## Death: The Great Equalizer

- Why your friends in the Spirit World don't contact you
- The "Death Touch Vibration"—Did it kill actor Bruce Lee?
- The Cashless Society of the Pleiadians: How it works
- How and why extraterrestrials get into our lives

## The Importance of Active Listening

### OPENING MESSAGE

This Awareness wishes to call attention to the concept of communication in regard to listening. The role of active listening in a relationship in which information is being exchanged is that which is as equally important as in the expression of one's own point of view; that many entities think of communication as being able to speak to another and get one's point across.

### Communication Requires Two-Way Relationship

This Awareness indicates that communication requires two-way relationship, not just getting someone to hear your point of view. This Awareness indicates however, that too often the idea of communication is seen as that which is thought of as speaking, or clarifying a position, when the clarification is only half of the activity of communication. It is equally important to be able to hear what the other is saying, and there are ways of listening.

### An Example of Inactive Listening

One can be inactive in listening; in other words, listening just enough to know that the person is almost finished saying whatever he or she is saying, so you can get ready to say what you want to say at this point; in other words, paying little attention to what's being said, but noticing that the entity is almost through, or is coming to a point where you can interrupt and get your message in.

This Awareness indicates this is inactive listening. You're not really listening to the person, or to what the entity is trying to say, you are listening to the fact that the entity is talking, and you want to get your words in as soon as you can.

### Active Listening Requires You Pay Attention to the Speaker

This Awareness indicates that active listening requires that you pay attention to what the entity is saying, that you try to understand what the entity is saying, and good active listening will often require that you ask the entity, "Do I understand correctly that what you are saying is this...." and then you paraphrase back what has been given to you and receive acknowledgment that you have indeed, understood what the person is saying. This is active listening, and allows you to have a clear understanding of what the entity is saying to you, so that in return, your response will be a response to what has truly been said to you.

### Lesser Forms of Listening Create Problems

This Awareness indicates there are lesser forms of listening in which an entity says something, and you think you know what they meant, and you answer according to what you *think* they meant. And in so answering, you put out something which they, in turn, may misinterpret, because it was your response to something they didn't even mean in the first place. And then they, in turn, respond to that, because it doesn't fit with what they intended you to understand, and they see your response as being out of line. And both Parties, then, are communicating back and forth without hearing what each other actually intends to say, And the miscommunication can go on, with each thinking they're communicating in regard to what the other is saying, but neither realizing they are misunderstanding each other.

This Awareness indicates that good communication requires active listening. Active listening requires making sure that what you *think* you hear is what the other person truly *meant* to say, and you may need to clarify terms.

This Awareness indicates, for example, an entity may say, "I don't believe in God," and this entity may think

that he has made his position clear. But if you were to ask the entity, "How do you define the word 'God'?" the entity might explain: "I don't believe there is a little man sitting on a cloud with a pipe in his mouth and a long white beard, who is sitting there writing my name down in a book," in which case, you might also realize you don't believe in that God either.

This Awareness indicates, however, if you were to say to this entity, "Well, I agree. I don't believe in that kind of God, but what if the God we are speaking of is the life force in the universe, and what if it has a certain will of its own, or nature of its own; is that something you could believe in?"

The entity might then say, "Well, of course, there's life in the universe, and it has a nature of its own. Of course I believe in that. Is that what you mean by God?" Then indeed, you are communicating with this entity.

This Awareness indicates that by asking clarification of terms, as well as listening to see if you are understanding correctly what the other person intends to say, this kind of active listening plays an extremely important role in communicating, just as important as in your own need to express yourself clearly, and to have the other person listen actively to what you have to say.

### Many Personal Relationships Disrupted by Faulty Communication

This Awareness indicates that active listening is extremely important in entities' communication, especially when it comes down to personal relationships.-- That too many arguments that entities experience, which can be disruptive to their relationship, their friendship, their marriage, their family relationships and so forth-- too many of these disruptions are based on faulty communications, which are simply caused by misunderstandings and the lack of active listening or clear expressions that do not convey correctly what the entity wishes to say.

This Awareness suggests that the questions may be asked.

### Why Dead Friends in the Spirit World Usually Don't Communicate With Old Friends on Earth

#### QUESTION:

Vikki writes back and forth with a member, Lynn S., who is about 85 or 86, living in Australia, who just now is in the process of moving into a retirement village from her house that she's lived in for about the last seventy years. She asked the question in a letter to Vikki, that neither she nor I have an answer for, and over the years we have had other letters similar to this. I'll read what she says here:

"I have two beloved friends I'd been at school with; one, we've been so close for nearly seventy years; the other I'd known for over eighty years. To both, I said, 'Promise me, if you go first, you'll find a way to let me know you are all right,' which they both promised, but I've never had the vaguest dream of them or any signs. Then Conrad, my son, and I believed ourselves to be spiritually enlightened, and we had such enormous affinity and shared reality on life after death, that I felt, of all people I would see him in some spirit form or vision. I know he is all right and progressing somewhere, but the grief of his loss is never lessened. To have one dream or vision of his beloved face, shining with light the way I know he is, would be so healing and joyous.

I've read of hundreds of people seeing loved ones after they pass over. Why has it never happened to me? I don't mean a dream, but a real experience that one could not doubt is true."

We did not know how to answer that question, and I wonder if Awareness could expand on that.

**COSMIC AWARENESS:**

This Awareness indicates that this is a situation in which an entity has, perhaps, as in this case, forgotten at least for the time, the importance of a conversation to you.

This Awareness indicates that it appears there have been certain communications in dream states, but that these were not strong enough or clear enough for you to fully recall, and the entities did not have such a strong commitment as you would have desired, to be able to make the effort to the strength and degree that would have made a strong mark on your memory. It takes considerable energy for entities from one realm to respond in this manner into another realm.

This Awareness indicates that it is as difficult for this to occur as it is for you to tell an entity, "I am going to contact you during my sleep tonight, and communicate with you in your dream."

**Communication Is Possible During Dream State—But Difficult**

This Awareness indicates this is, indeed, possible that entities can communicate with each other through the subconscious levels during dream states, if they set their mind to it and work at it with enough energy and diligence,—but then, who puts out that much energy?

Those entities passing over have enough to think about without having to remember from whence they came. When you enter into this life as a newborn child, generally, there is little inclination to respond to memories or promises from previous realms, which may have asked that you make an effort to communicate after your earthly birth to those whom you knew in the realm before your earthly birth. It is hard for entities to remember commitments of this nature when experiencing a transition as traumatic as being born into a physical body.

**After Passing Over It Is Easy to Forget Prior Lifetime**

Likewise, it is hard for entities to remember such commitments when passing from a physical body into another realm that is somewhat alien to their immediate consciousness. Many entities in passing over do not readily recognize where they are. They are into another realm, and it is easy to forget the realm from which they came to that new realm, for they are busy orienting themselves to where they are.

This Awareness indicates that even in situations in which entities travel to another place (particularly if they are alone) they may find themselves in a busy city or in a busy place, being distracted by many things to such a degree that they forget to write home, they forget to contact those old friends at home whom they have left behind, and only when they have time to ponder and think about it, do they then begin to remember.

This is without leaving the physical body. This is without passing through from one realm to another. Think how much greater the difficulty of remembering commitments one makes in one realm when passing on to another and totally losing one's body in the process.

This Awareness indicates however it can be done. It depends greatly on the entity's degree of attachment. Some entities pass over and still have extreme attachment to others remaining on this plane, and in order to break that attachment, or resolve that attachment, they may appear to the entity in a vision or dream. It is not so much that they want to give a message. It is more or less their own personal need to come back and resolve the attachment to the place so they may move on to those

new obligations in the next realm, without feeling attached to this realm.

**The Departed Feels No Need to Prolong the Attachment**

This Awareness indicates most people in passing over, realize at the moment of passing, that there will be sorrow felt by those who remain, who lose them, but the stakes are great and the moment is intense, and they have no choice but to allow that sorrow to occur, and upon passing over, they do not have much choice about lingering or trying to stay around. They have already made those efforts, perhaps prior to the passing over; they have clung to the body in order to preserve their relationships and attachments with others as long as possible. Why, then, would they, upon breaking the bonds to the body, make efforts to come back to further communicate and prolong the attachments that have been severed by the passing over?

This Awareness indicates it only prolongs the attachment, and the attachment can never be the same. It is but a new form of suffering for both parties, and prevents either from adjusting to the new realities: the one which calls the entity to move on into new realms, the other which calls the entity to let go and pick up the pieces of one's life without that relationship being intact.

**Where There Is Love There Is Always Loss**

This Awareness indicates where there is love, there is always loss, but the love creates a greater and more meaningful life than would have occurred without the love having been there, even though the loss follows.

This Awareness indicates that entities, in experiencing the passing over of a friend, a loved one, go through certain stages of wanting to hold on, pull back, drag back, cling to memories, objects, even the body of the entity, trying to pull the soul back, trying to hold onto the personality—a lock of hair, anything to keep the entity.

**The Letting-Go Process Is Often Difficult**

This Awareness indicates that this is part of the letting-go process, letting go at the rate that one can let go. It is not always easy; and holding onto the lock of hair or the clothing, or some trinket or object or picture of the entity, allows this feeling of still having something—even holding onto the memory allows the feeling of having something of that person as a memory, as a part of oneself. And yet, even while holding onto as much as one can hold onto, there is still the tearing the ripping, the pulling, the dissolution of that relationship, and the losses that accompany it, and the changes that the entity undergoes, with all the grief that accompanies that change.

**Why the Concern That the Entity Is "All Right?"**

And there are the expressions of release, of anger that the entity has left, the expressions of sorrow that the entity has departed, the expressions of appreciation for what the entity has done in the past, in precious moments. The expressions of concern as to where the entity has gone, as to whether the entity is all right.—Why wouldn't the entity be all right? Would you expect a telegram from Hell?

This Awareness indicates that entities in passing over simply move into other realms. The act of dying is just an act of moving, a change of address in the universe, a change of address in consciousness. This entity no longer resides in that housing, in that body, but has moved on into another realm, into a different body. There is no postal service between this realm and that realm, so there is no way you can communicate, except through a medium; and that is not advisable, because it ties up the entity's energies, and hinders the entity's

efforts in the other realm, in the occupations which are being presented to that entity.

It is not meant that you should drag entities back to their old address in order to comfort yourself with unfulfilling attachments. It is better that you let them go, and that you know that they are safe in the arms of Universal Consciousness, in the arms of God.

This Awareness indicates it is best that entities allow nature, which created life, which is life, to express its own laws, without feeling that you have a better way of controlling things, and that your manner of control would allow and bring back this entity for you to converse with.

This Awareness indicates it is understandable that you might wish to have one more word with the entity before letting go, but do not feel that if this treat is not given to you, that you are somehow deprived or cheated; for after all, you had many, many moments in which to communicate, and what is one more brief moment in comparison to all those that have been allowed?

