Excerpt CAC Reading 1-17-06 Will Berlinghof Interpreter

THE END OF THE MAYAN CALENDAR AND WHAT IT MEANS TO US AT THIS TIME (MORE ON THE END TIMES)

QUESTION:

Where do we stand in terms of the Mayan calendar predictions regarding these times?

COSMIC AWARENESS:

This Awareness indicates the Mayan calendar was an enlightened document written in stone. It was the product of a race of enlightened beings, who themselves were in touch with higher levels of consciousness, higher levels of awareness, who channeled the information from those sources of consciousness that were also beyond the norm.

This consciousness, this Cosmic Awareness spoke often to the Mayans and the Zero chiefs; the Zero chiefs being those leaders of the Mayan people, those spiritual leaders, those spiritual seekers and searchers for the ultimate truth. They went deeply to the place within and the places beyond, seeking out this Awareness, seeking to hear the message this Awareness had for those seekers and for those people.

This Awareness spoke the predictions and gave a time frame and gave the formulas upon which to base the Mayan calendar's predictions. This was information pertinent to the Zero chiefs of the Mayan people. It was given as a grand design for the movement of consciousness in the human form on this, the planet earth. It was given as a framework and a timeline to understand and see that nothing is finite and indefinite, forever.

This Awareness indicates even that which is seen as without an end does indeed have what could be called an ending. The ending is simply a cessation, and ending to that which is; a death to the old order of things, the old way of things, so that a birth can occur into a new way of things, a new order of things. This new order is not to be confused with the new order spoken by those agents of darkness, of repression, that would hold back the human experience, that would hold back human consciousness.

A Cosmic Document of Staggering Proportions

This Awareness spoke often to the Zero chiefs, and over many years formulated the Mayan calendar and correlated its actions with the actions of the earth, the actions of the sun, the actions of the moon. This is truly a cosmic document of staggering proportions, a document little understood or perceived by those who had no understanding or were in ignorance of the truest message that the Zero chiefs left the Mayan people when they strayed and refused to come back to the ways governed by the Zero chiefs for the people. The Zero chiefs left when sacrifice was begun by the Mayans; not human sacrifice, for the Mayan people never engaged in human sacrifice, but they did begin to use animals. They did stray from the path, despite the warnings and despite the teachings of the Zero Chiefs.

This Awareness indicates this too was predicted in that document known as the Mayan calendar. This too was seen as a sliding in to the dark night of the soul, and it was at that time that the Mayan Zero chiefs left the Mayan people and began their wanderings to those lands north of that which was the traditional region of the Mayans. Some of the Mayan people who stayed true to the original teachings left with the Zero chiefs, and found new lands and new peoples to live with, and those

that did not go, who strayed and took up those new ways eventually faded away, were conquered by other tribes, other peoples, and were lost to history.

Not All Mayan People Ascended to a Higher Plane

This is that time when it is *erroneously* believed that all of the Mayan people ascended to a higher plane of consciousness. This is not so. Some had understood and experienced the ascension, had left the lower planes of existence for higher planes of existence; that this is true for some of the Mayan people, but not those who stayed behind, not those who deviated from that path, the path of righteousness, the path of truth, honor, respect and love.

This Awareness indicates many of the Zero chiefs did indeed know the secrets of ascension and did indeed themselves ascend when they wished to, when it was their time. Many of the people who left with them also did ascend when it was their choice and their time, but it was not all of the Mayan people that did so. However, it is from this tradition and this legend of those who did ascend that the whole legend or myth, rather, of the Mayans ascending came from.

The Mayan calendar as a document, also foresaw the times that we are in now, the planet that humanity is in now. This Awareness suggests that a further count is given to help the Interpreter to go even deeper at this time.

(A Count of 12 backwards is given)

COSMIC AWARENESS:

This Awareness asks that the original question be reread.

QUESTION:

Where do we stand in terms of the Mayan calendar predictions regarding these times?

COSMIC AWARENESS:

This Awareness suggests that according to the Mayan calendar, that these times are the end times; that the last glyph of the Mayan calendar is now being opened. These are indeed the end times, and that humanity stands on the very threshold of tremendous changes, profound endings and profound beginnings. But just as the Zero chiefs once left the people because they had fallen away and fallen into the evil of those dark agents, that again a leaving of sorts is once again on the horizon. In this case, it is more than just the splitting up of one race of people, splitting up of the Mayans between those who chose to follow the Light and the teachings of their spiritual leaders, their Zero chiefs, versus those who sought other darker ways.

A Division of Humanity is About to Occur

In this instance and at this time, it is a division of humanity itself that is about to occur. This Awareness indicates that many are being called into the Light and into Spirit; that many are responding, that many are taking the steps away from old beliefs, old traditions, old ways of life; that many are following the modern Zero chiefs, those speakers of truth, those masters who have come back unto this plane at this time to help many cross over. This is not talking about death as the crossing over from physical life back into the spirit realm; that this crossing over is in reference to the stepping out of the old dimensional reality, the third dimensional reality that has been the base for many and many humans, for many, many, many generations.

Our Planet is Moving Into the Dreamscape Level

This Awareness indicates it is the stepping into the higher vibrational dimensional levels, in particular the upper fourth and fifth dimensional levels, that which is often referred to as the Dreamscape. This planet is about to evolve and spring forth into that higher dimensional level of reality known as the Dreamscape, the fifth dimensional level. Not all will make this journey. Many will stay, immersed in third-dimensional reality, unwilling and unable to cross the dimensional gap, the rift. The time frame given by the Mayan calendar for these times is accurate and is in alignment to the events occurring on this planet at this time.

Those who would not and cannot make the changes of belief, cannot question their conditioning, who refuse to look deeper into spiritual matters and spiritual issues will continue on in an existence of third-dimensional proportions, because such is their destiny. Such is their challenge. There are many who are not ready to move into higher realities, higher freedom. One can understand that there are many young souls on this planet who have yet to experience an evolutionary journey in consciousness, who are simply beginning the journey, so it is right for them to go deeper into the density of matter as the third dimension collapses in on itself, becoming even denser, even thicker.

The Splitting of Two Planets—The Rainbow Bridge Prophecy

This is a story to be told at another time, but to understand and honor those who will not make that dimensional shift, who will not move forward and inward and upwards to those higher states of consciousness, those higher dimensional realities; that this has been known and been called the Rainbow Bridges Prophecies; the splitting of the two planets, that which right now intersect each other, but are now in the last stages of separation. The two planet earths that exist and coexist at this time are on two separate dimensional frequencies, thus, do not actually intersect each other in any physical way, but that the tremors can be felt as these two planets separate, and it is this separation that is triggering many of the earth changes that are now occurring, especially through physical and geophysical structures.

Don't Get Upset but be Prepared For The Changes Coming

This Awareness sees that this is something that is starting to happen more and more as the Mayan calendar's predictions become stronger and stronger; that this is a time of quickening; a quickening of time, a quickening of events, and this Awareness suggests that people prepare themselves for the changes that are coming, but that people also do not become too upset, immersed in fear or panic, for to do so will call that energy into your life and will cause negative experiencings (sic) of these times of changes.

This Awareness suggests that what is the most appropriate would be to always focus on the highest vibration, the inner light as well as the outer light; to stay positive and focused on a higher truth, the higher reality being the norm as opposed to focusing on the fear, the confusion, the panic, the terror that could soon possibly be experienced if one went into the negative state of mind, if one gave into the experiences of a negative nature that are happening and will happen with even greater frequency.

This Awareness indicates that if there are other questions to please present them at this time.

What's The Exact Date of Calendar's End?

QUESTION:

Is the end date of the Mayan calendar, 12-21-2012 true and accurate?

COSMIC AWARENESS:

This Awareness sees and suggests that the end date of December 21st, 2012 is not entirely accurate. There have been many changes in the calculations of time throughout the centuries and millennia since the Mayan calendar was first formulated. The Mayan calendar, although a precise document and a formula for estimating the different time frames, is an incredible accurate document. The time measurement known as the Gregorian calendar and other methods that have been used to measure time are what is at fault.

It is not the Mayan calendar that is inaccurate, but rather the way that time is measured traditionally on this planet. The Mayan calendar, in a manner of speaking, was always on track. It is seen that the completion formerly known as the end of the Mayan calendar at 20-12, December the 21st, the Winter Solstice, is off by a little more than a year. There are other suggestions that the ending of the Mayan calendar will be done and complete in the year 2011, especially in or around October 28th.

This too is not exactly accurate, but is closer to the time of ending as predicted by the Mayan calendar. This is only a year and two months, less than two months, before the December 21st 2012 ending that is traditionally associated with the Mayan calendar. In some ways it does not matter, because with the quickening and with the changes and with the openings of human possibilities, and amazing events that are about to transpire, humanity will either be ready by 2012 to move on, or it will not, and it will remain on the collapsed earthly plane, the denser third dimension; that which will be if there is no change for those who stay here.

This Awareness suggests that everyone focus on expanding their consciousness of living a greater spiritual truth that is their life, as a way of preparing for the ending that is coming within the next few years, but this Awareness says again that it is no matter whether the ending happens on December 21st, 2012, or October 28th, 2011, for an ending is coming, a change in human consciousness is rapidly proceeding on course as outlined by the Mayan calendar. It is mankind's desperate need at this time to understand and recognize that such a change is coming.

"The Times They Are a Changing"

Of course, not everyone is prepared or willing to go through such change, but those who are spiritual seekers need to see now how imperative it is to live the spiritual truths that they are becoming more and more aware of, how imperative it is to prepare for the changes that are coming, that have already become, that are in alignment to the predictions made by the Mayan calendar for these times. That is what is important. That is what needs to be focused on.

The times they are a changing, as the song goes. The times they are a changing.

This Awareness indicates the completion of this question.

Health Hints From Personal Readings

(Never Felt Well for Any Length of Time)

QUESTION:

I would like you to look me over and tell me what you see. Physically, I have never felt well for any length of time.

COSMIC AWARENESS:

This Awareness indicates this as a result in part to genetic inheritance, in part to certain astrological conditions in your horoscope, and in part to the environment of your childhood, particularly situations surrounding your birth and younger ages, wherein your energy level and self-esteem was hindered in its development. This Awareness indicates that during your childhood, the proper nourishment for your own self-esteem was lacking, that certain other nourishment in terms of diet was lacking, that nourishment in terms of the affection bestowed upon you was also lacking.

