

★ **A FLYING SAUCER—WITH WINDOWS!** ★

Australian Associated Press

WASHINGTON, Sunday.

—The “flying saucer” era appears to have returned to the US.

Two Civil Aeronautics Administration employees and a farmer reported today that they saw a “silvery, moon-sized object” floating through the air over Yakima (Washington) just after mid-day, and again at 4 pm.

“It could not have been a weather-balloon, because it

was floating up-wind and seemed to have flashing lights like a fog-light,” they said.

Meanwhile, two pilots who claimed yesterday that they saw a flame-shooting Speed Gordon-type of two-decker plane flying over Alabama, stoutly maintained today that it was a “man-made gadget.”

They described it as “a wingless affair, with a circumference four times that of a Superfortress definitely jet-

a Superfortress, definitely jet-propelled, and with two rows of windows, each about the

size of ordinary house windows."

They will be flying along the route again this week, and will take still and movie cameras in case the mystery monster appears again.

A resident of Portland (Oregon) has reported that he saw "a big, round, bright object going west. It suddenly veered south-west in an awful hurry.

"It bore no resemblance to an aircraft, and was roundish, like a disc."
