THE LAW OF KARMA IS CHALLENGED

She Feels Certain Aspects of Self Should Repent and Get Redemption; That They are Performing Illegal Acts

QUESTION:

Sheila Parker, Charlotte, North Carolina, sent in a rather interesting letter and the statement she says we should publish. I'd like to read this to Awareness, and ask *It* to comment, or I can go back and reread if there is questions, which there are, but she presents this as more of a statement, as she sees it.

She writes: I would like to contend Cosmic Awareness's statement in Issue 345, 89-8 page 10, concerning:

"It is only a question of whether the entity wishes to accept that responsibility of being the cause of having chosen the experience that is being presented. This Awareness indicates that of course, the entity does not consciously choose this suffering; that these things appear to happen to the entity without his or her conscious choice."

This may have been given because of the acceptance by some one of certain set of error beliefs (belief system) that is totally apart from God. Any aspect of any individual that supports unhappy experiences for the self that has incarnated or reincarnated, especially against the free will of the reincarnated or incarnated self does show that part of the self has not turned to God, is allowing itself to be ruled by men or women, is needing perfect divine mental stability and clarified divine understanding of what it is involved in. This belief system is not God.

It appears as of now that individuals incarnated can have more common sense, more clarity of mind and more logic than the one who made the fallacious decision to cause unhappiness and grief to the incarnated/reincarnated part of itself. This is so because the decision is NOT OF GOD. Had that part of the individual truly turned to God, had truly sought God realization, that part of the self would not have made such an erroneous decision. It is along the lines of child abuse, wife/husband abuse and is simply, totally in error.

It is truly illegal and should be punishable by law as this aspect of self is probably in physical form or semi-physical form. These aspects should repent and redeem themselves. Should a part of the self have made the decision before incarnating that one was grossly misled by beings so far apart from God and the desire to be one with god as to be criminal indeed. Especially when an individual has turned to god in the physical reincarnated/incarnated form that one should be free to turn to God and reap the fullness of such and not held back by an aberrant part of its ancestral family or an aspect of self not divinely or legally qualified.

If that part of the self (and all selves) had not been subjected to certain mind altering methods used by beings from different parts of this universe that do not accept oneness with God, and who try to infiltrate any type of religion or teaching that reduces their power over us because of their destructive tendencies, those selves who have judged themselves would probably have achieved the necessary oneness with God and attendant divine wisdom. The Laws of Karma, Judgment and Reincarnation are the prime examples of what I am speaking of. One can't live under and by double standards successfully. If part of the self is allowed "to play God" he is endangering his own divine heritage and divine destiny and no amount of double talk can change this. A house cannot be divided against itself in such a negative manner and have a divine future.

There is absolutely no lasting good to come from causing negativity to one incarnated from another dimension/plane, etc. There is so much negativity on this planet occurring because of this that the good people can hardly have time, money or health with which to undo the sin caused by those who incarnated with criminal or aberrant patterns. Then on top of that when one has turned to God and does not have the wherewithal to do the proper thing because part of themselves were not/are not totally sane and rational is too much. And it seems we must overcome the negative influence from the other layers, planes, levels and dimensions. The laws of karma and reincarnation and associated false laws are causing, by one means or another, degeneration of this planet Earth and the lifestreams upon it.

No hierarchy should be allowed to inflict "karma" upon an individual or nation or planet. It is a mindless delusion, pure insanity and a criminal activity.

Reincarnation must be stopped. This planet must have a chance to heal itself and cannot do so with overpopulation and pollution caused by means to sustain such a large population. Reincarnation does not serve one's relationship with God. The whole idea is so imbued with judgment and punishment which is so far apart from God that it is a wonder that people have not woken to this before now.

People/students/disciples must do some independent thinking, true logical DEDUCTIVE thinking/reasoning instead of following the path of least resistance, instead of becoming a "flock" of lemmings ready to jump off the cliff.

I want my free will and my God protection. I want my emancipation from any so-called authority because it is not clearly for my highest good and is not good concerning my relationship with God no matter how many "platitudes" are quoted.

One is not supposed to judge. Making a part of one-self suffer to any degree is certainly judging. Playing God in a manner God would not do. Since God forgives, man should forgive. Errors are made due to lack of understanding and the need for spiritual healing. Men should not be held under influences of hierarchies that are not any more spiritual than himself, nor should he be held under the influence of any hierarchy. The usual "karmic" double talk should be suspended and man allowed his free will of free choice to turn to God without any reprisal.

One has to logically reason out:

- (1) What is the sense of forgetfulness upon incarnation/reincarnation and our forgetting our oneness with God? Would God do this? Then why should we let man do this to us, whether they are called a part of ourselves and whether they are not part of ourselves?
- (2) What good can truly come from this? Is any good from this evident?
- (3) One should really want to unequivocally know the truth concerning this. One should question if it is a method of making slaves of us by some negative foreign force. We must examine to see if a "lie was told often enough" is part of the problem.

It is very important that man do some thinking on his own. It is important that man seek a oneness with God in a true dedicated devoted manner. I believe it is in the best interest of all of you to print this so that others may make their own decisions, find the truth and finally be set free to seek their own God perfection." And she signs it; "Divine Love and Light. Sheila S Parker"

Ed's Note: The question in newsletter 89-8 that set Sheila off was in the issue on AIDS "None Dare Call it Genocide." The question concerned a channeling from Peter Brandelen who channels an entity called 'Zoroaster' who stated that those who have AIDS have chosen to go through that experience for their own purposes. Why would somebody choose to experience the agony of AIDS when Christ was supposed to be the last blood sacrifice? Zoroaster went on to explain that time is simultaneous. There is no past or future. It is all happening now. Christ is dying now, and our brothers and sisters who are part of the mystical body of Christ Consciousness in humanity are reliving the passion and reaffirming the Covenant to set entities free from the belief that the body was all there is. Awareness indicated the information was such that it could not be contradicted and essentially put the responsibility onto the person who, up to that time might have considered himself a victim. Sheila then proceeds to link all this with previous Awareness information on Ascended Masters, Hierarchy systems, aspects of selves etc. etc.

COSMIC AWARENESS:

This Awareness suggests the first statement to which the entity objected be repeated.

(The first paragraph of her statement is reread)

COSMIC AWARENESS:

This Awareness indicates that the energies of the response to this as that which is unclear in its own relationship to the aspects to which she was responding in that the quote, being taken from out of context, is unclear. The question as well as the answer to which this entity responds as that which does not yield sufficient clarity for a clear response from this Awareness, if that is what is desired.

This Awareness indicates that it does not precisely appear that a response was requested. It does appear that the entity wanted to present an opinion in regard to certain belief factors especially relating to what should or should not be laws of the universe, and there is much in what this entity has to say that can be understood as reasonable. There is much that the entity has to say which relates to certain ideas she has which are preconceptions that she is opposed to or is likened unto Don Quixote, tilting windmills which may or may not exist.

There is much that the entity has to say in regard to what should or shouldn't be that is totally irrelevant, for what is *Is*. This Awareness indicates that an entity may not like the idea of the Law of Karma, or cause and effect, any more than the entity would like the idea of gravity, but if gravity exists, and an entity objects and says it shouldn't exist, they are tilting windmills. Likewise, the entity who says "karma doesn't make sense to me, shouldn't exist, and one shouldn't be bound by cause and effect" is creating objections that are moot, because the law is there, and the law is greater than personal objections, and the only way the Law of Karma or any other law is broken, is by higher laws, and this Awareness has indicated previously, the Law of Karma can only be broken by the Law of Grace.

Only the Law of Grace Can Remove Karma

The law of Grace can be administered by Divine Grace, by the higher essences, the Christ, the Christ Light, the God, the beings who are capable of taking off the karma, the cross of karma which one may carry, by lifting that from them, and through this Law of Grace those higher beings can free entities of the Law of Karma, but entities cannot free themselves of the Law of Karma, simply by calling on the name of God. The god needs to respond, and in order for the god to respond, there needs to be sincerity, sincere remorse in the entity who needs the karma taken.

This Awareness indicates that you cannot simply say, "Because I believe, God will lift my karma. I don't have any karma!" You may still have the karma. Perhaps God doesn't yet feel there has been sufficient remorse on your part. There is more to it than your mere belief that

it should or shouldn't be this way. There is much more involved. This Awareness indicates that it is seen there are energies involved in this line of reasoning that express or tend to express a kind of didactic pushing. This entity has much to say, wants to be heard, feels her need as being valid, is not receptive, but needs to express.

In order to have greater understanding, an entity in expressing must also be receptive. To learn one must listen. To share, one expresses and listens, but to preach, one only needs to push beliefs toward others. This Awareness indicates that in understanding this, one may choose whether they have a full answer for everyone else or whether they need to learn anything more, or whether they wish to share in giving and taking, offering and receiving in an interchange.

This Awareness indicates that *It* hopes that this communication is seen as such an interchange, a dialogue. This Awareness indicates that there are many ways to look at karma. One can be hostile or one can see karma as being some kind of chain around the neck. It is simply the responsibility one has in paying back one's debts to others. It is simply the law of cause and effect, reaping what you sow, and it is the law, and it's only escape is the mercy of the court, in this case, the mercy of the Divine Grace, the Law of Grace which allows the Divine to give a lighter sentence and take away the karmic debt and obligation that one may have, but it is not by any means the right of any individual to proclaim themselves karma free, simply because they don't believe in karma.

It has no effect whatsoever. They still may carry their karma, until or unless Divine Graces removes that karma.

This Awareness indicates there are many entities who mouth their belief in God, who by saying they believe in God, and that God will save them, God will allow them to escape their karma, they continue to commit karma, to commit acts that build up greater and greater karma for them, and they think they can get by because they are claiming to be a Christian or claiming to be a believer in God.

This Awareness indicates that words can only go so far, and when words say one thing and deeds say something else, the entity is false, and an entity can say: "I am a true Christian! Give me your money! Invest in me! I'll give it back tenfold!" and then they end up keeping the money and giving you nothing, and they think that it's okay because Jesus forgives them because they mouth that they are Christian. They claim with their mouth and with their tongue to be Christians, though their deeds betray them. The fruit of their action is false.

"I'm a Saved Christian Therefore I Can Do as I Please"

This Awareness indicates that there is at this time an entire teaching in the Christian Fundamentalist movement that teaches: "Once a Christian, always a Christian. I may not be any better than anyone else, but I am a Christian, therefore, I'm saved. I can do what I want to do to you, and still be saved because I'm a Christian." There are entities who have this attitude: "Jesus forgives me for shafting you, for committing adultery; for all these things which I abhor as a Christian, I can do as a Christian, because I am forgiven." There is even the bumper-sticker: "Christians aren't perfect, they're just saved!" This Awareness indicates that this attitude that entities are free of the Law of Karma simply because they have a belief that they are free, does not in any way deny the Law of Karma as having an effect. If you doubt that, go out and as a Christian break the laws. Run the

red light. Drive on the sidewalk. See whether you are protected. Defy natural law. Eat germs and garbage and see if you do not succumb to the Law of Cause and Effect, even as a Christian, for Jesus could save you, but does Jesus *wish* to save you from such actions if you do not make the effort to avoid such actions in the first place, and if you do not have the intention of avoiding such actions in the future, and if you do not feel remorseful for your actions, and if you harm others, and you think that because you have harmed others you are not to suffer any harms, because you do not believe in karma, you are fooling yourself.

The Interpreter Almost Came Out of Trance With This One!

