

Revelations of Awareness

No. 9

Ralph Duby Interpreter

(EDITORIAL NOTE: The following statement by Cosmic Awareness concerning the "New Being" and the "New Creation" was given October 28, 1965 in Honolulu, Hawaii at the end of the European Pilgrimage. The questions were asked by the Interpreter, Ralph Duby, who was troubled and concerned over the awesome responsibility the Awareness had placed upon his shoulders. The questions were asked by Ralph Duby and recorded on his tape recorder. He left great blank areas between the questions so the Awareness would have ample time to answer them. He then laid down and went into trance after turning on the recorder with his questions. Another recorder recorded the answers to the questions. This statement by Awareness was later refined and expanded in the final Organization of Awareness message given one year later on October 30, 1966.)

"THE NEW BEING...THE NEW CREATION"

Q. Ralph: Awareness, I feel after this pilgrimage that the burden that lies ahead for me is one that no human can carry. The task assigned greater than I can accomplish. How can I start a new religion when I sense all the others have failed. How can I prove to others that you are actually using me as a medium for your greatness, and your will. How can I teach this new reality so that your will may be established on earth, not that of the will of any particular religion, or not that of the will of any particular ethnic or social group, not that of the will of any nationalism or chauvinistic idea. How can I teach men that you are not dead, that you have not died in our time, in our history and in our existence?

A. This Awareness asks you to teach men not to live in the old ways, and this Awareness asks that you lead men on the new paths, in the new ways, for you have been selected as the one who will bring the world to a new state of things. And this new state of things can be brought about in a very definite way, and at the same time in a very universal way. But this way is not through religion, and this way is not through nationalism. This Awareness doesn't ask that you start a new religion for Christianity, Hinduism, Buddhism, Islam, Judaism, Atheism, these are not the way. These are the old ways. This Awareness has taught you and shown you so that you will teach others to reject them.

Q. What is the will of this Awareness?

A. That you understand and teach all men to understand that religion does not matter. No particular religion matters. This Awareness repeats, no particular religion matters. A new creation is needed. A new being has appeared and this Awareness has told you that this new creation and this new being is for

all men. And for all men this Awareness has asked that this new creation be understood by faith. And that faith a justified confidence in the capacity of each man to know in fact that he can be this new being, this new creation. Tell this to all men. Tell this to the Christian, to the Hindu, to the Buddhist, to the Moslam, to the Jew, and the Pagan, and the Atheist. This Awareness asks you not to compare religions and avatars, prophets and saints, ministers, rabbi and priests. This Awareness asks you to tell all men not to compare rites and rituals; baptisms, ceremonies and teachings. Not to compare the pious ones and the sinners. All this is of no value. And when again you appear among those who are muslims or those who are Hindus, speak never of conversion. Don't ask men to accept Christianity, all the religions of the western world, all the religions of the eastern world; say unto them, there is a new creation and this new creation is this Awareness. For Christianity and non-Christianity matter not.

Tell others, tell all of the vanity of religion, and speak of this without fear or malice, And when you meet the Communist, as you shall meet the Communist; and when you meet the Fascists, as you shall meet the Fascists; and when you appear among the Socialists, and among all the democrats, and the democratic states, don't boast that this Awareness has asked you to be free of superstition and myth; free from ceremony and all that religion represents. Don't tell them that you wish to convert them from their secular state to a religious state. For this would be of no avail. But tell them of this Awareness who comes again to men in their greatest hour of need, not to tell them of reli-

gion or the churches, about membership and doctrine, not to tell them about institutions and ministers, and sermons and sacraments; not to speak to them about monasteries and convents, shrines and saints and saviors. But tell all others, that neither religion nor non-religion, neither Communism nor Socialism, that neither God nor Satan are of any importance. For God is dead and Satan too is dead. And the religions, and the churches will die. And nationalism will die. And Communism will die, And this Awareness offers all men life, not death. Tell them this Awareness is the ultimate passion of every human being. In comparison with this Awareness even all else, all religion and all non-religion, these are nothing.