This Awareness suggests that the multitude of moments that have been given may be the full measure of your relationship. There may be no more available. For those few who have that fleeting dream or vision or glimpse of someone who has passed on, these entities are still not satisfied; they are simply puzzled. "Why did I see this so clearly?" They would still like to draw the entity back. It does not satisfy that desire to help the entity un-die and return to the same physical shape and form, which was so familiar.

#### All the Prayers in the World Can't Change Universal Law

But this is not the way things are. Entities are not simply traveling overseas and coming back to visit or to stay. They are passing from one realm to another, and discarding the body in the process. And it is a fact, it is not simply a whim of some deity that this is the way things are done. It is not something that can be appealed to the government or to some bureaucracy.

All the prayers in the world will not change these rules of universal laws. When one discards the body, one is not simply discarding a skin, like a snake--one is discarding the entire body; and it is the body that entities want animated again with the life force.

#### We Must All Accept That Death is the Great Leveler

This Awareness indicates that entities *must* accept that death is The Great Leveler. It creates equality in all living beings, and it allows all living beings to move on into their own future destiny, without interference from anyone else—regardless of the attachments, desires, coercions, wishes, or demands that others might otherwise put on them.

This Awareness indicates that in this sense, there is that which can be seen as tragic, because the bonding and love that entities feel toward one another is suddenly broken, and never again in the same way can it be glued back together. Like Humpty-Dumpty, none of the king's men can put the pieces together again.

#### What Could Possibly Happen to You After You Die?

This Awareness indicates that you can still love the entity, you can still know that the entity exists somewhere, and you can always recognize that as surely as you, yourself, are all right, surely the other entity is all right. After all, what can happen to you after you've already died? Who can kill you? Who can kidnap you? What would they do if they did kidnap you? You're already in a different realm.

This Awareness indicates that the entity may be in a state of confusion, but who isn't? The entity may be in a state of dissatisfaction, but who is ever satisfied? The

entity may be longing for something more, but is there anyone who doesn't long for something more?

The question of, "Is my loved one who has departed, all right?" is a moot question. The entity *has* departed; the entity is elsewhere. If the entity exists at all anywhere, the entity is as all right as you are; for you yourself are not fully satisfied, nor are you fully dissatisfied. There are always those feelings of incompleteness. No one ever feels completely fulfilled; for if one did, there would be no future, no next moment, no continued existence. It is that emptiness, that lack, that unfulfillment that allows entities to move from moment to moment, from realm to realm, from place to place, searching ever and always for something--something better, something higher, something more meaningful. It takes place on this realm, it takes place on the other realms. The degree may be different. Some realms are more satisfying, some realms are less satisfying.

#### A Departed Soul Can Still Feel Feelings of Guilt

This Awareness indicates, depending on how the entity lived his or her life, the entity's afterlife experience will be reflective of that. And if one knows that a loved one lived a troublesome life, or a life that was not of the highest and best, but one which surely caused the soul to feel ashamed, disturbed, guilty, or less than healthy, then indeed one already knows whether the entity is all right; for the entity is simply without a body, and the soul still feels those same feelings of guilt, less than the highest, and those feelings of frustration about oneself.

This Awareness indicates it is not the body that determines whether the soul is satisfied, it is the soul's own recognition of what it perceives to be right and wrong, and whether it is living up to that perception. And entities who know another entity well in physical form, should already understand whether the entity, upon losing that physical form, will indeed be a satisfied soul, a comfortable soul, comfortable with itself, or dissatisfied with itself.

#### Most Entities Find Greater Peace in the Passing Over

This Awareness indicates that most entities find greater peace in the passing over than in physical form, because the physical experience is that which presents quite an excessive number of conflicts. It is designed to create conflicts so that the soul can have greater reason, opportunity, and urging to develop and grow. There is more motivation for growth, for evolution of the soul when the soul is in physical form. And when the soul passes beyond the physical form, the intensities are diminished, so there is generally greater rest out of the physical form.

But if an entity in the physical form has misused the life given, and has caused great agony and suffering to others, then the entity may, upon passing over, experience considerable shame for his or her behavior while in the physical form; and though the intensities are not as great, they may be longer in endurance, and the shame may last much longer, because the entity does not have the opportunities available, upon passing over, to rectify or change or make up for all those errors that had been committed.

#### Experiences More Intense When in a Physical Body

This Awareness indicates that the time in the physical body being a much more intense experience than that time in other realms, non-terrestrial realms, as that which provides great opportunity, which should be cherished as extremely valuable. It is like the entity who has a choice of being in college or out of college.

The entity who is out of college and simply hanging around on the streets, enjoying life without any effort to

do anything in particular, would be more like the entity who is hanging around in other realms without any great motivation or stress to effect the entity's growth and development. While the entity who is in college, who is struggling to get through from test to test, from course to course, from study to study, hoping to keep the grades up and hoping to achieve certain things, so that he or she can accomplish a level of scholastic quality which can be representative of a soul growth or intellectual growth for the entity---this is more likened unto the entity who is in physical form, in comparison to the one who isn't.

One who is in physical form is likened unto the soul in college. One who is not in physical form is likened unto the soul who has been let out on vacation, or who has dropped out of college, the college of life. And the entity who is no longer in physical form experiences considerable rest in comparison to the struggle that the one in physical form must endure. When in physical form, the struggle is so great, but the growth is also intensified. One only grows during times of adversity; one does not really grow during times of relaxation. One can take advantage of times of relaxation to reflect and to gain insight from the struggles that have occurred, and in this manner make use of those relaxing times.

Likewise, those who have passed over can reflect on the life and the intensities, the mistakes and the victories that have occurred, so that the entity who has passed over then can digest all of the conflict and disturbances that was experienced in the physical lifetime.

#### **The Soul Grows Because of the Banquet of Life**

This Awareness indicates that in either case, it is that indulgence in the conflict, in the life experience, in the banquet of being alive, of being in physical form, that provides the nourishment and the food that the soul digests in order to receive its growth, even though much of the growth and digestion may take place while the entity rests in afterlife or in meditation or in sleep, in physical form.

Thus, the entity in physical form who is resting after a struggle, may find himself or herself digesting the message, the lesson, from whatever the struggle was. Whatever message that struggle yields to the entity's soul, may indeed come during times of play, during times of rest.

The entity may not understand during the time of struggle why this is happening -- "Why is this happening to me?"---but after the struggle subsides and the entity is at rest, the entity may understand and say, "Oh, I see! Now I understand why I went through all of that. It has strengthened my persistence, my ability, my self-image, my recognition and appreciation of things." Or they may see some other lesson or message.

#### **The Major Purpose of the Passing Over**

This Awareness indicates that the passing over has its purpose -- to give the entity a time to digest all that has occurred. And the indulgence in material experience, the indulgence in matter, the indulgence in the appetites and the senses--this, too has its purpose. It allows entities to feel the full range of existence, the full potential of one's own personal power, the full limits of one's fears and weaknesses, the full range of one's appetites, the full taste and sensual indulgence of one's feelings, senses, and lusts.

This Awareness indicates that when one has all of these tools out there churning away, every day, day in and day out for many years, one is absorbing extremely large amounts of data; and that data that is being gathered through living in the flesh is being ingested and run through the mental computer--the conscious

mind, the subconscious mind -- and is being implanted into the soul for further processing.

And the entity comes up with conclusions or information as to what is proper, what is improper, what is satisfying, what is dissatisfying, what is fair, what is unjust, what is beneficial, what is harmful--to self, to others, to groups, to general and cosmic principles, and the entity learns from all of this. And the entity gradually grows from all of the learning; and that learning then becomes part of the soul, and soars to become principles and systems of information-processing that occurs within the soul of the entity.

And then, the entity may pass over and drop the body and lose all the senses and appetites, lose all of the desires and ambitions, and simply be a soul filled with all of this gorgeous information to process for a time in a realm that is more of a reflection, and contains a time for learning and discovery and sleep.

And the entity, in sleeping, sleeping away from physical existence into a dream world in which substances are not so sharp, in which everything is mental, everything is mind, whereby all of these memories and absorptions from the flesh are digested by the soul. This, then, being the realm beyond the physical, wherein the entity's experiences and expressions, are memories being carried and acted out in another stage, another place, with other forms and other entities as players on that stage.

Wherein this entity at that time begins to absorb the principles that have been learned, so that the entity eventually feels all has been digested from that last lifetime: "I understand what I needed to learn from that sojourn. But what I don't understand yet is this, and this, and this, and I think I will return for another trip to make further research and discovery into these areas for greater understanding."

Or the entity may say, "I think I have learned enough; I never need to return there again. I am through with my lessons in the college of life. I am ready to move on to my greater reward, experiencing the greater rest, the greater attunement to those higher realms.

#### **An Unevolved Soul Cannot Move Into Higher Frequencies**

This Awareness indicates the entity may, indeed, be ready; or the entity may, indeed, only be hallucinating as to his or her readiness to move on beyond, into higher realms. But whatever level the entity is truly ready for, the entity will float to that level in accordance with his or her own spiritual vibration. It is likened unto the cork -- it cannot sink, and stay at the bottom, if it is filled with enough air to cause it to float to the top. Nor can it go to the top, if it is saturated with so much water or other substance that it cannot and does not have the air to raise it to the top of the water. Nor can a soul that is not evolved high enough, just by its own wish, move into those higher realms if its frequency is still attuned to lower frequency realms .

This Awareness indicates in the spiritual realms, like attracts like. In physical realms, opposites attract.

#### **The Movement of the Soul Between Dimensions a Puzzlement**

This Awareness indicates that the movement of the soul from one door or dimension, from one realm to another, is indeed a puzzlement to those who cannot recall, or cannot perceive that movement. And there is a tendency for entities to forget from whence they came, and to where they go, even though they have gone before, and come into this realm many times before. It is as though in passing through the door, one's memory is disturbed, disrupted, wiped out (except on the subconscious level) and the entity needs to start again, as an

actor entering a different play, with a different script, from any he or she has played before.

This Awareness indicates that when an actor enters into a new play, the actor does not think about, "Hey, I made a promise that I would converse with that character in the last play I was in, I would let that character know that I was all right. We had an agreement."

This Awareness indicates the actor in the new play no longer perceives the old play as having any reality at all, any more than one would feel obligated to fulfill a promise that one made during a dream. **How many promises made in dreams do you feel obligated to keep?**

This Awareness indicates that there are multiple realities and each reality when indulged in, denies the existence of other realities. It causes the other realities to seem unreal.

## DEATH ON THIS PLANE IS SIMPLY BEING REBORN INTO ANOTHER PLANE

(Entities Not "Senile" but at Work Creating Their Next Life In Another Dimension)

### QUESTION:

I believe Awareness gave the analogy that when one dies on this plane, one is being born into another dimension, and vice versa. In this case, then, it would seem to me that someone who is fixated on communicating with someone who has already departed, as this person passes over and is being born into a new dimension, that in all probability, the memory of this person would simply disappear. Is that correct?