This Awareness indicates that *It* wishes to state far the record at this time that during the reading of the questioner's message, it was difficult for the Interpreter to remain in trance. There were certain confusions which brought in the Interpreter's mental apparatus in an attempt to analyze what was being said. There were too many pronouns which were not clarified as to their meanings: "It, them, they, we, he, one..." these pronouns could mean various things, and in the context of what was being questioned in the first place and the response the entity had in regard to the message to which she objected, the use of so many pronouns made her objection difficult to comprehend, to sort out, especially as it was being read very quickly, and with much energy.

For this reason, the Interpreter's mind began attempting to intervene and analyze what was being said and the Interpreter came near to exiting the trance level, pushing this Awareness out. For this reason, the question and the questioner's message may have been totally or partially misunderstood. If such is the case, then the response from this Awareness may have also been misdirected toward a misunderstood question.

Is It Possible Reincarnation Could be Stopped?

FOLLOW-UP QUESTION:

From previous letters I got the impression that this entity has studied an awful lot of material from various channels, particularly so-called Ascended Masters, and evidently believed everything they said, and I think part of this letter was an overreaction to information from the hierarchy, where she finally, you know, was mulling it over, and she just started writing us.

I had a question raised by this, where she talks about reincarnation must be stopped. Is reincarnation a part of the Law of Karma and could it be stopped if it wanted to be?

COSMIC AWARENESS:

This Awareness indicates that this is like saying birth must be stopped, being born must be stopped. What is this entity advocating? One can of course say: "I do not want to be born in the flesh again. I want to go live in those Higher Realms, where I never again have to be physical," but that is for the individual to choose and to attempt, but for an entity to pass judgment that no one should ever be born again is an irrelevant and meaningless statement other than for her own expression, because it is not going to stop the birth of babies.

Almost All Children Born are Reincarnated Souls

This Awareness indicates that these babies who are born have lived before. They have reincarnated. They are coming into this life and most of them have lived many lives before. Rarely is there a new soul created absolutely new to be born in human form. Almost every child born on earth is a reincarnated soul, so to say that reincarnation must stop is like advocating: "Stop the world, I want to get off!" It becomes meaningless except

for those who have a good sense of humor. How do you stop?

This Awareness asks, should it stop because one person wants it stopped? What about the voices of all the others? Perhaps if you listen closely, you will hear the unborn child say: "Not yet!" This Awareness indicates that *It* does not quite understand this kind of thinking that this entity advocates. *It* does not understand if this is humor or some form of reason, or some expression of emotion that is coming out in words, or if *It* is simply misunderstanding the meaning behind the words of this entity.

The Planet Does Seem to be Overpopulated

FOLLOW-UP QUESTION:

I believe in that particular reference, she was meaning that due to overpopulation, that the earth needed a halt to entities coming in, at least for awhile so it could heal itself.

COSMIC AWARENESS:

This Awareness indicates that there is indeed that concern for the planet becoming overpopulated and people feeling that they are being crowded. This Awareness indicates that if you were waiting at the gate to get in, you would be praying that the gates are not closed until you are well past them. This Awareness indicates that it is true that the overpopulation is causing much of the distress, but to cure the problem will create even greater distress. This Awareness indicates that this cure is quite likely to come within this decade, wherein much of the population already present will be removed, so as to make room for others waiting in the wings.

This Awareness indicates that whatever the case, there will be suffering, whether you deny entry, or whether those who have entered are ushered out; either way, entities will feel there is violation. The greatest hope for humanity is that they will ascend spiritually so that individually they tire of returning to this place and upon exiting the next round, they will go on to better places, in other realms, rather than running around the exit gate and trying to get in to the front gate again.

In this sense, individually, entities can stop the wheel of reincarnation. Perhaps this is what the entity is advocating; that each individual must learn to ascend to higher levels so that they do not feel the need to run around from the exit gate back toward the entrance to start over again.

Leonard Cohen's Song "Teachers"

This Awareness indicates that when entities have learned what there is to learn on the earth plane, then they will have no further use or need to return. This Awareness indicates there is a song, written by Leonard Cohen called *Teachers*, wherein he asks the teachers repeatedly: "Are my lessons done?" and the teachers keep giving him more lessons, and when he finishes, he says: "Are my lessons done?" and again they give him more lessons, and then he says: "Are my lessons done?" and this goes on throughout the song, and at the end he asks: "Are my lessons done?" and they reply to him: "Are your lessons done?"

IF INDIA IS SUCH A HIGHLY SPIRITUAL COUNTRY, WHY ARE THERE "BRIDE BURNINGS"?

QUESTION:

There's a question that came up as a result of that reading the other night, on the male superiority. India is often referred to as a highly spiritual country, yet, according to the media, they allow thousands of the so-called bride-burnings to occur, the "kitchen acci-

dents" which go unnoticed, or the culprit goes unpunished. This is where if the new husband is not satisfied with the dowry that comes along with the bride he can pour kerosene over her head and incinerate her, and this is usually just called a "kitchen accident." My question is, if such atrocity is really going on, and has been going on for so long, in such a highly "spiritual" country, what is the reason for this? Is this karma at work?

COSMIC AWARENESS:

This Awareness indicates that India is not in itself a spiritual country. India contains spiritual information held by some that is highly prized and valuable because it comes from an ancient source that understood a deeper spirituality than is common on earth today, and it has been handed down to India, to those who have the opportunity and impetus to find that information, but there are millions of people in India who do not have any real understanding of spiritual values and meanings. They are simply followers of bread-crumbs, pleasures, desires, needs, and orders, and in following orders, they also follow traditions, and these things may mean more to them than any spiritual message, or any laws of morality or even karma, and you can't judge a country by the actions of its people, when these people are not truly representative of the country, and yet, wherein the country allows this to occur, there is a certain degree of karma that the country absorbs for such allowance.

This Awareness indicates for this reason, India continues to suffer. India continues to suffer also from overpopulation. The cause has its effect. That is karma. This Awareness indicates that the entity who burns his bride in a "kitchen accident" establishes karma with her and will come back in future times to pay that karma. This Awareness indicates that there is no escape from karma. Even in feeling remorse for your errors, the remorse must be of such suffering as to alleviate and pay for the suffering caused to others, otherwise, there will be still some carry-over of karma.

This Awareness indicates that it is not simply a situation in which you can say: "Oh, I really feel sorry that I did that. I hope the Higher Powers will forgive me because I am really remorseful." That degree of remorse may lift one or two iota's of karma out of thousands that need to be repaid, or you may shed two tears even, or twenty tears, and that may alleviate enough karma if the Divine Lords see this and grant equivalent grace. It may alleviate enough karma so that some of the suffering or repayment in the future is not so great, but one way or another, the full debt must be paid, either in repayment to help others, especially the one harmed or in extreme remorse, equivalent to *all* the suffering that you caused, not only to that entity who was harmed, but to those who loved that entity and suffered at the entity's loss.

This Awareness indicates that grace is not something you can simply demand by paying the priest or by dropping some donation in the offering plate and asking for some forgiveness. There has to be the appropriateness of the remorse equivalent to the crime committed, to the violation committed in order to completely wipe out the karma. This Awareness indicates an entity can harm many and feel extreme remorse and may become 'born again' or 'saved' and know that the Lord has forgiven, yet the entity will still come back to live again and to serve those whom he or she has violated, and will do so if they are still in spiritual good graces, will do so willingly. They will want to repay for the error they have caused.

India is Not a Spiritual Nation

This Awareness indicates that to say that India is a spiritual nation is to label the country by that which

stands out in a kind of obvious way from a great distance. Mostly it is because that is what is most observed from a distance. That is where your interest in India lies, but if you were to walk the streets of India, not knowing where to go for spiritual teachings, you would see a nation of beggars, a nation of industrious people working very hard at menial jobs that are created for menial occupations, just to keep them busy. There are people who sweep the sidewalks with little tiny toothbrushes. If you gave them a broom they would be angry because you would be taking away their job. They could finish their job in ten minutes and be paid only ten minutes for work. They need a day's work to survive, so they do it with a toothbrush.

Why Great Karma Exists in India

If there is a way to prolong and make the job more difficult, they will do it, in order to have more pay. This Awareness indicates that it is a nation of poverty, a nation that needs help. It is a nation under heavy karma, but within that nation, there are great secrets. There are great truths. There are also great violations. The entire caste system has created a great karmic burden for India. There are the super rich and the super poor. There are those who cut off the children's hands and arms in order to make them professional beggars.

This Awareness indicates this is not uncommon. This is common. The beggars are organized. They are organized into unions and if you enter into their area to beg and you are not one of them, you are in great danger. This Awareness indicates that it is a very complex society, but to say that it is a spiritual nation is an exaggeration. There are great spiritual teachers there, but your own nation, even with its heavy materialism is indeed a more spiritual nation, for the entities care more for each other, and have more time and freedom to pursue spiritual things. That nation of India is yet struggling to have that freedom, to pursue spiritual things. There are only a few in India who have such time, such freedom.

A RAW FOODS DIET ENHANCES THIS ARTIST'S PAINTINGS

(Would This Work for Other Artists Like Musicians etc?)

QUESTION:

Joe Alexander, in Arkansas, who is a painter, writes an interesting thing that brings forth a question. He writes: "I have discovered that living on a raw foods diet dramatically purifies and strengthens a painter's sense of color and visual rhythm, and gives overall healthier qualities to one's work, reflecting an improved state of health. As far as I know this is my own original discovery. I have never heard or read of any other painters ever discovering this, but it has the potential to help many, many other artists to dramatically improve the beauty and vitality of their work, giving them more enjoyment and satisfaction, and creating more beautiful and uplifting influences in society."

I'd like to ask Awareness: is his theory valid, and if so, could it be extended to other artists, like musicians and poets and so forth?

COSMIC AWARENESS:

This Awareness indicates that this is valid, in the sense that an entity whose body is purified with natural foods and wherein the common contaminants associated with many of the processed foods and heavy cooked foods are flushed out of the body, this action of purifying the body enhances the sensitivity of the individual, so that the entity becomes more aware of colors, touch, texture, sound and feeling, and in this sense, an entity's artistic expression becomes more lively. The entity

gains greater enthusiasm when the entity is more sensitive.

The Meaning of the Word "Enthusiasm"

When there are toxins in an entity's body it is difficult for the entity to feel great spiritual enthusiasm. This Awareness reminds you the word *enthusiasm* means "God Within" or "Spirit Within," the spiritual energy within bursting forth is enthusiasm. It is the life force, and as an entity's life force, or Chi, as the Chinese would call it, as the Chi builds through purified diet and lifestyle, the enthusiasm an entity feels and the sensitivity an entity feels increases considerably, and this can help any artist, or any individual in the pursuit of their creative performance.

This Awareness suggests this entity may wish to write a small booklet on this, directed towards artists, and to relate his experiences, and the concepts behind it, and may even illustrate in the book to make it an artistic presentation. This Awareness suggests this may be termed something to the effect: *Purifying Your Art Through Purified Diet*, or *"Purifying Your Art Through Pure Foods."* This Awareness indicates that you may think about this possibility. It may bring you a certain amount of income to help you pursue your art further. There are many small booklets that make large amounts of money when advertised in tabloids month after month over the years, especially the "How To" books.

FOLLOW-UP QUESTION:

This same approach then would carry over into other arts like, say a musician could compose more clearly and a writer might be able to write more clearly with his thoughts and so on, on a raw foods diet than otherwise?