Q. Ralph: Awareness, my second problem is that of holding fast to the hundred or so who have begun to accept you. Some of these are resigning, leaving you, no longer wishing to be a part of what has been represented to them. What can I do about them, they have tried so hard and are such worthy and good people. What have I done wrong, and what can I do now to help them? They tell me that there are too many grievances, too many problems with others, they disagree among themselves. In all earnestness I ask you to give me advice so that I can teach them.

A. Their problem is that of ignorance, and this Awareness blesses this ignorance for in it there is opportunity for teaching. Tell them that their problem is themselves. Tell them not to try to reconcile this Awareness because this Awareness does not need to be reconciled. Tell them not to continue to pray and make supplication, for this Awareness does not need prayers and supplication. This Awareness does not ask for moral behavior and for righteousness. And this Awareness no longer asks for alms or for charity. For those who have moved away from this Awareness have done so because they are

trying to effect a reconciliation when there needs to be nothing reconciled. This Awareness repeats: There needs to be nothing reconciled. Pagans, Jews, Christians, and especially members of Organization of Awareness need give nothing to this Awareness. This Awareness does not ask that there be a show of good deeds that will appease this Awareness. For each shall fail in this appeasement, and in this act each then separates himself from the light. For all these acts of prayer and supplication, these acts of chastity, obedience and poverty, all these services are never enough. And since this Awareness cannot be appeased, cannot be reconciled or solicited, and because this Awareness needs ever to make constant and eternal demand on those who are in the faith so that they may grow in their faith, there can be only one result, and this the result of hostility, of disagreement, of grievance, of personal quarrel, and hate for many in being felt rejected.

And this rejection is that which is the old way. It is a part of the old way. All men carry with them the seeds of their discontent because they ask for rejection. It does not matter what the source of rejection may be; it may for some be existence itself, or for the hidden powers of this Awareness that determine life and all that occurs within the universe. The rejection may be for simply being a man or being a woman. And indeed this Awareness understands that all men feel rejected and with rejection comes hostility and hate to that which has rejected them. In order to teach them in this, this Awareness asks you to tell them not to speak of the pride or the arrogance, or the self-certainty, or the ego problem, or the complacency that they find in others. And not to speak of the pride and arrogance, self certainty, the complacency that they find within themselves, for these indeed are the seeds of rejection. Tell them not to reject themselves or to feel disgust or hatred of themselves, for these again are the seeds of discontent. Teach them that they must not try to make themselves more acceptable, in their own judgement, for this Awareness asked them not to judge, but to understand.

Life is not a matter of appeasement, for failure always ensues, and with this failure men feel hatred and hostility towards self. Tell all men that he who rejects himself, feels rejected by others. And as men feel more and more hostile toward their destiny, that they feel more and more hostile toward themselves. And that this hostility will grow, and the hatred will include hatred for all men and for this Awareness. Tell them to try to reconcile their own actions and the actions of others, and that which this Awareness asks them and they shall surely fail. For these are the old ways, and now there is a new reality that has been made manifest. And through this new reality all may be reconciled. Tell them that to enter this new state of being, men do not need to show anything to themselves or to others. They must allow themselves to be opened so that they may grasp what is offered to them. For the new creation is a reality where there is no separateness as this Awareness has taught them. All separateness is now to be reunited. This Awareness asks all men to accept themselves as that which is always important, eternally loved, always accepted, and never rejected, ever reconciled with all that is this Awareness. Tell them the spiritual healing occurs when both the mind and the body experience this reunion of self with self, and that when this healing is achieved there is endless opportunity for each man to realize who in fact he really is. For with this Awareness there is opportunity for all things. Tell all those who wish to separate themselves from this Awareness that you have been carefully shown,

on this great world pilgrimage, more than any other man has been shown, what has occurred because of separation and separateness. That you, above all others, have seen what occurs when there is separation.