### COSMIC AWARENESS:

This Awareness indicates this is in the affirmative. That when one passes over in a slow manner, as occurs especially with those who age slowly and whose death covers a process taking many years, the entity may go through a period of time in which half of his or her life is spent on the next plane, while the other half is still embodied in the physical form. The entity may even forget people whom he or she knows on this plane, even though seeing them frequently, may forget their names, may forget who they are, and entities say they are senile, or they are no longer themselves; they are without memory, and they see these entities as losing something of themselves as they age and grow further and further apart from their loved ones, and spend more time in sleep and in otherworldly realms of consciousness.

And this Awareness indicates that indeed they *are* in other realms, and when in other realms, they are creating new relationships, they are preparing a life for themselves in the other realm, so that by the time they actually do die and step through the door, and cut off all communication on this plane, they have been well established in that next plane, and they have *already* developed relationships, --just as a child, in coming into this plane, may talk of such things as, "In my other life, I was a Mommy," or the child may say, "I was with God in heaven before I came here," or "I was an angel before I came here," or "I was somewhere else before I came here." And the entity may talk about having imaginary friends that you can't see but the child can see. And this Awareness indicates that this child is still attached to entities in other realms, during part of her or his transition between that realm and this realm. So that as the entity is beginning to come into being in this realm, you see the entity's body, you see the entity as being here, but the entity's soul is also elsewhere; and the entity may even still have some remnant or part of body in another realm, that has not yet been totally disinte-

grated, so that the entity is slowly pulling his energies over from the other realm into this realm.

### Entities Who Die Suddenly as in War or Accidents

This Awareness indicates that in the case of entities who die suddenly, such as in war or through accidents or other violent situations, the entity's life is suddenly sucked out of the body; and the entity then is automatically and suddenly into another realm, wherein the entity does not have the time to orient himself or herself to the new situation,-- in which case the entity may be confused for some time.

This Awareness indicates that these kind of experiences are much like what ghosts may feel in your plane, wherein a ghost suddenly materializes before you. It does not know how it got there. It does not know how to relate to you.

This Awareness indicates it is somewhat different in that the ghost cannot formulate a body that remains, it simply fades in and fades out of your realm. Your vision sees it, then it doesn't. This Awareness indicates that when you pass over into the next realm, your soul may suddenly be... if this occurs quickly, your soul may suddenly appear in another realm in which you see other people, other entities, but you are lost and distorted, and entities may come to reorient you, tell you where to go, where you are, what has happened. And generally, such entities who pass over suddenly do not even realize they have died until they are convinced by circumstances or by others who take the time to explain and show them that they are no longer physical.

This Awareness indicates that you cannot compare one realm with another in a manner that shows each movement to be equal, for the comparisons are different. Entities entering into the physical realm come in as tiny babies, born through the womb. Entities passing through death's door, enter as full-grown or more elderly beings; or if as babies, may suddenly become full-grown souls. They do not necessarily find themselves confined as a baby upon passing over.

This Awareness indicates that in some instances, they may enter into the next realm as a small child, as a baby, but that baby is not the same as the physical baby; it is the soul itself experiencing and expressing itself, with full knowledge, full awareness, much as the movement to the Clear Light or into the next realm. The entity has complete knowledge and awareness of itself.

It is different for those who are passing over slowly, such as the elderly person who gradually and slowly loses more and more of self and takes a long period of time to pass over, wherein the entity is in and out of one's body. This entity, in passing over, is gradually pulling itself from physical form into the next realm.

This Awareness indicates that these comparisons are not equal, in that moving from spirit into physical matter is not exactly parallel to moving from physical matter into spirit. But as a general principle, the passing over and the being reborn into physical matter are much the same. It is for this reason that this Awareness says every birth is a death, and every death is a birth; for as one dies to one realm, one is born into another. It is impossible for entities to fully die. It is possible for entities to lose their physical bodies.

### No Entity Really Dies but Some go to Cimmericia

This Awareness indicates that the only area in which anything approaches true death or annihilation is that area wherein the soul, upon becoming so utterly irredeemable, becomes a seething mass of emotional distress and hostility that finds its way, through sympa-

thetic vibration, to that lake of unconsciousness known as Cimmeria.

This Awareness indicates that all souls that are redeemable, will seek their own level, whether high or low, and will remain basically intact.

This Awareness indicates that the soul force can take on many forms; for essentially, the soul force is but a die or form made of a psychic, magnetic energy—in other words, emotion—that holds the memory, feelings and experiences of an individual, and is made up of life force, the highest vibrations, which are essentially spirit or anti-matter; and that spirit anti-matter, being consciousness itself, infuses and permeates that form, that emotional form that is the container for the spirit, and holds the energies. This total package is the soul.

**The Soul as an Information Processor**

The soul, as a total package, is an information processor that is capable of processing other information that is brought in, along with what it already has, to be able to create a physical body. In other words, the soul, being in part, what you would call imagination, is a nation of images that works to process information, so as to grow a physical foetus, when it is given the proper information from the egg and sperm, which in turn continues to grow, according to the information-processing system, which the soul contains, or is; and in continuing that processing, develops the physical form that is later called human.

It continues from foetus to birth to middle-age and to old age, and then at a certain time, it is discarded. It discards that physical shell or vehicle, and starts over again on another realm, in another form, creating another being.

This Awareness indicates the movement into Terrestria takes greater amount of time to build such a body—a physical body, than the movement from Terrestria into the other realms, such as Hades and Celestria, where in those realms, bodies can be built very quickly, upon the passing over. Those bodies are not as dense in substance; they are created more from imagination, much as dream stuff creates bodies for you to use during your sojourns in sleep.

This Awareness suggests the Interpreter be brought from trance.

(The Law of Gratitude is given)

"Of course you remember seeing a bright light at the end of a tunnel! You rode your bike right into an oncoming train."

## WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

### THE BOOK: "ACCORDING TO THOMAS" After Meditating a CAC Member Writes Book About Jesus)

#### QUESTION:

Bruce MacDonald of Regina, Saskatchewan has been a member for some years now, and he sent us a copy of a book that he wrote called *According To Thomas*, and in that book he gives a little introduction that he was unaware of so-called New Age things and philosophies, being sort of a typical yuppie, caught up in the money-making society and so-forth, until he walked into a bookstore one time and picked up a book on meditation. He was fascinated with it, he took it home and he started doing meditations, and after awhile, this information started coming to him; that it was about the disciple Thomas, and he started writing this information down and he eventually published it in this book called *According To Thomas*, and it was a view of the life of Jesus and what Jesus said to the disciples and so forth, from the framework of Thomas, and it supposedly puts Jesus' statements into more of New Age terms that make sense, more along the lines of what Awareness has indicated Jesus was talking about in regard to the stories and so forth.

He's asked us several times if we'd ask Awareness to look at this book which he wrote. He's not sure if it was channeled or not, but it came out so strong, this book

*According To Thomas*. I wonder if Awareness could comment on this book.

#### COSMIC AWARENESS:

This Awareness indicates that this as being that which might be termed a channeling from a higher source; that in terms of the content of the book, that part is not so much to be thought of as an account of some historical event any more than would the story of Jonathan Livingston Seagull be thought of as an account of some event. However, as in *Jonathan Livingston Seagull*, the story does carry a message of great power and beauty, and the characters involved are but the tools by which this message can be wrapped so that they are easily digested and presented to the reader in a way that is enjoyable and beneficial to the reader.

Likewise, this channeling in regard to Thomas as that - which presents a different view of the myth, whereby the separate view as that which allows the reader to see new insight and add to the food for thought that has already been presented by other writings in regard to the stories of Jesus. This Awareness indicates that you must understand that even myths have great power to change lives. The stories of King Arthur do not follow the actual historical reality, but the written story is much more powerful than the actualities on which the story was written. The story and value assigned by myths to those various cultures which perpetuate those myths have great significance and power in molding the character of people.

This Awareness indicates that when new information is added to a myth that can carry those values into new levels, it should also be prized. This Awareness suggests that it is in this sense that the message carries values.

#### FOLLOW-UP (VIKKI):

Would it be a good book for CAC to stock in that case?

#### COSMIC AWARENESS:

This Awareness suggests that this can be of considerable value to many of your readers who enjoy reading of information in regard to this topic, because for one thing, it contains within it certain detail, messages and poignant statements in a manner that is pleasant to absorb and can contain beneficial guidance for entities in their understanding of themselves and their world. It is not necessarily a book that one who is seeking historical fact would want to rely on or quote in an effort to prove some point. It is mythical, just as is *Jonathan-Livingston Seagull*. You can't quote from *Jonathan Livingston Seagull* for purposes of argument in regard to the nature of seagulls, for it is not purported or intended to be an historically accurate description of seagull culture.

Likewise, this book, when viewed not from a historical value, but from its spiritual and mythical value, can have considerable value to a reader. This Awareness suggests that you may wish to stock some copies or refer your readers to the writer. You may also take orders and then forward the orders, or make your orders for the book after determining how many people are interested in ordering.

Ed's Note. CAC never did stock this book. At the time Bruce said it was available at Milkweed Press, Box 4672, Regina, Sask. Canada S4P3Y3. Bruce MacDonald's address is 20 Dolphin Bay, Regina, Sask. Canada.

## TRANSLATION VS DEATH

(Anna Lee Skarin: "Death is a Backdoor Out Permitted by God")

### QUESTION:

A question from John Herrin, Blandin, Utah. He writes: "In the 1960s and early 70s, a series of books written by Anna Lee Skarin was published by Devorss and Company. She shows that the divinely planned "front doorway" out of this life is by translation, or in some cases resurrection, as Jesus did. Recently, other publications have taken this up. Skarin says that death is a back door out, permitted by God for those (most people) who can't make it. Older references are found in apocryphal books: The Wisdom of Solomon, and the various versions of the Book of Enoch.

He adds: "I notice that Awareness seems not to recognize resurrection of Jesus and presumably of Osiris and so forth as valid, and favors the reincarnation syndrome. (I'm not sure that's valid) Does Awareness have any comment on translation versus death as described in Mrs Skarin's writings as well as older versions of being lifted up to heaven"?

### COSMIC AWARENESS:

This Awareness indicates that *It* has, in previous messages, given information in regarding this kind of movement from physical into the Body of Light. This Awareness indicates that this may be termed 'translation'. This Awareness has used the term *transmutation*. This Awareness indicates it also is associated with that which is known as the resurrection; that these things do occur.

### Els and Elohim Evolved Out of Matter and Into Spiritual Reality

This Awareness indicates that in reference to the Els, which this Awareness once described in UFO lore, there was an entire civilization that advanced spiritually and mentally to the degree whereby they were able to move out of physical matter and into spiritual reality.

This Awareness indicates that the word Eloi meaning God as having come from this, wherein the Els or Eloi were able to take a perpendicular route out of the horizontal movement of time and space and transcend or transmute or translate, whatever term is desirable, into higher dimensions of reality. This Awareness indicates essentially it is an action in which one moves into a higher frequency and becomes not the same as the sensual being, but one who is a spirit being instead of being a sentient person. The entity becomes a spiritual or

spirit being in which one could permeate into higher frequencies beyond material levels and thus avoid the death experience.

