action of the work which you do are likened unto a beacon in the night, which, through the stormy seas, shines forth to those distant horizons to assist the many sailors and the ships upon the waters so that they can orient their course and direction in a manner that allows them some sense of who they are, where they are going, and how near they are to their destination. In this action, in this service, there are those occasional signals from those ships which flash back their lights to you, which say "Hello, we see your light." This Awareness indicates that in this communication with those ships there is a form of alchemy which is contagious and which shall spread and bring forth more lights and more directions like these of yours for this is much appreciated by many.

(The Law of Gratitude recited)

WISDOM OF AWARENESS --- On Fear and Freedom:

This Awareness suggests energy is wasted in fear and hostility, and without these you may move quickly to freedom. This Awareness gives freedom to you. Will you accept? For you cannot carry hostility within and have harmony without.

SHOULD WE TRY THROUGH VISUALIZATION TO BRING ABOUT THE 2012 DIMENSIONAL CHANGE? IS IT SOMETHING TO LOOK FORWARD TO?

(Cosmic Awareness Explains What Is Really Happening)

QUESTION:

That reading on the 2012 transition prompted quite a few questions. One from George Lee. He asked: "First, is the event something that should be looked forward to? Awareness stated that the event was not an absolute yet. Should we or shouldn't we attempt to bring this about through visualization? Personally the loop would be an adventure I would like to see occur," he says.

COSMIC AWARENESS:

This Awareness wishes to explain that this event is not so much an event as a *process* that occurs over a period of approximately the next 19 or 20 years. The vibrations being such that as those entities move into higher and higher frequencies, they begin to separate from those entities who move into the more dense and lower frequencies, until there is a point reached where no communication, no recognition is available between these two levels of frequencies and the entities that inhabit those levels.

It is as though there has been a separation in terms of dimensions and those in the lower frequency levels may simply no longer be visible to those in the higher frequency levels. This Awareness indicates those in the lower frequency levels will cease to be able to see or recognize those in the higher frequency levels and therefore, it is as though a separation has occurred but neither party will see themselves as having gone through any dramatic or peculiar experience, unless they look back on the whole 20 years at a time and recognize how far they have come, how they have changed during that 20 year period.

This Awareness indicates they may then be able to witness the great change in their own vibration. This Awareness indicates there will be many who understand that they have gone through a major metamorphosis or transformation. There will be many who do not realize anything spectacular or even unusual has even happened to them during the time period.

You May Begin to See Interdimensional Beings

Those who are aware of this potential change will more likely be able to recognize the changes that occur during the process. This Awareness indicates that even today there are invisible beings on earth that you do not see in your normal vision, yet if you are somehow able to experience certain alterations in consciousness, you may see these beings and realize they are on a different frequency and dimension and that these beings inhabit your earth along with you.

This Awareness indicates that there are certain ways by which these entities can be seen through certain types of drugs such as animal tranquilizers as used by primate

centers, the monkey tranquilizers for example. There are also ways by which, if entities go on long fasts or deprive themselves of sleep or food for long periods of time, they may see entities in other dimensions, but your normal state of consciousness does not generally allow you to see into other dimensions and witness the inhabitants that exist on these other frequencies and vibration levels.

You Will Slowly Become Invisible to Those With Lower Vibrations

This Awareness indicates that as your own personal vibration begin to move into higher levels and frequencies, you will eventually become invisible to many who do not follow up that ladder of higher frequency, and as you disappear from their sight, they will tend to forget you, or they may remember you when, but never recognize you in your new frequency and vibration.

In this manner entities can move into new dimensions without passing through the transition called death, and they may not even realize that they have shifted dimensions.

You Will Bypass Death But Will Experience a Physical Reaction

This Awareness indicates however, most often when entities shift from one spiritual frequency to a higher spiritual frequency there is a physical reaction of some nature. Sometimes it is accompanied by an injury, a physical injury that then helps to move the entity into a higher frequency vibration, and creates a new dimension in the entity's life.

