

"FLYING SAUCERS" AT WANGARATTA

A Wangaratta man will not believe that "flying saucers" are a trick of the imagination. He 'phoned the "Mail" yesterday and said both he and his daughter had seen one on Wednesday evening just before dusk. "We were watching the horizon on our way home," he said, "and suddenly from the eastern sky a huge round ball of greyish looking matter rolled like a hoop towards the south." The man said it was rotating quickly and appeared to be travelling faster than any plane he had seen.
