

STRANGE MOVING LIGHTS.

Within the past few weeks reports have been received of strange moving lights seen in the air at night. Some declare the lights to be those of an aeroplane, and they were seen at Armidale, Manilla, Liverpool, Lismore, Bulli and at other centres also. At Bulli, a retired marine officer, brought a powerful telescope into operation, and he is positive that the lights were those of an aeroplane.

Bishop Druitt, of Grafton, intends to embark on an educational scheme, with the object of establishing several Anglican Grammar Schools in different parts of the diocese.
