## AS EXISTING REALITIES BEGIN TO CRUMBLE MANY ARE STARTING TO EXPERIENCE ALTERNATE THINKING AND ALTERNATE BELIEFS

Observe this caution: **Don't Focus** on those Media Stories

### OPENING MESSAGE:

In these troubled times, this Awareness reiterates its message from many times previously: **that those going through these interesting times remember they will experience that which they put most energy and focus into.** If one stays totally focused on the reports that come through the television and are read in the newspapers and are heard on the streets or in the coffee klatches or gathering points at work, then these are the energies of focus that will focus one's attention on the events, problems and circumstances of one's lifetime. It was designed to be so, and it is so, for this was created as the means by which those who came into physical reality could stay focused into a belief system that created the reality of experience. It was created to be in conjunction with mass-held beliefs.

Thus, the perception of the individual as the creator of his or her own beliefs was discouraged. Indeed, many times such beliefs have been attacked and individuals who held any beliefs that they themselves were separate from their society, would be themselves attacked, incarcerated or even destroyed. This reached an extreme in those times in the Middle Ages, when many who held altering views and beliefs from the Orthodox Christian value belief system were rounded up, tortured, confined and executed. While these modern times are not as extreme, what has occurred is the loss of that which was the ability to see beyond the parameters of society. This was bludgeoned out of humanity in times gone by, so that the commonly held belief now is that the reality one experiences is the true reality, the only reality, and anyone who defies this are now considered deviants, and are considered insane and crazy, if their protestation is loud enough or their schism from those who hold core beliefs, set beliefs is too extreme.

### Hear Voices and they call you Schizophrenic

Those who claim for example, to hear voices directing them toward certain actions or toward certain ways of thinking, are considered to be schizophrenic, and if this becomes too extreme and their deviance too much for those around them, they are often committed. These individuals have never been taught how to differentiate between authentic voices heard in that inner landscape versus those voices that speak to them in the here and now. As the psychotic episode increases, the schizophrenic schism expands, and these individuals become more disassociated and disconnected from the world around them and have no control. They cannot differentiate between the inner and outer, and are often in their own world. They lose that ability of discernment, they lose the ability to differentiate, and thus they speak of these voices and beings that command them as if they are all-powerful and ever-present in their lives.

### Dumbed-Down by "Medication" they are like Zombies

This of course creates concern for those around the individual for society in general, and these individuals are often put away for their own good. They are then heavily medicated until a stage is reached where they can once again blend into society. Normally this occurs because the individual's faculties are so dumbed-down that they are very much like zombies, like the living dead, simply existing in a world without perceiving it, feeling it or truly being part of it. Society favors this over those individuals who in their ranting and ravings create a sense of discomfort in those who do not hear those voices, and do not share the perceptions of the individual who is out of touch. Therefore, the use of pharmaceutical medicines to contain the individual is more for the benefit of the society in which such individuals exist than it is for the individuals themselves.

### Psychosis is Much Less in Third World Countries

It is about control. It is about keeping those safe who do not perceive, share or understand what the individual is hearing, feeling or experiencing. Ironically, enough individuals who are experiencing similar situations in those countries and nations that are known as Third World countries, are often believed that they are being connected to or are contacted by some being that is non-corporeal. Thus their process of treatment is radically different than the treatment given in the United States or a Western country for the same illness. Those who believe such matters are often themselves believed, and they are seen to be possessed, seen to be harboring an intrusion of a being from the incorporeal state, and there are many time-honored techniques of exorcism available to drive out such possessing spirits that are inhabiting the individual. These techniques are often very successful.

### U.S. is Pushing Pharmaceutical Approach Over the Traditional

It is for this reason that the level of psychosis and schizophrenia is far less in Third World countries. It is also curious that the Western nations, particularly the United States, is leading the field of converting such nations to believe as they do, and to alter their perceptions of what is occurring in such incidents, so that the pharmaceutical-medical approach becomes favored over older traditional ways of treatment, which are now viewed as archaic and even barbaric. Yet this does not mean that the Western approach is the better approach, for Western society has lost its own focus, has lost their ability to understand that reality exists on many levels, not simply that which is in front of them, that which they believe in, and that which they focus on.

Therefore, returning to the central theme of this opening message, this Awareness states that because individuals believe in a certain way does not always mean that they are correct in their beliefs, even by the standards of other nations and other people. The belief systems of a culture are based on what is culturally perceived as true, right and accurate. If one lives in a society where there is no tolerance and understanding for those who are having experiences that are extraordinary in nature and that lie behind and beyond the parameters of accepted reality, then those individuals will be targeted, and those individuals will be denied.

### Today Many are Starting to Experience a Different Reality

In the times that are now coming, many individuals are starting to have a different experience of the reality that was once held as sacrosanct, that was once held as undeniable. Many are now starting to experience the

inner realm, but have no context in which to place this, have no understanding of how to make this an understandable reality, not only for themselves but for their loved ones and those they wish to share these new truths with. What is often occurring is those who are now changing their beliefs are refuted and denied, are put out to pasture and considered to be part of the lunatic fringe. It is only a small step to go even further and to be classified as a lunatic, as crazy, and this is a fear that many hold as they investigate the new realities as their worlds start to shift.

Many literally believe that they are crazy, and given the way those who are extraordinary in their concepts and beliefs are often treated, those who have spoken up of hearing voices and perceiving messages are treated, those who are starting to experience altered realities become fearful of sharing these beliefs with others. This often creates a situation where those who hold alternate beliefs refuse to share and divulge them. Sometimes they do not even want to acknowledge them to themselves, as they are still trying to hold on to the traditional beliefs that define reality, that the masses hold, that the culture holds, and by doing so they attempt to stay within the context of normality.

#### **What is "Normal" for Society?**

This Awareness asks however: What is normal? There has never been that which is defined as "normal" that is measurable. There is a concept that is held in any society of what is normal for that society, for that culture, and deviation is very seldom tolerated. Those who are starting to experience alternate thinking and alternate beliefs, have very little recourse to others of a similar belief, and this makes the journey much more difficult. The challenging of the beliefs of society becomes a very confused matter, and yet as the energies shift, as acceleration of consciousness continues, they will be carried further and further along, starting to believe more and more that the reality they have grown up in may not be 100% accurate.

#### **If You are one of the "Crazies" then Seek out other "Crazies"**

The trick here is to find others of like mind and like spirit, whose beliefs and concepts have expanded, and who now are those who can support one who is beginning to see a different reality other than that which has always been their normal reality. Therefore, this Awareness encourages all to seek out others of like mind and like belief, for these will be those who will support one as their existing realities began to crumble more and more. These are those who would be able to come together with one in order to create those new beliefs that are coherent, that are in alignment with the new energies, the new reality.

As beings who create their reality, the support of others who are themselves co-creating a new reality becomes invaluable in supporting one in the journey that is opening up. This of course is not always the case, for many are still isolated, and are still trying to live within the context of reality as defined by the masses, and by the culture they live in. But those who have seen and understand and know that there is a new dawn approaching, and a new set of conceptual and core beliefs, are encouraged to seek others out who are fledgling to this new awareness.

#### **Contact those with the New Reality Concepts**

This Awareness encourages more and more contact with those outside of the box of reality that they have grown up in. This is achieved by putting the intent out

that one wishes to come in contact with those of the new realities and beliefs, those who themselves are seeking, those who themselves are finding the new answers. It is also to be backed up with actual effort, either through contact, through the computer and the many groups that are available over the computer or actually seeking out, physically seeking others with altered beliefs to the masses, and by partaking in workshops, by partaking in functions of New Age thinkers, or more accurately, those who are holding the new reality concepts, those who are seeking to live their lives in new ways.

Much of this has to do with putting out one's thoughts and intent and allowing and believing that this will be answered, but there is indeed a degree of responsibility involved as well. It is imperative in these changing times not only to recognize that one has alternate beliefs, but also to actually do something about this, and actually seek others out of like mind and like belief. This Awareness is complete *Its* opening message.

## **THE TOYOTA CONSPIRACY**

### **The Nefarious Scheme behind the Recalls**

#### **QUESTION:**

Carrying on, we have a question from Avaton concerning the Toyota cars recalled. He asks: "Why do certain Toyota cars suddenly start revving up and can't be stopped? They are replacing the rugs and gas pedals Toyota claims are the problem, but even those in many cases still are doing this after the replacements. My theory is that somehow the satellite or the GPS systems built into cars these days are being tested, because when the time arrives to stop every car on the road, they will use this satellite device to do so. Anyway, something nefarious is at work here. Maybe computer hackers are the culprits. We have a 2010 Toyota Camry, which is one of their popular cars that allegedly suddenly go berserk. They recalled it and fixed it and told us we had to bring it in or the warranty would be invalid. It has always ran just fine and the odds that it will someday go berserk are a million to one, so we don't worry the least about it. However, many of these cars are still doing it even after having been recalled and "fixed". It would be nice if Cosmic Awareness looks at this situation, as I suspect the Powers That Be are somehow behind it. Also, other brands of cars are starting to report similar acceleration problems. This may be more than just the power of suggestion." Your comment please?

#### **Cosmic Awareness:**

This Awareness suggests that what must be seen here is that the problems experienced by Toyota and Honda and other Asian car manufacturers are creating for American car manufacturers a favorable situation. It is to be remembered that the North American carmakers – GM, Chevrolet, Ford and the big three out of Detroit -- were severely affected with the downturn in their markets, and many had to declare bankruptcy, so that they could start up again. But they are now playing in a field where certain of their competitors had a solid reputation built upon years of reliability and economic gas consumption. The problem was so great that a solution was required that would help the big manufacturers, the big Three in Detroit, to overcome their problem and make them desirable goods again to the American, North American market.

It must be remembered that once upon a time the North American manufacturers of automobiles had a

monopoly, they had 100% of the market, but this started to change in the 60s and 70s, when those companies, such as Toyota and Honda, started to introduce their product. It took many years to convert the North American market to one that was not only tolerant to the foreign imports, but also found them to be much more value for the money and much more reliable, and thus many began to flock to these foreign imports, especially the Asian-built automobiles of the company Toyota.

#### **Successful GM Electric Cars Were Recalled and Destroyed**

The automobile manufacturers in Detroit could not adjust their thinking. They were like dinosaurs, not seeing that their extinction lie ahead of them. There was once an experiment by the automobile manufacturer GM into the field of electronic cars, this being a testing of vehicles that could be plugged in and run and driven successfully during the day and night period. This was highly successful, and this electric car was a true advancement in the field of automotives, and yet it was kyboshed, it was recalled, and all of those leased vehicles were called back and destroyed. This was at a time when oil prices were low and the thinking of American automobile manufacturers was to make bigger gas guzzling vehicles, because the interpretation was that the American public would love their gas guzzling RVs and bigger vehicles. This was erroneous.