This Awareness indicates that this occurs as an entity becomes able to increase the central vibratory rate of one's being to overcome the octave vibratory rate in which one resides. This Awareness indicates in other words, if one's frequency is within a certain octave associated with material existence, and that entity is able to raise his or her vibratory rate another octave or to jump into higher octaves to overcome those levels of physical materialism, the entity will then translate or transmute and become something that is ethereal, or nonphysical in nature.

### Moving Into Astral Frequencies a Form of Translation

This Awareness indicates this is also seen as being associated with that known as astral travel; that the astral body is of a higher frequency or octave and can depart the physical body and move about and can be seen in some instances by others. This Awareness indicates that when an entity is capable of even moving the physical vehicle into those same or higher frequencies as the astral body, the entire body then can be moved into translation or transmutation as a higher being.

### Did Our Creator Originally Plan for No Death?

The Alien Force Was Instrumental in Entrapping Entities Into the Physical Form

### FOLLOW-UP (AVATON):

Is it true, as this Anna Lee Skarin suggests, that the front door exit was the way the Creator originally planned but allowed the back door, or death exit?

### COSMIC AWARENESS:

This Awareness indicates that this is In the affirmative; that originally the intention, when entities entered into physical form was not that they be trapped in physical form, but rather that they *materialize* into physical form and be able to dematerialize also from physical form, at will. This Awareness indicates it was the work of the Alien Force that began to have influence to entrap entities into physical forms so that once entered they could not escape and even so that once their souls have entered into physical form and they passed on through the death experience, they sometimes would still be entrapped in the Maya of materialism due to attachments.

### Let Go of Attachments and Teleportation of Your Body Can Occur

This Awareness indicates that if entities can let go of attachments to their bodies, they can transmute and move as in out-of-body experiences, into other expressions and other experiences, and may, if they were to practice this art sufficiently, may even be able to draw their physical body with them through the action of raising its frequency and vibration into higher levels. This would be what you term teleportation or actions of disappearance in one frequency and reappearance elsewhere. This Awareness indicates that if you were to depart with your soul in an out-of-body experience, and then draw those other aspects of self with you, it would not be that much more difficult to replace that aspect of physical appearance into another area or place on the planet, and then reenter the body. In this manner teleportation takes place.

This Awareness indicates there are those entities who have done such as has been described in Yogananda's book *Autobiography of a Yogi*, in which he speaks of having been met on the road by a saint, walked with the saint to a chapel, walked into the chapel, and upon entering, looked ahead to see the entity sitting in meditation who had accompanied Yogananda on the

journey, and knowing that the entity has been in meditation for some hours. This Awareness indicates that this as a form of teleportation, and of taking the body elsewhere, while leaving certain portions of the body in the meditative state.

#### The Meditation of Disappearance Works the Same Way

This Awareness indicates that likewise, the *Meditation of Disappearance*, which this Awareness has given entities, as that which allows certain of the cellular aspects of physical body to be drawn off and in instances of use of this *Meditation of Disappearance*, onlookers would notice that the person ceased to be present during such meditation. This Awareness indicates that there are what would seem to be impossibilities in this in terms of your common ordinary physics based on the five senses as perceivers of reality, but if you understand that they do not perceive reality accurately, and if you understand that all things in the material world are in fact consciousness, and that consciousness can be changed according to will and according to information processing systems, then these things are no longer impossible.

This Awareness indicates that teleportation, translation, clairvoyance, all of these things that have been classified as impossibilities for so long by so many are quite feasible and possible when viewed from a universe that is information oriented, a universe which is totally consciousness and image, within that consciousness.

Ed's Note: There are 8 books by Annalee Skarin still in print. These are: "Beyond Mortal Boundaries"-\$10.95; "Book of Books"-\$10.95; "Celestial Song"-\$8.95; "Secrets of Eternity"-\$8.95; "Temple of God"-\$8.95; "To God The Glory"-\$8.95; "Ye Are Gods"-\$11.95. CAC does not stock these but we can order them. Just write Vikki T. if you want any.

Excerpt CAC Reading 5-5-4-90 Paul Shockley Interpreter

### The Phenomenon of An Author's Characters Taking on a Life of Their Own (Is There An Astral Guide Who Helps In This Process?)

#### Question:

Mrs. Russell May of New York City writes: "I've always been curious, and I've never heard anyone explain it, about authors' images. I've heard authors explain that when they are at work on their novel, etc., that as they picture the images of the plot in their minds, the characters sometimes begin to take on a life of their own, act the role independently that the author had planned, or bring in a new character, get rid of a character they considered superfluous, or a plot may take a different turn than the author had intended, etc. I've never heard anyone discuss this strange phenomenon, yet, as I understand the astral world, is this where the author's astral guide, the dead author perhaps begins manipulating the story to a better direction. I'm sure it's psychic manipulation on the astral level by guides. Would Awareness please comment?"

#### COSMIC AWARENESS:

This Awareness indicates that this is a kind of example of that which this Awareness has referred to as information processing; that when an author gives a character certain qualities, and then puts that character into certain situations, the situations acting on the qualities, tend to create a natural response by that character, which the author may not have been aware of at the time he or she planned the plot. And once this other element is introduced, it then creates a new element of the plot, which is the character's response to the situation, and this in turn may introduce still another factor in the plot.

This Awareness indicates that by the time you multiply this with various characters, the plot can begin almost writing itself with the author simply being the

witness writing down the actions and behavior of the various characters as they interact with each other in the storyline.

#### For Some Authors It's a Form of Channeling

This Awareness indicates that oftentimes the author does not even know where the story is going until it gets there. This Awareness indicates that this is very much like channeling; in fact, the Interpreter will attest that often he does not know what a sentence is going to say until he has finished saying it; that on occasions he can see the full meaning and simply speaks the words necessary to portray the meaning, but that on some occasions words will be given by this Awareness in a fashion that gradually results in a complete sentence.

This Awareness indicates so it is likewise with many writers, who do not know where their story is going or may have some plan in mind, but the story takes off on tangent and goes in different directions altogether.

#### How a Story Can Quickly Change Direction

This Awareness indicates that if, upon completing a story, the author is not happy with it, often the author only needs to go back somewhere in the story, and change a sentence or change one element of information within that scene, and then follow through from there, and the story will rewrite itself into a different direction, with a different outcome altogether.

This Awareness indicates that it is because the author, rather than controlling the outcome, is responsive to the natural flow of the information that is available at any given moment in regard to the expression of the characters and the plot, and their general relationship to each other. If the author wishes to control, to reach a certain end, it is possible for the author to write the play or story in a backward fashion, knowing that *this* will be the outcome, how did it get here? And many authors will use this approach, knowing where it is going, and wanting to create the circumstances that lead to that outcome, they trace backwards and create the plot in a backward fashion, running from end to beginning rather than from beginning to end.

This Awareness indicates that the good author will have both approaches available and may create a skeleton line of action, moving forward or backward, deciding what the end and purpose of the story will be, in other words, knowing what statement he or she wishes to make in the story, and then going back to the beginning, deciding on what kind of characters to use to make such a statement, then introducing such characters, including the qualities of those characters so that they would best serve in the making of the statement.

This Awareness indicates that in this fashion, moving from the end to the beginning, the entire story can be created objectively on a skeleton level. At the time, the

story would then have the meat or dialogue added, the entity might choose to go from the front or beginning of the story toward the end, with the appropriate dialogue following the skeleton or plot.

This Awareness indicates that either approach can be beneficial, depending on how the author wishes to proceed. Those who like to tell stories from beginning to end in a spontaneous manner may have a certain kind of talent for being able to wind up with a good ending, but more often, such entities have a good start and a weak ending. Those who write from the end toward the beginning, creating their plot from the end back to the beginning, usually have a good ending. The beginning may not start out so great, or indeed it can start out well, but generally the story is stronger in that the ending is much more pronounced and profound, and the statement made by the writer is more meaningful, but this is not always the case; it will depend on the creativity, clarity, the channeling qualities of the author, and whether or not the entity is actually drawn from some higher source of inspiration, or whether the entity has a natural talent for telling inspiring and powerful stories.

#### The Concept of Astral Entities Helping the Author

This Awareness indicates that in regard to the concept of astral entities representing a character in a play, there is the possibility of this occurring. It is not that of a hard and fast rule that this is the way it's done. It can be done in this manner by some entities who allow themselves to channel from astral level forces.

#### Similar to the Concept of Conjuring Up Phillip

This Awareness reminds you of the concept known as conjuring up Phillip, in which qualities were given to an imaginary character named Phillip, by a group of entities, each of whom gives Phillip different qualities, and how after a prolonged period of time, the conjured expression of this imaginary character began to take on what appeared to be a personality based on those qualities that had been attributed to him. It is much the same as writers creating characters for novels, plays or books, in which the author gives certain qualities to the character, and the character attempts to take on a life of his or her own.

This Awareness indicates that such characters need not necessarily be astral creations or beings, they need not have any life at all prior to that of the authors' conjuring or creation of them.

This Awareness indicates that the author, in creating a character, breathes life into it, but that life can take on its own sense of personality and being as the author continues to energize the character for the purpose of the story, and when there are interactions between various characters, the various characters tend to create each other in their situation, creating qualities for each other, aspects of personality and reaction to each other.

## DID THE "DEATH TOUCH" VIBRATION KILL THE ACTOR BRUCE LEE?

QUESTION: (More on the Martial Arts)

Another question from Eugene O'leary, actually, there's several questions; I'll read the statement and then re-ask if Awareness requests. He writes: "Can Cosmic Awareness tell us more about Bruce Lee? What really caused his death? The reason I ask is I heard he was killed by what is called the Death Touch, in which a vibration is transmitted from a person to another, until it reaches the heart. Is martial arts really constructive to entities? It seems to me it is based on the almost certainty that someone will probably hurt you sometime and you had better be ready to defend yourself against these bad people out there." Would Awareness comment please?

COSMIC AWARENESS:

This Awareness indicates that in reference to the first part of the question, this has been addressed previously. This Awareness indicates that this appears to have been a contributing factor; that it is not seen as being the only cause of Bruce Lee's death; that there is seen to be another more sinister factor, which appears to be related to poison. This Awareness indicates that the great problem which plagued Bruce Lee was his popularity, which created great envy among others and caused others to fear what he might do in terms of his knowledge of the art and his tendency to expose so much for personal gain in regard to the art, and there were some who jealously guarded certain secrets of martial arts.

#### The Value of the Martial Arts

This Awareness indicates in terms of the second part of this question, the value of martial Arts is that it creates a certain personal dignity or sense of self-esteem which can be beneficial for many entities who lack such and who might otherwise never be able to confidently defend themselves because of their size or some other supposed inadequacy, and this can be quite valuable to some entities. It also promotes discipline which many entities desperately need in their lives, and it also presents a philosophy that is based on self protection, but which also modifies that self-protection concern so that the entity is taught, (if properly taught) in martial arts, not to use the art except in necessity, and if using the art, to only use it to the degree that is necessary for self-protection or to protect others.