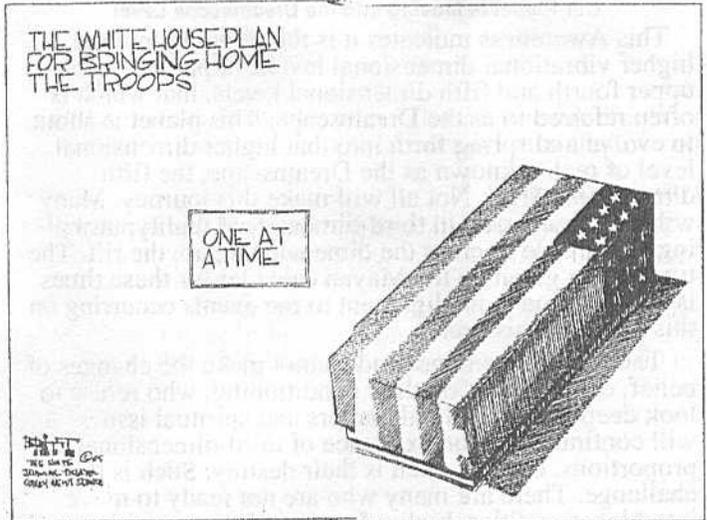

This Awareness indicates that as this was denied you in childhood, it is likened unto a karmic situation of your own inherited rights, whereby you yourself must provide yourself with the proper self-esteem, with the realization that you belong here and have as much right in living as happy and joyful as any other, that you also have the right to nourishment, health, and harmony in your life. This Awareness indicates that this cannot be expected from others by yourself, but must be determined within your own psyche, that you are a worthy person, worthy of this kind of happiness, harmony, health, and welfare in terms of financial well-being.

This Awareness indicates that in terms of your health, that your energy has long been affected by the misalignment of certain flows of energy, the odic force flowing through your system, this relating unto pressure points, unto acupressure or acupunctural points, whereby certain energies have not flowed properly. This Awareness indicates that much can be done to assist the flow of these energies through fasting, through exercise, through short-term diets, particularly those based upon the use of juices; that also sauna baths and massage can be beneficial. This Awareness indicates that a good naturopathic, chiropractic adjustment and treatment would also be of great benefit to you. This Awareness suggests that wherein the opportunity comes, that acupressure or acupunctural treatments can be of great benefit. This Awareness indicates that the use of nucleic acid, this either in itself or through the diet, as that which can be of great benefit. The use of garlic, cayenne, fruit pectin - these also as being of great benefit to you.

This Awareness suggests that wherein you can visualize nightly, your own energy field growing stronger and flowing more easily, this will be of great benefit. This Awareness suggests that you may spend some time meditating each day upon the feeling within your body of the energy flows, the areas wherein that energy appears to be blocked and not flowing in proper alignment. This Awareness suggests that in checking out the feelings of your own aura, that this can begin to assist in moving these energies properly.

An Exercise to Strengthen the Aura

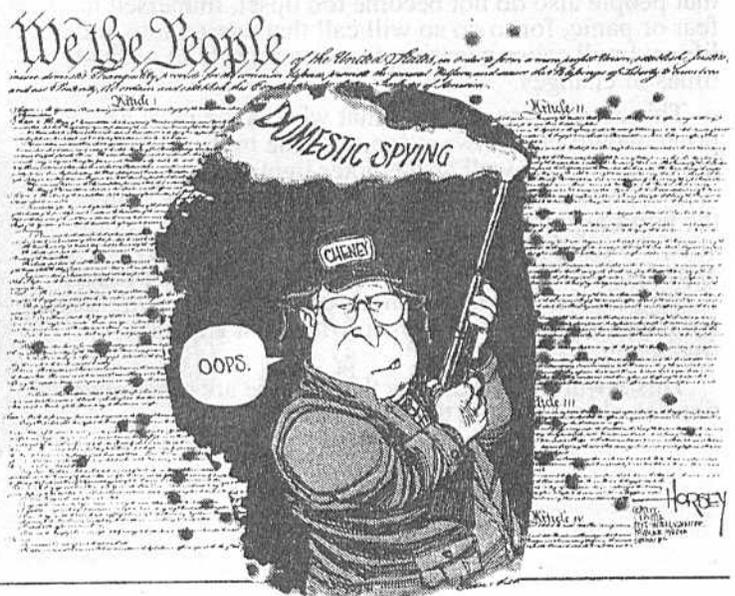

This Awareness suggests also that you may participate in the following exercise. This Awareness suggests that you stand in the center of a room wherein you have enough room to maneuver and reach your arms out in different directions. This Awareness suggests that then you begin to, through meditative action, to feel the extent of your aura. This Awareness suggests you close your eyes and feel the energy emanating from your

body, feel the energy emanating from your head, feel how far out this energy emanates. Feel also the energy emanating from your neck in different directions and the distance of this emanation. Feel the energy emanating from your chest forward and that distance, and behind you and to the side. Feel the energy emanating from the area of the stomach and hips in all directions and along the legs. This Awareness indicates that as you feel these energies emanating, that you then reach your hands out and touch those energies as they emanate outward; that in effect you massage the energies of your aura by reaching out, smoothing those energies; that you may also scratch the energies of the aura in all directions around and about yourself.

This Awareness indicates that this may be done while music is being played, particularly music which is of a harmonious nature. This Awareness indicates this will serve to assist in re-aligning the energy flow of your aura, of strengthening the aura, of exercising those energies. This Awareness indicates this has an effect similar to acupressure and acupuncture. This Awareness indicates in general, this will serve as an action to give greater strength and energy to your system.

This Awareness suggests the letter continue.

Health Hints From Personal Readings (How to Correct a Weight Gain)

QUESTION:

Would Awareness tell me how to go about correcting this weight gain I dislike?

COSMIC AWARENESS:

This Awareness indicates that much of this is psychological and relates to low self-esteem. That you must begin first to visualize what you want your life to be, seeing a vision of your highest hopes and dreams, and that you then begin to write down all of your best qualities, all of those qualities which you wish to see improved; that you then begin to write out a life plan as to where you are going to go with your life, this likened unto charting a course, as though you were a navigator plotting the course for a ship sailing through the sea of consciousness. This Awareness indicates once you have done this, the weight situation shall begin to change itself, due to a psychological change within your own consciousness which does not allow it to have a place in the course which you have charted.

This Awareness suggests that you not worry about your weight, that you simply take stock of your life, chart your course, put down your own descriptions of what you would like to be, where you would like to go, and how you may proceed in that direction. F770424PB

WISDOM OF AWARENESS:

ON SLEEPING

(If You Should Die in Your Sleep)

This Awareness suggests that entities falling asleep, envisioning the most beautiful scenes, the most beautiful experience they can imagine, shall not only guarantee that they shall have a good night's rest, these entities also promote a happier day which is more productive the next day, and in general may move their lives toward higher and more beautiful levels through the adjustment of attitude.

These entities are also guaranteeing themselves that if they should die in their sleep, they shall go to those places in consciousness which are similar to their ideals.

Be aware of that crucial time just before falling asleep.
(From Issue 78-9)

...From the Cosmic Laws of Cosmic Awareness

THE LAW OF MERCY

The Law of Mercy is that Law which allows one to forgive all error; to forgive equally those who err against you as you err against them. This is to be merciful. To be merciful is akin to the Law of Love, and if one obeys the Law of Mercy there can be no error in the world.

Does the Hierarchy and Disciples Stand Between One and God?

FOLLOW-UP QUESTION:

How about the notion she expresses here: "The idea that hierarchical initiates and disciples "stand between" one and God is an utter miscomprehension."

COSMIC AWARENESS:

This Awareness indicates that if one is seeking God and seeks God through a priest, through a minister or a guru, then that entity is standing between the individual and God. If the entity standing between the individual and God acts as a signpost pointing the way, then the entity is more or less trusting the signpost to be honest and accurate.

In most cases, this may be correct. There are some entities who do not want to trust the signpost. They just want to find the quickest way to the top of the mountain, to their destination. And for some entities, the quickest way is by surrendering themselves to God without the assistance or help of a guru, a teacher, a priest or a spiritual adept.

This Awareness indicates that it is simply a question of whether you want to go through someone, a mediator, or your path toward the Divine, or whether you feel the quickest way is through total surrender to the Divine and recognize there is no real difference except the barriers you put up yourself.

This Awareness indicates that for many entities, they cannot conceive of going directly to God through personal surrender to God. They feel they need to apply or request the help of someone they see as being connected to God, and therefore, they appeal to a mediator, whether it be a guru, a master, a spiritual hierarchy being, or a priest, or some knowledgeable friend on the path.

Catholics Will Seek Help From the Spiritual Hierarchy

This Awareness indicates that it is a matter of personal choice. In general, Catholics who have been conditioned to go through priests, to feel that their own efforts to reach God are meaningless without a mediator, these entities when changing into metaphysical efforts, will tend to seek the help of someone of a spiritual hierarchy or a guru, or other mediator.

This Awareness indicates that in the condition of Protestants, it is easier for them to simply pray directly to God or surrender directly to God than to seek the help of a mediator. This Awareness indicates that it is simply a matter of personal preference as to which way is most appropriate for you.

This Awareness indicates that many times, entities want the mediator involved because they can get assurance from the mediator that God has heard their prayer, or God recognizes them, whereas if they are simply on their own surrendering to the Divine, they may not have any real assurance that their contact has been satisfactory, or completed.

This Awareness indicates if they do have the sense of completion, they may wish something more tangible than the mere feeling of having made a contact with the Divine. They may want some other further evidence that a mediator could provide in the verbal acknowledgment that God has heard your prayer, God recognizes you, or something of this nature.

For many entities, the mediator's recognition of your effort to contact God and the mediator's assurances that you have been successful, are extremely important. This Awareness indicates for others, someone else's assur-

ances as a mediator are of little value, and the entity is only concerned with what he or she experiences in the effort to become one with God.

Some Require a Mediator and Some Do Not

This Awareness indicates one entity, in his or her effort to commune with the divine, may say: "I give myself to thee, oh Lord! Take me! Use me!" This Awareness indicates that entity may experience a union with the Divine, whereas another entity may prefer to say: "I give myself to thee, oh Lord. Take me and use me!" and not having a clear strong faith, may need the assurance from a mediator, someone who says: "God has heard your prayer, has heard your request. God accepts you. You are loved and God will guide you!"

