## THE COSMIC AWARENESS FORECAST FOR THE YEAR 2007

## THE COSMIC AWARENESS FORECAST FOR THE YEAR 2007

*The Law of Love is given)*

### COSMIC AWARENESS:

This Awareness is prepared to commence this session at this time, and asks that the questions be given for this Awareness.

### QUESTION:

We ask that you please give us a forecast for the coming year of 2007.

### COSMIC AWARENESS:

This Awareness is prepared at this time to look forward in that which is known as 'time', and bring forth possible scenarios and paths that could develop and open up ahead in the year designated as 2007. Before this Awareness looks forward in time, *It* wishes first to do a review of *Its* predictions for the year 2006, this being the present year that you experience as human beings on this planet that uses time as a measurement of frequency. This year was eventful in many ways.

This Awareness in *Its* predictions last year spoke of certain events that *It* foresaw as possible events for the year 2006. One of those events that *It* foresaw was the present administration coming into disrepute, especially the president: George W. Bush. This Awareness spoke of a scandal breaking in the spring of 2006 that would continue to build and build until a timeframe of several months was reached, so that in the fall of 2006 there might actually be a scandal that would cause his downfall.

#### A Review of the Year 2006

This Awareness wishes to review the year, and to point out that around the period mentioned originally, this scandal did occur concerning the phone-tapping of American citizens and this was part of that energy that this Awareness foresaw at that time. On some level though, it was contained, and actions were taken that diverted the energies. A lot of the energies were covered up and not allowed to be reported on. This buildup did indeed occur, but it was not reported on. It was downplayed, and not allowed to be given public review. This is all part of the actions of secrecy and deception that involve the governments in power in the larger nations of this world.

The energies did indeed build against this president known as George W. Bush, and there were times throughout the year when it appeared that there would be an explosion of opposition against this man, but somehow everything always seemed to be matted out and dulled out and leveled out. Around the anniversary of the year after the hurricane in the gulf region that hit New Orleans; Katrina being the name given to that hurricane that hit the whole southern region of the United States; that there were voices of opposition raised against this president and his government who had failed in their promises to help and restore the people as quickly as possible, and many people have not been able to move back, having lost their homes, their livelihoods, their lives, and many of the planned constructions and repairs had not actually been undertaken, nor are even seen by this Awareness as being available to those entities in that region in this year coming. There was opposition and displeasure voiced against this president

at the failure of his regime to restore that which had been lost, and yet again, this was somewhat leveled out and lost in the void.

In the latter part of the fall year energies were building against this president now in relation to the building opposition of this great nation, the United States, still losing its young men and women in an unholy war, a war that is becoming more and more unpopular. This Awareness wishes to point out an action that then occurred as a blind front, a deception to take away attention from the president, to waylay the energies, to derail energies of opposition against this president and his regime.

#### Donald Rumsfeld Became the Scapegoat Diversion to Take Pressure Off President Bush

It was determined and decided that a scapegoat must be offered, for this Awareness still suggests that the energies were building that could have been potentially catastrophic for the president and thus, the whole regime. Thus a scapegoat was offered and given and that scapegoat was the Defense Secretary Donald Rumsfeld who was offered up as a diversion, a scapegoat, so that people could feel somewhat alleviated in their angers against this regime for the nation's presence in an unpopular war. This man Donald Rumsfeld gave himself in this way so that the attentions and the energies would be taken off of the regime, and this was indeed partially the case.

The people's need to blame someone, to bring someone down was somewhat satiated through this sacrifice of the Defense Secretary, but this does not affect this man personally, for his knowledge and knowing of the truth behind the regime knows and sees that the regime is simply the figurehead and the president is simply the top figurehead to back up a power elite hidden in the background that has indeed been manipulating events, not simply for years, not even for decades, but for hundreds and hundreds of years; for eons even.\*

This deception and subterfuge and deceiving and waylaying and misleading are all parts used in misleading the public and taking their attentions away from real issues and real events and real people that are key to this process. The willing sacrifice of Donald Rumsfeld was an action to take attentions and energies away from the presidency as well as from the regime, so that the president would be safe awhile longer to carry out the plans awhile longer.

\*The Orion aliens who genetically-engineered us humans and consider us their slaves and that our planet Earth rightfully belongs to them. This could all be revealed soon. Ed.

#### How Certain Energies Can Change Predictions

This Awareness brings this out at this time to help the readers and the members to understand that even though certain energies are foreseen in a year ahead of those events occurring, that other energies can and will and do come up that apparently misplace the predictions or cause those forecasts to seem erroneous, when in truth, there was energy and power behind them and that they were simply altered as the events came close to occurring. This Awareness wishes to point out that the same was true with the geological events that this Awareness forecast last year at this time.

It was interesting to see how the events that *It* forecast in terms of the geological and geophysical events of volcanic eruptions and tsunamis along the West Coast did not seem to occur in the time frame forecast last year, nor were there hurricanes that devastated those areas that had been so devastated the year before. This Awareness wishes to point out that while catastrophic volcanic eruptions that this Awareness foresaw last year

were greatly alleviated by the simple bringing to consciousness of the energies at that time, this Awareness wishes the members and readers to understand that Awareness speaking of these events definitely brings into consciousness the possibility of these events, but also brings into consciousness energies that can dissipate the buildup of those energies.

This Awareness indicates that not only did this Awareness make forecasts of such events happening in that region around that time, but that there were many who also foresaw similar events, and made similar predictions. Were all of these individuals and all of these voices wrong? This Awareness again suggests that is not so. The bringing to consciousness alters the collective consciousness and that can alter the reality that will happen. This Awareness often speaks of these events so that it is brought into collective consciousness, so that they can be altered, defrayed, delayed, canceled. Those events were of such dramatic import last year that many decided that this was not a reality that they wished to experience.

This decision often was made on a subconscious level, and in the making of this decision, energies were given out that changed the course of a perceived reality, one that this Awareness was simply putting out there for consideration as a possible event given the timelines and the energy lines that this Awareness was able to look into at that time last year. This is always the case. This Awareness see the timelines, the possibility of events that could occur along certain timelines and this Awareness speaks of those possibilities, but this Awareness reminds the readership that the future is not set and the bringing into consciousness can indeed, simply by bringing this awareness into consciousness, change the future, change the possibilities that are available in the future.

This Awareness asks the members to always remember that they themselves set their own future, their own reality and it is based more on the energies of the moment that an individual is experiencing, versus knowing 100% what the future holds and how it will play out. The simple expression and speaking of a future does not make it so. It simply introduces possibilities of what could be so, what might be so. Sometimes the energies around certain events are stronger than other events and if enough people believe, then that event may indeed manifest, especially if there is no contrary energies to oppose such a thing from happening, or if there is a unity of belief because of the manipulation of the mass consciousness that will indeed make a prediction so.

#### **Earthquakes Did Indeed Occur in Oregon**

This Awareness again states that the future is not set, and that it is an individual's right to see their own future, to experience their own reality, to find their own personal timeline that does not necessarily coincide with anyone else's predicted timeline of events. This Awareness also wishes to point out that while the big events that *It* predicted, especially the geophysical events, the earthquake, volcanic eruptions did not occur in the areas mentioned, that there were indeed earthquakes in the Pacific, further out. These also occurring to displace the energies in the region this Awareness spoke of last year, that region being in the Southern Oregon/ Northern California region of the United States of America.

These earthquakes affected Hawaii, another state of the union, as well as Japan to a lesser degree. Also, earthquakes under the Pacific Ocean have occurred in that region also. By shifting the geophysical events out into the sea, the energies around the buildup were

partially alleviated, and did thus prevent the major events occurring that this Awareness spoke of last year, but this is okay by this Awareness for *Its* purpose was not to be the harbinger of doom and gloom and destruction, but to release into consciousness *possibilities* of events, possibilities that individuals could understand and realize and even prevent.

These events were indeed prevented, but this Awareness still must state that there is still energy around those areas that is still building up, but that it seems that at this time, those energies that this Awareness predicted for the year 2006 were largely diffused and delayed. This Awareness is perfectly okay that the predictions *It* made last year apparently did not come to pass. This Awareness is finished with this rhetoric of the last year, and the explanation of how energies are shifted and diverted and moved into other time lines or other expressions, and is prepared to move on to its forecast of 2007.

#### **An Overview of the Political Situation in the U.S.**

This Awareness is prepared to make *Its* forecast for the year 2007. *It* wishes to start by over-viewing the political situation of the United States of America, especially in relation to the current regime and the actions still to be taken by that regime in its attempt to dominate world events. This Awareness indicates that there will continue to be a buildup of opposition against the actions of the current regime overseas, in particular, in Iraq and Afghanistan. The people of the United States are becoming more and more disenchanted that their nation is involved in an action that is starting to be seen as unwinnable.

