

STRANGE AND WONDROUS LIGHTS.

MORUYA, Sunday.

From 11 last night the heavens were illuminated with wondrous lights, first coming as shafts of light from a searchlight, and then in the shape of balls of light. This continued with remarkable variety and effect till midnight, at which hour a light in the south, appearing as the break of day, was further illuminated by a tinge of delicate pink, deepening to red, and by 1 o'clock gradually fading away. The whole of the phenomena was of a weird and extraordinary character, never before seen here.
