## A BRIGHT STAR.

From various parts of the State there have been reported strange lights in the sky. Some Sydney firms have sent up electric contrivances, balloon fashion, which have travelled to various parts and been visible many miles distant. Rylstone has its sensation to report, too. A brilliant light, much resembling a star, has appeared in the eastern sky, mostly between the hours of 8 and 12. A powerful glass focussed on it gives a splendid view. It is rather difficult to make out, but it is either a very uncommon star, or an advertised dodge of an ingenious mind.