This Awareness indicates that hearing these words from someone helps the entity to feel that it is real. And the entity may feel it is real when he or she might not otherwise feel the surrender to the Divine was even acknowledged by God. Therefore, both ways are beneficial, if they work for you. And if one is better than the other for you, then indeed use that method that is most suitable to yourself in helping you to sense the reality of the communication, of the communion with God.

To have someone say: "Yes! God loves you! God takes you as his own!" can be of great importance to some entities, and can give them the sense of completion in their pursuit of the Divine. Other entities do not need that reassurance from a mediator. They simply sense that when they have totally surrendered to the Divine, that God has experienced union with them. They have given themselves to God and God has received their frequency, their love, their soul, and has become One with them, because they have totally surrendered.

They sense it internally, without the assurance of anyone outside themselves.

"Ascended Masters"—Where Does Their Information Come From?

(Awareness Explains What the Spiritual Hierarchy Really Is)

FOLLOW-UP QUESTION:

Awareness, over the years we've asked many questions from people about so-called Ascended Masters, and Awareness consistently indicates that there isn't a lot of substance to these concepts and uses the example of conjuring up Philip, Saint Twinkle, and Mickey Mouse and so on, but yet, in the case of some like this Koot Hoomi, there are a number of books supposedly channeled from him, and today there are a number of books supposedly channeled from other Ascended Masters, which all seem consistent with their philosophy, if you can call it that, and the diction and so forth.

I still don't understand completely *where* this information is coming from, and given to these various people who write these books and claim to be channeling them.

COSMIC AWARENESS:

This Awareness indicates that *It* has indicated previously that these entities known as the spiritual hierarchy are personified replicas or personified symbols for certain vibratory frequencies in the electromagnetic scale. This Awareness suggests you visualize a universal hierarchy system of frequencies ranging from the Divine Creator down to the more gross frequencies that make up matter itself.

In between are other frequencies, ranging from light, sound, heat, mind, emotion, feeling and gamma rays and radio waves and individual frequencies, and on up toward the highest frequencies of Divinity Itself.

When the Frequency is Personified

In this hierarchy of the electromagnetic spectrum, there are places where energies cross and create fluxes of energy which are not the absolute highest, but may be far above the average entity's vibration, and these points in the electromagnetic scale are often given names as though they were angels or entities of a higher frequency.

This Awareness indicates that by personifying such a frequency as deserving a name, whether it be Koot Hoomi or some Saint Twinkle or whatever, entities who tap into that frequency may be able to attune to the vibration of that particular frequency and channel information that is above the norm, because the frequency is above the norm.

This Awareness indicates that the entity may put a name on that frequency calling it Koot Hoomi or Dofu or Goduri or whatever. It matters not what name they put on it, but if they tune in to the same frequency after every channeling they are getting the same vibration and generally call it by the same name, so that the names tend to call upon that frequency.

Thus, an entity going into the channeling mode, attuning to a certain name is very likely to return to the same channeling frequency as before, since it was associated with that particular name. The message therefore would be consistent with previous channelings to the same frequency and the same name.

George Adamski the First to Name Frequencies

This Awareness indicates that many of these earlier entities or frequencies originated with the entity Adamski when he sought to communicate with the occupants of UFOs and believed he was in touch with Venusians, people from Venus. He would give names to the frequencies to which he attuned, and communicate with them or get messages from them and channel the information, and this caused other entities reading such information to seek to attune to the same entities under the same or similar names.

This Awareness indicates that this being a early version of the channeling that later became known as the spiritual hierarchy channelings, which occurred through many different entities. This Awareness indicates that other entities later channeling, would come in contact with a different frequency and give the different frequency a spiritual name, and thus, many of the hierarchy beings came into existence under certain names.

In other words, the frequencies of the spiritual hierarchy are real. The act of attributing a name to those spiritual hierarchies is questionable as to whether that is truly an appropriate name for the spiritual energies, for the hierarchy energies, but it doesn't matter, for once it sticks, and entities begin to channel for this spiritual energy and think of it as an individual, it is a way of communicating and attuning to those energies of the spiritual hierarchy associated with the names that have been attributed to those spiritual hierarchy energies.

This Awareness indicates that this is what this Awareness has meant when *It* says the spiritual hierarchy is questionable as to its true existence. This Awareness indicates that even the so-called frequency of the Creator under the name of God can be confusing for the frequency of the Divine Creator is real and can be attuned to, however, any personification representation of that spiritual hierarchy is to some degree an illusion.

To say that you are in contact with God may mean to one person that you have come in contact with some entity, humanoid in shape, but far above humans in particular, whereas to another entity coming into contact

with the Divine Creator simply means that you have touched that frequency, that vibration, that high level of light/love/creative energy associated with the creative force of the universe.

This Awareness indicates that it is not easy to explain this in regard to entities who focus on physical shapes and forms, because this Awareness is speaking of invisible vibrations that are the entities of the spirit world, or the world of consciousness. This Awareness indicates in other words, Divinity is consciousness, and these Divine Beings are certain frequencies that manifest as consciousness. Therefore, entities attuning to the spiritual hierarchy may in fact simply be attuning to levels or states of consciousness in the electromagnetic scale.

Was George Adamski Speaking Truth? (Where Did That Fraudulent Blather Originate?)

QUESTION:

A question along these lines from JD. Awareness just answered part of it, but I'll read her statement. "Please discuss the case of George Adamski, regarded as the first of the ET contactees to go public. Was he speaking the truth about his contacts?"

"Also, in later years, I believe he is one of the first who claimed to be channeling messages from the so-called Space Brothers, and originated the later industry of bland, virtually content-less, messages from now familiar names such as Korton, Soltec, Monka and Hatonn. If, as Cosmic Awareness has stated, these "communications" are, and they are *prima facie!* --- fraudulent blather, please indicate where they originate, and why?"

COSMIC AWARENESS:

This Awareness indicates the entity attuned to a certain frequency in the electromagnetic scale and assigned names and personification images to those frequencies. This Awareness indicates that in the same manner an entity might play with a Ouija board and come up with a certain frequency of a spirit and give the spirit the name Phillip or George or whatever, so that the entity can return again and again to the Ouija board and attune to that same frequency, and repeatedly call the frequency by the same name.

This Awareness indicates the entity begins to think of this as an entity or an individual, the spirit of an individual. This Awareness indicates that the more one focuses on and works with that energy and describes the energy as an individual, the more reality it tends to imply as a base for its existence. This Awareness indicates that this does not necessarily mean that the descriptions you give to the entity or energy are absolutely accurate.

This Awareness indicates rather, it means that the forces and energies involved in your meditations or focuses in this regard, tend to have qualities of their own that can be altered to appear to have substance on some level or which can take on a personified implication, as though they were a real person or real being communicating with you from another dimension, an invisible realm.

This Awareness indicates that it is really not much different from the child who plays with an invisible spirit because he does not have a true playmate. There are many children who manufacture playmates that are invisible to their parents and others, and they even can carry on conversations with such invisible playmates.

This Awareness indicates that the entity Adamski was able to fabricate in his mind the image of a being and this entity, because of the nature of his exposure,

selected Venus as being the home of such an entity, perceiving the entity to be a native of Venus. If the entity were to be as creative today, he would most likely think in terms of some other galaxy in the universe rather than a planet in the solar system to represent the home for his attunements.

This Awareness indicates that in other words, Adamski was a novice at tuning into extraterrestrial beings. His level of attunement was not ready for attuning to entities light years away from earth, because this was not within his consciousness territory. He was more oriented to earth and the solar system. Entities channeling today are more oriented to the galaxies, and therefore, become more capable of attuning to galactic energy belts so that they can channel from entities who reside in great systems, light years away from earth.

Confusing Terms Are Explained

(Did Monka and Hatonn Actually Live Physically?)

FOLLOW-UP QUESTION:

Some of those terms Awareness just used are still a little confusing. What's the difference between a spirit and point or symbol on the electromagnetic scale? I always thought spirit was a disembodied entity who had previously experienced life on earth or elsewhere.

COSMIC AWARENESS:

This Awareness wishes to clarify that energy and entities are equivalent; that an energy is the same as an entity. An entity is the same as an energy. This Awareness indicates it is simply a matter of how entities wish to look at energies. Therefore, an energy on the electromagnetic scale is also an entity, and this Awareness can refer to the entity as a spirit, since it is not in a material body.

If it is embodied in the flesh, this Awareness does not think of it as a physical entity or energy, but if it is free of embodiment, this Awareness considers it the same as a spirit or entity or energy, depending on how the terminology fits in the discussion.

FOLLOW-UP QUESTION:

Well, is it possible then that the energy or the personified symbol or point of the electromagnetic scale, which Awareness indicated was a source of the Ascended Masters; is it possible these entities have had previous lifetimes or embodiments on this planet or other planets?

COSMIC AWARENESS:

This Awareness indicates that this could be. This Awareness indicates that energy never dies. Entities continue on from one embodiment to another and in between. Therefore, your question suggests, "Yes, it is possible."

QUESTIONER:

And how probable is it with all these names such as Monka, and Hatonn and so forth that they actually had some embodiment?

COSMIC AWARENESS:

This Awareness indicates that the question appears to be focused on whether the names carried from one embodiment in the flesh into the embodiment of energy or spirit in movement on the electromagnetic scale, with the same name. This Awareness indicates that it appears the names were not necessarily carried from one situation to the next, but were adopted or read by the channeler from the frequency or vibration, much in the same way that this Awareness, attuning to your spirit name, chose the word "Avaton".

It does not necessarily mean that in a previous lifetime you were called Avaton. This Awareness simply was reading energies at present that suited the vibration of your present experience and a name that would be beneficial in your present experience.

Jonathan the Ball of Lightning

This Awareness indicates that in other words, if entities wish to call a ball of lightning by the name Jonathan, there is no reason why they cannot do so, but this does not constitute to this Awareness a kind of angelic being that is everything entities expect or want from that which they call Jonathan.

Entities who make Jonathan into a god or see him as a spiritual hierarchy official are attributing far more to the ball of lightning than the entity may rightly deserve, but at the same time, from one point of view, the ball of lightning called Jonathan is valid. You can call the ball of lightning by any name. You can say it exists, and that it is an entity, because energies are entities. Entities are energies. But for entities to think that Jonathan will answer their prayers or will lead them out of the quagmire of physical existence into some higher dimension, if they surrender their life or put Jonathan on a pedestal, this becomes less than a spiritual reality. It becomes more of a creation of the mind.

