

Brisbane "Saucer" Was Meteor

BRISBANE. Thurs. — Brisbane residents who thought they saw a flying saucer pass over the city this afternoon saw in effect a meteor.

That is the opinion of a Brisbane astrological expert (Mr A. K. Chapman) who said the meteor must have been a particularly large one to be seen in daylight.

A woman hanging out the washing said she stood transfixed waiting for the end of the world. It was an orangy red colour, she said.