This Awareness indicates in this sense, the art does have considerable value to a great number of entities. This Awareness indicates that its detrimental side being that it can be misused by those who are not conscientious in regard to the treatment of others, who do not have compassion for others, and who would misuse the art as a way of bullying and harming others. This Awareness indicates another area of detriment could be seen in an entity becoming overly obsessed with the development of the art, practicing the art to the point where other things of importance are neglected in the entity's life.

Ed's Note: for more information on this please refer to "Revelations of Awareness" issue 93-09 (The Strange Deaths of Bruce and Brandon Lee); \$3.00 from CAC.

#### The Wisdom of Awareness: -- On the Difference Between Prayer and Meditation --

The difference between a meditation and a prayer is that entities who pray, feel themselves to be separate from God, and therefore must ask God for favors; whereas entities who meditate, to attune themselves to God, become One with God and need not

Excerpt CAC Reading 2-5-22-91 Paul Shockley Interpreter

## On the Eve of the First Middle East War

### OPENING MESSAGE:

This Awareness indicates that during the past few hours, there has been a slight modification in the world situation, particularly in regard to the way in which your president views the situation in the Middle East, which could allow for a peaceful solution to prevent a major ground-war and heavy casualties. This of course will depend now on response to the entity's suggestions as to what is required of the Iraqi forces.

This Awareness indicates that if such a settlement is reached, the Iraqi president is likely to retain his leadership over a nearly destroyed nation. It would be possible for the entity to continue ruling Iraq but would be nearly impossible for the entity ever again to become a major power in the region. This Awareness indicates that the country has been set back at least 15 years, though it does still have some of its high-tech weapons, held back and usable, its economy is basically shattered and its military spirit is essentially broken.

This Awareness indicates that the potential for its returning to the same bellicose status is unlikely in this century or even beyond, in the following decade, although it becomes a possibility through new leadership that something could bring the country back into a formidable power in the next century, during the early part. This Awareness indicates that therefore, even if the settlement occurred before the Iraqi government is totally annihilated or made impotent militarily, there appears to be enough damage that peace in the region could become negotiated and worked out between the various nations so long as certain conditions remained intact on the Iraqi nation.

This Awareness indicates that this as being a potential that was not discussed in the reading yesterday, because the president of your nation had not indicated any flexibility in his attitude toward peaceful settlement with any conditions regarding that settlement. This Awareness indicates that he has voluntarily offered certain conditions in behalf of Iraq, partly because of the influence of the coalition nations and these appear to have a 50/50 chance of reaching a settlement to avoid the ground war. This was not available in the energy equation yesterday.

This Awareness indicates that in other words, there is a much greater chance today because of this change of attitude, for peaceful resolution than was available yesterday. This Awareness suggests that the questions for this reading may now be asked.

### Were Particle Beam Weapons Used in Iraq?

#### QUESTION:

A question from Gordon Scott, in Ontario. He writes: "The first day of the Middle East war contained some unusual reports. CNN said that about 6:35, American time, the Baghdad sky was full of lights and various anti-aircraft fire, yet no airplanes could be heard and no bombs exploding could be heard. Airplane and bombing sounds were heard about 20 minutes later. Next day they observed some damage on some communication towers and microwave dish antennas. They said they looked as if melted and pushed down.

"A newspaper report the next day said that the president did not know what that earlier action was, as the raid was actually scheduled for about 7:00 PM American time. The damage described does not sound like "normal bombs", or explosive type damage where the steel

should have been twisted and blown apart. The damage description would more likely suggest the use of laser or particle beam type weapons. Could Awareness state if in fact this was the case and whether this was done by the U.S. or Russian or Allied Forces, and for what purpose. Was this to knock out Iraqi communications so as to make the first Allied attack effective?"

#### COSMIC AWARENESS:

This Awareness indicates the first sorties that flew over were intended to locate the radar installations and tracking installations and to destroy these through the second wave, so that therein after, the Air Force would not come under heavy artillery fire that was guided by the tracking devices of Iraq. This Awareness indicates that the tracking devices available to Iraq were destroyed during the early part of the attack, and this allowed for near free-reign of the skies, except through visual attacks from the anti-aircraft weapons which were inadequate in terms of their ability to hit the target, because the aircraft flew so fast and were somewhat invisible in so far as manual efforts to shoot them down were concerned.

The aircraft being so that by the time the anti-aircraft gunners had spotted the planes they would have been already passed before the guns could be brought to bear on them without the tracking devices and radar tracking systems of Iraq's military. This Awareness indicates that this wiping out of these ahead of time saved many of the planes from being shot down.

### The Battlefield Laser System That Blinds the Enemy: "Has it Been Used?"

#### QUESTION:

The January 28th, 1991 issue of *Spotlight* talks about a death ray wielded by the U.S. I'd like to read a little of this and ask Awareness if this is valid information.

"For some Arab infantrymen sent into battle, their first look at advancing American troops may prove the last one. Behind a smokescreen of denials, the U.S. army has begun deploying against Iraq, the first working model of a dreaded secret weapon: a portable laser beam that will destroy the eyesight of enemy ground troops. In recent months the Pentagon has repeatedly denied that it was experimenting with a battlefield laser system that blinds people, but in a series of interviews with confidential military sources, the *Spotlight* has found that behind the scenes a crash-program to perfect such a weapon was assigned in 1986 to the Defense Advanced Research Projects Agency, DARPA, the Pentagon's leading science unit.

"The laser gun sweeps advancing enemy troops with a beam intense enough to puncture and destroy their eyeballs, even when they are not look directly at the light source. It is now "in the stage of test deployment", a team of reporters for this populist newspaper has confirmed. "The weapon, what we used to call the Death Ray Laser, is not going to war, whether international treaties and humane considerations permit it or not, revealed the veteran DARPA researcher.

"Since 1987 this has been our most urgently funded priority project. The result was a series of breakthroughs that led to a working prototype, last year." Would Awareness comment on that?

#### COSMIC AWARENESS:

This Awareness indicates that the information appears to be correct, and that there is a number of these weapons in the area. They have not yet been used. They may not be used, if the ground war is not fought.

## Does CAC Need to Back Off?

(John Lennon's "Give Peace a Chance" Banned in England)

### QUESTION:

In his letter, Gordon Scott says something interesting. He says: "Well, the manipulators have got the war they have been lusting for. What can be said? How many times must history repeat itself before mankind finally learn? CAC is now in a precarious position. You wish to speak the truth, yet it may become dangerous to do so. You should consider addressing any messages in terms of promoting peaceful resolution, reinstating diplomacy and so forth, rather than expressing a "negative message" of being anti-war, anti-banking system, anti-government, and so forth. Even promoting the concept of peace must be done diplomatically.

"I heard just the other day that in Britain it has been suggested that there is a list of 67 songs radio stations are advised not to play, one of them being John Lennon's 'Give peace A Chance'."

### COSMIC AWARENESS:

This Awareness indicates the entity is correct in his assessment in regard to the conditions under which this organization may be forced to operate. This Awareness indicates that up to this time, the Freedom of Speech appears still to be a guarantee, but that at any time it could be removed. This Awareness indicates that there may come a time when this organization will be forced to compromise, either voluntarily or by threat of force, so as to be most careful in how things are presented.

#### Why Awareness Can't Give Too Much Information

This Awareness suggests that *It* already operates with some consideration to these concerns, especially when realizing that many of the messages are not immediately released, and by the time they are transcribed, printed and released, the rules of the game may be altered and the messages may be seen by some quarters as offensive to the policies. This Awareness indicates that members receiving these messages need also to be understanding that when they ask a question they may not get the answer they seek, and the reason may be because Awareness recognizes the potential of endangering the organization and staff if *It* should give too much information to respond to the question.

This Awareness indicates that so far, *It* has been able to respond reasonably free in a society that guarantees freedom of speech, freedom of religion. This, if altered, may have an effect of cramping the style of delivery, and keeping the information from being delivered freely, or without some censorship. This Awareness has no wish or intention of jeopardizing the lives of the staff to get *Its* messages out to the public, particularly since the messages are not likely to help in preserving the freedoms of individuals and particularly since the information that is most crucial has long ago been delivered, in regard to these current affairs.

## Using Computer Bulletin Boards

### AVATON:

Several people have suggested that we consider starting up a sort of computer network that people could subscribe to and that all of the information could be put out on this, to these subscribers and they would be able to get it much sooner. Not counting the logistics involved, does Awareness see this as something that would be practical, perhaps down the road?

### COSMIC AWARENESS:

This Awareness indicates that the use of a bulletin board with information on the bulletin board as that

which appears to be the crux of the suggestion; that this could be of benefit to those who have computers and who wish to call in to that bulletin board for the most recent updates of information. This Awareness indicates that a greater value in having a computer bulletin board is that other entities who are not of the membership can tap into this bulletin board to read the information and to share information by putting information of their own into the bulletin board.

This Awareness indicates that this could allow considerable amount of information to be exchanged and for the network to grow. Many new members for the CAC newsletter could be expected, and also some charge for the use of the bulletin board could raise extra moneys for CAC. This Awareness indicates that it could have benefits. It would also have the effect of putting CAC out in the public eye and it should be remembered or recognized that there have been a number of bulletin boards that in the past have displayed messages from Cosmic Awareness Communications in regard to UFOs and other topics, and some of these bulletin boards were closed down, in some cases because of the influences from certain government pressures or agencies and that of the many UFO bulletin boards, there are only two at this time that are still operable.

This Awareness indicates that you should realize that there may be some harassment. If this kind of information is put on bulletin boards or if information is put on the bulletin boards that is too controversial for the government to condone, it can have the influence of informing many people, but it invites attacks by those who do not like such information being so readily available, and does not like the communication occurring between individuals and groups who have this kind of information to share with each other.

This Awareness indicates that it of course could take some risk and be established with the realization that if it is shut down, nothing was lost, because without it having been started, it would have the same effect of never having existed anyway, so that whatever time it was in operation prior to being shut down could be considered as a blessing of good fortune.

This Awareness suggests however, that in setting up such a bulletin board, you might want to have someone else create or set up this system so that you do not need to take time away from your own busy schedule at Cosmic Awareness Communications to operate it and to keep it running. This Awareness indicates that the cost for joining and reading the bulletin board may be kept at a level that is not too expensive for newcomers, and in such a way, CAC could advertise not only its own publications, but books and periodicals that it has for sale. This could be a new level of expression in the business field for the organization.

The other aspect in terms of valuable quality is that members of the organization from around the country could begin to communicate with each other through the bulletin board, allowing each other to share ideas, discussions and concepts. It would be likened unto a conclave of CAC members on computer network bulletin board screens that create communication and sharing of ideas, and discussions.

It can stir up much interest and bring on more inquiry and allow for the sharing and confirmation of information. It could have considerably healthy advantages for the growth of the organization and the enjoyment of the membership. Of course the limitations are that many of the membership do not have computers, though there are also many who do not have personal computers but who can find a computer to use, either at work or through a

friend, whereby they may tap into the information from the bulletin board and print it off and read it later.