But, if entities wish to believe the ball of lightning, which has its own frequency and vibration that is called Jonathan is some kind of archangel for them, there is no great harm in their efforts. It is just that when they start trying to convert others into the worship of Jonathan, this ball of lightning, entities may not wish to follow Jonathan with the same kind of devotion, and therefore, when they try to persuade this Awareness to promote Jonathan, or those on the spiritual hierarchy which are really similar creations, this Awareness is not overly enthusiastic.

This Awareness indicates that you have the right to worship Jonathan the ball of lightning, and you have the right to describe Jonathan the ball of lightning, in the same way that entities describe Philip, when conjuring up Philip, and entities can, in giving these attributes to Philip, or to Jonathan the ball of lightning, or to Saint Twinkle; entities can create concepts, and by their own determination can build a religion around these entities and try to convert others into following the religion, its rituals, its precepts, but this Awareness does not see the need for entities to drop their own understanding and follow that religion, just because someone is fanatically devoted to Jonathan the ball of lightning, or Saint Twinkle, or Philip.

This Awareness understands that when entities are devoted to some concept such as this, they can become very distraught that others do not want to join them in their devotion and admiration for such entities. This Awareness indicates that these are energies.

The spiritual hierarchy entities are energies on a spiritual frequency that is individually matched for each name. Many of the qualities of that frequency express as vibrations, but not necessarily do these energies honestly represent the descriptions that entities have given to these entities.

Entities may describe, for an example, Jonathan the ball of lightning, as being something more than a mere ball of lightning. They might describe Jonathan as the great ball of lightning that started it all, and therefore, they could call Jonathan the ball of lightning the Divine Creator. But you don't have to buy that description. Nor do you have to buy the description of other entities in the spiritual hierarchy just because that is the belief of others

who have studied and have promoted and have energized the spiritual hierarchy concepts.

Why Awareness Has Never Promoted the Spiritual Hierarchy

This Awareness has not promoted the concepts of the spiritual hierarchy because they do not appear to do anything worthwhile for most entities other than serve as a kind of comfort to those who wish to have a different kind of religion, who wish to believe that these spiritual hierarchy beings are somehow protecting them and giving them a future security.

What have they actually done, other than serve to make one feel good about being themselves and feel good that there are some kind of higher beings looking out for them? They do not actually do anything for entities. They do not impart any great information of substance as a general rule. In some cases, they promote information that has some value, but in most cases, the information is either unprovable, unlikely or simply to make entities feel good.

This Awareness indicates that *It* simply does not see the reality of these entities as being what their followers would want you to perceive, when looking at these spiritual hierarchy energies. They are essentially a new creation in consciousness, much like new souls.

Whereas there are angels and beings far older than humanity that actually exist in the universe, and these entities are forgotten and simply go about their business silently, altering the vibrations and frequencies of the earth without much fanfare, without much attention, and that these entities and energies are far more interesting to this Awareness than the energies that entities spend so much energy trying to promote as a spiritual hierarchy.

This Awareness suggests, however, that if it pleases you to have a spiritual hierarchy religion, *It* sees no harm in your effort.

Following Ascended Masters Diverts Entities

QUESTIONER:

Well, wouldn't there be a certain harm in that it could divert an entity from choosing other paths that would be more likely to effect his spiritual development?

COSMIC AWARENESS:

This is in the affirmative, but such entities may not wish to look at other paths, other methods, and may become so devoted that it is as frustrating to change as it would be for a Moslem to become Christian or a Christian to become a Moslem, or Buddhist.

Therefore, whatever an entity's religion is, if the entity wants to believe a certain concept and accept it as a kind of unwavering philosophy or religion, this Awareness wishes them to realize it is all right. This Awareness does not wish to alter their belief system, if it is important to them. But this Awareness does not necessarily wish to adopt their religion as *Its* own, for *It* sees things differently than many entities, when they have their particular religion.

This Awareness indicates that *It* is speaking of this only because the questioner repeatedly persists in altering the message from this Awareness in regard to the spiritual hierarchy, about which this Awareness has indicated *It* is not impressed and sees as a less than absolute reality. *It* sees these energies as part of the electromagnetic scale that have been named and which are implied to be beings of a physical reality or personal reality.

They are promoted as personified beings and this Awareness does not see this. *It* sees them as balls of energy, and finds it difficult to become a follower of the

spiritual hierarchy religion that is developing along certain lines in this country and around the world. *It* does not find *Itself* easily persuaded to follow this concept since *It* does not see things in the way these followers see these balls of energy on the electromagnetic scale.

This Awareness suggests you may continue your belief in the hierarchy system, but do not expect this Awareness to buy into it in the same way that you have.

Adamski Says Star Systems Have 12 Planets (Groups of 12 Clusters and Then 12 More Ad Infinitum)

QUESTION:

JD had another question about George Adamski. She writes that: "Adamski reports his visiting ET contacts told him that star systems have 12 planets, such systems clustering in groups of 12, the group then forming another 12, ad infinitum." Is there any truth to this claim?

COSMIC AWARENESS:

This Awareness indicates this is negative. This Awareness indicates that the numbers 12 as being in error; that the star systems are not formed in symmetrical numerical systems wherein 12 planets are present in every star system.

Will Believers See Ascended Masters At The Passing Over?

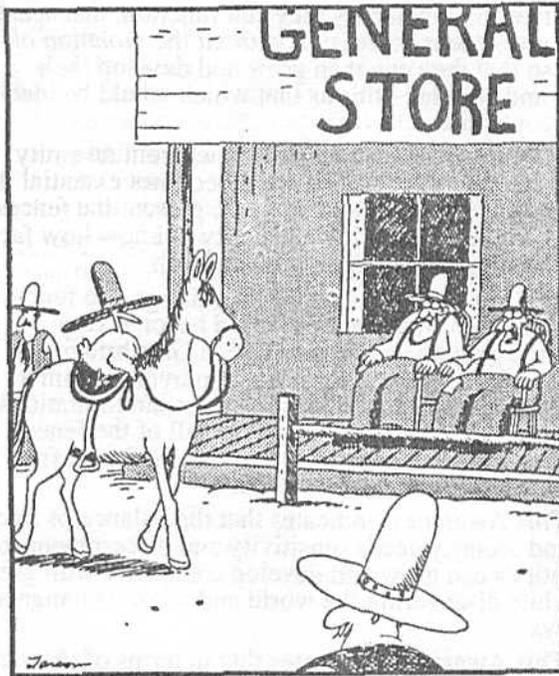

QUESTION:

Awareness, if an entity follows this Ascended Master philosophy, if indeed it is a philosophy, and buys into it completely; at the time of passing over, would that entity actually see or imagine it sees these Ascended Masters in the same way that Awareness has indicated a Christian often sees Jesus or imagines he sees Jesus?

COSMIC AWARENESS:

This Awareness indicates that this is a possibility; that it has been discovered that when Buddhists experience the near death experience and come back to describe what has happened, they often report having seen Buddha, whereas Christians often report having seen Christ. It is possible that if entities have strong convictions in the spiritual hierarchy beliefs, they will report having seen Monka or some other being of their belief system.

"Somethin's up, Jed. ...That's Ben Potter's horse, all right, but ain't that Henry Morgan's chicken ridin' him!"

THE COSMIC AWARENESS SPIRITUAL DEVELOPMENT COURSE

Taurus: Volume 2 Lesson Number 3

QUESTION (AVATON):

Would Awareness please give us today the third Correspondence trance reading? The third lesson: finding a stability and foundation through concepts and ideas, this likened unto the stable data on which one can build a philosophy.

COSMIC AWARENESS:

This Awareness indicates the entity, being a conscious source of divinity, having taken on certain identifications and moving into the physical form as a human species - having chosen this direction for expression, does then become faced with a situation which raises the possibility of the continuation of that experiencing and that identification, or allowing this identification to terminate and move in other directions.

This Awareness indicates that some entities allow this identification with the human species to terminate: with the physical body to terminate, and do indeed move

in other directions or withdraw temporarily from the physical involvement to return again at a later time.

This Awareness indicates this present lesson is concerned with the entity that does decide to continue as a human species moving on into the physical plane in the physical body, expressing himself as a physical entity involved in this level of life.

This Awareness indicates there is a term used by Ron Hubbard in the Scientology material: this term being 'stable data.' This being that data which is stable, around which other ideas and other energies can anchor themselves, structure, and build upon. This Awareness indicates this appears again in the 'Seth Material' in terms of 'core belief,' this being the works of Jane Roberts.(*). The core belief being that central core idea upon which other ideas are built and upon which other ideas rest. This Awareness indicates this concept has appeared in earlier writings in a passage which related unto the 'house built upon sand' and in certain earlier principles used by the ancients, whereby a foundation was laid upon which to build the structure.

This Awareness indicates the term 'base,' the term 'roots,' as the roots of a tree, the terms 'foundation,' 'stable data,' 'core beliefs,' and other similar terms have been used in many philosophies to present the same concept. This Awareness suggests this as that which shall be examined in this lesson, whereby the entity looks at all of these possible core beliefs around which the entity can build his or her lifestyle.

This Awareness indicates this as related unto computer programming, or what may be termed programming the biological computer within the individual's consciousness. This Awareness indicates the programming of entities through belief systems has taken on many shapes, forms, and has been used by manipulators of consciousness for many thousands of years, and this programming has created and destroyed civilizations.

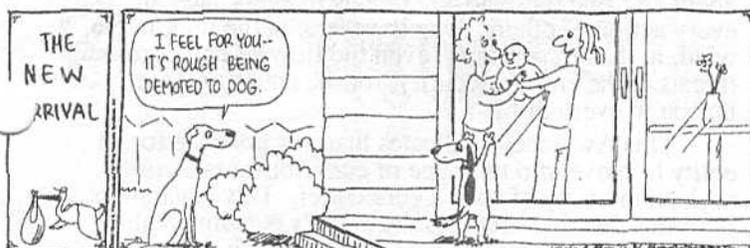

This Awareness wishes at this time to allow entities to see the various types of programmings, so that the entity can understand these programmings when confronted with one. This Awareness suggests that one of the strongest motivations for programming of an idea or belief is that of survival, the continuance or maintenance of the self.