The gas crisis of the latter 1990s showed this to be erroneous. At that time the Japanese automakers had continued to provide an economical product, a reliable and safe product, and they did not suffer so when the economic downturn occurred that devastated the North American market. Thus, it must be seen that they continued in a field where many suffered, where the big three auto manufacturers especially suffered, and with the collapse of their markets they were desperate to get back into the picture. This is where the nefarious nature of this dilemma now starts to appear.

#### **The Elite Families Own and Control all American Car Companies**

These companies of course are hosted by and owned by and controlled by the same Elite power families that control much of the world's economy. It was seen by them that they *needed a way* to make their product favorable once again, and thus it was that they went to those who had access to the technologies needed to create a situation where those very same companies that for so long had been foresightful enough to see what was so occurring, to read the future market and survive in troubled times, to see that these individuals no longer were those who were sought out, whose products were bought out.

#### **A Plan to Destroy the Trust in Toyota is Hatched**

Therefore, there was a plan to create a situation to destroy the trust in these Asian manufacturers of automobiles. The entity Avaton is correct in his assumptions that technologies were used to control the vehicles. It is the same technology that is embedded in all new vehicles: North America, European, and Asian. There is the technology available now of course, to track *any* vehicle on the road or off. There is the technology now available to *stop* a vehicle in its tracks, but that same technology *can also accelerate the vehicle*, so that it is not under the control of the individual driving the vehicle. This is indeed what occurred. There was a random targeting of Toyota vehicles that were accelerated and the plan was to create a situation where the excess accidents started to be noticed and started to be of concern.

#### **Agents, Provocateurs Planted the Rumors**

At the same time, there was a concerted effort to bring up public awareness to this problem. There were those who were agents, provocateurs who planted the rumors, who pointed their fingers, and who cried out loudly that there was a problem. The unfortunate matter here is that the Toyota organization failed to see accurately what was occurring, and did not understand or perceive the nature of the threat, and therefore were seen not to be proactive in their efforts to resolve the problem. The truth was that they simply did not understand what was happening, for they knew their cars were safe and reliable and yet the many accidents due to uncontrolled acceleration were occurring. They did try to deal with the problem behind the scenes, and they were not perhaps forthcoming with what they were looking into, for they did not wish to create a scandal, yet their lack of attention did indeed produce the same result in the end anyway.

#### **Always Ask the Question: Who will Benefit the Most?**

This Awareness reminds those who see such things to always ask a question when such events start to occur. The question is: Who will benefit the most from this occurring? Who will benefit the most from this happening? If this question was raised when the reports started to come in as to the problem Toyota and later Honda were experiencing, if the question were asked, "Who would benefit the most?" one need only look to the North American manufacturers, who have suffered so in recent times. They are the ones who benefited the most, for many are now returning back to American built automobiles. This is also satisfying the new patriotic sense of loyalty and dedication to the United States that is also proliferating in the nation at this time, that is also coming out as a very strong measure of how to measure one's loyalty to one's own country.

#### **"Buy America!" It's Your Patriotic Duty!**

Thus, the theme "Buy America" very much relies on individuals supporting the American economy, and supporting American products. This becomes a secondary reason for returning back to GM, Chevrolet, Ford and the others. It is as much for this reason also that the attack against the foreign manufacturers, in this case the Asian manufacturers, was so successful. The random attacks on individuals made for a most perplexing problem that was not easily understood or dealt with. The reports that even once the repairs were made and a new piece was installed, a new regulator installed, that there was still the same problem, shows that there is something more occurring here than the technologies used by the auto manufacturers themselves, that there is a different technology that is being applied.

Individuals are not used to thinking in this way, of suspecting this to be so. But once the door is open, once the question is asked, "Who will benefit the most?", then many events can be re-examined or when the initial reports come out, can be seen in a different light. It is also to be remembered, that many of those who are in charge already have a designated plan for things, but they need an event to occur that will create a reaction that will call forth for a solution. The solution that is then provided is often the very same solution that those in power had in their plan in the first place.

#### **The Three Point System the Powers-That-Be Always Use: the World Trade Center and the Attack on Sept. 11 for Example**

This approach uses a three point system. The first point is creating a problem; the second is to bring it to the masses so they demand a solution. The third is to

provide the very solution that was already planned for. This occurred in the destruction of the World Trade Center buildings and the attack on the United States of America on September 11th. There was a certain direction the government and the Powers That Be wanted the nation to move. They created a problem, the problem being an attack on the sovereign nation of the United States. The people were coerced therefore into *demanding* a solution. The people were afraid that their security was being threatened and they demanded a solution. The solution that was provided was to create even tighter securities, and to go after the terrorists, to take the war to them and to invade a sovereign nation, followed by the invasion of a second sovereign nation. These were all explained as ways of satisfying the peoples' demand for action.

Thus, the problem was presented, the solution demanded, a solution provided that was in alignment to the plans of those in power in the first place. This is similar to the incident with Toyota and Honda. It was seen that there would be a need to assist the North American auto manufacturers. Therefore, a problem had to be created, the problem in this case being uncontrolled acceleration of the automobile. This caused a knee-jerk reaction in the public, "Save us! Protect us! Make it better!" So the Powers That Be have now introduced measures to control or solve the problem, but in fact, open the door to a much better market for the North American manufacturers, the solution of course being that which was the planned result in the first place.

Therefore, in relation to the situation Toyota is experiencing, this Awareness does say that there was and is much more involved. There are those nefarious actions by those who have power, who have control, and there is a planned result that those who are in charge wish to achieve. This Awareness further recommends that those who are open and understanding apply this understanding, this awareness *to all* situations and circumstances of this nature or of the nature where there is public attack, where there are events that occur that cause the knee-jerk reactions. Once one understands how those who are in charge think and how they operate, one will free oneself of simply being in reaction to what is occurring and will be able to see beyond that which has occurred. Finally, this Awareness does say that those who drive Toyotas and Hondas on the whole are safe, and that there is truly nothing deeply wrong with their vehicles, but there might be a concern that they become targets.

#### **Awareness Says Your Toyota is Safe to Drive!**

However, this Awareness says that the need to create more and more targets has already largely passed, and that the efforts of Toyota and Honda to solve the problems will introduce changes that for the time at least will create peace of mind, and a new situation. At the end, one will look at the market share available to the North American manufacturers and see that their situation has increased measurably to the situation they were in upon the collapse of the stock market. They will be selling *many more* North American cars versus the newly thought to be unreliable Asian cars, such as Toyota.

## **BUT IF IT STILL HAPPENS?**

#### **QUESTIONER:**

Question please. If in fact Toyota and Honda are safe, is there anything should a situation arise, that can

be done by the average person owning an Asian built vehicle? For instance, if they're in that situation of driving, braking and shutting the ignition off, would that have any benefit at all?

#### **Cosmic Awareness:**

These of course would be the recommended actions. The acceleration is meant to catch the driver unprepared, and this is where most accidents occur. Even though this is a frightening situation inducing panic, this Awareness does suggest that an individual in this situation try to stay in control, and try to remember that the turning off of the vehicle and putting it in neutral and applying the brakes are the only actions that they can do at that moment. This Awareness could then speak further on the topic that some who experience this have asked for this experience, but this Awareness does not wish to belittle those who have had an experience of this matter.

This Awareness will point out yet again that one of the results of focusing one's attention on this matter, and of becoming fearful and obsessed with the fact that their vehicle could exhibit such a problem, is that they could well create through their belief this possibility. This Awareness is not asking people to be naïve in denying there might be a problem, *It* simply asks them not to believe that they will experience this problem as their reality. This is seen to be a highly effective way of avoiding the experiencing of the acceleration problem that has visited Toyota of late. Is this clear?

#### **QUESTIONER:**

Yes it is, and the question was asked more for a backup plan if anyone should be actually in a position where this should happen. At least they know that putting the vehicle in neutral and braking would be very, very helpful.

#### **COSMIC AWARENESS:**

This is so. But this Awareness wishes it to be seen and understood here that the technologies available can take charge of the individual's vehicle even to the point that turning off the vehicle and putting it in neutral does not immediately change things, for the technology is such that a car can be kept running, and can be turned on or off as desired. Therefore, the action on the driver's part of simply turning off the vehicle may not be what is allowed through the technology that not only accelerates the car, but also disables it at the same time. That is why this Awareness also provided the backup understanding or explanation of *not to focus on this matter*. It is so much in public attention, and so exhibited on the television, that many have become absorbed by this issue and are of a belief that it is a true and real issue that could happen to them.

It is exactly such unconscious believing of that which is viewed on the television or spoken of in the back office that creates the kind of reality belief system that exists on the planet at this time in all other matters as well. It is one area that this Awareness is speaking on, but this of course applies to *all levels* of one's belief system. What one focuses on, one draws to them.

#### **QUESTIONER:**

Again, a person creates their own reality, is the bottom line. Is that correct?

#### **COSMIC AWARENESS:**

This is so. The major problem is that this is so unconscious, so misunderstood. This Awareness would even

say it is not even perceived in the first place. Ninety Nine percent of human beings go their merry way without ever thinking that they themselves may be affecting the reality they are experiencing through the beliefs they hold and focus on. The Toyota-Honda issue is but one point of fact in this matter.

This Awareness does not support it, but *It* must speak this -- if the individual does feel that owning a Toyota is so dangerous for them that they become uncomfortable and fearful getting into their vehicle each and every time, then perhaps a change of vehicle would be wise. This Awareness does point out that this only panders to that which is the purpose of those who have created this problem. But at the same time, this Awareness fully understands that a majority of people cannot simply turn off their obsessional thinking on such a matter. If it is too extreme and the individual feels they are safer in a North American automobile, then buy a North American automobile, for this will do much to alleviate the fear and angst that the individual carries. However, this Awareness would then add, "What is the individual to do when the North American cars are recalled for other problems that occur with their product?"

**QUESTIONER:**

Is a satellite or GPS system involved at all in this?

**Cosmic Awareness:**

Indeed this is so. This is the technology this Awareness was talking of that is now embedded in all automobiles. It is also embedded in TV screens, in computer monitors and other technologies and equipment.

## HEAD DIRECTION WHEN SLEEPING?

Carrying on, we have something from Larry Kell in Indiana. It concerns the poles, the magnetic North or South. He writes: "Last night I switched my head to the South and will keep doing it and see what happens. The confusion about how magnets are marked doesn't help. Is the South Pole really a magnetic South Pole, the same as the South Pole of the Earth or is it named South because it's a North Pole that will point South if free to rotate like a compass needle? The compass needle end that points North, has to be a South Pole to be attracted to that direction. One person commenting online was confused by that." His question: "What direction should our heads be pointing while sleeping?" Your observations please?