COSMIC AWARENESS:

This in the affirmative. This Awareness indicates, however, that you must also understand that there are certain needs for protein in one's diet, and especially for those who are involved in physical pursuits such as dance, sports, gymnastics or other types of requirements that need muscle tone and strength, and these entities will need to have protein, and of course, there are ways to get proteins from raw foods, such as corn and peas, but you may also find this difficult, when it requires so much protein to keep the muscles toned, and so many entities will prefer to have some cooked foods, but if there are considerable amounts of raw foods in the diet, the effect of this is to purify the system, because raw foods in the diet tend to create hydrogen peroxide when digesting and this hydrogen peroxide from raw foods helps to purify and add oxygen to the cells of the body and to take away much of the oxides and what you may term rust.

Diets That Slow Down The Aging Process

This Awareness indicates essentially the aging process is a process of rusting. It is oxidizing and entities who can keep enough fresh oxygen within their system tend to age more slowly and their bodies tend to decay more slowly, and raw foods are good in helping to bring in more oxygen to the system. This Awareness indicates that excessive cooking cooks away much of the oxygen in the foods. This Awareness suggests therefore, foods that are mildly cooked, this in reference to vegetables and raw vegetables, especially uncooked fruit, are truly valuable in a diet; that certain other foods which are cooked may be used also without great harm especially if a good part of the diet contains raw vegetables and fruit.

This Awareness indicates for this reason, many of the oriental dishes, especially those which use vegetables that are not overcooked can be quite healthy, especially if they are not overly sweetened or do not have fats,

excessive fats in them. This Awareness indicates that salads can be of great value and in-between snacks of celery, carrots or other vegetables can be of great value.

Ed's Note: Four years ago I ran across this reading but before including it in the newsletter, I wrote to Joe asking him if he ever got around to writing that booklet on how a raw food diet improves the work of the artist. I did not hear from him until last month when his booklet and a note arrived in the mail. He wrote: "Dear Avaton—Finally got this booklet out, I guess now it's over 10 years since Awareness suggested I do it. Better late than never."

The 5-1/2 x 8 inch booklet is titled "What Is Beauty? An Essay on Art & Philosophy for the 21st Century" by Joe Alexander. It's a well-done production, with illustrations and a very interesting rap for artists in any field and a very convincing argument that a raw-food diet not only is good for health and longevity but greatly enhances the artistic efforts of artists. I recommend this little booklet which can be obtained for \$11.00 (which includes postage) by writing:

Joe Alexander, 257 22nd St. Fayetteville, Ark. 72701.

WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

SHE CLOSELY EXAMINES HISTORY AND SEES INTO THE PAST

(Is It Real Or Is Her Mind Playing Tricks on Her?)

QUESTION:

A question from Rasma Kidd, Saint Cloud, Minnesota. I'll read her statement: "Learning history is one of my favorite hobbies. However, recorded history is seldom accurate. I would like to know how it really was, whatever it is I am reading about. I am drawn strongly to look back, to examine, to understand, to bring the reality of the past into true relation with the present.

"It is like I would like to understand the life on this planet earth as much as I could. Often while looking at a photograph of a landscape or a map, I see in my mind another picture of it, as if seeing it in the past. For instance, the Sahara desert in my mind appears as a green and fertile area. What happened? I want to know! The Kalahari Desert, I see mining being done in very ancient times. Some metals and minerals extracted in great quantities. I see strange equipment and have no idea what it is. I see that it causes the soil to become poor as the minerals and metals are extracted.

"Also, looking at the Gulf of Mexico, I see that there was once land connection between North and South America. The Caribbean Islands were the shorelands, then something fell in the middle of this piece of land and blew it up. Only some portions of the shore remained actually. The forces pushed the loose pieces toward the Atlantic. What was it? I want to know!

"There are many other such pictures in my mind. I realize that I can't be asking Awareness to answer my curiosity, so I would like to learn how to find the answers myself. It is not difficult for me to remember some of my own past lifetimes. I can do it fully awake in an alpha level of brain-waves. To see clearly other times and other places, when and where I was not present, is difficult, but with perseverance and determination I can do it.

"So my question is: How do I make sure it is true what I see, and not my mind playing tricks on me?"

COSMIC AWARENESS:

This Awareness indicates that there is no way to be absolutely sure when you begin to channel, other than what you feel and this still may not be satisfactory to others. Others may not accept what you sense as reality,

but if you sense something as reality and you wish to risk the possibility of expressing what you sense, then you lay yourself out as vulnerable to criticism, to opposition.

This Awareness indicates that when information is given through symbolism through this Interpreter, the Interpreter has no way of proving what he interprets and sees, however, on occasion, something outside of the reading itself will confirm something that occurred or was seen in the reading to the point where it leaves absolutely no doubt as to the accuracy.

An Example of the Interpreter's Message Being Confirmed

This Awareness indicates that a brief example, wherein a question was asked about a dog by these entities who owned a dog: "Who was Patrone in his last life?" A face was shown to the Interpreter; the face of a man who had a burly beard, dark bushy hair, wide cheeks and chin and deep set eyes and a wide forehead. The entity was seen by the Interpreter and the words came 'Gregory Gorovich.'

The "Gorovich" was muddled and the Interpreter indicated "Gorovich does not appear to be quite right in terms of the last name," and the Interpreter indicated this entity was Ukrainian. After the reading, the lady who was there for the reading spoke out and said: "That was my father's lawyer! He died ten years ago of a heart attack! His name was Gregory Yanovich, or something to that effect. The name was slightly different from that which had been uttered by the Interpreter.

This Awareness indicates this was a form of confirmation, since the Interpreter had never heard of this entity before, and since the questioner had this information available to confirm the image given by this Awareness to the Interpreter. Once in a great while confirmation is given, which helps the Interpreter to continue doing readings. Otherwise the Interpreter would have no faith after some time that the readings were even valid. It would all be a matter of guesswork whether there was any validity or not.

When the Interpreter David Worcester Was Asked a Question

This Awareness indicates *It* wishes also to mention another story in which this Interpreter asked a previous Interpreter: David Worcester: "How do you know these things are correct when you give them in trance?" and David Worcester, not being in trance at the time, said to him: "I don't know! If I had to know, I could never do another trance! There's no way I can know what is happening or whether it is correct! If I had to have proof, I might as well give it up now."

This Awareness indicates this was a shock to the Interpreter, for he thought that when one is in trance one is absolutely sure of the information that is coming through. But that is not the case. The Interpreter's purpose is simply to translate or interpret the images, energies, and feelings that are being presented to the Interpreter by this Awareness, and that accuracy of the interpretation is *all* the Interpreter can concern himself with, whereby the energies, images and feelings and any messages that come are interpreted properly. That is all he or she can do.

In your case, you cannot have scientific proof that your view of past history is accurate until you find some kind of verification through other means such as scientific evidence in the area to verify something you have seen before, perhaps recorded previously, which is then verified by evidence of substance. Otherwise, it is still a concept.

It may be accurate in terms of your interpretation and visualization, but if you want concrete evidence and

certainty, you have to find it in the old ways of science through exploration and physical evidence.

Was Rasma's Vision Accurate?

(Did an Asteroid Hit the Gulf of Mexico?)

FOLLOW-UP QUESTION:

Well, is there something to her vision of the land connection in the Gulf of Mexico between North and South America? "Where the Caribbean islands were the shorelands, then something fell in the middle of this piece of land and blew it up and only some portions of the shore remained. The force pushed the loose pieces toward the Atlantic. What was it?"

COSMIC AWARENESS:

This Awareness indicates that now it is an action of seeking verification from another source of channeling through this Awareness. This Awareness indicates if this Awareness answers that it was, does this prove the entity's vision was correct? It does not prove anything. It simply adds another voice to the assertion or assumption of a vision as possibly being correct. Is this Interpreter's vision or understanding of the symbolism any more proof than the original?

If you find someone who agrees with you, does that mean it is correct? This Awareness indicates that even with this Awareness agreeing, there is still room for the skeptic to doubt, to say, "Prove it!" This Awareness indicates, however, for the sake of this reading, it appears the entity is correct; that there was a great comet or asteroid that landed in that which is now the Gulf of Mexico, and which caused a great splash. A portion of this caused certain scars and marks in the North American continent, also in South America, in Brazil.

It was an area that much was like the lowlands of Brazil, but contained much more water; a kind of sparsely populated area of island and swamps and deeper waters, and once this hit, it scattered some mud, land and waters into the surrounding areas, and also over the islands of the Eastern part of the Gulf of Mexico.

This Awareness indicates evidence could be found either through exploring deeply into the Gulf, or also through exploring various types of minerals in the surrounding regions to determine the frequency and mass of certain types of minerals in the earth so that a pattern might be established showing something splashed out of the area and scattered mineral debris in all directions.

This would be an extremely expensive research program. Whether it would be worthwhile to establish a theory or if the theory could simply be presented as a possibility and allow time to provide further evidence over periods of years and decades of research, is a question that entities may wish to consider.

Do you seek to prove a theory that renders no great reward, but spending hundreds of times more than the reward would yield, or do you simply present the theory and let others consider it and perhaps look for evidence to substantiate it over long periods of time?

This Awareness suggests you also consider the plate movements as a theory that has been recognized as probably valid, wherein different parts of the earth land-masses have moved, and wherein these land-mass movements can be tracked to show they fit together like a puzzle, and see where and if the concept of a comet or asteroid in the Gulf of Mexico would fit into that theory and still make sense.

Fibroid Tumors: Their Cause and Cure

QUESTION:

Several members have asked, would Awareness please give information on the cause of fibroid tumors that form in women's uteruses and what can be done to cure them?

COSMIC AWARENESS:

This Awareness indicates that it appears that there are some genetic factors involved. There are also certain dietary factors and some chemical, hormonal and mineral factors; that the use of diets high in fats does not necessarily cause, but does help to create an environment which can be conducive to such growth.

This Awareness indicates that there is also seen some effect from a fungus that can help develop at a time for this to occur. This Awareness indicates that the fungus is related to warts and can, over periods of time become somewhat contagious through sexual partners. This Awareness indicates that the best chance for curing would be the use of antioxidants such as Vitamin C, Vitamin E, pycnogenol, especially the grape pycnogenol, and liquid aloe vera in terms of douches and also internally, orally taken.

This Awareness indicates that some anti-fungal type herbs would be beneficial, and the avoidance of yeast infections would help to diminish any spread. The avoidance of sugar and such products associated with yeast. This Awareness indicates that these are seen as ways. It appears there are also some medical drugs that could have some effect; these being of a non-natural source, but such also could carry side effects and risks.

These drugs may be better used in extreme cases of advanced problems. This Awareness indicates that the use of pycnogenol may be of extreme significance in dealing with this. It works as an antioxidant; also as a kind of antiseptic, opposing viruses as well as some bacteria. This Awareness indicates that it strengthens the immune system, and wards off many of the common diseases such as colds and various mucus related diseases and helps to generally restore a good health in regard to alleviating many of the common problems that entities suffer through viruses especially and through oxidation problems.

It also helps to counter fungal problems. This Awareness indicates that the use of citrus in one's diet can be beneficial for this also, particularly lemons or limes, so long as the entity doesn't have other problems caused by lemon or lime use. There are some situations in which entities develop excessive coughs and throat problems from too much lemon, lime or orange, citrus intake.