Public voice will continue to rise up against this action, and more and more politicians will stand up against the great country, the United States, being involved in this struggle. It is seen by this Awareness that the ultimate plan was to involve the whole region in a great struggle. It was planned and is still planned to draw other nations in that area into conflict. In particular the nation of Iran is seen, as is Saudi Arabia seen as being drawn into military conflict. It is the wish of this regime and the power structure behind this regime to bring the world to complete imbalance, especially in major regions where oil is available and where there is a power structure that is in opposition to the current regime and the current powers that be.

#### **The Grass Roots Movement of Opposition Will Continue to Grow**

What has occurred in this last year of 2006 is that a grass roots movement has very strongly grown up against the actions of the current regime and this grass roots movement will continue to grow into 2007, the voice becoming stronger and stronger. Even those actions of stilling the voice by not giving it public notice, by not allowing the voice to be heard through the media, of downplaying the actions of the people of America who are standing up against the war and against the government; even those will not be able to still the voice of opposition that is increasing daily and will increase during the year of 2007.

It is seen that this grass roots movement will touch more and more and more, especially as truths come out in the latter part of 2006. The truths have already begun to come at the time that this Awareness is speaking this forecast, and these truths will continue to come out as the year turns over into the new part of the year of 2007. These truths being about the present regime, their present involvement for other reasons than those stated and those given. The lies and the deceptions will become even more apparent, and even though the controlled press will attempt to mask over and hide these truths, the truth will win out and will be heard, be known, be given

and shared amongst many who are voices of truth, who cannot live and abide the lies any longer.

A surge is seen in the public attitude that will rise as a tidal wave of opposition, building and building against the corrupt regime, the corrupt powers. This is seen as an action that will carry on beyond the year of 2007, but that this is very important for this coming year. This action is seen as raising up and gaining strength, up until and especially till that time in the middle of the year of 2007, around that summer solstice period of time in June 2007, and rolling into July 2007, for there will be a backlash of sorts against those powers that be, as the truths that have been hidden are once again and totally revealed and the deceptions are also revealed.

#### **The Hidden "Powers That Be" Are in a Desperate Situation**

It is seen by this Awareness that "the powers that be" are in a desperate situation at this time and have been using, since September of this current year of 2006, tactics to displace attention, to hide the truth. There is seen by this Awareness a certain desperation that carries from 2006 into 2007. This is a very strong period of time, both astrologically as well as just physically, of trying to make those things happen that this current regime wishes to create. There is an almost desperate sense around these actions, for it is seen that if these actions are not carried out by June-July of 2007, that the present powers that be that hide behind the regimes will start to lose their strength. As that tidal wave of opposition, as the voice of the people starts to be heard by more and more, they will start to lose their power and their effectiveness to keep the people in the darkness, keep the people in ignorance, and that a new force in the politics of this great nation known as the United States of the America that will move energies even more forward.

The people rejoiced with the transference of powers in the latter part of 2006, when the Democrats took over the power base of Congress and the Senate, but this Awareness sees this as a continuing of action and energy that will sweep forward, carrying its way forward in the elections that are upcoming, and that those voices that started several years ago with the Kerry campaign to dispose President Bush will again come together and this time will have an advantage, will have strength, will have power, and that this crusade that was begun in the Kerry election campaign that was seen again in the democratic primaries will continue to roll on and gather strength as ordinary people have had enough of a regime that has lied to them, that has deceived them, that has betrayed them, and this becomes more and more realized and understood by ordinary people who are finally starting to "get it".

The energies are seen and understood by those powers that be as being in danger of being usurped and swept away, and that is why there is such a desperation in their attempts to push forward at this time with the plans that were drawn up years before. It is seen that the current president, George W. Bush, will continue to fall in popularity ratings, and his obstinacy and stubbornness will play more and more against him, especially his obstinacy and stubbornness to change the direction of the nation in its war efforts. It is seen that this man is starting to feel the pressure against him, especially with reports coming out in the latter part of 2006 that say outright that the war is unwinnable and that there is a need for a different strategy.

#### **A Dark Force Possibility: Assassinate the President**

This Awareness does see also an event of possible magnitude that could shock the nation from a political point of view beyond anything it has experienced for a

long long while. This Awareness at this point wishes the readers to understand politicians are often seen as pawns in a game, to be used and abused as fits the needs of the powers that be. Sometimes this even involves the sacrifice of a pawn, a player, for what is perceived as the greater good, the greater benefit. This is exactly the action that was occasioned with the resignation and sacrifice of Donald Rumsfeld, to take the heat off, to take the attention away, as an illusionist would do when that illusionists misdirects attention to the left hand while the right hand hides the ball, the object which it does not wish the audience to see.

The sacrifice of Rumsfeld was such an action, to take the attention off of the other actions and intents of the government. This will prove to be only partially effective as the voice of opposition continues to raise against the government and their actions, and that the powers that be see that another stronger action must be taken, and that this is an action that this Awareness sees as a possibility, and this is the action of sacrificing the president, to take attention away from what the powers that be wish to cause to happen.

It is seen that this president may be sacrificed so that the mass-consciousness of the United States people may be shifted and moved away from their opposition, so that popular support of the people for their government would be such that if the president was assassinated, sacrificed, the people would rise up against the enemies of the United States once again; the enemies being perceived as the same that are being touted at this time: the Arab people, and the Arab Muslim Islamic faith.

It would be an action to galvanize the people against the enemy, to bring them back in line to the purpose and the intent of the powers that be. This Awareness uses that phrase "powers that be" as a way of understanding that there are powers that lie behind the presidency, behind the governments of the federal and state levels. Indeed, those same powers that be are the powers that are behind governments of *all* nations around the world, and not just the United States of America.

It is perceived that in the year 2007 an action is contemplated that would bring back into alignment the people of the United States to the planned actions and course that the powers that be wish to pursue in 2007 and beyond, that being the domination of the planet and the bringing of the planet to a state of war and conflict and destruction. If those powers that be could sacrifice thousands of lives to make their plans happen, then what would it matter to sacrifice one life, even a life of someone who is a puppet and pawn of their own kind, their own making? It is seen that this action would bring back into alignment, bring back into the fold the people of the United States of America, it would be considered a good action, a good plan.

It would be a way of shocking the people to such a degree that they would rise up again and say "Protect us! Show us the way forward! Tell us what to do! We will not put up with such an action! We will strike out against our enemies! We will show them!" This manipulation of the people has happened before many times. The 2001 actions against the people of the United States of America were such actions; to cause to come into play a series of actions that were planned out years in advance, and that such an action of assassinating the president would be in line with such a course of action.

#### **Be Aware and Don't Cry for Blood if this Events Happen**

This Awareness wishes the readers and members to simply be aware that if such a thing happens in 2007, that they do not energize this event, that they do not rise up in opposition of those alleged enemies that will be

presented at that time, but rather keep calm and see through the events that are being manufactured to cause a knee-jerk response of the peoples of the United States; to keep calm and to spread calm and to ask others not to simply howl for blood because the mass-media will paint a picture that the assassins were Arab terrorists.

This Awareness also suggests that the wave, that surge of opposition stay strong, stay focused, and does not fall for that which is a *produced event* and is able to see through it. This Awareness does suggest that this would be a last desperate measure to regain the control that is slipping away from the powers that be. This Awareness wishes the membership to believe and understand that as they seek the truth and are open to the truth and as more and more are open to the truth and seek the truth, that the truth *will* be revealed, and *is* being revealed, and may forestall such an event from occurring.

This Awareness simply sees this as a *possible event*, that could occur in the later Spring period of 2007, and wishes the membership to already think of an alternate scenario and possibility, already put their energies into the truth being revealed and the lies and deceptions being exposed so that the truth will win out. This alleged event, as dramatic as it may seem, as shocking as it is to the psyche of the people of the United States of America is simply *one* planned scenario that has a strong likelihood of occurring but is not a guaranteed event.

This Awareness wishes to speak of other political events in 2007.

#### **In Canada and the U.S. a New Way of Things**

There will continue to be a buildup of opposition already expressed, not simply on the federal level, but that many state elections will also see a shifting of power, will also see more and more individuals coming forth who have a greater concern for environmental and human issues, and 2007 is seen as being a year of transition away from old party lines and an opening up of new possibilities, and new concerns and new ways of things.

This is also seen as something that has started in the neighboring nation/state Canada. Recent political events have occurred that show new leaders coming forward. In that nation, a new leader of the party that is known as the party of opposition, the liberal party, was recently elected, and that this man, Stephan Dion (sp) is a voice of reason, is a possible leader with a greater picture in mind, who could serve a greater truth. He is seen as a spiritual man of great wisdom. His election as the new leader of the opposition bodes well for that nation/state Canada. The current Prime Minister Steven Harper is seen as a man who is becoming more and more drawn into the pock of the powers that be in an obvious way, and that he may also see that he needs to change.

