

A Glen Innes Mystery.

STRANGE OBJECT SEEN

FLOATING IN THE AIR.

By Telegraph from our Correspondent.

Glen Innes, August 15.

About 11 o'clock last night several residents observed an object resembling a balloon proceeding in a northerly direction. A night glass was obtained, and the shape of the object was found to be like an inverted top. The lower portion was lighted, and, as the body revolved, the light, like a small flashlight, kept turning on to the land beneath. The upper portion was in darkness. The object was drifting in a northerly direction.