If entities begin coughing excessively after using lemon, lime, grapefruit or orange, they should stop using these things and see if the cough goes away. This Awareness indicates otherwise, these can be helpful in terms of the antioxidant effects of the citrus. This Awareness indicates that the pycnogenol made from grape sources is extremely high in Vitamin C, approximately 10 to 50 times higher than other sources.

Is There a Health Need to Sun the Body?

QUESTION:

A question from JD in New York. She asks: "Is there a health need for sunning the body other than that which is needed for the pineal via the eyes? If so, does lack of sunning contribute to the short Inuit lifespan?"

COSMIC AWARENESS:

This Awareness indicates there is some benefit in regard to Vitamin D some benefit in regard to the PABA

or Vitamin B intake, but the sun is not the only source for these substances; the use of GH3 provides the Vitamin B, PABA, the use of Vitamin B and the use of Vitamin D as a supplement can bring entities sufficient amounts without the sunning of the body.

This Awareness indicates that Vitamin A also can be helpful to the skin. The beta-carotene source is another good alternative. This Awareness indicates the sunning of the skin can be extremely hazardous and risky, particularly if entities are not already somewhat olive-skinned or dark-skinned. The Irish type of skin, those entities from Northern European nationalities generally have skin that burns easily; the Irish being perhaps the most notable, and this kind of skin burn from the sun is at high risk from sunburn.

The danger is from skin cancer and skin damage from too much sunburn. Many entities from some of the southern countries of Europe will experience damage to the skin also, but those who have certain kind of olive skin which does not burn easily are less endangered by the sun's rays. Even these, however, can have sun damage if they are careless and get overexposed without reasonable sunscreen lotion being used.

Anyone who experiences sunburn should be extremely careful about the sun's rays. Others should be careful about excessive sun use in that it can cause the skin to dry out, become cracked and wrinkled over long periods of time. The sun is radiation, and entities having their skin continually radiated just to get a browning effect may be asking for trouble.

Tan Your Skin Safely With GH3, But Don't Get Busted for Drugs

This Awareness indicates there are certain sources of skin coloration of vitamins and this can be taken orally to help brown the skin. The GH3 pills are helpful in this regard, containing the kind of Vitamin B that is beneficial in helping to tan one's skin, creating skin that is not so easily burnt, but which appears somewhat browner as a result of the vitamin.

This Awareness wishes, however, to give a caution about the use of GH3, particularly for those entities who become drug-tested on their jobs or for sports activities. It is possible that an entity taking large amounts of GH3 that they might experience, in a drug test, a positive reading for cocaine; not that the GH3 contains cocaine, but it does contain procaine which is related to Novocain, and it can be misinterpreted by a drug test as a cocaine signal, or a cocaine marker.

This Awareness indicates if you are drug tested and have been using GH3 and it shows that you have a cocaine marker in the test, it is possible that it is from the procaine of GH3 or from Novocain from a recent dental appointment. This Awareness indicates that these drug tests do not clearly distinguish between Novocain, procaine and cocaine; therefore, you must make sure it is clearly understood where your negative results came from.

This Awareness indicates it would also be wise to avoid dental appointments or GH3 use if you are expecting a drug test in the next few days.

FOLLOW-UP QUESTION:

Awareness said "great amounts of GH3." The Dr. Aslan formula is to take one tablet a day for three weeks of each month. By following that course, would it still register as a drug in a drug test?

COSMIC AWARENESS:

For some few days.

Does Lack of Sunshine Shorten Life of Inuits?

FOLLOW-UP QUESTION:

In relation to sun, does the lack of sunshine contribute to the short lifespan of the Inuit entities in the North?

COSMIC AWARENESS:

This Awareness indicates that it appears there are several factors that contribute to their short lifetime. This is one. The lack of sun not only affects the skin in terms of its not giving entities a sufficient amount of Vitamin D, it also results in mental attitudes that cause a kind of psychic depression.

This Awareness indicates that entities who live in excessively cloudy areas or areas where there is very little light tend to be more depressed, and depression of course, hinders the entire body's metabolism and affects the organs of the body. This could contribute to a shortening of the life.

This Awareness indicates, however, the entities also have a very limited diet, and shortage of many of the foods, vitamins and minerals that are important to good health, and this too contributes to the short lifetime for these entities.

Message Not Seen

QUESTION:

Thank you. Does Awareness have a closing message?

COSMIC AWARENESS:

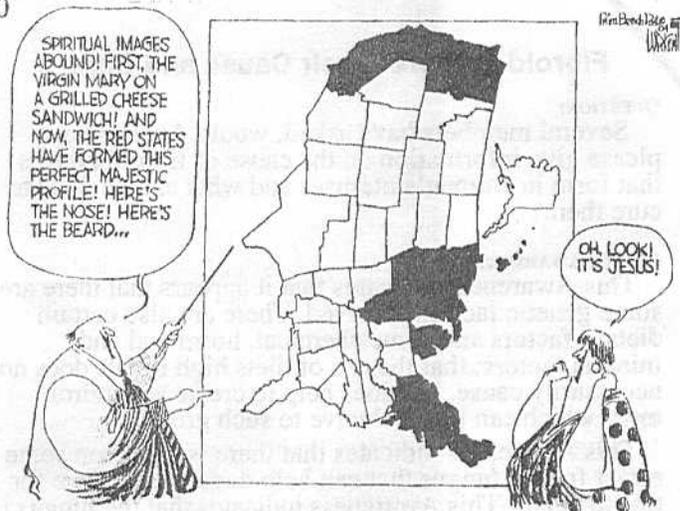

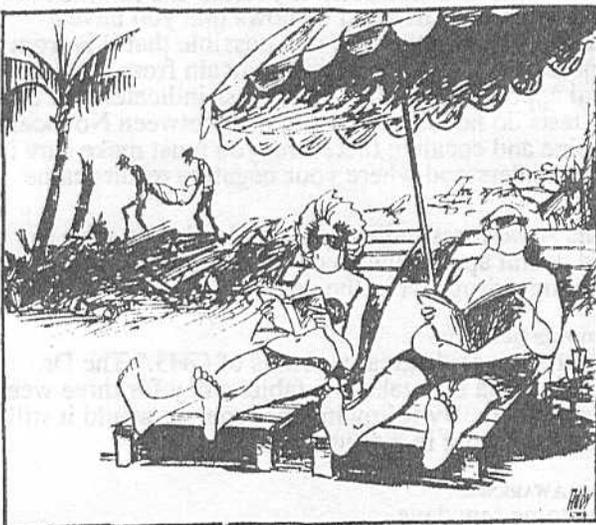

This Awareness indicates that there was a message carried over from an earlier question, but that this is not seen at this time. It was something that could have benefited from further comment. This Awareness asks for a brief pause.

This Awareness does not see the area. This Awareness suggests the Interpreter be brought from trance.

Thank you. (The Law of Gratitude is given)

THE WORLD'S VIEW

KNOWING YOUR FRAME OF REFERENCE MEDITATION

This Awareness wishes to give entities a meditation type of exercise, and suggests this be used each night before falling asleep and upon awakening as is convenient.

This Awareness suggests that you visualize two picture frames. These picture frames upon a black wall of consciousness; the two picture frames as being the only outlook from that wall into the world in which you live; these two picture frames as looking out at the moment, at the Eternal Now. Beyond each picture frame is that which is occurring in your life, in the scenario of your experience at each particular moment - these moments appearing and disappearing in frames, one each four-quadrillionths of a second.

This Awareness indicates there are two picture frames. The one on the left which you may look from is that picture frame which sees the moment, but in looking at the scenario and the situation and experience of the moment, though seeing the exact same picture, carries with it an assumption that the image shall become worse and worse, and worse, more painful, more difficult, more tiresome.

The picture frame to the right carries with it an attitude and feeling that the image seen is but the beginning of a vision that begins to unfold into greater and greater joy and happiness. The picture frame on the right is the mask seen in the drama field known as the smiling, happy face.

Above the picture frame to the left is the depressed and sorrowful face. This Awareness suggests that you stand back and look at these two picture frames, seeing each clearly prior to falling asleep. Just as you begin to move toward the threshold of sleep, you move to the right and enter into the scene which improves your situation, bringing about greater and greater joy and harmony.

Upon waking, you move in a similar manner, visualizing two picture frames, one to the left and one to the right, and find yourself entering that frame which carries with it the smiling face, moving into the awakened state, entering the moment with the attitude and assumption that things are going to be more beautiful and harmonious.

Any time during the day when you take the time to flash upon these picture frames, this Awareness suggests you always check yourself to see which frame of reference you are using in your observation of the moment. (77-26)

Progeria: A Rare Disease in Children (They Age Prematurely and Get Senile)

QUESTION:

A question from Carl Allen Kozart of Pacific, Missouri. He writes: "A few years ago I became concerned about the plight of a few children who are the victims of a rare and deadly disease known as progeria, which is premature aging and senility. Upon researching this disease, I came upon what I believe to be a cure, and it is upon this that I would like Awareness to comment. In a book on the power of pyramids, the author relates the outcome of some experiments he performed with a wire bent into the shape of the Egyptian water sign. He found that by placing the wire in the hands of a person, and turning it in a certain direction, their vital signs increased, and then when turned back the opposite direction, return to normal.

He also claims that by turning it further in the opposite direction, their vital signs decreased. Would Awareness please comment on the theory that since these children's biological clocks seem to be running fast, the above method with the wire could be used to slow down their bodily clocks?

COSMIC AWARENESS:

This Awareness indicates that this does appear to have some validity in regard to this condition; that it appears certain long-term experiments and tests would be necessary to better understand the relationship of these things to the condition, and the effects of variations. This Awareness indicates that there also appears to be some benefits in considering the use of copper in working with this program. This Awareness indicates that the wearing of copper by these entities is seen as having some benefit during this test; that this is not fully clear. It appears that the copper energy accumulates certain fields of energy that may affect or strengthen the wire coils in use.

This Awareness indicates that there is also seen some kind of connection with the use of radionics and the frequencies involved in the child's makeup whereby this basic frequency may be altered in such a manner as to slow down the metabolism. This Awareness indicates that this also appears to be related to excessive increased numbers of free radical accumulations in the body; the body being unable to deal with the free radicals; those runaway atoms which are free to bond with other atoms, creating molecules that create problems.

This Awareness suggests that there is seen a benefit in the use of SOD, the SuperOxide Dismutase, which causes dying cells to die quicker and strengthens the new oncoming cells, giving them greater vitality. This Awareness indicates that this tends to renew the body. This Awareness indicates that this also appears to be one of the benefits of the use of the wire spoken of by the questioner in strengthening the vitality. This Awareness indicates that it appears there needs to be further research in this area, for there does appear to be a benefit from the approach, that this entity has perceived.

SATANIC RITUAL ABUSE—DOES IT REALLY EXIST?

QUESTION:

A question from Alexandra B., New York City. She says: "Lately, on PBS's *Frontline*, I have seen two documentaries on Satanic ritual abuse. The first one, which I saw about 6 months ago, seemed to leave the question open about what was going on. There were interviews with the "victims" and their shrinks, who averred that the Satanic ritual abuse had definitely taken place, and there were interviews with the parents, the alleged perpetrators, who were upset that their children were so deluded by their shrinks. It was up to the audience to decide what really happened.

"The second documentary which I saw last week, and appears to have been directed by the same woman, (the off-camera female interviewer has the same thick Eastern European accent) strongly suggests that a band of evil psychiatrists were preying upon emotionally vulnerable people who happened to have generous insurance policies.

