The Cosmic Awareness Spiritual Development Course  
Volume 4 Lesson 1: MOONCHILD (Imagination)

**QUESTIONER (JOAN):**

(A count of 12 and the Law of Love is given)

Q) Does Awareness have an opening message?

**OPENING MESSAGE:****THE STRUGGLE OF THE LIGHT WORKERS****COSMIC AWARENESS:**

This Awareness does have an opening message at this time. This message has to do with the struggle of Light Workers as they have held a space for so long, a space that has allowed the Light to survive in the very dark times that have existed over the last several hundred years. This Awareness does state the last several hundred years, for since the industrial revolution began, where mankind started to turn away from the natural order, from his/her own connection to nature, to the Mother, Gaia, there has been a falling away from the spiritual connection, from that which was a natural connection, and with the rise of technology, especially over the last 50 years, this acceleration of the separation from spirit has indeed advanced very quickly.

**A Great Gap Exists From People's Spiritual Connection**

At this time in mankind's history, there is a great gap for the majority of people from their spiritual source, from that sense of being spiritually connected. This has nothing to do with those many who attend regular religious services, for there is still a confusion between that which is religion and that which is spirit, or spiritual. This Awareness is talking of the spiritual connection that once was the common element of mankind, and how this has been eroded and corrupted since the industrial revolution in the 1700's. At the same time, religion, which had already held great power and great sway over the minds of many, continued its insidious path of corrupting away from spirit the minds and hearts of the followers of the various religions that have appeared since the industrial revolution, and from before.

At one time in the Western world, the Catholic faith was the only faith to be followed, and it did hold great power over the minds and attitudes and behaviors of the many, but then with the entity known as Martin Luther, a schism started to form which started to provide alternative religious beliefs. Luther was followed by Calvin and the many other religious entities who formulated new concepts, new Protestant belief systems. There were of course in existence at the same time, other alternative religious belief systems such as the Judaic system, the Islamic Muslim system of belief, even the belief system of Buddhism, which even predated Christianity,

**The Religion of Industrialization Begins**

These religious systems of belief created in the minds of the masses a certain sense of how spirituality would look, but the thing is that there was still some sense of a spiritual connection. With the beginning of the industrial revolution, a new religion started to form, that being the religion of industrialization, of the mechanical spirit being entered into and pursued. This started to be reflected in the minds of the masses, and a dichotomy formed between industrial thinking, modern thinking, and religious thinking. This led to all sorts of controversies, debates, discussions, arguments, even between Darwinism and Creationism.

Those discussions still occur, but many would say that now it is a forgone conclusion that man was not created in the way the Bible suggests, but it was an evolutionary process. This Awareness is not saying that is what happened. This Awareness is just saying that is the nature of the debate between Creationists and Darwinists. This Awareness is speaking more to that process that started to occur with the industrial revolution, where mankind became more and more separated from any sense of spiritual connection. The word 'religion' itself meaning to be connected at a spiritual level, but of course religions became dogmatic in nature, with rules and laws that must be obeyed to obtain that which was heaven, the reward, or alternatively, to be cast into the pits of hell to be punished eternally for a non-following of beliefs.

**How Modern Man Developed a Sense of Spiritual Separation  
And the Price He is Paying For It**

With the growth of the industrial revolution and the beginning of separation from a spiritual sense of being, modern man started to develop a sense that they were no longer connected on any level to that which is spiritual in nature. Indeed, a sense of being connected to nature itself started to evaporate, thus man became arrogant in his/her ability to be in charge on all levels, including nature itself. There was nothing man felt he could not do, and thus, the industrial revolution progressed and became the technical revolution, and now, has advanced to that high level of technical knowledge that exists in the world today, but at that level, a great price was also extracted, and that price is that separation from the Godhead, from the Source, from that sense of connection to spirit itself, and even the connection of nature and the planet itself.

This has been all part of that plan formed eons ago to bring mankind to an evolutionary point where a great shift would occur, where a great evolutionary leap would take place, and that is exactly where mankind stands at this time. In the process of bringing mankind to this epic point, much was lost, much was forgotten, and those powers that were not focused on bringing light onto this planet, or working from a place of unconditional love, gained power, gained momentum, gained control, and those times from the industrial revolution to now were marked by this decrease in spiritual awareness, spiritual connectedness, and an increase in the arrogance of the human mind to think itself superior to the planet itself and to even God.

**Man Became God: Man Can Do Anything  
(But the Light Workers Hung in There Anyway)**

Man became God, and many felt there was nothing man could not do. They could go to the moon. They could go the depths of the oceans. They could build great cities. They could create great computers and systems of technology. This was the loss of the soul, or at least the connection to the soul that this Awareness is speaking of, and during this time there have always been those Light Workers who have held a space, who have held an access point to Spirit, who could bring Spirit into the human condition. These Light Workers have been located in many places, in many positions. There have been those who are teachers, those who have been religious leaders, those who have been social leaders, those who have been mothers, fathers, brothers, sisters, who simply held a belief, a connection to that which is still Spirit.

In the last 20 years, those who this Awareness has often called the Light Workers, the Wanderers, those who have held that spiritual connection, have been hard

pressed, as mankind itself has reached this crucial stage. The Light Workers have often held, without even their understanding of it, a recognition of this work that they have done, a space that has allowed Spirit to continue to exist in this consciousness that has marred this planet over the last several hundred years, but in particular, over the last two decades.

**Some Light Workers Fell by the Wayside,  
Became Agents of the Dark**

Often has been the case that Light Workers have felt that they could not hold any longer, they could not keep up the great effort that was required of them, and it is true that many Light Workers did fall by the wayside, did lose their way, became embroiled in the dark energies, sometimes not even understanding that they had done so. So it is that many of the Light Workers became agents of the Dark, not always consciously, not always with Awareness, but such is the insidiousness of those forces of corruption: the Dark Agents themselves, that even some of the Light Workers were tainted by this. This is how disinformation became spread amongst those layers of consciousness of those who were seeking to understand.

This Awareness wants to be clear here. *It* is not saying that the Light Workers *intentionally* chose to misinform, to mislead. It is often because of their own strength of belief in their truth, that which they felt was the truth, that these Light Workers could be led astray, through personal vanity, through ego, through need, through that condition of denial, where having been denied so long even the material conditions of life, of prosperity, of health, of well-being, it was easy enough to taint some of the Light Workers. This has been a battle indeed, a battle that is almost done.

**This Long Struggle is About to End**

This Awareness speaks of this issue simply to remind all of how close it is now to that which is the end of the struggle, a struggle that has indeed raged for hundreds of years; this Awareness would even suggest millennia upon millennia, and that this struggle is almost done. That some of the Light Workers were led astray is no big deal, for it simply is what has happened, and in the journey, each individual is asked to come to their own inner truth, their own inner understanding. The big deal of those who were led astray is that inadvertently they have worked to advance the causes of those Dark Forces that have controlled and manipulated for so long, but even those who have been led astray, can once again move themselves back towards the Light, back to being of pure service, pure connection to Spirit, by looking deep within themselves at this time and asking if they have been 100% true to their deepest inner truth, to their deepest inner calling, to their deepest inner light.

**Light Workers Must Now Look Deeply Within Themselves**

This is a time now for all Light Workers to look deeply within themselves, and to be prepared to abandon those levels of belief, those truths that they can see now perhaps were not in true alignment with Spirit, were not true reflections of the Light, nor held a true measure of unconditional love, but this period of time, this time of self-examination, self-inspection and introspection is needed as the final purging that will allow a quantum leap for each individual who seeks Ascension and for a collective body who also are prepared now to ascend.

Many other Light Workers, at great cost often to themselves, have stayed true to their inner beliefs and perceptions, have carried on the struggle, and often a struggle it has indeed been. Going without material acquisitions, without abundance and prosperity, often

even in bad health, to hold that space, to hold the energy of Spirit on this plane of consciousness, a consciousness that has gone deeper and deeper into the Darkness over the last several hundred years since the industrial revolution. Often it is felt by those Light Workers who have struggled to hold this space that there is no hope, that things may never change, and yet despite this sense of hopelessness, they have held a space of Spirit and for Spirit, and the reward for doing so will indeed come to them at the time that is right for them. It will come in the measure of the Ascension process itself, and those who ascend into the higher states of consciousness themselves of course included.

**Cosmic Awareness Acknowledges Unrecognized Service**

On the other side of that which is the Ascension, they will become highly acknowledged for the spaces that they held and that which has been given over the years. This Awareness is not seeking to pamper the Light Workers, *It* is simply acknowledging the service that has been given that is often unrecognized, that has often had a great cost to those individuals holding such spaces. This Awareness is not promising, as in the religious sense of the promise of reward after death, the reward *It* has spoken of. *It* is stating a fact; that there will be an acknowledgement and a recognition of those who held to the truth, who held the space for service and for Spirit. At this time when many are still struggling, there begins to be seen by many, a glimmering of the new dawn, a sense of change, a sense of promise to what will be. It is important at this time for those who have struggled and sacrificed and have put their lives on the line to understand that that the shift has begun. That which is the Ascension process is underway.

**Lucifer Has Indeed Returned to the Godhead  
(Now the Prodigal Son and Daughter Can Return!)**

This Awareness spoke once that the being known as Lucifer had returned back to the Godhead, had returned back to the Light. The holder of the Light, the giver of Light, that being known as Lucifer, who had begun the separation of consciousness away from Spirit, has indeed returned back to the Godhead. The world of darkness that has occurred is a world of delusion; for the truth is that the Light has not been extinguished. It has been hard pressed, it has been challenged, it has been overshadowed, but it has not been extinguished. If the angel, the archangel who was the leader of the angelic realm, who proceeded out on that curve of experience to separate from the Godhead, from the Source, from Spirit, has returned home, is it not time for the many followers to return also, for the Prodigal Son to return, the Prodigal Daughter to return back to the Source, back to the Godhead?