**Cosmic Awareness:**

There is indeed something to the theory of which direction one should be lying in when one sleeps. The North/South alignments are less desirable than East/West alignments, especially with having the placement of the head of the bed in the direction East. This would be a highly supportive spiritual direction in which to place the body during that time of sleep. However, this is not always a practical consideration, for the room that one might have one's bed in may not allow for an East/West alignment of the bed, and they are therefore forced into a South/North, or North/South alignment.

Generally speaking, a South alignment where the head of the bed is facing south will create a more emotional energy during the sleeping state. If an individual wishes to deal with emotional issues at a deeper level, then placing the headboard South would be the recommendation. North is a direction of the mind and there is

opportunity for mental functioning during the sleep state, when one has their bed aligned northwards. West, generally speaking, is the energy of the physical, the body and therefore there are certain energies available if an individual chooses to have the headboard facing west.

As a general understanding, any of these directions have their advantage and/or disadvantage. It is not seen that one is much worse than the other. It is simply seen that there are different energies available during the sleep state to those who align themselves East, North, West or South. Generally speaking, those who are seeking a greater spiritual understanding and alignment, to have the headboard pointing eastward would be that which is most beneficial.

This Awareness asks that the part of the question regarding the South Pole be repeated. This Awareness was not entirely clear as to what the entity was asking.

**QUESTIONER:**

The question was: Is the South Pole *really* a magnetic South Pole, the same as the South Pole of the Earth or is it named South because it's a North Pole that will point South if free to rotate like a compass needle?

## THE COMING POLE SHIFT

This is the confusion. This Awareness suggests that the magnetic South Pole is *not the same* as the geographical South Pole, and that the poles are in motion and in movement. It is seen that one of the events that is ahead is the shifting of the poles, the reversal of the magnetic poles, and thus that which is now called the South Pole will flip over to the North and the North to the South. Unfortunately, this is not in a true alignment to that which is the geographical South Pole. Therefore, the new South Pole that was once formerly the North will not wind up exactly in that area that is called the South Pole, but off from that, as will the North be off from that. This is seen as part of the shifting energies that this Awareness associates with that which is the process of Ascension, and the energies that are shifting, moving, and accelerating as a result of the ascension process.

**QUESTIONER:**

I see, but one will still be South and the other one North. In other words, at the top of the Earth and at the bottom of the Earth, would it not?

**Cosmic Awareness:**

This is so, but this Awareness would suggest this is completely relative. If one is standing in the southern continent of Australia, one would feel that they are at the top of the world, not at the bottom of the world. One standing on the equator in Africa would also feel that they are at the top of the world, not at the middle of the world. It is all relevant. If the planet were seen from 1000 miles away and this being at the point of the equator, then that concept of North and South makes sense. If one were to see the planet 1000 miles away in alignment with that which is the south pole of the planet, North/South no longer makes sense, for seeing it from this perspective might suggest that a region in Africa is the North Pole, and a region in the Pacific is the South Pole.

This is a concept that is fairly rigid in human thinking and yet involves a static way of thinking, and does not allow flexibility. It is more relevant to understand the magnetic alignment of the planet as opposed to the

geographical, geophysical alignment of North and South.

**QUESTIONER:**

Ok. So there would also then be a like change in the weather? In other words, where the South was very warm, when it flipped, it would be actually very cold? Is that relative or is it...

**Cosmic Awareness:**

This could be so. There will be many changes due to the shifting of the poles, including weather patterns. It must be remembered that weather patterns themselves are very contingent on mass consciousness and thought, and are also very contingent on the angle of the sun to the planet versus the actual magnetic poles. If the actual planet itself moves and shifts and tumbles, and if the axis of the planet relative to the sun itself shifts, this will contribute more to shifting weather patterns than the actual shifting of the magnetic poles.

## WHAT THE RUSSIAN ALMAZ-T RADAR PICKED UP CIRCLING EARTH

Ok, carrying on, we have one from DK in Nevada. He writes about the Almaz-T radar system. "In 1987 Russian military officers and scientists went public with what the Almaz-T radar system picked up. I saw them on the local news for about a week. They said as soon as they turned on the system the display revealed the presence of over 50,000 objects in a tight formation circling the earth. The swarm of objects in an orderly pattern meant only one thing to me. They were spy satellites for a total surveillance program. You could tell they were shocked and very concerned. (He's referring to the Russian military officers and scientists) This was during the breakup of the Soviet Union and the project was carried out under a civilian program. They were careful to only refer to them as objects. I notice there is no mention of this important finding now. They defunded the program in 1992." His questions: "Are these objects ET spacecraft? Are they spy satellites? What are they? And also, are these objects still there and why? And did they find what they were looking for?" Your observations please?

**Cosmic Awareness:**

This Awareness suggests that these objects were *all of the above*. In other words, this Awareness is suggesting that there are extraterrestrial ships that were seen with this radar system, but that there were also the many spy satellites and legitimate satellites: weather satellites, communications satellites, etc. that were and are in orbit. The Russians pretended amazement at the amount of satellites or objects in the sky, but their own satellites were also part of those picked up on. The defunding of this project was because they did not wish their own backyard to be exposed. They wished not to be seen as one of the proliferators of the skies above with their own satellites, some of which are for those nefarious reasons this Awareness has previously discussed.

There are many secret projects that involve the launching of satellites into orbit around the planet, so that those covert operations could occur that this Awareness spoke of when *It* talked about the Toyota crisis and problem and the monitoring of the citizenry of the planet, not only in the United States, but also over the entire planet. There are other top-secret satellites that have purposes that even this Awareness cannot

discuss openly at this time, but that the presence of these satellites was becoming too much in the public eye, and this is the reason why reporting on this matter ceased.

There is no wish by those in power and control to have it understood that there are so many satellites in orbit, so many means by which the public can be controlled and manipulated and spied on. It is still of that way of thinking that an ignorant populace is one that is much easier to control than one that has too much awareness and understanding and knowledge about such matters.

**QUESTIONER:**

Are these objects still there and why? Did they find what they were looking for? And from your discussion it gives the impression that they weren't looking for anything, they just want to have something there to control the people. Is that correct?

**COSMIC AWARENESS:**

This Awareness would state it rather that these are the means by which their plans are being brought into being, and that those objects are indeed still in the skies above. It is even seen that there are more there now than in the early 90s. The way by which those who have power now are able to control or communicate is very technologically based, and therefore the need for such satellites is a very profound one. It must be understood that all satellites are not placed in orbit through the orthodox method of launching them into orbit.

**Earth-Based UFOs are Working with the Reptilians**

There is that technology available to those who have power that involves the UFO ships that are not extraterrestrial, but rather earth-based, that are in conjunction with the governments and the reptilian Orions. The United States for example, has certain vessels that are extraterrestrial in design, that have taken many of these satellites up into the skies above and launched them into orbit. As this Awareness has spoken, not all are launched by the old traditional rocket into orbit.

## THAT BRIGHT SPOT ON PLANET MERCURY: WHAT IS IT?

Ok, we have Larry Kell in Indiana. He writes about the bright spot on the planet Mercury. He writes: "I saw a headline about a mysterious bright spot on Mercury in October, 2009. You can find photos online with a search. What is causing this bright spot and the halo around it?" Your comments please?

**Cosmic Awareness:**

It is seen that this could be called a thermonuclear event of a natural order. There is an extreme release of energy in that region, and this is creating a brighter spot to be seen against the surface. It is a sustained action, as if a massive volcano was continually erupting. This is not to be understood as a volcano erupting on the surface of Mercury, but a large area where there is an eruption occurring. This is not a natural event, in the sense that it occurred naturally. It is a triggered event. There is seen to be the use of a certain technology, a polarized or pulse weapon that is being aimed at Mercury to create this event. The halo is simply seen as that which is the cloud around the area of eruption that creates that which could be called a halo effect.

**QUESTIONER:**

Why would anyone want to do that? ...

**COSMIC AWARENESS:**

This Awareness would ask: Why would anyone wish ever to create weapons of mass destruction?

**QUESTIONER:**

Exactly. All right, thank you. Is there anything else on this one?

**Cosmic Awareness:**

This Awareness feels complete on this matter. This Awareness will, however, add this last point. The triggering of the event may have been unnatural, but the continual eruption or the sustaining of this eruption is due to certain gases and geophysical reasons and is natural in nature, even if it was triggered unnaturally.

## GALACTIC FEDERATION ALIENS

(And Other Questions from Vera)

**QUESTION:**

These questions are from VK. The first one considers the Galactic Federation. She writes: "After the Galactic Federation aliens complete their missions, will they remain on earth B or ascend to earth A, or return to their original home in the higher dimensions from where they came?"

**Cosmic Awareness:**

It is first of all seen by this Awareness that those who inhabit the energetic manifestation of that which will be planet B in its multiple versions, will be a planet whose intent and desire is to separate even further from spiritual connection. Because the intent is to have an even deeper physical experience devoid of any spiritual nature, the need for those extraterrestrial beings that are of a higher spiritual nature will be null and void. In other words, those of the Orion reptilian nature who wish to have even stronger control and separation will experience this reality. Those of the Galactic Federation will have no need or desire to experience this, thus they will not partake in those versions of planet B.

## WHERE IS HOME OF THE GALACTIC FEDERATION, ETC?

**QUESTION:**

Where exactly is the home of the Galactic Federation? It's recognized there are several other bodies onboard their vessel. Would they return to their place of origin or would they carry on to traverse the universe?

**COSMIC AWARENESS:**

This is seen as arbitrary in nature, for it is the same as asking a citizen of the planet Earth where their home is. It may be that they come from the continent of Africa, but even there it would be a specific area of Africa they would call home, or Europe or Asia, North America, South America, wherever this might be. They too may one day return home back to their country of origin, but they may choose again to start traveling, especially in times ahead when their definition of home becomes expanded to the whole planet. It is so with those of the Galactic Federation.

Someone from the Pleiadean system may understand that the planets of the Pleiadean system are where they originate from and that they have every right and freedom to return back home, but they are also aware of

their greater nature, their universal nature, and they may choose to traverse the universe and travel to other regions. Some may enjoy further the time on earth, for they have developed a great affinity with the planet and may thus decide to stay on the planet, whether in human form, having elected to be born into human reality or even in their natural form, given the body they have chosen at this time.

Thus, if they chose to be a Pleiadean or an Arcturian or a Sirian, they would occupy those bodies of those races, those planets. If they chose to be human and were born into the planet Earth, they may call Earth their home, for it is there that they wish to reside after that which is the Ascension. This is an arbitrary question and the answer in itself is arbitrary. It is simply a matter of choice of each and every conscious individual as to what they would wish to experience, where and when.

**QUESTION:**

With the various representatives on board the vessels, where do they dock for supplies? Do they not have to dock somewhere to get food or water or anything like that or is their system aligned differently to that of humans?