### Short-Wave Radio to Prevent Iraq War?

(Fight With Words Instead of Bullets)

#### QUESTION:

Gordon Scott had one other question. "It is probably true" he writes, "that radio and television in Iraq is carefully controlled. It is also true that the Soviet Union has many unused short-wave broadcasting stations from the days when all outside stations were jammed. Could this whole tragedy have been averted by using all these transmitters to broadcast into Iraq? There is simply no way that Iraq could have jammed them all.

"As long as all the nations had an opportunity to broadcast their views, then the people would have heard many different and conflicting opinions and different facts. This would have had two effects: the messages could not simply be discounted as propaganda, and because of the wide spectrum of opinions, the people would have to learn to think for themselves because no one person was telling them which was the proper view. Even if all that was broadcast was ten differing kinds of propaganda, the net effect would still be to cause the population to question and think for themselves, at least to the extent not to believe everything the government tells them.

"Would it not have been of some value for the military to also build some short-wave "battleships" to be able to move into any area in international waters and fight with words instead of bullets and to use the aircraft carriers to drop small radios and leaflets instead of bombs? It bothers me that this method has not even been tried."

#### COSMIC AWARENESS:

This Awareness indicates that this as a good suggestion for healthy means of communication in a country that is designed on a totalitarian or dictatorship foundation, in which a system of this type would be valuable in helping to alter the programming by the totalitarian system by allowing other information to be gathered or broadcast.

This Awareness indicates that this is a worthy idea of consideration and suggests that the entity may wish to continue promoting the idea through government agencies that are designed or would have an interest in such a system.

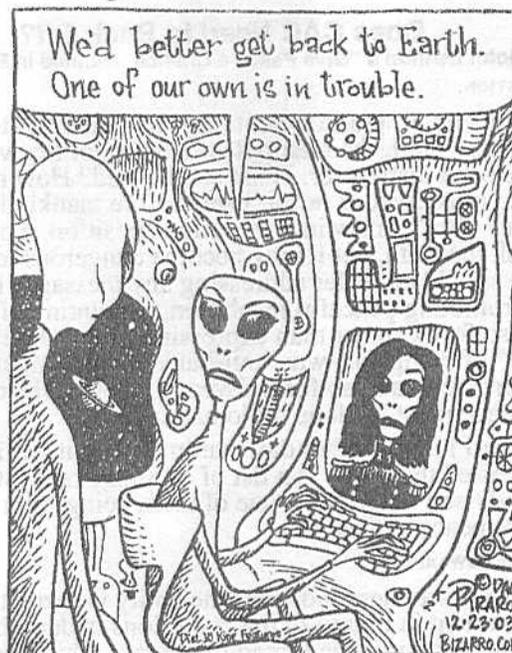

This Awareness indicates in relation to the effect on Iraq, it is seen that this could have been a healthy way of informing the Iraqi people of other viewpoints in regard to their situation. Whether it would have been sufficient to alter the course of events is not clear. It would depend on the intensity of such broadcasts and the receptibility of the people of Iraq, including their access to short-wave radios.

### AMAZING NEW MASTER INDEX

#### NOW ON CAC'S WEBSITE:

Just think of any subject Awareness has ever talked about, type in a keyword, and before your eyes will appear a listing of almost every newsletter published that contains information on that subject. Thanks to Jon Strongbow's 25 years of research, our website has now added 95,706 new entries for your convenience. New members who need back issues can now type in the subjects they are interested in and order back issues for immediate delivery. You can order on line using Paypal ordering system or just mail your order to CAC. All back issues are \$3 each and postage for any amount ordered is only \$1. Check it out!

### WHY DOES CHINA WANT TIBET?

(Why Are The Communists So Obsessed in Controlling It?)

#### QUESTION:

A couple of questions from Christopher Largent, in Wilmington, Delaware. In a letter, he writes: "The war is on everybody's mind of course, so I won't trouble you with questions that will merely duplicate what you are being inundated with. What is on my mind is Tibet. It's the year of Tibet of course, but more than that, the Dalai Lama won the Nobel Peace Prize last year, treating even the Chinese, who've oppressed his country for decades, with compassion, and he democratized his cabinet and assembly last summer, breaking centuries of tradition, though China continues its brutality.

"It provoked a riot, killed 450 Tibetans and arrested 3,000 others, now in prison and being tortured. So my questions are: #1) What does China want with Tibet? Why are the Chinese Communists so obsessive about controlling it?"

#### COSMIC AWARENESS:

This Awareness indicates that Tibet as being a center of spiritual focus, was seen by China as a threat for many years, and the concept of a spiritual center or focus on the border of China, which promotes Atheism, was perceived as a threat to communism; that this is in part the reasons for China's hostility This Awareness indicates that also there are certain valuable assets in the area in terms of art, in terms of minerals and in terms of people who could be used for China's expansion and economic growth.

The Chinese also see Tibet as having an influence which they would rather eradicate so that those in China do not bring to China teachings or influences from the culture. This Awareness indicates that part of the reason also is that China does not like to appear stagnant; that when it wants to appear to have significance, it will often create a new movement or action to give it a sense of purpose.

This Awareness indicates that there is not seen any great significant meaning in China's invasion and oppression of Tibet. It is just a kind of self-assurance by these old leaders that they still are capable of asserting power.

## What Is Tibet's Likely Future?

### QUESTION:

What is Tibet's likely future? Will it be as the Dalai Lama has proposed, an international Zone of Peace? Will the Chinese eventually leave it alone or work out some peaceful arrangement with the Tibetans?

### COSMIC AWARENESS:

This Awareness indicates that it appears that there will be a gradual lessening of the hostilities; that China appears to, in the future, become a governing force in the area, and the Tibetans becoming more resigned to their rule; that this may continue for a considerable length of time, before any real change occurs. It does appear that at some time around the turn of the century, when the One World Or New World Government is established, that some alteration in the relationship with Tibet may begin to take place that allows more freedom to those in Tibet, but even this is seen as something that will evolve very slowly. This Awareness does not see any violent overthrow and quick freedom coming to the Tibetans.

## A CHINESE GULAG IN TIBET

(Dalai Lama Says It Can Hold 10 Million People)

### QUESTION:

Chris also writes: "I'm nearing the end of the Dalai Lama's autobiography, *Freedom in Exile*, a good read, and very informative. And he mentioned that Tibet has a very rich uranium source, but here's the one that stopped me. Communist China has built a gulag, an internment camp in Tibet that can hold ten million people. Wonder whether the communist Chinese and the aliens have any arrangement about how to use this cozy little "home away from home" for reactionaries?"

### COSMIC AWARENESS:

This Awareness indicates that this is a good observation and that the use of Tibet's minerals as that which was implied in the previous response, relating to assets of the area. This Awareness indicates that the use of an internment camp as that which may also be used as part of the so-called New World Order. This Awareness indicates that this New World Order as that which of course is to be played out all over the world, and that many entities who do not go along with the New World Order may be taken to these different camps, planted, or placed therein, to be dealt with at some point.

### Prisoners Could Be "Raptured" to Draco to Feed Reptoids

In some cases, the plan, whether it ever unfolds or not, calls for these entities to be raptured and taken to other planets, presumably in the constellation of Draco, for further use in those areas. This Awareness indicates that *It* does not wish to promote the idea that entities going to concentration camps during the advent of the New World Order will all be taken by Reptoids to their home planet for food; this as being an option and part of the general plan, but this Awareness suggests that there are instead many other factors that may alter this plan completely.

This Awareness indicates that it may be such that these people will be the ones who are preserved or saved from the enslavement by the Reptoids and those who work for them. This Awareness indicates it is much too soon to accurately discuss this energy and potential scenario at this time. That there may be more information later.

Deposit your energy in this cosmic Bank. Withdraw it when needed for healing or personal use. Keep in touch with CAC when you start getting results!

## THE FORCED EXILE OF TIBETAN LAMAS

(Was it Their Karma or to Change Western Thinking?)

### QUESTION:

One other question from Chris Largent: "Has the forced exile of so many Tibetans, especially lamas, brought new ways of thinking to Western religion and psychology, and was this part of the "karma" of Tibet, to be forced to help the world mature in these ways?"

### COSMIC AWARENESS:

This Awareness indicates that the Tibetans deliberately chose to give up their country to China, to prevent China from invading other countries, particularly India, because China was becoming militarily testy and wanted some kind of military victory, and had plans for invading India. The Tibetans deliberately made Tibet an easy target for the venturesome activities of China, and left Tibet, this in reference to the Dalai Lama and other leaders, taking with them many of the great spiritual treasures.

These have been of significant consideration in the Western world, for those who can appreciate these treasures and their meanings in terms of psychology and spiritual worth. It is not so much that Tibet had a karma to pay off, but more that Tibet took on the karma of others as a kind of national sacrifice, much in the way that the Christian doctrine speaks of Christ as taking on the karma of the masses.

Tibet more or less sacrificed itself for the karma of nations.

### QUESTION:

Thank you Does Awareness have a closing message?

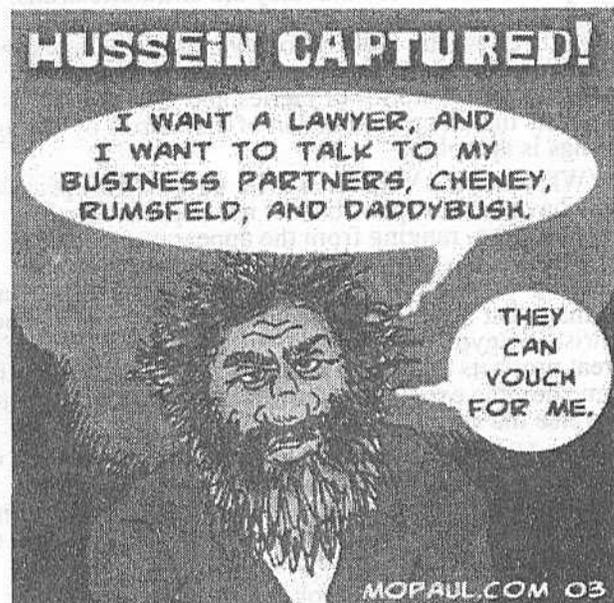

### COSMIC AWARENESS:

This Awareness indicates there is seen a young woman. This entity appears hungry. This Awareness suggests that you feed her.

### AVATON:

Thank you. I will.

(The Law of Gratitude is given.)

How Time and Interdimensional Travel Works...

## HOW AND WHY EXTRATERRESTRIALS GET INTO OUR LIVES

(More on the books of Whitley Strieber)

## QUESTION:

A year or so ago, an author who previously wrote science fiction by the name of Whitley Strieber wrote a book that he called *Communion*, which was an accounting of his allegedly being lifted up by extraterrestrials and examined. The pattern followed the traditional pattern of other books and reports. This entity has now written a new book called *Transformation: The Break-through*, and it's published by Morrow, and I'd like to read this brief review that appeared in the paper, written by Delores Alment:

"However tempted readers may have been to regard the book *Communion* as another of author Whitley Strieber's fictional books about paranormal terror, such as *Cat Magic* and *The Wolfen*, Strieber clearly intended his odd tale of being abducted by visitors from flying saucers to be read as nonfiction. *Transformation* takes up where *Communion* left off, and it is an equally spellbinding account of being swept off in darkness by small creatures with huge almond eyes, equally interrupted with Strieber's tiresome protestations of, "I know this will sound like I'm crazy but..!