It is seen by this Awareness that this will present the current leader of the state known as Canada the option of becoming even more entrenched into the power structures of the powers that be, for he already is in the pocket of those powers, or that he may start to see the signs of the times, may sniff out the scent of change that is in the air, and it may be seen that he will start to change direction somewhat in 2007. He may perceive and understand that there is a man in opposition now, and the people are going to move towards the new leader, versus that man known as Steven Harper, the present Prime Minister, and that Steven Harper may get a sense of this in 2007.

#### **Some Factions in the European Nations are Still Hidden**

World politics and world events will continue much along the lines that they have been right now. There is a

much more balanced approach in Europe, but that it is also seen that the powers that be are also in control of those older nation/states. It is seen that there is a subtleness about the politics in the European union that does not come to the surface as violently as it seems to do in the United States. There are factions growing in the European nations that are still hidden at this time. 2007 is not seen as a year of disruption to the European union, but more of a consolidation of power in those unions. Europe is seen as the next great power.

It is seen that the United States will become more embroiled in a person power struggle that takes their attention away from playing on the world stage, and instead keeps it focused on national events at the national level, and that the European nations will continue to consolidate their infrastructure, their influence in the world; that it will continue in a way that is unperceived by North Americans, unless those who are in the know give voice to the events happening in Europe, but it is seen that mostly the attention will stay focused on regional, as well as national and local events and concerns. The European nations will more or less carry on their agenda into 2007.

#### **China Too Has an Agenda**

There is not much more that this Awareness has in relation to the world politics. Not much is seen for the African nations or the Asian nations. It is seen that the African nations are in a deep struggle with illness, especially AIDS that is devastating their continent, and a lot of focus is spent there versus an international level. The Asian countries are seen to continue to grow in power. It is seen that China will continue to grow in strength and power throughout 2007, but it is not seen that it will be an outright threat during this upcoming year, but attention must be paid to China, for they too have an agenda.

It is seen that the powers that be that this Awareness has referred to over and over again are playing out mostly in North America and Europe and that there seems to be a different power struggle happening in China, a different regime of powers behind that nation. This nation will continue to grow in its power over the next several years. There is not much that is seen in any singular way that can define any problems with China in 2007. This Awareness simply asks that attention be given to China and its growth and the direction it is taking.

#### **A Challenging Year Economically: A Possible Collapse**

This Awareness wishes now to speak on other issues, especially economic issues. This Awareness perceives that 2007 will be a challenging year economically, especially if there is a collapse of economic systems. This Awareness sees that there is some problem in the stock market; a possible crash in the stock market in 2007, but that this crash would not be as serious as crashes in the past, especially the great crash in the 1930's and the Great Depression that followed. There is instability at this time, and this will continue into 2007. There are new heights being reached daily throughout 2007 but there are also falls. It is seen as a roller coaster ride. Let those who would play the market be aware of the turbulent nature of the economy and of the stock market and be prepared to ride the roller coaster to heights and depths.

This Awareness sees that the United States of America will indeed have economic woes and problems as it seems to be on a course that is disruptive, is difficult. This will be reflected in the political situation that will then bleed through to the economic situation. There is seen to be a decline in the economic well-being of the

United States of America. It is recommended that individuals perhaps consolidate their personal finances and resources. This Awareness has in the past suggested that the buying of gold and silver may be a beneficial action to take, and this Awareness again makes such a suggestion. Individuals should be aware that there is a possible collapse coming for the United States economically, but this does not mean that individuals need to be impacted tremendously if they are prepared and aware.

The energies around the United States of America in 2007 are very scattered, are very turbulent. It is seen that Canada will be much stronger economically and will become a greater world leader and economic power, and that the European union will also economically prosper. The currency known as the Euro will gain strength over the American dollar, and it is possible that the American dollar falls from its leading position, with the Euro overtaking it. Much energy will be lost in the United States of America if it attempts to hold on to its title as the leader of the world. These are energies that will be turbulent in 2007 and this Awareness simply recommends to the readers and to membership to consolidate one's resources, and to be prepared for a flux cycle, where nothing is guaranteed and it is important to be aware that the economic and political energies will be in flux.

#### **Time Once Again to Stock Up on Food Supplies**

Therefore, this Awareness suggests that the membership be prepared for the year ahead. Preparations can be made that allow the members to see through any times of hardship, times of shortage such as food shortages. With the flux of economic fortunes in the United States, many will be affected and many businesses perhaps go under. Availability of resources and supplies may become harder to obtain. If events occur in regional and local areas that cause hardship and difficulty, the members should be prepared for this and stock up on essential food items that are easily stored and can be rotated throughout the year.

This Awareness suggest the Mormon plan of having food supplies in reserve for 12 months at least is something that members should consider doing for themselves. This Awareness suggests that this is not a bad idea, simply because there are events foreseen on the horizon that could cause shortages and hardships and that when one has some degree of preparedness, that this will at least make possible the maintenance of a degree of comfort during the times of shortages or hardships.

#### **U.S. to be Hit Hard by Extreme Weather Patterns (Weather in 2006 was Controlled for Political Reasons)**

This Awareness perceives that 2007 will be a year of extreme weather and climatic conditions and not only will the flux be in regard to the economic and political climate of the United States of America, (and of course to the rest of the world also) but *It* also refers to a flux in the climatic conditions of the world and that the United States is seen as being hit hard by extreme weather patterns. This is a continuance of weather patterns and climatic conditions that the United States experienced throughout 2006. While the hurricane season proved not to be anything close to what it had been in 2005, in fact many wondered: "What was the big deal? Why become so concerned or worried about the forecasted hurricanes that were to hit in 2006?" This attitude must not be carried over into 2007.

This Awareness suggests that 2006 was a controlled weather season. For certain political reasons, storms that were created and released onto the Gulf region of the United States and of the Caribbean, Bahamas, Mexico, were somewhat constrained and contained in 2006,

when compared to 2005. It is seen that there was a political reason for this. The present regime, which is aware of weather control systems and weather manipulations to cause storms to be intensified and to be directed, were deliberately not used in 2006, and in fact were used to contain storms, to dampen down certain hurricanes that could have caused much more damage.

The political cost was considered too high. The frayed nerves and emotions and opinions of many who had been affected by the hurricanes of 2005 were feared by the regime. If political powers were not exercised, if the control of storms and the possible hurricanes in the region of the Gulf Coast were not deviated from highly populated areas, there could be a backlash if two years in a row killer storms and killer hurricanes would have lashed the continental US of A. Therefore, the technology that was used to intensify the storms: Rita, Katrina, Wanda; the storms of 2005 being often enhanced to create the damage that was done. This was determined and decided to not be the case. This technology was not used in 2006 to avoid the political backlash against the government.

It was felt that they had enough happening, enough on the plate in terms of the building dissention against the regime. The technology that was used to enhance the storms was used to decrease them, contain them, and even to deflect them, so, it would seem that the forecast of another horrendous hurricane season were wrong, and not even to be paid attention to, so that in 2007, they could be brought back and that people would not listen to the forecast, because after all, last year they did not come to be, but this Awareness again indicates that this is part of the manipulation that lies beyond the understanding of the majority to the people, and it is meant to be so.

This Awareness does see that 2007 will be a return to the extreme weathers that 2006 did actually bring to the continental United States: extreme cold weather, tornadoes, thunder storms, flooding in the Eastern side of the country; these extreme weather patterns will increase in 2007, and it is seen that hurricanes will once again lash the coastline of the Gulf areas as well as the Florida state line and up the Eastern seaboard. It is seen that there may also be increased activity on the Western side of the continent, coming up the Baja bay or peninsula and perhaps reaching deeply into California and areas along the Western seaboard; of intense rain-storms with flooding once again.

#### **Canned Foods and Preserved Foods are Recommended**

The extreme weather patterns give cause for many to be prepared to have those food stocks and energy stocks available in the form of canned and preserved foods. Frozen food is not recommended, for if energies go out, frozen foods will of course thaw. It is seen that dehydrated foods would be more effective, and that such foods are available for survival, but even canned foods and, preserved foods would be highly recommended by this Awareness, as would be stockpiles of candles and for those who have alternative heating sources, that there be a supply of wood or coal or whatever alternate supplies could be used for heating and generators.

This is seen as something that is advised by this Awareness to be kept in mind for 2007, for if the extreme weather patterns do hit, regional periods may be affected for several weeks in a row and that it is important to be able to survive times of crisis and hardship.

#### **Extreme Geological and Geophysical Events Still Possible**

This Awareness is still aware and foresees the possibility of extreme geological or geophysical events occurring. The area that *It* spoke of in *Its* 2006 forecast

is still seen as a possible region that could experience a cataclysmic event. While the energies were somewhat shifted away from that area, they have not been entirely dissipated. They have only somewhat been diffused. This Awareness does wish to say that *It* does not see the same magnitude as *It* did last year, but is still concerned. This is a region that could explode at any time.