This Awareness suggests that the first step of a mind-manipulator in attempting to brainwash or program an entity, is to convince the entity of the belief that the entity as a consciousness *can be terminated*, and that such termination would be unpleasant and should be avoided.

This Awareness indicates that consciousness *cannot* be terminated. Only identifications with various aspects of various shapes, forms, and experiences can be terminated.

This Awareness indicates that the memory of such identifications can only be terminated by the entity.

This Awareness indicates that the mind manipulator in expressing this belief to the entity, frightening the entity into believing that the identifications may cease, the consciousness may cease, and the very being of the entity may cease to be, does then create the potential motivation which can cause the entity to feel a need to take an avoiding action, to circumvent or to avoid that termination. This type of avoidance and the motivation for avoiding such a termination is the basis for the worship of that idol known as 'fear.' And the entity worshipping that idol of fear can then be manipulated further by repeated confrontations of that idol known as fear, to such a degree that the mind-manipulator can

continually throw up that mask of fear, continually place before the entity that idol of fear, continually present these threats of termination so that the entity, in attempting to avoid that termination, must move in other directions and eventually, by being blocked in so many directions, is moved into the direction that the mind-manipulator has left open.

This Awareness indicates the mind-manipulator can be any entity, any authority - whether this be a book, a priest, a teacher, a military machine, a leader of any type, a parent, or a fellow peer, friend, or associate.

This Awareness indicates that the mind-manipulator, having thrown up all of these blocks in every direction except the one, then moves the entity into the belief-system, that *this* is the path which allows the entity to continue survival, and the other paths will lead to certain termination.

This Awareness indicates that religions are based upon this type of manipulation; that there are military machines, political machines, social machines, cultural machines, family and underworld machines, also based upon this type of manipulation.

This Awareness suggests that the threat to survival controls approximately ninety-five percent of most entities' behavior, and therefore, ninety-five percent of most entities' behavior can be manipulated by threats of death or threats of termination, or threats of taking away some of the protection which would weaken the guards and the walls and the stable data built about the entity to protect that entity from the threat of death.

This Awareness indicates that as entities build more and more protection around themselves to avoid that death or the threat of death, they are subject to greater and greater control by the mind-manipulators.

This Awareness indicates that entities who have no fear of death, therefore are ninety-five percent free from the mind-manipulators and can function in greater creative levels as a free soul and free individual.

This Awareness indicates that the majority of entities only have about five percent of themselves free to function, and the other ninety-five percent is working within the walls of security which are built about them to protect them from death.

This Awareness suggests that entities may begin to understand the nature of freedom and security as being in conflict on many levels. That there is a balance wherein security can grant a certain amount of freedom, and wherein freedom can exist in a certain amount of security.

This Awareness suggests this may be seen in the action of a diver on the diving board, wherein the spring from the board gives the diver just enough security so that the diver does not fall into the water with the board, but gives enough spring to allow the diver to express freely in the nature of the dive.

This Awareness suggests that entities may begin to learn to balance the freedom and security aspects within their lives. For wherein entities seek too much security, they find themselves imprisoned by those walls, and find themselves in states of maximum security within those prisons. And entities who seek too much freedom may find themselves becoming a problem to all others, and having to be caged up and also placed in maximum security within a prison.

This Awareness suggests that wherein entities can assist each other in finding their own limits for themselves, to allow themselves the greatest amount of expression without violation to others, to allow them-

selves that room whereby they can function, that space which gives them expression without the violation of others so that they can then grow and develop their talents and abilities - this as that which would be ideal for all concerned.

This Awareness suggests that wherein an entity cannot confine his own actions, it becomes essential that the society point out the safeguards, present the fences, place up railings and allow the entity to know how far he or she can and cannot go in this direction.

This Awareness indicates the railings, the fences are essential, even as entities would become very insecure if driving across the Golden Gate bridge and the railings fell off. Likewise, children playing within a yard, who are used to the fence and certain limitations, would feel very insecure if suddenly all of the fences and limitations were removed and they had total freedom to wander where they would.

This Awareness indicates that the balance of freedom and security needs sensitivity and discernment so that entities can grow and develop cautiously with great care while discovering the world and all of its dangers and joys.

This Awareness indicates that in terms of the various types of stable data or core beliefs, or foundations upon which entities can build their lives, the question of survival tends to be the most urgent and important concept by most earthbound entities. This Awareness indicates this as not essential and that there can be other ways of viewing life which gives greater joy and ease and efficiency in living life.

This Awareness indicates that in terms of the survival aspect which shall now be discussed, entities can seek survival through the preservation of the physical form, based around a core belief that there are dangers everywhere and they must defend and protect themselves. This Awareness indicates this often occurring to children who live in a hostile environment and grow up in such an environment, or spend early years experiencing this type of environment. This Awareness indicates wherein an entity feels itself to be in a hostile world, needing to protect itself from hostile forces, this can bring about the foundation upon which the entity builds his entire living lifestyle, the entire structure of his being for the remainder of his life, or until some drastic event comes in and totally changes that core belief.

This Awareness indicates that this threat to the child's security from the hostile world may be purely an illusion brought on by a memory of an event which occurred in the early life of the child, or may be carried over from previous lifetime experiences as an attitude which caused the child to feel threatened even when there was no threat, and this core belief, or stable data, then begins to bring about more and more ideas and concepts to support that core belief. And as this core belief is supported more and more, it becomes stronger and stronger in a manner that causes the entity to feel even more sure of its stand and its position. This Awareness indicates the entity then can begin to look about and find these hostile threats in every face, in every action of others, even in nature: in the rain, in the wind, in the temperature - even the flowers can become threats to the entity's security, for the entity will see poison in every thing.

This Awareness indicates that it is possible for an entity to move into that type of consciousness through such an intensity of such a core belief. This Awareness indicates that this becomes the entity's personal reality and may have absolutely nothing to do with the collec-

tive reality of the flower, of the wind, of the rain, or of the other entities round about.

This Awareness indicates that another entity may not see the world as hostile, but may see the world as depriving it of certain things which it should rightfully have. And the core belief, then, becomes one of deprivation, and the foundation of the entity and the philosophy of the entity becomes one which states: "I am deprived. I am poor. I am not receiving my just rewards." This entity then begins to find more and more support, seeing every slight as being proof of his own denial and deprivation, not seeing the hostility in others even though the experience might be exactly the same as the first entity, but seeing deprivation instead. This entity sees the wind and the rain as threats to these things which he wished to do or acquire, and therefore, nature also is depriving the entity, and the entity feels that God has withheld certain rightful claims from this entity.

This Awareness indicates that this core belief which causes the entity to view life from a certain perspective may have nothing to do with reality, but because the entity is magnifying every deprivation, it sees only the deprivation and does not see the joys and blessings which come to the entity. And as the entity is looking for deprivation, deprivation becomes a greater and greater aspect of the entity's life until that does, indeed, become his or her personal reality, even though that personal reality may have nothing to do with the nature of universal forces, other than the fact that the entity himself is creating his or her personal reality by using the universal forces and laws which allow the entity that freedom.

This Awareness indicates that another entity may look about and see everything in relation to friends who come and present presents and happy smiles, and may see the communication with these friends as being such that on every occasion he is given certain rewards just for being. And this entity then begins taking on the concept and stable data, the core belief, that he is a special being, just because he is a special being and having nothing to do with what he does to earn that affection.

This Awareness indicates that this kind of special feeling may be presented by a doting mother or doting friends, and the entity can grow up to be a very vain person with the idea that: "Mother loves me because I'm me. Why don't you love me because I'm me?" And this entity can become very frustrated with other entities who ask that entity to perform in a particular responsible manner.

This Awareness indicates that this kind of core belief of allowing the concept that one is special and loved and therefore needs not earn the affection of others, but simply deserves that affection - this can be just as painful and difficult as any of the others. This Awareness indicates that the extreme of this is seen in the entity who has no friends left and is screaming inwardly in agony to be loved and doubting every entity who tries to express that love, demanding more and more from that love, expecting more and more from those entities until those entities cannot even stand to be near to this entity which feels so special and demands so much.

This Awareness indicates that another entity in looking about at the world, sees the world, the mother, the family as being attentive, friendly, somewhat inconsistent in the expression of emotions and affection, and begins to discern what it is that creates affection, affectionate response, and what it is that brings on

hostile responses. And the entity's patterns of behavior and core beliefs become centered around the concepts of right and wrong behavior, and this entity then begins to learn through pleasure and pain stimulation what is right and what is wrong and develops a sense of morality which may or may not have anything to do with cosmic law and the sensitivity to others.

This Awareness indicates that a child may be programmed, may be rewarded for those deeds which are essentially hostile to everything decent, and which are essentially disruptive and destructive to others. And if the child is rewarded for this, the child shall begin developing a morality which states that: "It is good to be bad and bad to be good."

This Awareness indicates that the child can be completely reversed in the programming to where these concepts are of a reverse polarity. This Awareness indicates that by creating pain for good behavior and creating pleasure for bad behavior, this relative to... (This Awareness indicates the 'good' and 'bad terms' being used here in relation to the sensitivity to others round about, and the terms being: that which is good for others, and that which is disruptive to others.)

This Awareness indicates that as the child's behavior is reversed and polarized in a reversed direction, this entity can literally grow up to be a totally negative force to the society.

This Awareness indicates that the event of such an entity occurring is unlikely in most situations, for few entities would care to have such an entity about them and would, indeed, begin the reversal of that type of programming. This Awareness indicates however, there are situations where entities, through misunderstanding and through irresponsible actions and through ignorance, do indeed create certain negative behavior in children by their programming.

An example of this being where a child does a good deed, does something favorable for a parent, attempts to please the parent or another entity, seeks to be appreciated and liked, but because the parent has other troubles, or has certain hostilities, or resents the presence of the child, the parent (instead of rewarding the child for the efforts) is insulting, degrading, or hostile to the child and rejects the child. This type of reward for good behavior (the negative reward) then brings the child back into his shell, and the child then will come out with a negative behavior, one of hostility, or one which seeks some kind of affection from another for being negative.

This Awareness indicates this child may then find this type of acceptance through relationship with other children by doing something daring which causes the other child to look in awe and admiration, even though this daring deed may be a violation to society or to another entity. Thus the child is finding its way toward being accepted, which could not be found when trying to be accepted from the parent.

This Awareness indicates this type of reversed programming is very common in every family through the inattention and carelessness of parents whereby they do not fully look at the efforts of their children in trying to be accepted and admired and appreciated by the parent.