**Cosmic Awareness:**

It is a much different system. It is not that these beings go without food and water. It is that they have developed their own technologies that can reassemble atoms and molecules, thus they can create that which is needed from diverse elements. They can create the food that is needed and the water that is needed. They do not necessarily have to dock anywhere to receive the items that they ingest or consume. They can also of course take on board supplies from various places they visit. They can transport to their ships supplies from Earth, but this is only seen as one way that they can provide for themselves if need be. The other, of course, is that replication of the materials needed, either for their ships or for their personal use or personal consumption.

## GF ALIENS COMPARED TO HUMANS

(Thank you.) Also, is our atmosphere friendly to them and are we as humans compatible to theirs?

**Cosmic Awareness:**

Basically speaking, one thing that differentiates the humanoid Galactic Federation types is that they *all have similar biological systems*. Thus it is that breathing oxygen is part of the system or breathing the air on the planet. It is seen that some of the Galactic Federation types come from planets that may have slightly higher oxygen levels perhaps, but generally speaking, all the humanoid types of the Galactic Federation are capable of breathing the air on planet Earth. Thus it is that an earthling could indeed go aboard one of the ships and be able to breathe the air. Again, there are slight variations. There are even slight variations in gravitational forces. Thus, some come from bigger planets, where they have a different gravitational exertion. The lighter planets may make it easier for them to move, but generally speaking, there is a narrow band of tolerance to such things as breath and planetary gravitational forces.

**Reptilians Have a Much Different Physiological Makeup**

It is seen, for example, that a being from Arcturus would not need to wear a spacesuit if they are visiting on the planet, but would indeed need to wear one if they were on the surface of the moon. Reptilians have a

much different physiological makeup and different needs. Theirs would be a different consumption of air and biological needs that they have. This Awareness is losing the energy on this question, and *It* asks to please move on.

## LIFE AND DEATH OF ORIONS

(Thank you). How do the Orions live and how are their bodies disposed of?

### Cosmic Awareness:

It is seen that generally speaking the Orions live a longer period than those on planet Earth, but this is more due to their understanding of their own nature and they take more care of themselves, in a manner of speaking. They are less likely to take in toxins or use toxic metals in their medicines or breathe polluted energies and yet there is a difference in their physiological makeup as well, so what is toxic to a human may not be as highly toxic to an Orion. It is all relative. As for the means by which their bodies are disposed of, they are a practical people. They practice a form of cremation that submits the body to an energy beam that vaporizes the body. There is not seen to be an overindulgence in grief or grieving once the body is left, for they understand how to shift their consciousness into other bodies.

### Orions can Switch their Consciousness to other Bodies

Therefore, even though this Awareness is speaking of the physiological length of time of survival for an Orion, *It* is not speaking necessarily of the age of their conscious awareness and this is because it can be shifted from one body to another without having to go back into that spiritual realm, where they can review the lives experienced and plan for other lifetimes. They can quite literally transfer from one body to another as needed.

## ORION POPULATION VS HUMANS?

(Thank you). The next question: Are there more Orion aliens than humans population-wise at this time and when they take over will there be more aliens than humans on earth B?

### Cosmic Awareness:

At this time it is not seen that there are more Orions. Humans *far exceed* those who are Orion or reptilian or any of the others that belong to the Orion-Reptilian faction. Of course it is also seen that with the shift in human populace that will occur through the Ascension process, that many of those who are human beings may well leave the planet Earth, may well die and return back into the spiritual fabric of their soul. This will seriously reduce the levels of humans on the planet and after that there may well be an alteration of the ratio of extraterrestrial Orion connected beings to the human populace.

### Orion Plan is to Greatly Reduce Earth Population

It is seen that part of the plan is to reduce the human population, so those who are of the Orion faction will have greater access to the planet and what is available. It is also seen that the times ahead will be difficult for many of the humans, and they may choose to leave the planet altogether even after the Ascension process is complete. It is also to be remembered that part of the plan of the Orions is to have a slave populace to provide for them, so that it is always seen that there will be humans available to serve the Orion masters, and that it would not be in the Orions' favor to allow to allow the slave populace to exceed theirs, because they could at

that time rebel and revolt against their masters. Therefore, part of the plan of the future is to create a situation where the Orions are the superior beings, the Orion reptilians and those of the Orion Empire, to those who are the natural inhabitants of that which was planet Earth.

### QUESTION:

(Ok). Are the reptilians comfortable with the atmosphere on Earth?

### Cosmic Awareness:

They are not entirely comfortable. Their preference would be to have desert-like hot surfaces and a planet that was of this nature.

## DO THE ORIONS HAVE SOULS?

(Ok). The next question: Do the Orions have souls or are they a different type of creation without a soul?

### Cosmic Awareness:

All creatures, all beings, and all entities have a connection to spirit. For some more than others, this is a more refined connection that could be called the soul. In this matter this Awareness would say therefore, that the Orions indeed do have a soul, as do the reptilians. Their soul purposes, their soul reasons for existence and experiencing of a unique reality are indeed individual to the Orions, to the reptilians, and to the Greys, than that which humans experience. Ultimately *all* will return back into the fabric of the soul, for the fabric of the soul is the fabric of God and all are part of that which is the God essence, that which is God Almighty, Creator and source of all things, Orions included.

Orions may *seemingly* be separated from Spirit, and may *seemingly* be devoid of the human qualities that define compassion and a nurturing, loving personality, but ultimately it is not their reason to experience this, it is to experience that which is division or *seeming* division from spirit, and that is why it seems that they are so opposite to humans and so devoid of human characteristics, human caring, sympathy, empathy or compassion. This does not mean that they are devoid of a soul.

## REASONS TO NOT OBJECT ORIONS

(I see. Thank you). Her next question: Is there any reason why humans remaining on earth will not be able to object to Orion control? Will they simply have a mindset, as so many do today, that they have no power or ability to protect themselves, thus allowing the Orions to do as they wish?

### Cosmic Awareness:

First, this Awareness would emphasize that the answers being given at this time about the Orions and that which might happen after the Ascension is complete, is but one level of *possible reality* that some may experience through the choices that their soul makes as to what experiences they wish to have next. Therefore, those who wish to have such an experience will come with the mindset that capitulates to the Orions, that forfeits their ability to stand up for themselves, and to fight against these beings. They have come into that reality for the purpose of *having such an experience*, and it would be then wrong to assume that all must be of this nature.

This is simply one perception of a reality that some will wish to experience. Many will not wish to experi-

ence it, and therefore they may not at all come into a reality where they are slaves to the Orions. They may indeed choose, even if this is in the stream of the consciousness that will define planet B, an experience where they are simply much more materialistically inclined, to the point that technology becomes their master and that the Orions may be the masters behind technology. Therefore, the control may come via a much different means. It may not be an outright enslavement of the populace, it may be enslaving the populace through their much greater reliance and dependence on technology to be their future, to govern their lives, and those who control technology will have that which is the power.

This is somewhat similar to where the planet lies at this time. It is simply seen that it will be an even more extreme version of the present reality that is subject to change in the near future. Some will *not* wish to have the change, and will continue on to experience a higher level of technological development and technological reliance. Many will see the future as a technological future, and may move forward in their stream of consciousness to experience this reality. Again, this is *but one possible reality* that those who wish it *might* experience, and may experience.

## ANY KARMA IF HUMANS RESIST?

(Yes, that is understood. Thank you.) The last question here is: If humans attempted to destroy the aliens in self-defense, that is, preventing themselves from being used as slaves etc., would it be considered murder, subjecting humans to negative karma?

### Cosmic Awareness:

This is indeed a fascinating conjecture. This Awareness would say that if the belief system around murder were such that it defines all human life, or even extraterrestrial life as being sacred, then the taking of an Orion's life would indeed be a karmic event, for it would be the taking of a sacred life or the energy of a being that is considered sacred. If those beings were defined and labeled as nonhumans, not of a sacred nature, of a barbaric nature, an animalistic nature, as the reptilians might well be defined, then there is that process of human thought and consciousness that allows for the taking of such life forms.

### The Film "Starship Troopers" where Aliens are Insects

It is to be remembered that it is very subject to that thought process that is held by the masses as a definition of what constitutes human life or extraterrestrial. It is a very fascinating question, as this Awareness has said, that has many degrees of separation to it, and many degrees of selective interpretation, this Awareness might add. There is seen a popular film from the author Robert Heinlein, the film being *Starship Troopers*, and in this highly fanciful film Earth is attacked by bugs, by insects who are obviously insectoids, and there is no similarity at all to a humanoid body or a human conscious way of thinking. These bugs are considered nonhuman and alien, a threat to human life, and there is no problem at all to blast them, to nuke them, to destroy them by those starship troopers.

This, while a fantastical film, is the example this Awareness is wishing to present here. If the Orions are viewed in this manner: that they are not human, that they pose a threat to humanity, and that the only way of protecting humanity is to destroy the Orions, then the

engagement with the Orions would be the same as that in the movie *Starship Troopers*, that humans would seek to destroy the Orions, that humans would not consider it as a negative karma to destroy a threat to their lives, their families, their home and their planet. This is simply a type of collective thinking that already exists on the planet that is held by humans.

Humans have an amazing ability to define those who are considered to be enemies, those who are considered to be a threat to society. Once such are labeled, there is seemingly no karma for going to war to destroy one's enemies, or in committing capital punishment against those criminals of society that are deemed as dangerous. This type of thinking would extend itself to that which would be a consideration of the Orions as an enemy, as nonhumans, as a threat and therefore, *those who wish to experience such realities* where there is a war, or fight against the Orions, where the Orions must be destroyed and killed, would have no problem whatsoever defining their actions as self-defense and completely justified. Again, this Awareness suggests this is *but one possible reality* that some may wish to experience. It is certainly by no means the guaranteed reality that all will experience. To think of it in this manner would be erroneous. This Awareness could not support such thinking, and does not support such thinking.

## VERA K LIMITED IN UNDERSTANDING

### QUESTIONER:

Thank you. Is there any additional information on the Orion topic?

### Cosmic Awareness:

Strictly speaking, the questions posed by VK are *limited in the understanding* of that which this Awareness has continually tried to express: that Ascension will be an *expansion of realities* versus a constriction of realities. By limited, this Awareness is not trying to be insulting, *It is simply expressing that this is a way of thinking that many individuals seek and believe to be so.* In other words, most try to limit options, and are not satisfied to expand options, or to see the multiplicity of choice that lies ahead. It is not wrong, it is not right; it is simply a way of thinking, a way of focusing, and a way of believing. For this, this Awareness thanks the entity VK for presenting such focused questions as to exactly how it should look, might look, and will look upon that process of Ascension being completed. This Awareness will always however, inject that this is simply *one level of reality that might be experienced* by some who choose to focus on such a future reality.

