

# **Flying Saucers & Sky Monster Seen in U.S.**

Washington, Sunday. — The flying saucer era may have returned to the United States.

Two civil aeronautics employes and a farmer today reported they saw "a silvery moon-sized object" floating through the air over Yakima just after noon, and again at 4 p.m.

"It could not have been a weather balloon, because it was floating against the wind, flying low, and seemed to have flashing lights like fog lights," they said.

At Atlanta, Georgia, two pilots yesterday claimed they saw a huge flame-shooting "Speed Gordon" type of sky monster while flying over Alabama.

Today they stoutly maintained it was a "man-made gadget."

They described it as a "wingless affair with a circumference four times that of a Super-Fortress fuselage."

It was "definitely jet propelled, and had two rows of windows each about the size of ordinary house windows."

The pilots say they will be flying along the route again this week, and will take still and

week, and will take still and movie cameras in case the mystery monster appears again.

A Portland, Oregon, resident today said he saw "a big, round, bright object going west. It suddenly veered south-west in an awful hurry."

It bore no resemblance to an aircraft, and was roundish like a disc, he added.—A.A.P.
