Because it weekend was, and

I secure, that the Schi.iler definitive some seen Ha ben. I think, it were to a lot of, to to say, that you definite positive a UFO saw but I am Celebration from that convinced that you the truth to say. It consists the Possibility, that some came and us - off which Found also always - visited.

Through the Visit from prof Mack and his interviews With the children found we out that some from them serious problems batten, the Adventure to to process. we batten a Child, the inside so upset was and With the entire situation Not finished became, and boy, 12 or 13 Years old, caught with bedwetting on, and unfortunately refuse ten himself his Parents, the situation With him to discuss animals. His parents were

very religious, and finally you was it absolutely impossible, to accept, that her Son something like that experienced would have. she when theirs out, after Canada. " As others reacted Parents?

„The most behaved rather neutral. only whole little came to me, around the thing to to discuss. I wrote the parents a Letter, beautiful because of entire media hype, the in the next week about us broke in. " Lise/ mentioned there one Row from children the

feeling would have, the bangs be came, around us before the Destruction the Earth to to warn. How stands it around the ecological Be be aware the School?

„So, we are here of course very environmentally conscious, already because of location the sho le. but it is true, What Lisel Them told: A whole Row from children believed communications from the visitors received gene to to have. and the message was: stop the Earth in Order, cleans you, or you becomes Not more lan eng be."

To have the authorities for the incident interested sed?

„No, at all Not. but the bbc reporter, the beer was, asked at the Inter national Airport in Harare after, if man in the Tower some noticed would have. and the air traffic controllers in the tower explained you, thatB the

That is applicable into the special for very Boy, black Children: for you were the beings „small Monster" or To okolos – goblins. So explained me one eight year old, black girl, the back then (with six) just the first class see visited:

„I remember me, thatB I something with black, sharp Zen Eyes saw, and it would have a black Men's suit, and there was this goidene (sic!) spaceship , and I saw, how itself the people there driing th, and so went I also, around to see, What it was. I thought, it was only a small no Monster."

SCORING

I have the shape this conscious comparison more literal quotes ge chooses, around to clarify, how far indeed the descriptions the children from Ruwa agree. All quotes are word literally, there I all off to say for one future film documentation on Video (in one professional nell Format) recorded men have. Around full-

WHAT IST HAPPEN?

To one spectacular sighting wave about to the entire south Africa in connection _ With one satellite litenteil re-entry at the 14 September has apparently a cigar-shaped spaceship _ at the 15 . September the situation at the Ariel school scouted, before man at the 16 September over, on time to the large Break, to the landing on sat. It was Nothing small clear as a first more open contact with one out elected population group, the same two interesting characteristics _ exhibited: she was multicultural real and multiracial – and it were Children. who _ also always the landing orchestrated, he wanted to sat hen will – he landed to one Time, to to the Everyone children on to the breaks court were. He wanted to a certain Distance – he went sure , thatB a swamp and the thicket the children from that held to vicinity to grain. and he wanted to only children reach: He chose of all things those Break, on the Everyone teacher to one con reference in staffroom gathered were. the landing _ took, the shields ments the children according to in between 3 and 5 minutes, was so long enough to details to make out but to short, as thatB the teacher fetched will could ten.

fen, but mine opinion after sees Alles this how a perfect one staging off . Apparently would have someone an isolated one target group selected, how man you better nowhere find otherwise could: One lonely school literally at the End the world, nearly in the middle in the Bush, from forest and pastures _ around give, in one Country, the Not just in the center of public interest stands. the target group were Children, the as microcosm (nearly) Everyone races the Earth embodied. Children, the intelligent and open were enough the situation to handle. Children, the hardly better as test group for an experiment to serve could, how the Boy generation of planets Earth on a contact With aliens react would. (Interest kindly were also 1989 in Voronezh the key witnesses Children.) the children to have the exam _ so believe I, passed . who failed were their Parents, the it preferred the head in the sand to put and the Adventure of their children to to ignore. What saw the Children? Apparently a landed spaceship and (until to) three inmates. I asked each separate Child, if the happened

rather one vision equaled or real was, so real how to the example one helicopter plane dung (I hope, thatB this pure example Not again from professional UFO skeptics picked up will the probably beautiful thereon waiting, out to the Ruwa case one misinterpreted helicopter landing to make). With three Out of took answered Everyone, it be absolutely been real. Those, the rather on one vision believed gifts as single reason on, thatB you „so some still never seen" to have. It was a long time ago afternoon , _ versus 15.30 Watch, as I the interviews With the children completed would have. I would have you Everyone somehow in my heart closed, and I think both pages Has it fun did. Nearly a little melancholy said goodbye I me from those children, the until now with me ge stayed were, around me to help. A moment long did it me suffering, Not teacher become to be, to minimum on this school With their so bright and nice children . A long time ago was standing the school sport on to the afternoon hours plan, one resolute Sports Teacher trained „think Class" in the Hockey, wah-