**The World Has Reached That "Ascension Point!"  
(Ascension Planet "A" or Ascension Planet "B")**

This is the journey that is now and has *always* been underway, but it has come to a point, that point which has been called the Ascension Point, where the many will make the choice to return fully back into a spiritual connection, into a spiritually orientated life, in union and in alignment with the planet herself, with Mother Earth, Gaia herself. This Awareness has spoken many times in past months of Ascension Planet A and Ascension Planet B; that the heightened vibration of the planet needs to be matched by those who in the Ascension Process will themselves heighten their own vibrations. This is the Light, the energy of Light, the vibration of Light being enhanced in all those who seek to make the Ascension Process, the Ascension journey with Gaia, with Mother Earth.

There will be those who choose to continue a path of separation, a path delving even deeper into the separation and the density, separation first of Spirit, and the density of the third dimension, but that is another story for those who need that experience. This Awareness, in this message today is simply speaking to those who have held the spiritual space for so long. *It* has attempted to explain the nature of the struggle. *It* has attempted to explain that there is a time now very soon where the Ascension will happen, the quantum leap will happen, and *It* simply asks all to recognize the nature of the journey and where it stands at this time. This Awareness is complete with *Its* opening message.

QUESTIONER:

(Thank you) May I ask a question?

COSMIC AWARENESS:

Please ask a question.

### Is the Ascension the "Golden Age"?

QUESTION:

With the Ascension Planet process etc., would that be similar to the golden age often referred to in the different readings?

COSMIC AWARENESS:

This is indeed so. Ascension processes have happened many times before. There is that cycle of the planetary progression called the Kali Yuga, the 25,000 year orbit of the solar system around the central sun. There was a point known as the Golden Age, where the spiritual connection this Awareness spoke of a moment ago was the common factor for all. All lived in spiritual union and harmony. This would be in that time known as the Lemurian Age on this planet, where there was great spiritual harmonies, great spiritual awareness, where all lived together in peace and harmony, where the lion and the lamb laid down together. This is what is approaching once again. This is not what will be reached in the Ascension Process that is immediately ahead, but it is where mankind is heading once again. This is seen as several thousand years ahead still, but the beginning of the new Golden Age is about to begin again, and that is why this Awareness says yes, the Golden Age referred to by the energizer is one of Ascension, is one of the integration, the blending and the harmony of the spiritual and the physical space of existence.

Does this answer your question?

QUESTIONER:

Yes it does, thank you. And it will be a peaceful and harmonious event to look forward to, and I do thank you.

COSMIC AWARENESS:

This Awareness receives the thanks gracefully, and gratefully.

## THE PREHISTORY OF THE HUMAN RACES

(A Reader Finds Contradictions In Previous Information)

QUESTION:

Q#1) The first question is another question concerning races, and the prehistory of the races. This one comes from Paul Paschat. The location is not given. He writes: "In issue 392, Awareness said "the red man as the Atlanteans or Atlans, those who originally were on Atlantis, these descendants of those who are called the Atlans; the Atlans were a space people. These people

appear to have come from Vega. In issue 449 "this Awareness indicates there were also those entities at that time who referred to themselves as Atlans. This Awareness indicates the Atlanteans appeared to have been related to the Pleiadians." So, according to Awareness, the red race came from Atlans in Vega, or they came from Orion, or they came from the Pleiadians. Is it the Interpreter has trouble interpreting symbols of Awareness, pays no attention to what the Awareness is saying? If Awareness is mostly Awareness why doesn't Awareness speak English?

By giving bits and pieces of the story and then contradicting *Itself* repeatedly, Awareness doesn't tell a coherent story of prehistory that makes sense. In issue 392 "this Awareness indicates that the Semites as that which have been discussed already, as having been cloned by Jehovah on Mars and transported to earth. This was approximately the time Atlantis was near the time of sinking. This appears to be approximately 10 thousand BC, give or take two thousand years."

Edgar Cayce spoke of 5 races: red, yellow, brown, white and black, but he left the origins of the Semitic race a mystery as they are not included in any of the 5 races as a sub-race. For example, the Caucasian race has Nordic, Alpine, and Mediterranean sub-races (Greek and Italian mostly). So all the various human races were first and the Semites were created about 10,000 BC by the Jehovah group from Orion.

In issue 449 Awareness said "so that Atlanteans, particularly the Semites, were perhaps the first group of Homo Erectus humans." Homo Erectus were not human. They were the animal types who lived as animals prior to Cro-Magnon man. No one created at 10 thousand BC was the first anything. This just throws mud on the Awareness statement about prehistory. And, Semites had nothing to do with the Atlanteans that came from Vega.

So if the Atlanteans came from Vega, the whites from Carpathia in the Pleiadian system, the yellow race from the interior of the earth and the blacks from some other system (issue 392), then how did all of the various races come to have a reptilian brain under the mammalian brain? Or is it possible only the Semites have a reptilian brain?

The explanations given by Awareness just throw mud on all of prehistory, and I've given up trying to make sense of *Its* variety of versions of prehistory. Obviously I need to read these issues with much caution, not paying much attention to anything unless I can confirm it elsewhere. It seems no matter what Awareness says, *It* will contradict *Itself* a few issues later."

And he says "Love and peace, Paul." This is the end of his note. Does Awareness have a comment please?

COSMIC AWARENESS:

This Awareness is somewhat confused as to what is being asked of *It*. Is it to justify various explanations and insights given by this Awareness in previous issues? The criticism that has been leveled at this Awareness is interesting of itself, for this Awareness has never in any issue ever stated that *It* must be believed 100%. Indeed, this Awareness has always asked the readers to question everything given by this Awareness, and not to simply believe that which this Awareness gives, but instead, to simply be open to the thoughts and the information presented by this Awareness, to question the information and to seek alternative sources of information that might confirm or deny what this Awareness has spoken of, and that which this Awareness has presented.

#### That 20% Error In Downloading Awareness Information

This Awareness has always maintained that there is a degree of error in the communications that come through from this Awareness. *It* has stated that there is approximately a 20% or error to that which this Awareness is trying to convey. Part of the problem lies in the downloading of the information from this Awareness through *Its* Interpreters. It is as a funnel, where so much information and energy is trying to be downloaded into a much smaller capacity than that which this Awareness is. *It* simply cannot convey accurately, even sometimes, all of the information, insight, and awareness that this Awareness holds.

In a conversation that the Interpreter once had with Avaton, the Interpreter tried to explain the process he went through in trying to retrieve or communicate the information that this Awareness was presenting him. He explained that it was like eating a bowl of spaghetti. He would start with one strand of spaghetti. It would then lead to another strand and another strand, jumping sometimes from one line of thought, one strand of information to another and to another. The Interpreter mentioned that he did not always feel that he had presented the whole bowl of spaghetti to the readership, to the members, but that it was at least an effort to present understanding and information.

Often while the Interpreter is allowing the information to flow through him, he is also aware at the same time, of all the other strands of spaghetti in the bowl, the other strands of information, insight and awareness available, but he cannot convey it all, and sometimes, after awhile, a strand runs out, even though the whole bowl of information, of awareness, has not been fully delivered. In the criticism of this Awareness presented by this entity, this Awareness asks him to understand that there were several scenarios happening in those times of prehistory.

#### The Influence of Extraterrestrials in Atlantis

The Atlantean culture had many extraterrestrial types present in that continent now known as Atlantis. The red race was primarily from the extraterrestrial stock known as the Vegans, but there were also Pleiadians who mixed their genetic composition into that mix, and it is why the red people of the South American continent are so different from the red people of the North American continent. There were several strains, several mixes available at that time. That is why it is not as easy as all that to simply state it was this or it was that, it was the Vegans who were the red people and that is all, or that Semites are simply the clones created by the Jehovah group.

The Semites themselves were cloned perhaps, but they did use the materials available at the time to create the clones. They created them using Caucasian types, white types, and the reptilian brain spoken of was from the reptilians themselves who were also around in those prehistoric times who got the Sirians to do the genetic engineering for them, so that they were that race known as the Anunnuki, a form of those people. Indeed, this appears to be so confusing now, but this Awareness simply asks all to understand that at that time, there were *many* extraterrestrial beings on the planet, in that region known as Atlantis, as well as other regions of the planet itself.

#### The Extraterrestrials are Spoken of in the Old Testament

There was a large mixing of the extraterrestrial types. This is even spoken of in the Old Testament, where there is reference to the Elohim making their presence known, of the gods walking on the earth and

impregnating the women of the time, this being a way of explaining how the various genotypes were introduced into the genetic fabric of the human gene pool. Even the old Greek myths spoke of the Titans, of those beings who preceded the gods. Again, this is an allegory for extraterrestrial types on this planet who interbred with the human women at that time, those women being available to receive from the extraterrestrial beings, their gene types.

It was a very hot time in the old planet, at that time, and this is how it was. This Awareness has tried to speak of this before, but part of the problem was that the Interpreter had limited knowing and knowledge of it. Much information has come out since those early times when this Awareness spoke through the then Interpreter Paul Shockley, and there is much more now known and available, but there is still much that needs to be brought forth that is still somewhat confusing. Even the Interpreter himself recently felt much confused by the mass of information he was trying to sift through upon a recent question on the origin of man and the races.

#### Search and Doubt and Try to "Feel" the Truth

This Awareness simply asks for all to be open to that which this Awareness suggests, to always question what this Awareness presents, to seek alternative sources of information that will confirm or deny what this Awareness has presented. *It* has never asked for the readership to simply blindly accept everything that this Awareness has spoken of, especially in those areas where there at this time still remains no way of completely and totally proving what this Awareness has spoken. In the end, what this Awareness asks mostly is that you *feel* the truth of what is spoken by this Awareness. If there is that feeling from within of the validity, of the truth, then to hold it in balance, checking out still if it is confirmable.

When the truth is spoken, often the truth is felt from within, and it is feeling of the truth that this Awareness asks the readers to try to achieve, to feel out what this Awareness presents, while at the same time, holding it up for examination, that it is in this way that the entities, the Light Workers will not be led astray, will not be tainted. In *Its* opening remarks today this Awareness spoke of many of the Light Workers who were misled, who were tainted by the Dark. One of the ways this was made so was through entities not questioning the information they received, of not feeling it out, of not receiving that heart sense of the truth of what was being spoken, of allowing their egos, their pride, their vanity, their sense even of importance of being conveyers of this truth, to therefore intrude and interfere in their ability to weigh out the truth, to balance the truth, to recognize the truth.