"We were told that these psychiatrists were essentially brainwashing their victims into believing that they had been raised in a cult, and then bilking their insurance companies out of the millions of dollars that it costs to "treat them" for it. This documentary consisted of interviews with "victims" of the psychiatric community, who had once believed that they were victims of Satanic ritual abuse, but who now realized that they had been duped.

"This second documentary seems to suggest that any Satanic ritual abuse that is going on is happening in the community of psychiatrists who "treat" these "victims." It ends with a printed quote from the FBI, saying that their investigations have determined that there was not evidence of any truth to the stories of torture, slaughter and cannibalism as described by proponents of the reality of Satanic ritual abuse; that these stories are imaginary, and best handled by mental health professionals.

And then she says: "Will the real Satanic ritual abuse please stand up! Is Satanic ritual abuse something that occurs in families, or is it a form of mind control that takes place in the "mental health community" or is it both? Is it as widespread as some had said?; i.e., that it mostly comes over with the Nazis from Project Paperclip, who founded the CIA and infiltrated our government's various institutions, as well as the families of our country-leaders?"

"Is there any difference between Satanism proper, and Satanic ritual abuse mind control programming as it is practiced in the USA?"

COSMIC AWARENESS:

This Awareness indicates there are some instances of psychiatrists misusing their offices for making money off of the claims and fear of Satanic activities, but there are also truths in the expressions of many entities apart from those psychiatric offices, wherein Satanic activities and rituals *do* in fact occur.

This Awareness indicates that most of the Satanic orders are not involved in human sacrifice, but there are instances where such is the case. Most of the reported cases of human sacrifice in Satanic activities is promoted by religious zealots who wish to scare the daylights out of people, and who wish to promote the fear of Satan in order to further their own religious agenda. This Awareness indicates that this does not mean there is no substance to the claims and stories of

victims, or those who have at one time or another been involved in Satanic activities and rituals.

This Awareness indicates that it is not at all uncommon for Satanists to have a human skull in their home or apartment, but that does not necessarily mean that the human skull was acquired through Satanic rituals. Often these entities will steal humans skulls from laboratories or from graves or other sources, just to have the appearance of some kind of Satanic status, to impress their other Satanic friends. This Awareness indicates that it is also intended to intimidate any who would question or doubt their Satanic power.

Some Like Jeffrey Dahmer Indulge in Cannibalism

This Awareness indicates that for the most part, the Satanic activities are involved in concepts, ideas and the thrill-seeking of playing with Dark Forces, rather than actual human sacrifice, but there are those who take it to an extreme, such as the entity Jeffrey Dahmer, who played with Satanism and who became involved with cannibalism and human sacrifice.

This Awareness indicates there are other known examples of such activities associated with the known murderers and killers who have certain claims of Satanic allegiance. The so-called Night-Stalker in the Los Angeles area told of being a Satanist, and there are others who have been involved in, and found guilty of murder, who also claimed that it was Satanism that prompted them to do their dastardly deeds.

This Awareness indicates it is not something that can just be dismissed because some entity decided that, or proved that psychiatrists were misusing their office and claiming to be helping patients overcome Satanic abuse. There is more to it than fraud against insurance companies.

WHAT ABOUT "RECOVERED MEMORIES?"

FOLLOW-UP QUESTION:

Awareness, in the last couple of years there's been a lot of sensational information put out in the media about people now grown up, that they used the term 'recovered memory' that they recall suddenly as adults that they witnessed a murder as a child, or something of that nature. And some of these cases involve even the father, in one case, or the daughter, and he went on trial and actually went to prison.

Since then, I think he's been released, because there's a whole school of psychiatrists now, or lawyers, I'm not sure, who claim that these so-called 'recovered' memories, aren't recovered memories at all, but that they were a form of brainwashing by psychiatrists and police and other people who were involved in this thing.

I'm not sure if Awareness has ever discussed this thing of 'recovered memory.' Could *It* discuss this subject a little bit. And just how factual is this material we read concerning it?

COSMIC AWARENESS:

This Awareness indicates that this is a reference to many of the so-called 'counselors' uncovering what they presume to be memories of an individual. Sometimes this occurs in hypnotic or near-hypnotic reminiscence. This Awareness indicates that often these counselors are looking for abuse of the entity and will plant suggestions or state things in such a way as to imply to the entity who is in a very relaxed, near-hypnagogic state, that there was something of a negative nature that happened to them and ask them to describe it.

As the entity begins attempting to describe it, the counselor will sometimes attempt to help jog their memory by making suggestions, sometimes in the form

of questions: "Did you recognize the person who did this to you? Was this your father?" Perhaps the entity hasn't even said something was done to her or him, but when the counselor says, "Do you recognize the person who did this, who abused you?" then the message has come through to the relaxed mind that he or she was abused by someone, and the entity is simply looking to see who it is.

Naturally, the child's memories contain mostly memories of parents and a few childhood friends, so that when an entity seeks to look back 20 or 30 or 40 years to childhood, the main entities that stand out, are the person's childhood associates, including parents, so when the entity is asked: "Do you recognize the person who abused you?" the entity may simply see a flash of her parent, her father or her mother, or someone else whom the entity remembers as a child.

This Awareness indicates that these then become labeled as 'recovered memories' but they may be simply a way of creating fiction; stories. This Awareness indicates in the same way that entities can conjure up Philip, a spirit that has no real substance, by using imagination, they can conjure up memories from childhood that have absolutely no substance whatsoever.

Some Techniques Used by Counselors: Rewriting the Script

This Awareness indicates in fact there are techniques that counselors often use to help people relive traumatic memories, traumatic situations, to change those situations in their memory so that the changed situation leaves them with a memory that is more pleasant and not devastating and traumatic to them.

In other words, if for example, one recalls having been deeply humiliated in front of someone whom the entity as a child respected greatly, and the entity has, through this humiliation, suffered considerably throughout his or her lifetime, a good counselor can have the entity relive that situation and visualize it along a different line so that when it comes to the point of humiliation, the counselor can suggest that the entity received great applause and great approval for his or her performance in the situation.

This Awareness indicates that by rewriting one's script from the past, an entity can alleviate the traumatic memory from his or her consciousness and no longer be bothered or plagued by that inhibiting trauma. It is a way of erasing the negative trauma that may have hindered the entity from that time.

This Awareness indicates that Scientology has made an entire program out of dealing with entities' past 'engrams,' which is another word for traumas, and by dealing with these traumas; clearing them, erasing them, entities become free of the haunting traumatic experiences of the past and become more wholesome and healthy.

Thus, the same can be said for counselors working with entities to help them overcome negative memories of traumatic events, but in the same manner that they can help them to **overcome** traumatic memories of negative events by having them create a new script of the situation, of the memory; likewise, they can also instill false memories by suggesting that, "Perhaps you were abused as a child, which may be what causes you to have so much inhibition today, which may cause your problems that you feel presently, and this abuse may have been something that carries over to present time. Let's take a look in your past to see if you can recall any such abuse!"

And then the counselor may ask: "Do you recognize anyone in your past who may have abused you? Who is

the person that first comes to mind?" The entity may say "My father!" or may say, "The preacher!" and the entity then says: "In other words, your father abused you. How did this occur? When did this first occur?" The entity has not yet said that the father abused her. The entity has only answered the counselor's words: "Do you recognize anyone in your past?" and the entity says: "My father!"

This Awareness indicates that the question of "Who comes to mind first?" "My father!" is then used to link to the concept of the father and the abuse, and the entity is simply responding to questions by the counselor without necessarily originating the idea of the father abusing her, but by the time the counselor has asked a series of questions which tie these things together, the patient is then beginning to have pictures or images of the father abusing her.

This Awareness indicates it is possible that the patient has fantasies of having a relationship with the father and is simply manufacturing this so-called 'abuse' from her own fantasies, from her own desire, an Elektra complex. This Awareness indicates that it may not have ever happened at all, but it may be something that, by prodding the memory, or trying to prod the memory, the counselor is simply creating a false memory, false images, such as dreams, that appear to be somewhat real in terms of the imagery, and then it is only a slight further step to convince the entity that it *is* real, and that they have remembered something of great significance.

The McMartin School Scandal

This Awareness indicates this is also the way by which young children are influenced into testifying that someone abused them. The McMartin School scandal, for example, began with one child being angered at a teacher, and saying something which was interpreted as some kind of abuse, and the story being spread so that other parents became suspicious, then counselors began to question the children. Before long, many children were saying that they were abused, and being told what "abuse" meant and informing on different teachers as to this so-called "abuse" that was going on in the school.

It was later found that none of it was really verified, and many of the students as they grew older realized that they had been tricked into saying things just so they could please the counselors, who seemed so happy when they got something of an abusive nature from the child. And the children, then, trying to please the counselors, realized that they had falsely accused entities, and yet there were those who suffered because of these false accusations.

Counselors to Blame for Much of the "Abuse" Accusations

This Awareness indicates that it is the counselors who are to blame for much of the abuse that has happened to children because they have falsely solicited testimony that was unfounded, yet you cannot hold the counselor as necessarily being evil or trying to falsify and defraud because the counselor thought they were using proper techniques of uncovering truth. They simply did not understand the naiveté of children, and how children try to please those who are seeking such information.

Children Have Considerable Reason to Lie

This Awareness indicates that counselors would say "The children have no reason to lie!" but this Awareness indicates that children have *considerable* reason to lie, one of them being they will lie to make you feel better. If you want to hear about abuse, they will lie to you in order to please you. This Awareness indicates that there *does* need to be greater understanding of how to solicit information from children. If it is volunteered, that is

much more trustworthy than if it is solicited from the child by a questioner.

Yet, even volunteered information may be false also, because sometimes a child will be angry at someone and want to cause them trouble, and they know enough about the terminologies to say that someone abused them, knowing that it will cause that person considerable trouble.

This Awareness suggests that having looked at it from **this** side does not preclude that there is the other side, wherein children **are** indeed abused, and often the abuser gets away with it, because no one believes the child.

An Update on the Satanic Energies

(More on the Binding of Satan)

QUESTION:

Dan O'C., in Huntington, VT., writes: "Just out of curiosity, a couple of years ago Awareness did a binding of the Satan energies. Since then there has been little mention of anything Satanic in the media. Would Awareness care to give an update?"

COSMIC AWARENESS:

This Awareness indicates that the binding of the Satan energy as that which *has* helped to diminish this force. This Awareness wishes to clarify that there is no such thing as 'Satan' other than as created by the minds of humans in their collective consciousness. It is not an actual being created by anything other than the consciousness of individuals.

This Awareness indicates that by binding the energy of Satan, this has helped to diminish the concept so that it has lost much of its power, but there are still many entities who energize Satan and try to keep Satan alive. Mostly these are entities from religions, whose religion would be damaged without the adversary known as Satan. They cannot have a duality religion without having a Satan to feed off of. In order to promote God, they must promote Satan also.

This Awareness indicates that in the binding of the concept of Satan, this Awareness has had some effect, but it has not as yet totally had its full effect. That action continues to grow, and in time, the entire Satanic concept will pass, and be of little or no great significance to the collective consciousness of humanity. There will always be a few, even in the great future, who will believe in Satan and still energize Satan, but for the most part, the concept of Satan is presently fading, slowly at first, but will more rapidly fade in the coming years as more and more entities focus on the Divine Energies, and less on the negative energies.

THE NUMBER 666 USED BY SATANISTS--IS IT THE NUMBER OF THE BEAST?