This is the more common way whereby entities experience the shift into higher frequencies, with a physical reaction or repercussion of the spirit moving into higher frequency levels. This Awareness indicates that sometimes entities will fall or get into an accident of some type and it is accompanied by a shift in consciousness into higher frequency levels.

This Awareness indicates in other words, if you find yourself experiencing some kind of physical injury or even a social trauma or injury of some type, check it out and see if around that time you might be shifting into a higher spiritual vibration, for this is quite common.

WHAT HAPPENS TO THOSE IN PRISONS AS THE VIBRATIONS RISE TOWARD 2012?

FOLLOW-UP QUESTION:

Another question from George Lee on this subject. "Secondly, if Awareness suggests that it, the event, should be desired and that it does indeed occur, what would happen to individuals who are in prison? Would we find ourselves moving from one prison into another? Or would we, through our vibration, find ourselves in a reality free of confinement, to pursue our healthiest and continued improvements?"

COSMIC AWARENESS:

This Awareness indicates the entity is still looking at this as an isolated event when it should be viewed as a *process*. This Awareness indicates it is a process over long periods of time, of moving into higher frequencies. Therefore, the event over this long period of time is more likely to become recognizable as a freeing of one's attitude, a change in one's consciousness so that no matter where the entity is, he or she is freed by the higher frequencies and the higher frequencies are not necessarily tied to any confinement of walls or conditions, but relate strictly to the consciousness level of the entity.

This Awareness indicates however, also, as entities' consciousness moves into higher frequencies, their earthly life tends to follow and as consciousness frees the

individual's soul, the physical body generally is following a path toward freedom, so that eventually and with close reflection, the physical body would more likely become released from any confinement it has experienced.

Many Kinds of Imprisonment Exist for Entities

(You Can't Fake Spiritual Energies: Some Prisoners Remain)

This Awareness indicates entities can be imprisoned without being officially incarcerated in a prison per se. They can be imprisoned in a relationship with another entity or in a situation or in a job, or in some kind of social environment or situation. This Awareness indicates that these confining situation an entity may find himself or herself in often release the entity when the entity's vibration and frequencies go into the higher realms, the more spiritual expressions.

This Awareness cautions entities, however, that if you are simply playing with spiritual energies, as so many prisoners do, in order to break out of prison, or get free, your motivation is not likely to really bring you into that frequency that brings about the freedom. This Awareness indicates there are very few entities in prison who have not either tried or considered taking the path of salvation, becoming Christians, just to get some kind of edge on being released from prison. It is the more common approach that entities use in trying to find a way out.

This Awareness indicates that these artificial attempts to use spirituality as an escape-hatch are not the same thing as moving into higher frequencies, into higher vibrations, into spiritual energies. If you move into spiritual energies, there is a good chance, an increased chance for the entity to experience greater freedom, even if the entity does not particularly receive or specifically receive freedom from the prison.

The body may not necessarily be released from the prison, but the soul will be released from its imprisonment through spiritual pursuits. Generally, if the soul is freed, the body will follow in its course, in due time.

WILL WE SEE THE END OF ORGANIZED CRIME

How Those With Slow Spiritual Development Seek Worldly Gain at the Expense of Others

QUESTION:

A question from Larry Hansen. He writes: (I'll read his statement): "Awareness has mentioned many times that the world can become a better place if the consciousness of man can continue to rise, but I've often wondered to myself, that regardless of the rise in our consciousness, will we ever see a world that does not have some form of organized crime in it?"

"In the last 70 years, the Mafia has come into great power in America as well as other countries, and the person on the street may not always realize just how pervasive this power is. Organized crime has a hand in a high percentage of "legitimate" commerce activity and in some major cities, they have a veritable stranglehold over some businesses, including construction and shipping, not to mention illegitimate concerns like prostitution, gambling and drugs.

"As has been seen recently in Italy, entities of this ilk can be brutal when their business interests are crossed, and it would appear to me that short of a minor miracle, the Mafia is here to stay. Even when the entities at the top of these organizations are jailed or killed, there seems to be many others waiting in line to take their place."