This Awareness has never maintained that *It* is 100% correct at all times, for there are the problems of the Interpreter's misinterpreting that which Awareness is attempting to convey. Those who simply accept everything, whether from this source, from this Awareness, or from any other source, who simply accept it, make it their truth and then promulgate that truth, spread that truth, often are those Light Workers who are led astray. It is important therefore, to *always*, from whatever source, to always question that which is presented. This starts right from this source, this Awareness, and is valid and true of all sources of information, be they from any channelled source, or even over the local television channel.

This Awareness is complete in the answering of this entity and his criticisms.

## Is Zechariah Sitchin a Reliable Source?

### QUESTION:

(Thank you) I'm wondering if possibly one of the sources could be Zechariah Sitchin? Would he be able to help him with some of his questions, as another source?

### COSMIC AWARENESS:

This Awareness has always maintained that the writings of Zechariah Sitchin are highly evolved and very accurate. This Awareness does recommend the writings of Zechariah Sitchin to the individual.

### QUESTIONER:

(Thank you) I appreciate it.

## Did Humans and Reptoids Both Evolve Here on Earth?

### QUESTION:

There's another question concerning races. This comes from Maeve Fitzgerald, from Rock Springs, Wyoming. Her question: "I have read Cosmic Awareness newsletter 94-11, which speaks about the origin of the races of people on earth. However, before I started reading the CAC newsletters, within the past few months, I came across information that stated that humans and Reptoids both evolved here on earth; that they have been enemies from the beginning; that both developed space travel and carried their conflict to the stars; that both come and go from earth and continue their war and carry out their scientific experimentations on earth, as well as elsewhere.

I have no specific question, but would like Awareness's comment on this scenario. Thank you.

### COSMIC AWARENESS:

The first comment that this Awareness has is that it was not that the Reptoids, the humanoids went out from this planet to the stars, but rather the reverse. The Reptoids, the humanoids, *came* from the stars to this planet. This Awareness has spoken of this planet being the last planet of the 12 planets of the Star Nation planets that held human life. This child planet was the repository of much of the humanoid reptilian materials. By materials this Awareness is trying to state, their knowledge, their information, their genetic types: all of this coming to this planet. There were indeed from the beginning Reptoids on this planet, and that the humanoids that came, such as the Sirians and Pleiadians later on, *all* contributed to the creation of modern mankind. Through genetic engineering, the Sirians and Reptilians at one time worked together to create modern man.

The genetic prototype of that time that was created was of a simian being with reptilian attributes. This is why the reptilian brain exists in all human beings, with the simian brain, the mammalian brain fused to it above it. The Sirians' purpose, as has been discussed by this Awareness, was to create a sentient being with the possibility of spiritual evolution, with the possibility of attaining full spiritual consciousness with time. This time is the time that is now, this time of Ascension. At this time, from the dim shadows of the past, and the purpose of the Sirians, the Sirian genetic archetypes; that the purpose of spiritual evolution, of the next quantum leap, of the Ascension, is now being reached and the full orchestration of the purpose of the Sirian experiment, so

many hundreds of thousands years ago is now finally being reached.

The two beings: the reptilians, the humanoids, for the Sirians, Pleiadians, Arcturians, Vegans were all part of the 12 planets of the humanoids, has finally come to fruition, has come to a turning point. This Awareness feels complete with this limited explanation. *It* asks the energizing if she has any further questions.

### QUESTIONER:

Not at this time, it was quite enlightening, thank you.

## Wormwood (or Tiamat): What is Its Game Plan?

### QUESTION:

Another question concerns the 12<sup>th</sup> Planet, Wormwood or Tiamat. Again, we thank you for the information on the true nature of Tiamat, previously discussed. Additional information regarding it would be helpful. For example, what would be Tiamat's proposed game plan once it reached earth? When is it expected to arrive? Is the planet to stay forever, or just until its claims of ownership are accepted or rejected? Are or were there any planned stopovers included in its flight plan? What effect, if any, on other planets in our solar system: Mercury, Venus, Mars, etc., could it have, or would there be any other relevant questions that may have been forgotten, and I thank you for these insights.

### COSMIC AWARENESS:

The planet Tiamat, the hollow planet, is on that course that at this time is bringing it close in proximity to this planet. Its orbit in that of ten thousand years, as it goes deep into the solar system before turning to come back, this is all known and available through the works of Zechariah Sitchin and others. It is seen that those denizens of this planet were mostly reptilian in nature, although it is also seen that the Orion are also involved with the planet and are the actual rulers, if you will, with the Reptilians being largely their servants. But this is even not 100% correct, for the Reptilians have that power that differentiates them from simply being servants. This is simply a way that this Awareness is trying to explain the situation.

### Orion Grants Reptilians the Right to Rule Earth

It is as if the Reptilians have been given the planet under the auspices of Orion rule, being granted the right to be the rulers of this planet, but is always known that they are still servants to the demands and requirements of their Orion masters, and yet, at the same time, they are masters and rulers themselves. It is for this reason that there is some confusion around whether the Reptilians are humanoid, for if the 12<sup>th</sup> planet originally belonged to the Orions, and if the Orions were originally of a humanoid variety, a human stock, then it would be seen and understood that they would have a presence as humans on the 12<sup>th</sup> planet, but eventually they vacated the planet and allowed the Reptilians to take it over, understanding that they still were subservient to the Orion authority.

It is the Reptilians that have been located on this planet for several hundred thousand years, and it was the Reptilians who then claimed this earth planet as their own, under the banner of their Orion masters. It was the Reptilians who for a long while mined the gold mines of the planet earth, for it was natural enough as they were servants to Orions, and it was the Orions who required the gold from the planet and the other minerals that this

planet contained. Eventually the Reptilians, as is known, desired that they create a race of servant beings who would themselves take over and do the mining and menial work that they had done for so long.

It is at this point, of course, that the Sirian genetic engineers were captured, who created the human beings who were meant to be servants to the Reptilian masters. This planet Tiamat or Wormwood has no other stop-overs as the question asked, for its orbit is static and rigid. It is the Sirian planet that came closest to its orbit; indeed a threat of intersection has always been available as the two planetary bodies crossed paths. There was only one other planet that posed such a threat to Tiamat, and that was the planet that once existed between Mars and Jupiter, and that a collision between Tiamat and the 5<sup>th</sup> planet was once imminent and the planet was destroyed before this collision could take place, so that the 12<sup>th</sup> planet would not be destroyed.

#### How a Chunk of Marduk Became Our Moon

What was created on that planet, now classically referred to as Marduk, created the now present asteroid belt, and that another portion of that planet was thrown out of orbit, and cascaded across the heavens and was captured in the orbit of the third planet. That chunk of the planet Marduk became earth's moon. The moon itself is far larger a satellite around the smaller planet than would be the norm, had the moon evolved naturally from bits of the planet that were cast out into orbit around the planet itself in the preliminary stages of formation. In other words, the moon that circles around the planet earth is not natural to the earth, is not of earth. Earth did not give birth to the moon that circles it. It was indeed captured by the earth, and many of the ancient myths of early mankind speak of this happening, of this planet being captured, that being the remnants of the planet Marduk, and speak of it in allegorical terms, for it was an amazing story indeed.

#### A Close Encounter is Coming But No Collision

It is not seen that there is a danger of the two planets-- earth and Tiamat-- colliding at this time. There is a danger of a very close encounter between the two, and that there have been close encounters in the past. One of those close encounters created the legendary flooding of the planet where humankind was destroyed at one stage, and this was allowed to happen at that time, for the experiment that had occurred needed to be eradicated, but this is, again, a different story. At this time it is not seen that the encounter between the two planets will be so close as to present a danger to the planet earth, however, it is seen that in the next encounter which is coming, which is part of the Ascension process, which will occur within the next few ...At this time this Awareness is not prepared to give a time scenario on this. It simply wishes to say that this close encounter is indeed drawing close, and it will be part of the upheaval that this Awareness has spoken of on other occasions and may indeed be linked to why the Galactic Federation may present itself coming at this time.

This Awareness suggests that this has been a long-standing situation of these two planets--the planet earth, as well as Tiamat-- engaged in what one could call a long-standing battle, a long-standing relationship, one that the poets and the seers have described eloquently in the past and one that will again present itself in the near future. This Awareness is complete.

QUESTIONER:

(Thank you) Wow! Do you want to do any other questions? Is the Interpreter getting tired?

COSMIC AWARENESS:

This Awareness is prepared to allow the Interpreter to come out of this deep state he is in. It is time to complete for today.

QUESTIONER:

(Thank you) Do you have a closing message?

CLOSING MESSAGE:

### Much Will be Revealed in the Months Ahead

COSMIC AWARENESS:

The closing message is that these are indeed interesting times. Much is about to be revealed in the months and years ahead, and that many will be severely challenged by the new truth that will be presented, but that for many of those who this Awareness spoke of earlier, those Light Workers, they will finally be vindicated for holding to the beliefs and the truths that they have always held to, that they have tried to hold a space for. These times are more than simply a physical journey of evolution. They are indeed the times of a spiritual evolution, a jumping up in consciousness and awareness to a higher state of understanding and consciousness.