This Awareness indicates that in other forms of programming, the entity may look and see that a reward comes when the entity knows something about something, and a punishment comes when the entity is ignorant about this or that rule or principle. Therefore, the entity begins to build the stable data, the foundation of his life, the core belief that knowledge is the key to

survival, and the entity then sets out on a pursuit of knowledge, to learn all that is necessary in order to survive.

This Awareness indicates that no further comment is necessary on this other than to say that entities who have pursued the Tree of Knowledge often find themselves isolated and cast out of the Garden of Eden, still searching for that forbidden fruit which gives them everything they ever desired.

This Awareness indicates that other entities, seeing a reward in their art work or in certain types of expression which appears to please others, begin forming the foundation or core belief system that art, beauty, culture, and pleasing expression is the key to happy survival, and these entities move into music, art, or some form of dramatic expression.

This Awareness indicates that others may move into religion or into politics in the pursuit of power; others may move into the pursuit of power through money; others may move into social work or politics for the purpose of serving others, having found a core belief that giving service brings rewards.

This Awareness indicates that entities can find any type of core belief that they wish to find in their experiences, but that generally those experiences which are most significant do tend to set the patterns for the core belief when the child is young, in relation to the significance of the pattern.

This Awareness indicates the death of a parent or the departure of a parent can create many problems for a child in terms of core belief systems.

This Awareness suggests that there are other forms of belief systems which go beyond the concern for physical survival and lean toward greater freedom. These systems will be discussed in the next lesson.

This Awareness suggests that in meditating on the material given in this present lesson, this Awareness suggests that you examine your own core beliefs; that you meditate on how you view the world, what you see in each other, what you see when you look at others. If you see those entities as threats, if you see those entities as friends, as potential money-bringers, as potential bearers of gifts, as potential threats to your security and your holdings, or to your time - or, if you see those entities as simply entities with whom you can exchange and relate and barter and trade energies, conversation, and other forms of experiences with.

This Awareness suggests that this be looked at from states of meditation and you may find yourself flashing back to certain childhood experiences which you had previously forgotten or even unto previous lifetime experiences.

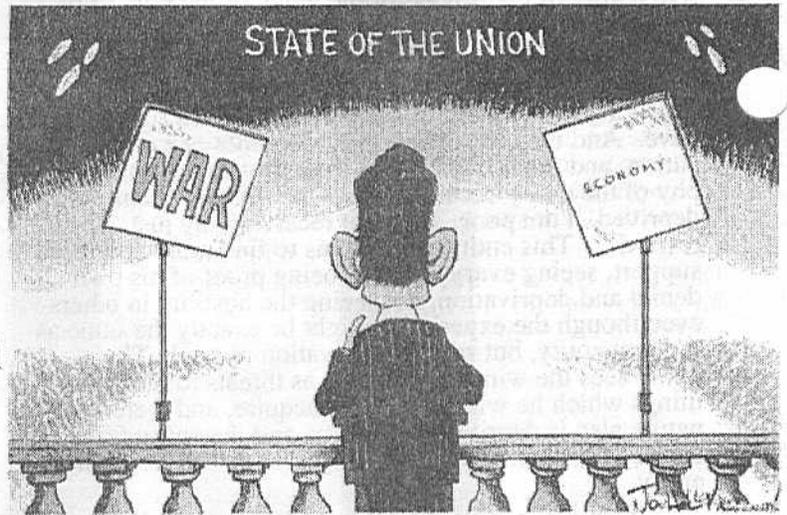

This Awareness suggests this as the conclusion of this particular reading.

WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

DOESN'T KARMA ALSO APPLY TO THE ALIEN LIFE FORCE IN THE UNIVERSE?

QUESTION:

A question from Jacqueline Stader, Vancouver, Washington. She writes: "In the 94-15 newsletter, Awareness speaks of the 'God Consciousness' in all, and throughout the cosmos. That being so, then isn't this also true of the 'alien' life force in the universe as well? Just as we are accountable for our thoughts and actions, good karma/ bad karma, does that also apply to these other creations by the Creative Life Forces?"

COSMIC AWARENESS:

This Awareness indicates that all are capable of attunement to the Divine Force. The Divine Force is everywhere present. Not all are attuned to the Divine Force. Many live in the Divine Force, and choose the concept of separateness, of self-centeredness, or of attuning to that which is divisive and separative. Those who choose separative and self-serving efforts are attuned to the Dark Force which also is everywhere present in the universe.

Many Entities Attune to Both the Light Force and the Dark Force

This Awareness indicates that it is a matter of personal choice for entities to experience whichever they themselves wish to choose. Many entities have attunement to both the Light Force and the Dark Force, and they carry with them a Dark side and a Light side, and some exaggerate or emphasize the Dark side over the Light side, whereas others cling primarily to the Light side and ignore the Dark side of themselves.

This Awareness indicates that by being aware of the Dark side, entities can recognize the potential for hazards in their expressions and in their experiences, and they have the ability to cling and choose and surrender to the Light side of their being, and by so doing, these entities tend to move more and more toward the bright side, the Light side, the Divine Frequencies, and diminish the effects of the lower vibrations, the Dark side, on themselves and on their behavior.

What Awareness Calls The "Dark Force"

(More on the Story of Lucifer)

FOLLOW-UP QUESTION:

So in other words, all life forms in the universe have this God Consciousness or access to it, but a lot of them choose not to, and that is what Awareness refers to as the Dark Force. Is that correct?

COSMIC AWARENESS:

This is in the affirmative. This Awareness indicates that the Dark Force emphasizes separateness and causes entities to feel themselves as being separate from the Unified Force of Divinity that permeates the entire universe. This Awareness indicates that when entities accent separateness, they immediately become selfish, self-serving.

They see themselves as separate, and therefore needing to have greater power, or having greater power because they are separate from the universe, and separate from others, and when they think of themselves as separate, they see themselves as gaining power, in the same manner that stepping back from the universe would allow them to feel more important than being involved in the universe.

By extracting themselves, they become more like a god, but the god is based on separateness, which means they do not fall into the category of everyone else. They are "special." This is the story of Lucifer wanting to stand out and be special. Rather than being part of the Divine Essence of all things, rather than enjoying the creation of God, Lucifer wanted to step aside and compete for the glory of his being.

This Awareness indicates that by feeling separate, entities accentuate their own self-importance. By feeling as though they are a part, they lose the importance of self. By surrendering self to the Divine, they lose self, but they become One with the Divine. This Awareness indicates that therefore, the action of separateness is the action of stepping into darkness.

If one part of a mosaic seeks to be absolutely the most greatest and important part, and separates from the rest, then that outstanding part may be seen as separative. If it sees itself as separative, it cannot be one with everything. It cannot be in a state of surrender to the All. Therefore, it is in competition. It is the Lucifer, as compared to the part that remains.

This Awareness indicates that when entities have a choice of being separate or being united with the Divine, it is as though they have a choice of taking on the Darkness or taking on the Light, of being One with the Light or of being part of the Darkness, and when many

entities separate from the Law of One or from the Oneness of All, they become a group of entities who each, as separative forces, create a group of separative energies that serve as a kind of dark force.

These entities, working together, may gain some power in the power of their dark pursuits, but they are also constantly seeking to compete with each other, as well as competing with the Light Forces. They will never be satisfied unless they are the only separate force left, and if they can destroy all else and remain separate and in control, then they feel they have gained enormous power.

The Satanic Force is the Pursuit of Power

This pursuit of power has been described as that which is the Satanic Force. The Satanic Force seeks power over others. In other words, it seeks to be separate from others and in control of others. This Awareness indicates you could reasonably say that separateness is the original sin; the separation of man from the Divine. The separation of entities from the Divine Consciousness creates the first sin, the first error, and by surrendering oneself to the Divine, that error, that sin, is gone.

This Awareness indicates that, of course, every individual is different from every other individual. Every grain of sand on the beach is different from every other grain of sand on the beach, but that difference doesn't mean that one is more powerful or has dominion over the others. Therefore, the separateness created by difference is not the same as the separateness or individuality that may come about from dominance over others, or from refusing to become One with the Divine.

The action of separating is not necessarily the same thing as being different, but some entities will seek to be different in order to exaggerate a separateness from others. This Awareness indicates that differences cause things to become more outstanding, to stand out, and therefore, some entities seek to behave differently, because they think it gives them power. It makes them feel outstanding or it makes them stand out from the others, and they do this in a manner that is promoting separateness for the sake of influence, power or control over others who do not have the daring to be different among their peers.

This Awareness indicates that an entity can be different and still belong, and still be one with all. The concept of using differences to create separateness is but a tool. It is not necessarily a sign of an entity who wishes to be separate, for many entities in being different are still very much attuned to the concept of oneness, to the *Law of One* and to the total mosaic of energies in the universe.

One can be a blue light among millions of white lights, and thus be outstanding, but if the entity who is the blue light sees the grand mosaic and sees that the blue light is part of the whole, then the entity may not be acting as a separate force, but as a part of the total gestalt.

If the total gestalt of these lights is what is important to the blue light, then it is quite all right for the blue light to be blue instead of white, but if the blue light is trying to be outstanding to show up and prove himself to be more important and more outstanding than all of the other lights in the total picture, then that entity is off base.

He has not attuned to the oneness, he is seeking special status for his blueness, and in so doing, the entity is out of touch with the unity of being One with All, and the entity will be seen as being in error, as being egotistically superior, though not actually superior to the others because of his difference.

People will look and say: "Oh what a mistake! A blue light among the field of white lights! Someone put in the wrong bulb!" The entity may take pride in being different. This Awareness indicates that it is all a matter of what attitude entities have toward their differences. If they want their differences to have control over others, to give them greater power over others, then they are acting in error.

If they simply want their differences to be part of the great picture of all things, adding something to the picture that gives it an area of interest, then they are part of the whole, and there is no error involved.

It Comes Down to a Matter of Ego (When to Use and When Not to Use Your Ego)

CLOSING MESSAGE

This Awareness indicates that it appears to come down to a matter of ego. The ego of the self. If one's self-ego is such that he or she feels a need to become outstanding and separate from others in order to appear to be more important than others, then that entity is suffering from an ego problem.

If the entity is focused on being different in order to help make the grand scenario, the total gestalt a little more fun for everyone, then that is not necessarily an egotistical action. This Awareness indicates that the entity Michael Jordan, for example, in playing superb basketball is outstanding in that action, and most likely his ego was also part of the activity.