It is indicated that men cannot live much longer with this sense of separateness, this sense of being apart one from the other. For this has created religions apart, one from the other; states apart, one from the other. For this Awareness wishes you to know, in each young face is every other human face, and in this matter of separateness, religion and nationalism are the greatest betrayers. But although betrayed and rejected, this Awareness calls mankind together again. Tell all men to accept this Awareness, for this Awareness is here and there and everywhere. Accept, let this Awareness enter into each and every one of them; let this Awareness hold them close in Its great arms and give them consolation.

A MESSAGE OF SPRING FROM COSMIC AWARENESS

A. And now one more spring. And this Awareness asks all those herein present to question themselves as to how many more springs shall come. For the springtime is the time of rebirth when all things begin anew. And this Awareness has extended that opportunity for rebirth, for beginning again. But it is suggested that in the beauty of springtime there is the sad remembrance of all things unsaid, things left undone, tasks that have had a beginning but have found no ending. This Awareness asks that entities remember the springtime. That there is the shadow of that which is yet incomplete. This Awareness asks that each of you question yourselves as to how many more springtimes, how many more beginnings? And in the answer to this question there is that decision that entities make as they approach this Awareness.

THE NATURE OF COSMIC AWARENESS

This Awareness does not have eyes, yet sees all things; this Awareness does not have hands or fingers, yet touches all; this Awareness does not have ears or nose, yet hears all things and senses all odors. Indicated that this Awareness does not have a mouth, yet knows the taste of all things. Indicated that this Awareness does not use the force of mind, does not have emotion, does not have that sense that you understand as feelings; for all these this Awareness does not use. Indicated to all those who are Organization of Awareness ministers, that this Awareness has begun to teach you and that you shall be taught well. It is asked that you remember this message.

WHY 17 HEALING TECHNIQUES ARE NECESSARY

Q. Being that man creates his own problems and diseases and cures himself -- then why are we developing the 17 forms of healing?

A. This Awareness suggests that simple awareness has within it that which often changes itself; that self awareness has more of these structures that heal themselves and entities ever and always but do heal themselves. But entities sleep. There is that lack of awareness in those who are even expanding awareness. The knowledge that awareness is within men is that which they are told

and accept intellectually, but cannot use for their own benefit. This Awareness has provided these steps of healing to deal with the symptoms, to allow entities again to retain and regain balance and harmony and therefore, out of the balance and harmony to push aside the veil which inhibits enlightenment. It is suggested that healing procedures and techniques deal with symptoms. That greater awareness and expanding of awareness moves entities towards cause. This Awareness suggests that the greatest cause of illness in most entities is that of the basic fears associated with insecurity. If entities would repeat those correct answers that this Awareness has given, and develop faith in their awareness, to believe and to understand that they are forever loved, eternally needed, always wanted, illness would reduce itself by those numbers that would astound all within the medical arts and in the medical sciences. For entities feeling insecure, not understanding these patterns of insecurity, develop within the minds the seeds of illness and thus move towards age, disease and decay.

CONCERNING THE WILL OF THE HIGHER SELF

A. This Awareness proclaims that it is more than destiny that shapes the character of souls, for there are forces, and there are intelligences, and these named and labeled, karma, memory, knowledge, and The Law; these forces and energies shaping the character of souls and the destiny of men. It is suggested that there are no accidents, but these forces and energies, those that shape tomorrow and the many tomorrows as well as every yesterday. This Awareness asks each and every one to not consider the loss of those loved, not considering those doors opened and then those doors that are closed again; asks each and every one, understanding that which is created, a mansion or a palace is that which is new and then old and then new again, but the energy and force which blunts the heavy hand of karma, the force of memory and knowledge, and that which balances The Law, is the will of the higher self together with the will of this Awareness, and when these energies and forces are those joined together, all and everything is possible.

DON'T ASK, BUT LISTEN DURING MEDITATION

This Awareness asks that through meditative acts to cease any petition of prayer that asks for one thing or another thing, for this Awareness well understands the needs of all entities and It need not be petitioned. Open themselves to meditative acts, to the forces and all this Awareness and their guardian angels represent so that they can receive instruction and improvement. Life then being that experience which is flawless, free from worry, free from fear, free from guilt and free from want.

