

# Strange Objects In Sky

PORT AUGUSTA—While working in the yard at the Commonwealth Railways workshops this week, Mr. Ron Ellis and two work-mates claim to have seen five strange objects in formation pass across the sky from north to south.

The objects were white or light pink, and were shaped like an egg.

Mr. Ellis said that he could not give an accurate estimate of the size of the objects, but they were casting shadows, and judging by his experience with aircraft in the RAAF during the war he considered they were about the size of a locomotive.

Although the objects kept on a direct course at a height of about 6,000 feet they appeared to be quivering, he said. Owing to their great speed they were out of sight within a few seconds.

Any question of the phenomenon being an optical illusion was dispelled by the fact that a few minutes later both Mr. Ellis and his companion gave an identical description of what they had seen.

Their description was verified by another member of the workshops staff who said that he had also seen the objects.