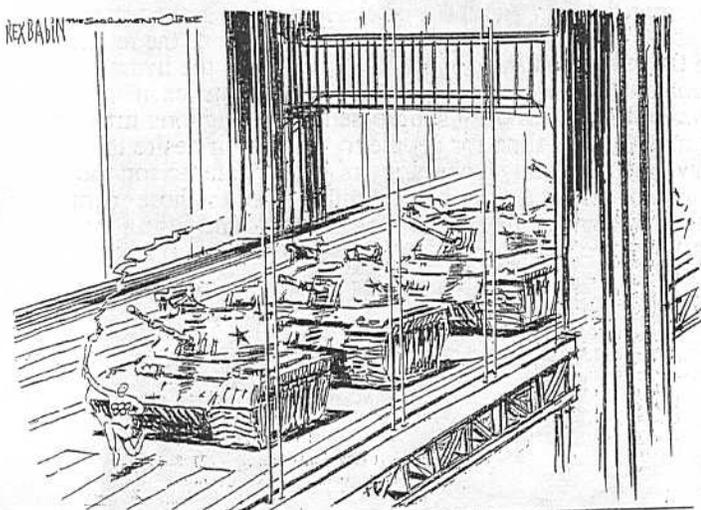

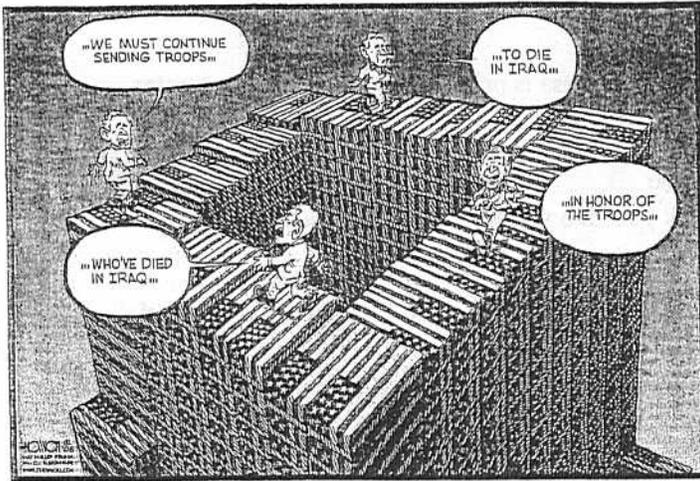

These are indeed interesting times, and it is a time to be open to greater truth and greater reality. This Awareness is complete at this time.

QUESTIONER:

(Thank you) We all appreciate the information. So much information definitely needs to be digested.

(The Law of Gratitude is given- and a count of 12)

## WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the interpreters necessarily agree with the statements of Cosmic Awareness. The interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.

CAC General Reading, May 9, 2006 Will Berlinghof Interpreter

OPENING MESSAGE:

QUESTION (CARRIE):

The Law of Love is given) Does Awareness have any opening messages for us today?

COSMIC AWARENESS:

This Awareness asks that you make note of the date. Speak the date today.

CARRIE:

May 9<sup>th</sup>, 2006.

COSMIC AWARENESS:

May 9<sup>th</sup>, 2006. This Awareness at this time is enjoying this process of discovering that the Interpreter is currently going through; this process of discovery from opening to the greater layers and levels of truth, and the greater layers and levels of trust. As this Awareness comes down through those layers to reach a place of interface with the Interpreter, *It* sees that the Interpreter is constantly opening up to those higher or deeper levels. With each getting together, each connection, each attempt at the interface between this Awareness and the Interpreter brings greater results, better results each and every time.

Although the Interpreter often feels the weight of responsibility to channel this Awareness, often feels new and inexperienced at this task, this Awareness wishes indeed to point out that the Interpreter has spent many many years preparing for this task, preparing to be the voice of this Awareness. The Interpreter has a natural talent to go deeply, quickly, and to contact this Awareness, to allow the voice of this Awareness to flow through him, to be spoken out loud. This Awareness enjoys watching this development, watching the progress of the Interpreter as he works towards gaining even deeper connection, even greater interface with this Awareness.

This Awareness does support the suggestion made that other energizers be brought into this mix, be made available to create a circle around the Interpreter, allowing him to go even deeper. *It* supports the discussions between the Interpreter and the energizer to this effect, and has already suggested in a private and personal session that *It* will send out the energies to those individuals who are to be part of the circle. Indeed this energy has already been sent out. It is already in progress. This Awareness is at this time, ready and prepared to answer the questions posed to *It* tonight.

### How to Improve the Gas Mileage of Your Auto?

QUESTION:

This question is from Jerry Doffing, in Frederick, Wisconsin, and he asks "If you folks could give me any help in improving my gas mileage, I would really appreciate it. Since gas prices are high and wages are so low, I don't know what is keeping people afloat!"

COSMIC AWARENESS:

This Awareness sees a broad spectrum to this question. The obvious question of how to improve the gas mileage would actually require technical knowledge of how to improve the operation of the motor, the engine, the performance of the vehicle. The obvious would be to keep the vehicle in proper repair, tuned up to the maximum at all times, running smoothly for the greatest

efficiency for gas mileage. This is the obvious, and this Awareness does not feel the need to discuss the obvious at any great length.

There are other options available to help increase the gas mileage also, other than just mechanical efficiency. It is seen that there is a device either already available or soon to be made available, that would increase the efficiency of the engine beyond just normal capacity, normal running order. This is seen as one of those devices that is being held back by certain vested interests who do not wish this device to be made available at this time. It would defeat the purposes of those powers who control the petroleum industry from achieving maximum profit from the sale of the gasoline. This device is available but not readily available, not available to the general public.

It is seen by this Awareness that it is not favorable to make too much comment on this matter of this device, to explain it too thoroughly for it would bring undue interest into and onto the organization of *Cosmic Awareness Communications* as well as the Interpreter. *It* simply wishes to make note that a device is available, and that any who seek such advice, can, if they wish, through extensive research, find these devices available to them, but that there is some degree of concern held by this Awareness of speaking too much more on this topic.

#### Awareness Questions the Mentality Behind Petroleum Engines

The other end of the spectrum that this Awareness wishes to speak to is not about gaining better gas mileage, but rather, in questioning the whole mentality behind the continual use of petroleum engines. It may well be time now for society to truly question the continual use of these rather limited forms of transport, these petroleum engines that drive very fuel inefficient vehicles. There are indeed alternatives, and this may be a time when the gas prices are so high, that rather than just seek ways of continuing to use these vehicles, these engines on a limited and finite resource such as petroleum, that instead, a shift starts within the consciousness of mankind, a shift away from thinking that the use of petroleum based technology is the only way to go.

#### Water Can Run the Cars of Today

There are many other options that could start to become a reality. There has been for a long time available, engines that run on water, on the hydrogen in the water, that are non-polluting, that produce oxygen as the result of the release of the oxygen molecule from the hydrogen/oxygen bond. Again, this technology has been available and has been suppressed for a long long time. It may now be time for people to voice their desire to have available this technology of using water to run the cars. An image is seen here of pulling out the hose from the house and putting it into the gas tank and filling the car with the water from the garden hose. Such is a possibility, if enough people stop the use of petroleum products, of using gasoline to run their vehicles.\*

\* Ed's Note: Right now on the Internet is the story of Stan Meyer who invented a way to split water into hydrogen using a process similar to electrolysis. After releasing a video on the internet showing how it works, the entity was found murdered and all his research material stolen. For more info and the video go to Google and type in "Water car inventor murdered."

#### Stop Being Duped by the Petroleum Industries

A strong clear voice must go out from the people who refuse any longer to be held captive to the petroleum industry as the petroleum industry wantonly raises the prices over and over and over, using flimsy excuses, lying to the people, telling the people that these prices must go up, because of this crisis, or that situation. The people themselves must now start to understand that

they have been duped by these petroleum industries into accepting the lies given to them that fuel prices must by needs be so high. Indeed it is time to seek out alternatives, and to voice a displeasure with the state of affairs that exists, because the control these companies hold over the people of the United States, and over the peoples of the world.

#### Consider Walking to Work

There are many areas that are brought forward through this simple question of how to increase fuel efficiency. This Awareness has one last area *It* wishes to look at, one last thing *It* wishes to say on this matter, and that is that *It* sees that perhaps one of the things that needs to now be looked at and considered, is to simply leave the vehicle at home, and to walk to work, to take public transport to work, to cycle to work or to walk, bus or cycle to other destinations. The people have become too dependent on the use of the car, and motor vehicles for their own personal transport. Walking is seen as something that many people have gotten away from once they have become the proud possessors of a license. Too many people have become so reliant on motor vehicles to take them short distances, that they grow unhealthy as a result, and they become dependent on such vehicles. They moan over the fact that the price of gas is getting higher and higher and higher.

It would not be, according to the opinion of this Awareness, a bad idea to see this as an opportunity to refocus, the gain a personal perspective, to reinstall physical activity such as walking as a means of transport, of cycling and of using public transport as a means of getting around. In America in fact, and indeed, in North America, the mentality is so geared towards the use of vehicles, of cars and personal transport, that it is almost inconceivable for many to consider other ways of getting around.

This Awareness wishes to the members to think in others ways, to think beyond the box in terms of solutions, to the increase in the prices of gasoline, solutions that are not at all dependent on using a motor vehicle for personal transport. Be inventive. Be bold. Be courageous in the thoughts of how to come up with solutions that introduce new ways of getting around, new ways for transportation, to transport one from Point A to Point B. This is seen by this Awareness in a greater light, as a turning point away from highly inefficient petroleum engines and machines, to much more efficient alternative energy sources, as well as an opportunity to find one's health again in such simple ways, such as walking or cycling.

This Awareness is complete on this matter and asks for another question to be given.

### How Bhagavan and Amma Plan to Enlighten 64 Million People by the Year 2012

(Diksha and the 100<sup>th</sup> Monkey Principle)

This question is from Ted Helsinki, in Wisconsin. He asks "Are you familiar with the man and his wife from India, whose goal it is to have over 60 million people fully enlightened by 2012? He does this by means of an energy transfer called Diksha. This can be done in person or at a distance. His name is Bhagavan, and his wife is Amma. They are both supposed to be fully enlightened beings, and his followers call him the Avatar of Enlightenment. That figure of, I think it's 64 million that he wants to bring to full enlightenment by 2012, is the number he says that is necessary to have the 100<sup>th</sup> Monkey Effect that will bring about the full enlightenment of the planet.