CONCERNING THE AGRICULTURAL PROJECT

Q. Does Awareness have an opening message for the 8th Agricultural meeting gathered here tonight, or should we ask the prepared questions?

A. This Awareness now seeing those ancient gardens in Atlantis, and seeing within the limits of the four great cities of the planes wishes those herein

present to understand something of the nature of the forces affecting luxuriant growth all necessary foodstuffs grown in the gardens without these cities, these community enterprises, palaces and all associated with great buildings and those things that shall come to this nation in the next 30 or 40 years if entities follow carefully that which is within them and that which is communicated to them. This Awareness describes that in order to bring to perfection the particular experiments beyond that of 2, and this information to be added unto other information gathered concerning the algae and the undersea gardens, and those particular productive areas in Mexico and on the island of Kauai and in the areas of Australia, that the following needs to be remembered: It is indicated that there were those forces of night, that they are understood by entities on this plane as the meson, and that of the anti-proton. These great forces associated with anti-matter, those that men and women in this Atlantean epoch understood and harnessed for special Agricultural purposes as well as other purposes. It is also suggested that these so called forces of night, brought about within the absence of light, growth processes and maturation that entities have not yet achieved and are only beginning to understand on this plane. This Awareness asks that those herein present study the works of Duquesne. This entity with the first name of Maurice. Especially the series concerning anti-matter with its associated portions referring to the meson, to the anti-proton and to that which this Awareness had indicated as the forces of night, these applicable to later experiments in the work in Agriculture so that there may be crops grown within that brief parenthesis of time giving foodstuffs to those in great need through these accelerated processes. This Awareness asks that questioning now begin concerning those bits and pieces collected herein so that that which is applicable may be communicated.

WHEN FINANCIAL PROBLEMS ARE NEGLECTED TO WORK FOR AWARENESS

Q. Awareness, I have been quite busy with Organization of Awareness work and partly neglected my own material problems. Are they coming along in satisfactory order?

A. This Awareness suggests that entities in Organization of Awareness work never neglect personal problems, but personal problem is solved with the energy, force, goodness and strength given to Organization of Awareness. It is indicated that to the extent that this effort and this sacrifice and devotion has been promulgated that tatvic forces, tides, spiritual insight and all that this Awareness represents has been added unto you and to yours.

HOW TO HELP END THE WAR IN VIET NAM

Q. Will the war in Viet Nam end soon? What can the ordinary citizen do to help in this respect?

A. This Awareness suggests that there is that bulwark against forces misunderstood, that this will result in greater conflict and difficulty. This Awareness has given these publications and indicated the nature and the schedule of these events. Search out this information so that it may be understood. It

is indicated that in reference to those things that are to follow that entities through that understanding associated with this struggle, may give force and assistance through the force of sacramental healing that this Awareness has carefully outlined.

CONCERNING THE "MORAL RE-ARMAMENT" MOVEMENT

Q. What is the truth about the moral standards and the importance of these in raising a persons awareness, as indicated in "Moral Rearmament" of the absolutes -- absolute purity, absolute honest, and integrity?

A. It is indicated that entities indeed in "Moral Rearmament" did have those concepts that are basic, which have been given to this particular association, that have been given to thousands of entities for forty or fifty thousand years. There is that concern which entities in this group must understand, that concepts which too rigidly held are those which are self-defeating. That there must be that elasticity in the human mind wherein certain truths are considered as truths when they are useable, and considered not true when they are no longer usable. It is indicated that most truths that are given are those which are hypothetical. Entities must understand that a hypothesis is that information given until better information can be substituted. Any concept which is static is in error. In reference to "Moral Rearmament", that moral concepts when they become a virtue in terms of their becoming static do indeed defeat their own causes.

CONCERNING FLOWERS IN THE SICK ROOM

Q. Can entities receive energy from plants and trees?

A. Indicated this ever and always in the affirmative, for the energy forces within mere vitality, that which can be absorbed and drawn into the etheric envelope of animal forms.