### CLOSING MESSAGE :

### DO NOT ALWAYS GO INTO THE DARK NIGHT FEARING THE DARKNESS

This Awareness wishes it to simply be understood that the world and the universe is indeed a most amazing place, a place of multiple, even infinitesimal and infinite possibilities that have not even begun to be understood. The times ahead not only are challenging, but are also amazing in the possibilities that can be manifested and experienced. *Do not* always go into the dark night fearing the darkness that lies all around. Remember: that which surrounds one is what one calls into their lives, and that it is now essential to realize that the calling in of fearful events and futures is simply the honoring of each and every individual's right to create the universe that they experience. If they begin to understand this concept, this reality, they may well begin to shift their reality and that which they experience as reality.

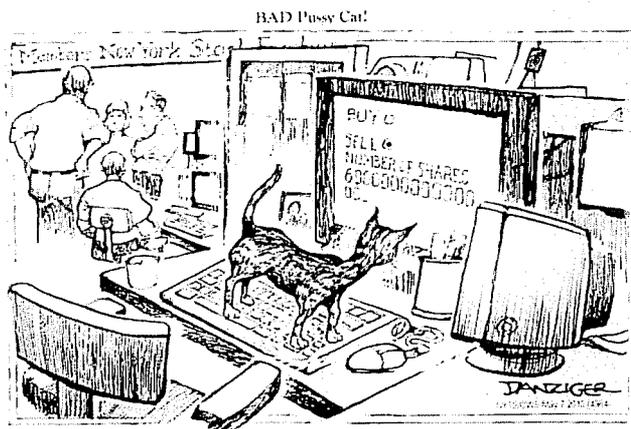

Reality is not set; it is simply that which is created through the energies drawn into one's life through their beliefs and through their expectations. It is now high time to revisit this belief system and to reevaluate and to redefine it, so that one does not simply call into life all that is projected by others as truth and reality, but rather calls a reality that is the result of one's own beliefs, one's own focus, that is enlightened and aligned with Spirit. The trust and belief in Spirit will always guide one to the highest experiencing of life and not to the lowest level. This Awareness is complete.

Thank you. The Law of Gratitude is given)

Due to increasing eye problems the Interpreter is now doing all Cosmic Awareness Personal Readings by phone only for a limited time. He pays for all phone time and you receive a tape or CD of the entire session. No emails, call him direct to make an appointment at your convenience. Call Will Berlinghof at (403) 286-5248

## THAT POLISH PLANE CRASH

(What the Media Failed to Report)

### QUESTION:

There was recently a Polish plane crash where it appeared the majority of the Polish government was on board. Were there sinister reasons or did this just happen to be as an accident? Comment please?

### Cosmic Awareness:

It is seen that there were various factors behind this crash. Ultimately there was an element of human failure that caused the final crash, but it is also seen that there were oppositional forces in the Polish government that held strong sentiments against those of the Elite, those who have power, those who tried to control the Polish government. The president who was killed, as well as several of his advisers, were *against* certain power groups that were trying to infiltrate into the country of Poland. In some ways Poland is a small player on the world stage and yet it is still a noteworthy nation. The president has for many years prevented the intrusion into his country by those power players and power brokers who are of the New World Order variety.

This does not mean that the president himself was completely pure in his efforts. It is however, that he did have an understanding of the power structure of the world and of the interests in Poland by those who would have pulled the country deeper into that webbing of deceit and corruption. His death was not entirely accidental, although in the end, as this Awareness said, it could have been avoided. There was a miscommunication between the pilot and the president as to how severe the actual weather was in the region where they were landing, and the pilot did not wish to create a situation or problem when the president wished to land in the Georgia state to attend a ceremony honoring the assassination and mass death of many Polish victims in previous times.

Many high Polish artists and dignitaries were to attend this ceremony, the highest of course being the entourage on the plane, and the Polish president often insisted that attempts would be made to land the plane when possible. The pilot is seen to have been tampered with. It is seen that there is a degree of mind control that occurred. He did not convey to the president how serious the situation was and instead crashed the plane. This cannot of course be proven, for this is a human error and in the end it is seen that the cause of the accident will be declared to be human error.

### They Get their Target with "Collateral Damage"

This Awareness however, is seeing that it was imperative for certain factions who are seeking greater control in the country of Poland and over the government of Poland to eliminate one of their most strong opponents and those who would advise him. Others, such as the wife of the Polish president and others on the flight were seen simply as collateral damage, as is often the case when an airplane or aircraft is crashed by those who have something to gain in the assassination of one individual on board the aircraft. It is seen that there were several, in particular the Polish president himself, who were deemed as targets to be disposed of and the collateral damage was considered well within the realms of tolerance of accepted collateral damage. This is a

thinking that most definitely marks those who would assassinate and kill oppositional forces or opponents, and this is not only so of this crash in Russia, Georgia, but also in many of the airplane crashes, both large commercial planes and smaller planes where individuals who are targets of those who have power. Those who would wish to eliminate such individuals, do indeed press forward, and do indeed take such action.

### Many in Opposition have Died in Plane Crashes

The fact that many innocents would be killed at the same time is *not* part of their emotional content that would feel sympathy or compassion for those other victims of this "hit" upon an individual. It is a very favorite way of disposing political opponents in the United States of America, where several key political personages such as John Kennedy Jr. and Senator or Congressman Swann several years ago from Minnesota met their untimely deaths in a small aircraft. That there were others, the family, the wife and friend involved, who were also killed, as this Awareness said, is inconsequential to those who would use mass events such as an airplane crash as a way to assassinate a single individual.

### Few Would Question that this is an Assassination:

#### (3000 Killed at the World Trade Center an Example)

Their reasoning is more that there would be very few who would question this as an assassination, for not one but several were killed. In this case 92 individuals died in one plane crash and it is normally beyond the comprehension of most individuals that those who would choose to use such means would actually do such a thing. It is simply beyond belief for most individuals and yet this Awareness points out that over 3000 individuals were killed in the bombing of the world trade buildings in order that a few be killed off, that evidence be hidden and that the course of the nation then be manipulated and directed in a direction that previously would not have been acceptable.

Those who hold power, who see the masses as simple victims to their actions and have no remorse or sympathy for those who die in such a manner, are indeed the *very beings* that have charge of the planet at this time. In their lack of compassion and human sympathy they are prepared to do *many acts of atrocity* in order that circumstances are favorable to their chosen course of action. Such is the case with this latest plane crash and the death of the Polish president, his wife and several of his government and military. This Awareness is complete.

## WHAT NOW FOR THE POLISH PEOPLE?

**Questioner:** (Thank you) Just a couple of questions please. Will the Polish peoples then totally accept those assuming power or will they resist in some way?

### COSMIC AWARENESS:

Again, it is to be remembered that most manipulation of power lies behind the scenes. While the Polish president and several of his advisers knew what was up, this does not mean that the Polish people know what is up. There was a clear message sent out in the crashing of the plane to those few that still know what the score was. What the plane crash also achieved was that those who were oppositional to these plans and to the intervention of those powers would seek to take control back. Their control was lost in Poland after the fall of commu-

nism with the popular uprising of Lech Walesa and fellows of the Polish resistance movement. It was from that time on that Poland became an independent nation, free to a large degree, not completely but to a large degree of the manipulation and power held over many other governments.

This has shifted now with the assassination of the Polish president and his advisers. It is seen that the power behind the power is reverting back to those who previously had power. This has been an ongoing process for several years now. The final hurdle was the president and those of his chosen cabinet and his advisers who still opposed those who had power. This obstacle has now been removed.

## THE PILOT OF THE PLANE

(More on the Murder of Princess Diana)

**Questioner:** I see. Thank you. One final question: Was the pilot informed ahead of time or was he reluctant to land the plane, trying three times, and the unfortunate fourth time due to fog? Was he aware of what was going on?

**COSMIC AWARENESS:**

He was not aware of what was going on in the context of the attempt to kill the president. It is seen however that he *did not stand up* to the president and insist that as the pilot he would not put the plane in danger. It is also seen that there is a form of *mind control* that caused him not to question his leader, his president. It is not seen that this man intentionally crashed the plane. It is seen that his power to object, his power to act independently of the order of the president was somehow compromised, and that he simply obeyed orders, whereby the situation was created of trying to land this aircraft in adverse weather conditions.

Had he not had this type of brainwashing, had he not been targeted this way, he may well have refused his president's order to land the plane, for he was indeed the man in charge, he was the pilot, and it was *his choice* to land or not to land. Because his rationalization process was impaired through compromised thinking, through this indoctrinational process, he did not stand up, *he did not assume responsibility*, and he did not take charge. He followed the instructions, both the instructions from the president as well as those embedded instructions where his will was bent to the will of the president and those in charge.

It is for this reason this Awareness explained previously that the cause of the aircraft will most likely be chalked up as due to human error, pilot error.

**QUESTIONER:**

When it really wasn't all of his fault.

**COSMIC AWARENESS:**

**The Princess Diana Assassination was Similar**

This is so. It is a subtler form of indoctrination that was used on this individual. This Awareness reminds all that in the famous case of Princess Diana, the chauffeur was *also* a subject of mind control and his ordering to drive erratically and at high speeds was that which was triggered before the accident and yet could never be proven. Instead, he was used as a scapegoat and the report went out that he was inebriated, and that this contributed to the deadly crash that killed Princess Diana. The truth is that he had also been under a form

of mind control, and at the time when this was triggered he could not be said to have been fully in control. It is similar to the pilot. Had he truly been in control he would have refused the request of the president to land the aircraft so that he and the others would not be delayed in their arrival to the ceremony. He would have taken charge, and he would have acted responsibly as a pilot who has the lives of many in his hands. This is what was impaired: his judgment, his ability to stand up, to say no, to take control of the situation. This was due to a form of mind washing, brainwashing that had occurred to this individual before the flight.

**QUESTIONER:**

(I see). So going back to Princess Diana then, it was not a case of alcohol at all then, it was mind control. Is that correct?

**COSMIC AWARENESS:**

Indeed this is so. This is simply a cover story. This Awareness states emphatically that Princess Diana was assassinated.

**QUESTIONER:**

That's too bad. She was a beautiful person.

**COSMIC AWARENESS:**

Her soul and spirit are still beautiful and she continues to live on.

## MORE ON THE FAILED TERRORIST PLOT TO BRING DOWN AN AIRLINER

**Question:**(Thank you). Carrying on, we have something, again still with politics, that Ted Helinski had sent to Avaton. He writes, "Something else just occurred to me regarding this failed "terrorist" plot to bring down an airliner at Christmas. Ok, so it might be part of a plot to bring down the Obama administration. If it was successful, we get Hillary and maybe even Pelosi. What is to be gained by that? There have been many stories recently that Israel is planning on going ahead with an attack on Iran. For instance, a story within the last few days says that Israel is planning on issuing every citizen a gas mask. It has long been thought that Iran's response to an attack would be to launch its own counterattack using biological weapons. Hillary and Pelosi have always been very strong backers of Israel and maybe even a secret deal was hatched that was essentially: we'll help you to get what you feel you were "cheated" out of, meaning the presidency and once you're in there we expect your complete loyalty to Israel." Do you have any comments on this please?