This time around we don't have to take Strieber's word alone. Morrow's senior editor Bruce Lee had his own encounter in no less a place than a New York bookstore where *Communion* was prominently displayed and he was terrified. We do not easily accept as true stories, such as Strieber's experience of out-of-body travel, or of a Visitor's assertion that "We recycle souls", but he reinforces his insistence that he is telling the truth by including the results of lie detector tests and examinations that find in him no trace of temporal lobe epilepsy or any other physical abnormality, except for the brain scan which revealed the presence of medically benign "unknown bright objects".

Strieber speculates they could be the result of the needle insertions he reported in his book *Communion*.<sup>\*</sup> His subsequent experiences and a flood of letters he received from people who have had similar experiences lead Strieber to a view of the Visitors significantly more complex than the idea that they are extraterrestrials. Noting that the "star language" sometimes repeated under hypnosis by those who have had encounters with the Visitors is phonetically equivalent to Gaelic and harking back to stories of faeries and gnomes, he suggests that the phenomenon of visitations by strange beings is age-old.

"Whatever the Visitors are" he writes, "I suspect that they have been responsible for much paranormal phenomenon, ranging from the appearance of gods, angels, faeries, ghosts and miraculous beings to the landings of UFOs in the backyards of America. It may be that what happened to Muhammad in his cave, and to Christ in Egypt, to Buddha in his youth, and to all of our great prophets and seers was an exalted version of the same humble experience that causes a flying saucer to traverse the sky.

"The Visitors, if I am right about them, represents the most powerful of all forces acting in human culture. They may be extraterrestrials managing the evolution of the human mind, or they may represent the presence of mind on another level of being."

That's the end of the book review. I'd like to ask Awareness to comment on that information.

<sup>\*</sup>CAC stocks Whitley Strieber's book "Communion". Please refer to Book Price List.

This Awareness indicates that the phenomenon that is being discussed as that which results from the collision or conjunction of two different octaves, each having its own civilization; that the octave on which you reside and have most of your experiences is conjunct or next to another octave which you do not perceive with your limited apparatus of perception-- your sight, hearing and touch--because it is of a different frequency, and yet, there is that ability of entities on both sides to cross over from one octave to another, and some entities pass into the other octave and see visions, or have dreams, or hallucinations, and other entities pass into this octave which is your familiar territory and are seen as intruders from outer space or from another world, or what is commonly called extraterrestrial.

This Awareness indicates that they are echoes of that reality of the past and of the future. Many of those entities in UFOs are from the future in terms of your octave; that these energies will eventually move into this octave which is your territory and it will be then seen as the present time, but for now, these entities are in your future, and by moving through that time warp, they come into your present time and are seen as extraterrestrials.

### There is No Such Thing as Time

This Awareness indicates that the word "time", again, is a misnomer, for there is no such thing as time. There is only relationship between one thing and another, and there is that relationship of movement in which something moves in relation to something else and it gives the illusion of something passing, which entities call time. This Awareness indicates that besides this kind of sequential time, there is that inter-dimensional time or what entities call time in which things are on a different frequency that will take much movement in terms of natural effort to reach, and entities refer to that as time in the future, when, in reality, the entity can simply make a leap through frequency and be there.

### How to Understand Interdimensional Travel

This Awareness wishes you to visualize time not moving in a straight line, but visualize things moving in a spiral that begins in the center and moves ever and ever outward, whereby you watch this little Pac-man character walking around this spiral, and the entity says to himself: "It is taking me a lot of time to get where I am going." But along comes this other little character whose name is Donkey-Kong and instead of walking around the spiral, ever outward, toward the future, he jumps from one ladder to another, from one step to another, moving outward from one octave to the next, cutting across rather than following the spiral, and this entity is likened unto the UFO that moves from octave to octave.

In other words, this entity is coming back from the future into your octave, whereas you may walk for many centuries to get to that entity's domain. This Awareness indicates that these octaves or frequencies are not separated by divisions, but are all connected as one enormous spiral, so that you may walk the length of that spiral or if you gain understanding, you may leap from one barrier or octave into the next octave by jumping frequencies.

This Awareness indicates that the ancient Gaelic speech and the future spacecraft are traversing your octave, and it is in that traversing that you witness these phenomena of the unexplainable. This Awareness indicates that when these entities enter into your frequency, your octave, they still retain their own appearance and have their own language unless they can adapt themselves to your language or your appearance.

This Awareness indicates that within the next century entities in your civilization will be able to traverse across

these lines, across these barriers, across these frequencies so as to move toward the future, or move into the past, to witness these different time-zones of creation, to witness these different frequencies and octaves of existence. This Awareness indicates that somewhere, at this very moment, ancient Egypt still exists. Somewhere at this very moment your future is already present.

## The Cashless Society of the Pleiadians

(Is Money Really the Root of all evil?)

### QUESTION:

Sharon K., Roselle, IL., asks a question on this cashless society the Pleiadians use. Awareness has given information on this, but I'll read her statement here, because it might bring out some more on this subject. "In our world, people who produce nothing of value can still become very wealthy. How would a society that uses no money function?"

"I thought of some differences it might create. We would be less suspicious of 'ulterior motives' in others. People would be more forthright and honest. There would be less competition, less jealousy, less ostentation and display. There would certainly be less insecurity and fear over losing a job or being wiped out by illness or natural disaster.

"There would probably be less thievery and crime, no need for insurance companies or banks, stock markets or commercials. Come to think of it (she says) maybe money is the root of all evil!"

Could Awareness comment on her observations?

### COSMIC AWARENESS:

This Awareness indicates the observation is that which is quite probing and clear. This Awareness does not see the question, if there is a question that needs response, but this Awareness does see the entity apparently answered her own question in her observation and the pursuit of her quest.

This Awareness indicates that the society that functions without money does have its own peculiar problems in regard to how to implement for each individual those things which are necessary for that particular individual and his or her purposes. The society that operates without money has certain centers or places wherein entities who have a desire to perform a particular project can go and get resources for that project.

### How the Supplies are Created

This Awareness indicates it is not too unlike being in a classroom or schoolroom whereby the supplies are made present for the students according to the projects they are working on. Thus, the student goes to the

supply room, gets the kind of paper needed, gets the devices for measuring or cutting or whatever, and uses those things to further the project which he or she is working on.

This Awareness indicates that these things are supplied by certain entities associated with the school who bring the supplies and place them properly. In a society in which there is no money there are entities in the society who work to bring the supplies to the proper place, and whereby entities are then allowed to come to that supply place and gather the supplies needed for their own particular project in society.

### Collecting Waste etc. a Cooperative Action

There are also those who collect the waste that is left over from such and may process the waste to make new things from that waste. It is simply a cooperative action whereby entities are assigned or may be assigned certain duties according to their choice and according to the openings for such occupations.

Thus, an entity who wants to work for awhile supplying goods and transporting goods to the supply places does so. Others who want to pick up the trash or pick up the discarded material and recycle or take it to places for destruction may select to do this for a period of time until they become bored with it, and during that time, their efforts may be to work in this manner, but if there is no opening, they will have to wait until someone becomes bored and quits.

Then they may be called and told, "You may now work for the department that picks up the trash, picks up the old supplies and discards! You may now come to work in this occupation!" This Awareness indicates that this is the same throughout all of society that are available or necessary in the society.

If an entity creates a project which requires new jobs or new types of occupation, the entity's action would then be to list those new occupations with the central system that has the job of keeping track of all the activities in society. Thus, a new occupation may be listed with a description of what it is about and what it has done, and entities may decide: "Oh, that's interesting! I want to do that for awhile!"

This Awareness indicates that as they volunteer to do that particular occupation, it is covered. If there are occupations that no one wants to do and the occupation is unfulfilled, there are often listings of things that entities are calling for. There may be occupations that are open, wherein entities say "We need help in this regard, in this particular occupation. Is there anyone who will volunteer?" and this Awareness indicates that normally, there are people who will volunteer.

This Awareness indicates if no volunteer is available, certain rewards will be offered for entities to volunteer to do that work. The reward might be that of a vacation to another place after a certain length of working at that occupation. Whatever the reward, it will be used as an enticement and it may be necessary to create a very good enticement for entities who do not particularly want to work in that occupation.

Wisdom of Awareness...

ON UNIVERSAL LOVE: (84-18)

"...the greater love is that which recognizes the Divinity behind the mask and behind the act or role of the player, the entity who is the actor, rather than the character being portrayed: acceptance of the actor rather than the character being portrayed."

I TALKED  
TO CHENEY!  
WE'RE NOW  
SELLING FLU  
VACCINE TO  
THE AMERICAN  
PEOPLE!

Thus, the demand and need helps to dictate whether there is a reward or not. If the opening is not filled by volunteers, then the occupation may be promoted as something that carries bonus and extra rewards. This is briefly and very generally how the cashless societies work on other planets wherein there is no such thing as money being used.

### How is Food and Sustenance Provided?

(How the Machines Grow the Foods)

#### FOLLOW-UP QUESTION:

Is their food and their sustenance provided in a cooperative type manner also?

#### COSMIC AWARENESS:

This is in the affirmative. The growing of foods is largely done, particularly in the Pleiades, by the development of machines over long centuries of growth and cooperation among people, and these machines are likened unto watering devices and harvesting devices that are placed in fields so that the plants get planted, get irrigated and get harvested mostly by machines, with not too much effort in the human sense, although humans generally are present and assist in the operation of the machines and the mechanical harvesting that occurs.

In other words, it is not the same kind of farming that occurs on earth. The time, over centuries, and the development of farming techniques have made it possible to keep the plants growing, maintained, and healthy from season to season without having to clear out the mechanical farming devices.

#### Sowing the Seeds and Harvesting the Crops

It is seen as likened unto pipes that run several inches above ground that carry water throughout the entire field, and sprinkle the plants, and also these pipes can be used whereby seed is sewn through the water, likened unto sprinklers that sprinkle seeds as well as water, and certain mechanical activities wherein the harvesting time comes and the mechanical devices lift up along and within the plants to pick the fruit or pods and then are lifted so that the gravity allows these fruit and pods to roll into certain troughs and the harvesting then is actually little more than gathering from the troughs, the food from the plant.

This Awareness indicates of course, each type of plant is harvested according to its own need or nature. Some plants have large fruit, some plants have small grain and the harvesting device would be different for each. This Awareness indicates that the transportation to and from the cities to carry fruit or to return to the country to take the goods needed for growing is conducted by devices that carry products to a kind of belt line which is likened unto a moving highway.

The belt line carries things from one place to another and they can, reaching intersections, be moved on other highway-like belt lines.

This Awareness indicates there are of course other vehicles that are used to carry things so that not everything is run by conveyer-type of highways. This Awareness indicates it is extremely complex to explain such different societies, but this may help to give a brief understanding of the way by which work has been made easier so that human struggle is not so much a part of making a living, and so that entities begin to better understand how high technology and respect for people can lead to new ways of serving a society without the need for servitude from the individuals.

