

## ***“FLYING SAUCER?”***

A Mullumbimby resident reports that on returning to his home on the night of July 10 he saw, quite distinctly, a bright object travelling rapidly from east to west, across the sky.

At one period, he said, it appeared to slow down slightly, and then moved very quickly as if jet-propelled.

The object was saucer-shaped and was very bright. It was flying much too low for a meteor, he said.
