

## WANGARATTA MAN SEES "SAUCER"

A Wangaratta man said yesterday that he and his daughter had seen a flying saucer on Wednesday evening, just before dusk.

"We were watching the horizon on our way home when suddenly, from the eastern sky, a huge round ball of greyish looking matter rolled like a hoop towards the south," he said.

The man said that it was rotating quickly and appeared to be travelling faster than any plane he had seen.