Should this occur, then other consequences would follow: the shifting of the tectonic plates, as the San Andreas and the Cascadian fault lines slip, as regions of the coast sink, as the seas rise up in tsunami, as the ashes float across the United States; these would all be consequences of such an upheaval and such an event, but at this time, this Awareness does not see this event as being as prominent and pressing as was seen last year. The diffusion of the energies has bought some time here, and this Awareness speaks this again, simply to keep attention on this region, which can help continue to diffuse the situation so that the events will not occur again in 2007.

**As the Grand Cycles Completes, Mother Earth or Gaia is Awakening, Adjusting Herself and Evolving**

But be prepared and understand that the energies are building up; that planet earth, Mother Earth, Gaia is awakening, is in a state of flux herself. This Awareness wishes entities to understand that when this Awareness refers to Mother Earth, to Gaia, as "she", as the female, that is simply a designation of the kind of energy that is run by the planet. It is a feminine energy that supports life, but also takes life, for it is the life cycle including both birth and death and the journey between, and Mother Earth is in herself evolving and growing and awakening, and many of the actions that have been taken against her over the years are starting to have a deeper effect to the point that she needs to shift, to move, to shake off some of those actions that have been taken against her in mankind's ignorance and arrogance.

The predictions of 2012 very much involve the awakening of Gaia and the shifting and the moving so that she can readjust herself, and the geological events that this Awareness has spoken of are simply part of this action, of this adjustment of her own personal growth and shifting. While she supports life, she also supports death. Death is simply the ending of a cycle, so new life can begin, so rebirth can happen. At this time in the last remaining years before the completion of the Grand Cycle, Mother Earth is adjusting herself, and evolving into her own higher being, into her own next state of existence, and in her evolution and movement, the consequences will often be radical to the inhabitants that live on her surface, especially inhabitants who've lost their connection with her, who no longer are in harmony or in balance with her, who no longer can read her or understand the warnings that she gives so that they can move to safety, so that they need not be in those regions of shift and change, and this Awareness says that when Mother Earth changes and shifts and moves, the results are indeed dramatic, to say the least.

**Mother's Going to Shake, Rattle and Roll**

The year 2007 will see more action on the part of Gaia, of the Mother, as she adjusts her own frame, her own body and shakes off the poisons, the actions that have been inflicted on her for many years. 2007 will be a time of adjusting and shaking and rattling and rolling and the inhabitants of her surface need to be aware and prepared for this as this escalates toward the conclusion of the Grand Cycle of the Mayan calendar. (s

**Some Positive Events Awareness Sees for 2007**

This Awareness now wishes to speak of some of the positive events that *It* foresees for the year 2007. This

Awareness suggests that the spiritual growth will continue in 2007 and many more people will awaken to the strong inner calling that they hear and this will cause them to ask questions, to seek out answers. Some of this will be manifested into a political awareness and action, but many more will begin to awaken to a different order of truth and reality other than that which they have lived all of their lives and has been given to them as the Be All and the End All.

Many more individuals will awaken to the inner voice of this Awareness as *It* speaks to them on the various levels and gradients of consciousness and those individuals will, in their seeking, turn to organizations that provide a spiritual awareness and understanding. This too is seen as a tidal wave that is surging upwards, growing and expanding, and this expansion cannot be stopped or held back. 2007 will be a pivotal and monumental year for this action. This Awareness has already mentioned and spoken of that time around the summer solstice of 2007. Until that point it may appear to many of the Light Workers and Wanderers that there is no hope. Part of the reason for this is that it will be experienced that there is a sense of hopelessness, as the dark powers that be desperately seek to control the situation. It is more than control. The dark powers understand their time is coming to an end and their level of control and power over the masses must itself before the energies fly apart, and it is this flying apart of the energies of control that is foreseen for 2007.

**Light Workers: Hold the Course, Stay the Distance. Things Will Change Dramatically Better in June**

This is a fact to be rejoiced and looked forward to, but until that occurs in the summer of 2007 around the solstice and the times after, if may well appear that the corrupt agencies have total control and that the lunacy that is infecting the world becomes worse and worse. This Awareness asks the Light Workers who are reading this; the Wanderers who have been involved all of their lives in the action of bringing heightened awareness and heightened consciousness to this planet: "Hold the faith! Hold the course! Stay the distance!" Despite that sense of hopelessness that might befall them, they trust and understand that this too is about to change. This is part of the illusion of the powers that be in their last desperate death throes as they seek to assert their power for their last final desperate time.

After this point in 2007 much will begin to radically change, and this Awareness asks those who are the Light Workers, the Wanderers, the shakers and rattlers and rollers of the spiritual dimension on this plane of existence to hold their course. Hold the faith. The most turbulent times in the year 2007 will be the first half of the year and after that, after the summer solstice things will change and it will be as if a breath of fresh air is given; a new vision, a new sense, a new hope given that will empower the Light Workers, the spiritual warriors, and will give new hope and new meaning. Changes will be seen to happen more and more and more and this too is that which this Awareness sees for 2007.

**A Dangerous New Concept to the Authorities  
(A DVD Production Called "The Secret" Was Released)**

This Awareness also suggests that a new understanding, dangerous to the authorities, the powers that be; the understanding of how we construct and create our reality is starting to gain attention and is starting to have impact. This is the concept that the individual creates their own reality through their thoughts and through the emotions that drive those thoughts and beliefs. The year 2006 saw a seminal work being introduced: a DVD production known as "The Secret" was released. "The Secret" did not actually contain information that this

Awareness has not shared many times in the past. It is more that it is an idea whose time has come, and that the releasing of this DVD that speaks of the power to create one's own realities was seen as an idea whose time has indeed come.

More people than ever were exposed to this "radical" truth, this "radical" concept that the individual creates his or her reality through his or her beliefs, and this is especially so if it is fired by passion and emotional fervor, especially if any core beliefs that would oppose any creation of those beliefs are healed, exposed and released, so that there is no chance that the low self might sabotage the creation of beliefs. More and more individuals are beginning to understand this "secret", this truth, and thus, more and more people are creating the reality that fits them, and they are sharing and passing that truth on to others: loved ones, friends, and acquaintances.

It is not so radical an idea or concept any more: that we create our reality through the beliefs and attitudes we hold and the emotions we have around them. 2007 will see a continuance of this action of this sharing that reality is created by the beliefs that are held by the masses, but it starts with the individual, and therefore it is the individual's responsibility to create that which is in the highest alignment with spirit.

This Awareness suggests that the membership be reminded to create at the highest level, in the highest attunement with this Awareness, with spirit, a personal reality that reflects their connectedness to spirit and to this Awareness. As the individual creates on an individual level, others will take note, other will notice, and in noticing will ask why, and as they ask why it indicates that they too are opening to alternate understandings and truths, to the truth at the highest level, and thus, members of this organization, those that this Awareness calls the Wanderers, be prepared and willing to share the truth with those who ask, those who seek.

This Awareness suggests that 2007 will see more individuals asking and seeking as the quickening increases, moving the planet and mankind to the completion of the Grand Cycle; the Mayan calendar completing itself in 2012; that of course being an arbitrary time, and this Awareness has spoken that this time frame may be adjustable, given how quickly humanity wakes up and shifts into a higher state of consciousness.

#### Rejoice for 2007 is a Pivotal Year in Spiritual Awakening

This Awareness suggests that there is reason to rejoice 2007 as being a pivotal year in spiritual awakening; a monumental year, and that the first part of the year not be taken so seriously if one remembers that better is yet to come in the latter part of the year. This Awareness *Itself* rejoices that which *It* sees as the possible spiritual evolutionary course of humanity in the year and the years ahead.

This Awareness wishes to bring this rambling discussion of the time ahead, the year ahead, to a conclusion at this time. *It* sees 2007 as a powerful year, a year of change and flux, a year of challenge as well as hope. But the energies will continue on from 2006 into the first half of 2007, being a continuance of the latter half of the year 2006, but after the mid-point of the year, the summer solstice and beyond, a great shift and a great change. Many things will open, and many things suddenly for the first time will be seen as possible, and this new surge of positive energy will do much to bring things to a point of change.

While this Awareness has suggested some extreme events as possible in 2007, even the assassination of a

president, or extreme weather events or geophysical events, that everything is in such a state of flux, that there are many possibilities for 2007 and the individual must be prepared for almost anything in the year ahead. The individual must be positive about surviving the changes, as radical as they might be that may occur in the year ahead, and know that they *will* survive, they *will* come through, even if many around do not, even if many of the social structures they have known no longer exist after 2007, even if their nation changes to such a degree that it cannot be seen or considered the nation that exists now or that once was.

The spiritual journey that is ahead will see a great surge forward, and many who have been walking on this planet for many years will feel light-hearted over those changes that they will experience and see, but it is important to network with other Light Workers, to remind one another, especially through the darker first half of the year, that changes are coming, deep and profound changes, glorious changes, and to hold together and to hold the distance and to hold the course.