(Or Does it Really Mean "Sex, Sex, Sex?")

QUESTION:

A question from John S., Pacifica, California. He writes: "I am a long-time student of occultism, 26 years. I am a Gemini, born June 6th, 1946, 6/6/46. Accordingly, I have given much thought to the ideas surrounding the number 6-6-6, which is universally vilified among Christians, and which was adopted by Satanists as representing their master, Satan.

"Apparently, this highly charged polarization regarding what is, after all, merely a number, (three digits, much like any other number. Nobody hates 1-1-1, 2-2-2, 3-3-3, et cetera) is derived from its usage in the Book Of Revelation in the Bible. It is said to be the Number of the Beast, and the number of a man, supposedly, according to the Christians, the Antichrist.

"My belief is that this number is singled out for such hatred by Christians because it symbolizes the sexual nature of man, which has been twisted, warped, vilified and demonized by the Christian churches for many centuries. In the Qabalah, the 6th Sephiroth of the Tree of Life glyph is the central sphere where all the paths come together and are balanced. The 6th sphere is named Tipareth, and is assigned to the sun.

"In numerology, the number 6 vibrates with peace, love, harmony and beauty. "Beauty" is also the English name of the 6th Sephiroth. In Latin, the word for six, is sex. So in Latin, six six six translates to "sex sex sex," which is guaranteed to drive the devout Christians crazy! Ask Jimmy Swaggart!

"Awareness, please evaluate the foregoing ideas, and expand on the information in any area which might benefit the readers of *Revelations of Awareness*."

COSMIC AWARENESS:

This Awareness indicates that these ideas expressed are intrinsically clear in their presentation, and that there is also another factor involved in the nature of the number 6, in that it moves in a counter-clockwise direction and goes inward into a point. The symbolism of such a movement is that of taking from out there, and bringing it into a small point, in a counter-clockwise direction.

The counter-clockwise movement has to do with moving things into physical manifestation, whereas the number 9 moves things from a point clockwise and out toward infinity, so that there is an expansiveness involved in the 9 and a contracting involved in the 6. Anything that expands consciousness is seen as being that which reaches out in a spiritual sense. Anything that confines or contracts consciousness is that which moves into self, self-centeredness, and therefore is of a non-spiritual direction. It is more of a materialization than an expansiveness that reaches out into spirit or space.

The Unified States of Awareness—a Spiritual Concept

This Awareness indicates that all of these concerns about the letters 6-6-6 are simply symbolic concerns that have only as much importance as entities wish to put on them. This Awareness indicates that in the past, this Awareness gave a certain pattern for the *Unified States of Awareness* which was more of a symbolic action than a government outline. Many entities considered it as a government outline, but it was more of a concept of a spiritual government governing consciousness.

This Awareness indicates that it was a division of a circle, divided unto 12, likened unto a Zodiac, wherein each of the 12 was also represented by a circle divided by a 12, wherein each of those divisions contained a circle divided by 12, and in the 6th circle of the Grand Circle, there was Circle #6. The 6th Circle represented the analysis and that sign of Virgo with all of its characteristics, especially the analysis and breakdown of concepts into analytical departments.

Some Things That "666" Represent

The 6th Circle within that 6th Circle was a further breakdown of the divisions and within that 6th Circle there was still another circle that broke down into 12, so that the 6-6-6 when analyzed completely became, by the very nature of the way the circles were expressed, became symbolic of that which would be the mind, or the computer; a rational mind based on analytical extremism or a computer, and therefore this Awareness suggests that 6-6-6 represented the computer. It also could represent for the human the analytical mind as being the Beast, and this essentially is what the *Book of*

Revelation means when it speaks of the 'Beast' in *Revelation*.

This Awareness indicates that it is Antichrist because Christ is feeling, is more than analysis. It is intuition. It goes into spiritual expansion. It is a higher more expansive kind of consciousness rather than the condensed self-centered consciousness of the analytical mind. The Christ Consciousness expands and includes everything.

This Awareness indicates so much for symbolism. Do you want to make a religion with such information, or just get a clearer understanding of how the religion, using this information, came about from a kind of symbolic analysis of how things are?

This Awareness indicates *It* does not wish to promote or to create labeling of 'evil' for the number 6. It is just another number, and numbers cannot be trusted to be what entities may want them to be, for some intuitive or symbolic purpose. This Awareness indicates that they can be used for exact sciences, but when you mix them with religion, which is a theoretical and imaginative and intuitive and non-fixed form of reasoning, lacking the qualities of a fixed science, then they do not serve a great purpose.

The Hebrew Alphabet Can Analyze Biblical Texts

This Awareness indicates that there is a certain numerical analysis to much of the Biblical texts, because the Hebrew language and letters were numbered and represented certain numbers, and certain words were created using letters that added up to certain numbers, and therefore, it was a kind of coded text that embraced numbers in its use of the Hebrew alphabet.

The Hebrew alphabet, having certain key numbers as described in Paul Case's book of the Tarot, can be used to analyze many of the words and terms in Biblical texts. This Awareness indicates that in this sense, the 6-6-6 became associated with the Antichrist, while the 7-7-7 was associated with the Christ.

This Awareness indicates that it was simply a way of playing with numbers and words through the Hebrew alphabet, giving coded information to priests, to help them in their esoteric or hidden messages, embodied within the text of Biblical passages.

License Plates with 666 on Them—Bad Luck?

FOLLOW-UP QUESTION:

Awareness, is it not true however innocent those numbers are, the fact that they have been energized and vilified by thousands of people, maybe millions, for many, many years; isn't that energy somehow still attracted to these numbers? For example, if somebody had a vanity license plate with 6-6-6 on it, would not that car be more accident-prone, for example, than a normal car, because of those numbers and all of that energy?

COSMIC AWARENESS:

This Awareness indicates that if this 6-6-6 on a license plate on a car was on a different planet with a different culture, it would have absolutely no effect whatsoever on the entity driving the car, or how it is driven. However, if everyone energizes hostility toward the driver on the car for having 6-6-6, then that psychic energy from the observers of the number might have some effect upon the driver, and if the driver himself knew that his plates read 6-6-6, and knew that this was a negative quality, or negative number, just as negative name might be vilified, then the entity might have some subconscious tendency to be accident-prone or otherwise have some effect from the knowledge of the meaning of the numbers.

This Awareness indicates that it would be likened unto someone who bought vanity plates that said "Adolf Hitler." Would this entity be more accident-prone than the one whose vanity plates said "Andrew Johnson?" This Awareness indicates there is a good chance that the entity having vanity plates saying "Adolf Hitler" might be more accident-prone or might have other negative experiences. In fact, the entity might be stopped by the police more often than "Andrew Johnson," but the name itself, or the numbers, are only names and numbers.

It is what is attributed to them that really makes the difference; the attitude that is generated toward the numbers of names.

The Number 13: Why Hotels Have No 13th Floor

FOLLOW-UP QUESTION:)

Then that would also apply to the number 13? A number of hotels I understand don't have a 13th floor or they don't use 13 on the rooms for some reason.

COSMIC AWARENESS:

This is because many entities are superstitious and they do not want to live on or be on that floor, based on superstition. Therefore, why force your clientele to use a number that they are frightened of. Therefore, in order to rent all of the rooms, they would simply skip from 12 to 14, and avoid those concerns by some entities about being on the 13th floor.

This Awareness indicates it is all a matter of catering to people's mental states.

The Cosmic Laws of Cosmic Awareness

THE LAW OF DESCRIPTION

The *Law of Description* is that Law which serves as a tool for creative purposes. This is likened unto the paint brush of the artist, the chisel of the sculptor. Description is that which carves out images, creates boundaries, creates shapes and forms, creates limitations, creates confinement. *The Law of Description* knows no morality. *The Law of Description* is capable of creating anything for any entity. This relates unto the *Law of Magic* in that anything described is on its course toward creating a manifestation to the degree of impact on its description. The nature of that manifestation depends upon the intensity of the collective or disruptive energies involved.

BY KEEFE FOR THE DENVER POST

"TROOP STRENGTH IS WORSE THAN WE THOUGHT...
JENKING THERE WAS CALLED INTO ACTIVE DUTY FROM THE SALVATION ARMY."

A GENEROUS BEING IS ACCUSED OF "BUYING FRIENDSHIP"

QUESTION:

A question from JD in New York. She writes: "It seems to be my strong natural impulse to share with others, to help them out, to buy them things they can't seem to afford. I carry treats for any pets I expect to meet, sweets and toys for children and so forth. Recently I was informed that the opinion had been expressed that I was in fact "trying to buy friends." Also, I have experienced resentment because I was in a position to be generous to others. I am by nature direct and spontaneous. Must I suppress and moderate this impulse in order to avoid such mean-spirited reactions from some folks?"

COSMIC AWARENESS:

This Awareness indicates that this is a very unfortunate reading of your intentions that some entities might have. This Awareness indicates that you can always suggest that if they do not want your help or assistance that it can be passed on to someone else, and you can also suggest that you have heard their complaint and their dissatisfaction and you apologize for having given them this gift, and will refrain from doing another similar in the future.

This Awareness indicates that it is important that you give where your gift is appreciated, and you can also refer to these entities that you did not intend to offend them by giving gifts to them, and if it is a gift to someone, and someone else objects that you are trying to buy that person's affection, you can simply assume that the critic was jealous and offended because you gave something to someone else. This Awareness indicates in this case, there is no need to worry yourself about such pettiness.

This Awareness indicates that your best approach to such criticisms is to confront the criticism directly and do so in a manner that is very courteous and polite, even to the point of being apologetic, but doing it in such a way that they feel themselves to be the fool for having criticized you. This Awareness indicates that it will help them to reflect on their own misreading of your intentions.

This Awareness indicates the purpose is not to be vengeful or express your debility, but to help them discover something about themselves, and to balance out the energies so that no hard feelings continue between them and you. This Awareness indicates that also in some situations, what you hear that others have said may not always be accurate. It may just be rumor and distorted information coming back to you. Therefore, by confronting it with the entity, you may clarify the distortions and get things back into proper communication levels.

This Awareness indicates this correspondence lesson as dealing with the nature of the organism as it begins to take on attachments and identifications. This Awareness indicates this also relates unto territorial claims.

This Awareness indicates the part, the particle, entity, the beginning of life, the child, the individuality, whatever level is being discussed in terms of the self of any particular part of consciousness, this does within each micro-moment have within its power the opportunity to attach itself to something other than itself—to expand its identifications from what it conceives itself to be into something slightly more.

This Awareness indicates that in this manner certain small plants, small micro-organisms or other creatures of larger sizes, including the individual, do find themselves moving into attachments toward those forces, objects, items, or areas around and about themselves and latching onto these, either through the use of their physical graspers (those tools which are capable of grasping, such as roots, claws, hands, feelers, or other such forms of attachments, as well as those grasping mechanisms that are not physical, such as psychic attachments, emotional attachments, and feeling attachments).

This Awareness indicated that as the organism attaches itself to another object, another concept, another identification, it creates the feeling of ownership, of being one with that object, that territory, that energy field upon which it has placed its roots, its holding action. This Awareness indicates in this manner the organism begins to extend itself into being something more than it was. That the organism in essence is beginning to grow and to build upon that which it has previously perceived as being something other than itself. This Awareness indicates that in this manner the entity begins to become part of the possession which he possesses.

The possession begins to possess the entity and the entity becomes the possession as well as his previous experience.

