

## STRANGE LIGHTS.

---

### SEEN FROM LAUNCESTON.

---

LAUNCESTON, October 12.

Something similar to the strange lights which have been reported from the Straits and the West Coast were manifest in East Launceston at 9.20 last night. The light was more than a flash, and was sufficient to dissipate all shadows, but persisted for a few seconds only.

Observers could not say whether it was projected from the east or south. A similar light which appeared in different places several times was seen on Trevallyn about 10.5 p.m.