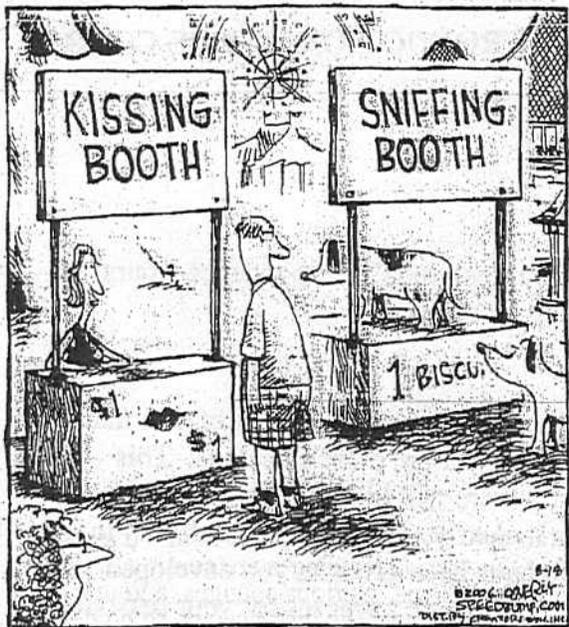

This Awareness suggests that 2007 will indeed be an interesting year, and that as the Chinese curse stated "May you live in interesting times!", that this will indeed be so of 2007, but this Awareness asks you not to consider this as a curse, but as simply a time of extreme changes, as possibilities that have been held for so long begin to emerge. These 'interesting times' are also times of freedom and great hopes and great possibility for the times that lie ahead. This Awareness wishes one and all a fabulous journey through the year 2007.

This Awareness is complete at this time.

(The Law of Gratitude is given)  
Emphasis is by the editor

"Now calm down there, ma'am. ... Your cat's gonna be fine ... just fine."

Excerpt CAC General Reading 12-13-06 Will Berlinghof Interpreter

Q) The Law of Love is given)

### An Extension of the Forecast for 2007

#### COSMIC AWARENESS:

This Awareness has an opening message at this time. This opening message is an extension of the forecast for 2007 presented by this Awareness, on the previous occasion. This Awareness wishes to delve more into worldly matters for 2007, as there are areas that this Awareness wishes to present at this time. *It* feels that *It* has answered sufficiently those concerns regarding the United States of America primarily, but does feel that *It* needs to speak more on issues around the world that would affect other parts of the world also.

#### Big Problems With Global Warming

This Awareness sees and suggests that 2007 will be a year of trials and tribulations for the whole planet. There are several issues seen concerning environmental issues, especially those issues relating to extreme weather and rising oceans and waters. The global warming issue will predominate in 2007, as more and more individuals become aware of the rising problem. It is not however, going to be the main focus. It will be a background issue as the waters continue to rise with the melting of the polar icecaps as well as the melting of the Greenland icecap.

These are issues that are increasing and will become even more of a problem in the years to come. It is noted that in the year 2007, that the increase of the polar waters, the fresh waters into the oceans of the world, will create bigger problems than in the past. Tidal surges will be even more extreme because of the increase in the world's waters, and this is indeed part of the story for 2007. But what will be even more the story is the unusual and extreme weather patterns that will be happening throughout the world and not just in the United States of America.

Asia is seen to have some extensive floodings in 2007 that will seriously impact and kill many people. The Bangladesh area of Pakistan is seen as a primary area where extreme rainfall will cause extreme flooding, leading to mass-destruction and mass-death in the year ahead. This is seen also in Northern parts of India as well as other areas of Asia, where typhoons, the eastern equivalent of hurricanes are seen to be a huge problem

in this year ahead. Australia is also seen to have some extreme weather conditions, but in particular: drought and higher than normal temperatures leading to extreme conditions and massive forest fire conditions in that nation.

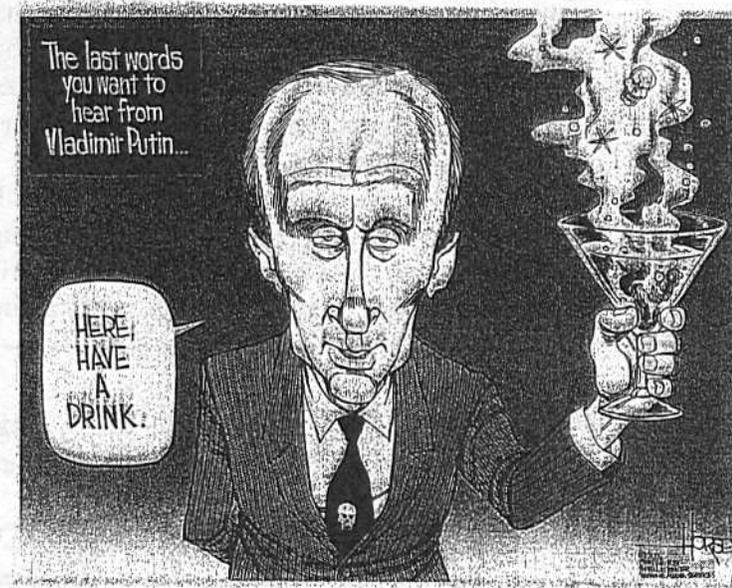

#### Our Planet is Adjusting Herself in Preparation for the 2012 Split

This is something that is part of an ongoing cycle that has been increasing over the last several years, but this is all part of the way the planet is adjusting herself, especially at this time when she is preparing herself for that splitting of the two planetary vibrations that are planet Earth at this time, as the two vibrations separate by 2012, thus creating two planet Earths on two different frequencies. Part and parcel of the problems that are being seen at this time are an expression of the increasing and the changing vibrations between the two planets. It is not to be understood in physical terms for it does not make any sense to consider two planets occupying the same space physically.

This cannot be done within the realms of the physical laws of this universe, but if it is understood that two planets at two different vibrational rates occupy the same place, intersecting one another, then it is easily understood how this could be so. The two vibrationally different planets can still hold the same space without causing mass-destruction of either planet. The vibrations still have certain resonance's that cross and those crossing points are where there are points of upheaval, points of confusion, and contrary or disharmonic energies, and it is in these places of disharmonic energies that there are on the planet itself, occasions of extreme weather and extreme conditions, including the volcanic earthquake conditions that this Awareness has spoken of in the past, and this is something to be aware of and concerned of.

These are indeed times, the planet over, for extreme conditions, and this Awareness has already spoken of a need to be prepared for such times when there might be a need to hold in reserve food stocks and other supplies that will help the entities pass through these periods of crisis and extreme situations. The world itself, the whole planet will be going through these situations; this type of energy in the year 2007, and this will increase into 2008, but that on the whole, the worst part of the cycle for 2007 will be that part of the cycle that is the beginning of it; the first several months of it, and that is what needs to be seen at this time.

This Awareness feels complete in its additional information offered to the forecast of 2007, and wishes now at this time, to go on with the questions available today.

## ORIENTATION LESSON NUMBER ONE

## Question:

Awareness, we're gathered here for the first trance lecture on the Correspondence Course in spiritual development. Does Awareness have an opening message?

## Cosmic Awareness:

This Awareness indicates the information to be given during these trance readings as that which shall in many ways be unique and different from many of the other teachings. This Awareness indicates that within the psyche of each entity there will be that portion of your consciousness which looks at this information and sees it clearly and does feel an affinity to this, even though there are certain other teachings which you have been given as you developed. This Awareness indicates that all of the teachings have had their certain purposes for your personal development, to reach that level where you are, and where you are is that level which is perfect for you at this time. This Awareness wishes entities to understand and to accept themselves as they are without being overly concerned to change or be different from what they are; for only when you can accept yourself as you are, only then is it possible for you to move on and become something else. This Awareness suggests that entities in reading these lessons to find a place wherein they can relax and not be overly concerned, wherein they may read casually or have another read to them or listen to the tapes of the readings while in a relaxed state so that you may experience the information as well as think about the words. This Awareness now suggests a pause.

This Awareness would begin these courses by explaining what *It* is and what *It* is not.

This Awareness is not a personality; *It* is not a centralized point of energy that moves about the universe from place to place or from time to time, but may be understood as likened unto an energy that fills space and exists throughout the universe from moment to moment, without aging, without changing, but simply as an observer and an experiencing energy. This Awareness is an energy of anti-matter, an energy of consciousness, an energy of life, an energy of love.

This Awareness suggests a pause. This Awareness suggests the animals be removed from the room. (Dog and cat removed.)

This Awareness indicates the energy, in relation to allowing the communication to flow from point to point within the universe, is that which needs to avoid points of significance in order to allow broad perspective. This Awareness suggests the action of removing the animals as that which allows greater focus of attention on the channel and the opening of this energy, whereby it may flow through the vehicle serving as a channel. This Awareness indicates each entity, regardless of whether or not that entity realizes this, each entity is a channel for Awareness. The opening up of your channel to allow a *clarity* to move through, as that which is the purpose and direction of all souls.