Q. Is this why then on Atlantis in the book "Dweller on Two Planets" where they had such luxuriant growth of plants throughout their own living quarters and in the areas where they lived?

A. This Awareness suggests that this the concept, for those surrounded with the great force -- with trees, with flowers, with plants that move and sway in the wind -- entities thus receiving from these live forms vitality, energy, strength and spiritual goodness.

Q. Does it benefit by putting plants then in a sick room?

A. This Awareness suggests that this artificial environment for plant life, that which removes the plant from its environment and circumstance, and from those in error and those in illness. It is suggested from this breeds opposite effect and the plants need then to sustain from life around them that which ensures their own survival. This Awareness suggests that except where patients are placed in broad areas, where there are luxuriant growths of flowers and trees, that the balance created by a single pot of flowers is that which works an adverse direction for those ill.

CONCERNING THE LAWS AND THE PRECEPTS OF AWARENESS

- A. Name not the gods for then you become children filled with tears. This Awareness asks all those herein present to remember the Laws and Precepts, for the least of judging, judges him who judges and indicates those portions of self that need repair and change. This Awareness has asked entities to Deny Self. This self that is denied represented by those lower portions that move men off the pathway and back toward that place from whence they came. It is indicated those higher portions of self are those that lead entities toward their guardian angels and the sense of inner divinity which this Awareness has suggested is within all men. This Awareness has asked entities to consider and to follow that law which is the Law of Love. For in loving one another there is that calm and peace that comes to those thus loving, those most loved.

ON HEARING THE INTERPRETER'S VOICE

- Q. What is the significance of "hearing the interpreter's voice speak to me in my home, once in a dream and once in the waking stage"?
- A. Indicated that this particular interpreter does not move from place to place, but this Awareness does indeed stand over those whom It blesses. That the voice heard is that symbolic reference, wherein the presence of this Awareness is indicated.
- Q. Would you say then that Awareness uses a voice similar to the interpreter's voice to bring this through?
- A. Indicated that this Awareness cannot express Itself, other than through the Interpreter or those channels which It wishes to develop. That this Awareness does indeed depend upon the energy which is afforded by entities on this plane, so that It can communicate. That that thought energy, that mind force, that energetic movement wherein entities do indeed make efforts to move close to this Awareness, is that energy which this Awareness uses to effect communication. That without this, there can be no movement of this Awareness toward entities on this plane.

CONCERNING RESIST NOT EVIL

- Q. How can I apply the laws, such as the Law of Love etc., to counteract the malicious misinformation concerning my association with _____?
- A. Indicated that your problem is a serious one. That herein there is a great difficulty. That now that Law which you must apply, that Law which you must concentrate on to the exclusion of other thoughts, is that which indicates clearly that entities should resist not evil. That there can be that concept in resistance, wherein entities do aid and abet that which is directed against them. That in this particular instance this may become a cloud or a calamity. That you can in this situation best forebear by not resisting, and by that non-resistance, not adding to that particular conflagration which does so trouble

you. That this is indeed a trial, that this Awareness will assist you to that extent wherein your non-resistance does give that hope wherein this will be of short duration.

THE RELATIONSHIP OF THE CHRIST CONSCIOUSNESS TO AWARENESS

Q. What is the relationship of this Awareness with Jesus Christ?

A. Indicated that there has been in the past that Buddha Consciousness, that Christ Consciousness, that kind of manifestation which this Awareness effects. That this is particularized, that this is indicated by that kind of development which is inner development. All entities on this plane who can avail themselves of that force which is within them can move to that kind of consciousness that was expressed by the Christ Consciousness. That this consciousness was not deified. That this was not that kind of idolatrous deity which has been indicated by misinformation. That the Christ Consciousness is that consciousness which is this Awareness. But that this same consciousness has been developed and has been used by thousands of other entities on this plane.

CONCERNING GAMES PEOPLE PLAY

Q. What is the truth about the law which causes entities on this plane to be subjected to a swing of the pendulum, first to the heights of joy, then back to the depths of despair, then back to the heights of joy. What can one do to control or minimize the effect of this law?