**Cosmic Awareness:**

This Awareness sees that this is erroneous. This was *not* a plot by Israel, the MOSSAD, or any conspiracy between Hillary Clinton and the speaker of the house, Nancy Pelosi. This is conjectural on the part of the entity Ted Helinski. He raises interesting points of the conspiratorial nature of the government, but in this matter the reason for the Christmas attack on the United States of America, the alleged attack, the underwear bomber, was not in order to overthrow Barack Obama but rather to put into play plans *already* drawn up that the government had in advance to this incident.

This Awareness has spoken this before, and *It* speaks this again: the Powers That Be, the Elite, the New World Order, *already* have the design for their actions and their

intent in place, and they know what they wish to accomplish and achieve. Much lies beyond the public affirmation of their actions. In other words, the public would not agree to their plans if they understood what those plans were truly all about. Therefore, they create situations with intent and design, and they work from the mindset: create the problem, have the people call for a solution to the problem, and then present the solution that in effect was *already the plan* in the first place.

In this case, this individual's actions aboard the plane were but a ruse to create that problem. Then due to mass publication and mass exposure of the underwear bomber and the threat of new bombs being brought in sewn into the lining of terrorists' underwear, new actions needed to be proposed, actions that would keep the public safe, for the public of course cried out that their safety be protected. At least this is how it was presented on the news reports and the public of course believed the news reports, believed the claims that were being made that there was a *new threat* to the safety of those flying and that there was the need to present a solution. The solution of course, was full body monitors that could scan an individual.

This Awareness has spoken of this matter in the past and *It* does not need to reiterate what was spoken in the past. *It* is simply trying to help the reader understand that often situations that come to public attention, such as this, are created in advance to manipulate the response of the masses towards doing something that those Powers That Be have already planned, and already have in store. In this case, the allegation that perhaps Clinton and the speaker of the house, Nancy Pelosi may indeed be in cohorts with the Israeli government, that their reason for their actions at this time do not seem to be related to giving the Israeli government more power or control or for Hillary Clinton to win the presidency. It is seen that it is still slated that she is to be the president at a time down the road, but not at this time. Therefore, this Awareness on this occasion does not see this concern of the entity Ted Helinski as a valid one.

It is important always to keep one's mind open and to see beyond the boundaries, but on this occasion this Awareness does not see that there is truth to the allegations.

## IS ISRAEL'S "PLANNED ATTACK" ON IRAN STILL IN MOTION?

**Question:** Thank you. Is there any comment concerning Israel's planned attack on Iran, or is it changed now to Yemen?

### **Cosmic Awareness:**

First of all, this Awareness asks all to remember and understand that Israel itself is but a player, as the United States is a player, as Canada is a player, as Great Britain is a player and as all other nations are players to the machinations and manipulations of those who have true power, those who truly run the game. They can use the piece known as Israel when it suits them, or they can use the piece known as Iran when it suits them. This is all part of the deception and manipulation of the mindset on the planet Earth as to what exists and who does what.

### **Who Benefits the Most From the Underwear Bomber?**

Every time that there is an accusation made, one must *always* look beyond that accusation. Every time an event occurs, one must look *beyond* that event. One

must always ask immediately the question: *Who will benefit the most from this event* and from this action? In the case of the underwear bomber and the fear and panic created from it, the answer is that those who are trying to create more and more rigid control over the masses, the ones who take more and more of the freedom away from the masses, are those who would benefit the most. Not the masses themselves, not the air travelers who are heavily inconvenienced and insulted through the full body monitoring of their person.

### **In the Case of Israel Attacking Iran: Who Benefits Most?**

In the case of Israel attacking Iran, again the question must be asked, "Who would benefit the most?" and in this case again it is those same people who have charge and dominion, for what would be created is a new explosive situation that has the potential of creating a world war. This would of course produce the further situation where those who have power would need to draw even tighter controls, declaring martial law and ensuring that the Israeli government is supported in their actions by those who are part of the plan, and who support their allies, even if those allies are unspoken allies. Does this explain the situation adequately?

### **QUESTIONER:**

Yes it does. Thank you.

### **Cosmic Awareness:**

Therefore, in conclusion this Awareness asks all who are viewing the television, reading the newspapers, and hearing of these events to always ask the question: "Who stands to benefit the most from this event and from this action?" It will obviously show itself when one is open and understanding that there are powers that go beyond those powers that are allegedly those who represent the people, and that these are but covers to those who have the true power. It is not those who are elected by the people who have power but rather those who stand hidden behind the government.

## OTHERS WHO SPREAD THE TRUTH AND HELP TO AWAKEN THE SLEEPING PUBLIC

**Question:** Ok, we carry on with the question from Robert Lau of Conroe, Texas. He writes, "Cliff High's *The Shape of Things to Come*" and his "Asymmetric Language Trend Analysis Interpretation and Predictions for 2009/2010" are very similar to what Awareness has said over the years. What do you think of him, his technique and its reliability for the future?" Your comments please?

### **COSMIC AWARENESS:**

This Awareness simply says that there are *many* who have tuned in to certain events that have happened, are happening and that will happen. Again, this Awareness will emphasize that the point of exposing these events is to create a situation of awareness in those who become open and awake to that which is being revealed. This allows an individual to see through the manipulations that are occurring so that they will not simply be led down the garden path, and so that they will be able to make decisions based on the comprehension and understanding of the truth behind the deception. It is imperative that humans wake up, not only to the manipulations that are occurring daily in the government on behalf of those who have power, but also that they wake

up in their personal lives, so that they can assume more and more power in their personal lives.

#### The H1N1 Virus Vaccination Program

A case in point is that which was the recent vaccination program against the H1N1 virus. Much information was put out by this Awareness and others as to the truth behind the virus. Many did indeed question and many did indeed refuse to be vaccinated. This would not have occurred had there not been those who voiced their concerns, who spoke out, and who presented alternative views and alternative opinions. This allowed many to wake up to the situation and thus the result was less than satisfactory to those in charge, who had assumed that at least two thirds of the populace would take the vaccination, and would allow themselves to be inoculated against that which was the H1N1 virus.

#### What Matters is that the Truth is Coming Out

Instead, only approximately 1/3 of the populace chose the inoculations, much, much less than that which was projected. It matters little who speaks out. It matters not to this Awareness whether the individual quoted is the one that drew the most attention and got the most response, or if it was this Awareness or another. What matters is that the truth is coming out, and that many are being presented alternative understandings, alternative truths to that which is the assumed truth, the defining truth held by so many.

It is simply the case that the majority of the populace is still very much asleep and that when information comes out of this variety, no matter from whom, this helps to awaken those who are asleep, and the more who awaken, the more who will take charge of their lives, and who will protest against that which is occurring. At this time, this Awareness has to say there are still a large amount who are asleep, but this Awareness is encouraged by that which recently occurred in the swine flu epidemic: the resistance to being vaccinated. This gives this Awareness great hope that more and more are starting to awaken now, and the process of expanding consciousness is starting to have greater effect.

## WILL THE H1N1 VIRUS RETURN?

**Questioner:** (Thank you). Question please. Speaking of the H1N1 inoculations -- will the Powers That Be try again to use this method or is there something similar being planned?

**COSMIC AWARENESS:**

Indeed, they are *still intent* on creating a situation where mass inoculation occurs. They may yet present the next strain of the H1N1. This will of course be presented as even deadlier than the preceding strain, and it may well also be accompanied by the infection of many by this new strain, so that it appears that their lies, their deceptions are truly the truth, scaring people into receiving the inoculation of the vaccination this time around. Be prepared for further actions by those in charge to inoculate masses against either the new strain of the H1N1 swine flu or a new variation on the theme.

**QUESTIONER:**

They never give up, do they?

**COSMIC AWARENESS:**

Theirs is not a character that allows them to desist. They indeed never give up.

This Awareness would simply add to this that those who are in opposition, those who learn the truth, those who have the understanding of what is at play here, must adopt a similar attitude, and they too must never give up, never give in. This Awareness feels complete.

## IS THE BLUE BEAM PROJECT WITH THE 'SECOND COMING' AN OPTION?

**Question:** (Thank you). His other question, he writes: "Is the "Blue Beam Project" which you have mentioned, with an emulated "second coming", a fake alien invasion and the Powers That Be using ELF electronic waves for telepathic messages or artificial talk to humans, also fitting into his predictions? Is Blue Beam still an option?" And he says thank you. Your thoughts, please?

**COSMIC AWARENESS:**

Indeed, this is still seen as an option, and an *ongoing project*. It is not seen that there is simply one plan of action, or one proposed event, but indeed a *multitude of events*, a multitude of plans, *all* designed to create total dominance, and total control. Those who have power also recognize that their time is limited. They too are aware of that which is the Ascension process and it is in their best interest, as they see it, to continue their actions, to carry the majority of those with them into a new plane of existence, a new experiment into physicality and the separation from Spirit, so that they are in some ways seen to be the major agents to create this type of reality and situation.

Those who have power would see themselves as remaining in power, but even more absolutely than is now the case. It is seen that they feel that they will gain through this and will try as hard as they can to make this so, so that when that option opens to them, they are still in the driver's seat. Those who are being driven have no understanding or awareness of what is happening or why it is happening. Therefore, the attempts of those in charge, the Powers That Be, the Elite, are that which will always be propelled forward to that which is seen by them as the most favorable results, that being *total domination*, total control, total charge.

## IS A ONE-WORLD RELIGION COMING?

(The Maitreya, Blue Beam, ELF Scenario is Still Coming)

**QUESTION:**

(Thank you). Along the same line we have another question on this topic. This one is from Jan in Holland. He writes, "The globalists are working towards a One World government as we know, One World Bank, Army, a centralized World Health organization and other departments. When I studied your Maitreya article I realized that what is still missing is to bring all of the religions under one umbrella. This all connects to the Blue Beam project. As far as I understand, all of the different religions will be able to hear at the same time in their own language the message of the "savior", of Maitreya." That's one part and then there's another part too. Should I carry on?

**COSMIC AWARENESS:**

This Awareness will first state that this individual is correct. This is seen as the plan. This is why that being,

Maitreya would be proclaimed as the One Lord and Savior, the One Messiah, for he will be seen to transcend all boundaries and barriers, cross all religious beliefs and tie all together in his presentation of himself as the One Savior. This of course, is deception at a high level. It will be through the Blue Beam technology, the ELF waves, and the technology that is available, that this impression will be created and many will interpret it as the arrival of the Messiah, the One Savior for the planet.

Many are so desperate for this to occur at this time that they will gladly believe that this being who presents himself, who can communicate across all language barriers, can step literally into the minds and be heard telepathically, who will do miracles, who will be amazing, can be anything but the Messiah, and that he must be the Messiah. It is seen that this is how it will pass.