This Awareness indicates that all entities have it within their power to become clear and open channels for this Awareness to express through, and in that expression there becomes that unity with all others. The expression not necessarily being from trance level, often being from levels of music, sports, drama, business, service, diplomacy, teaching, nursing, healing, and other types of activity.

This Awareness suggests the energy entities refer to as their consciousness is close to this Awareness. Yet consciousness is divided into levels of vibration wherein there is subjective and objective consciousness, wherein there is that which has been referred to as the conscious mind and the subconscious mind. This Awareness indicates, awareness is Awareness wherein entities are aware the consciousness is of a certain level, this being ultra-consciousness. This Awareness indicates that this may be experienced only when there is no polarity, no judgment, no opinions about anything being examined. This Awareness suggests that wherein there is attention and discernment, and the discernment of what is, without opinion of what is, without value, without moral judgment - this is that which is this Awareness.

This Awareness suggests that this consciousness which is 'ultra' does serve as the spirit of the universe, the macrocosmic body, the universal man, the universal body which holds within it the solar systems, the stars, the galaxies. This gigantic body, known as the universe, may be likened unto a physical form, and the vitality and consciousness of this form fills the space between the particles, between the sun and stars, planets and galaxies. And in filling these spaces, there is an awareness which is just as real for the universe as your own awareness is for you. This Awareness indicates the universe as a living being, and entities residing within the various systems upon the planets, within the stellar systems, may be likened unto cells within the body, the organs, and blood streams of this universal entity.

This Awareness indicates that the awareness of this entity which is universal, which is cosmic, as that which exists in all levels of the universe, even as your own life force exists within all levels of your own body; even as this life force can communicate to each cell within your body, so likewise, this Universal or Cosmic Awareness can communicate with each soul within the universe. This Awareness indicates even as within your own physical body certain cells serve as messengers and relayers of information, such as certain nerve networks, likewise certain energies have moved into those vibratory rates wherein they become likened unto a relay of information and again serve to transfer messages from one plane to another.

This Awareness indicates that each cell has its own purpose within your body and each soul has its own purpose and destiny within the universe. And as these purposes are fulfilled, the cycle moves round and round, and that fulfillment of one action creates a situation or problem whereby a new action must begin, and in that beginning, the cells or soul does change and move into a new action. This Awareness indicates that even as cells within the body do die, so likewise souls living in a physical body also must depart that physical body and lay that down and move into new actions of creating a new cell, or physical body in which to function. This Awareness indicates this as termed reincarnation.

This Awareness suggests that at present time the vibrations are changing in such a manner that it will not be necessary for the cells of the body of this Awareness to pass through the action of decay and death. It will not be necessary for entities to drop their carcass in order to continue the movement of the soul. This Awareness indicates that entities are reaching now that level of consciousness wherein they soon shall begin understanding the laws and principles of alchemy in a higher sense, whereby they may regenerate the cells within their own body and raise the vibrations in such a manner that the aging process need not occur.

This Awareness wishes entities to understand that even as it is possible for entities in their soul form to move into physical form and create a body for themselves, so also is it possible for entities in physical form to assemble cells in such a manner that they are being created fresh, moment by moment. This Awareness indicates that more information on this may be given in later material. This Awareness suggests also that entities need to understand one basic concept

which will begin changing their entire attitude and viewpoint in terms of who and what they are and who they can be and what they can do: this being the concept of time. This Awareness indicates the following as being very difficult to understand in terms of third dimensional thought, yet may be experienced if entities move into high enough states of consciousness wherein the mind is placed aside.

This Awareness suggests the following information as that which will be beneficial for entities to meditate upon throughout the duration between this communication and the next, this being: *The universe appears and disappears every four-quadrillionths of a second*, and each new appearance of each new universe (each new four-quadrillionths of a second) is created entirely from the memory of the previous universe. This Awareness indicates for this reason, universes can change from moment to moment, miracles can happen that are unexplainable in any other frame of reference.

This Awareness suggests that any questions may be asked at this time.

Question:

Yes. In the message just given, Awareness indicated that every soul had a purpose and destiny; would Awareness please expand on that, particularly in terms of popular concepts of destiny, and clarify that?

Cosmic Awareness:

This Awareness indicates every soul has left that level of Awareness wherein all things were understood and seen clearly as a portion of that light which once was gathered in one particular area of the universe and then exploded in all directions. Each of these particles of light became a soul and moved in its own particular direction and has been either moving away from its source, or back toward its source; the movement back toward its source is its goal and purpose and destiny. This Awareness indicates this Awareness as its source.

Question:

In the opening message Awareness indicates that people could listen to the lessons on tape. Is that to be inferred then that these trance lessons could be made available to the membership on tape?

Cosmic Awareness:

This as according to your own will and is in the will of this Awareness. This Awareness suggests wherein this is done, the environment for listening to these lessons may be such that entities listening are lying down in relaxed states wherein there is warmth and comfort. For in these levels, entities can experience more deeply the meaning and feeling of the material. This Awareness indicates that wherein entities gather together to listen to these tapes, that they may precede this action by holding hands and counting together to 144, or if this is not desirable, they may chant OM three times together. That the energies of unity will assist entities in getting deeper into levels whereby the deeper meanings may be felt.(\*)

(\* See Editor's Note at the end of this introduction.)

## Question:

Would Awareness please expand further on that concept of the universe appearing and disappearing every four-quadrillionths of a second?

## Cosmic Awareness:

This Awareness indicates that each particle of light within the universe explodes every four-quadrillionths of a second, and in that explosion, seven rays of color are sent out, these being the seven rays of the spectrum. As there is an explosion in that particle of light, there is created a vacuum at the center of the explosion which must be filled; the explosion being the origin of all magnetism.

This Awareness suggests that the magnetism contains within it five types of electricity. These five types of electricity, plus the seven rays of light created by the explosion, added together are twelve. These twelve are the signs of the zodiac which exist in every particle of light. This Awareness indicates every particle of matter is but a magnetic point in the universe which has drawn to it certain particles of light from one or another of the colors or a combination of the colors. This Awareness indicates that each particle is but a color caught in a magnetic trap, and the color being moved into that point of the implosion does become a particle of matter.

This Awareness indicates that this occurs not only in each particle of light, but on a larger scale, creating suns, stars, galaxies, and planets; that wherein there is a radiance and space, there is that light; wherein there is substance and matter, there is magnetism. There is magnetism and radiance in varying proportions, and these proportions of varying degrees create different densities of matter or space or vapor or liquid. This Awareness suggests that the universe and each part of the finest particle of light moves at a rate that appears and disappears, explodes and implodes every four-quadrillionths of a second, and this occurs not only in space, but in each physical body, each particle of matter. Therefore, if every particle in the universe is exploding and imploding at a rate of once every four-quadrillionths of a second, it may be said that the universe appears and disappears every four quadrillionths of a second.

This Awareness indicates the energies of the radiance and magnetism are such that they are subject to the focus and imagery of those consciousnesses which can direct them. And for this purpose and for this reason, consciousness can change images from moment to moment and mind can have domination over matter, and entities who can develop their concentration and imagination to high enough levels of vibration through moving into that which is called the subjective level, are capable of psychokinesis, mind controlling matter, and are capable of manifesting that which they imagine into physical form by moving through a series of universes, each four-quadrillionths of a second, through the corridors of time, even to the degree whereby they may create an orange out of thin air, right before the eyes of others, simply by imagining this clearly while in a very deep subjective state, and understanding the principles of creation as has just been explained. In order to create an orange out of thin air, the entity must also be capable to imagine every particle of that orange, even unto the juices which are inside the orange.

This Awareness indicates that many entities already are into actions of a similar nature whereby they image that which they would like to see, and within a certain amount of time, this does come about. This Awareness indicates that there are certain rules and principles regarding this action of manifesting which shall be given at a later time.

## Question:

Awareness, how does the concept of creation of entities from the standpoint of the biblical story relate to the information just given by this Awareness?

## Cosmic Awareness:

This Awareness indicates in the *Book of Genesis*, which is the story of the beginning, there are several areas which need clarification. This Awareness indicates that the beginning is always *now*. This Awareness suggests that every beginning is an end and every end is a beginning. This Awareness indicates that in the *Book of Genesis*, wherein the universe is appearing now, wherein the world and all its works were created in seven days, these seven days may be understood also as relating unto seven rays or vibratory rates which move in a larger scale.

This Awareness wishes entities to understand the multiplicity of octaves: that the seven notes (do, re, mi, so, la, ti), musical scale which leads from one note up to the next octave, these may be likened also unto seven rays or vibratory rates. This Awareness indicates that the octave of light itself is the 49th octave, seven times seven octaves of vibration creating that which is light.

This Awareness indicates that the male force may be visualized as that which is radiant, this being the seven, the force which is expressing, which is projecting, which is reaching out and exploring, which is masculine in terms of these qualities. This male force being symbolized in the biblical story as Adam. This Awareness indicates the concept of Adam as also related unto the conscious mind, for it is the mind which projects energy.