His question to Awareness is: "Will we see the end of organized crime's reign in the foreseeable future?"

COSMIC AWARENESS:

This Awareness indicates that it is not likely to occur in your lifetime. It is likely that this will continue for generations to come. This Awareness indicates that as long as there is greed and the belief that power makes right, or power gains benefit, there is likely to be organized crime, for there are always entities who want to take the shortcut to worldly gain, and recognize that the shortcut to worldly gain requires assistance from others, and therefore, by conspiring with others, they form groups and gangs to get stronger advantage over those who are in competition with them for the worldly gain.

This Awareness indicates that eventually, violence is a part of the competition and crime reigns. Even if the Mafia were to be eliminated, there would be the return of violence under some other gang activity with a different gang, because that is the nature of those who are in slow spiritual development seeking worldly gain at the expense of others.

The Solution: Spread the Concept of Peace, Joy and Harmony

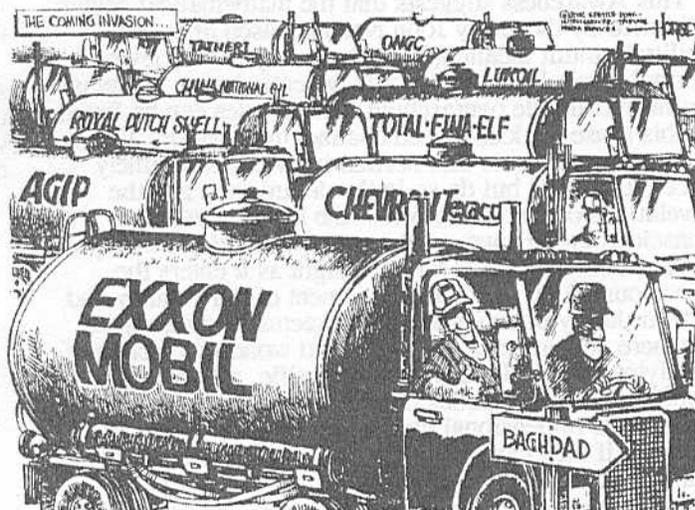

This Awareness indicates that the hope is not so much in wiping out the element or crime as in increasing and spreading the concept of peace, joy, and harmony among humanity. The more that concept is spread, the more it can bring in the masses who are on the fringe between crime and justice, the more those entities are brought into the justice side with the hope of greater benefits coming from justice, the less there will be available any chance for entities to move towards crime.

This Awareness indicates that as entities move more and more toward a belief in justice, an energizing of justice, the more it takes away from the element of organized crime.

"WHAT'S BUSH WAITING FOR? WE'RE READY TO ROLL!"

John Nash... "A Beautiful Mind"

QUESTION:

A question from Mari Bentley, sent over the Internet. She writes: "I thought of a question for Awareness. I recently saw the movie "A Beautiful Mind"—the story of John Nash. John Nash was brilliant but considered delusional because he saw three beings that "didn't exist". My question to Awareness is: Was John Nash actually seeing spirits from another dimension and communicating with them? Did this also carry over into his scientific work? Was he channeling or tapping into a universal consciousness to come up with his theories and formulas? Was he really delusional or just psychic?"

COSMIC AWARENESS:

This Awareness suggests that there is indeed a very fine line between such concepts of "psychotic" and "psychic". Given the profound misunderstandings of the nature of consciousness, many legitimate sensory and cognitive experiences have been deemed delusional. The same fine line exists between genius and insanity wherein both concern the mobility of consciousness, the varying levels of genetic receptivity to universal information, and the ability to process it sufficiently to remain grounded in physical reality well enough to share it with others in one's "living" time and space.