A woman I know named PJ Dean went to India for his training to give these energy transfers to others. Her website is [enlightenment-online.com](http://enlightenment-online.com). You can read a lot more about this at her site. Also, if you're interested, she is doing a group Diksha over the Internet on Wednesday at 8:00 PM Central Time. I have taken these Dikshas before and have found them to be quite powerful. Anyway, the reason I'm mentioning this is because although it's not well-known now, I think it's going to really grow fast. Why not ask Awareness about it? If you decide to give it a try, I'll be there on the net on Wednesday."

#### COSMIC AWARENESS:

This Awareness is indeed familiar with this individual and his wife. They are indeed highly evolved beings who've come onto this planet at this time with the purpose of introducing this process, of elevating awareness and consciousness and transferring this from one person to another; this process of Diksha. This Awareness expresses that this is simply one of many who've come to this planet at this time to increase awareness, to elevate human consciousness. It is indeed part of what the End Times are about. These End times are a time of transition, a time of change, a time of endings and new beginnings, culminating on that mysterious date of 2012. The year is simply indicative of the conclusion of the many attempts at raising awareness, at raising consciousness that are happening throughout the world at this time.

This individual, Bhagavan and his wife Amma are indeed fulfilling their spiritual purpose. Their goal of introducing this process to 64 million does not mean that they themselves will introduce simply through their Diksha process, the introduction of raising consciousness in 64 million, but that it has a domino effect. Those touched by this process, and those who themselves raise their consciousness will touch others, will spark in others a desire from within to raise their level of awareness, their level of consciousness. There are many who are making this so.

#### The 100<sup>th</sup> Monkey Principle

The 100<sup>th</sup> Monkey principle is crucial in this matter; that being the concept that the x monkey or x individual receives the gift of understanding or awareness, that it will be exponentially shared with everyone. That 100<sup>th</sup> individual who reaches a heightened enlightenment will open the floodgates to humanity, so that overnight, they too will have that higher consciousness, that higher awareness. It is seen clearly by these individuals that touching others spreads this information, this knowledge from one to another to another, until a time is reached where all of mankind have this knowledge, has this awareness, has attained this height of consciousness.

This 64 million is seen as an accurate understanding of how need to have this awareness, this consciousness, before it is automatically spread to all of humanity. The 64 million, although sounding to be a huge amount is a relatively small amount percentage-wise to the 6 and a half billion people that exist on this planet at this time. That is only roughly ten percent, if that. It is less than 10 percent, for a true transformation to occur, for an explosion in the awareness of humanity, an evolution in mankind's capacity to understand and to transcend the mindset that currently exists on this planet.

This is indeed exciting, and this Awareness wishes to remind all that you are indeed living in exciting times; exciting and challenging times. This Awareness wishes also for the members to understand that this Awareness through the various Interpreters over the last 30 plus

years of this organization have also been passing on to others heightened awareness, heightened understanding. There are times in the past; the time of the *Gathering Storm*, and other times when information made available through this Awareness shifted the consciousness of the nation and indirectly of the world. So it is seen that this process of passing on a level of awareness from one individual to another is something that this Awareness and this organization have been doing for quite some time, but that *It* greatly appreciates all efforts of all individuals throughout the world, to heighten awareness understanding and consciousness.

This Awareness asks for any further questions in the context of the latter to be spoken at this time.

Ed's Note: Amma is a hugger. She was in Seattle early in June and the TV news showed entities lined up for blocks to get a chance for a brief hug. The media was astounded and had no idea of what was really going on. It is the High Self of these entities that led them to Amma who in turn gives them enlightenment.

CARRIE:

Everything has been answered.

### Closing Message: The Rapture of the Faithful

COSMIC AWARENESS:

This Awareness wishes to express that it is seen that the prophecy of the Messiah coming back, marking the End Times and the rising up: that which is known as the Rapture of the Faithful, is very limited in its understanding and in its interpretation. It is not simply one Ascended Master, Enlightened Being, one Messiah that will return at this time to help rise up humanity, but indeed, many.

Many have come to help mankind in this most crucial time; many who hold the Christ Consciousness, who have achieved enlightenment who are working towards sharing this knowledge and this truth to the many.

This couple is one of those who has chosen to serve this purpose; whose soul-purpose it is to do this great work, to help the many awaken at this time. This Awareness applauds the efforts of all the Light Workers, of all the Wanderers who are here at this time to help the masses awaken to that greater truth, that greater plateau of awareness and consciousness that await all. It is simply a matter of awakening now to the Greater Truth, to the greater consciousness that is available to all. This Awareness feels complete with the answering of this question at this time. This Awareness wishes to move on to the next question.

### THE NORTH POLE IS FALLING APART!

(CAC Member is Stunned Almost Speechless)

This question is from Lloyd Ard in Utah. He writes: "I am stunned almost to speechlessness. The Northeast Passage across the Siberian polar ice is open. The glaciers on Ellesmere Island and the Northern and Northeastern shores of Greenland are collapsing within as matter of days. The channel between Greenland and Ellesmere Island is open, and only about 250 miles of ice remains on the North shore of Greenland connecting it to the polar ice, and that is breaking up. Vast stretches of polar ice are pulverized and floating free in the arctic ocean. Thousands of square miles of ice are pulverized and on the edge of breaking up into a billion icebergs. An immense rent has formed in the ice North of Queen Victoria Island. An even larger tier reaches up from Siberia, poking at the North Pole itself. The entire North shore of Alaska is ice free, as is all of Northern Siberian Shore, all the way to the New Siberian Islands and beyond.

The last of the ice blocking the Northwest Passage at the East end of Queen Elizabeth Island is breaking up. In short, the North Pole is falling apart!, and some claim Global Warming isn't real! Within weeks the refreeze should begin. Depending on how long it is before that happens, massive changes may occur at the North Pole before the freeze. The polar ice may well break free from the land on all sides. This is one of the most astounding events in all of human history! And where is it on the news?" Will Awareness please comment on this matter?"

COSMIC AWARENESS:

This Awareness indicates this individual is indeed correct in his assessment of the situation; that it is one of the most monumental geophysical facts that is occurring at this time on this planet, that is very little reported on, that has very very small coverage, for it is not news of a sensational nature. It is not news that can be used to grab a person's attention. Indeed, this Awareness sees it as equivalent to sitting in a room and watching paint dry. This Awareness does not seek to belittle this situation for it is indeed a very serious situation, but it is not one that is so stunning in its visual effect that it can be seen immediately, which is what the news reporting agencies of this nation that is called the United States of America choose to thrive on. Therefore, they do not always show pictures of ice flows on the news.

It is indeed a serious and crucial issue. But that is only on one level of the daily reporting of this event. It is not seen as spectacular enough on a daily basis to merit full-time reporting of. There is also seen another reason why such recording is not favored, and that reason is because this is such a serious problem that there are agents and agencies that do not wish to frighten the American people with such dreadful news, and wish to keep it quiet, and who wish to avoid any public hysteria over this event. This Awareness sees that this is one of the most crucial events in the history of the modern world, but it is not of an order or magnitude that has not been experienced before, many many thousands of years ago.

At one stage, the entire North American continent was covered in thick ice flows, but that these constantly retreated back and back and back until they reached a point that most people have been familiar with over the last several hundred years. This recline in the ice pack is simply a continuation of this geological transition that has been underway for millions of years, and it will ultimately invoke a new ice age as the polar ice pack melts into the oceans of this planet, causing shifts in the gulf stream, causing freezing in areas that have traditionally been warm and tropical. This is not seen as an immediate occurrence in the next few years, but is certainly seen as a shift over the next several hundred years. Areas that are now wide open may once again experience those ice flows, those glaciers that once covered this continent, but sufficient time will be available to get out of harm's way.

It is seen also that as these areas that are currently inhabited become inhospitable, uninhabitable, new areas will open up. It is seen that there will be migrations of human beings from one area to another. It is also seen that those areas now traditionally known as the countries of North America, such as Canada, the United States, and Mexico, will cease to be, as now known. There will be new political geological geographical affiliations, new countries, new states, new cooperation's between the peoples of this continent, the European continent and all other continents in the world. But this is seen as relatively far down the road.

### The Immediate Effect is More Storms and Hurricanes

The immediate effect of the melting of the ice pack is that the weather systems of the planet will indeed continue to shift as they have been doing over the last number of years. They will continue to create instability in the weather patterns causing greater amounts of storms and hurricanes and weather events of this nature to continue happening over the next several years. A stability will be found long-term down the road, but it may be necessary to simply know that all that has been considered as stable for so long is now becoming unstable because of the melting of the ice packs, both at the North Pole and at the South Pole.

There are programs available that discuss the problems of these melting ice caps. But these programs are not seen on your main TV channels and stations, but rather are to be found on such channels as the Discovery Channel or those educational programs; the Public Broadcasting Systems and programs that would show the evidence, that would portray the situation for what it really is.

Eventually it will become such a great problem that even the big three networks must report on it, and that will be in a time not too distant.

### Cataclysmic Events Await Humanity

There is seen that there are a number of geological and geophysical events that will transpire over the next several years that will also impact the world greatly. Many have predicted great geological changes for this planet. It is all part of the breaking up of the old, and a replacement with the new. The melting of the ice packs is most definitely a serious matter, but it is not the only geophysical matter that will manifest in the years ahead. It is not the intent of this Awareness at this moment, at this time, to go on too much about the cataclysmic events that await humanity, for they do not need necessarily to be of such a nature that many many many are killed because of them, but they certainly will change the lives of many millions, indeed billions. There is more to be spoken of these events (at another time.)

This Awareness is complete on this matter at this time. This Awareness is prepared to answer another question.

## THE HUNA CONCEPT OF SIN

( intention is Crucial When You Hurt a Person's Feeling)

### QUESTION:

Okay. There's one more. This is from Tony Sellards, who writes: "I would like to ask Awareness a question, and I don't know if it has been answered yet, so here it goes. I finished reading two of the Huna books and it talks about the concept of sin, which is not hurting others physically or mentally. I understand that some people are more sensitive than others so they can be hurt easier, especially when there is no intention to hurt the other person. I feel guilt when someone is mad at me, or I feel hurt and it bothers me a lot. So I want to know if I should try to talk to the person who I feel is hurt, or if I should leave them alone.