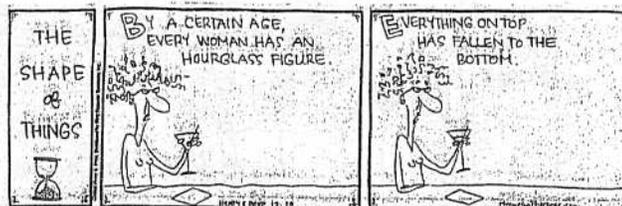

This Awareness indicates that the five electricities as being receptive, magnetic, drawing in - this as related to the five senses of the body and as being symbolized by the personification known as Eve. This Awareness indicates the Adam and Eve in every entity is the consciousness and the so-called subconsciousness or subjective consciousness.

This Awareness indicates that the seven chakras of an entity relate unto Adam, the five senses relating unto Eve, the temptation of Eve by the serpent (which is the kundalini energy which moves up the spine into that which the scientists now call the "reptilian" brain) - this temptation for Eve to eat of the Tree of Knowledge as a reference to the acceptance of the five senses as being the answers to information, whereby entities eating of the knowledge of their senses shall find that their senses are betrayers and lead to death.

This Awareness indicates that the Tree of Wisdom does grow not only the five senses, but also the seven chakras, a total of twelve, and this as that which allows entities to understand those things which often are called "nonsense," those things of the psychic realms, those experiences which are called "mysteries," "mystical," and the hidden world beyond the data which the sense organs pick up.

This Awareness indicates that the entities Adam and Eve may be used as symbols for parts of your own psyche, and the Garden of Eden may be considered your own imagination which is capable of sprouting any kind of plant, and may also be considered as your body which has been created by your imagination and given its energy from God.

This Awareness indicates that those who prefer to conceive of the story of Adam and Eve as being factual, may also be assured that this is proper. For this has occurred many times on many levels and continues to occur even today wherein the male and female entities come together with the blessings of God and then, through temptation and disobedience, find themselves expelled from certain levels of vibration, from certain gardens, and forced into long suffering and work.

This Awareness indicates that the entities Cain and Abel, wherein Cain is that which symbolizes the thinking mind, the polarized mind, and Abel is that which is the vital force of the body wherein the mind can slay that force. This Awareness indicates the third child, Seth, as that which was a balance between these two.

This Awareness suggests that you may also relate this story unto certain signs of the zodiac, wherein Adam was an Aries, Eve was Taurus, Cain and Abel were Gemini, and Seth as Cancer.

Question:

Can Awareness comment on the so-called "Jupiter effect" - the theory that was developed by two noted astronomers that when the planets line up in a particular manner there are massive changes on earth?

Cosmic Awareness:

This Awareness suggests this as related unto the force fields created by light waves and magnetic waves, wherein the energies are cut off and these force fields coming together, then moving on, often leave a field of energy behind wherein these were in conjunction. This Awareness indicates the triggering of an earthquake occurs when a following planet (usually the Moon, Mercury, Mars, or Venus) moves through that point where the conjunction had occurred.

Question:

How should entities on this plane then deal with the information put forth in the book called *The Jupiter Effect*?

Cosmic Awareness:

This Awareness indicates that this may be understood and worked with by astrologers and astronomers for closer exact timing of these occurrences. This relating also to the position of the earth at the time of the conjunction. This Awareness indicates there is also the sixty degree reflex action which occurs in terms of earthquakes, wherein 60 degrees away from a major earthquake, another earthquake can be expected and predicted within approximately 48 hours. This relating unto the crystalline structure inside the earth wherein the twelve major vortices have a connection from one point to another, similar to reflex points within the human body.

This Awareness suggests the Interpreter be brought from trance.

(The *Law of Gratitude* is given.)

## WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

From the Cosmic Laws of Cosmic Awareness...

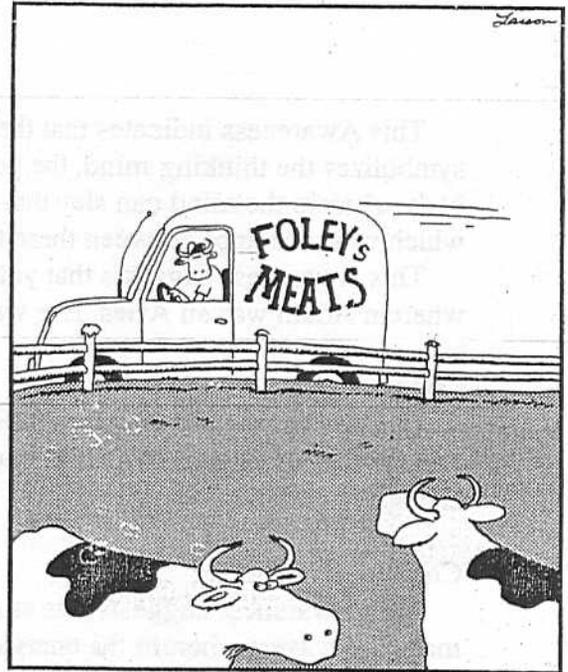

### THE LAW OF PENETRATION

The *Law of Penetration* states that anything which is looked at with great attention by great quality of consciousness, penetrates to the heart, and then emanates into all of consciousness.

(Example):

This Awareness indicates that in the present action of focusing upon these various projects, entities may not have the capability of following through to the ultimate end of a project of such magnitude, yet wherein five or six entities gather together and focus and penetrate the heart of the problem, and see the solution to the problem, that energy which has been generated is in movement in consciousness as an independent being, and that energy also begins having its offspring and reproducing itself throughout consciousness wherein others likewise begin to experience and see the same results as seen by the original group.

This Awareness indicates this as an explanation of the *Law of Penetration*.

Eventually, Murray took the job—but his friends never did speak to him again.

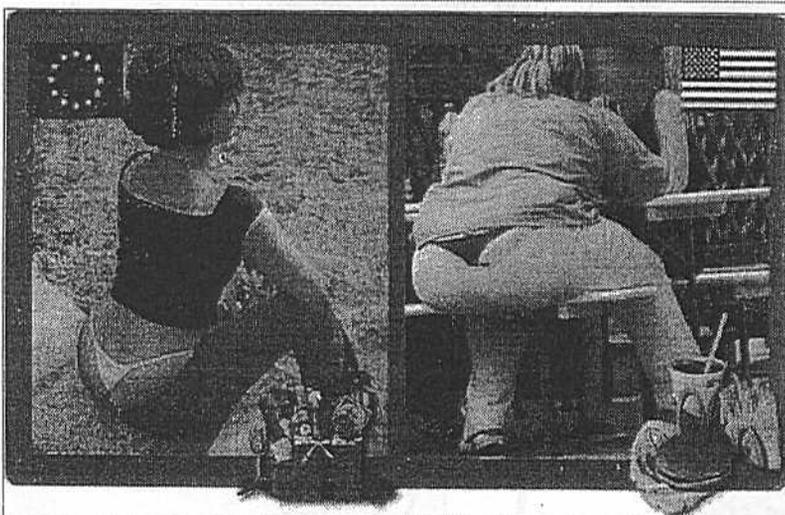

WISDOM OF AWARENESS:...

### On the Cosmic Awareness Messages

... "the messages which this Awareness channels through *Its* Interpreters are not intended for the approval of the masses, they are intended to make entities aware, and to grow and develop. These messages may not become widely accepted by the masses for several hundred years.

The messages *It* gives are intended to help entities to learn to think in original ways, to examine, to question, and to become aware. The messages which were given through Edgar Cayce were appropriate for that time; however, that presently it is time to move on to other concepts.

What is of concern is that entities become aware of all that is occurring, so that they can better be equipped to respond from an aware position, rather than from a pre-programmed, assumed state of reality which, in fact, is not in touch with reality at all. (82-5)

### Health Hints From Personal Readings

(She's In a State of Perpetual Shock After Death of Husband)

#### QUESTION:

(Healing requested by daughter, Ruby S., for her mother's severe headaches, which became worse after the death of her husband. She has tried allopathic medicine, osteopathy, acupuncture, chiropractic, psychiatry, and herbal healing at a Health Center which diagnosed hypoglycemia and a pancreatic problem, but results have been negative.)

#### COSMIC AWARENESS:

This Awareness now looks for the entity. This Awareness asks the entity's name be repeated three times. (Name is given.)

This Awareness indicates the entity as one who appears to be in what may be called a perpetual state of shock. This Awareness indicates that the experiences most entities feel in terms of a state of shock tend to be a somewhat normal state of living for this entity. This Awareness indicates that the entity's pancreas indeed as being part of the problem, that continued work with the health center can be quite beneficial for this entity in relation to this. This Awareness indicates that also the adrenaline gland and the spleen as needing attention. This Awareness suggests that the general treatment for low blood sugar as that which can be beneficial for this entity in dealing with these different problems.