This Awareness suggests that the entity John Nash and many others who have been described as schizophrenic are actually attuned to broadened bandwidths of sensory information than the normal range which the majority of the species has evolved. Their minds are far more mobile, they are more able to align their consciousness with alternative dimensions, to access energy essences and "personalities" in alternate locations in time and space, and they are able to access more energies from cosmic consciousness. However, since both scientific and medical approaches to such visionary abilities judge them to be a genetic mistake or a mental disorder, these special entities are not given the necessary understandings to interpret and gain control over their special abilities. This situation can be likened to finding oneself in the pilot's seat of a jet engine, but only offered preparations, instructions, and training of how to ride a bicycle.

This Awareness suggests also, that although most religions are based upon revelations accessed by this exact type of mobile consciousness, that their modern brands of spirituality and value judgments that imply all truths have been revealed long ago, further compound the problem.

This Awareness suggests that the mathematical genius exhibited by the entity John Nash is based upon his ability to intuit meaningful patterns beyond the level of normal symbols such as words, wherein larger universal truths and simple overarching natural rules can be found. In this sense he does indeed channel information. This Awareness suggests that normal individuals routinely access this level but do so in the dream state and the revelations often remain below the level of waking consciousness. However, the positive emotional charge always accompanies a higher insight as it enters the conscious mind, in an "aha" moment of pure clarity and extraordinary understanding that seems to come out of nowhere yet carries a delightful and wondrous feeling of its divine source. Indeed most scientific, artistic, and philosophical revelations do originate beyond space/time, from multi-dimensional places and periods to do exist, but only if they can be consciously accessed. In a very real sense, many people often slip into any probable future and bring back tidbits to utilize in the present to actualize that particular path. They do so by utilizing the

powers of belief and emotional intention to harmonize with and attract the future they seek to create.

This Awareness suggests however, that particularly gifted individuals with little emotional self-understanding can become seduced by such consciousness travels, and create alternate realities perhaps more interesting than the mundane world that others share, but that fraction the self into alternate component pieces or trap them inside alternate realities they cannot escape. This Awareness suggests also that the imaginary beings that "did not exist" portrayed so visually in the film *A Beautiful Mind*, were far less visual and than auditory in the personal experience of them by John Nash himself. This Awareness suggests that they were also parts of his multi-dimensional self, both as probabilistic energy essences and self-created cognitive apparitions that he had invited into his life for very important reasons necessitated by a low level of emotional self-understanding. Indeed, he relied upon them tremendously in lieu of actual social relations with those whose worlds did not satisfy such a creative, beautiful, and mobile mind as his.

This Awareness indicates that this film offers a timely opportunity for individuals to explore the nature of consciousness, to question and reject the popular but highly limited and distorted notion within mass consciousness that such individuals are fearsome and sick and ought to be medicated into a lower level of consciousness or locked away. It is an opportunity for humanity to recognize and nurture such special entities and foster them such that each can deliver the Nobel-worthy gifts they bear. It is also an opportunity to recognize the particular brand of chemical sensitivity necessary for mobile consciousness and creative genius, that can allow others to develop and balance their own chemistry in beneficial ways.

This Awareness suggests that entities who experience such "delusions" can rest assured there is a legitimate energetic source behind and a meaningful message within any such experience, having to do with both spiritual destiny potentials and existing mindful belief structures. However, entities who feel swept away into such dimensions such that they are no longer focused or functional in normal waking reality need to attend the balance of their chemistry and find eating, breathing, and sleeping patterns that maximize the genius and minimize the madness of being trapped in places and spaces that are incomprehensible.

This Awareness suggests that any such journeys that invoke negative emotional experiences, and are likened unto nightmares, can be directly traced to belief structures in dire need of reassessment, revision, or elimination in order to balance the mindscape as well as the physiological landscape of the body.

This Awareness suggests that a combination of both strategic approaches allowed John Nash to find chemical, mental, and social balance and be able to anchor himself within the appropriate earthly realm of time & space despite his highly unusual gift.

Ed's Note: If you liked the movie, you'll love the book "A Beautiful Mind" by Sylvia Nasar. (Now available at your local bookstore).

HOW TO GET THIS NEWSLETTER BY MAIL

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507 (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you want these messages to always be available to others in years to come. ("How many have you served, and how well?" is the question Awareness asks us all.)
