

"FLYING SAUCERS" AGAIN

Many U.S. Reports

YAKIMA (Washington), July 25 (A.A.P.).—The "flying saucer" era may have returned to the United States. Two Civil Aeronautics Administration employees and a farmer reported to-day that they saw "a silvery moon-sized object" floating through the air over the city just after midday and again at 4 p.m. local time.

"It could not have been a weather balloon because it was floating up-wind. It was flying low and seemed to have flashing lights like a fog light," they said.

Meanwhile, at Atlanta (Georgia) the two pilots, who claimed yesterday that they saw huge flames shooting from a Speed Gordon type of sky monster while flying over Alabama, stoutly maintained to-day that it was "a man-made gadget." They described it as a "wingless affair with a circumference four times that of a Superfortress fuselage. It was definitely jet-propelled and had two rows of windows each about the size of ordinary house windows."

The pilots say that they will be flying along the route again this week and will take still and movie cameras in case the mystery monster appears again.
