

“FLYING SAUCER” SEEN AT MULLUMBIMBY

**MULLUMBIMBY, Fri-
day. — “Flying-sauceritis”
has come to the Far North
Coast. A Mullumbimby
resident, Mr. D. Wilson,
when returning to his home
last night saw a bright ob-
ject travelling rapidly across
the sky. He said he first
noticed it coming from the
east, and it flew almost in
a direct westerly direction.
At one period, he said, it
appeared to slow down
slightly and then moved
very quickly as if jet-
propelled. The object was
saucer-shaped and was
very bright. It was flying
much too low for a star.**