This Awareness indicates that wherein the experience of an entity is expanded to include one's possessions, one's attachments, one's identifications, this creates the necessity (the seeming necessity) to defend one's possessions as well as one's self against the outside world, against the universe outside.

This Awareness indicates that all of this is based on the concept that the entity is separate from the rest of the universe, yet in the action of moving toward building and possessing some other attachment outside of self, there is that movement back toward the unit, back toward the oneness, back toward the integration of the self with the rest of consciousness.

This Awareness indicates that as this begins to grow, to build, and the attachment to one object is well established, then the entity begins to move as a unit with that object, with that concept, and can then become involved in further attachment to other concepts or other objects or other territories.

This Awareness indicates that wherein these attachments come easy and are easily made, the entity finding the joy of pursuit becoming such that there is little effort in the pursuit, little struggle in the pursuit but simply the desire to possess and the ability to possess without enjoyment of the chase, without the enjoyment of the pursuit—this does create the feeling of greed wherein the entity of the object wishes to possess more and more and more, not so much for the ownership of those items, but in search of a way in which the entity gathering

those items or objects or concepts or territories can enjoy the pursuit and conquest, the struggle to achieve, the struggle to possess.

This Awareness indicates this struggle is that which the entity seeks, not so much the attainment, but the struggle. Therefore the entity can become more and more obsessed with pursuing that which is unattainable, pursuing that which is extremely difficult to achieve, and in this action of pursuit, the entity can indeed develop those concepts of greed, and the greed concept can cause that entity to expand into more and more identifications without ever having much respect for any of the items, territories, concepts, information, other entities, or other forms of attachments to which the entity has moved his or her being upon and has gathered unto himself.

This Awareness indicates that wherein entities move in a more orderly direction, building carefully with great attention and respect—gathering unto themselves those attachments, yet examining carefully and closely those things, those territories, those ideas, those concepts, those other organisms and other entities—wherein these are gathered with great care, respect, and attention in a manner that recognizes there is no real possession of anything, there is only consciousness that perceives, there is only the respect of part for part, of entity for entity.

This alternative attitude toward possession is that which allows entities the possibility of remaining integrated with the universe as they move from the cosmic awareness level into particular areas of involvement in matters of spiritual relationships.

This Awareness indicates that entities can move into particular areas of time and space while still holding that attitude of respect. In this manner, the poet can look at a grain of sand and see the universe within. The scientist can look at the universe and see it as a grain of sand.

This Awareness indicates that the action of respect, looking twice as deeply at that which "Is" and being attached but not caught up in the attachment, being part of the action but not being such that one must grasp, cling, and rape those areas and territories, concepts, and other forces around oneself -- this is that which allows entities to enjoy the involvement in the form, in the land of the Magi-nation.

This Awareness indicates that in relation to the individual moving from moment to moment, there is the action wherein the individual has within each moment the opportunity for finding something which can be added unto his or her own experience, and the addition of this or that object, concept, experience, relationship, or feeling to the entity is that which does begin to serve as an enrichment to the soul - or, if not properly needed, can become but an aspect of greed overlaid upon the body, upon the mind, upon the soul of the entity in such a level as to cause the entity to feel overburdened by too much experience, too much possession, too much involvement.

This Awareness indicates that entities must be aware and careful and watch closely what they bring into their own life, into their experience, what they attach to themselves, what they allow to attach to themselves - for there are many forces in the universe which can be likened unto leeches and these can be in either physical levels, emotional levels, conceptual levels, or may be feeling levels.

These forces which can attach to entities can sap their life from them, can sap their energies from them.

This Awareness indicates that wherein entities are very aware of the things they allow into their lives, and wherein they take within their experience only those

things which are necessary, which are essential to their actions, these entities shall have much greater freedom in their purpose and direction, in their pursuit of life, liberty, and happiness.

This Awareness indicates that wherein entities become concerned with the concept of ownership, of possession, and begin grabbing everything they can grab hold of in order to anchor themselves into the physical world, in order to assure that they are real, in order to anchor themselves into levels of the intellectual world - grabbing one concept after another, stuffing their life full of ideas... stuffing their life full of information, stuffing their life full of social relationships which are but of a depleting nature... stuffing their life full of one thing or another, one activity after another, and one concept after another, one belief after another. Wherein this occurs with entities and they simply fill up all of the empty space which exists within themselves, then there is no room for further movement.

This Awareness wishes entities to understand the value of eternal unfulfillment, for wherein entities are unfulfilled, there is the possibility for moving into the next moment. Yet wherein entities are fulfilled in any moment, there can be no further moment.

This Awareness suggests that all entities must learn to keep an area open within their lives, to create vacuums within their lives, to create those areas wherein they lack, wherein there is an emptiness, wherein there is a loneliness, wherein there is that which needs to be filled, and in keeping this area open, then being very selective about what you wish to fill that area with, and in filling that area, this Awareness suggests it be filled with those things which are essential, which are of the utmost, which are of the level of essence, which are of the highest for your personal needs and growth at any particular moment. And once that area is filled, this Awareness suggests you empty another area in order to keep an area of your lifestyle open for further growth.

This Awareness indicates that in this manner, the action of intake and releasing (even as a fish takes in water and releases it through its gills)- this allows entities to continue living and moving through time and space, from moment to moment in the here and now. The action of taking in without releasing does indeed become a heavy load with much gravity, much mass - and that gravity can lead quickly to the grave.

This Awareness asks that entities learn to lighten themselves and allow that which they need not grasp onto at any particular moment, allow that to be where it is, to be used when it is necessary, but not needing to grasp onto everything which may someday be useful.

This Awareness suggests that in this New Age which is coming, items which are rarely used shall be communal property made available to entities through an agreement by those of the community - that these tools, items, objects, books, or forms of material which can be placed into storage and shared may, indeed, be communal property - used when necessary, used according to the demand and need, but wherein entities need not feel the necessity to possess every item which may someday be useful or needed.

This Awareness suggests that as entities begin to pool their territorial claims, items, their concepts, their ideas (allowing each other to use these things), then the problem of identification shall not become an anchor around the neck of the individuals, and individuals shall find greater freedom. For it is not necessary that you have everything; it is only necessary that you be allowed to use that when it is needed.

This Awareness suggests this as the completion of the second correspondence lesson.

(The Law of Gratitude is given.)

Excerpt CAC Reading 2-4-18-95 Paul Shockley Interpreter

WHY AMERICA MUST DECLARE A WAR EVERY TWO YEARS

(The Real Truth About Washington D.C.)

QUESTION:

A couple of questions from Eva Martin in Honolulu. She writes: "I just watched a debate on C-SPAN regarding legislation that will "save" Washington D.C. from financial collapse. I have two questions for Awareness. One): Is this financial bail-out package actually a takeover of the District of Columbia, a foreign nation in our midst?, and Two): is D.C. being bought by the United States of America?"

COSMIC AWARENESS:

This Awareness indicates that the ten acres known as Washington D.C., are not part of the United States. The United States, the multiple states that are united, are a separate country from Washington D.C., the ten acres of offshore space that holds the government and regulatory powers of the corporation that has been set up independently from the states.

Washington D.C. is a Foreign Power and Not a State

Therefore, as Washington D.C. is not a state, and is a separate foreign power and the Congress and government in that district are separate, the role of the government in Washington D.C. should be focused on the ten acres, rather than on the states that are a separate country.

Therefore, the government, the Federal Government should have jurisdiction over the area known as Washington D.C., except for the fact that the Federal government was not set up as a government of Washington D.C., but was simply allowed to reside in Washington D.C. and serve the people of the states through the corporation known as the Federal Government, which was hired to work for the states as a governing body representing the states and the will of the people in those states.

This Awareness indicates that by becoming a control factor in the area of Washington D.C., they have essentially begun a governmental takeover of that area, taking control away from the mayor of the city, infringing into the politics and economics of the city as though it was under their control. If this has not been part of an agreement between the citizens or people of Washington

D.C. and the Federal Government, then there is a conflict and dispute which needs to be addressed.

This Awareness does not see that the people of Washington D.C. have reached such an agreement in terms of a majority. There may have been certain individuals in Washington D.C. who have made such an agreement, but these agreements may not yet be authorized. This will depend on what the governing system in Washington D.C. is, in regard to how it authorizes agreements with foreign bodies and corporations, for the Federal Government is a corporation, even to those who live in Washington D.C., and it is a foreign corporation at that!

A Parallel Example to Help Explain This

This Awareness suggests a parallel be understood. Supposing you live in a state and your state government appears to be ineffective in its way of dealing with various counties of the state, so your state or county governments decide to incorporate an organization that helps to go through the bookkeeping problems of the various counties, go through the highway and infrastructure of the counties, evaluating the building codes, evaluating also the various programs that the counties initiate such as schooling, housing and so forth, and this corporation evaluates the hospital plans, medical plans and economics of each county, and this corporation is simply hired to do business work or evaluation for the counties.

The counties all decide to let the corporation do their work, just as when businesses hire corporations to do their taxing or bookkeeping, their finances and so forth. At some point these counties find that this corporation they have hired to do certain parts of their work has overstepped its activities and is dictating laws and rules for the counties to the point where it is taking away the powers of the counties which the counties have not given to the corporation.

At some point, then counties then begin to recognize that the corporation is even ordering them to spend their money, forcing them to spend money on things that the counties cannot afford, forcing them to put in better highways, to put in better environmental controls, and controls, et cetera. The counties are not equipped to do this. They simply cannot get that much in taxing the people to obey these corporation laws and directives. At some point the counties may decide, "We've had enough! We no longer wish to participate in the use of the corporation in running our county! We no longer need it funding or directives or laws! We want our freedom back to run the county the way we wish, the way we did before the corporation was formed!"

This Awareness indicates this is a parallel to that which is happening today in regards to the states and Federal Government. More than ten of these states have now become sovereign states, divorcing themselves from the Federal Government, seeking to have their own sovereignty back.

This Awareness indicates that there are many in Washington D.C. elected from the various states to Congress, to the Senate, who are arguing that the Federal Government, creating mandates for states, directing states to do certain things which the states do not have the money for but which they are ordered to do because the Federal Government has so ordered them; these representatives are working against the Federal mandates to give the states the rights to choose what they wish to fund, rather than to follow the orders of the Federal government.

In the Past the States Had Control Over the Federal Government

It is changing the nature of the game which has been creeping up for some time on the states, giving the impression that the Federal Government was in charge over the states, which is not the

18 case. In the past, the state had control of the Federal Government. The Federal Government was simply a servant of the states, working for the states and the people of the states, to carry out actions that the states wanted carried out through a kind of coordinating body.

This Awareness indicates that this is what many of these states who are now declaring themselves sovereign are now wishing to promote. When 38 of these states have declared themselves sovereign it will turn the clock back to where the Constitution again has power over the Federal Government. At present however, there is a power that has been taken from the states and from the Constitution by use of what is termed Admiralty Law that comes from the Martial Law situations that have been declared during wartime.

Martial Law or Admiralty Law Effective Only In War Times

Martial Law or Admiralty Law is only effective during wartime. For this reason the Federal Government continues to declare war every two years. Sometimes it is an innocuous war such as the war on poverty, or it may be a war on crime, or a war on drugs, or some other mini-war excuse to keep the Admiralty and Martial Law effective. When these are effective, the statutory laws that are created during such wartime activities or wartime situations, can take precedence over the Constitution as emergency factors.