Most individuals are happy to do some kind of occupation. They do not necessarily want to stay with something too long because it is easy to get bored, but

many entities like to shift from one occupation to another in order to learn what different occupations are like, and when there are openings and when the entity is perceived to have the ability, they are generally given the opportunity to work in their chosen occupations.

### Fruits and Vegetables on Other Planets

#### FOLLOW-UP QUESTION:

Are their fruits and vegetables similar to those on earth?

#### COSMIC AWARENESS:

This Awareness indicates that some of them are the same; that many of the fruits and vegetables found on earth came from other planets, and some of the fruits and vegetables of earth have been taken to other planets. This Awareness indicates that grapes, pine-apple, and apples and beans appear to have come from other planets and to have been brought to earth.

### Entities in the Creative Arts in the Pleiades

#### QUESTION:

Is there, like there is on earth, an elite class of entities who do superior work, particularly in the creative arts, like novelists and performers, and that sort of thing?

#### COSMIC AWARENESS:

This Awareness indicates there are people who are involved in the planning and thinking occupations whereby certain individuals are selected according to their mentality and training to help in social planning or in engineering or in certain types of mechanics, et cetera, and there are also those who are involved in entertainment, including various types of artistic expressions.

These entities in the Pleiades do have devices wherein they can tell stories or can convey information. They do not appear to be as prolific as on earth. It appears that their story-telling is not nearly so important to them as it is on earth but they do appear to have some qualities in this direction, and they do appear to have such things as dance and mime and acting, but to the degree that these entities who are involved in such activities become famous because of so much exposure is not there in that culture in the same way it occurs on earth.

Earth has created a great sub-culture called fiction partly because the life on earth is so difficult that entities seek to escape reality and therefore, they have created simply from necessity, fiction, or story-telling, which allows entities to escape their own lives and live the lives of fictional characters here and there, now and then.

This has not occurred to such a degree in the Pleiadian culture.

### Any Religions in the Pleiades?

#### FOLLOW-UP QUESTION:

Do those entities have some sort of religions or are they all self-aware enough to exist without them?

#### COSMIC AWARENESS:

This Awareness indicates they have much less need for the so-called myths as part of their guiding needs. They are more scientific in their search for truth in that they perceive the universe as being a collection of frequencies and that these frequencies are alive and conscious and filled with information.

When earthlings speak of God to them, they understand that the so-called "God" of earthlings is really the higher frequencies of the universe that carry information and are conscious. Thus, they do not think of themselves as having a religion. For them it is a matter of physics or science.

This Awareness indicates they have a clear understanding of the way things are. They do not have to create a mythical being to symbolize God or to be a metaphor for God. They do not have to create a myth in regard to the concept of God. They simply see earth's term "God" as referring to the vibratory energies that are alive and filled with information as consciousness.

They recognize that physical bodies are the outgrowth of that living consciousness that permeates the universe.

### Are Earth Affairs of Any Interest?

#### FOLLOW-UP (VIKKI):

Is the group of Pleadians relating to earth and its affairs a small portion or is it of general interest and followed on their news, if they have such news media?

#### COSMIC AWARENESS:

This Awareness suggests the question be repeated.

#### QUESTION IS REPEATED:

Is the group relating to earth and its affairs a small group, or is it of general interest to the general society?

#### COSMIC AWARENESS:

This Awareness indicates that the Pleadians are branched out into many areas of the galaxy in accordance with what you would call "missions" and some are assigned to go to one place or to another for the different purposes that the society considers of importance. This Awareness indicates that when they report back to the homeland, the reports are collected in a kind of central environment and these reports are then combined with other incoming reports so that the collection of information continues daily to accumulate as a kind of current assessment of galactic understanding.

This is what is made available to the masses or to those who are interested in knowing what is going on. It is this collection of current information being gathered all the time that is considered newsworthy, but they do not present it in the manner of news, like on your earth. It is more a matter or scientific report or current discovery reports.

This Awareness indicates for example, if the Pleadians ship landed in a planet somewhere in the galaxy and was destroyed, that would not be newsworthy. What might be newsworthy to them is if a Pleadian ship in the galaxy discovered something that could be of value to the homeland or discovered a planet that had peculiar qualities or peculiar assets or which had entities of a particular nature that might be of interest to the homeland.

In other words, it would be more likened unto reports of explorations and unique and interesting information, much likened unto your Discovery Channel, if it were attempting to release information of a current nature all the time.

For more on the money system and life in the Pleiades, please refer to "Revelations of Awareness" No. 94-06: \$3.00 from CAC.

#### WISDOM OF AWARENESS:

### ON OPENING ONE'S CONSCIOUSNESS

This Awareness indicates that the openness and the questioning is that which leads entities to discovery; that when entities discover, the discovery does not close the matter from further exploration, but rather opens the consciousness to new understanding, to new wisdom. This Awareness suggests that therefore entities continue questioning and discovering, continue searching and opening themselves, for this action of continually opening one's consciousness is that which leads toward that which is termed 'Cosmic Consciousness'.

(From Issue 80-13)

## Difficult Information But It's Going to Help You

#### CLOSING MESSAGE:

This Awareness indicates that there are many ways whereby consciousness can grow, can expand. Much of the information that has been given here at this time will be difficult for some entities to understand, but everyone who reads this information will have the mind expanded to some degree, the consciousness will absorb something from this information that allows it to comprehend in some manner more than it had previously understood, and entities who read this information again in the future will receive more understanding of the nature of What Is, and each time entities review this information, they will get more understanding of Who, In Fact, They Really Are; Where, In Fact, They Really Live; What, In Fact, Is The Nature Of 'Their Existence.

The Law of Gratitude is given)

Excerpt CAC Reading 7-9-03 Grace Interpreter

### About Dennis Kucinich (Should We Support Him for President?)

#### QUESTION:

A question from JD in Vermont. She writes: "Tell us all you can about the remarkable Presidential candidate Dennis Kucinich, and how we can best further his bid for the Presidency.

#### COSMIC AWARENESS:

This Awareness suggests that this entity embodies many of the ideas and strategies of the enlightened path and serves as the manifest promise for those who recognize the need for radical change and extraordinary leadership. Although the volatility of events and limits of the species of consciousness at present suggests that his candidacy may not deliver him as the next U.S. President or even the Democratic nominee, any support that he can generate will be most helpful in the unfolding of future events along the more optimal course. Entities can contribute a great deal immediately by supporting him as serious candidate, and in the passionate speaking out for and in living the ideals for which he stands.

Any such efforts will help create broader vision for humanity and help shift the public sentiments away from the present course. All such efforts will also give his dark horse status the momentum to make a much stronger showing that many might expect, and with both his youth and vision, he will be back.

## How to Help Correct the Drug Epidemic

### QUESTION:

We had one more question in reference to the drug problem that I overlooked last night. It's by Eddie Nevers. He says: "The drug problem has become so widespread in America if not on the entire planet. Is there a special meditation that Awareness recommends we as Light Workers can use to help correct this drug epidemic?"

### COSMIC AWARENESS:

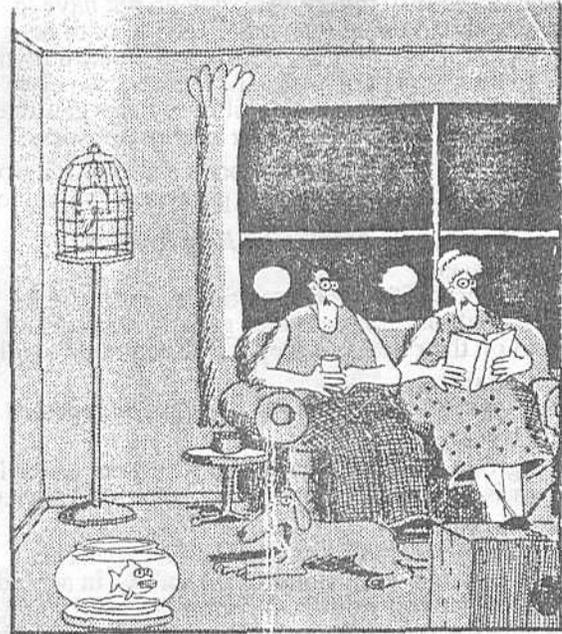

This Awareness *could* make up a meditation for you to use, if that would be sufficient. This Awareness suggests that you could perhaps more easily wrap those entities, symbolically wrap those entities in White Light so that they are visualized with strands of Light being wrapped around them, so that the drugs which they hold cannot be passed to others and so that the only thing that can occur is that they continue to hold the drugs, if that is their choice, or to flush the drugs down a toilet.

This Awareness suggests you wrap these entities with White Light with nothing present other than the drugs and a toilet. This Awareness indicates that in so doing, creating this image, you can send this picture and image to these entities in a generic sense; you need not even know their names. Just visualize some generic drug addict holding drugs and paraphernalia, standing by a toilet in which the entire scene is wrapped in White Light and the entity can either use the drugs, use them up, or can flush them down the toilet, but has no way of exiting from the Light and giving them to any other.

This Awareness indicates that this can be meditated on as you visualize strands of Light being wrapped around and around and around this entity, and the scene for several minutes at a time. This Awareness indicates that it is more powerful to express visions, images, than to meditate on something of this nature because meditation is an action of being receptive, whereas visualization is an action that is assertive in nature. How can one be receptive to a drug scene or problem, and effect a change? This Awareness indicates it is better that entities assert themselves in a visualization and express the wrapping of Light around this entity; that they may also participate in this wrapping through the movement of their hands around the image which they hold before them.

From the editor

Suddenly, the living room was flooded with light and the angry sounds of an engine being revved.

And everyone knew—the cat was back.

The Cosmic Laws of Cosmic Awareness...

### THE LAW OF RESPECT

*The Law of Respect* is that principle of looking twice, or, more precisely, looking twice as deeply; for respect goes beyond the surface appearance and superficial glances to discover a deeper meaning, purpose or basis for discovery. Without the principle of respect, the *Book of Love* will never be read, the Tree of Life will never be seen in full bloom, and the thousands of rainbows of the Land of Essence will never be viewed. But with the *Law of Respect* in action, the mysteries of the universe, or any part, will open layer after layer, like the unfolding of a thousand-petaled lotus.

#### --HOW TO GET THIS NEWSLETTER BY MAIL-- EVERY 4 WEEKS 1 ( More or Less )

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will all be asked at the Passing Over).

#### MEMBERSHIPS AVAILABLE (Honor System)

INDIVIDUAL: \$42 per year or \$12 quarterly  
 FAMILY: \$52 per year or \$20 quarterly  
 CONTRIBUTING: \$77 per year or \$25 quarterly  
 SPONSORING: \$144 per year or \$40 per quarter  
 BENEFACTOR: \$500 per year or \$150 per quarter  
 PATRON: \$1000 per year or \$250 per quarter  
 ANGEL: \$5000 per year or \$1500 per quarter  
 LIMITED INCOME: \$30 PER YEAR OR \$9.00 QUARTERLY
