

# FLYING SAUCER ERA RETURNS

**YAKIMA (Washington), Monday (A.A.P.).** — The flying saucer era may have returned to the United States.

Two civil aeronautics administration employes and a farmer reported yesterday that they saw a "silvery moon-sized object" floating through the air over the city just after mid-day and again at 4 p.m. local time.

"It could not have been a weather balloon, because it was floating against the wind. It was flying low and seemed to have flashing lights like a fog light," they said.

Meanwhile, at Atlanta, Georgia, two pilots who said on Saturday that they saw a huge flame-shooting Speed-Gordon type of sky monster while flying over Alabama, stoutly maintained to-day that it was a "man-made gadget." They described it as "a wingless affair with a circumference four times that of a Super-Fortress fuselage. It was definitely jet-propelled and had two rows of windows, each about the size of ordinary house windows."

The pilots say they will be flying along the route again this week and will take still and movie cameras in case the mystery monster appears again.

A Portland (Oregon) resident reported that he saw a "big, round bright object going west. It suddenly veered south-west in an awful hurry. It bore no resemblance to an aircraft and was roundish like a disc."

R. Dewitt Millet, author of "Forgotten Mysteries," told United Press that the strange aircraft reported to have been sighted over Alabama on Saturday by two airline pilots might have been a space ship from another planet. He said: "Our scientists in-

form us that we may soon build space rockets, so why shouldn't beings on some other world beat us to it."