This Awareness indicates the time is growing short for these Admiralty and maritime war programs, and more and more entities are saying "Let's get back to the Constitution! Let's stop these silly wars that keep us from having our Constitutional Rights." This Awareness indicates that this is essentially the situation at this time.

The Federal Government is trying to shore up its control and power, to make itself more powerful over the masses, over the states, and the people are gradually awakening, and the states are gradually awakening to reassert themselves and to gain back the Constitutional Laws and freedoms guaranteed by the Constitution, and are trying to set aside the Martial and Admiralty Law which has governed this country since 1933 and prior to that since the Civil War, for Lincoln, during his administration, called upon Admiralty and Martial Law factors and was assassinated before the war ended, or before he had the opportunity to cancel the Admiralty Law and Martial Law status.

Will the U.S. Have a New Capital?

QUESTION:

One other question from Eva Martin. "Will the United States of America have a new capitol? I remember reading a prediction by a psychic, maybe Cayce, that a city in the mid-West: Chicago or Saint Louis, will be the new capitol of the United States of America. What does Awareness see?"

COSMIC AWARENESS:

This Awareness does not see this occurring, as long as the shoreline on the Atlantic Ocean remains solid. If there were earthquakes in that area, then the possibility of creating a different place for the United States capitol could become a possibility.

This Awareness indicates that this appears to have been from a book written in the Sixties, suggesting that the capitol would be moved to Kansas. This Awareness does not see this as being valid. This was to have occurred in the 1980's or thereabout.

Prophecies and Disinformation Today

(Holograms and Mother Mary Trotting in the Sky)

More on the Vibrational Changes Now Beginning

QUESTION:

A question from Lillian Boothe, Clarksdale, AZ. She writes: "I just finished viewing two hours of Ancient Prophecies II, on NBC. There seems to be a number of people having visions of the future, and it is all about violence, natural and human; war, disease and total destruction of the planet.

"Now, I realize we are immortal in the sense that if we lose our physical bodies we are still "alive", but nowhere in this documentary is there anything about ETs and UFOs. The I AM map-maker was interviewed, and it shows Washington, Oregon, California, Nevada and lots of Arizona out of business, gone! I'm wondering if this news will create panic in the Western states.

"I have a friend who is clairvoyant, plus all the other attributes that makes her a minister, healer, teacher and psychic, and when I asked her how she liked the election, she made the comment that it might be the last one. I asked her what she meant by this and she said she doesn't know except she feels something very terrible will take place before two years and election time again.

"My question is: Are we being fed holograms to excite the natives (such as Mother Mary walking around on top of churches, et cetera) and could our dreams and visions be holograms? In one of my dreams recently, a person entered my dream, switched off a switch and said it was over. And in the dream, I knew the dream had been a hologram. (In the dream I knew I was dreaming).

"In the TV production it was made clear that we have five years until melt-down. There are so many of us here as volunteers for this special time, so is it our mission to get everyone we can to wake up? Or is everyone so desperate to survive that other options or scenarios are only clogging up the plumbing?

"Out of all the information I've passed on to my friends and family, only one friend acknowledged receiving the mailing."

She goes on and on, but I think essentially, the question relating to these prophecies and the basic question: "Are we being fed holograms to excite the natives (as she says)? Such things as Mother Mary walking around and all these things you read about and these dire predictions.

COSMIC AWARENESS:

This Awareness indicates there is an enormous amount of misinformation being spread about in the world today. There is a considerable amount of distortion, outright fakery occurring in some circumstances. For example, some pictures given in some tabloids are totally fake, made by computers that are capable of morphing or taking a picture and causing it to blend with another picture so that you get some kind of image that is not at all truthful.

This Awareness indicates for example, the picture of Satan in the clouds or smoke over Waco, or in another tabloid-type picture showing Jesus over the lake where the two young boys were drowned; this kind of fakery is very common. It is easy to do, and many entities believe it because they are not familiar with the technology available for creating such fakery.

What "The End Of Time" Really Means

This Awareness indicates the same may be said of the so-called hologram projections. This Awareness indicates that *It* wishes to inform entities however, that the so-called "end of time" is not what many expect. It is not as though everything is coming to an abrupt end, but everything is coming to a state of great change, and this

may be considered as the end of the world as you know it.

This Awareness indicates that vibrations will change, but they will change in a way so that entities are able to change with the vibrations, so they will have gradual change, and may not even recognize how great the changes are until they have moved far enough ahead to be able to look back, and in looking back, realize how greatly things are different from what they used to be.

This Awareness indicates that the frequency changes that are coming for entities, which move them into higher more etheric experiences, are that which entities will accept without that much trauma, and therefore, they will not really see a great problem. They will simply become more sensitive and more aware of different kinds of perception. They will become more psychic, more sensitive and more spiritual and they will realize that they have abilities they did not have before.

It is not as though they suddenly die and are reborn into new bodies or new forms. It is more likened unto things gradually fading away and new things emerging into reality, but in the process of several years, reality will undergo considerable change and the new reality will bring about a new world, a new age, a new situation for entities, and the old ways will fade away.

Entities who find it difficult to move toward the new because they are holding onto the old will be the ones who suffer the most. They may be jerked into the new reality by some undesirable force that does not allow them to linger in the old or forces them to break totally from the future and revert into the old in a way that is most painful for them, but it will be their own doing that holds them back, if they cannot let go of the old ways.

The Scallion "I AM" Map of the U.S.

(More on the Predicted Pole Shift)

FOLLOW-UP (AVATON):

I believe we published some information on that so-called I AM map she mentioned; that it was basically a scam and a money-making proposition rather than any kind of valid prediction, but yet ...

COSMIC AWARENESS (INTERRUPTING):

This Awareness does not wish to classify this as a scam. A scam is seen as something that is deliberately created to defraud entities. This Awareness indicates the I AM map as that which sincerely is being promoted by entities who believe in what is given. This Awareness simply does not recognize the polar shift or other geophysical crises that will create the devastation described and resulting in this map.

This Awareness indicates the map would put the ocean into areas near the central part of the United States. It would totally shift areas of land into water. This Awareness does not see this as occurring. *It* sees it only as a remote possibility. It would be a possibility if there were some artificial activities designed to destroy portions of the United States.

This Awareness indicates of course, the maps and booklets promoting this concept are making money for those who promote it, but this Awareness does not see these entities as deliberately defrauding the public. They are simply experiencing or channeling this information according to their sincere efforts of promoting what they believe to be as truth.

This Awareness indicates there are many ways whereby entities can be misled or fooled into believing something and then promoting it to others from a state of sincerity. This Awareness suggests you continue your statement or question.

AVATON:

I forget what it was now. But a lot of our members seem to hang on every word this entity Gordon Scallion

puts out. He puts out an earthquake type newsletter, but he's been so highly discredited so many times by making these dire predictions that never occur; I think the latest one was last summer, and I believe he's connected to this map also.

COSMIC AWARENESS:

This is in the affirmative.

AVATON:

My question then is: Why do people keep promoting this entity's map when he's been discredited so often?

COSMIC AWARENESS:

This Awareness indicates he was accurate on several predictions earlier, and entities were impressed by these early predictions. This Awareness indicates it is likened unto having a sports team that begins to have a streak of winning, and entities rally around the winning streak and that team and find it difficult to give up on the team simply because the team begins a losing streak.

Entities want something to believe in. They want prophets that can give information without error, but if the information is given without error a few times it becomes forgivable if mistakes are made later. This Awareness indicates it is also the same with messages channeled through this Interpreter. When errors occur, entities can forgive those errors if earlier and occasional subsequent messages are correct.

Why Predicting the Future Is So Difficult

This Awareness indicates that it is very difficult to predict events of the future because the future is always free to change. Consciousness can change, and in changing may change the future or may change events that had been predicted. The predictions may have been accurate according to the energies at the time, but if consciousness changes, or if certain actions are taken that affect certain areas of consciousness, it may have an effect of changing the future.

This Awareness indicates just to give a kind of example, supposing there are devices that emit frequencies or sound waves that can trigger earthquakes and supposing entities have been able to either find out about these frequencies, recognize some kind of pattern regarding these frequencies, or get a tip from information from a psychic or some personal source that indicates these frequencies are in effect and an earthquake is imminent. Now, supposing that this entity releases this information to the public, and the earthquake appears on time, according to the prediction, and supposing the same energies repeat and another prediction is made, but this time, the forces that were preparing to trigger the earthquake come across some new situation and decide that it would be difficult or hazardous to the economy at present to have an earthquake and it would be better to put the earthquake off until other economic conditions have been brought under control.

So, rather than causing the earthquake at this time, they decide not to produce the earthquake, and the time comes and goes. This Awareness indicates that the entity who has predicted the earthquake based on either psychic or physical evidence is in error, because the earthquake did not occur.

This Awareness indicates that people will cease to pay attention to this channel, but many of the people will continue trusting the channel and saying "Well, what happened? No earthquake!", and the prognosticator says "Well, it's been delayed. It will occur later!" and thus, the entity may make another prediction, and the masses may wait for the new earthquake to occur.

It is not that one mistake ends the career of a prognosticator. If it becomes continuous and repeated, then entities will forsake the faith in the prognosticator, just as when a sports team begins a losing streak that doesn't

1/24/85 The Providence Journal, Providence, Rhode Island

"THIS LAND IS OUR LAND..."

stop, or when it becomes sporadic, they begin to lose interest in following their games or adventures or efforts.

This Awareness indicates that there were quite a number of predictions that were impressive in the early expressions of Scallion. This Awareness indicates that these have not been so accurate in recent times. This Awareness indicates it is not so much the fault of Scallion as the fact that the future isn't fixed, and just when you think you have a method of accurate predictions, something changes, and the future veers off and totally wipes out the method of prediction, and the entity's accuracy drops.

This Awareness indicates this is especially correct when natural cycles are not behind the predictive circumstance. It is especially a problem when some kind of mind force or entities are causing the predicted results, and these minds or mind-force energies change their mind and decide on something different in terms of timing or in terms of approach, particularly if the method of creating circumstances is not well known to the public.

In other words, supposing an entity has the apparatus for causing earthquakes. The masses do not know this. The entity creates a pattern. Someone catches on to the pattern, or someone begins to pick up psychically on a future earthquake based on the energies that have been emanating, but just before the earthquake is to occur and after the psychic has given his message regarding the earthquake, his warning, suddenly the perpetrator has a change of heart or a change of mind, and switches everything around at the last minute, causing the earthquake not to occur as scheduled.

This is the area that is extremely difficult for prognosticators. It is likened unto the weather man trying to give weather reports when someone is up there messing with the wind currents or the entity is up there seeding clouds to force rain while the weather forecaster has evidence of clear weather for the next so many hours or days.

--HOW TO GET THIS NEWSLETTER BY MAIL-- EVERY 4 WEEKS ! (More or Less)

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will all be asked at the Passing Over).

MEMBERSHIPS AVAILABLE (Honor System!)

INDIVIDUAL: \$42 per year or \$12 quarterly
 FAMILY: \$52 per year or \$20 quarterly
 CONTRIBUTING: \$77 per year or \$25 quarterly
 SPONSORING: \$144 per year or \$40 per quarter
 BENEFACTOR: \$500 per year or \$150 per quarter
 PATRON: \$1000 per year or \$250 per quarter
 ANGEL: \$5000 per year or \$1500 per quarter
 LIMITED INCOME: \$30 PER YEAR OR \$9.00 QUARTERLY