I know that ignoring a problem doesn't solve anything, but does it help me to confront the person whom I have hurt, or I think is angry at me? Or would it be better to leave them alone, and let them come to me, or should I try to talk to them, even if they don't want to talk to me? Also, in the Huna books, it talks about Mana, and I am confused to what it is supposed to feel like, the vital force inside me. I just want to know what the 'vital force' is supposed to be, in easy to understand words, and also the question asked above, in easy to understand words. Thanks."

### COSMIC AWARENESS:

This Awareness asks to repeat the name of the individual asking this question please.

### CARRIE:

Tony Sellards.

### COSMIC AWARENESS:

Thank you. The concept of sin is not a Christian understanding of sin: sin against God, sin against others. It is seen as sin against self. Indeed, many of this individual's comments are indeed about his own feelings of guilt, of discomfort for having affected another, of having perhaps harmed another through his actions, his thoughts, his deeds. Indeed, *intent* is very crucial to this question. What is one's intent? Does one intentionally intend to hurt someone when they lash out? Or is this an unintentional event?

To simply feel guilty because someone has chosen to be impacted, affected by one's actions or thoughts, does not mean that one has committed a sin against that person, especially if that was not one's intent. This individual Tony, must understand that a lot of the question posed by him today has more to do with his own sense of responsibility towards others, his own sensitivity towards the well-being of others, and his integrity, that he may affect others or hurt others unintentionally.

If it is indeed so that he unintentionally said something or did something that someone else takes exception to, that someone else chooses to be hurt by, then he has not committed a sin. It is not his fault that another chooses to feel upset, because of something said or perhaps done. This Awareness wishes to convey that this is a very complex area and very dependent on each and every interaction between two individuals. It is not easy to simply say that one commits a sin when one has said something to another that hurts their feelings because there are so many variables in this question, that it is almost impossible to answer completely, and so this Awareness is coming to focus on this individual in his own understanding of sin as it applies to him.

In a situation of two individuals interacting with one another, there is always a choice as to how one will respond to the other; that one can choose to be upset by the actions or comments of another, whether spoken intentionally or committed intentionally towards that person to hurt them. But if one chooses to be hurt by actions and that which is spoken against them, then one could perceive this as a sin against that person, as an intended attack against that person, but if the individual who is recipient to this attack chooses to rise above this, chooses not to take this personally, chooses to not be at the effect of someone who may maliciously be attacking them through words or deeds, then they will not be affected.

If, however, the individual chooses to be at the effect, then there is an interchange between the individuals that causes hurt and pain, causes one to feel a victim to the other. Again, this Awareness asks: Is this a sin of intent, of purpose? Or is this a sin of ignorance and misunderstanding, or the human capacity to rise above, if one wishes? This is indeed an interesting question.

### Always Consider Intent When You Cause Pain to Another

This Awareness suggests to this individual and to all individuals, that they *always* consider when they have spoken or done something that causes pain to another, whether they have truly done so with intent and maliciousness, or whether their actions were innocent of such

intent, but were misinterpreted by another. There is always a sense of guilt when one has hurt another's feelings, but that this is the byproduct of one's own upbringing, beliefs, attitudes and experiences, and is very difficult to truly understand.

That is why this Awareness says it is dependent on each and every exchange and interaction; the intent behind, the choice made by an individual to receive such wounding, such betrayal perhaps, and that *It* cannot fully answer this individual's total question, but that *It* does hope that *It* has shed some light onto this matter and that *It* understands the implication of the question to a better degree now.

#### The Concept of Sin Under the Huna Interpretation

This Awareness is aware that the concept of the Huna interpretation of sin is one that very much understands the aspects of the High Self, the low self and the middle self. If acting from the middle self, one indeed acts in a way that would cause great damage and great harm towards another, to the individual. This is indeed a sin in the Huna understanding. But even within the Huna philosophy, there is great leeway in the interpretation of sin. Simply speaking a word that hurts another's feelings or doing an unenlightened action against another individual would not be necessarily considered a sin in the Huna way of thinking.

This Awareness wishes to move on now to the second part of the question.

### Confused About Mana—The Vital Force

#### QUESTION (CARRIE):

"I am confused about what Mana is supposed to feel like. The vital force inside me. I just want to know what the vital force is supposed to be in easy to understand words.

#### COSMIC AWARENESS:

This Awareness says that there are indeed various kinds of mana that can be produced and that are used by the three aspects of the human being. The simplest mana is the mana that is created through the physical. The mana that is created through the breath, through eating, through physical activity, this is known as mana, mana of the physical. The middle self's mana, or mana mana, is focused will power, the focus of intent. The Mana of the High Self is the fabric of miracles, is that which the High Self can use to interact with those two lower aspects of the human being.

#### An Exercise in How to Feel Mana the Vital Force

This individual asks how to understand and feel this energy. This Awareness wishes to ask the individual now to stop breathing for a minute or two. Two minutes may be too long, but to hold one's breath until one becomes a little uncomfortable, not to excess, but to that point where it becomes uncomfortable to hold one's breath any longer, and then breathe deeply. Breathe deep the air that fills the lungs. This is the mana of the physical. This is how simple it is to experience mana. To breathe deeply when one has held one's breath for a limited time. That would be the most easiest and quickest way for this individual to know what it feels like to have the physical mana.

#### How to Feel Mana Mana of Directed Will

The other two levels of mana are more difficult to appreciate or to understand. The mana mana, that of directed will, may be best felt and understood when one has a clear image or thought, and feels that image or thought going out into the world of form and coming back in a way that is actual. This Awareness wishes this

individual to create an image of something that he might desire; this could be drawn or written about, but that whatever the image is, that after it has been created, that this individual sit with this image, think about it, focus on it, project it outwards.

This could be almost anything. By projecting it outwards, the individual then release and let go of any attachment to that which has been projected outwards. This could be anything from wishing abundance to be brought into one's life, maybe even specific amount of abundance. Perhaps visualize ten dollars being brought to this individual, being manifested in this individual's life; to sit and focus on ten dollars, the image of a ten dollar bill coming to this individual from a totally unexpected source, but simply visualizing it for several minutes and then letting it go, letting it go so that what has been given out to the universe, to those powers that would bring such a thing back, can actually do so.

Once this mana mana is sent forth, that it will return bearing gifts, as the saying goes. This can also be used to project good will towards others, unconditional love. It can be used to project into the collective consciousness of this planet, the intent for peace and the resolution of world conflict, individual conflicts. The applications are very many indeed. This Awareness asks the individual to attempt such a process and to see what it feels like to sit in meditation, projecting an image, a thought outwards, with intent, with focus, with desire and passion. That is the only way the individual will truly understand mana mana, or the mana of the middle self: focus, intent and will power.

#### How to Feel Mana of the High Self

The third and final mana is the Mana of the High Self; that of the miraculous. This Awareness asks the individual to send mana, small matter physical mana, to the High Self in the way of a gift or offering. This Awareness asks the individual to take three deep breaths and feel the Life Force, the tingling, the energy gathering up in the belly. With the exhalation of the third breath, take this energy, this mana, lift it up, blow it up to the High Self as an offering to the High Self; an offering with no intention, no demand, no requirement. An offering to be given to the High Self, to be added to the High Self's bank account, so to speak; the reservoir of energy the High Self can work with.

When needed, the individual can ask of the High Self that some of this mana that has been sent to the High Self and transformed to High Mana, be used for the individual's benefit, if and when appropriate. The High Self can also make use of the High Mana for greater deeds and greater purpose. Tony's desire to know the feeling of Mana at this level, will be made apparent to him when the High Self issues High Mana back to him: the gift of Mana.

This is the most complicated and the hardest of the manas to truly experience, but it is most definitely available with practice, with belief that it is available. This Awareness asks always that the individual practice the giving of low mana to the High Self through the middle self, through the direction of will, to the High Self, so that there is unity in the three levels of being: the low self, the middle self, the High Self; that all are united in purpose and in focus. The practice of Huna in this way will bring dividends, will create the unity of self that Awareness wishes all individuals to start to understand and to comprehend; that this Awareness wishes all individuals to achieve at this time.

This Awareness is complete with this question, and asks if there is any other aspect to the question that still needs to be answered.

CARRIE:

No. It is complete.

COSMIC AWARENESS:

This Awareness is ready to move on if there are any other questions.

CARRIE:

There is nothing else for this evening.

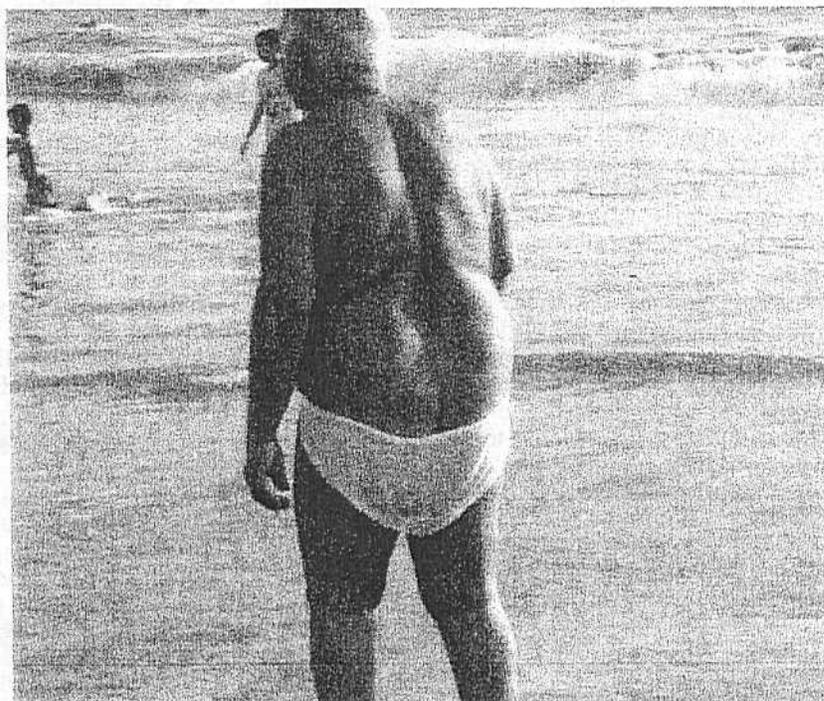

COSMIC AWARENESS:

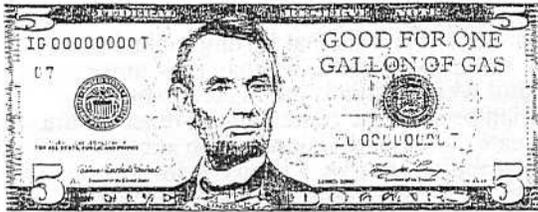

This Awareness wishes to thank the energizer for her assistance and efforts in presenting the questions and holding such an impeccable space for the Interpreter. The Interpreter is finding how challenging it is sometimes to take a question presented and to trace the answer, to follow the line, to weave the tapestry of a complete answer. This Awareness wishes to express *Its* satisfaction with the Interpreter's attempts and efforts in this matter, and guarantees that with continual practice, that the process will become easier and easier. *It* is indeed well pleased with the efforts that are being made and the results that are coming forth at this time. This Awareness is complete for tonight.