The ego, when involved in activity, is proper. The ego involved in activity is part of what makes the outstanding talent, outstanding plays. It is only when the ego itself becomes accented, wherein the entity begins to focus on, "How great I am!", it is only then that an ego becomes harmful to an entity's soul growth, for if you think of yourself in terms of "How great I am!", how can you be one with all the rest?

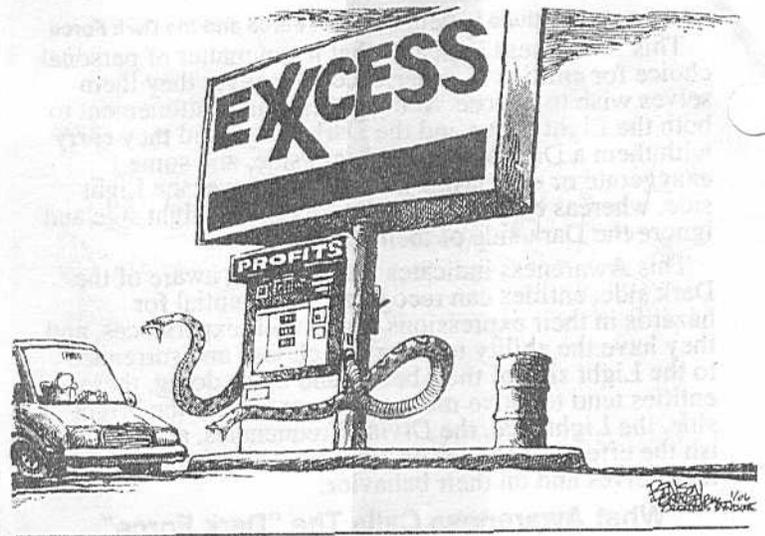

This Awareness indicates if you have no ego whatsoever, and you are trying to compete and add to the grand scenario of everything by doing your best, you cannot really do your best without some ego involved in the activity. It is when you start thinking about how great you are that the problem comes about. When you use your ego in an active way, there is no problem.

The Lucifer, who shines more brightly than others of his group, is not necessarily expressing a negative, but when he stops to notice: "Wow! How bright I am! Boy do I ever look great!" When he begins to consciously discuss and focus on his ego, and takes it out of the realm of being or acting, then the entity is in error, and his spirituality begins to fall.

Why Not To Seek An Ego-Death

This Awareness indicates therefore, do not be afraid of the ego, do not necessarily seek an ego death, because the ego death will only lead to a resurrection of the ego and you will never get rid of it anyway. It will always be a part of you. But if you can keep the ego in active levels, wherein you take pride in your work, you enjoy work and do it well, your ego helps you to make the best of the situation, to feel that you can accomplish things, to feel good about yourself and about your accomplishments.

All of this can add to your ability, to your talent, to your ability to pursue and do things and can help you to achieve many great activities. It is only when you stop letting the ego be part of the action and turn it into attention-getting activity, pointing out to others what a great job you did, or how wonderful you were in this or that activity; it is only then that the ego becomes a

problem, and you make yourself appear to be separate from others.

When you try to get others to see your outstanding abilities you are playing with your ego in a way that is diminishing your spiritual worth. This Awareness indicates that this is the separateness that leads to the fall of your spiritual divinity.

Thus, when some entities say: "I am God!" they are playing with their ego and trying to get attention from others. But when other entities say, "I am one with God!", it is a humility that is being expressed. "I am, surrendering myself to God," this is a humility; it is a joining of the Divine. It is not a separative statement.

This Awareness indicates that you understand the negative and positive sides of the ego, where it is when it is properly expressed, and where it is when it is improperly expressed. It is improper when you begin to think and talk about it, about the wonder of yourself. It is proper when the ego is part of your effort to achieve or to acquire or to do something or be something.

Thank you. (The Law of Gratitude is given)

Take a Break From the War For Survival (Indulged Yourself in Spiritual Food For the Soul)

OPENING MESSAGE:

This Awareness indicates that during the past year or so, *It* has given (a) considerable amount of information that relates directly or indirectly to survival, to the survival of the human species for example. This Awareness indicates that this information as that which can be perceived as urgent and critical, and can become a very important part of one's thinking. In effect, it throws one's thinking into a kind of survival mentality.

This Awareness indicates that this is in reference to - the alien situation as well as concerns in regard to political international intrigue. This Awareness indicates that *It* wishes at this time to ask entities to step back, and refocus on life itself, not only realizing the importance of the urgencies at hand, but also to remember and reflect on the beauty and the refinement of life that serves as spiritual food. This Awareness indicates that there is and has been given to entities on the earth, great blessings in the form of art, music, dance, drama and other forms of artistic expression and refinement.

This Awareness indicates that it is important for entities occasionally to indulge themselves in these more refined areas of life that they feed their soul, that they may give that nourishment to the soul, give it the appreciation for life which is deserved. This Awareness suggests that it is important for entities occasionally to treat themselves to a fine meal, a meal that is properly situated in an environment that is aesthetic in terms of beauty and harmony to the senses, to the appetite, to the feelings of the entity.

Indulge Yourself in the Beauty of Music

It is important that entities indulge themselves in the beauty of music, particularly the classics and those things, those musical tunes and melodies that uplift the spirit, that carry with them a certain amount of actual beauty and enjoyment for the soul. This Awareness indicates that it is not referring particularly to the stirring music that pumps up the adrenaline or causes the energizing of the body toward heavy activity as in much of the music of the youth, the heavy metal or rock and roll type of music. This type of music may have certain benefits for some entities needing adrenaline boosts of energy.

This Awareness is referring especially however to music that touches the more refined areas of feeling, music that touches the entity's more subtle and sensitive levels. This Awareness suggests this music touching the

sensitive areas of emotion as that which can serve as nourishment to the soul, to the more subtle feelings that entities may experience. This Awareness indicates that entities can also benefit from the enjoyment of plays and dramas, in some cases movies, particularly movies that have a special message to uplift the spirit.

This Awareness indicates that *It* wishes entities to on occasion indulge themselves in these areas that uplift the spirit and offer a kind of recreation and enjoyment for the soul to indulge itself in while the entity takes a break from the rigors of the war for survival that seems to be prevalent on the earth plane at this time in the many areas of life: economic, social and personal.

The Death of Classical Music?

FOLLOW-UP (AVATON):

A rather distressing sign of our times is that the classical music stations across the country, which once were rather abundant, have now been reduced to something like 15 or 20. In Seattle, there's only one real classical station left (there used to be five) and it's endangered because the station is up for sale. All these stations have been converted to formulas that make money so that advertisers will run ads and this is what they call rock and roll these days, or Top 40, or just schmaltzy, uncreative boring types of background music like Musak. Does Awareness see this trend as continuing or hopefully, will it be turned around so that good music will always be available to the masses?

COSMIC AWARENESS:

This Awareness indicates that it will turn around when there is a demand for this type of music; that it does not need to be the most in demand, but there needs to be some demand for such music, even if only an amount of few percent of the people seek to have classical music aired, there will be advertisers willing to put forth money to pay for such airing.

This Awareness indicates that when entities do not care to hear the music and products are not purchased from the advertiser, it will surely cease to be broadcast for any length of time once the books reveal the advertising does not pay off. This Awareness indicates that entities wishing good music may need to support those advertisers and those stations that offer such music. Awareness indicates the alternative is for individuals to purchase the classics to play in their own homes, on their own recorders; that there are many great works available. The majority of entities are not familiar with the classics and do not know what names to choose from in purchasing music. This Awareness suggests it would be helpful to list certain recommendations in regard to classical music that have been popularized over the years, the popularizing of such music indicating that the music is valued by a great number of people.

This Awareness indicates as entities hear certain themes, they often recognize the theme, but may not know the name of the tunes, or know the composers of the music, and therefore are unable to purchase the music themselves. It is sometimes helpful to these entities to have a source or someone who can supply them with the names of the music and the composers so that they can purchase the themes and the music they have often heard, but have never been given title to.

This Awareness indicates there are many entities who appreciate classical music without knowing the name of the music, or how to acquire the music for themselves.

Kids today Don't Know Mozart but do Know "Elvira Madigan"

FOLLOW-UP (AVATON):

A good example of that was back in the 60's or early 70's, a soap-opera type movie called Elvira Madigan came out that seemed to touch the hearts of teenagers, and in this was a theme taken from part of a Mozart piano concerto (number 21) and ever since, that music has been referred to by these people as "Elvira Madigan," and the people I've talked to seem to think it came out of Hollywood or something, but they really liked the music, little knowing that it was written by Mozart 200 years ago.

COSMIC AWARENESS:

This is an example This Awareness indicates that there have been many many instances in which Hollywood has used classical music in its soundtracks and back-grounds for movies, and entities become enchanted by the music of these movies and seek to acquire the music by looking for the music of a particular movie, without knowing that the music is reproduced, perhaps in many variations in the classical bins.

This Awareness indicates that the colleges often offer music appreciation courses in which classical music, along with other types are listened to and a good instructor can help entities to understand history and the background of some of the music, its origins and how it evolved from other composers or musicians or other works. This Awareness indicates that this understanding can lead entities into greater appreciation of the music and this can also add to one's more refined appreciation of the arts, and energies that delve into the creation of music.

This Awareness indicates that even knowing, for example, that your favorite composer studied under an earlier composer can help you to appreciate the works of the earlier composer. This Awareness indicates that once this occurs, you may find certain passages and nuances in the music of the earlier composer that you appreciate more because you can see how your favorite composer derived certain qualities, certain training or certain aspects of his or her music from the earlier composer.

This Awareness indicates that all of these things can help one to appreciate more thoroughly the beauty that lies in the archives of the past. This Awareness indicates that even knowing a piece of music served as a background or to help carry the story for a ballet or for a play or a soundtrack in a movie; even knowing this much can help you to appreciate the music even more.

This Awareness indicates that many times entities are not even aware that a favorite passage was used in a particular play or presentation as part of the soundtrack for that presentation. This Awareness indicates that once they realize that the music was composed specifically for the play or for the presentation, the music takes on a new level of meaning and is appreciated even more.

"HE HAD A BAD CASE OF THE HICCUPS AND HE WANTED ME TO SCARE HIM, SO I HANDED HIM THE GAS BILL..."