#### **This Plan Will Work only for those who Buy the Scenario**

While it is seen that this is *the plan*, again this Awareness declares that this plan can only work on those who unquestionably buy into the scenario, and who do not at all question the validity of what is being presented to them. This is a plan that is meant to tie up the minds and the hearts of those who already are asleep, those who do not question, and those who do not look deep into that which is presented but simply accept that which is being presented.

There is another reason behind this deception, that reason being that it is an *alternate way* of keeping the masses down. There are many plans, as this Awareness has spoken, many ways by which this will be accomplished. Economic collapse is one of those ways. Battles and wars are *another way* to keep the masses down, to keep them preoccupied. The use of the messiah Lord Maitreya is simply seen as yet another deception to a world reeling from confusion and deception. The people are seen to become more and more disorientated in their lives, confused with the state of affairs as the events occur, such as the collapse of the economic markets. As world violence increases, as wars and aggression are on the rise, many will seek a new Savior, someone who can provide hope, who can show them the way forward.

That is why the plan is also in the works to provide *exactly* such a Savior, to provide such a being that will appear and present himself as the great hope. When this occurs those who have lost their way, those who are living in fear and dejection will easily follow this man, this Messiah, this Savior, for he will present to many a new hope, and a new path to follow. President Obama did a very similar thing in his run up to being elected the president of the United States of America -- he provided the American people with new hope, and a new vision of what could be.

Many Americans were completely fed up with the political leadership that had preceded him, many were without hope, and many were lost. President Obama, then the candidate for presidency, provided new hope, a new vision of what could be. This is a very powerful factor to present to those who are without hope, those who are lost, and those who are in need. If a Messiah, be it Maitreya or any other individual being presented as the Messiah is presented to a people who are without hope, a people who are hopeless -- that Messiah will be swept to power in a very quick manner indeed.

## **THAT NANOCHIP IN H1N1 VACCINES**

### **Questioner:**

Jan carries on about the H1N1 agenda and the push to get people vaccinated. More and more information is coming in that the vaccinations contain a nanochip (as also mentioned by CA in the audio file). My question is if there is a relationship between the vaccination agenda, the nanochip and the Blue Beam project: the nanochip as a tool to make the operation technically successful? Is this a fact?

### **COSMIC AWARENESS:**

This Awareness sees that this is valid. The reception of the Blue Beam technology is much more effective when the chip is in place, the chip that will be able to be used to control the populace. This Awareness has already spoken that this is the *true purpose* behind the nanotechnology. When and if the world situation becomes one of rebellion and upheaval of the masses turning against those in power, those who would be embedded with the nanochip would be easily controlled. It is even beyond control -- they then can be used to *fight* those who are in opposition.

The Blue Beam project, the Maitreya project, would also be under this same control and the presentation of a Messiah to those who are chipped would make it a given that those who are chipped would truly respond favorably to the new Messiah. It is for this reason that it was anticipated that many would receive the chip and then concurrently with that, be open to receiving the Messiah as well. It must be understood that the plans and machinations of those in power are very extensive indeed. It is not simply one plan or path that they are pursuing, but a *multitude* of paths, a multitude of plans, *all with the same goal in mind*, that being to bring under control completely and totally 90% of the world's population.

Those who would object are those who could easily be eliminated. Indeed, even those who are chipped, those who fall under the control and sway without objecting could be eliminated if there is a need to eliminate large portions of the world's population. This Awareness again wishes to remind you all that this is simply *one scenario*, one way to experience the reality that is available to those who choose to energize this particular scenario. This Awareness can speak of it easily, for *It* sees it as but one way. *It* could as easily speak of many other possible scenarios and this Awareness puts out the challenge now for the readers to send to this Awareness new questions of new realities they themselves may have seen, that differ from the prescribed realities that so many have been presented, and that so many are energizing.

### **Cosmic Awareness Challenges the Readership**

The object here is to create one's own reality, free of the deceptions, free of the control, free of the manipulation of those who are in charge at this time, who continually present the world with alternative scenarios of control and domination. This challenge is issued by this Awareness to all who read this: *to create their own new reality* and present this Awareness with questions in regard to alternative realities that they are seeing, positive realities that they would wish to create and experience.

## THE TV SERIES "V"

(Are We All Being "Conditioned" to the Arrival?)

### QUESTIONER:

(Thank you) Can I just go back a step here? The preceding discussion on the Blue Beam project... it's very similar to a TV program "V", where the populace was being manipulated on the program and in the plot. Are there any observations concerning these similarities? Is humankind being conditioned to this possibility?

### COSMIC AWARENESS:

This is indeed one of the scenarios. Humankind *is* being conditioned to the arrival of these "V" types, these visitor types, these extraterrestrial beings who are ready to present themselves in this way. Part of the underlying purpose for the show is a cross purpose to the show. This Awareness is suggesting here that part of the purpose of the show isn't simply to awaken the human race to the arrival of "V"s and to mistrust them; It is also for the purpose of creating a *perception of danger* with the arrival of the extraterrestrial beings. This Awareness asks for a pause at this moment. There has been a loss in the energy in this subject.

### QUESTIONER:

Yes, what the question concerned was in a couple of episodes. There was a session on the program "V", where an inoculation, a vaccine was being prepared that had some type of control mechanism in it that was supposed to have been given to the peoples, to humanity, and the group of people had blown up the warehouse that controlled this, that contained this.

### COSMIC AWARENESS:

This is indeed a bit of Hollywood entertainment, but what *is* accurate, is that it was relevant to the existing plans of those in power, and that part of the purpose of the program itself is to expose those who have power, and that part of that plan of the inoculation program of H1N1 was presented and clearly stated in the program "V", that the vaccination was indeed with ulterior motives, and that the vaccination would cause other things to occur than what was stated. This is *exactly* the same as the plans of those in power and in their statements that the vaccination program would prevent individuals from getting the swine flu virus, when indeed the real truth was completely another matter. Does this now answer your question?

### QUESTIONER:

Yes it does, and it raises another. Was it the plan to have people who are watching this program to become aware of this possibility, to help them realize there's more going on than what they realize?

### Cosmic Awareness:

Indeed, this is part of the plan. This Awareness was trying to explain this earlier, that the cross purpose of the plan is to create in the mindset of humanity an apprehension against the arrival of alien visitors, extraterrestrial visitors. This could be seen as both detrimental and positive. It would be detrimental to those who would present themselves who are here to truly assist the world at this stage, the Galactic Federation in this case. It is detrimental to their arrival. It is positive to the mistrust of the reptilian beings, the Orion beings who would present themselves. In other words, this is an area that

there is still confusion over as to what the truest intent of the producers of this series had in mind.

It must be remembered -- and this Awareness will give away a bit of the plot at this time -- that the original series showed the child that was born as the result of the union of the reptilian and the human as that who became the *Savior* of the planet, this small child establishing herself as a quintessential being with amazing powers, who saved mankind, humanity. This Awareness does indeed remind all that the possibility of the Messiah, of that being Maitreya, may well be with the same intent and focus as the child on the program "V". If a being shows up promising to save the planet, would this not be similar to the results of that earlier episode of the series "V", where a messiah-like being, in this case a child, appeared to save humanity?

### What the Gold Fringe on the American Flag Really Means

There are many parallels. Those in charge, those Powers That Be often very openly declare their intent and purpose, but it is done in such a way that it is not recognized or understood. For example, on the American flags displayed in public locations, in federal locations, there is a gold fringe on the edges of the flag. This *gold fringe is a declaration of martial law* and it is openly displayed at all times, for those who are in power know full well that the majority of individuals will not understand the significance of the gold fringe and will simply see it as cute decoration. This is also so with this series "V". The Powers That Be are *openly displaying* much that is occurring, and rubbing the noses of the viewers in that evidence that is being presented and yet truly believing that the majority will not truly understand what they are seeing, understand or believe that it has truth, that it has validity.

### Cross-Purposes on the TV Show "V"

They will simply see it as an entertaining show and it will be only that to them. There are cross-purposes to the show "V". On the one level, evidence and truth is being presented, but the true purpose of those presenting it is not to truly expose and wake up the populace, but rather *to confuse them*, divert them, and to cause them to think this is all simply entertainment, so that if and when there is indeed a First Contact that the majority will disbelieve this, and will not truly believe what is occurring.

There will be others who will see this as an invasion, who will not believe those who come are coming in peacefulness and with the intent of assisting humanity. They will become the skeptics to any who present themselves, and then there will be those who will openheartedly welcome the visitors. There are many things that can be interpreted from this program and the intent of the producers of this program. This Awareness will leave it at that and allow those who view the program to see it as they will see it, whether as pure entertainment or as the means by which the truth is being shared and expressed to a larger audience.

One thing this Awareness will say is that when the truth is presented, even if it is for the purpose of misguiding and diverting the attentions of the viewer, the truth is still planted as a seed in the consciousness of the viewer and may yet well flourish at a later date.

## THAT ARMY OF 25 MILLION IMPLANTS

**Question:** That was very, very informative Thank you)

Jan in Holland writes: "In your 91-17 *Revelations of Awareness* issue, there is a reading that an army of 25 million implants is now in the US. I wonder what is the situation today in 2010 in your country and if possible worldwide? Can Cosmic Awareness please give us an update and general overview?" Your comments please?

**Cosmic Awareness:**

This was an earlier version of the plan to implant the majority of the populace of the planet with the nano-chips. The original process was seen as too laborious and slow and many of the implants were defused or voided due to physiological factors and reasons, and not all the implants were working properly. It was for this reason that the choice was made to come up with a new program in which the majority of the individuals on the planet could be implanted with nanochips through a mass inoculation program. This is the truest purpose behind the H1N1 vaccination program: the introduction of the chips that earlier were implanted.

Many of those who were implanted at the time *still retain* their implanted chips, their implants, but many, as this Awareness has just said, are now ineffective. The few that remained were not seen to be at a large enough percentage to be able to initiate and carry through the plans of the Powers That Be. The newer plan has also not been a spectacular success. Both occasions have been rendered ineffective through the intervention of the Galactic Federation forces and agents, who have worked hard to ensure that the plans of those in power do not come to full fruition. It is for this reason that there is still great hope that a majority of the people will yet awaken, and that the plans of the Powers That Be will never fully materialize. It is this level of belief and expectation that this Awareness would indeed recommend all to support and energize.

**QUESTIONER:**

Question please. What would be the rough approximate percentage of support now for the Galactic Federation?

**COSMIC AWARENESS:**

This Awareness does not quite understand the question. Support from those who already are in power, support by the masses of the planet, or support by those who are already aware of the Galactic Federation? This Awareness asks for clarification.

**QUESTIONER:**

I would say for the last two: the masses and those who are already aware.