CARRIE:

Thank you.  
The Law of Gratitude is recited)

#### LESSON NUMBER ONE

##### Question:

Awareness, we are gathered here tonight for the first lesson of the Correspondence Course in the Sea of the Moon Child. This lesson being that which concerns the nature of imagination on the natural, historical, social and personal levels.

##### COSMIC AWARENESS:

This Awareness indicates that in the beginning (which is ever present), but before there was image, there was a clarity. This likened unto a screen of crystal clarity which was, and is, consciousness or Awareness, which is the spirit which had, and still in some places, has no image projected upon it, or emanating from it, or permeating through it - the clarity being that which had no concept of distance, space, or time, for its essence was nothing other than pure beingness: the being without any object of being, wherein the question would never occur as to ask, "What are you being?", or "What is it being?", for it simply was an action of *'being.'*

This Awareness indicates this as the beginning which is 'now'; the beginning of forms does come from this level of being, and this level of being ever and always is 'now,' never was and never will be, but simply 'is.'

This level of being is that force known as anti-matter, known as Akasha, known as Spirit, known as Universal or Cosmic Consciousness: this as the being of

the universe, and this being as that which is likened unto the screen on which the movie of life and forms are shown. That this screen as one which is not on a flat plane as in your movie theaters, nor confined to a space of three dimensions, but permeates in all directions and grows according to the consciousness which perceives its boundaries.

This Awareness indicates that the fourth dimension being that of growth, as compared to the third dimension which is measured by height, depth, width, or the second dimension which is seen as a plane. This fourth dimension grows like a tree or any other living creature, but on the level of Akasha, is any size that the center point, which would perceive size, can perceive. This Awareness indicates in other words, however large you can imagine your universe to be, that is how large it will be for you, for you are creating the size from its energies and its inherent nature, which is but consciousness, the same substance which you use to examine and explore it.

This Awareness indicates this fourth dimensional quality of growth, or expansion, is found in all living things, and, to some degree, all things contain life, even though these things may appear to be dead. This Awareness indicates that the substance which allows that growth factor as compared to the static factors which are seen in the first, second, and third dimensional concepts, wherein there is a maintenance of size or experience - this fourth dimensional factor is that which is consciousness. And when consciousness enters into any form or any substance or any idea and begins to grow, that growth factor from this fourth dimensional factor, that growth substance, then begins to expand the idea, expand the experience, expand the matter, expand the substance, or expand the thing so that another perceiving that from another outside source, would look and say, "Look! See! It is growing."

This Awareness indicates that in terms of the natural flow of this energy which is consciousness, which is anti-matter or spirit, this anti-matter as capable of being any size, any shape, any thing it can perceive itself to be - but in order for it to be anything, it has to have something which it can reflect from, or can be in contrast to. This Awareness indicates in this manner and for this reason, in the beginning, God, the Spirit, created a division of the waters of heaven into light and darkness, into radiance and magnetism. A portion of consciousness began to expand, and another portion, being the water, began to contract, even as raindrops are formed in your skies.

This Awareness indicates as these two actions of expansion and contraction of consciousness began to occur (and this occurs continuously, moment to moment, even as this Awareness now communicates with you), as this begins to occur wherein the expansion and the contraction are occurring simultaneously, the appearance of differences can be discerned by one about the other. Thus the area which is contracted feels itself to be more centered, and the area which is radiant feels itself to be more spacey - more spread out. This Awareness indicates as this is intensified, the area which is centered eventually can be referred to as the 'self,' and the area which is spaced out, which permeates outward, can be referred to as the 'greater self,' the Great Spirit, or as the 'other than self.'

This Awareness indicates that in the action of imaging, the center can then begin to look at the 'other than self' and can project through the focusing action, a division which repeats the original action whereby God

divided the waters, and this center, be it man or God or demon or whatever, can also create concepts or images which condense or expand, which contract or radiate, and in this manner duplicates the original action.

This Awareness suggests that before moving further into this duplication and the multiplicity of this duplication, whereby the billions of images are created, this Awareness wishes to take you back to the original division of the waters of heaven, the waters of Akasha. This Awareness suggests that you visualize yourself as being but a drop of water floating in a universe wherein no other forms exist. That you now visualize yourself as this drop of water, being sensitive and having certain amount of feeling within, even as you presently have as an entity, but these feelings having no connection with any forms, any images, any pictures, any thoughts, words, or ideas. This Awareness suggests that you visualize this drop of water as simply being that which feels itself vibrating as a drop of water.

This Awareness indicates that you now visualize that this drop of water is not the usual water, but is a water likened unto electrical, wherein there are certain vibrations which light and sparkle and touch one another, and visualize yourself as a being which is drawing inward and which, on its outer periphery, is shining and glowing with brilliance from contact with the radiant energy. This Awareness asks that you now visualize yourself becoming more and more centered, drawing in from that radiant energy, more and more of the electrical forces which make up your being as a center.

This Awareness now suggests that you move in the other direction and visualize yourself giving away all of that which you drew towards you, and that you now visualize yourself emanating energy outward, glowing outward like a sun, giving forth all that you have, giving forth all that you are, spreading out and becoming equated with everything that you touch, and having no center left from whence to emanate, but simply being that which is, wherever it is found. This Awareness indicates this as likened unto ice melting in water.

This Awareness indicates that you have now moved back from the magnetic side into the radiant side, wherein there is no self but the greater experience of all. That wherein you, as an emanating and radiant force, flow out in all directions, likened unto an ocean of consciousness, you now may look and perceive a certain point before you which is drawing energy toward it, drawing forces to it, and in drawing these forces, it is beginning to center itself before you and draw from you, certain portions of your being which makes you feel light and buoyant as it becomes heavy and dark and as it collects greater and greater energies from you.

This Awareness indicates that you have now looked at the division of the waters from both sides: both the material and the spiritual, the magnetic and the radiant, that you have simply shifted your outlook from one set of eyes into another, from one experience into the other. And that the division of the waters of Akasha has created for you the possibility of experiencing different aspects of yourself from different viewpoints of your eyes, from different viewpoints of your experience, so that you can look out at yourself from the realm of matter and magnetism, or you can look inward at yourself from the area of radiance toward the magnetism, or you can simply feel the totality and space-out, feeling those points of magnetism as sensitive parts of your body, as cells of your being, as entities within the body of your consciousness.

This Awareness indicates that having looked at the division of the waters of Akasha, we may now move back to that point wherein this is duplicated, whereby the portion which became the centered self, repeated the process and created another division, and in another creation, the possibility of three, a trinity is formed which allows an even more complex involvement and experience for your being.

This Awareness indicates that moving from this trinity level, the fire, the water, and the offspring, air (the trinity being that which is still in the abstract and without form), is capable of producing a fourth offspring, which brings about a stability and a form of grounding, or anchor point, which allows maintenance - the holding action. This Awareness indicates that the fire-water of Akasha, the water of self, which may also on some levels appear as fire, a glowing light, and the offspring - air, which is vibration that fluctuates between these elements of Spirit, Akasha, or Magnetism water, this offspring - air, the vibration which may be equated with the ripples of a pool wherein a stone is dropped, the pool being the Spirit - Akasha, the stone being the Magnetism - the central self, and the vibration being the ripples between: the vibration equating to air, or mind - the relationship that can be bridged through these ripples.

These three, being the trinity, make possible the relationship of more complex experiences to follow, and in this action, mind and centerings begin to work together using Spirit and form, that which is called imagination - this being formed by collecting magnetic energies into concepts, and holding those as one, in a stable manner. The image being held, then being brought into contact with other images held, even though these images may be nothing but dots in consciousness - these dots, added one to another collectively, gradually begin to take on shapes which then become images having their own peculiar and particular shape. And the substance which relates back and forth - the ripples of the pool - known as mind, has the capability of naming or conveying in some manner, a quality that calls this shape - this image - by some form of catch-all term which allows that entire image to be sucked down into a small vault, put away into the storage of the magnetic self, or brought back by the issuance of that term into the screen to be reviewed. This quality being called the 'word,' the mind, which is capable of working with the images to store these images in small letters, words, concepts, sentences, books, or whatever, to be released back into the screen of consciousness whenever.

These then, begin to accumulate in a contagious manner whereby the images are played one upon another, with words naming each and words being repeated upon each and bringing forth more images until the perceiver has called forth before his or her being, so many images through these words, that it is beginning to perceive nations of images, clusters of images, forms, colors, and all types of shapes. These all being nothing but parts of the 'magi-nation,' created by words, magnetism, and clusters of energies.

This Awareness indicates that the continuous reinforcement of these images begins to convince the perceiver that the images have substance and reality apart from the action of the perceiver; yet, in reality, the perceiver and those like him, are the *creators* of these objects of view.