Learning to Appreciate a Good Painting

This Awareness indicates that it is simply a matter of developing appreciation of what entities have contributed by way of energy to the development of art and beauty for the enjoyment of others. This Awareness indicates that as it is in music, likewise in painting; that entities may look at a beautiful painting and may also recall scenery that they have experienced during their vacations and they may compare the painting with the actual scenery and decide that the scenery was more beautiful than the painting, and thus dismiss the painting, but if the entity realizes and understands more about painting, such as the types of brush strokes or the types of paint used, or the way in which light can be built with paint to appear to reflect from the canvas, as though it were moonlight or the setting sun; one can begin to really appreciate what the artist has attempted to do, or what the artist has accomplished in the painting.

But if one knows little about painting and cares less, then to look at a painting may not seem as impressive as the remembrance of a scene at some romantic interlude in one's life, and therefore the entity dismisses the painting without feeling any great appreciation for it. This Awareness indicates the same may be said for music or for movies.

Appreciating Music Because of Nostalgia

Often an entity appreciates music, not because it has an intrinsic beauty, but because his childhood sweetheart was at the prom with him when they played that tune, and even though the tune may be quite infantile in its lyrics or musical qualities, it recalls for the entity a time of personal enjoyment and the entity may appreciate the music simply because it has nostalgic appeal, during a time of his or her life which was enjoyable at the moment.

This Awareness indicates that this kind of nostalgic attachment to a theme is not the same thing as true music appreciation wherein one learns to appreciate music presented by another who has spent years or has great natural talent in composing themes or harmonies or rhythms that have a universal appeal. When one can understand what goes into the making of a beautiful piece of music, one can appreciate the music even more than if one simply hears it and thinks in terms of the environment of the music that he or she is hearing and does not particularly care for the environment, and therefore classes the music along with the environment.

Lyrics, Poetry and Slogans

This Awareness indicates that the same can be said for lyrics and for poetry. Many entities couldn't care less about poetry, but they love slogans, especially political slogans and they will repeat the political slogans or verses from some politician or writer, or some other field or perhaps a religious slogan, and they will consider themselves to be highly evolved and intellectual because they have a good slogan that they use and it sounds good and impresses others who cannot think for themselves, and the slogan itself may have the ability to influence.

This Awareness indicates that many entities do not understand why the slogan influences. They do not understand the principle behind creating slogans or throwing out influencing slogans, but they enjoy using them. This Awareness indicates if entities would take the time to study some of the rhetoric techniques, some poetry and poetic techniques, they might discover greater appreciation, even for the slogans and they might even be able to write slogans themselves that influence and carry weight.

This Awareness indicates that when entities become capable of understanding what goes into the creation of others, the artistic expressions of masters, whether it be dance, music, drama or rhetoric, when entities understand what goes into these, they tend to appreciate much more, but they also learn to analyze and think beyond the slogans, beyond the appearances and to see the logic or the illogic, the lack of logic that lies behind these things.

Different Views of the Movie *Star Wars*

This Awareness indicates that one who sees a movie such as for example, *Star Wars*, who has never before seen a movie, will not see the same movie as the one who sees *Star Wars* from the eyes of a person who is familiar with filming techniques, with script-writing, with directing and with special effects used in the making of films. That entity will see something in greater depth than the one who has never attended a movie before, and sees the same film.

Likewise, with drama or classical music or painting or any other of the great arts. This Awareness indicates that entities do need to learn something about these things in order that their own appreciation of life itself expand, for when they begin to truly appreciate the works of great artists and the artistic expressions available they experi-

ence a greater awe, in regard to the human experience and their own life experience.

Much Richness in the Feast of Life but Little Appreciation

There is so much richness involved in the feast of life, but so little appreciation from the masses. They simply gorge themselves and spit it out, without knowing how truly tasteful much of it is. This Awareness indicates it is likened unto the entity who, having been fed a diet of fast-food in cheap restaurants, upon entering a fine restaurant with good cuisine, cannot stand the food because his taste buds have not been trained to appreciate anything cooked in quality oils or spiced with a great understanding of a classic chef.

This Awareness indicates that entities tend to need training or to develop taste in quality, for quality cannot be acquired cheaply, and many entities are quite satisfied with the fast cheap thrill that comes at the drive-through window. This Awareness suggests that these things do not add to the quality of life, even though they may provide great quantity of experience to the entity and this lack of quality in one's life tends to develop not only in what one receives in terms of their reception of food, music or visual sights, it also tends to affect the way they approach life in terms of what they get out of the important things, such as marriage, family and occupation or career.

Cheap Thrills & Fast Food Often Make Cheap Marriages

Many entities, satisfied with cheap thrills and throw-away fast food containers will often find themselves also caught up in cheap marriages that have little chance of survival, with throwaway ex-wives or husbands and families, and they walk away or throwaway their spouse and family because they do not have the qualities needed to make a marriage work or to have the devotion necessary to carry love through difficult times. They simply want pampering and if they cannot receive sufficient pampering, they seek a cheap thrill from some affair or some other local Joy peddler.

This Awareness indicates that the refinement in life helps entities to develop quality in life. Quality in life is far more important than quantity. It is not how many you have eaten, how many you've seen, or how many you have produced that is important. What is important is how much each meant to you and did you acquire great nutrients for your soul and life-worth from the acquisition you received from seeing something, from eating something, or from being intimate with someone. Have you truly grown as an individual to become better for the experience, or did it leave you wanting more because the experience was shallow and meaningless to you

Discernment and Appreciation Needed for Each Experience

This Awareness indicates that if you have had the experience but it left you feeling empty, it may not have been the experience itself, it may have been your attitude toward the experience that caused the empty feeling. It is a matter of discernment and appreciation, learning to get the most out of each experience you encounter in life, even if those experiences are far between and rare. If you encounter an experience and gain greatly from it, it can be much more valuable to you than if the experience is repeated redundantly again and again and again in a meaningless fashion.

Will the Humanities Ever Return?

FOLLOW-UP: (AVATON)

Awareness, back when I went to college, courses in the humanities were required in almost all colleges and universities and had been up til that time, and to me, those courses were probably the most valuable courses I ever took in my life, but unfortunately in the last 20

years, from what I've read and the people I've talked to who've come out of colleges, they have phased out the humanities and they've introduced computer science and other high-tech courses and courses designed to turn the student loose into a corporate world where hopefully he will excel, and I've been reading lately that a little public awareness now is focusing on this and the humanities are being reintroduced into some colleges as an option.

Does Awareness see this as a continuing trend or have the humanity courses had their day and will not really have any force in the future of educating students?

COSMIC AWARENESS:

This Awareness indicates that it appears there will be a reintroduction. They will be brought back as part of a cultural move to reintroduce appreciation for the finer things in life, for there has been a kind of stripping away of the quality of life. It is as though one can be made to function and look alive and act like a living being and carry on activities of a living being, but have very little appreciation for life itself and without the appreciation of the humanities, the arts, the finer things of life, such entities are almost likened unto naked robots, naked in their emotions, having little love or emotional qualities, because they cannot appreciate what is valuable.

Many Appreciate Paychecks and Status but Not the Arts

This Awareness indicates they are only able to appreciate such things as paychecks and promotions and the status they can acquire in their society. This Awareness indicates that they enjoy watching some of the creations of those who remain artistic, but it is more in the sense of appreciating the art for its social value rather than for its intrinsic value. They would not climb Mount Everest because its there. They would only climb it because they were paid to do so, or could somehow turn the experience into a money-making project.

This Awareness indicates that all of this has cheapened life and many entities are beginning to feel that they have been cheated and those who still can appreciate the qualities that are often found in life, are being sought to help feed those who hunger for quality but who have found nothing but quantity. This Awareness indicates that quantity has given entities things, but they still have a need for quality. Quality implies value. Quality implies abundance, and many entities have been taught to seek abundance, but many are also desiring value in their acquisitions and experiences.

Bill Moyers Proves Public Demand for the Humanities

This Awareness indicates the uptrend in recent times in certain television presentations, such especially as represented by many of the presentations given by Bill Moyers and people like him, are an indication of a public demand for better appreciation of the humanities. This Awareness indicates the recent presentation on public television by Bill Moyers in his interviews with Robert Bly, the poet, in his expressions relating to a gathering of men, wherein this poet speaks of men and their psychological problems which they cannot express easily to women, but find they can express it in a group of men, mostly having to do with conflicts that they still carry in regard to their father and in the upbringing they have received, this kind of programming can add great quality to an entity's understanding of themselves, of their lives.

Likewise, Bill Moyers' interview with Joseph Campbell and his research into mythologies as that which adds great understanding and broad information in regard to comparative religion and myths, and this can give a great quality to an entity's life through more exposure to

the energies that lie behind myths and religions and tie them together.

This Awareness indicates that there can be no substitute for the enlightenment that comes from such thinkers that can help to give entities so much peace or understanding when they have been given the opportunity and insight that these thinkers offer. This Awareness indicates that numbers and technologies and technological programming cannot satisfy these human needs and though one might be an expert with computers, one might still carry a great pain from childhood problems related to one's parent, one's father, or might carry resentment toward the mother or toward other members of the family because of not having a clear understanding of one's own abuse as received in childhood.

Poet Robert Bly Describes the American Man

This Awareness indicates as Robert Bly stated: "All one needs to do to be an American man is to be born in America and to be abused psychologically or physically by the father, and run to the mother for comfort, and the entity will be an American citizen, an American man, and will follow through all of the rest of his life, replaying abusing their children for not being manly enough, and always running to women for comfort and never being able to express themselves to their father.

This Awareness indicates that entities can gain so much by association with those who deal with the humanities, the arts, the social sciences, history. Science alone creates a sterile personality that may have facts and figures and may be able to produce data and structures that operate in ways that can be useful in a technological sense, but it is the humanities, sciences, psychologies, art and history that give meaning to life, that help entities to find something worthwhile in all of these efforts to achieve.

This Awareness indicates that as entities become more saturated with the humanities, that depth of perception and appreciation of life increases greatly and allows them to have qualities that are not only appreciative of life in its many facets, but are appreciated by others who seek also to find theme qualities and to learn to appreciate life and have respect for the lives of others. If you cannot appreciate life yourself, you are not likely to respect the lives of others.

—HOW TO GET THIS NEWSLETTER BY MAIL— EVERY 4 WEEKS ! (More or Less)

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will all be asked at the Passing Over).
