

## ANOTHER MYSTERIOUS LIGHT.

HAY, Friday.—A strange light visible in the sky last night attracted a great deal of attention. It was seen by a number of people in the east shortly before 10 o'clock, being very brilliant, and resembling a motor lamp. Afterwards it travelled across the eastern sky, and was lost to view away to the north-east towards midnight.

BROKEN HILL, Friday.—The mysterious lights in the heavens which have been noticed in other parts of the State were visible here last night in the south-eastern part of the sky. One very bright light had apparently smaller lights underneath. The main light was seemingly extinguished about half-past 11, but was again visible early in the morning.