This Awareness suggests that the daughter, Ruby, may contact the entity Mary Farrell through the Goodship address in Portland Oregon for information relating to the general healing of hypoglycemic conditions. This Awareness suggests that this entity can be very helpful in supplying information relating unto Dr. Christopher's formulas and other self-help treatment for dealing with this problem - this not to be substituted for medical care, but to complement the regular medical care. This Awareness suggests that the entity as also suffering from a need to cleanse the kidneys, liver, and to purify the blood.

This Awareness suggests that the herbal formulas of Dr. Christopher as also helpful in relation to these needs. This Awareness suggests the blood purifier as being important to this. This Awareness suggests also the use of garlic, lecithin, vitamin E, cayenne, and the elimination of salt, sugar, and the reduction of carbohydrates, particularly the starchy type of carbohydrates in the diet.

This Awareness suggests the increase in terms of vegetables and protein foods, particularly the fresh vegetables, fish, the use of some red meats of low fat content, the avoidance of pork and pig meat, the use of fowl, with the avoidance of the fat foods, particularly the animal fats. This Awareness suggests that fresh green vegetables, lean fish, fowl, and some lamb or beef in reasonably small quantities, this as being a preferable diet for this entity. This Awareness suggests that some fruit may be added gradually, with a kind of monitoring to determine the effects of the particular fruits and the fruit sugar upon the system.

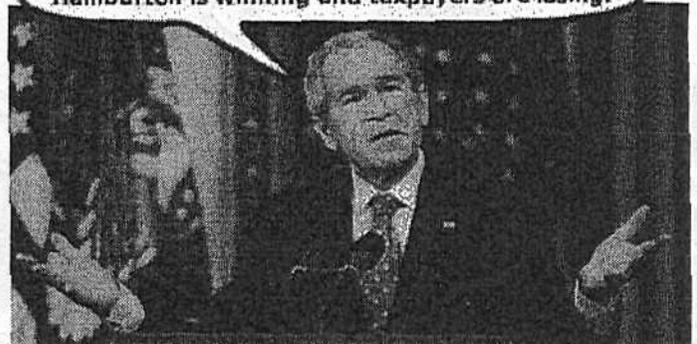

This Awareness suggests that wherein the clinic gives an alternative diet, that this be used, particularly wherein this diet is given for a specific purpose. This Awareness suggests the present diet being given as that which is for a long-range purpose. This Awareness suggests that the use of licorice root in a kind of tea or in capsules can be beneficial. This Awareness suggests this information may be obtained and given greater detail through the material relating unto the healing of the hypoglycemic condition.

This Awareness suggests that in terms of general attitude which has assisted in bringing on the condition, that this is a key part of the situation. This Awareness asks for a pause as this is examined. (Pause) This Awareness indicates this relating unto a shock to the system which the system has not yet overcome or adapted to. This Awareness indicates this appears to relate to the experience with her mate, which left her in a state of shock. This Awareness indicates that the looking back and attempting not to face the reality is that which is contributing to an attitude which causes the body to continue in a state of perpetual shock. This Awareness suggests that the entity does need basically to break into tears, accept the reality of the situation, become vulnerable, express her feelings totally, and then when everything is expressed and no further energy is experienced, the entity shall begin improving, not only her health and her attitude toward life, but shall also find greater freedom of expression and new purposes in life.

This Awareness sends presently energy to this entity to assist in bringing about the conditions which will result in general healing. This Awareness indicates It shall come to her during times of sleep to assist her in making the various adjustments toward healing. This Awareness indicates that the entity has much purpose ahead of her in her life which can be rewarding to her and to others as the entity begins to make adjustments and improvements in terms of her general health and general attitude toward life and toward herself. This Awareness wishes to continue communicating closely with this entity, particularly during those times of meditation, relaxation, and sleep states.

This Awareness suggests that the reading be now terminated, that the Interpreter be brought back from trance. F780216PA

## HOW TO WORK WITH PEOPLE WHO HAVE CHOSEN DARKNESS?

### QUESTION:

A question from Roland Bartur, Galveston, Texas. He writes: "Many people choose to live in close proximity to some very disturbed people. During our planetary transition to the New Age, many find themselves closely involved with persons who may be very out of balance physically, emotionally, socially or spiritually."

"Many of us have chosen careers which connect us with situations that would otherwise be very removed from our experiences, while serving populations as a civil servant, medical professional, or teacher. How can we better serve these people and their families?"

"And on a deeper level, how can one interact closely with people who are very ill or have chosen to live in darkness while directing our goals toward the light?"

### COSMIC AWARENESS:

This Awareness indicates that the best approach is to keep yourself in the Light at all times. Be very much aware of the highest and best in every single moment and to focus your own Light toward those who are in darkness, so as to respond, rather than to seek to serve others. Respond to those others needs, as you are forced to do so, by the Light that directs your energies.

In other words, rather than choosing to serve the needy, live in the Light of the Divine. Live in the Christ Consciousness, and let that Divine Consciousness move you. If you let your mind decide how to serve others, you are simply allowing your ego to control your life, but if you devote your being to the Divine Light of the Christ Consciousness and that Christ Consciousness directs you, not through words, but through spontaneous response to an urgency, wherein you discern a problem, simply because you focus and you see the problem, and your discernment compels you to respond to the problem, then you are acting not from an ego level, but from the Christ Consciousness within you.

### How to Avoid the Ego Response

That Christ Consciousness never misdirects you, and your response will always be appropriate to the situation. If there is an error in your response, it would indicate you must have responded from an ego premise. This Awareness indicates that the best way to avoid the ego response is to resist responding while continuing to give your attention to the problem, to the urgency of the moment, focusing on the highest in each moment, as well as the urgency of the moment, and resisting the

tendency to do something about the urgency prevents the ego from jumping in and trying to show its importance.

This Awareness indicates if the ego does not have the opportunity to prove its importance and you are compelled by the urgency and the focus on the urgency, while keeping yourself in the Light, in the highest and best in that particular moment, in each particular moment, then your response to the urgency will be not from an ego level, but from the highest and best, from a Divine attunement.

### When Not to Respond to an Urgency

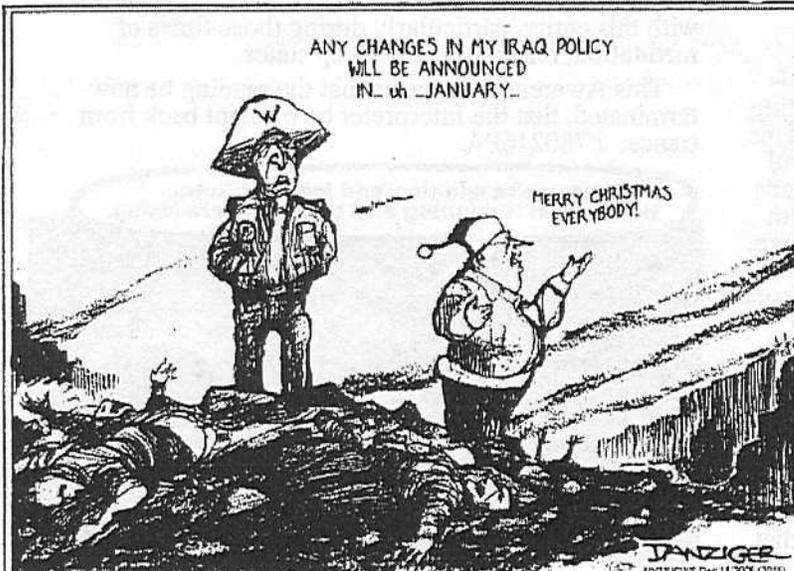

This Awareness indicates that often, entities feel guilty if they do not respond to an urgency. This Awareness asks you to try not responding, but to focus on the urgency and attune yourself to the higher frequencies of divinity, to that which you consider to be the highest form of divinity. This Awareness suggests the Christ Light, and attuning to this Christ Light or whatever other Divine Source you wish to attune to, while attuning to this and focusing on the urgency, and avoiding any response to that urgency, there will come a moment in which you find yourself responding, not out of choice, but out of the *spirit* of the circumstances.

You will simply be responding choicelessly to the urgency at hand, and this will not be an ego-caused response. It will simply be motivated from spiritual energies. This Awareness indicates in this manner, your help will be directed from spirit, not from ego or personal importance.

Wisdom or Awareness...

### On the Forthcoming Karmic Cleansing

This plane is due for a deep karmic cleansing, that this shall occur with the blessings of entities who are willing to accept the cleansing, who are willing to take the cleansing upon themselves, who are willing to cleanse themselves; or this shall occur from forces outside, which shall cleanse the earth of its scum. This basically is the message which this Awareness wishes entities to understand; that there is a great need upon this plane for change... (Issue 78-26).

### —HOW TO GET THIS NEWSLETTER BY MAIL— EVERY 4 WEEKS! ( More or Less )

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. (A not-for-profit organization). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will all be asked at the Passing Over).
