

DATA-NET Report No.4. *file*

On the last two nets we discussed the possibility of joining forces with the Aerial Phenomena Research Organization (APRO) of Tucson, Arizona. We now agree that this would be to the benefit of both groups! We therefore welcome Mr. and Mrs. Lorenzen and all APRO Members into DATA-NET. All information received from APRO will be relayed to DATA-NET members. APRO has members all over the world. Received two letters from Coral Lorenzen, secretary and co-founder of APRO. We are now working out arrangements for a direct radio link.

Correspondence and postage from Dennis K5QF1/VE6. Dennis states he will be looking for members on 15 M. Also received postage from WB6TXK Bob in San Jose. Paul WB6QZD is moving to Santa Cruz. We will be looking for info from there. WB6OTN Dave reports that his phone patch works out fine, from the design and hard work of John WB6VCM. Adolph Ortiz has been transferred to the Palo Alto plant of Link Group and now has access to a Xerox reproducer which should turn out better prints. Claudette Olea is working up a storm writing letters and reports. It was suggested on the last net that I write to QST and mention DATA-NET. This I will do. I have not yet received an answer from NICAP.

Fairly recently there was a report that a picture appeared in Germany that showed two secret servicemen escorting a small humanoid being clad in a silver cloth. The following comments followed; The whole thing is a fraud...the picture does not exist but is trick photography, superimposition...photo montage etc....., The men are real but the being is a dummy filled with saw dust. The being is real but the secret service men are dummies! (could be...but filled with saw dust?) I saw the picture several months ago. It showed two men dressed in trenchcoats escorting in between them a three foot man that appeared nude. Immediately behind them there stood two women onlookers.

Reported from Oregon; three boys claim they photographed a flying saucer over their house.

From Sunnyvale, Calif. we have a unique report; Mr. Tillet, 21, claims that his car was overturned by a UFO on the road. Officer Thompson states that Tillet dozed and flipped over. I think the UFO pilot had been drinking. Tillet was not cited, nor the UFO!

Friction between the University of Colorado and Project Bluebook. A photograph taken by Mr. Rex Heflin, termed a hoax by "Bluebook", is reported by Prof. Low of U. of Colorado as one of the best taken of a UFO.

According to Nobel Prize winner Sir John Eccles; the odds being what they are, the evolution of intelligent life is a "fantastic improbability". We should therefore not expect life anywhere else in the universe. It is purely by accident that we have life on Earth! One small point before I QRT this subject, it happened on Earth, despite the odds!

Our probe to Venus showed life there impossible: not enough oxygen, too high a temperature. However it said the same about the Earth. We are now going to take a second look. (apparently at the Earth too.)

Sergeant Ben Thompson of the Wanaque Reservoir police in N.J. saw a UFO at close range on three occasions. He recently made this statement of Project Bluebook personnell; "they dont listen to what you saw, they tell you what you saw! I would never report anything to them. It's a waste of effort." His feelings may be understandable. I wonder how many thousands of people feel the same way and how much information is lost because of this bitterness?

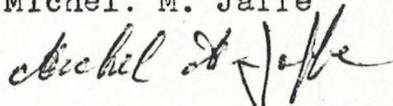

Project Bluebook still contends that UFO's may exist but pose no threat to the nation's security and it's citizens. In our next report I will show evidence to the contrary.

In order to alleviate the QRM situation and also give DX stations a chance to come in, the time has been moved up to 1930 PST at 7255KC. Then at 2000 PST we move to 21355KC.

This is it for now. I want to hear from you soon. Keep your eyes and mind open.