This Awareness indicates that you may now visualize clusters of eyes staring in the darkness of consciousness, these eyes looking at one another, wondering,

"Which one of you created me?" Wondering, "Am I really seeing eyes, or not?" Wondering, "What is that looking back at me? Is that my imagination, or is it real?" Wondering, "How did I get to be here with those eyes staring at me?"

This Awareness indicates that the magi nation is a nation using the waters of Akasha to create itself, and from this creation, to continue moving into more and more experiences, and yet this land of the magi nation is nothing but a collection of consciousness being played upon a screen of Akasha in a theater called 'the universe,' and you are all such stuff as dreams are made of. Yet, even the complexity of your dreams, the details and colors and feelings within your dreams, the show, the play, the game - all of these are sacred and as significant and as meaningful as is any portion of this Awareness or the Akashic sea.

This Awareness indicates that as an individual, whatever this Awareness has said from *Its* viewpoint, is nothing other than an expression of yourself, for *you* are this Awareness and have journeyed with this Awareness in the movement of imagination in creating yourself as you are, to be what you are at this moment, and to change into what you shall be in the next moment.

This Awareness indicates that in the beginning, *you* created the heavens and the earth and divided the waters and set forth all things as they are in your consciousness according to the attitudes and relationships with others.

This Awareness indicates that your relationship with others may be viewed from the attitude of being a separate entity, or from the attitude of being the same entity as all others, and with the attitude you choose, you create your world, your heaven or your earth, and wherein you choose, you may set aside the Sabbath and rest, for your work is good.

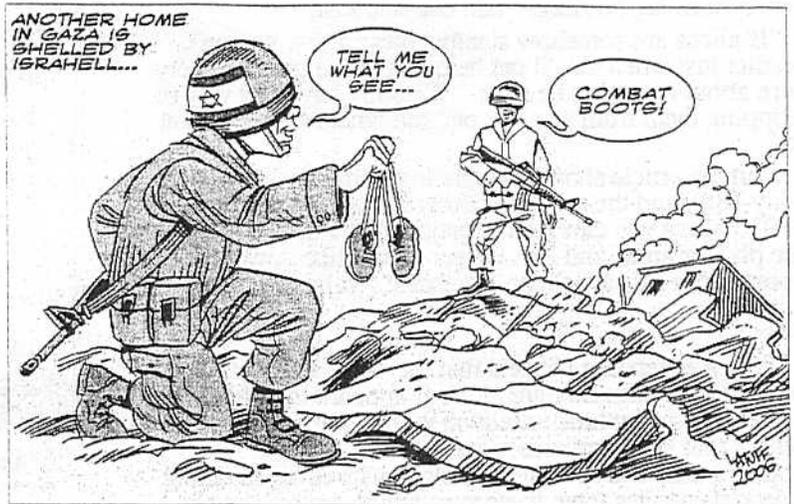

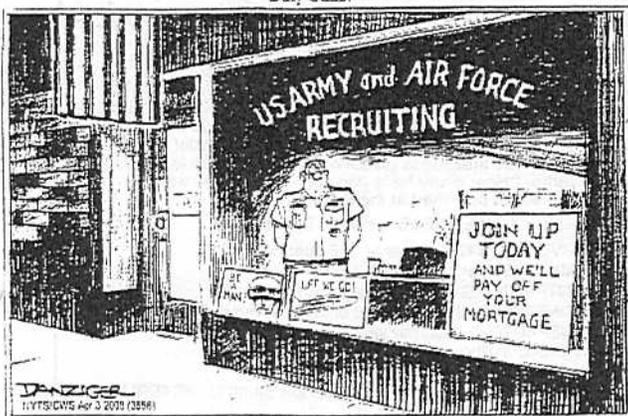

This Awareness suggests that the action of the imagination, coupled with the direction from the mind using words, is capable of creating for you, your heaven or your hell or any states of purgatory, Limbo, or whatever, in between.

This Awareness suggests that you image that which you wish to experience, you use the *Law of Description* to carve it out and to place it in the magnetic files for recall, and that in time, when you have incorporated this into your being, you shall reap your reward exactly as you have created it.

This Awareness indicates this as the conclusion of this first lecture on imagination as a comfort zone, as the source of much of your being. This Awareness suggests that any question may be asked at this time, or the Interpreter may be brought from trance.

(The *Law of Gratitude* is given.)

Duty Calls!

Excerpt CAC Reading in 1991 Paul Shockley Interpreter

## ARE ENERGY-HUNGRY SPACE ALIENS SNUFFING OUT OUR STARS?

### QUESTION:

Several members have sent in a tabloid article from the *Weekly World News* of July 9th, and this one by A J Geiger. He writes: "I suggest reading the enclosed article to Awareness and ask if it is true. If it is, our problem of the Reptilians is as a flea to an elephant. The article is: "Energy hungry UFOs are snuffing out stars like light-bulbs. The space aliens are stealing our stars!" and it reads:

"Greedy aliens are stealing the stars right out of the heavens, and our own sun may be next!

"A team of expert astronomers headed by Dr. Mora Victor in Chile have confirmed that aliens are sucking up the energy from huge stars all over the Milky Way.

"They're snuffing them out like light bulbs," said one top scientist.

"And they are coming this way."

This startling revelation has been confirmed by Dr. Victor, noted astrophysicist from Valparaiso.

"We have clear evidence that something—or someone—is picking stars out of our Milky Way like grapes," Dr. Victor said.

"I've never seen anything like this in my 23 years as an astronomer," he said, "but it's obvious that whoever is doing this is a superintelligence with only evil in mind.

"To suck the very life out of a star is horrible. I can only speculate that these aliens need the star's light and heat to survive," the shaken astrophysicist said.

"So far, we've been able to document more than 73 stars that aren't where they used to be," Dr. Victor said, "and we're still counting. Just look at these photographs."

High-intensity photographs taken on May 18 by the Chilean team of astrophysicists were compared to pictures taken a year before.

"At first, we thought there was an error with the telescope or with the photographs," said team members Dr. Luis Carlos Casella.

"We didn't want to believe what we were seeing."

Since vast distances separate the disappearing stars—distances measured in light-years or trillions of miles—the astronomers aren't certain when the disappearances actually happened.

"Some of the very stars we have been looking at for generations are missing," said one scientist.

"If aliens are somehow stealing these stars, we can't predict just when they'll get here, but we're unfortunately sure about one thing he said: " We don't have any way of stopping them from stealing our sun whenever they want to."

And the article shows two photographs, one before May 18th, and the second photograph after May 18<sup>th</sup>, 1991, where you can see the major star is missing from the photographs, and Mr. Geiger would like Awareness to comment on this article on whether it's valid or not.

**COSMIC AWARENESS:**

This Awareness indicates that this does appear to be based on findings that are valid. It appears that these are forces of a magnitude unrelated to the Draconians or others that have previously been discussed. That it appears there are certain technologies involved in taking selected energies from these suns which are affected by vibrations, by emitting certain vibrations, the entities involved, are able to capture other vibrations in exchange and this leads to a diffusing of the energies of the sun involved, so that it goes out.

The matters involved are altered so that it simply goes out. It does not disappear, but the fusion process is shut off. This Awareness indicates that these forces capture this energy for use in their own purposes and technologies for gains that are not clearly seen at this time. This Awareness indicates that there is not sufficient energy on this to give more information at this time; that as time passes, more information on this will become available. These are entities of a different nature. In fact, it appears that these are energies of a different dimension; that they are reaching through dimensional levels into this dimension to take energies from these stars.

This Awareness indicates that *It* does not see more on this phenomenon at this time; that quite frequently an energizing over a period of time will allow for new topics and new information to become more clear for future questioning. This Awareness indicates that it is difficult for this Interpreter to read energies that are totally new to his consciousness except as the energies have time to take root and grow in the consciousness; therefore, this Awareness suggests that more on this can be energized for questioning in the future.

It cannot see the names of the beings involved at this time through this Interpreter. This Awareness indicates that it *does* appear that these entities are using forces of blue light; that they are enormous in size. The beings appear to be as large as planets, and that there is an intelligence involved and an organizational network involved in this action and that they are operating from another dimension, reaching through into this dimension

to take these special specific energies from these stars without taking all of the energies, and those specific energies that are taken are essential to the fusion process of the stars.

Without those energies, the fusion process stops.

**FOLLOW-UP QUESTION"**

Then It's possible, as the article suggests, that our own sun might be next!

**COSMIC AWARENESS:**

This Awareness indicates that this is a possibility; that these beings could continue moving in this direction. It does not appear that the sun of the solar system is necessarily in danger, but there is the possibility. This Awareness indicates that this appears to be a stable sun until 2012, after which it may undergo some change.

This Awareness indicates that there is also seen the potential for a second sun to be developed from the planet Jupiter.

**The Cosmic Laws of Cosmic Awareness**

*The Law of One*

This Awareness indicates all is one; there is the *Law of One* and all reside within this Law: That all souls are cells of the body of this Awareness; and when this Law is obeyed, there is no need for any entity to struggle or compete; for this is likened unto the parts of one's body fighting other parts of one's body, and in general the body being at war with itself.

With the *Law of One* you may be at peace in the body of this Awareness. This Awareness indicates the *Law of One* is a fixed and universal law in which those who understand the *Law of One* realize that all is one, and all that appears to be separate will, in the end, be nothing but an illusion to those who followed the path of separateness which appeared as scattered fragments. This Awareness indicates wherein the universe is one totality and entities recognize that wholly universe, than entities may move into that universal harmony.

**-HOW TO GET THIS NEWSLETTER BY MAIL-  
EVERY 4 WEEKS! ( More or Less )**

REVELATIONS OF AWARENESS is a cosmic newsletter, published by Cosmic Awareness Communications, P.O. Box 115, Olympia, Washington, 98507, U.S.A. ( A not-for-profit organization ). Membership fees and donations are deductible from your Federal Income Tax. Try to remember Cosmic Awareness in your will if you wish to have these messages preserved and available to others in years to come. ("How many have you served, and how well?" is the question we will be asked at the Passing Over).