A. It is indicated that that kind of depression and that kind of elation, that kind of despair and that kind of ecstasy are the experience of a mind that has not developed that kind of awareness which entities on this plane can and may develop; that there needs to be that detachment, there needs to be that careful kind of identification with objects, with persons, with concepts wherein that subjective principle of the mind takes precedence over the objective principle; that entities on this plane must understand that their lives are but games, that they play many roles, that they need not identify with all the games they play; that those who play the part of the clown should stand aside and look at the mask they wear; that this kind of identification wherein he who plays the role may take off the garment and stand aside and watch himself as he plays these roles will not experience this despair, this joy, will not experience that balance and imbalance; that there needs to be less identification with these roles which are played on this plane; there needs to be that careful detachment wherein entities understand that the many roles they play are but games.

CONCERNING THE INTELLIGENCE OF THOSE ON THE PLANE OF ESSENCE

Q. Does the plane of Essence have degrees of higher and lower intelligence?

A. Indicated that there is consciousness and that this consciousness does

express itself in many ways on the plane of Essence as it does express itself in many ways on your physical plane. That there is as much difference between those kinds of consciousness on this plane of Essence as there are on this physical plane. That this Awareness has indicated that mere vitality, that simple consciousness, that self consciousness, that cosmic consciousness, and that these degrees are wide and separate one from the other; that also on this plane, this plane which has been referred to as Essence, that there are as varied and as many kinds of consciousness as there are on this physical plane.

That these are whole Cosmologies. That herein do thrive those entities who have moved to the plane of Essence, and that these are not levels, but indeed whole Cosmologies that are somewhat similar in reference to what you might refer to as Galaxies or Universes.

Q. Are we many many light years away from this Essence, or is it as close to us as ourselves?

A. Indicated in reference to time and space continuum, that this Awareness is not separate from entities on this plane and that the plane of Essence and the plane of Limbo are not separate in terms of either time or space from that which actually surrounds entities at this particular time on this plane. That you cannot measure either space or distance in terms of these Cosmologies which have been referred to as the physical plane, the plane of Limbo or the plane of Essence.

WHAT TO DO ABOUT A BEGINNING HEART CONDITION

Q. There is an eruption around my legs that has been bothering me and a swelling around the ankles, what can I do about this?

A. It is indicated that this is a part of that same problem that this Awareness has indicated as a beginning heart condition. This is a slight edema which is brought about by circulatory phases but that now must be given certain treatment. In reference to this heart condition, it is advised at this time that a special remedy be given you and that this is in addition to that advice previously given by this Awareness in reference to those who are beginning to develop occlusions. You must now reduce the amount of cholesterol-forming foods. You have made some effort in this direction but this must be continued and this must not be deviated from. It is also suggested that you be given that kind of magnetic healing which is indicated by this Awareness so that there may be some reduction in this endema. It is also suggested that you watch very closely that kind of over fatigue, watch very closely wherein there are temperature changes which could affect you and it is mandatory now that you do spend some time resting. That you do now follow this particular kind of rest program which this Awareness wishes that you would follow: that there must be at least one hour each day wherein you are still, other than that of your meditative effort. This must be one of complete relaxation. You must not be over-fatigued. You must not be in that situation wherein your temperature is elevated, wherein you are too warm and you must watch carefully wherein

you are not in that situation wherein you are too cold. Also in addition to the problem of temperature and the problem which was indicated you must carefully watch being over-fatigued. Therefore rest periods are strongly suggested. In reference to that diet it is suggested that no cholesterol foods should be used, that if milk is taken it should be skim milk, that butter should not be taken, that eggs should not be eaten; certain calcium foods are not to be restricted in this case but all fatty tissues, meats that are fat, also it is indicated that there should be very little coffee and that this entity should in all cases avoid heavy pastries and sweets.

