

"FLYING SAUCER" REPORTED

Another claim to have seen a "flying saucer." has come from Mr. E. Somerville, a Goolmangar grazier. He said that at 2.15 p.m. he was scanning the sky when a bright disc-shaped object shot from one bank of clouds and proceeded at a great speed across the sky until obscured by more clouds. It was travelling in an easterly direction, at an irregular speed. A trail of white vapour appeared in its wake. He said he was convinced the "saucer" was man-made.