**Cosmic Awareness:**

This Awareness would suggest that 70% of the populace is still asleep, still under the control of those who have dominion and charge. 30% have now become enlightened and aware up to a point where they understand that there are indeed these forces that are trying to control and manipulate. This is 10% more than in the early 1990s, when this Awareness declared there was only 20% that were somewhat aware. The 30% that are now aware are growing and their power to affect others, to influence others, to awaken others is exponentially growing as well.

**QUESTIONER:**

That's marvelous. It's really, really something!

**Cosmic Awareness:**

This Awareness also reminds all that the Ascension process, the rising of consciousness through the release

of the Ra-Ta consciousness is also having a tremendous effect, as are the further workings of those in the Galactic Federation.

## A GALACTIC FEDERATION GENERAL SPEAKS ON INTERNET RADIO?

Okay, we have another question here from Ted Helinski. He writes: "On May 29, 2009 during the *Evident Footprints* radio show on BBS radio, a call was received from an individual identifying himself as General Jeremiah, the commanding general with the United Galactic Federation, which consists of 574 planets. General Jeremiah was said to be from the galaxy of Hendon. General Jeremiah gave a 45-minute interview and during the course of that interview he supposedly e-mailed the radio host, Don Nicoloff, 26 color photos of a planet in the galaxy of Hendon, called Balqui. The photos can be viewed on his website and I have provided a link to them. I would like to ask if Awareness sees any of this as being valid and for any other comments It might care to make?" Your thoughts please?

**COSMIC AWARENESS:**

This Awareness declares this as an elaborate hoax. There is no validity in this claim, and this general is seen as bogus. It is simply yet another way to misguide those who wish to hear such evidence, and such a report.

**QUESTIONER:**

Ok, thank you. His second question also refers to information from this chap...

**COSMIC AWARENESS:**

That this Awareness will interject. *It* has declared this as an elaborate hoax. There is no need for further questions on this matter. This Awareness wishes it to be understood, that while *It* declares this matter as a hoax, *It* does not declare all such reports as a hoax. The mind must always be open and questioning, as this Awareness has so often spoken of.

## THE MACHIAVELLIAN PRINCIPLE

**Questioner:** What does he hope to gain from this?

**Cosmic Awareness:**

It is seen that this individual is somewhat deluded in his own thinking and it is seen that he is being used by certain forces, that which would come under the dominion of the psi-ops division of the CIA, as an individual who could be used to mislead and misguide others. If this is successful, then those who are misled will not be a problem, or need to be a concern of those in charge, those in power. There is that concept known as the Machiavellian principle. The Machiavellian principle holds that if you wish to control a people, the best way to control them is to create factions within the people that hold counter beliefs and counter opinions and then get them to fight amongst themselves.

As they fight amongst themselves, they will never unify to create an opposition to those in charge. Thus, the situation of opposition is defeated and defused before it ever rises up. This is the thinking behind such hoaxes and such attempts to misguide and keep the people separated, confused and disjointed, and to keep them fighting amongst themselves in stating this belief

or that belief. As long as there is dissension there is no energy for union, and as there is no unity there is no opposition, and those who are in charge are free to carry on as they will.

**Questioner:** Divide and separate.

**Cosmic Awareness:** Indeed, this is truly Machiavelian in concept. Divide and conquer.

## IS THE EARTH REALLY ROUND?

**Question:** Thank you. We have a question from Iris Schuberth. I don't have a location...

**Cosmic Awareness:** This Awareness understands that the entity is in Kansas.

**Questioner:** Thank you). She writes, "I ask myself this question many times: is the Earth really round? If it is, then why do they show us pictures of a flat disc universe and the Earth is always in the same spot on the spiral arm? Could you please ask Cosmic Awareness about this? I know our teachers told us a lot of 'crap' in school from the government books." And she writes, "Love Iris". Comment please?

### COSMIC AWARENESS:

The dimensional aspect of the planet is indeed global. It is a globe. It is an orb in the fabric of space. This is a rule of physics in the swirling of the energies of mass, the mass energies swirling around a central core. When this action/energy occurs, a hollow core is created with a swirling of the particles of energy that coalesce into physical matter surrounding this core, creating a globe. While it appears from the pictures that the globe is seen as a flat disc, this is not the same as stating that the planet itself is flat. It is a globe, and in the third dimensional holographic presentation of planets it is part of an immense globe, with planets contained within the energies of the globe, circling that which is a central sun at the very core of the galaxial globe, the universal globe.

### Belief in the Flat World Philosophy

There is an interesting matter in this entity Iris Schuberth's question; the matter of belief. It was once held that the planet was a flat disc and that one could literally sail out and over the edge of the disc, falling away into oblivion. In the Dark Ages and up until the discovery of the New World, many believed that there was a great danger in sailing the seas of the world and that there were not only the edges of the world to be sailed over, but that there were dragons and other mythical creatures that would swallow up and destroy those ships that went too far.

If one got past these mythical monsters, these alleged beings and creatures, then one stood the real risk of sailing over the edge. This, of course was later proved to be erroneous and the world was shown to be a sphere and not a disc, but it still remained in the thinking of many that the truth was that the planet was a disc, and it took many, many years indeed for the world opinion at that time to change. It did of course change, because the capacity of the human mind expanded in its ability to accept a bigger picture.

What the entity Iris Schuberth is *correctly doing* is understanding that mankind, in a manner of speaking, still holds a flat world philosophy when it comes to human events and human circumstances. Mankind still in some ways is very much confined in its thinking of a

limitation of the parameters of reality. While the matter of the physical nature of the planet may be resolved, (it is a sphere) the *thinking* of mankind still limits men and women to not exceeding themselves, not venturing out too far, and keeping in safe waters, for one does not wish to extend one's self into a region where dragons may actually exist.

Therefore, in the maintenance of the rationale, the philosophy of physical reality as it now exists, there is the *maintenance* of that which would be a flat world philosophy. This Awareness has challenged you many times to go beyond the boundaries and barriers that define one's personal reality, one's personal life, and has said that society itself must now expand its consciousness and its understanding beyond the edges of reality that are currently held. These edges of reality, this restriction in thinking and in the beliefs held, very effectively contain mankind into that limited reality that many hold as the truth, the truth of this physical plane of existence.

This Awareness is, of course, suggesting that it is time to break free, to go beyond the boundaries and limitations of limited thinking, of flat world thought, and in this there is a very strong parallel to the ancient thinking that physically confined the planet to a physical flat disc nature. This Awareness congratulates the entity Iris Schuberth for her very enlightened thinking on this matter.

**Questioner:** That's good, the puzzle solved, right?

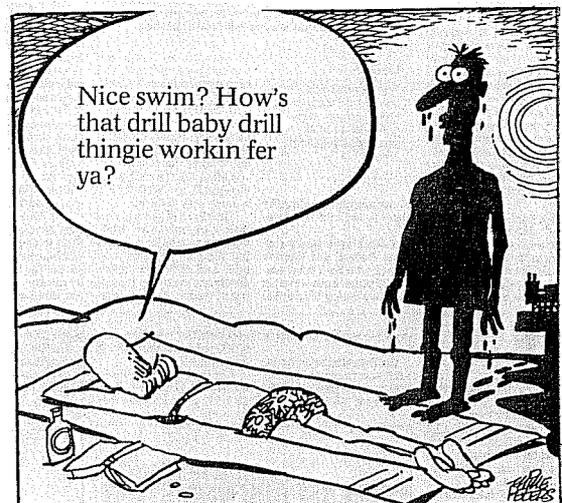

**Cosmic Awareness:** It is but one of the millions of puzzles yet to be solved.

This Awareness is complete.

( The Law of Gratitude is given)

Ed's Note: during May we received 5 readings that contained questions that relate to current events still making headlines in the media. There is no room to include these in this month's newsletter but some excerpts have been posted on the CAC website <[CosmicAwareness.org](http://CosmicAwareness.org)> click on HOTLINE UPDATES. Of particular interest is the information on the Gulf Oil tragedy, which was no accident but was sabotage by the Powers That Be for nefarious reasons yet to be revealed.

Their atrocities have been amplified and they are daily creating more events solely designed to create fear and terror. For example, 'Nightmare Hall' has surfaced and their genetic engineering creations now include werewolves and other legendary creatures to stalk entities.

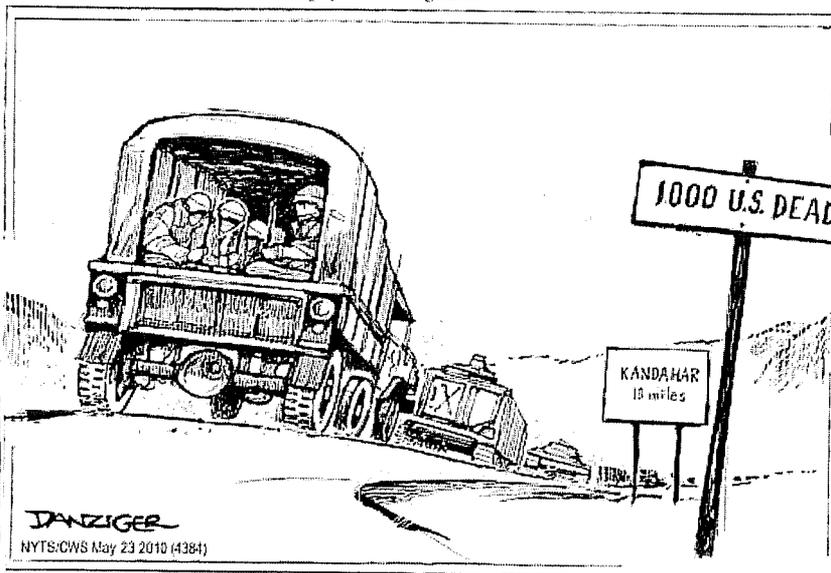

### WHAT IS COSMIC AWARENESS?

COSMIC AWARENESS is the Force that expressed Itself through Jesus of Nazareth, the Buddha, Krishna, Mohammed, Edgar Cayce and other great avatars who served as 'Channels' for the 'Heavenly Father' and who speaks again today as the world begins to enter the 'New Age' of spiritual consciousness and awareness. Since 1963 Cosmic Awareness has been communicating through carefully trained channels. This information is for those who desire to help in bringing in the New Age. Throughout the thousands of 'Readings' given through these various channels, Cosmic Awareness tells us not to believe anything, but to question, explore, doubt, and discover for yourself, through your own channel what is the truth. Cosmic Awareness will only 'indicate' and 'suggest'. Neither C.A.C. or any of the Interpreters is responsible for anything Cosmic Awareness states in any of these readings, nor does C.A.C. or the Interpreters necessarily agree with the statements of Cosmic Awareness. The Interpreters interpret the energies as they see them in trance levels and are not personally responsible for what is said. The Interpreters published herein have no connection with, nor control over the editorial comments and material, including illustrations. This is entirely the responsibility of the editor. Members of C.A.C. are invited to send in questions of general interest to ask Awareness for possible publication in this newsletter.