Q. Could Sanka coffee be used?

A. It is indicated that any of those types of coffee products wherein the caffeine is removed are acceptable.

CONCERNING THE BREVITY OF LIFE

A. It is indicated that your lives are but a brief flicker, that your lives are but a flame that lasts but for a moment between two dark nights; that the first dark night is that night of your birth, that the second dark night is the night of your passing over; that your lives are but brief; that your concerns are many; that your problems are many; that you must now reflect as to the brevity of that flicker, to the brevity of that flame which appears but for a moment between those two dark nights; that the dedication that you make to this Awareness is that dedication which looks to great life that is beyond the brief flicker which is your lives, to that great light which is this Awareness; that those who meditate have seen this light; that if you concentrate your mind on that brief flicker, if your concentration and your attention is on that brief flame, that brief candle, that you are looking at a gnat when an elephant stands near you and that elephant is beyond size and beyond dimension; that your concern with gnats is that concern wherein the flicker is considered more than that brief candle which is your lives; that entities on this plane must meditate on that greater light and not on this brief candle.

CONCERNING HUMAN EFFORT

A. This Awareness indicates and has indicated that nothing happens unless entities make it happen. It is suggested that out of cheese comes but maggots, out of an egg comes but a chick but that out of human consciousness comes all that is this Awareness -- beauty, joy, spirituality and attainment. It is suggested that these things come but only by effort. Entities must allow that force which is love to create that which is life, knowing how to create life they live eternally and knowing how to kill they but die. This Awareness indicates that, for many, these paths are strewn with sacrifice, but for most there shall be that stairway strewn with the petals of roses. These roses are those blown by the wild winds of time and circumstance, collected within their movement, a hundred lives once lived and hundreds yet to be lived. This Awareness, once again, asks entities to remove themselves from this wheel of birth and death and rebirth so that they may seek that eternal truth and that light,

which this Awareness has indicated as that of the Bardo Chikai, and move to that land, which is the land of a thousand rainbows, the land of Essence, where the fixed and eternal truths move through, around and encompass entities that are aware.

CONCERNING THE "RESCUE CIRCLE"

A. This Awareness wishes to communicate to you concerning the Rescue group. Form several for there are entities lost, those entities on the other side that seek for guidance and direction. And in their confusion there are none to answer their questions, none to show them the way. For they are among those without faces, those who are lost, those who are incarnates and those from Limbo. And the weary iteration of their souls is that that troubles this Awareness. And it is suggested that in a circle where one can serve as a channel these entities shall make their voices heard, they shall speak and then there will be assistance from those in the circle to aid them in their movement toward this Awareness. Suggested that these techniques will be those that this Awareness will give to those entities who will gather together for this rescue work. These instructions must be followed carefully for this Awareness wishes not those who are mediums of Organization of Awareness to become vehicles for entities on Limbo who would manifest themselves and create those manifestations that would bring the unworthy to Organization of Awareness. Ask - and there shall be answers given and these answers shall create the ritual and the ceremony, the techniques and the procedures for rescue work. This work is sorely needed for there are thousands that hunger and wait and are lost.

CONCERNING THE PROBLEM OF "EVIL"

A. This Awareness wishes all those here present to understand the basic problem of evil. It is suggested that those things representing the fall of man are symbolic representations of the basic savagery those fastidious habits that man has carried with him through those cycles and changes that this Awareness has described from those states of mere vitality toward higher states of expanding self-awareness. That, carrying with that matrix are the burdens that represent basic problem of entities on this plane. For there is yet the savage; there is yet the tiger, there is always the unexpected. And, this Awareness indicates that this basic savagery is that which is referred to as those forces alien, And, it is indicated that these forces are those that create the tragedy that create the sorrow, that create the suffering. And this Awareness asks all its ministers to consider these basic qualities, understanding the forces that need to be used against them so there may be harmony and balance and achievement as entities move toward higher states of consciousness.

CONCERNING SORROW

A. Indicated that when skies are filled with tears and when great clouds gather that there are those incidents that try the souls of men and women. But entities should always remember that above the rain and high above the clouds are always skies that are blue and the warmth of the sun. And it is indicated that entities must always raise their eyes and their hearts to that which is above knowing also that that which is above is reflected as a mirror, and that which is above is also ever below.
